AGL RESOURCES ANNOUNCES

DIVIDEND INCREASE

ATLANTA, February 2, 2005 - The Board of Directors of AGL Resources Inc. (NYSE: ATG) today approved a 7 percent increase in the AGL Resources common stock dividend.

The increase raises the quarterly dividend from \$0.29 per share to \$0.31 per share, for an indicated annual dividend of \$1.24 per share. It also marks the third dividend increase in less than three years, following 4 percent increases in both April 2004 and April 2003. The new quarterly dividend will be paid March 1, 2005, to shareholders of record as of the close of business February 18, 2005.

"With AGL Resources, investors get the best of both worlds," said Paula Rosput Reynolds, chairman, president and chief executive officer of AGL Resources. "We have consistently promised our investors that they would be able to achieve target returns through a combination of a competitive dividend yield and growth in earnings per share. Our Board has raised the dividend early in 2005 to provide assurance that the yield will remain competitive throughout the year. She continued, "At \$1.24, the dividend is particularly well-supported by our record 2004 earnings. Importantly, too, the company has a clear line of sight to improved future cash flows which will allow for reinvestment in the business."

Forward-Looking Statements

Certain expectations and projections regarding our future performance referenced in this press release are forward-looking statements. Officers may also make verbal statements to analysts, investors, regulators, the media and others that are forward-looking. Forward-looking statements involve matters that are not historical facts, such as projections of our financial performance, management's goals and strategies for our business and assumptions regarding the foregoing. Because these statements involve anticipated events or conditions, forward-looking statements often include words such as anticipate, assume, can, could, estimate, expect, forecast, indicate, plan, predict, project, future, seek, should, target, will, would, or similar expressions. Do not rely on forward-looking statements. They represent our expectations about the future and are not guarantees.
