#### **Notes to Investment Portfolio:**

Security Valuation:

Debt securities generally are valued by pricing services approved by the Fund s Board of Trustees, based upon market transactions for normal, institutional-size trading units of similar securities. The services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes. Debt securities for which quotations are readily available are valued at an over-the-counter or exchange bid quotation. Certain debt securities, which tend to be more thinly traded and of lesser quality, are priced based on fundamental analysis of the financial condition of the issuer and the estimated value of any collateral. Valuations developed through pricing techniques may vary from the actual amounts realized upon sale of the securities, and the potential variation may be greater for those securities valued using fundamental analysis.

Equity securities, exchange traded funds and securities of certain investment companies are valued at the last sale price on the principal exchange on which they trade, except for securities traded on the NASDAQ, which are valued at the NASDAQ official close price. Unlisted securities or listed securities for which there were no sales during the day are valued at the closing bid price on such exchanges or over-the-counter markets.

Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded.

Investments for which market quotations are not readily available, or have quotations which management believes are not appropriate, are valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. If a security is valued at a fair value , such value is likely to be different from the last quoted market price for the security.

- (a) Security purchased on a delayed delivery basis.
- (b) The issuer has filed for bankruptcy protection under Chapter 11, and is in default of certain debt covenants. Income is not being accrued. At August 31, 2005, the value of this security represents 0.0% of net assets.
- (c) Zero coupon bond.

(d)

The Fund has been informed that each issuer has placed direct obligations of the U.S. Government in an irrevocable trust, solely for the payment of principal and interest.

- (e) The issuer has filed for bankruptcy protection under Chapter 11, and is in default of certain debt covenants. Income is being accrued. At August 31, 2005, the value of these securities amounted to \$687,650, which represents 0.5% of net assets.
- (f) A portion of the security with a market value of \$925,603 is pledged as collateral for open futures contracts.

26

- (g) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At August 31, 2005, these securities amounted to \$3,602,131, which represents 2.7% of net assets.
- (h) Variable rate demand notes. These securities are payable upon demand and are secured by letters of credit or other credit support agreements from banks. The interest rates change periodically and the interest rates shown reflect the rates at August 31, 2005.
- (i) Cost for federal income tax purposes is \$179,968,974.
- (j) Unrealized appreciation and depreciation at August 312005 based on cost of investments for federal income tax purposes was:

Unrealized		Unrealized	Net Unrealized	
	Appreciation	Depreciation	Appreciation	
\$	16,917,998	\$ (5,054,241) \$	11,863,757	

At August 31, 2005, the Trust held the following open short futures contracts:
