Approximate Date of Proposed Public Offering: From time to time after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a distribution reinvestment plan, check the following box.

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Edgar Filing: ARES CAPITAL CORP - Form N-2

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum Offering Price Per Unit	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee
Common Stock, \$0.001 par value per share(2)				
Preferred Stock, \$0.001 par value per share(2)				
Subscription Rights(2)				
Warrants(3)				
Debt Securities(4)				
Total			\$600,000,000(5)	\$23,580

- (1) Estimated pursuant to Rule 457(o) solely for the purpose of determining the registration fee.
- (2) Subject to Note 5 below, there is being registered hereunder an indeterminate number of common stock, preferred stock or subscription rights to purchase shares of common stock as may be sold, from time to time separately or as units in combination with other securities registered hereunder.
- (3) Subject to Note 5 below, there is being registered hereunder an indeterminate number of warrants as may be sold, from time to time separately or as units in combination with other securities registered hereunder, representing rights to purchase common stock, preferred stock or debt securities.
- (4) Subject to Note 5 below, there is being registered hereunder an indeterminate principal amount of debt securities as may be sold, from time to time separately or as units in combination with other securities registered hereunder. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$600,000,000.
- (5) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$600,000,000.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933, AS AMENDED, OR UNTIL THIS REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE COMMISSION, ACTING PURSUANT TO SECTION 8(a), MAY DETERMINE.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Debt Securities**

Ares Capital Corporation is a specialty finance company that is a closed-end, non-diversified management investment company incorporated in Maryland. We have elected to be regulated as a business development company under the Investment Company Act of 1940. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases may include an equity component, and, to a lesser extent, in equity investments, in private middle market companies.

We are managed by Ares Capital Management LLC, an affiliate of Ares Management LLC, an independent international investment management firm that currently manages investment funds that have approximately \$20.0 billion of committed capital. Ares Operations LLC, an affiliate of Ares Management LLC, provides the administrative services necessary for us to operate.

Our common stock is traded on The NASDAQ Global Select Market under the symbol "ARCC." On _____, 2008, the last reported sales price of our common stock on The NASDAQ Global Select Market was \$ _____ per share.

Investing in our securities involves risks that are described in the "Risk Factors" section beginning on page 18 of this prospectus, including the risk of leverage.

We may offer, from time to time, in one or more offerings or series, up to \$600,000,000 of our common stock, preferred stock, subscription rights to purchase shares of our common stock, debt securities or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, separately or as units comprised of any combination of the foregoing, which we refer to, collectively, as the "securities." The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus. In the event we offer common stock, the offering price per share of our common stock less any underwriting commissions or discounts will not be less than the net value per share of our common stock at the time we make the offering except (i) in connection with a rights offering to our existing stockholders, (ii) with the consent of the majority of our common stockholders, or (iii) under such circumstances as the Securities and Exchange Commission (the "SEC") may permit. This prospectus and the accompanying prospectus supplement concisely provide important information you should know before investing in our securities. Please read this prospectus and the accompanying prospectus supplement before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information with the SEC. This information is available free of charge by calling us collect at (310) 201-4200 or on our website at www.arescapitalcorp.com. The SEC also maintains a website at www.sec.gov that contains such information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Edgar Filing: ARES CAPITAL CORP - Form N-2

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

The date of this prospectus is _____, 2008.

Edgar Filing: ARES CAPITAL CORP - Form N-2

You should rely only on the information contained in this prospectus and the accompanying prospectus supplement. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus and the accompanying prospectus supplement is accurate only as of the date on the front cover of this prospectus and the accompanying prospectus supplement, as applicable. Our business, financial condition, results of operations and prospects may have changed since that date.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC, using the "shelf" registration process. Under the shelf registration process, we may offer, from time to time, up to \$600,000,000 of our common stock, preferred stock, debt securities or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities on the terms to be determined at the time of the offering. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement together with any exhibits and the additional information described under the headings "Available Information" and "Risk Factors" before you make an investment decision.

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under "Risk Factors" and the other information included in this prospectus. Except where the context suggests otherwise, the terms "we," "us," "our," "the Company" and "Ares Capital" refer to Ares Capital Corporation and its subsidiaries; "Ares Capital Management," "investment adviser" or Investment Adviser refers to Ares Capital Management LLC; "Ares Administration" refers to Ares Operations LLC; and "Ares" refers to Ares Partners Management Company LLC and its affiliated companies, including Ares Management LLC.

THE COMPANY

Ares Capital is a specialty finance company that is a closed-end, non-diversified management investment company. We have elected to be regulated as a business development company, or a "BDC," under the Investment Company Act of 1940, or the "Investment Company Act." We were founded in April 2004 and completed our initial public offering on October 8, 2004. Ares Capital's investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in U.S. middle market companies, where we believe the supply of primary capital is limited and the investment opportunities are most attractive.

We invest primarily in first and second lien senior loans and long-term mezzanine debt. First and second lien senior loans generally are senior debt instruments that rank ahead of subordinated debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Mezzanine debt is subordinated to senior loans and is generally unsecured. In some cases, we may also receive warrants or options in connection with our debt instruments. Our investments have generally ranged between \$10 million and \$50 million each, although the investment sizes may be more or less than the targeted range and are expected to grow with our capital availability. We also, to a lesser extent, make equity investments in private middle market companies. These investments have generally been less than \$10 million each but may grow with our capital availability and are usually made in conjunction with loans we make to companies. In connection with our investing activities, we may make commitments with respect to indebtedness or securities of a potential portfolio company substantially in excess of our final investment. In such situations, while we may initially agree to fund up to a certain dollar amount of an investment, we may syndicate a portion of such amount to third parties prior to closing such investment, such that we make a smaller investment than what was reflected in our original commitment. In this prospectus, we generally use the term "middle market" to refer to companies with annual EBITDA between \$5 million and \$50 million. EBITDA represents net income before net interest expense, income tax expense, depreciation and amortization.

The first and second lien senior loans generally have stated terms of three to 10 years and the mezzanine debt investments generally have stated terms of up to 10 years, but the expected average life of such first and second lien loans and mezzanine debt is generally between three and seven years. However, there is no limit on the maturity or duration of any security in our portfolio. The debt that we invest in typically is not initially rated by any rating agency, but we believe that if such investments were rated, they would be below investment grade (rated lower than "Baa3" by Moody's Investors Service or lower than "BBB-" by Standard & Poor's Corporation). We may invest without limit in debt of any rating, as well as debt that has not been rated by any nationally recognized statistical rating organization.

We believe that our investment adviser, Ares Capital Management, is able to leverage Ares' current investment platform, resources and existing relationships with financial sponsors, financial institutions, hedge funds and other investment firms to provide us with attractive investments. In

In addition to deal flow, the Ares investment platform assists our investment adviser in analyzing, structuring and monitoring investments. Ares' senior principals have worked together for many years and have substantial experience investing in senior loans, high yield bonds, mezzanine debt and private equity. The Company has access to the Ares staff of approximately 93 investment professionals and to the 91 administrative professionals employed by Ares who provide assistance in accounting, legal, compliance and investor relations.

While our primary focus is to generate current income and capital appreciation through investments in first and second lien senior loans and mezzanine debt and, to a lesser extent, equity securities of private companies, we also may invest up to 30% of the portfolio in opportunistic investments. Such investments may include, among others, investments in high-yield bonds, debt and equity securities and distressed debt or equity securities of public companies. We expect that these public companies generally will have debt that is non-investment grade. As part of this 30% of the portfolio, we may also invest in debt of middle market companies located outside of the United States.

About Ares

Ares is an independent international investment management firm with approximately \$20.0 billion of total committed capital and over 220 employees as of the date of this prospectus. Ares was founded in 1997 by a group of highly experienced investment professionals.

Ares specializes in originating and managing assets in both the leveraged finance and private equity markets. Ares' leveraged finance activities include the acquisition and management of senior loans, high yield bonds, mezzanine and special situation investments. Ares' private equity activities focus on providing flexible, junior capital to middle market companies. Ares has the ability to invest across a capital structure, from senior secured floating rate debt to common equity.

Ares is comprised of the following groups:

Capital Markets Group. The Ares Capital Markets Group currently manages a variety of funds and investment vehicles that have approximately \$13.5 billion of committed capital, focusing primarily on syndicated senior secured loans, high yield bonds, distressed debt, other liquid fixed income investments and other publicly traded debt securities.

Private Debt Group. The Ares Private Debt Group manages the assets of Ares Capital and Ares' private debt middle-market financing activities in Europe, Ares Capital Europe ("ACE"). The Private Debt Group focuses primarily on non-syndicated first and second lien senior loans and mezzanine debt, which in some cases may include an equity component, and, to a lesser extent, in equity investments, in private middle market companies.

Private Equity Group. The Ares Private Equity Group manages Ares Corporate Opportunities Fund L.P. and Ares Corporate Opportunities Fund II, L.P. (collectively referred to as "ACOF"), which together have approximately \$2.8 billion of total committed capital. ACOF generally makes private equity investments in companies in amounts substantially larger than the private equity investments anticipated to be made by Ares Capital. The Private Equity Group generally focuses on control-oriented equity investments in under-capitalized companies or companies with capital structure issues.

Ares' senior principals have been working together as a group for many years and have an average of over 20 years of experience in leveraged finance, private equity, distressed debt, investment banking and capital markets. They are backed by a large team of highly-disciplined professionals. Ares' rigorous investment approach is based upon an intensive, independent financial analysis, with a focus on preservation of capital, diversification and active portfolio management. These fundamentals

underlie Ares' investment strategy and have resulted in large pension funds, banks, insurance companies and endowments investing in Ares funds.

Ares Capital Management

Ares Capital Management, our investment adviser, is served by a dedicated origination and transaction development team of 30 investment professionals, including our President, Michael J. Arougheti, which team is augmented by Ares' additional investment professionals, primarily its 36 member Capital Markets Group. Ares Capital Management's investment committee has eight members, including Mr. Arougheti, four founding members of Ares and three senior investment professionals. In addition, Ares Capital Management leverages off of Ares' entire investment platform and benefits from the Ares investment professionals' significant capital markets, trading and research expertise developed through Ares industry analysts. Ares funds currently hold over 600 investments and have made investments in over 1,600 companies since inception.

MARKET OPPORTUNITY

We believe the environment for investing in middle market companies is attractive for the following reasons:

We believe that many senior lenders have, in recent years, de-emphasized their service and product offerings to middle market businesses in favor of lending to large corporate clients and managing capital markets transactions.

We believe there is increased demand among private middle market companies for primary capital. Many middle-market firms have faced increased difficulty raising debt in the capital markets, due to a continuing preference for larger size high yield bond issuances.

We believe there is a large pool of uninvested private equity capital for middle market companies. We expect private equity firms will seek to leverage their investments by combining capital with senior secured loans and mezzanine debt from other sources.

We believe that as of the date of this prospectus, current credit market dislocation has seen a reduction in competition, a widening of spreads and generally more conservative capital structures.

COMPETITIVE ADVANTAGES

We believe that we have the following competitive advantages over other capital providers to middle market companies:

Existing investment platform

Ares currently manages approximately \$20.0 billion of committed capital in the related asset classes of syndicated loans, high yield bonds, mezzanine debt and private equity. We believe Ares' current investment platform provides a competitive advantage in terms of access to origination and marketing activities and diligence for Ares Capital.

Seasoned management team

Ares' senior professionals have an average of over 20 years experience in leveraged finance, including substantial experience in investing in leveraged loans, high yield bonds, mezzanine debt, distressed debt and private equity securities. As a result of Ares' extensive investment experience, Ares and its senior principals have developed a strong reputation in the capital markets and have significant experience investing across cycles, particularly in distressed markets. We believe that this experience

affords Ares Capital a competitive advantage in identifying and investing in middle market companies with the potential to generate positive returns.

Experience and focus on middle market companies

Ares has historically focused on investments in middle market companies and we benefit from this experience. Our investment adviser uses Ares' extensive network of relationships with intermediaries focused on middle market companies to attract well-positioned prospective portfolio company investments. Our investment adviser works closely with the Ares investment professionals, who oversee a portfolio of investments in over 600 companies, and provide access to an extensive network of relationships and special insights into industry trends and the state of the capital markets.

Disciplined investment philosophy

In making its investment decisions, our investment adviser has adopted Ares' long-standing, consistent investment approach that was developed over 15 years ago by its founders. Specifically, Ares Capital Management's investment philosophy and portfolio construction involve an assessment of the overall macroeconomic environment, financial markets and company-specific research and analysis. Its investment approach emphasizes capital preservation, low volatility and minimization of downside risk.

Extensive industry focus

We concentrate our investing activities in industries with a history of predictable and dependable cash flows and in which the Ares investment professionals historically have had extensive investment experience. Since its inception in 1997, Ares investment professionals have invested in over 1,600 companies in over 30 different industries, and over this time have developed long-term relationships with management teams and management consultants within these industries. The experience of Ares' investment professionals in investing across these industries, throughout various stages of the economic cycle, provides our investment adviser with access to ongoing market insights and favorable investment opportunities.

Flexible transaction structuring

We are flexible in structuring investments, the types of securities in which we invest and the terms associated with such investments. The principals of Ares have extensive experience in a wide variety of securities for leveraged companies with a diverse set of terms and conditions. This approach and experience should enable our investment adviser to identify attractive investment opportunities throughout the economic cycle and across a company's capital structure so that we can make investments consistent with our stated objective. In addition, we have the ability to hold larger investments than many of our middle market competitors. The ability to underwrite, syndicate and hold larger investments (i) increases flexibility, (ii) potentially increases net fee income and earnings through syndication, (iii) broadens market relationships and deal flow and (iv) allows us to optimize portfolio composition. We also focus on acting as agent for or leading many of our investments. In these situations we tend to have (i) greater control over deal terms, pricing and structure and (ii) a closer relationship with issuers leading to more active portfolio management.

OPERATING AND REGULATORY STRUCTURE

Our investment activities are managed by Ares Capital Management and supervised by our board of directors, a majority of whom are independent of Ares and its affiliates. Ares Capital Management is an investment adviser that is registered under the Investment Advisers Act of 1940, or the "Advisers Act." Under our amended and restated investment advisory and management agreement, referred to herein as our investment advisory and management agreement, we have agreed to pay Ares

Edgar Filing: ARES CAPITAL CORP - Form N-2

Capital Management an annual base management fee based on our total assets, as defined under the Investment Company Act (other than cash and cash equivalents but including assets purchased with borrowed funds), and an incentive fee based on our performance. See "Management Investment Advisory and Management Agreement."

As a BDC, we are required to comply with certain regulatory requirements. While we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See "Regulation." We have elected to be treated for federal income tax purposes as a regulated investment company, or a "RIC," under Subchapter M of the Internal Revenue Code of 1986, or the "Code." See "Material U.S. Federal Income Tax Considerations."

LIQUIDITY

We are party to a Senior Secured Revolving Credit Agreement that provides for up to \$510 million of borrowings, which expires on December 28, 2010. In addition, our wholly owned subsidiary, Ares Capital CP Funding LLC, is party to a separate credit facility (together with the Senior Secured Revolving Credit Agreement, the "Facilities") that provides for up to \$350 million of borrowings, which expires on October 8, 2008, unless extended prior to such date with the consent of the lenders. See "Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Condition, Liquidity and Capital Resources."

RISK FACTORS

Investing in Ares Capital involves risks. The following is a summary of certain risks that you should carefully consider before investing in our securities. In addition, see "Risk Factors" beginning on page 18 for a more detailed discussion of the factors you should carefully consider before deciding to invest in our securities.

Risks Relating to Our Business

A failure on our part to maintain our status as a BDC would significantly reduce our operating flexibility.

We are dependent upon Ares Capital Management's key personnel for our future success and upon their access to Ares investment professionals.

Our financial condition and results of operation will depend on our ability to manage future growth effectively.

Our ability to grow will depend on our ability to raise capital.

We operate in a highly competitive market for investment opportunities.

We will be subject to corporate-level income tax if we are unable to qualify as a RIC.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital.

We borrow money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing with us.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Edgar Filing: ARES CAPITAL CORP - Form N-2

We will be exposed to risks associated with changes in interest rates.

Many of our portfolio investments are not publicly traded and, as a result, there will be uncertainty as to the value of our portfolio investments.

The lack of liquidity in our investments may adversely affect our business.

We may experience fluctuations in our quarterly results.

There are significant potential conflicts of interest that could impact our investment returns.

Our investment adviser's liability is limited under the investment management agreement, and we will indemnify our investment adviser against certain liabilities, which may lead our investment adviser to act in a riskier manner on our behalf than it would when acting for its own account.

We may be obligated to pay our investment adviser incentive compensation even if we incur a loss.

Changes in laws or regulations governing our operations, or changes in the interpretation thereof, and any failure by us to comply with laws or regulations governing our operations may adversely affect our business.

The Company may not replicate Ares' historical success.

Our ability to enter into transactions with our affiliates is restricted.

Risks Relating To Our Investments

Our investments may be risky, and we could lose all or part of our investment.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

An investment strategy focused primarily on privately-held companies presents certain challenges, including the lack of available information about these companies and a greater vulnerability to economic downturns.

Our portfolio companies may incur debt or issue equity securities that rank equally with, or senior to, our investments in such companies.

Investments in equity securities involve a substantial degree of risk.

Our incentive fee may induce Ares Capital Management to make certain investments, including speculative investments.

Edgar Filing: ARES CAPITAL CORP - Form N-2

Our portfolio companies may be highly leveraged.

Our portfolio is concentrated in a limited number of portfolio companies, which subjects us to a risk of significant loss if any of these companies defaults on its repayment obligations.

Our investments in foreign debt may involve significant risks in addition to the risks inherent in U.S. investments. We may expose ourselves to risks if we engage in hedging transactions.

We may initially invest a portion of the net proceeds of offerings pursuant to this prospectus primarily in high-quality short-term investments, which will generate lower rates

Edgar Filing: ARES CAPITAL CORP - Form N-2

of return than those expected from the interest generated on first and second lien loans and mezzanine debt.

When we are a debt or minority equity investor in a portfolio company, we may not be in a position to control the entity, and management of the company may make decisions that could decrease the value of our portfolio holdings.

Risks Relating To Offerings

There is a risk that investors in our equity securities may not receive dividends or that our dividends may not grow over time and that investors in our debt securities may not receive all of the interest income to which they are entitled.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

Investing in our shares may involve an above average degree of risk.

The market price of our common stock may fluctuate significantly.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering.

The trading market or market value of our publicly issued debt securities may fluctuate.

Terms relating to redemption may materially adversely affect your return on our debt securities.

Our credit ratings may not reflect all risks of an investment in the debt securities.

Our shares of common stock may trade at discounts from net asset value.

Investors in offerings of our common stock will incur immediate dilution upon the closing of such offering.

Stockholders will experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

OUR CORPORATE INFORMATION

Our administrative offices are located at 1999 Avenue of the Stars, Suite 1900, Los Angeles, California, 90067, telephone number (310) 201-4200, and our executive offices are located at 280 Park Avenue, 22nd Floor, Building East, New York, New York 10017, telephone number (212) 750-7300.

OFFERINGS

We may offer, from time to time, up to \$600,000,000 of our common stock, preferred stock, subscription rights, debt securities or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, or units comprised of any combination of the foregoing, on terms to be determined at the time of the offering. We will offer our securities at prices and on terms to be set forth in one or more supplements to this prospectus. The offering price per share of our common stock, less any underwriting commissions or discounts, will not be less than the net asset value per share of our common stock at the time of an offering unless (i) our board of directors determines that such sale is in our best interests and the best interests of our stockholders and our stockholders approve such sale (ii) in connection with a rights offering to our existing stockholders, or (iii) under such other circumstances as the SEC may permit.

We may offer our securities directly to one or more purchasers, including existing stockholders in a rights offering, through agents that we designate from time to time or to or through underwriters or dealers. The prospectus supplement relating to each offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See "Plan of Distribution." We may not sell any of our securities through agents, underwriters or dealers without delivery of a prospectus supplement describing the method and terms of the offering of our securities.

Set forth below is additional information regarding offerings of our securities:

Use of proceeds	Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from the sale of our securities for general corporate purposes, which includes investing in portfolio companies in accordance with our investment objective and strategies and market conditions and repaying indebtedness. Each supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. See "Use of Proceeds."
Distributions	We intend to distribute quarterly dividends to our stockholders out of assets legally available for distribution. Our quarterly dividends, if any, will be determined by our board of directors. For more information, see "Price Range of Common Stock and Distributions."
Taxation	We have elected to be treated for federal income tax purposes as a RIC. As a RIC, we generally will not pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To maintain our RIC status, we must meet specified source-of-income and asset diversification requirements and distribute annually an amount equal to at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, reduced by deductible expenses, out of assets legally available for distribution. See "Risk Factors We will be subject to corporate level income tax if we are unable to qualify as a RIC" and "Price Range of Common Stock and Distributions."

Edgar Filing: ARES CAPITAL CORP - Form N-2

Dividend reinvestment plan	We have a dividend reinvestment plan for our stockholders. This is an "opt out" dividend reinvestment plan. As a result, if we declare a dividend, then stockholders' cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically "opt out" of the dividend reinvestment plan so as to receive cash dividends. Stockholders who receive distributions in the form of stock will be subject to the same federal, state and local tax consequences as stockholders who elect to receive their distributions in cash. See "Dividend Reinvestment Plan."
NASDAQ Global Select Market symbol	"ARCC"
Anti-takeover provisions	Our board of directors is divided into three classes of directors serving staggered three-year terms. This structure is intended to provide us with a greater likelihood of continuity of management, which may be necessary for us to realize the full value of our investments. A staggered board of directors also may serve to deter hostile takeovers or proxy contests, as may certain other measures adopted by us. See "Description of our Capital Stock."
Leverage	We borrow funds to make additional investments. We use this practice, which is known as "leverage," to attempt to increase returns to our common stockholders, but it involves significant risks. See "Risk Factors," "Senior Securities" and "Regulation Indebtedness and Senior Securities." With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the Investment Company Act, equals at least 200% after such borrowing. The amount of leverage that we employ at any particular time will depend on our investment adviser's and our board of directors' assessment of market and other factors at the time of any proposed borrowing.
Management arrangements	Ares Capital Management serves as our investment adviser. Ares Administration serves as our administrator. For a description of Ares Capital Management, Ares Administration, Ares and our contractual arrangements with these companies, see "Management Investment Advisory and Management Agreement," and " Administration Agreement."
Available information	We are required to file periodic reports, proxy statements and other information with the SEC. This information is available free of charge by calling us collect at (310) 201-4200 or on our website at www.arescapitalcorp.com . The SEC also maintains a website at www.sec.gov that contains this information.

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that an investor in our common stock will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by "you," "us" or "Ares Capital," or that "we" will pay fees or expenses, stockholders will indirectly bear such fees or expenses as investors in Ares Capital.

Stockholder transaction expenses (as a percentage of offering price):	
Sales load paid by us	(1)
Offering expenses borne by us	(2)
Dividend reinvestment plan expenses	None (3)
	<hr style="width: 50px; margin-left: auto; margin-right: 0;"/>
Total stockholder transaction expenses paid by us	(4)
	<hr style="width: 50px; margin-left: auto; margin-right: 0;"/>
Estimated annual expenses (as a percentage of consolidated net assets attributable to common stock)(5):	
Management fees	2.22%(6)
Incentive fees payable under investment advisory and management agreement (20% of realized capital gains and 20% of pre-incentive fee net investment income, subject to certain limitations)	1.98%(7)
Interest payments on borrowed funds	2.98%(8)
Other expenses	0.91%(9)
Acquired fund fees and expenses	1.22 (10)
	<hr style="width: 50px; margin-left: auto; margin-right: 0;"/>
Total annual expenses (estimated)	9.31%(11)
	<hr style="width: 50px; margin-left: 0; margin-right: auto;"/>

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.
- (2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.
- (3) The expenses of the dividend reinvestment plan are included in "other expenses."
- (4) The related prospectus supplement will disclose the offering price and the total stockholder transaction expenses as a percentage of the offering price.
- (5) "Consolidated net assets attributable to common stock" equals net assets at September 30, 2007.
- (6) Our management fee is currently 1.5% of our total assets other than cash and cash equivalents (which includes assets purchased with borrowed amounts). For the purposes of this table, we have assumed that we maintain no cash or cash equivalents and that the management fee will remain at 1.5% as set forth in our current investment advisory and management agreement. We may from time to time decide it is appropriate to change the terms of the agreement. Under the Investment Company Act, any material change to our investment advisory and management agreement must be submitted to stockholders for approval. The 2.22% reflected on the table is calculated on our net assets (rather than our total assets). See "Management Investment Advisory and Management Agreement."
- (7) This item represents our incentive fees based on annualizing actual amounts earned on our pre-incentive fee net income for the nine months ended September 30, 2007 and assumes that the incentive fees earned at the end of the 2007 calendar year will be based on the actual realized capital gains as of September 30, 2007, computed net of realized capital losses and unrealized capital depreciation. It also assumes that this fee will remain constant although it is based on our performance and will not be paid unless we achieve certain

goals. We expect to invest or otherwise

Edgar Filing: ARES CAPITAL CORP - Form N-2

utilize all of the net proceeds from securities registered under the registration statement of which this prospectus is a part pursuant to a particular prospectus supplement within three months of the date of the offering pursuant to such prospectus supplement and may have capital gains and interest income that could result in the payment of an incentive fee to our investment adviser in the first year after completion of offerings pursuant to this prospectus. Since our inception, the average quarterly incentive fee payable to our investment adviser has been approximately 0.57% of our weighted net assets (2.26% on an annualized basis). For more detailed information about incentive fees previously incurred by us, please see Note 3 to our consolidated financial statements for the period ended September 30, 2007.

The incentive fee consists of two parts:

The first, payable quarterly in arrears, equals 20% of our pre-incentive fee net investment income (including interest that is accrued but not yet received in cash), subject to a 2.00% quarterly (8% annualized) hurdle rate and a "catch-up" provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, our investment adviser receives no incentive fee until our net investment income equals the hurdle rate of 2.00% but then receives, as a "catch-up," 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.50%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.50% in any calendar quarter, our investment adviser will receive 20% of our pre-incentive fee net investment income as if a hurdle rate did not apply.

The second part, payable annually in arrears for each calendar year ending on or after December 31, 2004, equals 20% of our realized capital gains on a cumulative basis from inception through the end of the year, if any, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees.

We will defer cash payment of any incentive fee otherwise earned by our investment adviser if, during the most recent four full calendar quarter period ending on or prior to the date such payment is to be made, the sum of (a) our aggregate distributions to our stockholders and (b) our change in net assets (defined as total assets less indebtedness) is less than 8.0% of our net assets at the beginning of such period. These calculations will be adjusted for any share issuances or repurchases.

See "Management Investment Advisory and Management Agreement."

(8)

"Interest payments on borrowed funds" represents our annualized interest expenses based on actual interest and credit facility expense incurred for the nine months ended September 30, 2007. During the nine months ended September 30, 2007, our average borrowings were \$520.4 million and cash paid for interest expense was \$22.6 million. We had outstanding borrowings of \$527.5 million at September 30, 2007. This item is based on our assumption that our borrowings and interest costs after an offering will remain similar to those prior to such offering. The amount of leverage that we employ at any particular time will depend on, among other things, our investment adviser's and our board of directors' assessment of market and other factors at the time of any proposed borrowing. See "Risk Factors We borrow money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing with us."

(9)

Includes our overhead expenses, including payments under the administration agreement based on our allocable portion of overhead and other expenses incurred by Ares Administration in performing its obligations under the administration agreement. Such expenses are based on other expenses for the nine months ended September 30, 2007. See "Management Administration

Edgar Filing: ARES CAPITAL CORP - Form N-2

Agreement." The holders of shares of our common stock (and not the holders of our debt securities or preferred stock, if any) indirectly bear the cost associated with our annual expenses.

(10)

The Company's stockholders indirectly bear the expenses of underlying investment companies in which the Company invests. This amount includes the fees and expenses of investment companies in which the Company is invested in as of September 30, 2007. Certain of these investment companies are subject to management fees or incentive fees. When applicable, fees and expenses are based on historic fees and expenses for the investment companies and for those investment companies with little or no operating history, fees and expenses are based on expected fees and expenses stated in the operating history, fees and expenses are based on expected fees and expenses stated in the investment companies' offering memorandum, private placement memorandum or other similar communication without giving effect to any performance. Future fees and expenses for these investment companies may be substantially higher or lower because certain fees and expenses are based on the performance of the investment companies, which may fluctuate over time. The amount of the Company's average net assets used in calculating this percentage was based on average monthly net assets of \$1.0 billion for the nine months ended September 30, 2007.

(11)

"Total annual expenses" as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. The SEC requires that the "Total annual expenses" percentage be calculated as a percentage of net assets (defined as total assets less indebtedness), rather than the total assets, including assets that have been funded with borrowed monies. If the "Total annual expenses" percentage were calculated instead as a percentage of consolidated total assets, our "Total annual expenses" would be 6.19% of consolidated total assets.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage, that none of our assets are cash or cash equivalents, and that our annual operating expenses would remain at the levels set forth in the table above. Transaction expenses are not included in the following example. In the event that shares to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return(1)	\$ 75	\$ 220	\$ 357	\$ 672

(1)

The above illustration assumes that we will not realize any capital gains computed net of all realized capital losses and unrealized capital depreciation. The expenses you would pay, based on a \$1,000 investment and assuming a 5% annual return resulting entirely from net realized capital gains (and therefore subject to the capital gain incentive fee), and otherwise making the same assumptions in the example above, would be: 1 year, \$85; 3 years, \$248; 5 years, \$402; and 10 years, \$747. However, cash payment of the capital incentive fee would be deferred if during the most recent four full calendar quarter period ending on or prior to the date the payment set forth in the example is to be made, the sum of (a) our aggregate distributions to our stockholders and (b) our change in net assets (defined as total assets less indebtedness) was less than 8.0% of our net assets at the beginning of such period (as adjusted for any share issuances or repurchases).

The foregoing table is to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The incentive fee under the investment advisory and management agreement, which,

assuming a 5% annual return, would either not be payable or have an insignificant impact on the expense amounts shown above, is not included in the example. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in our dividend reinvestment plan who have not otherwise elected to receive cash will receive a number of shares of our common stock, determined by dividing the total dollar amount of the dividend payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the dividend. See "Dividend Reinvestment Plan" for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

SELECTED FINANCIAL AND OTHER DATA

The following selected financial and other data for the period from June 23, 2004 (inception) through December 31, 2004 and the years ended December 31, 2005 and 2006, are derived from our consolidated financial statements that have been audited by KPMG LLP, an independent registered public accounting firm whose report thereon is included elsewhere in this prospectus. The selected financial and other data for the nine months ended September 30, 2007 and 2006 and other quarterly financial information is derived from our unaudited financial statements, but in the opinion of management, reflects all adjustments (consisting only of normal recurring adjustments) that are necessary to present fairly the results of such interim periods. Interim results as of and for the nine months ended September 30, 2007 are not necessarily indicative of the results that may be expected for the year ended December 31, 2007. The data should be read in conjunction with our consolidated financial statements and notes thereto and "Management's Discussion and Analysis of Financial Condition and Results of Operations," which are included elsewhere in this prospectus.

(1) The information presented for the period June 23, 2004 (inception) through December 31, 2004 includes \$140.8 million of assets purchased from the Royal Bank of Canada and excludes \$9.7 million of publicly traded fixed income securities.

(2)

Edgar Filing: ARES CAPITAL CORP - Form N-2

The information presented for the period June 23, 2004 (inception) through December 31, 2004 excludes \$9.7 million of publicly traded fixed income securities.

(3)

Total return based on market value for the nine months ended September 30, 2007 equals the decrease of the ending market value at September 30, 2007 of \$16.27 per share over the ending market value at December 31, 2006 of \$19.11, plus the declared dividends of \$1.24 per share for the nine months ended September 30, 2007, divided by the market value at December 31, 2006. For the nine months ended September 30, 2006, the total return based on market value equals the increase of the ending market value at September 30, 2006 of \$17.42 per share over the ending market value at December 31, 2005 of \$16.07, plus the declared dividends of \$1.14 per share for the nine months ended September 30, 2006, divided by the market value at December 31, 2005. Total return based on market value for the year ended December 31, 2006 equals the increase of the ending market value at December 31, 2006 of \$19.11 per share over the ending market value at December 31, 2005 of \$16.07 per share plus the declared dividends of \$1.64 per share for the year ended December 31, 2006. Total return based on market value for the year ended December 31, 2005 equals the decrease of the ending market value at December 31, 2005 of \$16.07 per share over the ending market value at December 31, 2004 of \$19.43 per share plus the declared dividends of \$1.30 per share for the year ended

Edgar Filing: ARES CAPITAL CORP - Form N-2

December 31, 2005. Total return based on market value for the period June 23, 2004 (inception) through December 31, 2004 equals the increase of the ending market value at December 31, 2004 of \$19.43 per share over the offering price of \$15.00 per share plus the declared dividend of \$0.30 per share (includes return of capital of \$0.01 per share) for holders of record on December 27, 2004, divided by the offering price. Total return based on market value is not annualized. The Company's shares fluctuate in value. The Company's performance changes over time and currently may be different than that shown. Past performance is no guarantee of future results.

(4)

Total return based on net asset value for the nine months ended September 30, 2007 equals the change in net asset value during the period plus the declared dividends of \$1.24 per share for the nine months ended September 30, 2007, divided by the beginning net asset value during the period (adjusted for share issuances). For the nine months ended September 30, 2006, the total return based on net asset value equals the change in net asset value during the period plus the declared dividends of \$1.14 per share for the nine months ended September 30, 2006, divided by the beginning net asset value during the period (adjusted for share issuances). Total return based on net asset value for the year ended December 31, 2006 equals the change in net asset value during the period (adjusted for share issuances) plus the declared dividends of \$1.64 per share for the year ended December 31, 2006, divided by the beginning net asset value. Total return based on net asset value for the year ended December 31, 2005 equals the change in net asset value during the period (adjusted for share issuances) plus the declared dividends of \$1.30 per share for the year ended December 31, 2005, divided by the beginning net asset value. Total return based on net asset value for the period June 23, 2004 (inception) through December 31, 2004 equals the change in net asset value during the period plus the declared dividend of \$0.30 per share (includes return of capital of \$0.01 per share) for holders of record on December 27, 2004, divided by the beginning net asset value. Total return based on net asset value is not annualized. The Company's performance changes over time and currently may be different than that shown. Past performance is no guarantee of future results.

(5)

Weighted average yield on debt and income producing equity securities is computed as (a) the annual stated interest rate or yield earned plus the net annual amortization of original issue discount and market discount on accruing debt divided by (b) total debt and income producing equity securities at fair value.

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value of our common stock and the trading price of our securities could decline, and you may lose all or part of your investment.

RISKS RELATING TO OUR BUSINESS

A failure on our part to maintain our status as a BDC would significantly reduce our operating flexibility.

If we do not continue to qualify as a BDC, we might be regulated as a closed-end investment company under the Investment Company Act, which would significantly decrease our operating flexibility.

We are dependent upon Ares Capital Management's key personnel for our future success and upon their access to Ares investment professionals.

We depend on the diligence, skill and network of business contacts of the members of Ares Capital Management's investment committee. We also depend, to a significant extent, on Ares Capital Management's access to the investment professionals of Ares and the information and deal flow generated by Ares' investment professionals in the course of their investment and portfolio management activities. Our future success will depend on the continued service of Ares Capital Management's investment committee. The departure of any of the members of Ares Capital Management's investment committee, or of a significant number of the investment professionals or partners of Ares, could have a material adverse effect on our ability to achieve our investment objective. In addition, we cannot assure you that Ares Capital Management will remain our investment adviser or that we will continue to have access to Ares' investment professionals or its information and deal flow.

Our financial condition and results of operation will depend on our ability to manage future growth effectively.

Our ability to achieve our investment objective depends on our ability to acquire suitable investments and monitor and administer those investments, which depends, in turn, on Ares Capital Management's ability to identify, invest in and monitor companies that meet our investment criteria.

Accomplishing this result on a cost-effective basis is largely a function of Ares Capital Management's structuring of the investment process and its ability to provide competent, attentive and efficient services to us. Our executive officers and the members of Ares Capital Management have substantial responsibilities in connection with their roles at Ares and with the other Ares funds as well as responsibilities under the investment advisory and management agreement. They may also be called upon to provide managerial assistance to our portfolio companies on behalf of our administrator. These demands on their time, which will increase as the number of investments grow, may distract them or slow the rate of investment. In order to grow, Ares Capital Management will need to hire, train, supervise and manage new employees. However, we cannot assure you that any such employees will be retained. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

Edgar Filing: ARES CAPITAL CORP - Form N-2

In addition, as we grow, we may open up new offices in new geographic regions that may increase our direct operating expenses without corresponding revenue growth.

Our ability to grow will depend on our ability to raise capital.

We will need to periodically access the capital markets to raise cash to fund new investments. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. An inability to successfully access the capital markets could limit our ability to grow our business and fully execute our business strategy and could decrease our earnings, if any. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the Investment Company Act, equals at least 200% after such borrowing. The amount of leverage that we employ will depend on our investment adviser's and our board of directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to maintain our current Facilities or obtain other lines of credit at all or on terms acceptable to us.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make in middle market companies. We compete with other business development companies, public and private funds, commercial and investment banks, commercial financing companies, insurance companies, high yield investors, hedge funds, and, to the extent they provide an alternative form of financing, private equity funds. Many of our competitors are substantially larger and have considerably greater financial and marketing resources than we do. Some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the Investment Company Act imposes on us as a BDC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we cannot assure you that we will be able to identify and make investments that meet our investment objective.

We do not seek to compete primarily based on the interest rates we offer and we believe that some of our competitors may make loans with interest rates that will be comparable to or lower than the rates we offer. We also compete with our competitors based on our existing investment platform, our seasoned management team, our experience and focus on middle market companies, our disciplined investment philosophy, our extensive industry focus and our flexible transaction structuring. For a more detailed discussion of these competitive advantages, see "Business Competitive Advantages."

We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss. As a result of operating in such a competitive environment, we may make investments that are on better terms to our portfolio companies than what we may have originally anticipated, which may impact our return on these investments.

We will be subject to corporate-level income tax if we are unable to qualify as a RIC.

To qualify as a RIC under the Code, we must meet certain income source, asset diversification and annual distribution requirements.

The annual distribution requirement for a RIC is satisfied if we distribute to our stockholders on a timely basis an amount equal to at least 90% of our ordinary income and net short-term capital

gain in excess of net long-term capital loss, if any, reduced by deductible expenses for each year. Because we use debt financing, we are subject to certain asset coverage ratio requirements under the Investment Company Act and financial covenants under our loan agreements that could, under certain circumstances, restrict us from making distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify as a RIC and, thus, may be subject to corporate-level income tax. Because we must make distributions to our stockholders as described above, such amounts, to the extent a stockholder is not participating in our dividend reinvestment plan, will not be available to fund investment originations.

To qualify as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to (i) dispose of certain investments quickly or (ii) raise additional capital to prevent the loss of RIC status. If we fail to qualify as a RIC for any reason and become or remain subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions. Such a failure would have a material adverse effect on us and our stockholders.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if we receive warrants in connection with the making of a loan or possibly in other circumstances, or contracted payment-in-kind interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Such original issue discount or increases in loan balances are included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash, including, for example, non-cash income from pay-in-kind securities and deferred payment securities.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the tax requirement to distribute an amount equal to at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, reduced by deductible expenses, to maintain our status as a RIC. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements. If we are not able to obtain cash from other sources, we may fail to qualify as a RIC and thus be subject to corporate-level income tax. See "Material U.S. Federal Income Tax Considerations Taxation as a RIC."

If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible. The investment adviser is not under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued income that we never receive as a result of a default by an entity on the obligation that resulted in the accrual of such income.

Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital.

We may issue debt securities or preferred stock, which we refer to collectively as "senior securities," and borrow money from banks or other financial institutions up to the maximum amount permitted by the Investment Company Act. Under the provisions of the Investment Company Act, we will be permitted, as a BDC, to incur indebtedness or issue senior securities only in amounts such that our asset coverage, as defined in the Investment Company Act, equals at least 200% after such

incurrence or issuance. If the value of our assets declines, we may be unable to satisfy this test, which would prohibit us from paying dividends and could prevent us from maintaining our status as a RIC. If we cannot satisfy this test, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. As of September 30, 2007, our asset coverage for senior securities was 316.93%.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the current net asset value of the common stock if our board of directors determines that such sale is in our best interests and the best interests of our stockholders, and, in certain instances, our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price which, in the determination of our board of directors, closely approximates the market value of such securities (less any commission or discount). If our common stock trades at a discount to net asset value, this restriction could adversely affect our ability to raise capital.

In addition, we have, and may in the future, seek to securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly owned subsidiary and contribute a pool of loans to the subsidiary. This could include the sale of interests in the subsidiary on a non-recourse basis to purchasers who we would expect to be willing to accept a lower interest rate to invest in investment grade loan pools, and we would retain a portion of the equity in the securitized pool of loans. An inability to successfully securitize our loan portfolio could limit our ability to grow our business, fully execute our business strategy and decrease our earnings, if any. The securitization market is subject to changing market conditions and we may not be able to access this market when we would otherwise deem appropriate. Moreover, the successful securitization of our loan portfolio might expose us to losses as the residual loans in which we do not sell interests will tend to be those that are riskier and more apt to generate losses. The Investment Company Act may also impose restrictions on the structure of any securitization.

We borrow money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing with us.

As of September 30, 2007, we had \$213.5 million of outstanding borrowings under our Facilities and \$314.0 million of CLO Notes (as defined herein). In order for us to cover our annual interest payments on indebtedness, we must achieve annual returns on our September 30, 2007 total assets of at least 2.01%. The weighted average interest rate charged on our borrowings as of September 30, 2007 was 6.03%. We intend to continue borrowing under the Facilities in the future and we may increase the size of the Facilities or otherwise issue debt securities or other evidences of indebtedness. Our ability to service our debt depends largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. The amount of leverage that we employ at any particular time will depend on our investment adviser's and our board of directors' assessment of market and other factors at the time of any proposed borrowing.

Our Facilities impose financial and operating covenants that restrict our business activities, including limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code. A failure to renew our Facilities, or to add new or replacement debt facilities could have a material adverse effect on our business, financial condition and results of operations.

Borrowings, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. We currently borrow under our Facilities and in the future may borrow from or issue senior debt securities to banks, insurance companies and other lenders. Lenders of senior securities have fixed dollar claims on our consolidated

assets that are superior to the claims of our common stockholders. If the value of our consolidated assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not leveraged. Conversely, if the value of our consolidated assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our consolidated income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our consolidated income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. There is no assurance that a leveraging strategy will be successful.

The following table illustrates the effect on return to a holder of our common stock of the leverage created by our use of borrowing at the interest rate of 6.03% and assumes (i) our total value of net assets as of September 30, 2007; (ii) \$527.5 million debt outstanding as of September 30, 2007 and (iii) hypothetical annual returns on our portfolio of minus 15 to plus 15 percent.

Assumed Return on Portfolio (Net of Expenses)(1)	-15%	-10%	-5%	0%	5%	10%	15%
Corresponding Return to Common Stockholders(2)	-25%	-18%	-10%	-3%	5%	12%	19%

(1) The assumed portfolio return is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance.

(2) In order to compute the "Corresponding Return to Common Stockholders," the "Assumed Return on Portfolio" is multiplied by the total value of our assets at September 30, 2007 to obtain an assumed return to us. From this amount, the interest expense calculated by multiplying the interest rate of 6.03% times the \$527.5 million debt is subtracted to determine the return available to stockholders. The return available to stockholders is then divided by the total value of our net assets as of September 30, 2007 to determine the "Corresponding Return to Common Stockholders."

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Because preferred stock is another form of leverage and the dividends on any preferred stock we issue must be cumulative, preferred stock has the same risks to our common stockholders as borrowings. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

We will be exposed to risks associated with changes in interest rates.

General interest rate fluctuations may have a substantial negative impact on our investments and investment opportunities and, accordingly, may have a material adverse effect on our investment objective and our rate of return on invested capital. Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. Trading prices for debt that pays a fixed rate of return tend to fall as interest rates rise. Trading prices tend to fluctuate more for fixed-rate securities that have longer maturities. Although we

have no policy governing the maturities of our investments, under current market conditions we expect that we will invest in a portfolio of debt generally having maturities of up to 10 years. This means that we will be subject to greater risk (other things being equal) than a fund invested solely in shorter-term securities. A decline in the prices of the debt we own could adversely affect the trading price of our shares.

Many of our portfolio investments are not publicly traded and, as a result, there will be uncertainty as to the value of our portfolio investments.

A large percentage of our portfolio investments are not publicly traded. The fair value of investments that are not publicly traded may not be readily determinable. We value these investments quarterly at fair value as determined in good faith by our board of directors based on the input of our management and audit committee. However, we may be required to value our investments more frequently as determined in good faith by our board of directors to the extent necessary to reflect significant events affecting their value. In addition, the board of directors currently receives input from independent valuation firms that have been engaged at the direction of the board to value each portfolio security at least once during a trailing 12 month period. The valuation process is concluded at the end of each fiscal quarter, with approximately a quarter of our portfolio companies without market quotation subject to valuation by the independent valuation firm each quarter. The types of factors that may be considered in valuing our investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to publicly traded companies, discounted cash flow and other relevant factors. Because such valuations, and particularly valuations of private investments and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these investments existed and may differ materially from the values that we may ultimately realize.

The lack of liquidity in our investments may adversely affect our business.

As we generally make investments in private companies, substantially all of these investments will be subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we or an affiliated manager of Ares has material non-public information regarding such portfolio company.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt investments we make, the default rate on such investments, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses and the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

There are significant potential conflicts of interest that could impact our investment returns.

Certain of our executive officers and directors, and members of the investment committee of our investment adviser serve or may serve as officers, directors or principals of other entities and affiliates of our investment adviser and investment funds managed by our affiliates. Accordingly, they

may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders or that may require them to devote time to services for other entities, which could interfere with the time available to provide services to us. For example, Messrs. Ressler, Rosenthal, Kissick and Sachs each are and, will continue to be, founding members of Ares with significant responsibilities for other Ares funds. Messrs. Ressler and Rosenthal are required to devote a substantial majority of their business time, and Mr. Kissick is required to devote a majority of his business time, to the affairs of ACOF. However, Ares believes that the efforts of Messrs. Ressler, Rosenthal and Kissick relative to Ares Capital and ACOF are synergistic with and beneficial to the affairs of each of Ares Capital and ACOF.

Although other Ares funds generally have different primary investment objectives than Ares Capital, they may from time to time invest in asset classes similar to those targeted by Ares Capital. Ares Capital Management endeavors to allocate investment opportunities in a fair and equitable manner, and in any event consistent with any fiduciary duties owed to Ares Capital. Nevertheless, it is possible that we may not be given the opportunity to participate in certain investments made by investment funds managed by investment managers affiliated with Ares Capital Management.

We pay management and incentive fees to Ares Capital Management, and reimburse Ares Capital Management for certain expenses it incurs. As a result, investors in our common stock will invest on a gross basis and receive distributions on a net basis after expenses, resulting in, among other things, a lower rate of return than one might achieve through direct investments.

Ares Capital Management's management fee is based on a percentage of our total assets (other than cash or cash equivalents but including assets purchased with borrowed funds) and Ares Capital Management may have conflicts of interest in connection with decisions that could affect the Company's total assets, such as decisions as to whether to incur debt.

The incentive fees payable to our investment adviser are subject to certain hurdles. To the extent we or Ares Capital Management are able to exert influence over our portfolio companies, these hurdles may provide Ares Capital Management (subject to its fiduciary duty to us) with an incentive to induce our portfolio companies to accelerate or defer interest or other obligations owed to us from one calendar quarter to another under circumstances where accrual would not otherwise occur, such as acceleration or deferral of the declaration of a dividend or the timing of a voluntary redemption.

Acceleration of obligations may result in stockholders recognizing taxable gains earlier than anticipated, while deferral of obligations creates incremental risk of an obligation becoming uncollectible in whole or in part if the issuer of the security suffers subsequent deterioration in its financial condition. Any such inducement by the investment adviser solely for the purpose of adjusting the incentive fees would be a breach of the investment adviser's fiduciary duty to us.

The part of the incentive fee payable by us that relates to our pre-incentive fee net investment income is computed and paid on income that may include interest that is accrued but not yet received in cash. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible.

Our investment advisory and management agreement automatically renews for successive annual periods if approved by our board of directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, including, in either case, approval by a majority of our directors who are not interested persons. However, both we and Ares Capital Management have the right to terminate the agreement without penalty upon 60 days' written notice to the other party. Moreover, conflicts of interest may arise if our investment adviser seeks to change the terms of our investment advisory and management agreement, including, for example, the terms for compensation. While any material change to the investment advisory and management agreement must be submitted

to stockholders for approval under the Investment Company Act, we may from time to time decide it is appropriate to seek stockholder approval to change the terms of the agreement.

Pursuant to a separate amended and restated administration agreement, referred to herein as our administration agreement, Ares Administration, an affiliate of Ares Capital Management, furnishes us with administrative services and we pay Ares Administration our allocable portion of overhead and other expenses incurred by Ares Administration in performing its obligations under the administration agreement, including our allocable portion of the cost of our officers and their respective staffs. We lease office facilities directly (the "ARCC Office Space") from a third party. We have entered into a sublease with Ares Management LLC whereby Ares Management subleases approximately 25% of the ARCC Office Space for a fixed rent equal to 25% of the basic annual rent payable by us under our lease, plus certain additional costs and expenses. As a result of these arrangements, there may be times when the management team of Ares Management has interests that differ from those of our stockholders, giving rise to a conflict.

Our stockholders may have conflicting investment, tax and other objectives with respect to their investments in us. The conflicting interests of individual stockholders may relate to or arise from, among other things, the nature of our investments, the structure or the acquisition of our investments, and the timing of disposition of our investments. As a consequence, conflicts of interest may arise in connection with decisions made by our investment adviser, including with respect to the nature or structuring of our investments, that may be more beneficial for one stockholder than for another stockholder, especially with respect to stockholders' individual tax situations. In selecting and structuring investments appropriate for us, our investment adviser will consider the investment and tax objectives of Ares Capital and our stockholders as a whole, not the investment, tax or other objectives of any stockholder individually.

Our investment adviser's liability is limited under the investment management agreement, and we will indemnify our investment adviser against certain liabilities, which may lead our investment adviser to act in a riskier manner on our behalf than it would when acting for its own account.

Our investment adviser has not assumed any responsibility to us other than to render the services described in the investment management agreement, and it will not be responsible for any action of our board of directors in declining to follow our investment adviser's advice or recommendations. Pursuant to the investment management agreement, our investment adviser and its managing members, officers and employees will not be liable to us for their acts under the investment management agreement, absent willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties. We have agreed to indemnify, defend and protect our investment adviser and its managing members, officers and employees with respect to all damages, liabilities, costs and expenses resulting from acts of our investment adviser not arising out of willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties under the investment management agreement. These protections may lead our investment adviser to act in a riskier manner when acting on our behalf than it would when acting for its own account. See "Risk Factors Our incentive fee may induce Ares Capital Management to make certain investments, including speculative investments."

We may be obligated to pay our investment adviser incentive compensation even if we incur a loss.

Our investment adviser is entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our investment income for that quarter (before deducting incentive compensation, net operating losses and certain other items) above a threshold return for that quarter. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses that we may incur in the fiscal quarter, even if such capital losses result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay our manager incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

Under the investment advisory and management agreement, we will defer cash payment of any incentive fee otherwise earned by our investment adviser if, during the most recent four full calendar quarter period ending on or prior to the date such payment is to be made, the sum of (a) our aggregate distributions to our stockholders and (b) our change in net assets (defined as total assets less indebtedness) is less than 8.0% of our net assets at the beginning of such period. These calculations will be adjusted for any share issuances or repurchases.

Changes in laws or regulations governing our operations, or changes in the interpretation thereof, and any failure by us to comply with laws or regulations governing our operations may adversely affect our business.

We and our portfolio companies are subject to regulation by laws at the local, state and federal levels. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations, or their interpretation, or any failure by us to comply with these laws or regulations may adversely affect our business.

The Company may not replicate Ares' historical success.

Our primary focus in making investments differs from those of other private funds that are or have been managed by Ares' investment professionals. Further, investors in Ares Capital are not acquiring an interest in other Ares funds. While Ares Capital may consider potential co-investment participation in portfolio investments with other Ares funds (other than ACOF), no investment opportunities are currently under consideration and any such investment activity could be subject to, among other things, regulatory and independent board member approvals, the receipt of which, if sought, cannot be assured. Accordingly, we cannot assure you that Ares Capital will replicate Ares' historical success, and we caution you that our investment returns could be substantially lower than the returns achieved by those private funds.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the Investment Company Act from knowingly participating in certain transactions with our affiliates without the prior approval of our independent directors. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities is our affiliate for purposes of the Investment Company Act and we are generally prohibited from buying or selling any security from or to such affiliate, absent the prior approval of our independent directors. The Investment Company Act also prohibits "joint" transactions with an affiliate, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors. If a person acquires more than 25% of our voting securities, we are prohibited from buying or selling any security from or to such person, or entering into joint transactions with such person, absent the prior approval of the SEC.

RISKS RELATING TO OUR INVESTMENTS

Our investments may be risky, and we could lose all or part of our investment.

The debt that we invest in is typically not initially rated by any rating agency, but we believe that if such investments were rated, they would be below investment grade (rated lower than "Baa3" by Moody's or lower than "BBB-" by Standard & Poor's). Indebtedness of below investment grade quality is regarded as having predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal. Our mezzanine investments may result in an above average amount of risk and volatility or loss of principal. We also invest in assets other than mezzanine investments including first and second lien loans, high-yield securities, U.S. government securities, credit derivatives and other structured securities and certain direct equity investments. These investments will entail additional risks that could adversely affect our investment returns. In addition, to the extent interest payments associated with such debt are deferred, such debt will be subject to greater fluctuations in value based on changes in interest rates. Also, such debt could subject us to phantom income, and since we generally do not receive any cash prior to maturity of the debt, the investment is of greater risk.

In addition, investments in middle market companies involve a number of significant risks, including:

these companies may have limited financial resources and may be unable to meet their obligations, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment;

they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;

they typically depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

they generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our investment adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies; and

they may have difficulty accessing the capital markets to meet future capital needs.

When we invest in first and second lien senior loans or mezzanine debt, we may acquire warrants or other equity securities as well. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely

to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of the time when the loans are due and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt that we hold and the value of any equity securities we own. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

If one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt, depending on the facts and circumstances, including the extent to which we actually provided managerial assistance to that portfolio company, a bankruptcy court might recharacterize our debt holding and subordinate all or a portion of our claim to that of other creditors. In addition, lenders can be subject to lender liability claims for actions taken by them where they become too involved in the borrower's business or exercise control over the borrower. Consequently, we could become subject to a lender's liability claim, if, among other things, we actually render significant managerial assistance.

An investment strategy focused primarily on privately-held companies presents certain challenges, including the lack of available information about these companies and a greater vulnerability to economic downturns.

We invest primarily in privately-held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of Ares Capital Management's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. These companies and their financial information are not subject to the Sarbanes-Oxley Act of 2002 and other rules that govern public companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately-held companies frequently have less diverse product lines and smaller market presence than larger competitors, subjecting them to greater vulnerability to economic downturns. These factors could affect our investment returns.

Our portfolio companies may incur debt or issue equity securities that rank equally with, or senior to, our investments in such companies.

Our portfolio companies may have, or may be permitted to incur, other debt, or issue other equity securities, that rank equally with, or senior to, our investments. By their terms, such instruments may provide that the holders are entitled to receive payment of dividends, interest or principal on or before the dates on which we are entitled to receive payments in respect of our investments. These debt instruments usually prohibit the portfolio companies from paying interest on or repaying our investments in the event and during the continuance of a default under such debt. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of securities ranking senior to our investment in that portfolio company typically are entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such

holders, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of securities ranking equally with our investments, we would have to share on an equal basis any distributions with other security holders in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Investments in equity securities involve a substantial degree of risk.

We may purchase common and other equity securities. Although common stocks have historically generated higher average total returns than fixed-income securities over the long term, common stocks also have experienced significantly more volatility in those returns and in recent years have significantly under performed relative to fixed-income securities. The equity securities we acquire may fail to appreciate and may decline in value or become worthless and our ability to recover our investment will depend on our portfolio company's success. Investments in equity securities involve a number of significant risks, including:

any equity investment we make in a portfolio company could be subject to further dilution as a result of the issuance of additional equity interests and to serious risks as a junior security that will be subordinate to all indebtedness or senior securities in the event that the issuer is unable to meet its obligations or becomes subject to a bankruptcy process;

to the extent that the portfolio company requires additional capital and is unable to obtain it, we may not recover our investment in equity securities; and

in some cases, equity securities in which we invest will not pay current dividends, and our ability to realize a return on our investment, as well as to recover our investment, will be dependent on the success of our portfolio companies. Even if the portfolio companies are successful, our ability to realize the value of our investment may be dependent on the occurrence of a liquidity event, such as a public offering or the sale of the portfolio company. It is likely to take a significant amount of time before a liquidity event occurs or we can sell our equity investments. In addition, the equity securities we receive or invest in may be subject to restrictions on resale during periods in which it could be advantageous to sell.

There are special risks associated with investing in preferred securities, including:

Preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If we own a preferred security that is deferring its distributions, we may be required to report income for tax purposes although it has not yet received such income.

Preferred securities are subordinated to debt in terms of priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than debt.

Preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. government securities.

Generally, preferred security holders have no voting rights with respect to the issuing company, subject to limited exceptions.

Our incentive fee may induce Ares Capital Management to make certain investments, including speculative investments.

The incentive fee payable by us to Ares Capital Management may create an incentive for Ares Capital Management to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable to our investment adviser is determined, which is calculated as a percentage of the return on

invested capital, may encourage our investment adviser to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock. In addition, the investment adviser will receive the incentive fee based, in part, upon net capital gains realized on our investments. Unlike the portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, the investment adviser may have a tendency to invest more in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns. The part of the incentive fee payable by us that relates to our pre-incentive fee net investment income will be computed and paid on income that may include interest that is accrued but not yet received in cash. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible. The investment adviser is not under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued income that we never receive as a result of a default by an entity on the obligation that resulted in the accrual of such income.

Because of the structure of the incentive fee, it is possible that we may have to pay an incentive fee in a quarter where we incur a loss. For example, if we receive pre-incentive fee net investment income in excess of the hurdle rate for a quarter, we will pay the applicable incentive fee even if we have incurred a loss in that quarter due to realized capital losses. In addition, if market interest rates rise, we may be able to invest our funds in debt instruments that provide for a higher return, which would increase our pre-incentive fee net investment income and make it easier for our investment adviser to surpass the fixed hurdle rate and receive an incentive fee based on such net investment income.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to Ares Capital Management with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our common stockholders will bear his or her share of the management and incentive fee of Ares Capital Management as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

Our portfolio companies may be highly leveraged.

Some of our portfolio companies may be highly leveraged, which may have adverse consequences to these companies and to us as an investor. These companies may be subject to restrictive financial and operating covenants and the leverage may impair these companies' ability to finance their future operations and capital needs. As a result, these companies' flexibility to respond to changing business and economic conditions and to take advantage of business opportunities may be limited. Further, a leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used.

Our portfolio is concentrated in a limited number of portfolio companies, which subjects us to a risk of significant loss if any of these companies defaults on its repayment obligations.

As of September 30, 2007, we were invested in 69 portfolio companies. This number may be higher or lower depending on the amount of our assets under management at any given time, market conditions and the extent to which we employ leverage, and will likely fluctuate over time. A consequence of this limited number of investments is that the aggregate returns we realize may be

significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

Our investments in foreign debt may involve significant risks in addition to the risks inherent in U.S. investments. We may expose ourselves to risks if we engage in hedging transactions.

Our investment strategy contemplates potential investments in debt of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility.

Although most of our investments will be U.S. dollar-denominated, our investments that are denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we cannot assure you that such strategies will be effective.

If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Use of these hedging instruments may include counter-party credit risk. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio positions should increase. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price.

The success of our hedging transactions will depend on our ability to correctly predict movements, currencies and interest rates. Therefore, while we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations.

We may initially invest a portion of the net proceeds of offerings pursuant to this prospectus primarily in high-quality short-term investments, which will generate lower rates of return than those expected from the interest generated on first and second lien loans and mezzanine debt.

We may initially invest a portion of the net proceeds of offerings primarily in cash, cash equivalents, U.S. government securities and other high-quality short-term investments. These securities may earn yields substantially lower than the income that we anticipate receiving once we are fully invested in accordance with our investment objective. As a result, we may not be able to achieve our investment objective and/or pay any dividends during this period or, if we are able to do so, such dividends may be substantially lower than the dividends that we expect to pay when our portfolio is fully invested. If we do not realize yields in excess of our expenses, we may incur operating losses and the market price of our shares may decline.

When we are a debt or minority equity investor in a portfolio company, we may not be in a position to control the entity, and management of the company may make decisions that could decrease the value of our portfolio holdings.

We make both debt and minority equity investments; therefore, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of such company may take risks or otherwise act in ways that do not serve our interests. As a result, a portfolio company may make decisions that could decrease the value of our investment.

RISKS RELATING TO OFFERINGS PURSUANT TO THIS PROSPECTUS

There is a risk that investors in our equity securities may not receive dividends or that our dividends may not grow over time and that investors in our debt securities may not receive all of the interest income to which they are entitled.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a BDC, we may be limited in our ability to make distributions. Further, if we invest a greater amount of assets in equity securities that do not pay current dividends, it could reduce the amount available for distribution. See "Price Range of Common Stock and Distributions."

The above-referenced distribution requirement may also inhibit our ability to make required interest payments to holders of our debt securities, which may cause a default under the terms of our debt securities. Such a default could materially increase our cost of raising capital, as well as cause us to incur penalties under the terms of our debt securities.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Maryland General Corporation Law, our charter and our bylaws contain provisions that may discourage, delay or make more difficult a change in control of Ares Capital or the removal of our directors. We are subject to the Maryland Business Combination Act, subject to any applicable requirements of the Investment Company Act. Our board of directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our stock by

any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer.

We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our board of directors in three classes serving staggered three-year terms, and provisions of our charter authorizing our board of directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

Investing in our shares may involve an above average degree of risk.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and volatility or loss of principal. Our investments in portfolio companies may be highly speculative and aggressive, and therefore, an investment in our shares may not be suitable for someone with lower risk tolerance.

The market price of our common stock may fluctuate significantly.

The price of the common stock that will prevail in the market after offerings pursuant to this prospectus may be higher or lower than the price you pay. The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

- significant volatility in the market price and trading volume of securities of business development companies or other companies in our sector, which are not necessarily related to the operating performance of these companies;
- price and volume fluctuations in the overall stock market from time to time;
- changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;
- loss of RIC status;
- changes in earnings or variations in operating results;
- changes in the value of our portfolio of investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
- departure of Ares Capital Management's key personnel;
- operating performance of companies comparable to us;
- general economic trends and other external factors; and
- loss of a major funding source.

Edgar Filing: ARES CAPITAL CORP - Form N-2

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering.

In the event we issue subscription rights, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than our net asset value per share, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of the rights offering or what proportion of the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

The trading market or market value of our publicly issued debt securities may fluctuate.

Upon issuance, our publicly issued debt securities will not have an established trading market. We cannot assure you that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical to these debt securities;

the supply of debt securities trading in the secondary market, if any;

the redemption or repayment features, if any, of these debt securities;

the level, direction and volatility of market interest rates generally; and

market rates of interest higher or lower than rates borne by the debt securities.

You should also be aware that there may be a limited number of buyers when you decide to sell your debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect your return on the debt securities.

If your debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if your debt securities are subject to mandatory redemption, we may be required to redeem your debt securities also at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In this circumstance, you may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as your debt securities being redeemed.

Our credit ratings may not reflect all risks of an investment in the debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to

market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

We may allocate the net proceeds from offerings in ways with which you may not agree.

We will have significant flexibility in investing the net proceeds of offerings pursuant to this prospectus and may use the net proceeds in ways with which you may not agree or for purposes other than those contemplated at the time of such offering.

Our shares of common stock may trade at discounts from net asset value.

Shares of closed-end investment companies frequently trade at a market price that is less than the net asset value that is attributable to those shares. This characteristic of closed-end investment companies is separate and distinct from the risk that our net asset value per share may decline. It is not possible to predict whether any shares of common stock offered hereby will trade at, above, or below net asset value.

Investors in offerings of our common stock will incur immediate dilution upon the closing of such offering.

We expect the public offering price of any offering of shares of our common stock our shares to be higher than the book value per share of our outstanding common stock. Accordingly, investors purchasing shares of common stock in offerings pursuant to this prospectus will pay a price per share that exceeds the tangible book value per share after such offering.

Stockholders will experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan.

All dividends payable to stockholders that are participants in our dividend reinvestment plan are automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan will experience dilution over time.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

FORWARD-LOOKING STATEMENTS

Some of the statements in this prospectus constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

our future operating results;

our business prospects and the prospects of our portfolio companies;

the return or impact of investments that we expect to make;

our contractual arrangements and relationships with third parties;

the dependence of our future success on the general economy and its impact on the industries in which we invest;

the ability of our portfolio companies to achieve their objectives;

our expected financings and investments;

the adequacy of our cash resources and working capital;

the timing of cash flows, if any, from the operations of our portfolio companies; and

the ability of Ares Capital Management to locate suitable investments for us and to monitor and administer our investments.

We use words such as "anticipates," "believes," "expects," "intends" and similar expressions to identify forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in "Risk Factors" and elsewhere in this prospectus.

We have based the forward-looking statements included in this prospectus on information available to us on the date of this prospectus, and we assume no obligation to update any such forward-looking statements. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we have filed or in the future may file with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

You should understand that under Sections 27A(b)(2)(B) of the Securities Act of 1933 (the "Securities Act") and Section 21E(b)(2)(B) of the Exchange Act, the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 do not apply to statements made in connection with any offering of securities pursuant to this prospectus.

USE OF PROCEEDS

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from the sale of our securities for general corporate purposes, which includes investing in portfolio companies in accordance with our investment objective and strategies and market conditions and repaying indebtedness. The supplement to this prospectus relating to an offering may more fully identify the use of the proceeds from such offering. We anticipate that substantially all of the net proceeds of an offering of securities pursuant to this prospectus and its related prospectus supplement will be used for the above purposes within three months of any such offering, depending on the availability of appropriate investment opportunities consistent with our investment objective and strategies and market conditions.

We invest primarily in first and second lien senior loans and mezzanine debt of middle market companies, each of which may include an equity component, and, to a lesser extent, in equity securities in such companies. In addition to such investments, we may invest up to 30% of the portfolio in opportunistic investments, including, among others, high-yield bonds, debt and equity securities, distressed debt or equity securities of public companies. As part of this 30%, we may also invest in debt of middle market companies located outside of the United States. Pending such investments, we will invest a portion of the net proceeds primarily in cash, cash equivalents, U.S. government securities and other high-quality short-term investments. These securities may earn yields substantially lower than the income that we anticipate receiving once we are fully invested in accordance with our investment objective. As a result, we may not be able to achieve our investment objective and/or pay any dividends during this period or, if we are able to do so, such dividends may be substantially lower than the dividends that we expect to pay when our portfolio is fully invested. If we do not realize yields in excess of our expenses, we may incur operating losses and the market price of our shares may decline. See "Regulation Temporary Investments" for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective.

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock is traded on The NASDAQ Global Select Market under the symbol "ARCC." We completed our initial public offering in October 2004 at a price of \$15.00 per share. Prior to this date there was no public market for our common stock. Our common stock has historically traded at prices both above and below its net asset value. It is not possible to predict whether the common stock offered hereby will trade at, above, or below net asset value. See "Risk Factors Our shares of common stock may trade at discounts from net asset value."

The following table sets forth the net asset value of our common stock, the range of high and low closing prices of our common stock as reported on The NASDAQ Global Select Market and the dividends declared by us for each fiscal quarter since our initial public offering. The stock quotations are interdealer quotations and do not include markups, markdowns or commissions and may not necessarily represent actual transactions.

	NAV(1)	Price Range		Premium/ Discount of High Sales Price to NAV	Premium/ Discount of Low Sales Price to NAV	Cash Dividend Per Share(2)
		High	Low			
Fiscal 2005
