Edgar Filing: OGE ENERGY CORP - Form 8-K

Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01. Other Events

OGE Energy Corp. (the Company) is the parent company of Oklahoma Gas and Electric Company (OG&E), a regulated electric utility with approximately 735,000 customers in Oklahoma and western Arkansas, and Enogex Inc. and its subsidiaries (Enogex), a natural gas pipeline business with principal operations in Oklahoma and Arkansas.

On May 20, 2005, the Company issued a press release announcing that OG&E has filed with the Oklahoma Corporation Commission (OCC) a request to increase its electric rates to pay for major reliability investments in OG&E's electric system and other costs. OG&E has proposed that new rates, if approved by the OCC, go into effect in December 2005. Hearings on the new rate proposal by the OCC are expected this fall. For further information, see the press release attached as Exhibit 99.01 which is incorporated herein by reference.

On May 23, 2005, the Company is scheduled to make a financial presentation to certain analysts to discuss, among other things, the request for an increase in OG&E's electric rates discussed above and 2005 earnings guidance. This presentation is furnished as Exhibit 99.02 and incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits

(c) Exhibits

<u>Exhibit Number</u>	<u>Description</u>
99.01	Press release dated May 20, 2005, announcing OG&E proposes new rates to pay for reliability investments.
99.02	Financial presentation dated May 23, 2005.

OG&E proposes new rates to pay for reliability investments

Lower rates for 80,000 small businesses, non-profit organizations, schools

OKLAHOMA CITY Citing major investments to improve the reliability of its electric system, OG&E today asked the Oklahoma Corporation Commission to approve an \$89 million rate increase.

This case is about reliability, said the company's chief policy witness, James R. Hatfield, senior vice president and chief financial officer of OGE Energy Corp. (NYSE: OGE), parent company of OG&E. We frequently hear from our customers, both large and small, that while reasonable rates are very important, reliability is the most important thing they expect from their electric company.

OG&E's proposal limits the increase in the average residential customer's electric bill to about \$3.00 per month, and lowers rates for 80,000 small businesses, schools, churches, non-profit organizations and social service agencies by an average of 7 percent. OG&E proposes a new assistance program for low-income customers, and offers residential and small-business customers a Guaranteed Flat Bill option that ensures their cost is the same every month. Lower rates also are in store for Tinker Air Force Base under OG&E's new plan.

OG&E proposes a rate increase for its largest industrial consumers, ending the subsidy they receive from other customers and assuring they pay their fair share, Hatfield said. Still, OG&E's proposal keeps electric rates for large industrial customers competitively below the regional and national averages.

OG&E has made significant investments and major projects are ongoing to expand the capacity of the electric system and to repair and replace aging infrastructure across OG&E's service area. In addition to the McClain power plant acquisition last year, reliability investments include equipment upgrades at other OG&E power plants, transmission and substation projects, and expansion and improvement of distribution networks.

Today's rate filing by OG&E represents the latest step in the company's Customer Savings and Reliability Plan, a comprehensive approach to expanding and improving the electric system at a time when cogeneration and purchased-power costs are being reduced or eliminated. High natural gas prices which do not add to OG&E's earnings have increased the fuel component of customers' electric bills, but OG&E has done a lot to keep costs as low as possible. Since 2003, OG&E has been able to reduce customer costs by \$147 million, including fuel savings made possible by McClain.

OG&E customers in all rate classes will benefit from electric service that's more reliable, thanks to investments that by the end of this year will total more than \$600 million since 2003. This rate case will determine whether such reliability investments can continue.

According to Hatfield, OG&E has been able to avoid any base rate increase since 1985 through conservative purchasing, efficient operations and effective use of technology in its electric

system. We also must be able to attract, train and retain a workforce that is capable of operating that system, Hatfield said. That requires investment in human capital as well.

OG&E operates today with about the same number of employees it had in 1960, when the company served less than half as many customers as it serves now.

OG&E expects a hearing of the new rate proposal by the Corporation Commission this fall, and to implement new rates in December.

OG&E, a regulated utility, serves about 735,000 customers in a service area spanning 30,000 square miles in Oklahoma and western Arkansas. OGE Energy also is the parent company of Enogex Inc., a natural gas pipeline business with principal operations in Oklahoma and Arkansas.
