CHOICE HOTELS INTERNATIONAL, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Company Information and Significant Accounting Policies

The accompanying unaudited consolidated financial statements of Choice Hotels International, Inc. and subsidiaries (together the "Company") have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). These unaudited consolidated financial statements include all adjustments that are necessary, in the opinion of management, to fairly present our financial position and results of operations. Except as otherwise disclosed, all adjustments are of a normal recurring nature.

Certain information and footnote disclosures normally included in financial statements presented in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been omitted. The year-end balance sheet information was derived from audited financial statements, but does not include all disclosures required by GAAP. The Company believes the disclosures made are adequate to make the information presented not misleading.

The consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2012 and notes thereto included in the Company's Form 10-K, filed with the SEC on February 28, 2013 (the "10-K"). Interim results are not necessarily indicative of the entire year results because of seasonal variations. All inter-company transactions and balances between Choice Hotels International, Inc. and its subsidiaries have been eliminated in consolidation.

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with a maturity of three months or less at the date of purchase to be cash equivalents. As of March 31, 2013 and December 31, 2012, \$3.1 million and \$5.0 million respectively, of book overdrafts representing outstanding checks in excess of funds on deposit are included in accounts payable in the accompanying consolidated balance sheets.

The Company maintains cash balances in domestic banks, which at times, may exceed the limits of amounts insured by the Federal Deposit Insurance Corporation. In addition, the Company also maintains cash balances in international banks which do not provide deposit insurance.

Recently Adopted Accounting Guidance

In February 2013, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" ("ASU 2013-02"). This update requires companies to present either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source and the income statement line items affected by the reclassification. If a component is not required to be reclassified to net income in its entirety companies would instead cross reference to the related footnote for additional information. ASU 2013-02 became effective for interim and annual periods beginning after December 15, 2012 and the Company has adopted this ASU during the current quarter. The Company has elected to present the required disclosures in a single note rather than on the face of the financial statement. See Note 8 for additional information.

Future Adoption of Recently Announced Accounting Guidance

In February 2013, the FASB issued ASU No. 2013-04, "Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date" ("ASU 2013-04"). The ASU requires entities to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, as the sum of the following: (a) The amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any

additional amount the reporting entity expects to pay on behalf of its co-obligors. Required disclosures include a description of the joint-and-several arrangement and the total outstanding amount of the obligation for all joint parties. The ASU permits entities to aggregate disclosures (as opposed to providing separate disclosures for each joint-and-several obligation). ASU 2013-04 is effective for all interim and annual

Table of Contents

periods beginning after December 15, 2013. The ASU should be applied retrospectively to obligations with joint-and-several liabilities existing at the beginning of an entity's fiscal year of adoption. Early adoption is permitted. The Company is currently evaluating the impact the adoption of this statement will have on its financial statement presentation, if any, and will adopt the provision of this ASU on January 1, 2014.

In March 2013, the FASB issued ASU No. 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" ("ASU 2013-05"). ASU 2013-05 clarifies that when a reporting entity ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in Accounting Standards Codification 830 "Foreign Currency Matters" Subtopic 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The amendments ASU 2013-05 are effective prospectively for reporting periods beginning after December 15, 2013. The Company does not currently believe that the adoption of this update will have a material impact on its financial statements and will adopt the provisions of this ASU on January 1, 2014.

## 2. Other Current Assets

Other current assets consist of the following:

	March 31, 2013	December 31, 2012
	(In thousands)	
Notes receivable (See Note 3)	\$ 14,923	\$ 14,415
Prepaid expenses	13,864	10,694
Land held for sale	8,798	8,541
Other current assets	3,247	3,019
Total	\$ 40,832	\$ 36,669

Land held for sale represents the Company's purchase of various parcels of real estate as part of its program to incent franchise development in strategic markets for certain brands. The Company has acquired this real estate with the intent to resell it to third-party developers for the construction of hotels operated under the Company's brands. The real estate is accounted for as assets held for sale and therefore is carried at the lower of its carrying value or its estimated fair value (based on comparable sales), less estimated costs to sell.

## 3. Notes Receivable and Allowance for Losses

The Company segregates its notes receivable for the purposes of evaluating allowances for credit losses between two categories: Mezzanine and Other Notes Receivable and Forgivable Notes Receivable. The Company utilizes the level of security it has in the various notes receivable as its primary credit quality indicator (i.e. senior, subordinated or unsecured) when determining the appropriate allowances for uncollectible loans within these categories.

Table of Contents

The following table shows the composition of our notes receivable balances:

Credit Quality Indicator	March 31, 2013 (\$ in thousands)			December 31, 2012 (\$ in thousands)

Total	\$15,255	\$35,093	\$50,348	\$14,612	\$34,906	\$49,518

The Company classifies notes receivable due within one year as other current assets and notes receivable with a maturity greater than one year as other assets in the Company's consolidated balance sheets.

The following table summarizes the activity related to the Company's Forgivable Notes Receivable and Mezzanine and Other Notes Receivable allowance for losses from December 31, 2012 through March 31, 2013:

Forgivable Notes Receivable

As of March 31, 2013 and December 31, 2012, the unamortized balance of the Company's forgivable notes receivable totaled \$17.0 million and \$16.2 million, respectively. The Company recorded an allowance for credit losses on these

forgivable notes receivable of \$1.7 million and \$1.6 million at March 31, 2013 and December 31, 2012, respectively. At March 31, 2013 and December 31, 2012, the Company did not have any forgivable unsecured notes that were past due. Amortization expense included in the accompanying consolidated statements of income related to the notes for the three months ended March 31, 2013 and 2012 was \$0.9 million and \$0.6 million, respectively.

Table of Contents

## Mezzanine and Other Notes Receivable

The Company has determined that approximately \$13.3 million of its mezzanine and other notes receivable were impaired at both March 31, 2013 and December 31, 2012, respectively. The Company has recorded allowance for credit losses on these impaired loans at both March 31, 2013 and December 31, 2012 totaling \$8.3 million resulting in a carrying value of impaired loans of \$5.0 million for both periods which we had no related allowance for credit losses. The Company recognized approximately \$66 thousand and \$31 thousand of interest income on impaired loans during the three months ended March 31, 2013 and 2012, respectively on the cash basis. The Company had provided loan reserves on non-impaired loans totaling \$1.3 million and \$0.6 million at March 31, 2013 and December 31, 2012, respectively.

Past due balances of mezzanine and other notes receivable by credit quality indicators are as follows:

## Loans Acquired with Deteriorated Credit Quality

On December 2, 2011, the Company acquired an \$11.5 million mortgage, held on a franchisee hotel asset, from a financial institution for \$7.9 million. At the time of acquisition, the Company determined that it would be unable to collect all contractually required payments under the original mortgage terms. The contractually required payments receivable, including principal and interest, under the terms of the acquired mortgage totaled \$12.0 million. The Company expects to collect \$9.7 million of these contractually required payments. No prepayments were considered in the determination of contractual cash flows and cash flows expected to be collected. At both March 31, 2013 and December 31, 2012, the carrying amount of this loan, which is reported under senior mezzanine and other notes receivables, was \$7.9 million and there was no allowance for uncollectable amounts. The Company's accretable yield at acquisition was \$1.8 million or 7.36% and a reconciliation of the accretable yield for the three months ended March 31, 2013 is as follows:

	Accretable Yield (\$ in thousands)
Balance, December 31, 2012	\$ 1,161
Additions	—
Accretion	(141 )
Disposals	—
Reclassifications from nonaccretable yield	—
Balance, March 31, 2013	\$ 1,020

## 4. Receivable – Marketing and Reservation Fees

The marketing fees receivable from cumulative marketing expenses incurred in excess of cumulative marketing fees earned at March 31, 2013 and December 31, 2012 was \$11.5 million and \$7.9 million, respectively. As of March 31, 2013 and December 31, 2012, the reservation fees receivable related to cumulative reservation expenses incurred in excess of cumulative reservation fees earned was \$39.8 million and \$34.2 million, respectively. Depreciation and

amortization expense attributable to marketing and reservation activities for the three months ended March 31, 2013 and 2012 was \$4.0 million and \$3.5 million, respectively. Interest expense attributable to marketing and reservation activities was \$0.9 million and \$1.2 million for the three months ended March 31, 2013 and 2012, respectively.

Table of Contents

The Company evaluates the receivable for marketing and reservation costs in excess of cumulative marketing and reservation system revenues earned on a periodic basis for collectibility. The Company will record an allowance when, based on current information and events, it is probable that it will be unable to collect all amounts due for marketing and reservation activities according to the contractual terms of the franchise agreements. The receivables are considered to be uncollectible if the expected net, undiscounted cash flows from marketing and reservation activities are less than the carrying amount of the asset. Based on the Company's analysis of projected net cash flows from marketing and reservation activities for all periods presented, the Company concluded that the receivable for marketing and reservation activities was fully collectible and as a result no allowance for possible losses was recorded.

## 5. Other Assets

Other assets consist of the following:

	March 31, 2013	December 31, 2012
	(In thousands)	
Notes receivable (see Note 3)	\$35,425	\$35,103

Other assets	865	983
Total	\$76,349	\$76,013

## Variable Interest Entities

Equity method investments include investments in joint ventures totaling \$24.2 million and \$24.3 million at March 31, 2013 and December 31, 2012, respectively that the Company has determined to be variable interest entities. These investments relate to the Company's program to offer equity support to qualified franchisees to develop and operate Cambria Suites hotels in strategic markets. Based on an analysis of who has the power to direct the activities that most significantly impact these entities performance and who has an obligation to absorb losses of these entities or a right to receive benefits from these entities that could potentially be significant to the entity, the Company has determined that it is not the primary beneficiary of any of its joint venture investments. We based our quantitative analysis on the forecasted cash flows of the entity and our qualitative analysis on our review of the design of the entity, its organizational structure including decision-making ability and the relevant development, operating management and financial agreements. As a result, the Company's investment in these entities is accounted for under the equity method. For the three months ended March 31, 2013, the Company recognized losses totaling \$0.1 million. No income or losses were recognized related to these investments during the three months ended March 31, 2012.

## 6. Deferred Revenue

Deferred revenue consists of the following:

	March 31, 2013	December 31, 2012

## Senior Unsecured Notes Due 2022

On June 27, 2012, the Company issued unsecured notes in the principal amount of \$400 million ("the 2012 Senior Notes") at par, bearing a coupon of 5.75% with an effective rate of 5.94%. The 2012 Senior Notes will mature on July 1, 2022, with interest to be paid semi-annually on January 1st and July 1st. The Company used the net proceeds of this offering, after deducting underwriting discounts and commissions and other offering expenses, together with a portion of the proceeds from a new credit facility, to pay a special cash dividend totaling approximately \$600.7 million paid to shareholders on August 23, 2012. The Company's 2012 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations by eight 100%-owned domestic subsidiaries.

## Senior Unsecured Notes Due 2020

On August 25, 2010, the Company issued unsecured senior notes in the principal amount of \$250 million ("the 2010 Senior Notes") at a discount of \$0.6 million, bearing a coupon of 5.7% with an effective rate of 6.19%. The 2010 Senior Notes will mature on August 28, 2020, with interest to be paid semi-annually on February 28<sup>th</sup> and August 28<sup>th</sup>. The Company used the net proceeds from the offering, after deducting underwriting discounts and other offering expenses, to repay outstanding borrowings and for other general corporate purposes. The Company's 2010 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations by eight 100%-owned domestic subsidiaries.

## Revolving Credit Facilities

On July 25, 2012, the Company entered into a \$350 million senior secured credit facility, comprised of a \$200 million revolving credit tranche (the "New Revolver") and a \$150 million term loan tranche (the "Term Loan") with Deutsche Bank AG New York Branch, as administrative agent, Wells Fargo Bank, National Association, as administrative agent and a syndication of lenders (the "New Credit Facility"). The New Credit Facility has a final maturity date of July 25, 2016, subject to an optional one-year extension provided certain conditions are met. Up to \$25 million of the borrowings under the New Revolver may be used for letters of credit, up to \$10 million of borrowings under the New Revolver may be used for swing-line loans and up to \$35 million of borrowings under the New Revolver may be used for alternative currency loans. The Term Loan requires quarterly amortization payments (a) during the first two years, in equal installments aggregating 5% of the original principal amount of the Term Loan per year, (b) during the second two years, in equal installments aggregating 7.5% of the original principal amount of the Term Loan per year, and (c) during the one-year extension period (if exercised), equal installments aggregating 10% of the original principal amount of the Term Loan.

The Company utilized the proceeds from the Term Loan and borrowings from the New Revolver, together with the net proceeds from the Company's 2012 Senior Notes, to pay a special cash dividend of approximately \$600.7 million in the aggregate to the Company's stockholders on August 23, 2012.

## Table of Contents

The New Credit Facility is unconditionally guaranteed, jointly and severally, by certain of the Company's domestic subsidiaries. The subsidiary guarantors currently include all subsidiaries that guarantee the obligations under the Company's Indenture governing the terms of its 2010 and 2012 Senior Notes.

The New Credit Facility is secured by first priority pledges of (i) 100% of the ownership interests in certain domestic subsidiaries owned by the Company and the guarantors, (ii) 65% of the ownership interests in (a) Choice Netherlands Antilles N.V. ("Choice NV"), the top-tier foreign holding company of the Company's foreign subsidiaries, and (b) the domestic subsidiary that owns Choice NV and (iii) all presently existing and future domestic franchise agreements (the "Franchise Agreements") between the Company and individual franchisees, but only to the extent that the Franchise Agreements may be pledged without violating any law of the relevant jurisdiction or conflicting with any existing contractual obligation of the Company or the applicable franchisee. At the time that the maximum total leverage ratio is required to be no greater than 4.0 to 1.0 (beginning of year 4 of the New Credit Facility), the security interest in the Franchise Agreements will be released.

The Company may at any time prior to the final maturity date increase the amount of the New Credit Facility by up to an additional \$100 million to the extent that any one or more lenders commit to being a lender for the additional amount and certain other customary conditions are met. Such additional amounts may take the form of an increased Revolver or Term Loan.

The Company may elect to have borrowings under the New Credit Facility bear interest at a rate equal to (i) LIBOR, plus a margin ranging from 200 to 425 basis points based on the Company's total leverage ratio or (ii) a base rate plus a margin ranging from 100 to 325 basis points based on the Company's total leverage ratio.

The New Credit Facility requires the Company to pay a fee on the undrawn portion of the New Revolver, calculated on the basis of the average daily unused amount of the New Revolver multiplied by 0.30% per annum.

The Company may reduce the New Revolver commitment and/or prepay the Term Loan in whole or in part at any time without penalty, subject to reimbursement of customary breakage costs, if any. Any Term Loan prepayments made by the Company shall be applied to reduce the scheduled amortization payments in direct order of maturity. Additionally, the New Credit Facility requires that the Company and its restricted subsidiaries comply with various covenants, including with respect to restrictions on liens, incurring indebtedness, making investments, paying dividends or repurchasing stock, and effecting mergers and/or asset sales. With respect to dividends, the Company may not make any payment if there is an existing event of default or if the payment would create an event of default. In addition, if the Company's total leverage ratio exceeds 4.50 to 1.00, the Company is generally restricted from paying aggregate dividends in excess of \$50.0 million during any calendar year.

The New Credit Facility also imposes financial maintenance covenants requiring the Company to maintain:

- a total leverage ratio of not more than 5.75 to 1.00 in year 1, 5.00 to 1.00 in year 2, 4.50 to 1.00 in year 3 and 4.00 to 1.00 thereafter,
- a maximum secured leverage ratio of not more than 2.50 to 1.00 in year 1, 2.25 to 1.00 in year 2, 2.00 to 1.00 in year 3 and 1.75 to 1.00 thereafter, and
- a minimum fixed charge coverage ratio of not less than 2.00 to 1.00 in years 1 and 2, 2.25 to 1.00 in year 3 and 2.50 to 1.00 thereafter.

The New Credit Facility includes customary events of default, the occurrence of which, following any applicable cure period, would permit the lenders to, among other things, declare the principal, accrued interest and other obligations of the Company under the New Credit Facility to be immediately due and payable. At March 31, 2013, the Company was in compliance with all covenants under the New Credit Facility.

At March 31, 2013, the Company had \$144.4 million and \$75.0 million outstanding under the Term Loan and New Revolver, respectively. At December 31, 2012, the Company had \$146.3 million and \$57.0 million outstanding under the Term Loan and New Revolver, respectively.

In connection with the entering into the New Credit Facility, the Company's \$300 million senior unsecured revolving credit agreement, dated as of February 24, 2011, among the Company, Wells Fargo Bank, National Association, as administrative agent, and a syndicate of lenders (the "Old Credit Facility"), was terminated and replaced by the New Credit Facility. Borrowings under the Old Credit Facility bore interest at (i) a base rate plus a margin ranging from 5 to 80 basis points based on the Company's credit rating or (ii) LIBOR plus a margin ranging from 105 to 180 basis

points based on the Company's credit rating. In addition, the Old Credit Facility required the Company to pay a quarterly facility fee on the full amount of the commitments under the Old Credit Facility (regardless of usage) ranging from 20 to 45 basis points based upon the credit rating of the Company.

## 9. Non-Qualified Retirement, Savings and Investment Plans

The Company sponsors two non-qualified retirement savings and investment plans for certain employees and senior executives. Employee and Company contributions are maintained in separate irrevocable trusts. Legally, the assets of the trusts remain those of the Company; however, access to the trusts' assets is severely restricted. The trusts' cannot be revoked by the Company or an acquirer, but the assets are subject to the claims of the Company's general creditors. The participants do not have the right to assign or transfer contractual rights in the trusts.

In 2002, the Company adopted the Choice Hotels International, Inc. Executive Deferred Compensation Plan ("EDCP") which became effective January 1, 2003. Under the EDCP, certain executive officers may defer a portion of their salary into an irrevocable trust. Prior to January 1, 2010, participants could elect an investment return of either the annual yield of the Moody's Average Corporate Bond Rate Yield Index plus 300 basis points, or a return based on a selection of available diversified investment options. Effective January 1, 2010, the Moody's Average Corporate Bond Rate Yield Index plus 300 basis points is no longer an investment option for salary deferrals made on compensation earned after December 31, 2009. The Company recorded current and long-term deferred compensation liabilities of \$10.1 million and \$11.7 million, as of March 31, 2013 and December 31, 2012, respectively, related to these deferrals and credited investment returns. Compensation expense is recorded in SG&A expense on the Company's consolidated

statements of income based on the change in the deferred compensation obligation related to earnings credited to participants as well as changes in the fair value of diversified investments. Compensation expense recorded in SG&A for the three months ended March 31, 2013 and 2012 was \$0.3 million and \$0.4 million, respectively. In addition, the EDCP Plan held shares of the Company's common stock with a market value of \$0.2 million and \$0.1 million at March 31, 2013 and December 31, 2012, respectively which were recorded as a component of shareholders' deficit. The Company has invested the employee salary deferrals in diversified long-term investments which are intended to provide investment returns that partially offset the earnings credited to the participants. The diversified investments held in the trusts

Table of Contents

totaled \$3.4 million and \$6.0 million as of March 31, 2013 and December 31, 2012, respectively, and are recorded at their fair value, based on quoted market prices. At March 31, 2013, the Company expects \$0.4 million of the assets held in the trusts to be distributed to participants during the next twelve months. These investments are considered trading securities and therefore the changes in the fair value of the diversified assets is included in other gains and losses in the accompanying consolidated statements of income. The Company recorded investment gains during the three months ended March 31, 2013 and 2012 of approximately \$0.1 million and \$1.1 million, respectively.

In 1997, the Company adopted the Choice Hotels International, Inc. Non-Qualified Retirement Savings and Investment Plan (“Non-Qualified Plan”). The Non-Qualified Plan allows certain employees who do not participate in the EDCP to defer a portion of their salary and invest these amounts in a selection of available diversified investment options. As of March 31, 2013 and December 31, 2012, the Company had recorded a deferred compensation liability of \$12.2 million and \$11.2 million, respectively, related to these deferrals. Compensation expense is recorded in SG&A expense on the Company's consolidated statements of income based on the change in the deferred compensation obligation related to earnings credited to participants as well as changes in the fair value of diversified investments. The net increase in compensation expense recorded in SG&A for the three months ended March 31, 2013 and 2012 was \$0.8 million and 0.9 million, respectively.

The diversified investments held in the trusts were \$10.9 million and \$10.2 million as of March 31, 2013 and December 31, 2012, respectively, and are recorded at their fair value, based on quoted market prices. These investments are considered trading securities and therefore the changes in the fair value of the diversified assets is included in other gains and losses in the accompanying consolidated statements of income. The Company recorded investment gains during the three months ended March 31, 2013 and 2012 of approximately \$0.6 million and \$0.9 million, respectively. In addition, the Non-Qualified Plan held shares of the Company's common stock with a market value of \$1.2 million and \$1.0 million at March 31, 2013 and December 31, 2012, respectively, which are recorded as a component of shareholders' deficit.

#### 10. Fair Value Measurements

The Company estimates the fair value of its financial instruments utilizing a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. The following summarizes the three levels of inputs, as well as the assets that the Company values using those levels of inputs.

Level 1: Quoted prices in active markets for identical assets and liabilities. The Company's Level 1 assets consist of marketable securities (primarily mutual funds) held in the Company's EDCP and Non-Qualified Plan deferred compensation plans.

Level 2: Observable inputs, other than quoted prices in active markets for identical assets and liabilities, such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable. The Company's Level 2 assets consist of money market funds held in the Company's EDCP and Non-Qualified Plan deferred compensation plans and those recorded in cash and cash equivalents.

Level 3: Unobservable inputs, supported by little or no market data available, where the reporting entity is required to develop its own assumptions to determine the fair value of the instrument. The Company does not currently have any assets whose fair value was determined using Level 3 inputs.

Table of Contents

As of March 31, 2013 and December 31, 2012, the Company had the following assets measured at fair value on a recurring basis:

	Fair Value Measurements at			
	Total	Level 1	Level 2	Level 3
Assets (in thousands)				
As of March 31, 2013				
Money market funds, included in cash and cash equivalents	\$50,001	\$—	\$50,001	\$—

	\$64,312	\$13,260	\$51,052	\$—
As of December 31, 2012				
Money market funds, included in cash and cash equivalents	\$20,001	\$—	\$20,001	\$—
Mutual funds <sup>(1)</sup>	11,884	11,884	—	—
Money market funds <sup>(1)</sup>	4,357	—	4,357	—
	\$36,242	\$11,884	\$24,358	\$—

(1)Included in Investments, employee benefit plans fair value on the consolidated balance sheets.

The Company's policy is to recognize transfers in and transfers out of the three levels of the fair value hierarchy as of the end of each quarterly reporting period. There were no transfers between Level 1 and 2 assets during the three months ended March 31, 2013.

#### Other Financial Instruments

The Company believes that the fair value of its current assets and current liabilities approximate their reported carrying amounts due to the short-term nature of these items. In addition, the interest rates of the Company's New Credit Facility adjust frequently based on current market rates; accordingly its carrying amount approximates fair value.

The Company estimates the fair value of notes receivable which approximate their carrying value, utilizing an analysis of future cash flows and credit worthiness for similar types of arrangements. Based upon the availability of market data, we have classified these notes receivables as Level 3 inputs. The primary sensitivity in these calculations is based on the selection of appropriate interest and discount rates. For further information on the notes receivables see Note 3.

The Company estimates the fair value of the Company's \$250 million and \$400 million senior notes using quoted market prices, which are directly observable Level 1 inputs. At March 31, 2013 and December 31, 2012, the \$250 million senior notes had an approximate fair value of \$276.9 million and \$271.6 million, respectively. At March 31, 2013 and December 31, 2012, the \$400 million senior notes had an approximate fair value of \$444.0 million and \$442.0 million, respectively.

Fair values estimated are made at a specific point in time, are subjective in nature and involve uncertainties and matters of significant judgment. Settlement of such fair value amounts may not be possible and may not be a prudent management decision.

#### 11. Income Taxes

The effective income tax rates were 25.8% and 33.9% for the three months ended March 31, 2013 and 2012, respectively.

The effective income tax rate for the three months ended March 31, 2013 and 2012 were lower than the U.S federal income tax rate of 35% due to the impact of foreign operations, partially offset by state taxes. The effective income tax rate for the three months ended March 31, 2013 was further reduced by settlements of unrecognized tax positions

and by legislation retroactively extending the U.S. controlled foreign corporation look-through rule.

## 12. Share-Based Compensation and Capital Stock

## Stock Options

The Company granted 0.2 million and 0.2 million options to certain employees of the Company at a fair value of \$1.7 million and \$1.6 million for the three months ended March 31, 2013 and 2012, respectively. The stock options granted by the Company had an exercise price equal to the market price of the Company's common stock on the date of grant. The fair value of the options granted was estimated on the grant date using the Black-Scholes option-pricing model with the following weighted average assumptions:

	2013 Grants	2012 Grants	
Risk-free interest rate	0.73	% 0.78	%
Expected volatility	38.14	% 40.15	%
Expected life of stock option	4.5 years	4.4 years	
Dividend yield	2.01	% 2.08	%
Requisite service period	4 years	4 years	
Contractual life	7 years	7 years	
Weighted average fair value of options granted	\$9.89	\$9.98	

The expected life of the options and volatility are based on historical data and are not necessarily indicative of exercise patterns or actual volatility that may occur. Historical volatility is calculated based on a period that corresponds to the expected life of the stock option. The dividend yield and the risk-free rate of return are calculated on the grant date based on the then current dividend rate and the risk-free rate of return for the period corresponding to the expected life of the stock option. Compensation expense related to the fair value of these awards is recognized straight-line over the requisite service period based on those awards that ultimately vest.

The aggregate intrinsic value of the stock options outstanding and exercisable at March 31, 2013 was \$29.2 million and \$23.3 million, respectively. The total intrinsic value of options exercised during the three months ended March 31, 2013 and 2012 was approximately \$2.3 million and \$0.4 million, respectively.

The Company received approximately \$5.4 million and \$0.4 million in proceeds from the exercise of 204,323 and 20,216 employee stock options during the three month periods ended March 31, 2013 and 2012, respectively.

## Restricted Stock

The following table is a summary of activity related to restricted stock grants:

	Three Months Ended March 31,	
	2013	2012
Restricted share grants	194,541	238,019
Weighted average grant date fair value per share	\$36.76	\$35.70
Aggregate grant date fair value (\$000)	\$7,151	\$8,497
Restricted shares forfeited	21,499	4,328
Vesting service period of shares granted	3 - 4 years	36 - 68 months
Grant date fair value of shares vested (\$000)	\$6,999	\$5,013

Compensation expense related to the fair value of these awards is recognized straight-line over the requisite service period based on those restricted stock grants that ultimately vest. The fair value of grants is measured by the market price of the Company's stock on the date of grant. Restricted stock awards generally vest ratably over the service period beginning with the first anniversary of the grant date. Awards granted to retirement eligible non-employee directors are recognized over the shorter of the requisite service period or the length of time until retirement since the terms of the grant provide that the awards will vest upon retirement.

## Performance Vested Restricted Stock Units

The Company has granted performance vested restricted stock units (“PVRSU”) to certain employees. The fair value is measured by the market price of the Company's common stock on the date of the grant. The vesting of these stock awards is contingent upon the Company achieving performance targets at the end of specified performance periods and the employees' continued employment. The performance conditions affect the number of shares that will ultimately vest. The range of possible stock-based award vesting is generally between 0% and 200% of the initial target. If minimum performance targets are not attained then no awards will vest under the terms of the various PVRSU agreements. Compensation expense related to these awards is recognized over the requisite service period based on the Company's estimate of the achievement of the various performance targets. The Company has currently estimated that between 100% and 160% of the various award targets will be achieved. Compensation expense is recognized ratably over the requisite service period only on those PVRSUs that ultimately vest.

The following table is a summary of activity related to PVRSU grants:

	Three Months Ended	
	March 31,	
	2013	2012
Performance vested restricted stock units granted at target	58,902	38,476
Weighted average grant date fair value per share	\$36.76	\$35.60
Aggregate grant date fair value (\$000)	\$2,165	\$1,370
Stock units forfeited	—	—
Requisite service period	22-36 months	3 years

During the three months ended March 31, 2013, 39,816 PVRSU grants vested at a fair value of \$1.3 million. These PVRSU grants were initially granted at a target of 30,624 units. However, since the Company exceeded targeted performance conditions contained in the stock awards granted in prior periods by 130%, an additional 9,192 shares were earned and issued. No PVRSU grants vested during the three months ended March 31, 2012. In addition, no stock units were forfeited in the three months ended March 31, 2013 and 2012.

A summary of stock-based award activity as of March 31, 2013 and changes during the three months ended are presented below:

Dividends		

The Company currently maintains the payment of a quarterly dividend on its common shares outstanding of \$0.185 per share, however the declaration of future dividends are subject to the discretion of the board of directors. In the fourth quarter of 2012, the Company's board of directors elected to pay prior to December 31, 2012 the regular quarterly dividend initially scheduled to be paid in the first quarter of 2013.

During the three months ended March 31, 2013, the Company paid previously declared dividends totaling \$0.5 million that were contingent upon the vesting of performance vested restricted units. No dividends on performance vested restricted units were paid during the three months ended March 31, 2012.

On February 8, 2013, the Company's board of directors declared a quarterly cash dividend of \$0.185 per share (or approximately \$10.8 million in the aggregate), which was paid on April 16, 2013 to shareholders of record as of April 2, 2013.

#### Share Repurchases and Redemptions

No shares of common stock were purchased by the Company under the share repurchase program during the three months ended March 31, 2013. During the three months ended March 31, 2012, the Company purchased 0.3 million shares of common stock under the share repurchase program at a total cost of \$12.9 million.

During the three months ended March 31, 2013, the Company redeemed 96,977 shares of common stock at a total cost of approximately \$3.6 million from employees to satisfy statutory minimum tax requirements from the vesting of restricted stock and performance vested restricted stock unit grants. During the three months ended March 31, 2012, the Company redeemed 55,162 shares of common stock at a total cost of approximately \$2.0 million from employees to satisfy statutory minimum tax requirements from the vesting of restricted stock grants. These redemptions were outside the share repurchase program initiated in June 1998.

## 13. Earnings Per Share

The computation of basic and diluted earnings per common share is as follows:

(In thousands, except per share amounts)	Three Months Ended	
	March 31,	
	2013	2012
Computation of Basic Earnings Per Share:		
Net income	\$ 15,523	\$ 19,997
Income allocated to participating securities	(163	) (204
Net income available to common shareholders	\$ 15,360	\$ 19,793
Weighted average common shares outstanding – basic	57,720	57,622
Basic earnings per share	\$0.27	\$0.34
Computation of Diluted Earnings Per Share:		
Net income	\$ 15,523	\$ 19,997
Income allocated to participating securities	(162	) (204
Net income available to common shareholders	\$ 15,361	\$ 19,793
Weighted average common shares outstanding – basic	57,720	57,622
Diluted effect of stock options and PVRsUs	361	100
Weighted average shares outstanding – diluted	58,081	57,722
Diluted earnings per share	\$0.26	\$0.34

The Company's unvested restricted shares contain rights to receive non-forfeitable dividends, and thus are participating securities requiring the two-class method of computing earnings per share (“EPS”). The calculation of EPS for common stock shown above excludes the income attributable to the unvested restricted share awards from the numerator and excludes the dilutive impact of those awards from the denominator.

At March 31, 2013 and 2012, the Company had 1.8 million and 1.7 million outstanding stock options, respectively. Stock options are included in the diluted earnings per share calculation using the treasury stock method and average market prices during the period, unless the stock options would be anti-dilutive. For the three month period ended March 31, 2013, the Company did not exclude any anti-dilutive stock options from the diluted earnings per share calculation. For the three month period ended March 31, 2012, the Company excluded 0.4 million of anti-dilutive stock options from the diluted earnings per share calculation.

PVRsUs are also included in the diluted earnings per share calculation assuming the performance conditions have been met at the reporting date. However, at March 31, 2013 and 2012, PVRsUs totaling 198,394 and 148,245, respectively, were excluded from the computation since the performance conditions had not been met.

## 14. Condensed Consolidating Financial Statements

The Company's Senior Notes due 2020 and 2022 are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations, by eight 100%-owned domestic subsidiaries. There are no legal or regulatory restrictions on the payment of dividends to Choice Hotels International, Inc. from subsidiaries that do not guarantee the Senior Notes. As a result of the guarantee arrangements, the following condensed consolidating financial statements are presented. Investments in subsidiaries are accounted for under the equity method of accounting.

Certain revisions have been made to correct immaterial errors in the condensed consolidating statement of income and condensed consolidating statement of cash flows for the three months ended March 31, 2012. The revisions to the condensed consolidating statement of income decreased the Guarantor's marketing and reservation expense and total operating expenses by \$1.1 million and increased the Guarantor's interest expense and total other income and expenses, net by \$1.1 million for the three months ended March 31, 2012, with corresponding offsetting adjustments to the same items in the Eliminations column.

The condensed consolidating statement of cash flows for the three months ended March 31, 2012 has been revised from prior filings to reflect the reclassification of certain operating, investing and financing cash flows related to inter-company investment transactions between wholly-owned subsidiaries. The revisions to the condensed consolidating statement of cash

## 15. Reportable Segment Information

The Company has a single reportable segment encompassing its franchising business. Revenues from the franchising business include royalty fees, initial franchise and relicensing fees, marketing and reservation system fees, procurement services revenue and other revenue. The Company is obligated under its franchise agreements to provide marketing and reservation services appropriate for the operation of its systems. These services do not represent separate reportable segments as their operations are directly related to the Company's franchising business. The revenues received from franchisees that are used to pay for part of the Company's ongoing operations are included in franchising revenues and are offset by the related expenses paid for marketing and reservation activities to calculate franchising operating income.

Corporate and other revenue consists of hotel operations; corporate and other expenses consist primarily of overhead selling, general and administrative costs such as finance, legal, human resources, etc that are not allocated to the Company's franchising segment. As described in Note 4, certain interest expenses related to the Company's marketing and reservation activities are allocated to the franchising segment. The Company does not allocate the remaining interest expense, interest income, other gains and losses or income taxes to its franchising segment.

The following table presents the financial information for the Company's franchising segment:

## 16. Commitments and Contingencies

The Company is not a party to any litigation other than routine litigation incidental to business. The Company's management and legal counsel do not expect that the ultimate outcome of any of its currently ongoing legal proceedings, individually or collectively, will have a material adverse effect on the Company's financial position, results of operations or cash flows.

## Contingencies

On October 9, 2012, the Company entered into a limited payment guaranty with regards to a developer's \$18.0 million bank loan for the construction of a Cambria Suites in White Plains, New York. Under the terms of the limited guaranty, the Company has agreed to guarantee 25% of the outstanding principal balance and accrued and unpaid interest, as well as any unpaid expenses incurred by the lender. The limited guaranty shall remain in effect until the maximum amount guaranteed by the Company is paid in full. In addition to the limited guaranty, the Company entered into an agreement in which the Company guarantees the completion of the construction of the hotel and an environmental indemnity agreement which indemnifies the lending institution from and against any damages relating to or arising out of possible environmental contamination issues with regards to the Cambria Suites property.

### Commitments

The Company has the following commitments outstanding at March 31, 2013:

The Company occasionally provides financing in the form of forgivable promissory notes or cash incentives to franchisees for property improvements, hotel development efforts and other purposes. At March 31, 2013, the Company had commitments to extend an additional \$11.7 million for these purposes provided certain conditions are met by its franchisees, of which \$6.6 million is expected to be advanced in the next twelve months.

The Company has entered into an agreement to form a joint venture to construct a Cambria Suites whereby it has committed, subject to the satisfaction of certain contingencies, to make an initial capital contribution of \$3.0 million for a 42.5% ownership interest. The Company expects to fund this commitment within the next twelve months.

The Company has committed to make additional capital contributions totaling \$4.6 million to existing joint ventures related to the construction of two hotels to be operated under the Company's Cambria Suites brand. These commitments are expected to be funded in the next twelve months.

In the ordinary course of business, the Company enters into numerous agreements that contain standard indemnities whereby the Company indemnifies another party for breaches of representations and warranties. Such indemnifications are granted under various agreements, including those governing (i) purchases or sales of assets or businesses, (ii) leases of real estate, (iii) licensing of trademarks, (iv) access to credit facilities, (v) issuances of debt or equity securities, and (vi) certain operating agreements. The indemnifications issued are for the benefit of the (i) buyers in sale agreements and sellers in purchase agreements, (ii) landlords in lease contracts, (iii) franchisees in licensing agreements, (iv) financial institutions in credit facility arrangements, (v) underwriters in debt or equity security issuances and (vi) parties under certain operating agreements. In addition, these parties are also generally indemnified against any third party claim resulting from the transaction that is contemplated in the underlying agreement. While some of these indemnities extend only for the duration of the underlying agreement, many survive the expiration of the term of the agreement or extend into perpetuity (unless subject to a legal statute of limitations). There are no specific limitations on the maximum potential amount of future payments that the Company could be required to make under these indemnities, nor is the Company able to develop an estimate of the maximum potential amount of future payments to be made under these indemnifications as the triggering events are not subject to predictability. With respect to certain of the aforementioned indemnities, such as indemnifications of landlords against third party claims for the use of real estate property leased by the Company, the Company maintains insurance coverage that mitigates potential liability.

### 17. Termination Charges

During the three months ended March 31, 2013, the Company recorded an \$0.8 million charge in SG&A and marketing and reservation expenses related to salary and continuation benefits provided to employees separating from service with the Company. At March 31, 2013, the Company had approximately \$0.3 million of these salary and benefits continuation payments remaining to be remitted. During the three months ended March 31, 2013, the Company remitted an additional \$1.8 million of termination benefits related to employee termination charges recorded in prior periods and had approximately \$1.7 million of these benefits remaining to be paid. At March 31, 2013 and December 31, 2012, total termination benefits of approximately \$2.0 million and \$3.1 million, respectively, remained payable and were included in current and non-current liabilities in the Company's consolidated financial statements. The Company expects \$2.0 million of these benefits to be paid in the next twelve months.

### 18. Subsequent Events

On April 26, 2013, the Company's board of directors declared a quarterly cash dividend of \$0.185 per share of common stock. The dividend is payable on July 15, 2013 to shareholders of record as of July 1, 2013. Based on the Company's share count at March 31, 2013, total dividends to be paid are expected to be approximately \$10.8 million.

### Overview

We are a hotel franchisor with franchise agreements representing 6,264 hotels open and 476 hotels under construction, awaiting conversion or approved for development as of March 31, 2013, with 500,376 rooms and 37,977 rooms, respectively, in 49 states, the District of Columbia and over 35 countries and territories outside the United States. Our brand names include Comfort Inn®, Comfort Suites®, Quality®, Clarion®, Ascend Collection®, Sleep Inn®, Econo Lodge®, Rodeway Inn®, MainStay Suites®, Suburban Extended Stay Hotel®, and Cambria Suites® (collectively, the “Choice brands”).

The Company's domestic franchising operations are conducted through direct franchising relationships while its international franchise operations are conducted through a combination of direct franchising and master franchising relationships. Master franchising relationships are governed by master franchising agreements which generally provide the master franchisee with the right to use our brands and sub-license the use of our brands in a specific geographic region, usually for a fee.

Our business philosophy has been to conduct direct franchising in those international markets where both franchising is an accepted business model and we believe our brands can achieve significant distribution. We elect to enter into master franchise agreements in those markets where direct franchising is currently not a prevalent or viable business model. When entering into master franchising relationships, we strive to select partners that have professional hotel and asset management capabilities together with the financial capacity to invest in building the Choice brands in their respective markets. Master franchising relationships typically provide lower revenues to the Company as the master franchisees are responsible for managing certain necessary services (such as training, quality assurance, reservations and marketing) to support the franchised hotels in the master franchise area and therefore retain a larger percentage of the hotel franchise fees to cover their expenses. In certain circumstances, the Company has and may continue to make equity investments in our master franchisees.

As a result of our use of master franchising relationships and international market conditions, total revenues from international franchising operations comprised 9% of our total revenues for the three months ended March 31, 2013, while representing approximately 19% of hotels open at March 31, 2013. Therefore, our description of the franchise system is primarily focused on the domestic operations.

Our Company generates revenues, income and cash flows primarily from initial, relicensing and continuing royalty fees attributable to our franchise agreements. Revenues are also generated from qualified vendor arrangements, hotel operations and other sources. The hotel industry is seasonal in nature. For most hotels, demand is lower in December through March than during the remainder of the year. Our principal source of revenues is franchise fees based on the gross room revenues of our franchised properties. The Company's franchise fee revenues and operating income reflect the industry's seasonality and historically have been lower in the first quarter than in the second, third or fourth quarters.

With a focus on hotel franchising instead of ownership, we benefit from the economies of scale inherent in the franchising business. The fee and cost structure of our business provides opportunities to improve operating results by increasing the number of franchised hotel rooms and effective royalty rates of our franchise contracts resulting in increased initial fee and relicensing revenue, ongoing royalty fees and procurement services revenues. In addition, our operating results can also be improved through our company-wide efforts related to improving property level performance. The Company currently estimates, based on its current domestic portfolio of hotels under franchise, a 1% change in revenue per available room (“RevPAR”) or rooms under franchise would increase or decrease annual domestic royalty revenues by approximately \$2.5 million and a 1 basis point change in the Company's effective royalty rate would increase or decrease annual domestic royalties by approximately \$0.6 million. In addition to these revenues, we also collect marketing and reservation system fees to support centralized marketing and reservation activities for the franchise system. As a lodging franchisor, the Company currently has relatively low capital expenditure requirements.

The principal factors that affect the Company's results are: the number and relative mix of franchised hotel rooms in the various hotel lodging price categories; growth in the number of hotel rooms under franchise; occupancy and room rates achieved by the hotels under franchise; the effective royalty rate achieved; the level of franchise sales and

relicensing activity; and our ability to manage costs. The number of rooms at franchised properties and occupancy and room rates at those properties significantly affect the Company's results because our fees are based upon room revenues at franchised hotels. The key industry standard for measuring hotel-operating performance is RevPAR, which is calculated by multiplying the percentage of occupied rooms by the average daily room rate realized. Our variable overhead costs associated with franchise system growth of our established brands have historically been less than incremental royalty fees generated from new franchises. Accordingly, continued growth of our franchise business should enable us to realize benefits from the operating leverage in place and improve operating results. We are required by our franchise agreements to use the marketing and reservation system fees we collect for system-wide marketing and reservation activities. These expenditures, which include advertising costs and costs to maintain our central

Table of Contents

reservations system, help to enhance awareness and increase consumer preference for our brands. Greater awareness and preference promotes long-term growth in business delivery to our franchisees, which ultimately increases franchise fees earned by the Company.

Our Company articulates its mission as a commitment to our franchisees' profitability by providing our franchisees with hotel franchises that strive to generate the highest return on investment of any hotel franchise. We have developed an operating system dedicated to our franchisees' success that focuses on delivering guests to our franchised hotels and reducing costs for our hotel owners.

We believe that executing our strategic priorities creates value for our shareholders. Our Company focuses on two key value drivers:

**Profitable Growth.** Our success is dependent on improving the performance of our hotels, increasing our system size by selling additional hotel franchises, effective royalty rate improvement and maintaining a disciplined cost structure. We attempt to improve our franchisees' revenues and overall profitability by providing a variety of products and services designed to increase business delivery to and/or reduce operating and development costs for our franchisees. These products and services include national marketing campaigns, a central reservation system, property and yield management systems, quality assurance standards and qualified vendor relationships. We believe that healthy brands, which deliver a compelling return on investment for franchisees, will enable us to sell additional hotel franchises and raise royalty rates. We have established multiple brands that meet the needs of many types of guests, and can be developed at various price points and applied to both new and existing hotels. This ensures that we have brands suitable for creating growth in a variety of market conditions. Improving the performance of the hotels under franchise, growing the system through additional franchise sales and improving franchise agreement pricing while maintaining a disciplined cost structure are the keys to profitable growth.

**Maximizing Financial Returns and Creating Value for Shareholders.** Our capital allocation decisions, including capital structure and uses of capital, are intended to maximize our return on invested capital and create value for our shareholders. We believe our strong and predictable cash flows create a strong financial position that provides us a competitive advantage. Currently, our business does not require significant capital to operate and grow. Therefore, we can maintain a capital structure that generates high financial returns and use our excess cash flow to increase returns to our shareholders.

Historically, we have returned value to our shareholders in two primary ways: share repurchases and dividends. In 1998, we instituted a share repurchase program which has generated substantial value for our shareholders. Since the program's inception through March 31, 2013, we have repurchased 45.3 million shares (including 33.0 million prior to the two-for-one stock split effected in October 2005) of common stock at a total cost of \$1.1 billion. Considering the effect of the two-for-one stock split, the Company has repurchased 78.3 million shares at an average price of \$13.89 per share. The Company did not purchase any shares under the share repurchase program during the three months ended March 31, 2013. We currently believe that our cash flows from operations will support our ability to complete the current board of directors repurchase authorization of approximately 1.4 million shares remaining as of March 31, 2013. Upon completion of the current authorization, our board of directors will evaluate the advisability of additional share repurchases.

The Company commenced paying quarterly dividends in 2004 and in 2012 the Company elected to pay a special cash dividend totaling approximately \$600 million. The Company currently maintains the payment of a quarterly dividend on its common shares outstanding of \$0.185 per share, however the declaration of future dividends are subject to the discretion of the board of directors. In the fourth quarter of 2012, the Company's board of directors elected to pay prior to December 31, 2012 the regular quarterly dividend initially scheduled to be paid in the first quarter of 2013. As a result, the Company did not pay a regular quarterly dividend during the first quarter of 2013. We expect to continue to pay dividends in the future, subject to future business performance, economic conditions, changes in income tax regulations and other factors. Based on the present dividend rate and outstanding share count, we expect that aggregate annual regular dividends for 2013, excluding the first quarter payment which was paid to shareholders in December 2012, would be approximately \$32.8 million.

Our board of directors previously authorized us to enter into a program which permits us to offer investment, financing and guaranty support to qualified franchisees as well as to acquire and resell real estate to incent franchise

development for certain brands in strategic markets. Recent market conditions have resulted in an increase in opportunities to incentivize development under this program and as a result over the next several years, we expect to deploy capital opportunistically pursuant to this program to promote growth of our emerging brands. The amount and timing of the investment will be dependent on market and other conditions. Our current expectation is that our annual investment in this program will range from \$20 million to \$40 million.

In addition, the Company may allocate capital to exploring additional growth opportunities in business areas that are adjacent or complementary to our core hotel franchising business, which leverage our core competencies and are additive to our franchising business model. The timing and amount of these investments are subject to market and other conditions.

As a result of these investments in exploring growth alternatives, the Company recently announced the formation of its newest division, SkyTouch Technology ("SkyTouch"), which develops and markets cloud-based technology products for the hotel industry. In conjunction with this new division, the Company expects to incur operating expenses ranging between \$12 million and \$14 million during the full year ending December 31, 2013, of which the Company has incurred approximately \$2.2 million in the first quarter of 2013, for business development, sales and marketing and continued software development. Notwithstanding investments in alternative growth strategies, the Company expects to continue to return value to its shareholders through a combination of share repurchases and dividends, subject to business performance, economic conditions, changes in income tax regulations and other factors. We believe these investments and value drivers, when properly implemented, will enhance our profitability, maximize our financial returns and continue to generate value for our shareholders. The ultimate measure of our success will be reflected in the items below.

Results of Operation: Royalty fees, operating income, net income and diluted earnings per share ("EPS") represent key measurements of these value drivers. In the three months ended March 31, 2013, royalty fees revenue totaled \$49.7 million, a 4% increase from the same period in 2012. Operating income totaled \$30.5 million for the three months ended March 31, 2013, a \$0.6 million or 2% decline from the same period in 2012. Net income for the three months ended March 31, 2013 decreased 22% from the same period of the prior year to \$15.5 million. Diluted EPS for the quarter ended March 31, 2013 were \$0.26 compared to \$0.34 for the three months ended March 31, 2012. These measurements will continue to be a key management focus in 2013 and beyond.

Refer to MD&A heading "Operations Review" for additional analysis of our results.

Liquidity and Capital Resources: Historically, the Company has generated significant cash flows from operations. Since our business does not currently require significant reinvestment of capital, we typically utilize cash in ways that management believes provide the greatest returns to our shareholders, which include share repurchases and dividends. We believe the Company's cash flow from operations and available financing capacity is sufficient to meet the expected future operating, investing, and financing needs of the business.

On occasion, the Company utilizes certain measures which do not conform to generally accepted accounting principles in the United States ("GAAP") when analyzing and discussing its results with the investment community. This information should not be considered as an alternative to any measure of performance as promulgated under GAAP. The Company's calculation of these measures may be different from the calculations used by other companies and therefore comparability may be limited. We have included below a reconciliation of the measures utilized during this period to the comparable GAAP measures as well as our reason for reporting these non-GAAP measures.

**Franchising Revenues:** The Company utilizes franchising revenues which exclude marketing and reservation system revenues and hotel operations rather than total revenues when analyzing the performance of the business. Marketing and reservation activities are excluded from revenues since the Company is required by its franchise agreements to use these fees collected for marketing and reservation activities; as such, no income or loss to the Company is generated. Cumulative marketing and reservation system fees not expended are recorded as a payable on the Company's financial statements and are carried over to the next fiscal year and expended in accordance with the franchise agreements. Cumulative marketing and reservation expenditures in excess of fees collected for marketing and reservation activities are recorded as a receivable on the Company's financial statements. Hotel operations are excluded since they do not reflect the most accurate measure of the Company's core franchising business. This non-GAAP measure is a commonly used measure of performance in our industry and facilitates comparisons between the Company and its competitors.

EBITDA: We also utilize earnings before interest, taxes, depreciation and amortization ("EBITDA") to analyze our results which reflects earnings excluding the impact of interest expense, provision for income taxes, depreciation and amortization other (gains) and losses and equity in net income (loss) of unconsolidated affiliates. We consider EBITDA to be an indicator of operating performance because we use it to measure our ability to service debt, fund capital expenditures, and expand our business. We also use EBITDA, as do analysts, lenders, investors and others, to evaluate companies because it excludes certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company's capital structure, debt levels and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. EBITDA also excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies.

	2013	2012
EBITDA:		
Net income	\$ 15,523	\$ 19,997

Equity in net loss of affiliates	141	55
Depreciation and amortization	2,175	2,017
EBITDA	\$ 32,641	\$ 33,082

The Company recorded EBITDA of \$32.6 million for the three month period ended March 31, 2013, a \$0.4 million or 1.3% decline from the same period of the prior year. The decline in EBITDA reflects a \$2.6 million or 11% increase in selling, general and administrative ("SG&A") expense partially offset by a \$2.2 million or 4% increase in the Company's franchising revenues for the three months ended March 31, 2013.

The Company recorded net income of \$15.5 million for the three month period ended March 31, 2013, a 22% decline from the \$20.0 million recorded for the quarter ended March 31, 2012. The decrease in net income primarily reflects the decline in EBITDA as well as \$7.7 million increase in interest expense resulting from the issuance of debt in July and August 2012 to finance the Company's \$600.7 million special dividend paid on August 23, 2012. Furthermore, net income was impacted by a decline in other (gains) and losses resulting from a \$0.7 million appreciation in the fair

value of investments held in the Company's non-qualified employee benefit plans during the three months ended March 31, 2013 compared to a \$2.0 million appreciation in the fair value of these investments in the same period of the prior year.

Franchising Revenues: Franchising revenues were \$59.5 million for the three months ended March 31, 2013 compared to \$57.3 million for the three months ended March 31, 2012, an increase of 4%. The increase in franchising revenues is primarily due to

Table of Contents

a 4% increase in royalty revenues, a \$1.2 million increase in initial and relicensing fees, partially offset by a \$1.6 million decline in other income.

Domestic royalty fees for the three months ended March 31, 2013 increased \$2.0 million to \$44.3 million from \$42.3 million in the three months ended March 31, 2012, an increase of 5%. The increase in royalties is attributable to a combination of factors including a 4.6% increase in RevPAR, a 0.8% increase in the number of domestic franchised hotel rooms and a 5 basis point increase in the effective royalty rate from 4.34% to 4.39%. System-wide RevPAR increased due to a combination of a 2.3% increase in average daily rates and a 100 basis point increase in occupancy rates.

A summary of the Company's domestic franchised hotels operating information is as follows:
