Factors that could cause actual results to differ materially from the forward-looking statements include the following: (a) the effect of regulatory decisions by the Idaho Public Utilities Commission, the Oregon Public Utility Commission, and the Federal Energy Regulatory Commission affecting Idaho Power's ability to recover costs and/or earn a reasonable rate of return, including, but not limited to, the recovery or disallowance of costs that have been deferred, financings, allowed rates of return, electricity pricing and price structures, acquisition and disposal of assets and facilities, and current or prospective wholesale and retail competition; (b) changes in and compliance with state and federal laws, policies, and regulations, including new interpretations and enforcement initiatives by regulatory and oversight bodies, including, but not limited to, the Federal Energy Regulatory Commission and Idaho and Oregon state regulatory commissions; (c) changes in tax laws or new interpretations of tax laws, and the availability, use, and regulatory treatment of any tax credits; (d) litigation and regulatory proceedings, and penalties, settlements, or awards that influence business and profitability; (e) changes in and costs of compliance with laws, regulations, and policies relating to the environment, natural resources, and endangered species and the adoption of laws and regulations addressing the environment; (f) increases in capital expenditures and potential reductions in generation capacity as a result of regulatory conditions that may be imposed on power generating plant license renewals, or the non-renewal of such licenses; (g) global climate change and regional weather variations affecting customer demand and hydroelectric generation; (h) over-appropriation of surface and groundwater in the Snake River Basin and the resulting impact on hydroelectric generation; (i) inability to obtain required permits and approvals, rights-of-way, and siting, and risks related to contracting, construction, and start-up, for infrastructure development projects; (j) delays and cost increases in connection with the construction or modification of generating facilities and other capital projects; (k) breakdown or failure of equipment, forced outages, availability of electrical transmission capacity, and the availability of water for hydroelectric power generation, natural gas, coal, and diesel for power generation at thermal plants, and wind conditions for wind power generation; (l) changes in costs and availability of materials, fuel, and commodities, and their impact on the ability to meet required loads and on the wholesale energy market in the western United States; (m) disruptions of Idaho Power's transmission system or interconnected transmission systems; (n) customer growth rates within Idaho Power's service area; (o) the continuing effects of the weak economy, including decreased demand for electricity and reduced revenue from sales of excess energy during periods of low wholesale market prices; (p) market prices and demand for energy; (q) reductions in credit ratings and the resulting impact on access to capital markets; (r) results of financing efforts, including the ability to obtain financing or refinance existing debt when necessary or on favorable terms; (s) increases in the costs associated with energy commodity and other derivative instruments;

(t) general capital market conditions and government regulation that affects the cost of capital, the ability to access the capital markets, and the amount of funding obligations for postretirement benefits; (u) weather and other natural

phenomena such as earthquakes, floods, droughts, lightning, wind, and fire and their impact on power demand and infrastructure; and (v) new accounting or Securities and Exchange Commission or New York Stock Exchange requirements, or new interpretations or application of existing requirements.
