UNIVERSAL COMPRESSION HOLDINGS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2004

1. Basis of Presentation

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements presented in the Universal Compression Holdings, Inc. (the "Company") Annual Report on Form 10-K for the year ended March 31, 2004. That report contains a more comprehensive summary of the Company's major accounting policies. In the opinion of management, the accompanying unaudited consolidated financial statements contain all appropriate adjustments, all of which are normally recurring adjustments unless otherwise noted, considered necessary to present fairly the financial position of the Company and its consolidated subsidiaries and the results of operations and cash flows for the respective periods. Operating results for the three-month and six-month periods ended September 30, 2004 are not necessarily indicative of the results that may be expected for the fiscal year ending March 31, 2005.

Earnings per share

Net income per share, basic and diluted, is calculated in accordance with Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings per share."

The dilutive effect of stock options outstanding for the three and six months ended September 30, 2004 was 709,000 shares and 690,000 shares, respectively. The dilutive effect of stock options outstanding for the three and six months ended September 30, 2003, was 311,000 shares and 294,000 shares, respectively. For the three and six months ended September 30, 2004, outstanding stock options of 367,000 and 368,000 shares, respectively, were excluded from the computation of diluted earnings per share as the options' exercise prices were greater than the average market price of the common stock for such periods. For the three and six months ended September 30, 2003, outstanding stock options of 2.1 million shares were excluded from the computation of diluted earnings per share as the options' exercise prices were greater than the average market price of the common stock for such periods.

Reclassifications

Certain reclassifications have been made to the prior year amounts to conform to the current year classification.

Stock Options

In electing to follow Accounting Principles Board ("APB") No. 25, "Accounting for Stock Issued to Employees," for expense recognition purposes, the Company is obligated to provide the expanded disclosures required under SFAS No. 123, "Accounting for Stock Based Compensation," and SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure-an amendment of SFAS No. 123," for stock-based compensation granted in 1998 and thereafter. In addition, if materially different from reported results, the Company is obligated to disclose pro forma net income and earnings per share had compensation expense relating to the three months and six months ended September 30, 2004 and September 30, 2003 grants been measured under the fair value recognition provisions of SFAS No. 123.

No options were granted during the three months ended September 30, 2004 and 2003. The weighted-average fair value at date of grant for options granted during the six months ended September 30, 2004 was \$14.91. The weighted-average fair value at date of grant for options granted

during the six months ended September 30, 2003 was \$12.01. Fair values were estimated using the Black-Scholes option valuation model with the following assumptions:

	Three M Ende Septemb	d	Six Months September	
	2004	2003	2004	2003
Expected life in years	7	8	7	8
Interest rate	4.11%	3.70%	4.11%	3.70%
Volatility	41.80%	48.51%	41.80%	48.51%
Dividend yield	0.00%	0.00%	0.00%	0.00%

The following table summarizes results as if the Company had recorded compensation expense under the provisions of SFAS No. 123 for the three months and six months ended September 30, 2004 and 2003 (in thousands, except per share amounts):

		Three Months Ended September 30,					s Ended er 30,	
		2004		2003		2004		2003

Reserve		(12,968)		(12,041)		
Inventories, net	\$	93,334	\$	89,968		

3. Long-Term Debt

As of September 30, 2004, the Company had approximately \$791.6 million in outstanding debt obligations consisting primarily of \$522.2 million outstanding under the seven-year term senior secured notes operating lease facility, consisting of $8^7/8\%$ senior notes due 2008 and a term loan due 2008, \$173.5 million outstanding under the $7^1/4\%$ senior notes due 2010, and \$95.0 million outstanding under the asset-backed securitization lease facility (the "ABS lease facility").

In the first quarter of fiscal 2004, Universal Compression, Inc. ("Universal"), our wholly-owned subsidiary, purchased or redeemed all of the outstanding \$229.8 million aggregate principal amount of

its 9⁷/8% senior discount notes due 2008. Due to the early extinguishment of this debt, the Company recognized expenses of \$14.4 million in the first quarter of fiscal year 2004 resulting primarily from the redemption and tender premiums of \$12.0 million, write-off of unamortized debt issuance costs of \$1.9 million and \$0.5 million of other costs.

In April 2004 Universal repurchased \$5.0 million of our 8⁷/8% senior notes due 2008. In June 2004, the Company paid \$80.0 million to reduce the amount outstanding under the ABS lease facility.

Maturities of long-term debt as of September 30, 2004 are as follows (in thousands):

2005	\$	7,456
2006		29,592
2007		29,607
2008		551,000
2009		140
Thereafter		173,759
Total debt	\$	791,554
	<u> </u>	,

4. Accounting for Interest Rate Swaps

In accordance with SFAS No. 133, as amended by SFAS Nos. 137 and 138 (collectively referred to as SFAS No. 133), all derivative instruments must be recognized on the balance sheet at fair value, and changes in such fair values are recognized in earnings unless specific hedging criteria are met. Changes in the values of derivatives that meet these hedging criteria will ultimately offset related earnings effects of the hedged item pending recognition in earnings.

In June 2004, the Company reduced the notional amount of interest rate swaps that convert variable interest payments under the ABS lease facility to fixed interest payments in connection with a debt repayment of \$80.0 million. In accordance with SFAS No. 133, the Company recorded a gain of \$3.2 million to earnings that had previously been recorded in other comprehensive income as a result of the reduction in the notional amount of such interest rate swaps. As of September 30, 2004, the Company had interest rate swaps with a notional amount of \$88.1 million related to the \$95.0 million outstanding under the ABS lease facility. The swaps terminate in February 2013 and have a weighted average fixed rate of 5.2%. In accordance with SFAS No. 133, the Company's balance sheet at September 30, 2004 includes a \$4.9 million noncurrent liability related to the interest rate swaps. The swaps, which the Company has designated as cash flow hedging instruments, meet the specific hedge criteria and any changes in their fair values were recognized in other comprehensive income or loss. Because the terms of the hedged item and the swaps substantially coincide, the hedge is expected to exactly offset changes in expected cash flows due to fluctuations in the variable rate and, therefore, the Company currently does not expect any ineffectiveness.

In March 2004, the Company entered into interest rate swap agreements to hedge \$100.0 million of the Company's \$175.0 million $7^1/4\%$ senior notes due 2010. The swaps are used to hedge the change in fair value of the debt and, in effect, convert the fixed interest payment to a variable interest payment based on the six-month LIBOR rate. The swaps are accounted for in accordance with SFAS No. 133 and, as such, are recorded at fair value on the balance sheet. The Company's balance sheet at September 30, 2004 includes a \$1.5 million noncurrent liability related to the interest rate swaps. The change in the debt's fair value is also recorded with the offset being recorded to income. The swaps, which the Company has designated as fair value hedging instruments, meet the specific hedge criteria and any changes in their fair values were recognized in income. For the quarter ended September 30, 2004, the change in the debt's fair value and the change in the swaps' fair value exactly offset and did not impact net income. Because the terms of the hedged item and the swaps substantially coincide, the

hedge is expected to exactly offset changes in fair values due to fluctuations in the variable rate and, therefore, the Company currently does not expect any ineffectiveness.

The counter parties to the Company's interest rate swap agreements are major international financial institutions. The Company monitors the credit quality of these financial institutions and does not expect non-performance by them.

5. Comprehensive Income

Comprehensive income consisted of the following (in thousands):

		Three Months Ended September 30,				Six Mont Septen		
	2004		2003		2004		2003	
Net income	\$	12,190	\$	9,303	\$	23,975	\$ 7,331	
Other comprehensive income:								
Interest rate swap gain (loss)		(1,852)		4,348		2,677	343	
Cumulative translation adjustment		6,669		(1,956)		2,974	 9,233	
Comprehensive income	\$	\$ 17,007		11,695	\$	29,626	\$ 16,907	

For the three and six months ended September 30, 2004 and September 30, 2003, the change in cumulative translation adjustment is primarily related to the translation of the balance sheets for the Company's Canada and Argentina subsidiaries.

6. Industry Segments

The Company has four principal business segments: domestic contract compression, international contract compression, fabrication and aftermarket services. The domestic contract compression segment provides natural gas compression to customers in the United States. The international contract compression segment provides natural gas compression to international customers. The fabrication segment provides services related to the design, engineering and assembly of natural gas and air compressors for sale to third parties and for use in the Company's contract compression fleet as well as construction of turn-key installation projects. The aftermarket services segment sells parts and components and provides maintenance to customers who own compression equipment and customers who utilize equipment from the Company's competitors. Fabrication revenue presented in the table below includes only sales to third parties.

The Company's reportable segments are strategic business units that offer distinct products and services. They are managed separately since each business segment requires different marketing strategies due to customer specifications. The Company evaluates the performance of its reportable segments based on segment gross profit. Gross profit is defined as total revenue less direct costs. The Company has no material sales between segments and, accordingly, there is no inter-segment revenue to be reported.

The following table presents unaudited revenue and gross profit by business segment for the three-month and the six-month periods ended September 30, 2004 and 2003 (in thousands):

		Three Months Ended September 30,				Six Months Ended September 30,				
		2004		2003		2004		2003

7. Commitments and Contingencies

In the ordinary course of business, the Company is involved in various pending or threatened legal actions. In the opinion of management, the amount of ultimate liability, if any, with respect to these actions will not have a material adverse effect on the Company's consolidated financial position, operating results or cash flows.

Except as noted in footnote 11 in the Form 10-K for the year ended March 31, 2004, the Company has no other commitments or contingent liabilities, which, in the judgment of management, would result in losses that would materially affect the Company's consolidated financial position, operating results or cash flows.

8. Facility Consolidation Costs

On April 28, 2003, the Company announced the transfer of substantially all of its fabrication activities based in Tulsa, Oklahoma to its existing facility in Houston, Texas. Engineering, production and related support functions were consolidated with Houston-based functions. The Company did not incur additional costs related to this consolidation during the three and six months ended September 30, 2004 and the Company does not expect to incur additional facility consolidation costs during the two-year period ending September 30, 2005. Total costs related to the facility consolidation were \$0.4 and \$1.8 million during the three and six months ended September 30, 2003 and are shown separately as facility consolidation costs in the consolidated statements of operations. The costs incurred were related to the fabrication segment. See below for further details of the costs incurred (in thousands):

		tember 30, 2003		Six Months Ended September 30, 2003
Severance and personnel costs	\$	197	\$	1,131
Relocation costs	•	40	-	289
Other costs		180		401
			_	
Total facility consolidation costs	\$	417	\$	1,821

9. Subsequent Event

On October 26, 2004, the Company announced that Universal Compression Canada, Limited Partnership, a subsidiary of the Company, had an agreement in principle to purchase the contract compression fleet of Hanover Canada Corporation, a subsidiary of Hanover Compressor Company. On November 2, 2004, we completed the acquisition for \$56.9 million, which was funded by \$50.0 million in borrowings under our revolving credit facility and \$6.9 million in cash.

UNIVERSAL COMPRESSION, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

SEPTEMBER 30, 2004

1. Basis of Presentation

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements presented in the Universal Compression, Inc. ("Universal") Annual Report on Form 10-K for the year ended March 31, 2004. That report contains a more comprehensive summary of Universal's major accounting policies. In the opinion of management, the accompanying unaudited consolidated financial statements contain all appropriate adjustments, all of which are normally recurring adjustments unless otherwise noted, considered necessary to present fairly the financial position of Universal and its consolidated subsidiaries and the results of operations and cash flows for the respective periods. Operating results for the three-month and six-month periods ended September 30, 2004 are not necessarily indicative of the results that may be expected for the fiscal year ending March 31, 2005.

Reclassifications

Certain reclassifications have been made to the prior year amounts to conform to the current year classification.

2. Inventories, Net

Inventories, net consisted of the following (in thousands):

	Sep	March 31, 2004			
Raw materials	\$	61,115	\$	60,064	
Work-in-progress		41,632		37,510	
Finished goods		3,555		4,435	
Total inventories		106,302		102,009	
Reserve		(12,968)		(12,041)	
Inventories, net	\$	93,334	\$	89,968	

3. Long-Term Debt

As of September 30, 2004, Universal had approximately \$791.6 million in outstanding debt obligations consisting primarily of \$522.2 million outstanding under the seven-year term senior secured notes operating lease facility, consisting of $8^7/8\%$ senior notes due 2008 and term loan due 2008, \$173.5 million outstanding of $7^1/4\%$ senior notes due 2010, and \$95.0 million outstanding under the asset-backed securitization lease facility (the "ABS lease facility").

In the first quarter of fiscal 2004, Universal purchased or redeemed all of the outstanding \$229.8 million aggregate principal amount of its 9⁷/8% senior discount notes due 2008. Due to the early extinguishment of this debt, Universal recognized expenses of \$14.4 million in the first quarter of fiscal year 2004 resulting primarily from the redemption and tender premiums of \$12.0 million, write-off of unamortized debt issuance costs of \$1.9 million and \$0.5 million of other costs.

In April 2004 Universal repurchased \$5.0 million of our 8⁷/8% senior notes due 2008. In June 2004, Universal paid \$80.0 million to reduce the amount outstanding under the ABS lease facility.

Maturities of long-term debt as of September 30, 2004 are as follows (in thousands):

2005	\$ 7,456
2006	29,592
2007	29,607
2008	551,000
2009	140
Thereafter	173,759
Total debt	\$ 791,554

4. Accounting for Interest Rate Swaps

In accordance with SFAS No. 133, as amended by SFAS Nos. 137 and 138 (collectively referred to as SFAS No. 133), all derivative instruments must be recognized on the balance sheet at fair value, and changes in such fair values are recognized in earnings unless specific hedging criteria are met. Changes in the values of derivatives that meet these hedging criteria will ultimately offset related earnings effects of the hedged item pending recognition in earnings.

In June 2004, Universal reduced the notional amount of interest rate swaps that convert variable interest payments under the ABS lease facility to fixed interest payments in connection with a debt repayment of \$80.0 million. In accordance with SFAS No. 133, Universal recorded a gain of \$3.2 million to earnings that had previously been recorded in other comprehensive income as a result of the reduction in the notional amount of such interest rate swaps. As of September 30, 2004, Universal had interest rate swaps with a notional amount of \$88.1 million related to the \$95.0 million outstanding under the ABS lease facility. The swaps terminate in February 2013 and have a weighted average fixed rate of 5.2%. In accordance with SFAS No. 133, Universal's balance sheet at September 30, 2004 includes a \$4.9 million noncurrent liability related to the interest rate swap. The swaps, which Universal has designated as cash flow hedging instruments, meet the specific hedge criteria and any changes in their fair values were recognized in other comprehensive income or loss. Because the terms of the hedged item and the swaps substantially coincide, the hedge is expected to exactly offset changes in expected cash flows due to fluctuations in the variable rate and, therefore, Universal currently does not expect any ineffectiveness.

In March 2004, Universal entered into interest rate swap agreements to hedge \$100.0 million of our \$175.0 million $7^1/4\%$ senior notes due 2010. The swaps are used to hedge the change in fair value of the debt and, in effect, convert the fixed interest payment to a variable interest payment based on the six-month LIBOR rate. The swaps are accounted for in accordance with SFAS No. 133 and, as such, are recorded at fair value on the balance sheet. Universal's balance sheet at September 30, 2004 includes a \$1.5 million noncurrent liability related to the interest rate swaps. The change in the debt's fair value is also recorded with the offset being recorded to income. The swaps, which Universal has designated as fair value hedging instruments, meet the specific hedge criteria and any changes in their fair values were recognized in income. For the quarter ended September 30, 2004, the change in the debt's fair value and the change in the swaps' fair value exactly offset and did not impact net income. Because the terms of the hedged item and the swaps substantially coincide, the hedge is expected to exactly offset changes in fair values due to fluctuations in the variable rate and, therefore, Universal currently does not expect any ineffectiveness.

The counterparties to Universal's interest rate swap agreements are major international financial institutions. Universal monitors the credit quality of these financial institutions and does not expect non-performance by them.

5. Comprehensive Income

Comprehensive income consisted of the following (in thousands):

	Three Months Ended September 30,				Six Months Ended September 30,			
	2004		2003			2004		2003
Net income	\$	12,190	\$	9,303	\$	23,975	\$	7,331
Other comprehensive income:								
Interest rate swap gain		(1,852)		4,348		2,677		343
Cumulative translation adjustment		6,669		(1,956)		2,974		9,233
Comprehensive income	\$	17,007	\$	11,695	\$	29,626	\$	16,907

For the three and six months ended September 30, 2004 and September 30, 2003, the change in cumulative translation adjustment is primarily related to the translation of the balance sheets for Universal's Canada and Argentina subsidiaries.

6. Industry Segments

Universal has four principal business segments: domestic contract compression, international contract compression, fabrication and aftermarket services. The domestic contract compression segment provides natural gas compression to customers in the United States. The international contract compression segment provides natural gas compression to international customers. The fabrication segment provides services related to the design, engineering and assembly of natural gas and air compressors for sale to third parties and for use in Universal's contract compression fleet as well as construction of turn-key installation projects. The aftermarket services segment sells parts and components and provides maintenance to customers who own compression equipment and customers who utilize equipment from Universal's competitors. Fabrication revenue presented in the table below includes only sales to third parties.

Universal's reportable segments are strategic business units that offer distinct products and services. They are managed separately since each business segment requires different marketing strategies due to customer specifications. Universal evaluates the performance of its reportable segments based on segment gross profit. Gross profit is defined as total revenue less direct costs. Universal has no material sales between segments and, accordingly, there is no inter-segment revenue to be reported.

The following table presents unaudited revenue and gross profit by business segment for the three-month and the six-month periods ended September 30, 2004 and 2003 (in thousands):

	Three Months Ended September 30,				Six Months Ended September 30,			
	2004			2003		2004		2003
Revenue:								
Domestic contract compression	\$	73,178	\$	69,716	\$	144,151	\$	138,915
International contract compression		22,872		20,720		45,617		40,404
Fabrication		57,772		49,678		115,135		78,938
Aftermarket services		38,062		35,568		71,854		69,653
Total	\$	191,884	\$	175,682	\$	376,757	\$	327,910
Gross Profit:								
Domestic contract compression	\$	46,380	\$	42,751	\$	91,089	\$	87,326
International contract compression		17,460		15,908		35,293		31,393
Fabrication		6,000		5,565		10,027		5,769
Aftermarket services		7,858		7,688		15,037		15,624
Total	\$	77,698	\$	71,912	\$	151,446	\$	140,112

No one customer accounted for more than 10% of total revenue for any of the periods presented.

The table below presents unaudited revenue and gross profit by geographic location for the three-month and the six-month periods ended September 30, 2004 and 2003 (in thousands). The basis of attributing revenue and gross profit to specific geographic locations is primarily based upon the geographic location of the sale, service or where the assets are utilized.

		Three Months Ended September 30,					Six Months Ended September 30,

					_		_				
Total	\$	77,698	\$	71,912	\$	151,446	\$	140,112			

7. Commitments and Contingencies

In the ordinary course of business, Universal is involved in various pending or threatened legal actions. In the opinion of management, the amount of ultimate liability, if any, with respect to these actions will not have a material adverse effect on Universal's consolidated financial position, operating results or cash flows.

Except as noted in footnote 10 in the Form 10-K for the year ended March 31, 2004, Universal has no other commitments or contingent liabilities, which, in the judgment of management, would result in losses that would materially affect Universal's consolidated financial position, operating results or cash flows.

8. Facility Consolidation Costs

On April 28, 2003, Universal announced the transfer of substantially all of its fabrication activities based in Tulsa, Oklahoma to its existing facility in Houston, Texas. Engineering, production and related support functions were consolidated with Houston-based functions. Universal did not incur additional costs related to this consolidation during the three and six months ended September 30, 2004 and Universal does not expect to incur additional facility consolidation costs during the two-year period ending September 30, 2005. Total costs related to the facility consolidation were \$0.4 and \$1.8 million during the three and six months ended September 30, 2003 and are shown separately as facility consolidation costs in the consolidated statements of operations. The costs incurred were related to the fabrication segment. See below for further details of the costs incurred (in thousands):

	 Three Months Ended September 30, 2003		Six Months Ended September 30, 2003
Severance and personnel costs	\$ 197	\$	1,131
Relocation costs	40		289
Other costs	180		401
Total facility consolidation costs	\$ 417	\$	1,821

9. Subsequent Event

On October 26, 2004, the Company announced that Universal Compression Canada, Limited Partnership, a subsidiary of the Company, had an agreement in principle to purchase the contract compression fleet of Hanover Canada Corporation, a subsidiary of Hanover Compressor Company. On November 2, 2004, we completed the acquisition for \$56.9 million, which was funded by \$50.0 million in borrowings under our revolving credit facility and \$6.9 million in cash.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The terms "our," "Company," "we" and "us" when used in this report refer to Universal Compression Holdings, Inc. and its subsidiaries, including Universal Compression, Inc., as a combined entity, and its predecessors, except where it is made clear that such term means only the parent company. The term "Universal" refers to Universal Compression, Inc. and its subsidiaries, as a combined entity.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This report contains "forward-looking statements" intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this report are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, proposed acquisitions, budgets, litigation, projected costs and plans and objectives of management for future operations. You can identify many of these statements by looking for words such as "believes," "expects," "will," "intends," "projects," "anticipates," "estimates," "continues" or similar words or the negative thereof.

Such forward-looking statements in this report include, without limitation:

our business growth strategy and projected costs;

our future financial position;

the sufficiency of available cash flows to fund continuing operations;

the expected amount of our capital expenditures;

anticipated cost savings, future revenue, gross profits, EBITDA, as adjusted and other financial or operational measures related to our business and our primary business segments;

the future value of our equipment; and

plans and objectives of our management for our future operations.

Such forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from those anticipated as of the date of this report. The risks related to our business described in our Annual Report on Form 10-K for the year ended March 31, 2004 under "Risk Factors" and elsewhere in this report could cause our actual results to differ from those described in, or otherwise projected or implied by, the forward-looking statements. Although we believe that the expectations reflected in these forward-looking statements are based on reasonable assumptions, no assurance can be given that these expectations will prove to be correct. Important factors that could cause our actual results to differ materially from the expectations reflected in these forward-looking statements include, among other things:

conditions in the oil and gas industry, including a sustained decrease in the level of supply or demand for natural gas and the impact of the price of natural gas;

competition among the various providers of natural gas compression services;

changes in political or economic conditions in key operating markets, including international markets;

changes in safety and environmental regulations pertaining to the production and transportation of natural gas;

acts of war or terrorism or governmental or military responses thereto;

introduction of competing technologies by other companies;

19

our ability to retain and grow our customer base;

our level of indebtedness and ability to fund our business;

our ability to recoup our investment by re-leasing our compressors after typically short initial lease terms;

currency exchange rate fluctuations;

employment workforce factors, including loss of key employees; and

liability claims related to the use of our products and services.

All forward-looking statements included in this report are based on information available to us on the date of this report. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements contained throughout this report.

General

The following discussion and analysis of financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements, and the notes thereto, appearing elsewhere in this report, as well as the consolidated financial statements presented in our Annual Report on Form 10-K for the year ended March 31, 2004. See "Item 1. Financial Statements footnote 1, Basis of Presentation" in this report.

UNIVERSAL COMPRESSION HOLDINGS, INC.

Overview

Generally, our overall business activity and revenue increase as the demand for natural gas compression services increases. In the United States, increases in compression demand are driven by growth in the production of natural gas and by declining reservoir pressure in maturing natural gas producing fields. In international markets, increases in compression demand are driven by similar factors as in the United States as well as growth in natural gas industry infrastructure, environmental and other governmental initiatives encouraging the production and consumption of natural gas and growth in the worldwide transportation of natural gas. The demand for compression services is also driven by general increases in the demand for energy fuel stocks, including natural gas, which is generally driven by economic growth. In addition, the outsourcing of compression needs is driven by the expectation of our customers for improved operating efficiency, increased flexibility to replace compressors as field requirements change and reduced capital requirements.

Industry Conditions

General industry conditions improved in our second quarter of fiscal 2005, as evidenced by increased industry activity and customer demand for our contract compression services. Demand remained strong for our fabrication and aftermarket services.

Financial Highlights

Net income for the three months ended September 30, 2004 was higher by \$2.9 million, or 31.0%, than net income for the prior year period. Net income for the six months ended September 30, 2004

was higher by \$16.6 million than net income for the prior year period. Significant items for the three and six month periods follow:

Higher Revenue. Compared to the prior year periods, total revenue was higher by \$16.2 million, or 9.2%, for the three months ended September 30, 2004, and by \$48.8 million, or 14.9%, for the six months ended September 30, 2004. The increase in revenue for both the three- and the six-month periods was due to higher revenue in all business segments led by the fabrication and domestic contract compression segments.

Lower Interest Expense. Compared to the prior year periods, interest expense was lower by \$1.8 million, or 10.1%, for the three months ended September 30, 2004, and by \$4.9 million, or 13.0%, for the six months ended September 30, 2004. The decreases in interest expense resulted primarily from the Company's \$80.0 million reduction in the amount outstanding under the asset-backed securitization lease facility (the "ABS lease facility") in June 2004, the lowering of interest rates resulting from entering into interest rate swap agreements in March 2004 to convert fixed interest payments to variable interest payments on \$100.0 million of our \$175.0 million of $7^1/4\%$ senior notes due 2010 and the refinancing of \$175.0 million of long-term debt in May 2003, which both reduced the amount of the Company's long-term debt outstanding and lowered the interest rate on that debt.

Gain on termination of interest rate swaps. Included within net income for the six months ended September 30, 2004 is a \$3.2 million gain on the termination of interest rate swaps related to the repayment of debt in June 2004.

Debt extinguishment and facility consolidation costs. The prior year six-month period included \$14.4 million of debt extinguishment costs as a result of the Company's May 2003 refinancing activity and \$1.8 million of facility consolidation costs related to the transfer of substantially all of the Tulsa, Oklahoma fabrication operations to the Houston fabrication facility.

Operating Highlights

The higher revenue for the three- and six-month periods is attributable to increased industry activity and customer demand, which resulted in higher overall utilization of our contract compression fleet and increased sales in the fabrication and aftermarket services businesses. The following table

summarizes total available horsepower, average contracted horsepower, horsepower utilization percentages and fabrication backlog.

	Three Months Ended			Six Months Ended			
	September 30, 2004	March 31, 2004	September 30, 2003	September 30, 2004	September 30, 2003		
	(Horsepower in thousands)			(Horsepower in thousands)

	September 30, 2004	March 31, 2004	September 30, 2003				
		(In millions)					
Fabrication Backlog	\$ 65.7	\$ 88.2	\$ 100.5				

Domestic average contracted horsepower remained consistent for the three months and six months ended September 30, 2004 compared to the same prior year periods. International average contracted horsepower increased by 10.2% for the three months ended September 30, 2004 compared to the prior year quarter and by 11.6% for the six months ended September 30, 2004 compared to the same prior year period. These increases were primarily attributable to higher customer demand.

The decrease in domestic available horsepower for the three months ended September 30, 2004 from September 30, 2003 was primarily attributable to the sale of units to customers exercising purchase options partially offset by additions to the fleet. The increase in international horsepower was primarily attributable to horsepower that was added in Latin America.

Fabrication backlog fluctuates quarter to quarter due to the timing of receipt of orders placed by customers and the timing of recognition of revenue. The backlog of fabrication projects at October 26, 2004 was approximately \$70.5 million. A majority of the backlog is expected to be completed within a 180-day period.

Financial Results of Operations

Three months ended September 30, 2004 compared to three months ended September 30, 2003

The following table summarizes the results of operations:

Net income	\$	12,190 \$	9,303	

Revenue. Domestic contract compression revenue increased due primarily to higher average contract prices in the three months ended September 30, 2004. International contract compression revenue increased primarily as a result of additional compression business in Argentina and additional revenue from a project in Brazil, which contributed to increases of \$0.9 million and \$0.6 million, respectively. Fabrication revenue increased due to large projects for customers in the United States, resulting in increased revenues for the region of \$9.6 million compared to the three months ended September 30, 2003. This increased revenue contribution was partially offset by decreased fabrication revenue in other regions. Fabrication backlog fluctuates quarter to quarter due to the timing of receipt of orders placed by customers and the timing of revenue recognition. Aftermarket services revenue was

higher due primarily to increases within the United States (\$1.0 million), Canada (\$0.8 million) and Latin America (\$0.6 million).

Gross Profit. The changes to gross profit (defined as total revenues less direct costs) for the three months ended September 30, 2004 compared to the prior year period were primarily attributable to revenue increases discussed above for domestic and international contract compression. The increase in domestic contract compression gross profit was also partially attributable to improved margins compared to the prior year period, which experienced margin deterioration primarily as a result of increased operating costs related to the reactivation of idle contract compression units.

Depreciation and Amortization. The increase in depreciation and amortization expense for the three months ended September 30, 2004 compared to the prior year primarily resulted from the start of operations of a project in Brazil and other capital additions.

Selling, General, and Administrative Expenses. The increase in selling, general and administrative expenses for the three months ended September 30, 2004 relates to the increased expenses resulting from increased operating activity within the Latin America and Asia Pacific regions of \$0.5 million and \$0.5 million, respectively. Selling, general and administrative expenses represented 10% of total revenue for both periods.

EBITDA, as adjusted. EBITDA, as adjusted, for the three months ended September 30, 2004 was \$59.5 million compared to \$55.3 million for the prior year period. The increase in EBITDA of 7.6% from the prior year is primarily attributable to the revenue increases discussed above. EBITDA, as adjusted, is defined, discussed and reconciled to net income on page 28 of this report, within Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Interest Expense, Net. Interest expense decreased \$1.3 million as a result of the \$80.0 million reduction of the ABS lease facility and decreased \$0.5 million due to the lower interest rate resulting from entering into interest rate swap agreements on \$100.0 million of our \$175.0 million 7½% senior notes due 2010.

Six months ended September 30, 2004 compared to six months ended September 30, 2003

Revenue. Domestic contract compression revenue increased due primarily to higher average contract prices in the six months ended September 30, 2004. International contract compression revenue increased primarily as a result of additional compression business in Argentina and additional revenue from a project in Brazil, which contributed to increases of \$2.3 million and \$2.0 million, respectively. Fabrication revenue increased due to large projects for customers in the United States, Asia Pacific, Latin America and Canadian regions, which contributed increases of \$20.4 million, \$10.6 million, \$3.3 million and \$1.9 million, respectively, compared to the six months ended September 30, 2003. Fabrication backlog fluctuates quarter to quarter due to the timing of receipt of orders placed by customers and the timing of revenue recognition. Aftermarket services revenue was

higher primarily due to increases within the Canada region (\$1.2 million), Latin America region (\$0.7 million) and Asia Pacific region (\$0.7 million).

Gross Profit. The changes to gross profit (defined as total revenues less direct costs) for the six months ended September 30, 2004 compared to the prior year period were primarily attributable to revenue increases discussed above for domestic contract compression, international contract compression and fabrication. The increase in fabrication gross profit was also partially attributable to improved margins compared to the prior year, which experienced margin deterioration primarily as a result of cost overruns related to several highly customized fabrication projects.

Depreciation and Amortization. The increase in depreciation and amortization expense for the six months ended September 30, 2004 compared to the prior year primarily resulted from the start of operations of a project in Brazil and other capital additions.

Selling, General, and Administrative Expenses. The increase in selling, general and administrative expenses for the six months ended September 30, 2004 relates to the increased expenses resulting from increased operating activity within the Latin America and Asia Pacific regions of \$1.6 million and \$1.3 million, respectively. Selling, general and administrative expenses represented 10% of total revenues for both periods.

EBITDA, as adjusted. EBITDA as adjusted, for the six months ended September 30, 2004 was \$114.6 million compared to \$107.8 million for the prior year period. The increase in EBITDA of 6.4% from the prior year period is primarily attributable to the revenue increases discussed above for domestic contract compression, international contract compression and fabrication. EBITDA, as adjusted, is defined, discussed and reconciled to net income on page 28 of this report, within Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Interest Expense, Net. Interest expense decreased \$1.3 million as a result of the \$80.0 million reduction of the ABS lease facility and decreased \$2.1 million due to the lower interest rate resulting from entering into interest rate swap agreements on \$100.0 million of our \$175.0 million 7½% senior notes due 2010.

Debt Extinguishment Costs. Debt extinguishment costs incurred during the six months ended September 30, 2003 were primarily due to the early extinguishment in May 2003 of Universal's outstanding \$229.8 million 9⁷/8% senior discount notes due 2008. The net proceeds from the offering by Universal of new 7¹/4% senior discount notes due 2010 and available funds were used to pay for the extinguishment of the 9⁷/8% senior discount notes due 2008. As a result of the early extinguishment of debt, a charge of \$14.4 million was recognized in the prior year resulting from the redemption and tender premiums of \$12.0 million, write-off of unamortized debt issuance costs of \$1.9 million and \$0.5 million of other costs. For the six months ended September 30, 2004, debt extinguishment costs of \$0.5 million resulted from the buyback of \$5.0 million of our 8⁷/8% senior notes due 2008.

Gain on Termination of Interest Rate Swaps. A \$3.2 million gain on the termination of interest rate swaps was recognized for the six months ended September 30, 2004. This gain was the result of reducing the notional amount of interest rate swaps by \$84.8 million on our ABS lease facility in connection with a principal reduction of \$80.0 million in June 2004.

Facility Consolidation Costs. Facility consolidation costs incurred during the six months ended September 30, 2003 were \$1.8 million. These costs related to the transfer of the Tulsa, Oklahoma fabrication operations to the Houston fabrication facility and were primarily for severance, personnel costs and relocation costs.

Income Tax Expense. The increase in income tax expense for the six months ended September 30, 2004 primarily relates to increased income before taxes as compared to the six months ended September 30, 2003 due to items mentioned above.

Liquidity and Capital Resources

Our primary sources of cash are operating activities and financing activities. Our primary uses of cash are operating expenditures, capital expenditures and long-term debt repayments. The following table summarizes our sources and uses of cash for the six-month periods ended September 30, 2003 and 2004, and our cash and working capital as of the end of such periods:

	Six Months Ended September 30,			
	2004 2003			
	 (In tho	usand	(s)	
Net cash provided by (used in):				
Operating activities	\$ 54,700	\$	69,063	
Investing activities	\$ (58,025)	\$	(25,827)	
Financing activities	\$ (89,462)	\$	(71,882)	
	As of Sept	embe	er 30,	
	2004		2003	
	(In tho	usand	ls)	
Cash	\$ 28,719	\$	43,636	
Working capital, net of cash	\$ 83,859	\$	80,014	

Overview. Net cash used in investing and financing activities exceeded net cash provided by operating activities by \$92.8 million for the six months ended September 30, 2004 primarily as a result of \$87.2 million in net debt prepayments during the period and \$59.6 million of capital expenditures, as discussed below. For the six months ended September 30, 2003, net cash used in investing and financing activities exceeded net cash provided by operating activities by \$28.6 million primarily as a result of our debt refinancing in May 2003, which reduced outstanding debt by approximately \$55.0 million.

Operations. Net cash provided by operating activities decreased \$14.4 million, or 21%, for the six months ended September 30, 2004 compared to the prior year period primarily as a result of changes in working capital including a decrease in unearned revenue of \$17.8 million related to progress billings activity for the fabrication segment.

Capital Expenditures. Capital expenditures for the six months ended September 30, 2004 were \$59.6 million consisting of \$32.2 million for fleet additions, \$18.6 million for compressor overhauls, \$2.9 million for service trucks and \$5.9 million for machinery, equipment, information technology equipment and other items. Based on current market conditions, we expect to continue to invest in fleet additions, compressor overhauls and maintenance and other capital requirements. We expect capital expenditures to be approximately \$135 million to \$145 million for the fiscal year ending March 31, 2005, including approximately \$35 million for compression fleet maintenance capital.

Long-term Debt. As of September 30, 2004, we had approximately \$791.6 million in outstanding debt obligations consisting primarily of \$522.2 million outstanding under the seven-year term senior secured notes operating lease facility, consisting of $8^7/8\%$ senior notes due 2008 and a term loan due 2008, \$173.5 million outstanding of $7^1/4\%$ senior notes due 2010, and \$95.0 million outstanding under the ABS lease facility.

The maturities of this debt are shown below. We expect to pay these principal payments through cash generated by operations and debt refinancing activity.

	(In t	(In thousands)	
2005	ф.	7 156	
2005	\$	7,456	
2006		29,592	
2007		29,607	
2008		551,000	
2009		140	
Thereafter		173,759	
Total debt	\$	791,554	

Historically, we have financed capital expenditures with net cash provided by operations and financing activities. Based on current market conditions, we expect that net cash provided by operating activities will be sufficient to finance our operating expenditures, capital expenditures and scheduled debt repayments through the 2005 fiscal year. To the extent that net cash provided by operating activities is not sufficient to finance our operating expenditures, capital expenditures and scheduled debt repayments through the 2005 fiscal year, we may borrow additional funds under our revolving credit facility or ABS lease facility or we may obtain additional debt or equity financing.

Recent Acquisition. On November 2, 2004, we completed the acquisition of the contract compression fleet of Hanover Canada Corporation, a subsidiary of Hanover Compressor Company, for \$56.9 million. The acquisition was funded by \$50.0 million in borrowings under our revolving credit facility and \$6.9 million in cash.

Availability. As of September 30, 2004, after giving effect to \$24.9 million of outstanding letters of credit under our financing documents, we had an aggregate unused credit availability of approximately \$205.1 million under our revolving credit facility and ABS lease facility. As of November 2, 2004, after giving effect to \$24.7 million of outstanding letters of credit under our financing documents and additional borrowings to fund the acquisition of the contract compression fleet of Hanover Canada Corporation, we had an aggregate unused credit availability of approximately \$155.3 million under our revolving credit facility and ABS lease facility.

Recent Refinancing Activity. During the three months ended March 31, 2004 we repurchased \$5.0 million of our 8⁷/8% senior notes due February 2008. In April 2004 we repurchased an additional \$5.0 million of our 8⁷/8% senior notes due 2008 and will continue to look at opportunistic repurchases, subject to market conditions. In June 2004, the Company paid \$80.0 million to reduce the principal amount outstanding under the ABS lease facility.

UNIVERSAL COMPRESSION, INC.

Six months ended September 30, 2004 compared to six months ended September 30, 2003

Revenue. Domestic contract compression revenue increased due primarily to higher average contract prices in the six months ended September 30, 2004. International contract compression revenue increased primarily as a result of additional compression business in Argentina and additional revenue from a project in Brazil, which contributed to increases of \$2.3 million and \$2.0 million, respectively. Fabrication revenue increased due to large projects for customers in the United States, Asia Pacific, Latin America and Canadian regions, which contributed

increases of \$20.4 million, \$10.6 million, \$3.3 million and \$1.9 million, respectively, compared to the six months ended

September 30, 2003. Fabrication backlog fluctuates quarter to quarter due to the timing of receipt of orders placed by customers and the timing of revenue recognition. Aftermarket services revenue was higher primarily due to increases within the Canada region (\$1.2 million), Latin America region (\$0.7 million) and Asia Pacific region (\$0.7 million).

Gross Profit. The changes to gross profit (defined as total revenues less direct costs) for the six months ended September 30, 2004 compared to the prior year period were primarily attributable to revenue increases discussed above for domestic contract compression, international contract compression and fabrication. The increase in fabrication gross profit was also partially attributable to improved margins compared to the prior year, which experienced margin deterioration primarily as a result of cost overruns related to several highly customized fabrication projects.

Depreciation and Amortization. The increase in depreciation and amortization expense for the six months ended September 30, 2004 compared to the prior year primarily resulted from the start of operations of a project in Brazil and other capital additions.

Selling, General, and Administrative Expenses. The increase in selling, general and administrative expenses for the six months ended September 30, 2004 relates to the increased expenses resulting from increased operating activity within the Latin America and Asia Pacific regions of \$1.6 million and \$1.3 million, respectively. Selling, general and administrative expenses represented 10% of total revenues for both periods.

EBITDA, as adjusted. EBITDA as adjusted, for the six months ended September 30, 2004 was \$114.6 million compared to \$107.8 million for the prior year period. The increase in EBITDA of 6.4% from the prior year period is primarily attributable to the revenue increases discussed above for domestic contract compression, international contract compression and fabrication. EBITDA, as adjusted, is defined, discussed and reconciled to net income on page 28 of this report, within Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Interest Expense, Net. Interest expense decreased \$1.3 million as a result of the \$80.0 million reduction of the ABS lease facility and decreased \$2.1 million due to the lower interest rate resulting from entering into interest rate swap agreements on \$100.0 million of our \$175.0 million 7¹/₄% senior notes due 2010.

Debt Extinguishment Costs. Debt extinguishment costs incurred during the six months ended September 30, 2003 were primarily due to the early extinguishment in May 2003 of Universal's outstanding \$229.8 million 9⁷/8% senior discount notes due 2008. The net proceeds from the offering by Universal of new 7¹/4% senior discount notes due 2010 and available funds were used to pay for the extinguishment of the 9⁷/8% senior discount notes due 2008. As a result of the early extinguishment of debt, a charge of \$14.4 million was recognized in the prior year resulting from the redemption and tender premiums of \$12.0 million, write-off of unamortized debt issuance costs of \$1.9 million and \$0.5 million of other costs. For the six months ended September 30, 2004, debt extinguishment costs of \$0.5 million resulted from the buyback of \$5.0 million of our 8⁷/8% senior notes due 2008.

Gain on Termination of Interest Rate Swaps. A \$3.2 million gain on the termination of interest rate swaps was recognized for the six months ended September 30, 2004. This gain was the result of reducing the notional amount of interest rate swaps by \$84.8 million on our ABS lease facility in connection with a principal reduction of \$80.0 million in June 2004.

Facility Consolidation Costs. Facility consolidation costs incurred during the six months ended September 30, 2003 were \$1.8 million. These costs related to the transfer of the Tulsa, Oklahoma fabrication operations to the Houston fabrication facility and were primarily for severance, personnel costs and relocation costs.

Income Tax Expense. The increase in income tax expense for the six months ended September 30, 2004 primarily relates to increased income before taxes as compared to the six months ended September 30, 2003 due to items mentioned above.

THE COMPANY'S DEFINITION, RECONCILIATION AND USE OF EBITDA, AS ADJUSTED

EBITDA, as adjusted, is defined as net income plus income taxes, interest expense (including debt extinguishment costs and gain on the termination of interest rate swaps), operating lease expense, depreciation and amortization, foreign currency gains or losses, excluding non-recurring items (including facility consolidation costs) and extraordinary gains or losses.

EBITDA, as adjusted, represents a measure upon which management assesses performance and, as such, we believe that the generally accepted accounting principle ("GAAP") measure most directly comparable to it is net income or net loss. The following table reconciles our EBITDA, as adjusted, to net income:

	Three Months Ended September 30,		Six Months Ended September 30,					
		2004		2003		2004		2003
		(In thou	isand	ds)		(In thou	ısan	ds)
EBITDA, as adjusted	\$	59,509	\$	55,302	\$	114,625	\$	107,757
Depreciation and amortization		(23,123)		(20,915)		(45,796)		(41,905)
Interest expense		(16,154)		(17,960)		(32,972)		(37,876)
Debt extinguishment costs						(475)		(14,397)
Gain on termination of interest rate swaps						3,197		
Foreign currency gain (loss)		(882)		(884)		(524)		165
Facility consolidation costs				(417)				(1,821)
Income tax expense		(7,160)		(5,823)		(14,080)		(4,592)
-	_		_		_		_	
Net income	\$	12,190	\$	9,303	\$	23,975	\$	7,331
							_	

Management believes disclosure of EBITDA, as adjusted, a non-GAAP measure, provides useful information to investors because, when viewed with our GAAP results and accompanying reconciliations, it provides a more complete understanding of our performance than GAAP results alone. Management uses EBITDA, as adjusted, as a supplemental measure to review current period operating performance, a comparability measure, a performance measure for period to period comparisons and a valuation measure.

Use of EBITDA, as adjusted, by itself and without consideration of other measures, is not an adequate measure of the Company's performance because this measure excludes certain material items. Further, the measure has a limitation in that many users of financial statements believe that EBITDA is a measure of liquidity or of cash flows. We do not use EBITDA, as adjusted, in this way because it excludes interest payments and changes in working capital accounts and therefore we urge the readers of our financial statements to not use the measure in this way either. Management compensates for these limitations by using EBITDA, as adjusted, as a supplemental measure to other GAAP results to provide a more complete understanding of our performance without considering financial and other items that have less bearing on operating performance. The measure has a limitation, as it does not consider the amount of required reinvestment to maintain similar going forward results. Management mitigates this limitation by reviewing and disclosing the Company's capital and maintenance capital expenditures on a regular basis as yet another supplemental tool to evaluate the Company.

EBITDA, as adjusted, is not a measure of financial performance under GAAP and should not be considered an alternative to operating income or net income as an indicator of our operating performance or to net cash provided by operating activities as a measure of our liquidity.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to some market risk due to the floating or variable interest rates under our financing arrangements. Some of the interest and lease payments under our financing arrangements are based on a floating rate plus an applicable margin. The variable interest rate under our revolving credit facility, which had no amounts outstanding as of September 30, 2004, is based upon either a base rate or LIBOR, at our option, and the applicable margin is a variable amount from 1.5% to 2.5% based on a leverage ratio. The variable interest rate under our \$82.2 million term loan is based upon the one-month LIBOR rate and the applicable margin is a fixed 3.25%. The one-month LIBOR rate at October 28, 2004 was 2.0%. The variable interest rate applicable to \$100 million of our $7^{1}/4\%$ senior notes due 2010 pursuant to an interest rate swap is based upon the six-month LIBOR rate plus the applicable margin of 3.2%. The six-month LIBOR rate at October 28, 2004 was 2.2%. As of September 30, 2004, approximately \$182.2 million of our outstanding indebtedness and other obligations bore interest at floating rates and a 1.0% increase in interest rates would result in an approximate \$1.8 million annual increase in our interest expense.

We hold interest rate swaps related to the ABS operating lease facility. At September 30, 2004, the fair market value of these interest rate swaps was a liability of approximately \$4.9 million, which was recorded as a noncurrent liability. The interest rate swaps terminate in February 2013. The weighted average fixed rate of these swaps is 5.2%.

To minimize any significant foreign currency credit risk, we generally contractually require that payment by our customers be made in U.S. dollars. If payment is not made in U.S. dollars, we generally utilize the exchange rate into U.S. dollars on the payment date and balance payments in local currency against local expenses.

ITEM 4. Controls and Procedures

As required by Rule 13a-15(b) and Rule 15d-15(b) under the Securities Exchange Act of 1934 (the "Exchange Act"), Company management, including the Chief Executive Officer and Chief Financial Officer of the Company and of Universal, evaluated as of the end of the period covered by this report, the effectiveness of their disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) and Rule 15d-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer of the Company and Universal concluded that their disclosure controls and procedures, as of the end of the period covered by this report, were effective for the purpose of ensuring that material information required to be in this report is made known to management, including the Chief Executive Officer and Chief Financial Officer, by others on a timely basis. As required by Exchange Act Rule 13a-15(d) and Rule 15d-15(d), management, including the Chief Executive Officer and Chief Financial Officer of the Company and of Universal, also evaluated whether any change in their internal control over financial reporting that occurred during the quarter covered by this report has materially affected, or is reasonably likely to materially affect, their internal control over financial reporting. Based on that evaluation, there has been no such change during the quarter covered by this report.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings		

None.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Submission of Matters to a Vote of Security Holders

On July 23, 2004, we held our Annual Meeting of Stockholders. The matters voted upon at the meeting and the results of those votes were as follows:

 Re-election of three Class A members of the Board of Directors for a term expiring at our 2007 Annual Meeting of Stockholders:

	Votes For	Votes Withheld
Thomas C. Case	27,078,799	2,338,538
Janet F. Clark	27,078,799	2,338,538
Uriel E. Dutton	26,659,700	2,757,637

2. Approval of an amendment to the Incentive Stock Option Plan to increase by 1,000,000 the number of shares of Company common stock available for grant under the plan from 5,012,421 shares to 6,012,421 shares and to delete reference to a former major stockholder:

For	Against	Abstain	Broker Non-Vote
22.062.434	5.442.524	717.249	1,195,130

3. Approval of an amendment to the Restricted Stock Plan to increase by 1,000,000 the number of shares of Company common stock available for grant under the plan from 350,000 shares to 1,350,000 shares and to enlarge the group of employees who are eligible to receive awards of stock under the plan:
