PART 1

ITEM 1. DESCRIPTION OF BUSINESS

(a) GENERAL DEVELOPMENT OF BUSINESS.

The Company was originally incorporated under the laws of the State of Idaho on November 9, 1935 under the name of Montgomery Mines, Inc. In August 1985, the Company's shareholders approved an increase in the authorized common stock, \$0.05 par value, from 7,500,000 shares to 12,000,000 shares. Quotations of the bid and ask prices for the stock are published by the Spokane Quotations Service of Spokane, Washington.

The Company was originally incorporated with the goal to consolidate, explore and to develop (or seek a larger mining company to develop under an arrangement favorable to the Company) its primary property located in the Thunder Mountain Mining District in central Idaho. A number of exploration companies had conducted exploration activities on the Company's claims prior to and subsequent to incorporation, including Homestake Mining, Nevex Ltd., Placer Amex, Superior Mining, Phillips Petroleum and Coeur 'd Alene Mines.

The Company's precious metal property at Thunder Mountain ultimately was placed into operation in 1986 by Coeur 'd Alene Mines with production from the Sunnyside Deposit reported at 85,000 ounces of gold and 116,000 ounces of silver. Coeur 'd Alene ceased production in 1990 and relinquished their lease on the claims. Subsequently the area was leased to and explored by several other exploration/mining companies, including Kennecott and USMX/Dakota Mining. A joint venture between the Company and Dewey Mining unified the mining district during this period, and USMX/Dakota Mining expended approximately \$5 million to explore the district and define a measured mineral resource of 5,390,000 tons averaging 0.047 ounces per ton gold (using a then-current gold price of \$400 per ounce) hosted in a volcanic caldera sequence on the Dewey property. Bankruptcy by Dakota Mines provided an opportunity for the Company and Dewey Mining to acquire the consolidated district for future development. USMX/Dakota Mining had initiated an Environmental Impact Statement and other permitting requirements to develop the measured mineral resource, and the Company and Dewey Mining continued these efforts for a period of time.

During 2000, the Company and Dewey Mining entered into an Option Agreement with Trust for Public Lands to purchase the consolidated mining district. The Trust for Public Lands is a nonprofit organization dedicated to the preservation of nature for human enjoyment and well being. The Thunder Mountain Mining District is located on a "cherry-stem" within the Frank Church River of No Return Wilderness that was specifically outlined to allow continued development of the historic mining area. Due to its location, the Company's land position is a candidate for purchase by the United States Forest Service through the Land and Water Conservation Funds. The Option recognizes a minimum acceptable value for the measured mineral resource and real property, and if this is not met, the Company maintains the ability to continue development of the property. All permitting efforts have been, for the time being, placed on hold pending the completion of the initial appraisal. The Option Agreement has been extended beyond the original specified timeframe due to delays in securing an appraiser. It is anticipated that the initial appraisal review will be completed by mid-2002.

The Company also conducted minimal exploration for precious minerals outside of

Edgar Filing: THUNDER MOUNTAIN GOLD INC - Form 10KSB

the Thunder Mountain Mining District in the western states during 2001. A platinum group metals exploration level property in Nevada was maintained during the year.

1A measured mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape, physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters to support production planning and evaluation of the economic viability of the deposit.

PRECIOUS MINERALS PROPERTIES

THUNDER MOUNTAIN AND DEWEY MINING COMPANY JOINT VENTURE LAND POSITION:

1. The Registrant and Dewey Mining Company, through their joint venture agreement, own outright a total of 50-patented lode-mining claims (735.5 acres total) and 272 unpatented lode claims (5,245 acres total). With the exception of one small claim block within the Frank Church River of No Return Wilderness (their location pre-dated the wilderness designation), all of the claims are within the "cherry-stem" that forms a corridor into the wilderness. Mineral development within this cherry-stem is subject to the same regulatory stipulations as the United States Forest Service managed land surrounding the wilderness. Some of the Registrants claims within the cherry stem are partially within the wilderness area, but these were, for the most part, located as protection of the land position more central to the cherry-stem that either has mineral resources or exploration potential.

2. The Registrant has lease with an option to purchase on 4 patented and 40 unpatented lode claims in the Goodsprings Mining District in Clark County, Nevada. Platinum, palladium and gold have historically been produced in the area, and the land position was secured because of its exploration potential. Efforts are ongoing to interest a larger platinum group metals exploration company in the holdings.

THUNDER MOUNTAIN AND DEWEY MINING COMPANY JOINT VENTURE LAND POSITION:

(b) FINANCIAL INFORMATION ABOUT INDUSTRY SEGMENTS.

The Registrant has no other industry segments.

(c) NARRATIVE DESCRIPTION OF BUSINESS.

Refer to ITEM: 1 Description of Business (supra) Subparagraph (i) through (xii) are not applicable to the Registrant.

(d) FINANCIAL INFORMATION ABOUT FOREIGN AND DOMESTIC OPERATIONS AND EXPORT SALES.

This paragraph is not applicable to the Registrant.

ITEM 2: PROPERTIES

For continuity and clarity, this information was included in the information set in Item 1.

Edgar Filing: THUNDER MOUNTAIN GOLD INC - Form 10KSB

ITEM 3: LEGAL PROCEEDINGS.

The Company, along with other impacted entities, including companies, municipalities and various irrigation districts, has been involved in a legal protest against the Federal Government's claims for certain reserved water rights for Wild and Scenic Rivers Act purposes. The matter is in the Idaho State District Court assigned to handle the Snake River Basin water rights adjudication. A settlement has been tentatively reached that is favorable to the Company, and will be a settlement that would maintain sufficient vested and future water rights appropriation for any mining and processing operation. These water rights would also be a valuable part of the ongoing appraisal process by Trust for Public Lands.

The Registrant is involved in no civil rights negotiations or proceedings.

ITEM 4: SUBMISSION OF MATTERS TO VOTE ON SECURITY HOLDERS.

No matters were submitted to vote of the Registrant's security holders during 2001.

PART 11

ITEM 5: MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS.

(a) MARKET INFORMATION.

The common stock of the Registrant is traded over-the-counter in Spokane, Washington and its bid and asked prices are quoted on a daily basis by the Spokane Quotation Service, Spokane, Washington.

The bid prices for the Registrant's stock for the years 2001 and 2000 were as follows:

2000	HIGH	LOW
	-----	-----
First Quarter	\$ 0.10	\$ 0.04
Second Quarter	\$ 0.10	\$ 0.10
Third Quarter	\$ 0.10	\$ 0.10
Fourth Quarter	\$ 0.10	\$ 0.10
2001	HIGH	LOW
	-----	-----
First Quarter	\$ 0.10	\$ 0.03
Second Quarter	\$ 0.08	\$ 0.04
Third Quarter	\$ 0.08	\$ 0.05
Fourth Quarter	\$ 0.05	\$ 0.03

(b) APPROXIMATE NUMBER OF EQUITY SECURITY HOLDERS:

Title of Class	No. of Record Holders
-----	-----
\$0.05 Par Value Common Stock Non-Assessable	2,250 as of December 31, 2001

(c) DIVIDEND HISTORY AND RESTRICTIONS

Edgar Filing: THUNDER MOUNTAIN GOLD INC - Form 10KSB

The Registrant has not paid any dividends, and does not plan to do so in the foreseeable future as it plans to use its capital to finance the search for additional mineral properties of potential commercial value.

ITEM 6: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION.

(a) FULL FISCAL YEAR.

Liquidity: The Company has a positive cash-position and has invested funds in a cash management mutual fund. The Company's cash and liquid assets are considered adequate to meet its current and foreseeable obligations. The market value of some of the stock mutual funds decreased substantially during 2001, representing a significant loss.

Expenses for the ensuing year will be incurred for continued search and exploration for additional properties, and for management fees and administrative costs. The Company's required claim maintenance will be paid for its unpatented claims by the Company. It is anticipated that Directors and managerial fees will be minimal during the upcoming year due to the low cash position of the Company. Please refer to the financial statements for additional costs and expenditures and other financial information.

Capital Resources: The Company presently does not intend to make any capital expenditures from its funds. The Company also does not presently have any plans to raise capital through debt or equity financing.

Results of Operations: The Company had no production from operations for 2001. Although additional production units are likely, it is impossible to predict with any certainty when and where the next production unit will be developed. For that reason, it is impossible to predict the future production units.

The Company entered into a purchase option agreement with Trust for Public Lands (TPL) in 2000. Appraisal work commenced late in 2001 and a preliminary appraisal should be completed by mid-2002. The agreement with TPL provides them with an option to acquire both the Company's and Dewey Mining Company's land and mineral position in the Thunder Mountain Mining District, subject to an appraised amount that is acceptable to both entities. The appraisal will value both the private land, unpatented mining claims, mineral value of the defined resource, mineral potential of the Company's holdings, timber, and water rights. The purchaser of the properties would be the United State Forest Service, brokered through TPL. In the event that the appraised amount is acceptable, the Company may determine that it would be in the best interests of the shareholders to move ahead with the sale. The appropriate shareholder approvals would be solicited. If the properties are sold, it is possible that some of the proceeds could be forthcoming late in 2002.

There were no revenues generated by the Company in 2001.

REPORT OF INDEPENDENT AUDITORS

Board of Directors
Thunder Mountain Gold, Inc.
Spokane, Washington

We have audited the accompanying Balance Sheets of Thunder Mountain Gold, Inc., (An Exploration Stage Company) as of December 31, 2001 and 2000, and the related Statements of Operations, Cash Flows and Changes in Stockholders' Equity for each of the three years ended December 31, 2001, 2000, and 1999. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Thunder Mountain Gold, Inc., (An Exploration Stage Company) as of December 31, 2001 and 2000, and the results of its operations, cash flows and changes in stockholders' equity for each of the three years ended December 31, 2001, 2000 and 1999, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 6 to the financial statements, the Company has suffered recurring losses from operations that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 5. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As discussed in Note 3 to the financial statements, the financial statements for the years ended December 31, 2000, 1999, and 1998, have been restated to reflect the expensing of mining claims.

Notes To Financial Statements

NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES

Business Operations

Thunder Mountain Gold, Inc., takes its name from the Thunder Mountain Mining District in Valley County, Idaho, where its principal lode mining claims are located.

Accounting Policies

Marketable securities are stated at market value. The market value is based on quoted market prices or other fair value estimates provided by third party portfolio managers.

Exploration Costs

Exploration costs are charged to operations when incurred.

Property and Equipment

Property and equipment are carried at cost. Depreciation is computed using accelerated depreciation methods with useful lives of three to seven years. Major additions and improvements are capitalized. Costs of maintenance and repairs, which do not improve or extend the life of the associated assets are expensed currently. When there is a disposition of property and equipment, the cost and related accumulated depreciation are removed from the accounts and any gain or loss is reflected in net income.

Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Comprehensive Income

Edgar Filing: THUNDER MOUNTAIN GOLD INC - Form 10KSB

In 1998, the Company adopted Statement of Financial Accounting Standards (FAS) 130, "Reporting Comprehensive Income," issued by the Financial Accounting Standards Board (FASB). The Company reports accumulated other comprehensive income as a separate component of shareowners' equity. There were no adjustments required for the deferred tax effects of the unrealized gain or loss on securities.

THUNDER MOUNTAIN GOLD, INC.
(An Exploration Stage Company)

Notes To Financial Statements

NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES (continued)

Earnings Per Share

The Company computes basic earnings per common share by dividing the net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share are calculated by including all dilutive potential common shares such as stock options. Dilutive potential common shares were 9,727,852 in 2001, 2000, and 1999. No adjustment to reported net income is required when computing diluted earnings per share.

NOTE 2 - INVESTMENTS

Investments consist of the following:

NOTE 3 - MINING CLAIMS AND RESTATED FINANCIAL STATEMENTS

Substantially all of the Company's patented and unpatented claims in the Thunder Mountain Mining district were obtained from major stockholders for cash or newly issued stock. The purchase price and capitalized costs of the mining claims have been written off and the financial statements for 2000, 1999, and 1998 have been restated to reflect this adjustment. The net accumulated capitalized costs charged to the income statement as an impairment loss for 1998 was \$233,705 and 2000 was \$5,000. No impairment loss was charged to the income statement for 1999. For additional information regarding the mining claims see Note 5.

Notes To Financial Statements

NOTE 4 - INCOME TAXES

The Company has losses for income tax purposes and accordingly has no income tax provision.

At December 31, 2001, the Company has \$719,083 in net operating loss carry forward which may be used to offset taxable income generated by operations, which will begin expiring in 2004. The Company also has a general business tax credit carryover in the amount of \$1,283, which may be used to offset future federal income tax liabilities. This credit will expire in 2004. The Company also has a foreign tax credit in the amount of \$343, which may be used to offset future federal income tax liabilities.

The net operating loss and other credits carry forward would normally result in a recorded income tax benefit. As a result of the uncertainty to continue as a going concern as described in Note 5, the income tax benefit is fully reserved and is not reflected herein.

NOTE 5 - UNCERTAINTY - GOING CONCERN

The Company's continued existence is dependent upon its ability to resolve its liquidity problems, principally by obtaining equity or debt funding, sale of the mining claims or production from the mining claims. While pursuing additional funding or sale of its mining claims, the Company must continue to operate on limited cash flow generated from the sale of investments. The Company has no revenue from operations and has experienced recurring losses. Management believes that geological, geophysical, and engineering data have identified mineralized material in place on the mining claims in commercial quantities to be of value. The Company is negotiating with the United States Forest Service through the Land and Water Conservation Funds for sale of its' position regarding the mining claims.

NOTE 6 - LITIGATION

The Company, along with other similarly situated parties, is a protestant against the Federal Government's claims for certain reserved water rights for Wild and Scenic Rivers Act purposes. The matter is in the Idaho State District Court assigned to handle the Snake River Basin water rights adjudication. A
