VODAFONE LAUNCHES NEW AND EXCLUSIVE BLACKBERRY® PHONE

Vodafone today announces the launch of a new and exclusive addition to its popular BlackBerry® from Vodafone range – the BlackBerry 7100v . Developed and manufactured by Research In Motion, the BlackBerry 7100v from Vodafone is a unique mobile phone combining easy access to voice services as well as immediate and reliable access to email, calendar and contacts, in an innovative and stylish format. Supported by the familiar and intuitive Vodafone-branded menu, the BlackBerry 7100v from Vodafone is the first of its kind available globally, adding to the range of Vodafone branded mobility solutions for business customers.

The BlackBerry 7100v from Vodafone has a new and innovative QWERTY keyboard, dedicated Send and End keys and a thumb operated trackwheel for fast and convenient navigation. Messages can be quickly and easily composed via SureType , a new keyboard technology from RIM that enables mobile phones to support the advanced messaging features required by business customers.

The device is easy to set up and use, featuring the Vodafone branded customer interface and BlackBerry push technology that means email is delivered direct to the handset without the need for manual dial-up. As well as providing effective voice services, the BlackBerry 7100v from Vodafone opens and forwards email attachments and enables fast and easy access to a wide range of additional attachment formats (including Microsoft Word, Excel, PowerPoint and Adobe Acrobat). In addition to 32MB of memory, the device offers advanced browser technology, quad-band international coverage, high performance internal antenna, speakerphone and Bluetooth support.

Our business customers, particularly those who are self employed or running small to medium sized businesses, have been asking us for a simple device that combines the efficiency and basic features of a mobile phone, with the benefits of being able to access email and attachments on the move – said Peter Bamford, Chief Marketing Officer at Vodafone. The BlackBerry 7100v from Vodafone offers a unique addition to the family of Vodafone business solutions and is the first in our planned portfolio of hand-held business devices designed to make our customers’ lives easier, any time, anywhere .

The new BlackBerry 7100v with SureType keyboard technology is the result of many years of research and innovation. We have listened to mobile users and created a new device that we believe will attract a whole new audience to BlackBerry for the first time, said Jim Balsillie, Co-CEO at Research In Motion. A great deal of care has gone into the design of this sophisticated handset that delivers exceptional email, messaging and browsing capabilities as well as a high quality phone and an amazing colour screen.

The BlackBerry 7100v from Vodafone will be introduced on a phased basis across Australia, Austria, France, Germany, Ireland, Italy, the Netherlands, New Zealand, Portugal, Spain, Sweden and the UK.

For more information on the BlackBerry from Vodafone range can be found at <http://www.vodafone.com/office>.

About Vodafone

Vodafone is the world's largest mobile community, with equity interests in 26 countries and Partner Networks in a further 13 countries, serving over 139 million proportionate customers. Vodafone's global consumer service offering, Vodafone live![™], opens up a world of mobile colour communication, bringing news, information, email, chat, location-based services, games and shopping to customers' mobile devices.

About RIM

Research In Motion is a leading designer, manufacturer and marketer of innovative wireless solutions for the worldwide mobile communications market. Through the development of integrated hardware, software and services that support multiple wireless network standards, RIM provides platforms and solutions for seamless access to time-sensitive information including email, phone, SMS messaging, Internet and intranet-based applications. RIM technology also enables a broad array of third party developers and manufacturers to enhance their products and services with wireless connectivity to data. RIM's portfolio of award-winning products, services and embedded technologies are used by thousands of organizations around the world and include the BlackBerry® wireless platform, the RIM Wireless Handheld product line, software development tools, radio-modems and software/hardware licensing agreements. Founded in 1984 and based in Waterloo, Ontario, RIM operates offices in North America, Europe and Asia Pacific. RIM is listed on the Nasdaq Stock Market (Nasdaq: RIMM) and the Toronto Stock Exchange (TSX: RIM). For more information, visit www.rim.com or www.blackberry.com.

22 September 2004

VODAFONE ANNOUNCES EXTENSIVE NEW HANDSET RANGE

FOR 3G CONSUMER SERVICES

Vodafone today announces its extensive range of 10 new generation 3G handsets planned for the Christmas period, following the launch of the Vodafone Mobile Connect 3G datacard and the successful introduction of Vodafone live!™ with 3G.

Vodafone is working with some of the world's leading handset manufacturers including Sharp, Motorola, Sony Ericsson, NEC, Nokia and Samsung to provide customers with a wide choice of 3G handsets at a range of prices. These handsets will be available with a broader array of services across Europe and Japan.

This new range of Vodafone 3G handsets, all featuring Vodafone's multi-media consumer service, Vodafone live!™, has been designed in close collaboration with manufacturers to allow consumers to experience the benefits of enhanced Vodafone live!™ with 3G services. The handset range, which includes models and designs exclusive to Vodafone, will enable significant improvements in imaging, music, entertainment and information. Highlights include Europe's first 2 mega pixel camera phone, equipped with auto focus, optical zoom and high resolution displays; handsets that offer CD music quality, stereo speakers and MP3 players; access to 3D gaming; video and audio streaming and video calling.

Customers can use Vodafone's new generation of 3G handsets in both Europe and Japan as services will be delivered seamlessly by

Vodafone's global W-CDMA networks.

Vodafone plans to launch 10 new 3G handsets. The portfolio includes the Sharp 802, Sharp 902, Motorola E1000, Motorola V980, Motorola C980, NEC's Vodafone 802N, Sony Ericsson V800, Nokia 6630, Samsung Z110V and Samsung Z107V.

The planned launch of our new 3G handset portfolio represents a major breakthrough in terms of handset choice, said Peter Bamford, Chief Marketing Officer, Vodafone. It will also give consumers the opportunity to experience the enhanced range of Vodafone live!™ with 3G services, opening up a whole new world of communication and entertainment via the mobile phone.

Full details of these services and handset availability will follow in November.
