CENTRAL VALLEY COMMUNITY BANCORP  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

**Note 1. GENERAL**

All adjustments (consisting only of normal recurring accruals) which, in the opinion of Management, are necessary for a fair presentation of the Company's consolidated financial position at March 31, 2003 and December 31, 2002; the results of its operations for the three month periods ending March 31, 2003 and 2002 and changes in shareholders' equity and its cash flows for the three month periods ended March 31, 2003 and 2002 have been included. The results of operations and cash flows for the periods presented are not necessarily indicative of the results for a full year.

The accompanying unaudited financial statements have been prepared on a basis consistent with the accounting principles and policies reflected in the Company's annual report for the year ended December 31, 2002.

**Note 2. STOCK-BASED COMPENSATION**

The Company issues stock options under two stock-based compensation plans, the Central Valley Community Bancorp 2000 and 1992 Stock Option Plans. The Company accounts for these plans under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with Financial Accounting Standards Board (FASB) No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure, an Amendment of FASB No. 123*, the following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation*, to stock-based employee compensation.

Pro forma adjustments to the Company's consolidated net earnings and earnings per share are disclosed during the years in which the options become vested.

	For the Quarter Ended March 31,	
	2003	2002
Net earnings as reported	\$ 781,000	\$ 683,000
Deduct: Total stock-based compensation expense determined under the fair value based method for all awards, net of related tax effects	47,000	50,000
Pro forma net income	\$ 734,000	\$ 633,000
Basid earnings per share - as reported	\$ 0.30	\$ 0.26

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Basic earnings per share - pro forma	\$	0.29	\$	0.24
Diluted earnings per share - as reported	\$	0.28	\$	0.25
Diluted earnings per share - pro forma	\$	0.26	\$	0.23

**Note 3. EARNINGS PER SHARE**

**For Quarter Ended  
March 31,**

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

<b>EARNINGS PER SHARE (Unaudited)</b>	<b>2003</b>		<b>2002</b>	
Basic earnings per share	\$	0.30	\$	0.26
Diluted earnings per share	\$	0.28	\$	0.25

**Weighted Average Number of Shares Outstanding:**

Weighted Average Number of Shares Outstanding:

**For Quarter Ended  
March 31, 2003**

**For Quarter Ended  
March 31, 2002**

Basic Shares	2,572,154	2,589,268
Diluted Shares	2,782,694	2,715,266

**Note 4. COMPREHENSIVE INCOME**

Total comprehensive income is comprised of net earnings and net unrealized gains and losses on available-for-sale securities. Total comprehensive income for the three-month periods ended March 31, 2003 and 2002 was \$664,000 and \$434,000, respectively.

**Note 5. IMPACT OF NEW FINANCIAL ACCOUNTING STANDARDS**

In December 2002, the FASB issued SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure an amendment of FASB Statement No. 123*. This Statement amends SFAS No. 123, *Accounting for Stock-Based Compensation*, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based compensation. In addition, this statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based compensation and the effect of the method used on reported results. The transition guidance and annual disclosure provisions of SFAS No. 148 are effective for fiscal years ending after December 15, 2002. The interim disclosure provisions are effective for financial reporting containing financial statements for interim periods beginning after December 15, 2002. Because the Company accounts for the compensation cost associated with its stock option plans under the intrinsic value method, the alternative methods of transition will not apply to the Company. The additional disclosure requirements of the statement are included in these interim financial statements. In management's opinion, the adoption of this Statement did not have a material impact on the Company's consolidated financial position or results of operations.

On April 30, 2003, the Financial Accounting Standards Board issued Statement No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This Statement amends and clarifies the accounting for derivative instruments by providing guidance related to circumstances under which a contract with a net investment meets the characteristics of a derivative as discussed in Statement 133. The Statement also clarifies when a derivative contains a financing component. The Statement is intended to result in more consistent reporting for derivative contracts and must be applied prospectively for contracts entered into or modified after June 30, 2003, except for hedging relationships designated after June 30, 2003. In management's opinion, adoption of this statement is not expected to have a material effect on the Company's consolidated financial position or results of operations.

**ITEM 2.** Management's Discussion and Analysis of Financial Condition and Results of Operations

### Forward-Looking Statements

Certain matters discussed in this report constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained herein that are not historical facts, such as statements regarding the Company's current business strategy and the Company's plans for future development and operations, are based upon current expectations. These statements are forward-looking in nature and involve a number of risks and uncertainties. Such risks and uncertainties include, but are not limited to (1) significant increases in competitive pressure in the banking industry; (2) changes in the interest rate environment resulting in reduced margins; (3) general economic conditions, either nationally or regionally, are less favorable than expected; (4) changes in the regulatory environment; (5) fluctuations in the real estate market; (6) changes in business conditions and inflation; (7) changes in securities markets; and (8) the other risks set forth in the Company's reports filed with the Securities and Exchange Commission, including its Annual Report on Form 10-KSB for the year ended December 31, 2002. Therefore, the information set forth in such forward-looking statements should be carefully considered when evaluating the business prospects of the Company.

When the Company uses in this Quarterly Report on Form 10-QSB the words anticipate, estimate, expect, project, intend, commit, believe and similar expressions, the Company intends to identify forward-looking statements. Such statements are not guarantees of performance and are subject to certain risks, uncertainties and assumptions, including those described in this Quarterly Report on Form 10-QSB. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated, expected, projected, intended, committed or believed. The future results and shareholder values of the Company may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results and values are beyond the Company's ability to control or predict. For those statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

### Overview:

Central Valley Community Bancorp (OTC:CVCY) (the Company) was incorporated on February 7, 2000. The formation of the holding company offered the Company more flexibility in meeting the long-term needs of customers, shareholders, and the communities it serves. The Company currently has one bank subsidiary. The Company's market area includes the entire Central Valley area from Sacramento, California to Bakersfield, California. To garner public acceptance beyond the Clovis-Fresno area, the Company made a decision in the first half of 2002 to change the name of its one subsidiary, Clovis Community Bank, to Central Valley Community Bank (the Bank).

In the first quarter of 2003, the Company reported net income of \$781,000 compared to \$683,000 in the first quarter of 2002. The primary contributors to the increase in net income were a \$346,000 increase in net interest income, a \$60,000 increase in non-interest income and a \$70,000 decrease in income tax expense which was partially offset by a \$378,000 increase in non-interest expense.

Average earning assets for the first quarter of 2003 were \$256,136,000 compared to \$200,607,000 for the same period in 2002, an increase of 27.7%. The major contributor to the increase in average earning assets was a 30.9% increase in average deposits which provided liquidity for the 17.9% increase in average loans. Loan and deposit growth are discussed in more detail below.

Average accrued interest receivable, bank premises and equipment and other assets increased 23.3% in the periods under review mainly due to increases in bank premises and equipment and the cash surrender value of bank owned life insurance. The increase in premises and equipment can mainly be attributed to the two new offices opened in 2002.

Similar to most of the banking industry, the Company's net interest margin continues to be challenged by the impact of decreases in the Federal funds interest rate by the Federal Open Market Committee ( FOMC ) in 2001 and 2002. Managing the decrease in loan yields and the effective rates paid on deposits has become increasingly difficult as deposit rates may be near the bottom of consumer tolerance and customers may seek higher yielding alternatives outside the Bank.

The table on the following page sets forth average assets, liabilities, and shareholders' equity; interest income earned and interest expense paid; and the average yields earned or rates paid thereon for the first quarters of 2003 and 2002. The average balances reflect daily averages except non-accrual loans that were computed using month-end averages. Net interest margin is calculated by dividing net interest income by average interest earning assets.

## CENTRAL VALLEY COMMUNITY BANCORP

Other borrowed funds	9,000	75	3.33%	9,600	61	2.54%

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Federal funds purchased	0	0	36	0	1.25%	
Total interest-bearing liabilities	188,773	615	1.30%	153,597	676	1.76%
Non-interest bearing demand deposits	70,706			47,337		
Other liabilities	1,907			2,523		
Shareholders' equity	24,603			21,353		
Total average liabilities and shareholders' equity	\$ 285,989	\$ 615		\$ 224,810	\$ 676	
Interest income and rate earned on average earning assets	\$ 3,698		5.78%	\$ 3,413		6.81%
Interest expense and interest cost related to average interest-bearing liabilities		615	1.30%		676	1.76%
Net interest income and net interest margin	\$ 3,083		4.81%	\$ 2,737		5.46%

The Company's net interest margin decreased 65 basis points in the periods under review. The net interest margin for the first quarter of 2003 was 4.81% compared to 5.46% for the first quarter of 2002. During 2002 and the first quarter of 2003, the Company implemented numerous measures to minimize the impact of the decline in interest rates. These measures included diversifying the product mix of loans to incorporate floors, offering varied rate and term structures on loans to enhance yield, reducing rates paid on interest-bearing deposits, increasing the volume of non-interest bearing deposits, and shortening the investment portfolio average life.

Investment yield decreased 152 basis points in the periods under review. Mortgage rates continue to be at all-time lows. This unique interest rate environment has afforded borrowers the ability and opportunity to refinance single-family homes repeatedly which affects the principal pre-payments on collateralized mortgage obligations (CMO) and mortgage backed securities (MBS). Mortgage rates for 30 year mortgage loans were 5.75% at March 31, 2003 compared to 7.01% at March 31, 2002 (based on information provided by the Federal Home Loan Mortgage Corporation). Due to the significant growth of deposits, the principal pre-payment cashflows is generally reinvested at a lower yield than the original investment security and any premium amortization may be accelerated. Refer to Results of Operations for further discussion.

West Coast prime rate was 4.25% for the first quarter of 2003 compared to 4.75% for the first quarter of 2002. The effective yield on loans for those same periods was 7.04% for the first quarter of 2003 and 7.58% for the same period of 2002. As the Bank's reference rate, which is generally tied to the West Coast prime rate, decreased 50 basis points in the first quarter of 2003 compared to the same period of 2002, the effective rate paid on deposits and other borrowings decreased 46 basis points. The effective rate on interest bearing liabilities in the first quarter of 2003 was 1.30% compared to 1.76% in the first quarter of 2002. Refer to Schedule of Average Balances and Average Yields and Rates. However, as stated above, further reductions in deposit rates may become increasingly difficult. Customers may seek alternative avenues to increase yields on their investments and accept higher risks than those associated with traditional products offered by financial institutions.

The Company's market focus for loans continues to concentrate on small to medium sized commercial businesses. These loans offer diversification as to industries and types of business, thus limiting material exposure in any one industry concentration. The Company offers both fixed and floating interest rate loans and typically obtains collateral in the form of real estate, business equipment, deposit accounts, and accounts receivable, but looks to business cash flow as its primary source of repayment.

As of March 31, 2003, in management's judgment, a concentration of loans existed in commercial loans and real estate-related loans. At that date, commercial and real estate-related loans represented 30.4% and 64.3% of total loans, respectively. Similar concentrations existed as of December 31, 2002 with commercial and real estate-related loans representing 44.2% and 49.8% of total loans, respectively.

Loan Type (Dollars in Thousands)	March 31, 2003	% of Total loans	December 31, 2002	% of Total loans
Commercial & Industrial	\$ 52,633	30.4%	\$ 51,631	32.4%
Real Estate	80,893	46.6%	78,338	49.2%
Real Estate - construction, land development and other land loans	30,771	17.7%	20,379	12.8%
Consumer & Installment	5,528	3.2%	5,581	3.5%

	173,381	100.0%	159,214	100.0%
Deferred loan fees, net	(602)		(488)	
Total loans	\$ 172,779		\$ 158,726	

Although management believes the loans within these concentrations have no more than the normal risk of collectibility, a substantial decline in the performance of the economy in general or a decline in real estate values in the Company's primary market area, in particular, could have an adverse impact on collectibility, increase the level of real estate-related nonperforming loans, or have other adverse effects which alone or in the aggregate could have a material adverse effect on the financial condition of the Company.

Average assets during the first quarter of 2003 were \$285,989,000 compared to \$224,810,000 for the same period of 2002, an increase of \$61,179,000, or 27.2%. Return on average assets (ROA) and return on average equity (ROE) for the periods under review are reflected in the following table.

	For the Quarter Ended March 31, 2003	For the Quarter Ended March 31, 2002
Return on average assets	1.09%	1.22%
Return on average equity	12.70%	12.80%

### **Results of Operations**

Net income for the first quarter of 2003 was \$781,000 compared to \$683,000 in the same period of 2002, a \$98,000 increase. The increase in net income resulted from increases in net interest income after provision for credit losses, increases in non-interest income and decreases in income tax expense which were partially offset by an increase in non-interest expenses.

Net interest income is the Company's primary source of revenue. Net interest income is the difference between the interest income received on interest-earning assets and the interest expense paid on interest-bearing liabilities. Net interest income is primarily affected by two factors, the volume and mix of interest-earning assets and interest-bearing liabilities and the interest rates earned on those assets and paid on the liabilities.

Interest income from loans increased 9.6%, or \$250,000, in the periods under review as average total loan volumes increased 17.9% to \$163,041,000 for the first quarter of 2003 compared to \$138,284,000 for the same period of 2002. The \$24,757,000 increase in the average loan volume can be attributed to the continued success of the Company's strategic plan to build its core business with the introduction of new products, seasoned commercial bankers, and strong emphasis on business development and customer retention activities. The current low rate environment has also offered opportunities for many small businesses to make capital improvements. Additionally, the successes of new offices and the expansion into the Sacramento market have contributed to the increase in volume. No assurance can be given that this level of loan growth will continue.

The Company purchased loans from other financial institutions and brokers during the first quarter of 2003, which also contributed to the increase in volumes. These loans are to borrowers located in the Company's general market area and undergo the same loan review process as loans originated by the Company. The Company believes that these loans represent no greater risk factors than loans originated by the Company.

The Company's loan to deposit ratio at March 31, 2003 was 68.6% compared to 72.3% at March 31, 2002. This decrease can be mainly attributed to the 30.9% increase in average deposits compared to the 17.9% increase in average loans in the periods under review. As noted

above, this trend has also negatively affected the Company's net interest margin.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

The Company concentrates its lending activities mainly in small to medium sized business related lending, both commercial and real estate, but offers consumer loans, Small Business Administration (SBA) loans, and agricultural lending as well. At March 31, 2003 and 2002, SBA loans were \$16,160,000 and \$13,717,000, respectively. Agricultural and agricultural related loans increased \$2,124,000 in the periods under review mainly due to the opening of the Kerman Office.

Average non-accrual loans for the first quarter of 2003 were \$675,000 compared to \$679,000 for the first quarter of 2002. At March 31, 2003, the Company had \$675,000 in non-accrual loans compared to \$679,000 at March 31, 2002. One agricultural relationship represented approximately 50% of the total non-accrual loans at March 31, 2003. The ratio of non-accrual loans to total loans decreased to 0.39% at March 31, 2003 compared to 0.47% at March 31, 2002.

### Composition of Non-accrual, Past Due and Restructured Loans

(Dollars in Thousands)	March 31, 2003	December 31, 2002	March 31, 2002
<b>Non-accrual</b>			
Commercial & industrial loans	\$ 675	\$ 466	\$ 679
Total non-accrual	\$ 675	\$ 466	\$ 679
Accruing loans past due 90 days or more or more	0	0	0
Restructured loans	0	615	627
Total non-performing loans	\$ 675	\$ 1,081	\$ 1,306
Non-accrual loans to total loans	0.4%	0.3%	0.5%
<b>Loans considered to be impaired</b>			
Loans considered to be impaired	\$ 1,222	\$ 952	\$ 595
Related allowance for credit losses on impaired loans	\$ 226	\$ 194	\$ 102

The designation of a loan as non-accrual for financial reporting purposes does not relieve the borrowers of their obligation to pay interest. Accordingly, the Company may ultimately recover all or a portion of the interest due on these non-accrual loans. A non-accrual loan returns to accrual status when the loan becomes contractually current and future collectibility of amounts due is reasonably assured.

The investment policy of the Company is established by the Board of Directors and implemented by the Company's Investment/Asset Liability Committee. It is designed primarily to provide and maintain liquidity, to enable the Company to meet its pledging requirements for public money and borrowing arrangements, to generate a favorable return on investments without incurring undue interest rate and credit risk, and to complement the Company's lending activities.

The portfolio is comprised of U.S. government agency securities, mortgage-backed securities, obligations of states and political subdivisions, and a small amount of corporate debt instruments.

Investments typically have yields lower than loans. Interest income from investment securities, Federal funds sold, and interest-bearing deposits in other banks increased 4.35% in the periods under review. The increase in these categories of income can be attributed to increases in

Weighted Average Number of Shares Outstanding:

28

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

investment securities volumes. Average investment securities, Federal funds sold and interest-bearing deposits in other banks increased 48.8% or \$30,768,000 to \$93,770,000 for the first quarter of 2003 compared to \$63,002,000 for the first quarter of 2002 as deposit growth exceeded loan growth.

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Average Federal funds sold increased \$11,604,000 in the periods under review. The effective yield for Federal funds sold was 1.15% in the first quarter of 2003 compared to 1.66% in the first quarter of 2002.

The amortized cost and estimated market value of available-for-sale investment securities at March 31, 2003 and March 31, 2002 consisted of the following:

March 31, 2003 (In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
U.S. Government agencies	\$ 9,874	\$ 879		\$ 10,753
Obligations of states and political subdivisions	17,324	904	\$ (126)	18,102
U.S. Government agencies collateralized by mortgage obligations	42,488	986	(124)	43,350
Corporate bonds	976	42		1,018
Other securities	1,073			1,073
	\$ 71,735	\$ 2,811	\$ (250)	\$ 74,296

March 31, 2002 (In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
U.S. Government agencies	\$ 8,480	\$ 159	\$ (41)	\$ 8,598
Obligations of states and political subdivisions	12,993	590	(28)	13,555
U.S. Government agencies collateralized by mortgage obligations	36,292	800	(202)	36,890
Corporate bonds	969	50		1,019
Other securities	454			454
	\$ 59,188	\$ 1,599	\$ (271)	\$ 60,516

Management's review of all investments before purchase includes an analysis of how the security will perform under several interest rate scenarios to monitor whether investments are consistent with the Bank's investment policy. The policy addresses issues of average life, duration, concentration guidelines, prohibited investments, and prohibited practices.

In an effort to increase yields without accepting unreasonable risk, a significant portion of new investment purchases has been in high quality mortgage-backed securities ( MBS ) and collateralized mortgage obligations ( CMOs ). The Company held \$42,488,000, or 59.2% of the total investment portfolio, in MBS and CMOs with an average yield of 3.78% at March 31, 2003 compared to \$36,292,000, or 61.3% of the total investment portfolio, with an average yield of 5.36% at March 31, 2002. Principal paydowns of CMOs and MBS for the first quarter of 2003 were \$6,436,000. As previously stated, the FOMC lowered the Federal funds rate a total of 475 basis points from January 2001 to March 2003 which created, by the nature of CMOs and MBS, increased levels of principal prepayments in the periods under review. While a portion of the paydowns provided funding for loans, excess funds were generally reinvested at lower yields than those generated by the original investment. Additionally, increased cashflows from principal prepayments create accelerated premium amortization, which negatively affects yield and income.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

In comparison to the yield on MBS and CMOs, the Company held \$9,874,000 in agency securities with an average yield of 4.71% at March 31, 2003 compared to \$8,480,000 in agency securities with an average yield of 5.67% at March 31, 2002. The difference in yield is primarily a function of the effect of the principal prepayments mentioned above.

The Company recognizes the interest rate risks and prepayment risks associated with MBS and CMOs. In a declining rate environment, prepayments from MBS and CMOs would be expected to increase and the expected life of the investment would be expected to shorten. Conversely, if interest rates increase, prepayments would be expected to decline and the average life of the MBS and CMOs would be expected to extend. The Company has purchased certain of these investments which are meant to perform well in an increasing rate environment and others that are meant to perform well in a declining rate environment, with the ultimate goal of a balanced portfolio. At March 31, 2003, the Company's market risk was higher in an increasing rate environment versus a declining rate environment. At March 31, 2003 an immediate rate increase of 200 basis points would result in the estimated decrease in the market value of the Company's investment portfolio by approximately \$3,782,000. Conversely, with an immediate rate decrease of 200 basis points, the estimated increase in the market value of the Company's investment portfolio would be approximately \$2,550,000 at March 31, 2003. While an immediate shock of 200 basis points is highly unlikely, as evidenced by the changes in interest rates in 2002 and 2001 which were in 25 basis point and 50 basis point increments, the Company uses those increments to measure its interest rate risk in accordance with regulatory requirements.

The Company offers a variety of deposit accounts having a range of interest rates and terms. The Company's deposits consist of savings, demand deposits, and certificate of deposit accounts. The flow of deposits is influenced significantly by general economic conditions, changes in the money market and prevailing interest rates and competition. The Company's deposits are obtained primarily from the geographic area in which its offices are located. The Company relies primarily on customer service and long-standing relationships with customers to attract and retain these deposits. The Company does not currently have any brokered deposits, and based on historical experience, management believes it will continue to retain a large portion of its time deposit accounts at maturity.

Interest expense in the first quarter of 2003 was \$615,000 compared to \$676,000 in the first quarter of 2002. This \$61,000, or 9.02%, decrease in interest expense can be partially attributed to the decrease in Federal funds interest rates discussed above. Interest rates on deposits typically lag behind immediate changes in Federal funds rates and then generally reflect only a percentage of the rate changes on deposit accounts. Average interest-bearing liabilities for the first quarter of 2003 were \$188,733,000 compared to \$153,597,000 for the first quarter of 2002, a 22.9%, or \$35,176,000 increase. The effective rate for all interest bearing liabilities was 1.30% in the first quarter of 2003 compared to 1.76% in the first quarter of 2002, a 46 basis point decrease.

(Dollars in Thousands)	Quarter Ended					
	Quarterly Avg. Balance	March 31, 2003 % of Total Deposits	Effective Rate	Quarterly Avg. Balance	March 31, 2002 % of Total Deposits	Effective Rate
NOW Accounts	\$ 40,556	16.1%	0.15%	\$ 32,310	16.9%	0.24%
MMDA Accounts	64,711	25.9%	1.13%	49,572	25.9%	1.65%
Time Deposits	59,374	23.7%	2.18%	49,919	26.1%	2.96%
Savings Deposits	15,132	6.0%	0.49%	12,160	6.4%	0.73%

<b>Total Deposits</b>	<b>\$ 250,479</b>	<b>100.0%</b>		<b>\$ 191,298</b>	<b>100.0%</b>	

Weighted Average Number of Shares Outstanding:

32

If interest rates were to decline or continue to remain unchanged in 2003, the Company could experience restraints on further decreases in the rates paid on deposit products. Additionally, the interest rate risk could increase as depositors are reluctant to accept continued low deposit rates and search for higher yields in investment products other than those offered by the Company. Conversely, if interest rates were to increase, the Company could benefit from the immediate increase in loan rates without comparable immediate increases in deposit rates.

Non-interest bearing deposits provide fairly inexpensive funding for loans and offer the opportunity for the Company to enhance and strengthen its net interest margin. Average non-interest bearing deposits increased 49.4% to \$70,706,000 for the first quarter of 2003 compared to \$47,337,000 for the first quarter of 2002. New business relationships were the major contributor to this increase.

Other interest expense increased in the periods under review as the Company utilized its Federal Home Loan Bank ( FHLB ) credit line in 2002 in anticipation of short-term liquidity needs and to take advantage of opportunities to lock in low funding rates for increased loan growth. While the loan growth met expectations, the deposit growth exceeded expectations. Borrowings from the FHLB were \$9,000,000 at March 31, 2003 and \$13,000,000 at March 31, 2002. The average maturities and average rate of the borrowings at March 31, 2003 was .88 years and 3.35%, respectively. The Company will continue to analyze the advantages and disadvantages of borrowing funds versus selling investment securities as part of its ongoing funding analysis.

Net interest income before provision for credit losses in the first quarter of 2003 was \$3,083,000 compared to \$2,737,000 in the first quarter of 2002, an increase of \$346,000, or 12.6%.

## **PROVISION FOR CREDIT LOSSES**

The Company provides for possible credit losses by a charge to operating income based upon the composition of the loan portfolio, past delinquency levels, losses and non-performing assets, economic and environmental conditions and other factors which, in management's judgment, deserve recognition in estimating credit losses. Loans are charged off when they are considered uncollectible or of such little value that continuance as an active earning bank asset is not warranted.

The establishment of an adequate credit allowance is based on both an accurate risk rating system and loan portfolio management tools. The Board has established initial responsibility for the accuracy of credit risk grades with the individual credit officer. The grading is then submitted to the Chief Credit Officer (CCO), who reviews the grades for accuracy. The risk grading and reserve allocation is analyzed annually by a third party credit reviewer and by various regulatory agencies.

The CCO sets the specific reserve for all adversely risk-graded credits quarterly. This process includes the utilization of loan delinquency reports, classified asset reports, and portfolio concentration reports to assist in accurately assessing credit risk and establishing appropriate reserves. Reserves are also allocated to credits that are not adversely graded. Use of historical loss experience within the portfolio along with peer bank loss experience determines the level of reserves held.

The allowance for credit losses is reviewed at least quarterly by the Board's Audit Committee and by the Board of Directors. Reserves are allocated to loan portfolio categories using percentages which are based on both historical risk elements such as delinquencies and losses and

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

predictive risk elements such as economic, competitive and environmental factors. The Company has adopted the specific reserve approach to allocate reserves to each adversely graded asset, as well as to each impaired asset for the purpose of estimating potential loss exposure. Although the allowance for credit losses is allocated to various portfolio categories, it is general in nature and available for the loan portfolio in its entirety. Additions may be required based on the results of independent loan portfolio examinations, regulatory agency examinations, or the Company's own internal review process. Additions are also required when, in management's judgment, the allowance does not properly reflect the portfolio's potential loss exposure.

Managing credits identified through the risk evaluation methodology includes developing a business strategy with the customer to mitigate the Company's potential losses. Management continues to monitor these credits with a view to identifying as early as possible when, and to what extent, additional provisions may be necessary.

The Company made no additions to the allowance for credit losses in the periods under review mainly due to decreased levels of risk-rated loans and increased recoveries on previously charged off loans. Additionally, the Company's historical net charge-off ratio, which reflects net charge-offs to beginning loan balances for the past three (3) years, declined to 0.031% for 2002 compared to 0.209% for 2001 and 0.295% for 2000.

At March 31, 2003, December 31, 2002 and March 31, 2002, the Company's recorded investment in loans that were considered to be impaired totaled \$1,222,000, \$952,000, and \$595,000 respectively. The related allowance for credit losses on these impaired loans was \$226,000, \$194,000 and \$102,000, respectively. The Company had no restructured loans and no accruing loans past due 90 days or more at March 31, 2003.

An analysis of the changes in the allowance for credit losses for the three-month periods ended March 31, 2003 and 2002 is as follows:

(In Thousands)	For the Three Month Period Ended March 31,			
	2003		2002	
Balance, beginning of the year	\$	2,433	\$	2,474
Provision charged to operations		-0-		-0-
Losses charged to the allowance		(52)		(296)
Recoveries on loans previously charged off		51		39
Balance, end of period	\$	2,432	\$	2,217

The ratio of net credit losses to total average loans outstanding was immaterial in the first quarter of 2003 compared to 0.19% in the first quarter of 2002. Net charge-offs were \$1,000 in the first quarter of 2003 and \$257,000 in the first quarter of 2002. Non-performing loans at March 31, 2003, December 31, 2002 and March 31, 2002 were \$675,000, \$1,081,000 and \$1,306,000, respectively. The ratio of non-performing loans to the allowance for credit losses at March 31, 2003 was 19.5%, 44.4% at December 31, 2002 and 58.9% at March 31, 2002. The allowance for credit losses was \$2,432,000, or 1.41% of total loans at March 31, 2003 compared to \$2,217,000 or 1.53% of total loans at March 31, 2002.

Based on information currently available, management believes that the allowance for credit losses will be adequate to absorb potential risks in the portfolio. However, no assurance can be given that the Company may not sustain charge-offs which are in excess of the allowance in any given period.

#### NON-INTEREST INCOME

Non-interest income includes service charge income, rental income from equipment leased to others, loan placement fees and other income as well as realized gains on securities transactions.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Non-interest income increased \$60,000, or 6.0%, to \$1,061,000 in the first quarter of 2003 compared to \$1,001,000 in the first quarter of 2002. The major contributors were increases in service charge income, loan placement fees, and other non-interest income which were partially offset by decreases in rentals from equipment leased to others and net realized gains on sales of investment securities.

Service charge income increased \$145,000, or 41.2% in the periods under review. The Bank introduced a successful new deposit product, Overdraft Privilege Account, in the second half of 2002, which was the main contributor to the increase. Increased deposit accounts and lower earnings credit rates for commercial deposit accounts were also contributors to the increase. Business related deposit accounts may earn credit for average

deposit holdings which may be used to offset service expenses. When the earnings credit is lower, the business will be required to increase deposit holdings or pay additional service charges.

The Company earns loan placement fees from the brokerage of single-family residential mortgage loans. Loan placement fees increased \$52,000, or 62.7%, in the periods under review. The 50 basis point reduction in late 2002 and the 475 basis point reductions in 2001 in the Federal funds rate by the FOMC provided consumers with numerous opportunities for refinancing of single-family homes. As interest rates remain unchanged or begin to increase, the opportunities for continued growth in this area may decline.

Rental income from equipment leased to others decreased \$125,000 or 36.1% in the periods under review. The decrease is mainly the result of the Company's decision not to actively pursue new operating lease arrangements. Equipment leased to others was \$103,000 at March 31, 2003 compared to \$970,000 at March 31, 2002.

Net realized gain on sales of investment securities decreased \$26,000 in the periods under review. There were no investment sales in the first quarter of 2003.

Other non-interest income increased \$14,000, or 7.2%, to \$208,000 in the first quarter of 2003 compared to \$194,000 in the first quarter of 2002. The primary contributor to the increase was income earned on bank owned life insurance.

#### **NON-INTEREST EXPENSES**

Total non-interest expenses for the first quarter of 2003 increased by \$378,000, or 14.1% compared to the same period in 2002. Non-interest expenses include salaries and employee benefits, occupancy and equipment expenses, depreciation and provision for losses on equipment leased to others and other expenses. The major components of the increase were salaries, occupancy expenses, and other non-interest expenses, which were partially offset by a decrease in depreciation on equipment leased to others.

Salaries and employee benefits increased \$350,000, or 25.0%, in the first quarter of 2003 compared to the first quarter of 2002. The increase can be mainly attributed to general salary and benefits increases that enable the Company to manage recent and projected growth and retain qualified personnel. Benefits costs include performance incentives, salary deferral, group health insurance and worker's compensation insurance. Additional personnel for the new Sacramento and Kerman Offices were also partially responsible for the increase. These increases correspond to the Company's overall strategic plan and design.

Occupancy and equipment expense increased \$104,000 or 42.0%, in the periods under review. Depreciation expenses associated with the opening of two new offices, remodeling costs in 2002, and the Bank's name change in 2002 were contributors to the increase.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Depreciation expense and the provision for losses on equipment leased to others decreased \$110,000, or 44.5%, in the first quarter of 2003 compared to the first quarter of 2002. As discussed above, the Company has decided not to actively pursue any additional lease purchases resulting in the decrease in expense.

Other expenses increased \$34,000, or 4.3% to \$820,000 in the first quarter of 2003 from \$786,000 in the first quarter of 2002. Operating losses due to a branch robbery and provisions for losses on Overdraft Privilege Accounts were the major contributors to the increase.

The Bank's efficiency ratio is calculated by dividing non-interest expense by the sum of net interest income and non-interest income. The ratio at March 31, 2003 was 73.8% compared to 71.8% at March 31, 2002. This means that for every dollar of income generated, the cost of that income was 74 cents in the first quarter of 2003 and 72 cents in the first quarter of 2002. The lower the ratio the more efficient the Company's operations. While reducing operating expenses can lower the ratio, the Company's low loan to deposit ratio, which reduces net interest income, also significantly affects this ratio. The Company's loan to deposit ratio of 68.6% at March 31, 2003 remains lower than the Company's peers.

Income tax expense was \$303,000 for the first quarter of 2003 compared to \$373,000 for the first quarter of 2002. The Company's effective tax rate decreased to 28.0% in the first quarter of 2003 from 35.3% in the first quarter of 2002. The change is primarily attributable to changes in the mix of taxable and non-taxable interest income in the years under review, and the Bank's real estate investment trust, Central Valley Community Realty, LLC ( CVCR ). The Bank formed a real estate investment trust in the second quarter of 2002 which invests in the Bank's real estate related assets. CVCR, as a real estate investment trust, is afforded certain tax advantages which reduce state income tax expense. However, no assurance can be given that the Company will continue to realize these tax advantages.

#### OFF BALANCE SHEET COMMITMENTS

Off balance sheet commitments are comprised of the unused portions of commitments to make or purchase extensions of credit in the form of loans or participations in loans, lease financing receivables, or similar transactions. Included are loan proceeds that the Company is obligated to advance, such as loan draws, construction progress payments, seasonal or living advances to farmers under prearranged lines of credit, rotating or revolving credit arrangements, including retail credit cards, or similar transactions. Forward agreements and commitments to issue a commitment at some point in the future are also included. The Company holds no off balance sheet derivatives and engages in no hedging activities.

The following table shows the distribution of the Company's undisbursed loan commitments for the quarters ended March 31, 2003 and 2002, respectively.

Loan Type (In Thousands)	March 31, 2003	March 31, 2002
Commercial & Industrial	\$ 45,256	\$ 27,814
Real Estate	21,324	27,426
Consumer & Installment	14,083	9,384
<b>Total</b>	<b>\$ 80,663</b>	<b>\$ 64,624</b>

#### MARKET RISK

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its loan and deposit functions. Management actively monitors and manages this interest rate risk exposure.

Fluctuations in market interest rates expose the Company to potential gains and losses. The primary objective of asset/liability management is to manage the balance between rate sensitive assets and rate sensitive liabilities being repriced in any given period in order to maximize net interest income during periods of fluctuating interest rates.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

Rate sensitive assets are those which contain a provision to adjust the interest rate periodically (for example, a loan in which prime rate determines the basis of the rate charged on outstanding balances). Those assets include certain commercial, real estate mortgage and construction loans and certain investment securities, Federal funds sold and time deposits in other financial institutions. Rate sensitive liabilities are those which provide for periodic changes in interest rate and include interest-bearing transaction accounts, money market accounts and time certificates of deposit. Analysis has shown that because of time and volume influences, the repricing of assets and liabilities is not tied directly to the timing of changes in market interest rates. If repricing assets exceed repricing liabilities in a time period, the Company would be considered asset sensitive and have a positive gap. Conversely, if repricing liabilities exceed repricing assets in a time period, the Company would be considered liability sensitive and have a negative gap.

Managing interest rate risk is important to the Company as its net interest margin can be affected by the repricing of assets and liabilities. Management uses several different tools to monitor its interest rate risk, including gap analysis. Additionally, the Company utilizes an asset/liability computer model which provides a detailed quarterly analysis of the Company's financial reports, to include a ratio analysis of liquidity, equity, strategic free capital, volatile liability coverage, and maturity of the investment portfolio. In addition, a trend analysis is generated which provides a projection of the Company's asset and liability sensitivity position over a one-year period. Exposure to interest rate changes is calculated within the program to ascertain interest rate risk in actual dollar exposure resulting from incremental changes in market interest rates. The incremental changes are generally referred to as shocks. These shocks measure the effect of sudden and significant rate changes on the Company's net interest income. Assets may not reprice in the same way as liabilities and adjustments are made to the model to reflect these differences. For example, the time between when the Company changes its rate on deposits may lag behind the time the Company changes the rate it charges on loans. Additionally, the interest rate change may not be in the same proportion for assets and liabilities. Interest rates on deposits may not decrease in the same proportion as a decrease in interest rates charged on loans. Conversely, interest rates on deposits may not be increased in the same proportion as rates charged on loans.

## **CAPITAL RESOURCES**

Capital serves as a source of funds and helps protect depositors and shareholders against potential losses. The primary source of capital for the Company has been internally generated capital through retained earnings.

The Company and the Bank are subject to certain regulatory requirements administered by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation (FDIC). Failure to meet these minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated statements. Capital adequacy guidelines involve quantitative measures of the Company's and the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgements by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. Each of these components is defined in the regulations. The consolidated quarterly average assets and risk-weighted assets of the Company and the quarterly average assets and risk-weighted assets of the Bank are not materially different at March 31, 2003. Management believes that the Company and the Bank continue to exceed minimum capital adequacy requirements as of March 31, 2003.

In addition, the most recent notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth below. There are no conditions or events since that notification that management believes have changed the Bank's category. Tier 1 capital is comprised of common shareholders' equity as modified by certain regulatory adjustments such as intangible assets, deferred taxes, and the effects of other comprehensive income or loss. The Bank continues to maintain capital levels substantially above those required for a well-capitalized bank under current capital adequacy regulations.

The Company has historically maintained substantial levels of capital. The assessment of capital adequacy is dependent on several factors including asset quality, earnings trends, liquidity and economic conditions. Maintenance of adequate capital levels is integral to providing stability to the Company. The Company needs to maintain substantial levels of regulatory capital to give it maximum flexibility in the changing regulatory environment and to respond to changes in the market and economic conditions.

On December 18, 2002, the Company announced a two-for-one stock split which was effected on January 6, 2003, and a stock repurchase program effective January 1, 2003 and ending December 31, 2003 with the intent to purchase up to \$500,000 or approximately 2% of its common stock. At March 31, 2003, the Company had repurchased 5,463 shares at a cost of \$81,672.

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

The Company has had two prior stock repurchase programs for the repurchase of up to \$500,000 or 3% of its common stock under each plan. The combined results of the programs were that 92,612 shares had been repurchased at a cost of \$982,619 as of December 31, 2002.

The following table presents the Company's capital ratios as of March 31, 2003 and December 31, 2002.

Total as of March 31, 2003 (Unaudited)	Actual		To Be Well-Capitalized Under Prompt Corrective Action Provisions		Minimum Regulatory Requirements	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	25,387,000	12.8%	19,791,000	10.0%	\$ 15,833,000	8.0%
Tier 1 Capital (to risk weighted assets)	22,955,000	11.6%	11,874,000	6.0%	7,916,000	4.0%
Tier 1 Capital (to average assets)	22,955,000	8.0%	14,299,000	5.0%	11,440,000	4.0%
Total as of December 31, 2002	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$ 24,550,000	13.2%	\$ 18,549,000	10.0%	\$ 14,839,000	8.0%
Tier 1 Capital (to risk weighted assets)	\$ 22,236,000	12.0%	\$ 11,129,000	6.0%	\$ 7,419,000	4.0%
Tier 1 Capital (to average assets)	\$ 22,236,000	8.0%	\$ 13,915,000	5.0%	\$ 11,132,000	4.0%

At the current time, there are no commitments that would engender the use of material amounts of the Company's capital.

### LIQUIDITY MANAGEMENT

The objective of our liquidity management is to maintain the Company's ability to meet the day-to-day cash flow requirements of our clients who either wish to withdraw funds or require funds to meet their credit needs. The liquidity position must be managed to allow the Company to meet the needs of its clients while maintaining an appropriate balance between assets and liabilities to meet the return on investment expectation of the shareholders. Sources and uses of funds are monitored on a daily basis to maintain an acceptable liquidity position assessing historical information such as seasonal demand, local economic cycles, and the economy in general. In addition to liquidity from core deposits and repayments and maturities of loans and investments, the Company has the ability to sell securities, obtain Federal Home Loan Bank (FHLB) advances or purchase overnight Federal Funds. Additionally, current ratios, management goals, and unique characteristics of the Company are considered. Management accomplishes this objective through the selection of asset and liability maturity mixes that it believes will meet the Company's needs.

The Company reviews its liquidity position regularly based upon its current position and expected trends of loans and deposits. Liquidity is provided by the Bank's core deposit base, shareholders' equity, and reductions in assets, which can be immediately converted to cash at minimal

## Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10QSB

cost. Liquid assets, which consist of cash, deposits in other financial institutions, Federal funds sold, available for sale investment securities (less pledged securities) and loans maturing within the next 90 days averaged \$112,121,000 for the first quarter of 2003, or 39.2% of average assets, compared to \$72,265,000, or 32.1% of average assets for the first quarter of 2002. The ratio of average liquid assets to average demand deposits was 158.6% for the first quarter of 2003 compared to 152.7% for the first quarter of 2002. The Company's loan to deposit ratio at March 31, 2003 was 68.6% compared to 72.3% at March 31, 2002.

Unpledged investment securities may also provide liquidity through principal paydowns, maturities, or by selling the investment. At March 31, 2003, \$48,107,000 in unpledged securities was available as collateral for borrowing or sale.

The Bank had unsecured lines of credit with its correspondent banks which, in the aggregate, amounted to \$8,000,000 and \$6,000,000 at March 31, 2003 and 2002, respectively, at interest rates which vary with market conditions. The Bank also had a line of credit with the Federal Reserve Bank of San Francisco at March 31, 2003 and 2002, which bears interest at the prevailing discount rate collateralized by investment securities with amortized costs totaling \$3,617,000 and \$5,287,000 and market values totaling \$3,700,000 and \$5,517,000, respectively. In addition, the Bank had a credit line with the Federal Home Loan Bank at March 31, 2003 and 2002, which bears interest at the prevailing interest rate collateralized by investment securities with amortized costs totaling \$11,431,000 and \$14,677,000 and market values totaling \$12,395,000 and \$14,825,000, respectively. The amount of the credit line varies according to the Bank's investment and loan portfolio make-up.

At March 31, 2003 and 2002, respectively, the Bank had \$9,000,000 and \$13,000,000 outstanding on these credit lines. Average maturity of the advances was .88 years at an average rate of 3.35%.

As discussed previously, the Bank borrowed funds from the FHLB during 2002 to meet anticipated liquidity needs. The Company analyzes the advantages and disadvantages of borrowing funds versus selling existing investment securities and their respective rates and yields.

Management believes that the Company maintains adequate amounts of liquid assets to meet its liquidity needs. The Company's liquidity might be insufficient if deposits or withdrawals were to exceed anticipated levels. Deposit withdrawals can increase if a company experiences financial difficulties or receives adverse publicity for other reasons, or if its pricing of products or services are not competitive with those offered by other financial institutions.

Management believes that the Company's current mix of assets and liabilities provide a reasonable level of risk related to significant fluctuations in net interest income or the result of volatility of the Company's earning base.

## **INFLATION**

The impact of inflation on a financial institution differs significantly from that exerted on other industries primarily because the assets and liabilities of financial institutions consist largely of monetary items. However, financial institutions are affected by inflation in part through non-interest expenses, such as salaries and occupancy expenses, and to some extent by changes in interest rates.

## **ITEM 3. CONTROLS AND PROCEDURES**

### **(a) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES**

Weighted Average Number of Shares Outstanding:

46

Based on their evaluation as of a date within 90 days of the filing date of this Quarterly Report on Form 10-QSB, the Registrant's principal executive officer and principal financial officer have concluded that the Registrant's disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934 (the Exchange Act)) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

**(b) CHANGES IN INTERNAL CONTROLS**

There were no significant changes in the Registrant's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

**PART II OTHER INFORMATION**

**ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K**

(a) Exhibit 10.43 Amendment to the Split Dollar Agreement and Policy Endorsement with Central Valley Community Bank by and between Central Valley Community Bank f/k/a Clovis Community Bank and Daniel N. Cunningham, Steven McDonald, Louis McMurray, Wanda Lee Rogers and William S. Smittcamp, effective January 3, 2003.

Exhibit 10.44 Schedule C, Participants and life insurance policies in Central Valley Community Bank Amended Split Dollar Agreement and Policy Endorsement, by and between Central Valley Community Bank and Daniel N. Cunningham, Steven McDonald, Louis McMurray, Wanda Lee Rogers and William S. Smittcamp, effective January 3, 2003.

Exhibit 99.1 Certification of Principal Executive Officer pursuant to 18 U.S.C. Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Exhibit 99.2 Certification of Principal Financial Officer pursuant to 18 U.S.C. Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

**SIGNATURES**

Pursuant to the requirements of Section 13 of the Securities Exchange Act of 1934, the Company has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

**CERTIFICATIONS**

I, Daniel J. Doyle, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of CENTRAL VALLEY COMMUNITY BANCORP;

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:

a. designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b. evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and

c. presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):

a. all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
