STRONG SECOND QUARTER WITH ROBUST EPS GROWTH OF 28.5%

- SIGNIFICANT REVENUE GROWTH AND GROSS MARGIN IMPROVEMENT
PROPEL NET PROFIT UP 26.0% TO \$135.8M -
-

ROCKLAND, MA, JULY 21, 2004 - 04:01 PM ET - Serono (virt-x: SEO and NYSE: SRA), the world's third largest biotechnology company, today reported its second quarter results for the period ended June 30, 2004.

KEY POINTS FOR SECOND QUARTER 2004

- Total revenues up 15.6% to \$587.6m (up 11.2% in local currencies)
- Product sales up 15.2% to \$538.6m (up 10.6% in local currencies)
- Gross margin of 86.6% of product sales
- Net income up 26.0% to \$135.8m (up 21.5% in local currencies)
- Basic EPS up 28.5% to \$8.75 per bearer share and \$0.22 per ADS
- Significant expansion in Rebif(R)'s global sales and marketing activities initiated
- Unanimous positive opinion from the CHMP recommending approval of Raptiva(R) in the EU
- Phase III study of Serostim(R) in HARS initiated

"Our second quarter results are excellent with strong EPS growth of 28.5%," said Ernesto Bertarelli, Chief Executive Officer of Serono. "I am very pleased with the recent recommendation for Raptiva(R) made by the scientific committee of Europe's regulatory agency (CHMP). Raptiva(R) will further diversify our product portfolio and contribute to our future growth."

SECOND QUARTER FINANCIAL PERFORMANCE

Total revenues increased by 15.6% to \$587.6m in the second quarter of 2004 (Q2 2003: \$508.4m), or 11.2% in local currencies. Sales of marketed products climbed 15.2% to \$538.6m (Q2 2003: \$467.4m), or 10.6% in local currencies, despite the continued tightening of the pricing and reimbursement climate in some European countries. Royalty and license income increased by 19.4% to \$49.0m (Q2 2003: \$41.0m) primarily due to higher sales by various licensees.

Gross margin increased to 86.6% of product sales (Q2 2003: 84.8%), as a result of the improvement of product mix and continued productivity gains.

Selling, General and Administrative expenses were \$193.1m or 32.9% of total revenues (Q2 2003: \$158.1m or 31.1% of total revenues). The relative increase in SG&A as a percentage of revenues reflects the investment in promotional activities for the Gonal-f(R) prefilled pen, as well as pre-launch costs for Raptiva(R). Research and Development expenses were \$123.2m or 21.0% of total

Edgar Filing: SERONO S A - Form 6-K

revenues (Q2 2003: \$108.5m or 21.3% of total revenues). Other operating expenses were \$53.7m (Q2 2003: \$50.9m).

Operating income increased by 21.2% to \$145.5m or 24.8% of total revenues (Q2 2003: \$120.0m or 23.6% of total revenues) and net financial income was \$15.3m (Q2 2003: \$12.8m), benefiting from foreign exchange hedging gains as a result of the strengthening of the Swiss franc against the Euro.

Total taxes were \$25.7m, representing an overall tax rate of 16.0% of profit before tax (Q2 2003: \$20.6m, or 16.0% of profit before tax).

Reported net income jumped 26.0% to \$135.8m (Q2 2003: \$107.7m), or 21.5% in local currencies. Basic earnings per share (EPS) were up 28.5% to \$8.75 per bearer share (Q2 2003: \$6.81) and \$0.22 per American Depositary Share (ADS) (Q2 2003: \$0.17).

For the first six months, net cash flows from operating activities increased 36.1% to \$252.1m (H1 2003: \$185.2m).

On May 25, 2004, a new share buy-back program was authorized for up to CHF 750 million, and following regulatory approval this program started in June 2004. The shares are purchased on the open market via a second trading line (security code SEOE), and will be subsequently cancelled.

As of June 30, 2004, there were 16,140,341 outstanding equivalent bearer shares of Serono S.A. including 708,271 treasury shares available for general corporate purposes.

NEUROLOGY

Given the multiple sclerosis market's significant growth potential, coupled with Rebif(R)'s long-term efficacy and unsurpassed ability to significantly delay accumulation of disability, Serono believes there is an opportunity to further grow Rebif(R)'s share. Serono is therefore increasing the size of its sales and medical teams, as well as introducing new field nurse programs, and extending call centers to many countries, to further support Rebif(R) patients.

In the second quarter, neurology sales were \$266.2m (Q2 2003: \$205.5m), up 29.5% or 23.6% in local currencies. Sales of Rebif(R) were up 29.2% (23.1% in local currencies) to \$257.1m (Q2 2003: \$199.0m) and Novantrone(R) sales in MS increased by 39.3% to \$9.1m (Q2 2003: \$6.6m).

In the US, sales of Rebif(R) jumped 65.0% to \$69.6m in the second quarter (Q2 2003: \$42.2m). Rebif(R) is market leader outside the US with sales increasing by 19.6% to \$187.5m (Q2 2003: \$156.8m), or 12.3% in local currencies.

Serono continues to lead the way in developing patient-friendly injection devices, with advanced functionality. In May, the new Rebiject II(TM) auto-injector was launched. This device is specifically designed to make self-injection of Rebif(R) more convenient for multiple sclerosis patients.

REPRODUCTIVE HEALTH

Sales of Gonal-f(R) rose in the second quarter by 8.1% (4.0% in local currencies) to \$150.9m (Q2 2003: \$139.6m). Serono's core reproductive health portfolio consisting of three recombinant hormones (Gonal-f(R), Ovidrel(R)/Ovitrelle(R), Luveris(R)) and two complementary products (Cetrotide(R), Crinone(R)) grew by 8.2% (4.0% in local currencies) to \$168.6m (Q2 2003: \$155.9m).

Edgar Filing: SERONO S A - Form 6-K

The phase-out of urine-derived products was completed in Europe by the end of 2003, and in the United States this quarter. By the end of 2004, the phase-out of these products will be completed on a global basis, except in Japan where recombinant gonadotropins are not yet approved.

In May, the FDA approved the Gonal-f(R) prefilled pen, a ready-to-use pen for the treatment of infertility. The Gonal-f(R) prefilled pen, which combines the efficacy of the most consistent FSH with enhanced accuracy of dosing, is already available in many European countries as well as in Australia, and will be introduced in the US shortly. Serono recently announced that in a phase IIIb study that compared the Gonal-f(R) prefilled pen with another pen available on the market, twice as many of the treated patients preferred the Gonal-f(R) prefilled pen, as it required less time for training, less time and fewer steps to prepare a daily injection and also gives patients more confidence that they have injected the right dose of FSH.

METABOLIC ENDOCRINOLOGY

In the second quarter, Saizen(R) sales increased by 12.7% (7.4% in local currencies) to \$44.2m (Q2 2003: \$39.2m). Serostim(R) sales continue to be stable at \$21.5m (Q2 2003: \$23.0m). Sales of Serono's recombinant growth hormone products rose by 5.8% to \$65.8m (Q2 2003: \$62.2m).

During the second quarter Serono submitted an application for a new indication for Saizen(R) in the treatment of growth disturbance in children born small for gestational age to the health authorities in Europe, and the regulatory review has commenced.

DERMATOLOGY

On June 23rd, Raptiva(R) (efalizumab) was granted a unanimous positive opinion from the Committee of Medicinal Products for Human Use (CHMP) recommending approval. Serono expects the European Commission's Marketing Authorisation during the third quarter of this year, which would give Raptiva(R) a first mover advantage. Raptiva(R) will be launched in some EU countries shortly thereafter.

Serono received approval for Raptiva(R) in moderate-to-severe psoriasis in Switzerland in March and in Argentina in May, as well as a positive recommendation in Australia. Outcomes of marketing applications in a number of other territories for which Serono is responsible are awaited and launch in some of these countries will take place by the end of the year.

REGIONAL SALES

North American sales grew by 21.0% to \$208.8m (Q2 2003: \$172.5m). Despite pricing and reimbursement pressures notably in Germany, European sales increased by 8.5% (0.2% in local currencies) to \$215.6m (Q2 2003: \$198.7m). In the rest of the world, sales grew by 18.9% (15.4% in local currencies) to \$114.3m (Q2 2003: \$96.2m).

R&D NEWS

On May 1st, results from the CLEAR trial, the first randomized placebo-controlled study with Raptiva(R) conducted outside of the US, were presented at the EADV (European Academy of Dermatology and Venerology) Congress in Budapest. The results of CLEAR demonstrate that Raptiva is safe and efficacious in patients whose psoriasis cannot be controlled by, are intolerant to or are contraindicated to other currently available systemic therapies. The

Edgar Filing: SERONO S A - Form 6-K

results in these high need patients were also consistent with the results in the broader moderate-to-severe population.

On May 4th, 4SC and Serono entered into an exclusive worldwide agreement to develop and commercialize 4SC's program of dihydroorotate dehydrogenase (DHODH) inhibitors. This series consists of small molecules with potential as orally active treatments in autoimmune disorders, such as rheumatoid arthritis and multiple sclerosis and includes a lead compound, which is currently completing Phase I.

In June, Serono announced the start of a Phase III trial of Serostim(R) in HIV-associated adipose redistribution syndrome (HARS). HARS is a potentially debilitating medical condition experienced by people being treated for HIV for which there is currently no medical treatment.

Basic earnings per share are calculated in accordance with IAS 33 (Earnings per Share) by dividing the net income of the group, US\$241.9 million (2003 US\$167.9 million), by an appropriate number of shares. This is 11,240,537 bearer shares (2003 11,431,665) and 11,013,040 registered shares (2003 11,013,040). The total weighted average equivalent number of bearer shares is 15,645,753 (2003 15,836,881) for the six months ended June 30, 2004. As each American depositary share represents ownership interest in one fortieth of a bearer share, basic and diluted earnings per American depositary share is calculated as one fortieth of the earnings per bearer share.

For diluted earnings per share, the total number of bearer shares is adjusted to assume conversion of all in the money share options granted to employees and directors and does not take into consideration the impact of the convertible bond because it is anti-dilutive. The number of bearer shares used to calculate diluted earnings per share is 11,270,640 (2003 11,445,711).

Basic earnings per share are calculated in accordance with IAS 33 (Earnings per Share) by dividing the net income of the group, US\$135.8 million (2003 US\$107.7 million), by an appropriate number of shares. This is 11,112,539 bearer shares (2003 11,419,355) and 11,013,040 registered shares (2003 11,013,040). The total weighted average equivalent number of bearer shares is 15,517,755 (2003 15,824,571) for the three months ended June 30, 2004. As each American depositary share represents ownership interest in one fortieth of a bearer share, basic and diluted earnings per American depositary share is calculated as one fortieth of the earnings per bearer share.

For diluted earnings per share, the total number of bearer shares is adjusted to assume conversion of all in the money share options granted to employees and directors and also the impact of the convertible bond as it is dilutive. The number of bearer shares used to calculate diluted earnings per share is 11,561,817 (2003 11,440,499).

SELECTED EXPLANATORY NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. ACCOUNTING PRINCIPLES

The accompanying condensed unaudited interim consolidated financial statements have been prepared in accordance with IAS 34 (Interim Financial Reporting). The accounting policies used in the preparation of the interim consolidated financial statements are consistent with those used by Serono in its annual consolidated financial statements for the year ended December 31, 2003. These interim consolidated financial statements should be read in conjunction with the 2003 annual consolidated financial statements. These consolidated financial statements were approved for issuance on July 16, 2004 by Serono S.A.'s board of directors.

2. ADOPTION OF INTERNATIONAL ACCOUNTING STANDARDS

There were no new standards adopted in the first 6 months of the year.

5. EARNINGS PER SHARE

Basic earnings per share is calculated in accordance with IAS 33 (Earnings per Share) by dividing the net income of the company by the weighted average number of shares outstanding during the period presented.

	2004	2003
Six months ended June 30 (unaudited)	US\$000	US\$000

Net income attributable to bearer shareholders	173,803	121,194
Net income attributable to registered shareholders	68,115	46,702

Total net income	241,918	167,896
Weighted average number of bearer shares in issue	11,240,537	11,431,665
Weighted average number of registered shares in issue	11,013,040	11,013,040
	US\$	US\$

Basic earnings per bearer share	15.46	10.60
Basic earnings per registered share	6.18	4.24
Basic earnings per American depositary share	0.39	0.27

For diluted earnings per share, the weighted average number of bearer shares is adjusted to assume conversion of all potential dilutive shares arising from outstanding stock options and the convertible bond. For stock options a calculation is done to determine the number of shares that could have been acquired at fair value with proceeds from the exercise of stock options and compared with the number of shares that would have been issued assuming the exercise of the stock options. The difference is added to the denominator as additional shares issued for no consideration. There is no adjustment made to the numerator. During the first six months ended June 30, 2004, share equivalents of 30,103 bearer shares arising from stock options granted to employees and directors were included in calculating diluted earnings per share (2003: 14,046). For the convertible bond, a calculation is done that assumes the bond is fully converted into bearer shares while the net income is increased by eliminating the interest expense, net of tax, that would not be incurred if the bond was converted. In the first half 2004 as well as in 2003, the effect of the convertible bond was excluded from the calculation of diluted earnings per share as it was anti-dilutive. Diluted earnings per bearer, registered and American depositary shares were:

35,000,000 (1,400,000 bearer shares of a par value of CHF 25) for a period of two years.

7. TREASURY SHARES

There were 304,939 treasury shares held by a group company as of January 1, 2004. During the first five months ended May 31, 2004, 351,209 bearer shares were purchased for a total consideration of CHF280.9 million or \$221.8 million, which resulted in the complete utilization of the CHF500 million share buy back plan that was initiated in July 2002. During the same period, 6,927 treasury shares were distributed to employees mostly as part of an Employee Share Purchase Plan whereby shares purchased under the plan that are held for one year after the purchase date entitle each participant to receive, on a one-time basis, one matching share for every three shares purchased and held.

In June 2004, a second share buy back plan was initiated that is authorized to acquire CHF750 million in bearer shares; however, the shares acquired under this second plan will be cancelled and thus will not be available for re-issue. The total cost of the shares acquired under the second share buy back plan is CHF46.6 million or \$37.2 million. The total number of treasury shares held as of June 30, 2004 is 708,271 of which 59,050 will eventually be cancelled.

8. DISTRIBUTION OF EARNINGS

At the Annual Shareholders' Meeting on May 25, 2004, a proposed gross dividend in respect of 2003 of CHF3.20 (2002: CHF2.80) per registered share and CHF8.00 (2002: CHF7.00) per bearer share, amounting to a total of CHF123.9 million (2002: CHF110.8 million), was ratified. This dividend, equivalent to \$99.4 million, was subsequently paid on May 28, 2004 and has been accounted for in shareholders' equity as an appropriation of retained earnings in the six months ended June 30, 2004.

As of June 30, 2004	383,958	961

During the first six months ended June 30, 2004, 120,780 options (2003: 91,950 options) were granted to a total of 598 employees (2003: 567 employees), at a predetermined weighted average exercise price of CHF721 (2003: CHF 655). The

Edgar Filing: SERONO S A - Form 6-K

total number of options available for grant as of June 30, 2004 is 327,291

There is also a stock option plan reserved for the Board of Directors that is similar to the Employee Stock Option plan. In June 2004, 5,200 options (2003: 4,600) were granted to directors, at a predetermined exercise price of CHF772 (2003: CHF 692). There are 20,720 director options outstanding as of June 30, 2004 with a weighted average exercise price of CHF 755.

10. SHARE PURCHASE PLANS

EMPLOYEE SHARE PURCHASE PLAN

The group has an Employee Share Purchase Plan ("the ESPP") covering substantially all of its employees. The plan is designed to allow employees to purchase bearer shares or American depository shares at 85% of the lower of the fair market value at either the date of the beginning of the plan period or the purchase date. Purchases under the plan are subject to certain restrictions and may not exceed 15% of the employee's annual salary. In January 2004, 20,301 bearer shares (2003: 23,229 bearer shares) were issued to employees at a price of CHF654 per share (2003: CHF654 per share). As of June 30, 2004, a total of \$5.3 million (2003: \$4.8 million) in contributions held by the company to be used to purchase bearer and American depository shares on behalf of employees in January 2005. The accrued compensation cost from the discount to be offered to employees based on the contributions held as at June 30, 2004 is \$0.5 million (2003: \$1.5 million).

Shares purchased under the plan that are held for one year after the purchase date entitle each participant to receive, on a one-time basis, one matching share for every three shares purchased and held. In January 2004, 6,648 bearer shares (2003: 4,208) were distributed to employees. The accrued compensation cost for the six months ended June 30, 2004, related to the matching shares that will be distributed in January 2005, is \$2.1 million (2003: \$1.9 million) and is calculated based on the estimated number of matching shares multiplied by the current month-end share price.

DIRECTOR SHARE PURCHASE PLAN

During 2003, the group initiated a Share Purchase Plan reserved for its Board of Directors (the "DSPP"). The DSPP allows board members to purchase Serono S.A. bearer shares through allocation of 50% or 100% of their gross yearly fees. Each cycle commences on the first business day following the company's Annual General Meeting (the "AGM") and concludes on the day of the next AGM. The purchase price per share is eighty-five percent of the fair market value of the share on the fifth business day following the AGM. In June, 1,518 bearer shares were issued to Directors that participated in the plan.
