IMPORTANT NOTICES REGARDING PRIVACY, DELIVERY OF SHAREHOLDER DOCUMENTS, PORTFOLIO HOLDINGS AND PROXY VOTING

Privacy. The Eaton Vance organization is committed to ensuring your financial privacy. Each of the financial institutions identified below has in effect the following policy ("Privacy Policy") with respect to nonpublic personal information about its customers:

Only such information received from you, through application forms or otherwise, and information about your Eaton Vance fund transactions will be collected. This may include information such as name, address, social security number, tax status, account balances and transactions.

None of such information about you (or former customers) will be disclosed to anyone, except as permitted by law (which includes disclosure to employees necessary to service your account). In the normal course of servicing a customer's account, Eaton Vance may share information with unaffiliated third parties that perform various required services such as transfer agents, custodians and broker/dealers.

Policies and procedures (including physical, electronic and procedural safeguards) are in place that are designed to protect the confidentiality of such information.

We reserve the right to change our Privacy Policy at any time upon proper notification to you. Customers may want to review our Policy periodically for changes by accessing the link on our homepage: www.eatonvance.com.

Our pledge of privacy applies to the following entities within the Eaton Vance organization: the Eaton Vance Family of Funds, Eaton Vance Management, Eaton Vance Investment Counsel, Boston Management and Research, and Eaton Vance Distributors, Inc.

In addition, our Privacy Policy only applies to those Eaton Vance customers who are individuals and who have a direct relationship with us. If a customer's account (i.e., fund shares) is held in the name of a third-party financial adviser/broker-dealer, it is likely that only such adviser's privacy policies apply to the customer. This notice supersedes all previously issued privacy disclosures.

For more information about Eaton Vance's Privacy Policy, please call 1-800-262-1122.

Delivery of Shareholder Documents. The Securities and Exchange Commission (the "SEC") permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called "householding" and it helps eliminate duplicate mailings to shareholders.

Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.

If you would prefer that your Eaton Vance documents not be householded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

Portfolio Holdings. The Fund and its underlying Portfolio (if applicable) will file a schedule of its portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website www.eatonvance.com, by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC's website at www.sec.gov. Form N-Q may also be reviewed and copied at the SEC's public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

Proxy Voting. From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying Portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds' and Portfolios' Boards. You may obtain a description of these policies and procedures and information on how the Fund or Portfolio voted proxies relating to portfolio securities during the most recent 12 month period ended June 30, without charge, upon request, by calling 1-800-262-1122. This description is also available on the SEC's website at www.sec.gov.

MANAGEMENT S DISCUSSION OF PERFORMANCE

The Fund

Performance

- Based on share price, Eaton Vance Short Duration Diversified Income Fund (the Fund), a closed-end fund traded on the New York Stock Exchange under the symbol EVG, had a total return of 19.96% for the year ended October 31, 2006. That return was the result of an increase in share price to \$17.75 on October 31, 2006, from \$16.07 on October 31, 2005, and the reinvestment of \$1.403 in monthly distributions.
- Based on net asset value (NAV) per share, the Fund had a total return of 7.73% during the same period. This return resulted from a decrease in NAV per share to \$18.42 on October 31, 2006, from \$18.57 on October 31, 2005, and the reinvestment of \$1.403 in monthly distributions.
- For comparison, the Fund s peer group, the Lipper Global Income Funds Classification had an average total return of 8.63%, at net asset value, and a 12.47% annual return at share price during the same period.(1)
- The Fund s performance at market price will differ from its results at NAV. Although market price performance generally reflects investment results over time, during shorter periods, returns at market can also be affected by factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for the Fund s shares, or changes in Fund distributions.

Management Discussion

- In pursuing the Fund's objective, the Fund's investments have been allocated primarily to senior floating-rate loans, mortgage-backed securities (MBS) and foreign obligations.
- Within the senior, floating-rate loan segment, the Fund emphasizes broad diversification across economic and industry groups. At October 31, 2006, the Fund s 303 bank loan investments represented 37 industries, with no single industry representing as much as 7% of the Fund s net assets. The loan segment s largest industry weightings at October 31, 2006, were chemicals and plastics, business equipment and services, cable and satellite television and automotive.
- The loan market enjoyed relatively stable fundamentals during the year. Technical factors came more into balance, as record new issuance from strong merger activity met continuing robust investor demand. As a result, credit spreads stabilized after a long period during which they had narrowed. The Fund s shareholders also benefited from an increase in the London Inter-Bank Offered Rate the benchmark over which loan interest rates are typically set which rose in response to rate hikes from the Federal Reserve.
- Management continued to focus on the seasoned sector of the MBS market. MBS spreads tightened during the fiscal year, as market fundamentals remained positive. Prepayment rates fell and investor demand was brisk for high quality investments with a yield advantage over U.S. Treasuries. Incremental demand was especially strong from foreign buyers, such as central banks.
- The Fund maintained exposure to selected foreign markets through long and short forward currency contracts. Tighter spreads provided a more challenging environment for emerging markets investing. The Fund was overweighted in Asia. Some of the larger foreign exchange positions were held in Indonesia, Malaysia, India, the Philippines and Korea. The Fund continued to partially balance these Asian positions with a short position in the Japanese yen. The Fund increased its exposure to Latin America, primarily in the form of local bonds in Brazil and interest rate swaps in Mexico. These countries have benefited from low inflation and a commitment by their central

banks to target any renewal of inflation. In Euro-related exposures, the Fund shifted its investments, eliminating Slovakia in favor of a larger currency exposure in Romania and a T-bill position in Egypt. Management found Romania attractive because of its economic reforms, compelling yield spreads over the Euro and its anticipated membership in the European Union. Egyptian T-bills were attractive due to the continuing inflow of petro-dollars into its local financial markets. The Fund cross-hedged most of its European positions by shorting the Euro, a move that protected the Fund from the Euro s roughly 9% decline against the dollar during the fiscal year.

• The Fund s NAV again displayed relatively low volatility during the year ended October 31, 2006, and was among the lowest in volatility within its peer group. A low duration (1.5 years at October 31), a large exposure to floating-rate loan assets, and minimal correlation among the Fund s three investment sectors contributed to the Fund s relative NAV stability. (Duration measures the Fund s responsiveness to changes in interest rates.) In addition, the share price discount-to-NAV narrowed dramatically during the fiscal year, to 3.64% at October 31, 2006, from 13.46% at October 31, 2005.

Shares of the Fund are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested. Yield will vary.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to www.eatonvance.com.

⁽¹⁾ It is not possible to invest directly in a Lipper Classification. The Lipper averages are the average total returns of the funds that are in the same Lipper Classification as the Fund.

PERFORMANCE

Performance(1)

Average Annual Total Return (by share price, NYSE)		
One Year	19.96	%
Life of Fund (2/28/05)	3.29	%
A		
Average Annual Total Return (at net asset value)		
One Year	7.73	%
Life of Fund (2/28/05)	5.59	%

⁽¹⁾ Share price and net asset value on 2/28/05 are calculated assuming an offering price of \$20.00, less the sales load of \$0.90 per share paid by the shareholder.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to www.eatonvance.com.

The views expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. These views are subject to change at any time based upon market or other conditions, and Eaton Vance disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for an Eaton Vance fund are based on many factors, may not be relied on as an indication of trading intent on behalf of any Eaton Vance fund.

Fund Allocations(2)

By total leveraged assets

Fund Allocations are as of 10/31/06 and are as a percentage of the Fund s total leveraged assets. Total leveraged assets include all assets of the Fund (including those acquired with financial leverage), the notional value of long and short forward foreign currency contracts and other foreign obligations derivatives held by the Fund. Fund Allocations as a percentage of the Fund s net assets amounted to approximately 202% as of 10/31/06. Fund Allocations are subject

to change due to active management. The following Portfolio of Investments is reported based on a percentage of total net assets. Please refer to definition of total leveraged assets within the Notes to Financial Statements included herein.

- (1) Senior floating-rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating-rate interests will have an expected average life of approximately two to three years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London-Interbank Offered Rate (LIBOR), and secondarily the prime rate offered by one or more major United States banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders.
- (2) Unfunded or partially unfunded loan commitments. See Note 1E for description.
- (3) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.
- (4) All or a portion of these securities were on loan at October 31, 2006.
- (5) Adjustable rate securities. Rates shown are the rates at period end.
- (6) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (7) Security pays 3.8% coupon and accrues principal based on annual increases in the Chilean UF Rate, for an effective yield of 7.433%.

⁽¹⁾ For the period from the start of business, February 28, 2005, to October 31, 2005.

See notes to financial statements

⁽²⁾ Net asset value at beginning of period reflects the deduction of the sales load of \$0.90 per share paid by the shareholder from the \$20.00 offering price.

⁽³⁾ Computed using average common shares outstanding.

⁽⁴⁾ Returns are historical and are calculated by determining the percentage change in net asset value or market value with all distributions reinvested. Total investment return on net asset value and total investment return on market value are not computed on an annualized basis.

⁽⁵⁾ Total investment return on net asset value is calculated assuming a purchase at the offering price of \$20.00 less the sales load of \$0.90 per share paid by the shareholder on the first day and a sale at the net asset value on the last day of the period reported. Total investment return on market value is calculated assuming a purchase at the offering price of \$20.00 less the sales load of \$0.90 per share paid by the shareholder on the first day and a sale at the current market price on the last day of the period reported. Total investment return on net asset value and total return on market value are not computed on an annualized basis.

⁽⁶⁾ Annualized.

NOTES TO FINANCIAL STATEMENTS

1 Significant Accounting Policies

Eaton Vance Short Duration Diversified Income Fund (the Fund) is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Fund was organized under the laws of the Commonwealth of Massachusetts by an Agreement and Declaration of Trust dated April 15, 2004. The Fund's investment objective is to provide a high level of current income. The Fund may, as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income. The Fund pursues its objectives by investing its assets primarily in: senior, secured floating-rate loans made to corporate and other business entities (Senior Loans); bank deposits denominated in foreign currencies, debt obligations of foreign governmental and corporate issuers, including emerging market issuers, which are denominated in foreign currencies or U.S. dollars, and positions in foreign currencies (Foreign Obligations); and mortgage-backed securities that are issued, backed or otherwise guaranteed by the U.S. Government or its agencies or instrumentalities or that are issued by private issuers. These investments may consist of derivatives. Senior Loans are typically of below investment grade quality, as may be certain Foreign Obligations and other Fund investments. The following is a summary of significant accounting policies of the Fund. The policies are in conformity with accounting principles generally accepted in the United States of America.

A Investment Valuation The Fund's investments include interests in senior floating rate loans (Senior Loans). Certain Senior Loans are deemed to be liquid because reliable market quotations are readily available for them. Liquid Senior Loans are valued on the basis of prices furnished by a pricing service. Other Senior Loans are valued at fair value by the Fund's investment adviser, EatonVance Management (EVM), under procedures established by the Trustees. In connection with determining the fair value of a Senior Loan, the investment adviser makes an assessment of the likelihood that the borrower will make a full repayment of the Senior Loan. The primary factors considered by the investment adviser when making this assessment are (i) the creditworthiness of the borrower, (ii) the value of the collateral backing the Senior Loan, and (iii) the priority of the Senior Loan versus other creditors of the borrower. If, based on this assessment, the investment adviser believes there is a reasonable likelihood that the borrower will make a full repayment of the Senior Loan, the investment adviser will determine the fair value of the Senior Loan using a matrix pricing approach that considers the yield on the Senior Loan relative to yields on other loan interests issued by companies of comparable credit quality. If, based on its assessment, the investment adviser believes there is not a reasonable likelihood that the borrower will make a full repayment of the Senior Loan, the investment adviser will determine the fair value of the Senior Loan using analyses that include, but are not limited to (i) a comparison of the value of the borrower's outstanding equity and debt to that of comparable public companies; (ii) a discounted cash flow analysis; or (iii) when the investment adviser believes it is likely that a borrower will be liquidated or sold, an analysis of the terms of such liquidation or sale. In certain cases, the investment adviser will use a combination of analytical methods to determine the fair value, such as when only a portion of the borrower's assets are likely to be sold. In conducting its assessment and analyses, for purposes of determining fair value of a Senior Loan, the investment adviser will use its discretion and judgment in considering and appraising such factors, data and information and the relative weight to be given thereto as it deems relevant, including without limitation, some or all of the following: (i) the fundamental characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements, and the position of the Senior Loan in the Borrower's debt structure; (ii) the nature, adequacy and value of the collateral securing the Senior Loan, including the Fund's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on an evaluation of, among other things, its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the Senior Loan, including price quotations for and trading in the Senior Loan and interests in similar Senior Loans and the market environment and investor attitudes towards the Senior Loan and interests in similar Senior Loans; (v) the experience, reputation, stability and financial condition of the agent and any intermediate participants in the Senior Loan; and (vi) general economic and market conditions affecting the fair value of the Senior Loan.

Debt securities (including collateralized mortgage obligations and certain mortgage backed securities ("MBS")) normally are valued by independent pricing services. The pricing services consider various factors

NOTES TO FINANCIAL STATEMENTS CONT'D

relating to bonds or loans and/or market transactions to determine market value. Most seasoned 30 year fixed rate MBS are valued by the investment adviser's matrix pricing system. The matrix pricing system also considers various factors relating to bonds and market transactions to determine market value.

Other portfolio securities (other than short-term obligations, but including listed issues) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities which may use market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities will be valued at the last sale price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales during the day. The value of interest rate swaps will be based on dealer quotations. Short-term obligations which mature in 60 days or less, are valued at amortized cost. If short-term debt securities are acquired with a remaining maturity of more than 60 days, they will be valued by a pricing service. OTC options are valued at the mean between the bid and asked price provided by dealers. Financial futures contracts listed on commodity exchanges and exchange traded options are valued at closing settlement prices.

Marketable securities listed on foreign or U.S. securities exchanges generally are valued at closing sale prices or, if there were no sales, at the mean between the closing bid and asked prices therefore on the exchange where such securities are principally traded (such prices may not be used, however, where an active over-the-counter market in an exchange listed security better reflects current market value). Marketable securities listed in the NASDAQ National Market System generally are valued at the NASDAQ official closing price. Unlisted or listed securities for which closing sale prices are not available are valued at the mean between the latest bid and asked prices.

Occasionally, events affecting the value of foreign securities may occur between the time trading is completed abroad and the close of the exchange which will not be reflected in the computation of the Fund's net asset value unless the Fund deems that such event would materially affect its net asset value in which case an adjustment would be made and reflected in such computation. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rate quotations supplied by an independent quotation service.

Securities for which there is no such quotation or valuations and all other assets are valued at fair value as determined in good faith by or at the direction of the Fund's Trustees.

B Income Interest income from Senior Loans is recorded on the accrual basis at the then-current interest rate, while all other interest income is recorded on the basis of interest accrued, adjusted for amortization of premium or accretion of discount. Fees associated with loan amendments are paid/recognized immediately.

C Federal Taxes The Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute to shareholders each year all of its taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is necessary. At October 31, 2006, the Fund, for federal income tax purposes, had a capital loss carryover of \$6,909,291 which will reduce the Fund's taxable income arising from future net realized gains on investments, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of the distributions to shareholders which would otherwise be necessary to relieve the Fund of any liability for federal income or excise tax. Such capital loss carryover will expire on October 31, 2013 (\$5,051,488) and October 31, 2014 (\$1.857,803).

D Offering Costs Costs incurred by the Fund in connection with the offering were recorded as a reduction of capital paid in excess of par.

E Unfunded Loan Commitments The Fund may enter into certain credit agreements whereby all or a portion of which may be unfunded. The Fund is obligated to fund these commitments at the borrower's discretion. These commitments are disclosed in the accompanying Portfolio of Investments.

F Expense Reduction Investors Bank & Trust Company (IBT) serves as custodian of the Fund. Pursuant to the custodian agreement, IBT receives a fee reduced by credits which are determined based on the average daily cash balance the Fund maintains with IBT. All credit balances used to reduce the Fund's custodian

Eaton Vance Short Duration Diversified Income Fund as of October 31, 2006

NOTES TO FINANCIAL STATEMENTS CONT'D

fees are reported as a reduction of expenses in the Statements of Operations.

G Financial Futures Contracts Upon entering into a financial futures contract, the Fund is required to deposit an amount (initial margin) either in cash or securities, equal to a certain percentage of the purchase price indicated in the financial futures contract. Subsequent payments are made or received by the Fund (margin maintenance) each day, dependent on the daily fluctuations in the value of the underlying securities, and are recorded for book purposes as unrealized gains or losses by the Fund.

If the Fund enters into a closing transaction, the Fund will realize, for book purposes, a gain or loss equal to the difference between the value of the financial futures contract to sell and the financial futures contract to buy. The Fund's investment in financial futures contracts is designed for both hedging against anticipated future changes in interest rates and investment purposes. Should interest rates move unexpectedly, the Fund may not achieve the anticipated benefits of the financial futures contracts and may realize a loss.

H Foreign Currency Translation Investment valuations, other assets, and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates. Purchases and sales of foreign investment securities and income and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions. Recognized gains or losses on investment transactions attributable to changes in foreign currency exchange rates are recorded for financial statement purposes as net realized gains and losses on investments. That portion of unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed.

I Written Options Upon the writing of a call or a put option, an amount equal to the premium received by the Fund is included in the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current value of the option written in accordance with the Fund's policies on investment valuations discussed above. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or are closed are added to or offset against the proceeds or amount paid on the transaction to determine the realized gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option.

J Purchased Options Upon the purchase of a call or put option, the premium paid by the Fund is included in the Statement of Assets and Liabilities as an investment. The amount of the investment is subsequently marked-to-market to reflect the current market value of the option purchased, in accordance with the Fund's policies on investment valuations discussed above. If an option which the Fund has purchased expires on the stipulated expiration date, the Fund will realize a loss in the amount of the cost of the option. If the Fund enters into a closing sale transaction, the Fund will realize a gain or loss, depending on whether the sales proceeds from the closing sale transaction are greater or less than the cost of the option. If a Fund exercises a put option, it will realize a gain or loss from the sale of the underlying security, and the proceeds from such sale will be decreased by the premium originally paid. If the Fund exercises a call option, the cost of the security which the Fund purchases upon exercise will be increased by the premium originally paid.

K Forward Foreign Currency Exchange Contracts The Fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering these contracts from the potential inability of counterparties to meet the terms of their contracts and from movements in the value of a foreign currency relative to the U.S. dollar. The Fund will enter into forward contracts for hedging purposes as well as nonhedging purposes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any gains and losses are recorded for financial statement purposes as unrealized until such time as the contracts have been closed.

L Interest Rate Swaps The Fund may enter into interest rate swap agreements to enhance return, to hedge against fluctuations in securities prices or interest rates or as substitution for the purchase or sale of securities. Pursuant to these agreements, the Fund currently makes floating-rate payments based on the

Eaton Vance Short Duration Diversified Income Fund as of October 31, 2006

NOTES TO FINANCIAL STATEMENTS CONT'D

benchmark interest rate. In exchange, the Fund receives payments at a fixed interest rate. During the term of the outstanding swap agreement, changes in the underlying value of the swap are recorded as unrealized gains and losses. The value of the swap is determined by changes in the relationship between two rates of interest. The Fund is exposed to credit loss in the event of non-performance by the swap counterparty. Risk may also arise from the unanticipated movements in value of interest rates.

M Credit Default Swaps The Fund may enter into credit default swaps for investment and risk management purposes, including diversification. When the Fund is the buyer of a credit default swap contract, the Fund is entitled to receive the par or other agreed-upon value, of a referenced debt obligation from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign issuer, on the debt obligation. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have made a stream of payments and received no benefit from the contract reducing exposure to the credit by the notional amount of the contract. When the Fund is the seller of a credit default swap contract, it receives a stream of payments, but is obligated to pay par value of the notional amount of the contract upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. The Fund will segregate assets in the form of cash, cash equivalents or liquid securities in an amount equal to the aggregate market value of the credit default swaps of which it is the seller, marked to market on a daily basis. These transactions involve certain risks, including the risk that the seller may be unable to fulfill the transaction.

N Other Investment transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on securities sold are determined on the basis of identified cost

O Use of Estimates The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

P Indemnifications Under the Fund's organizational documents, its officers and Trustees may be indemnified against certain liabilities and expenses arising out of the performance of their duties to the Fund, and shareholders are indemnified against personal liability for the obligations of the Fund. Additionally, in the normal course of business, the Fund enters into agreements with service providers that may contain indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.

2 Distributions to Shareholders

The Fund intends to make monthly distributions to shareholders and at least one distribution annually of all or substantially all of its net realized capital gains, if any. In its distributions, the Fund intends to include amounts attributable to the imputed interest on foreign currency exposures through long and short positions in forward currency exchange contracts (represented by the difference between the foreign currency spot rate and the foreign currency forward rate) and the imputed interest derived from certain other derivative positions. In certain circumstances, a portion of distributions to shareholders may be characterized as a return of capital for federal income tax purposes. As portfolio and market conditions change, the rate of distributions and the Fund's distribution policy could change. Distributions are recorded on the ex-dividend date. The Fund distinguishes between distributions on a tax basis and a financial reporting basis. Accounting principles generally accepted in the United States of America require that only distributions in excess of tax basis earnings and profits be reported in the financial statements as a return of capital. Permanent differences between book and tax accounting relating to distributions are reclassified to paid-in capital. These differences relate primarily to the different treatment for paydown gain/losses on mortgage-backed securities, foreign currency, swaps and the method for amortizing premiums.

The tax character of the distributions paid for the year ended October 31, 2006 and the period from the start of business February 28, 2005, to October 31, 2005 were as follows:

	Year Ended October 31, 2006	Period Ended October 31, 2005 ⁽¹⁾
Distributions declared from:		
Ordinary Income	\$ 24,928,763	\$ 12,577,955
Return of Capital	\$ 1,532,344	\$ 2,128,945

⁽¹⁾ For the period from the start of business February 28, 2005, to October 31, 2005.

NOTES TO FINANCIAL STATEMENTS CONT'D

During the year ended October 31, 2006, accumulated distributions in excess of net investment income was decreased by \$5,793,465, accumulated net realized loss was increased by \$1,386,776, and paid-in capital was decreased by \$4,406,689. This change had no effect on net assets or net asset value per share.

As of October 31, 2006, the components of distributable earnings (accumulated loss) on a tax basis were as follows:

Unrealized appreciation	\$ 771,306
Capital loss carryforwards	\$ (6,909,291)
Other temporary differences	\$ 209,151

3 Investment Adviser Fee and Other Transactions with Affiliates

The Fund has agreed to pay the EVM, as compensation for management and investment advisory services, a fee in the amount of 0.75% of the total leveraged assets, subject to the limitation on total leveraged assets described below. "Total leveraged assets" means the value of all assets of the Fund (including assets acquired with financial leverage), plus the notional value of long and short forward foreign currency contracts and futures contracts and swaps based upon foreign currencies, issuers or markets held by the Fund, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to any investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility/commercial paper program or the issuance of debt securities), (ii) the issuance of preferred shares or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies and/or (iv) any other means. The advisory agreement provides that if investment leverage exceeds 40% on the Fund's total leveraged assets, the Adviser will not receive a management fee on total leveraged assets in excess of this amount. As of October 31, 2006, the Fund's investment leverage represents 50% of total leveraged assets. When the Fund holds other long and short positions in Foreign Obligations in a given country denominated in the same currency, total leveraged assets will be calculated by excluding the smaller of the long or short positions.

The "notional value" of a forward foreign currency contract or a futures contract or swap based upon foreign currencies, issuers or markets for purposes of calculating total leveraged assets is the stated dollar value of the underlying reference instrument at the time the derivative position is entered into. This amount remains constant throughout the life of the derivative contract. However, the negative or positive payment obligations of the Fund under the derivative contract are marked-to-market on a daily basis and are reflected in the Fund's net assets.

For the year ended October 31, 2006, the fee was equivalent to 0.67% of the Fund's average daily total leveraged assets, and 1.24% of the Fund's average daily net assets, for such period and amounted to \$4,321,458. EVM serves as the administrator of the Fund, but currently receives no compensation for providing administrative services to the Fund.

In addition, the adviser has contractually agreed to reimburse the Fund for fees and other expenses in the amount of 0.20% of average daily total leveraged assets of the Fund for the first five full years of the Fund's operations 0.15% of average daily total leveraged assets of the Fund in year six, 0.10% in year seven and 0.05% in year eight. For the year ended October 31, 2006, the Investment Adviser waived \$1,152,389 of its advisory fee.

EVM had agreed to reimburse the Fund for all Fund organizational costs and the amount by which the aggregate of all the Fund's offering costs exceeded \$0.04 per share. For the period from the start of business, February 28, 2005, to October 31, 2005, EVM reimbursed the Fund \$15,000, in organization costs and \$146,913 in offering costs, respectively.

Trustees of the Fund, who are not affiliated with EVM, may elect to defer receipt of all or a percentage of their annual fees in accordance with the terms of the Trustees Deferred Compensation Plan. For the year ended October 31, 2006, no significant amounts have been deferred.

Certain officers and Trustees of the Fund are officers of the above organization.

4 Purchases and Sales of Investments

Purchases and sales of investments, other than short-term obligations and including paydowns on

NOTES TO FINANCIAL STATEMENTS CONT'D

mortgage-backed securities, for the year ended October 31, 2006, were as follows:

Purchases	
Investments (non-U.S. Government)	\$ 257,401,581
U.S. Government Securities	91,935,730
	\$ 349,337,311
Sales	
Investments (non-U.S. Government)	\$ 207,071,491
U.S. Government Securities	55,061,424
	\$ 262,132,915

5 Securities Lending Agreement

The Fund has established a securities lending agreement in which the Fund lends portfolio securities to a broker in exchange for collateral consisting of either cash or U.S. government securities in an amount at least equal to the market value of the securities on loan. Under the agreement, the Fund continues to earn interest on the securities loaned. Collateral received is generally cash, and the Fund invests the cash and receives any interest on the amount invested but it must also pay the broker a loan rebate fee computed as a varying percentage of the collateral received. The loan rebate fee paid by the Fund offsets a portion of the interest income received and amounted to \$6,701,197 for the year ended October 31, 2006. At October 31, 2006, the value of the securities loaned and the value of the collateral amounted to \$141,507,246 and \$144,861,787, respectively. In the event of counterparty default, the Fund is subject to potential loss if it is delayed or prevented from exercising its right to dispose of the collateral. The Fund bears risk in the event that invested collateral is not sufficient to meet obligations due on the loans. The Fund has the right under the lending agreement to recover the securities from the borrower on demand.

6 Shares of Beneficial Interest

The Agreement and Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional \$0.01 par value shares of beneficial interest. Transactions in shares were as follows:

	Year Ended October 31,	
	2006	2005 ⁽¹⁾
Sales		18,855,000
Net increase		18,855,000

⁽¹⁾ For the period from the start of business, February 28, 2005, to October 31, 2005.

7 Federal Income Tax Basis of Unrealized Appreciation (Depreciation)

The cost and unrealized appreciation (depreciation) in value of the investments owned at October 31, 2006, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 485,432,213
Gross unrealized appreciation	\$ 4,228,495
Gross unrealized depreciation	(2,089,437)
Net unrealized appreciation	\$ 2,139,058

The unrealized depreciation on foreign currency, swap contracts, financial futures contracts and forward contracts at October 31, 2006 on a federal income tax basis was \$1,367,752.

8 Risks Associated with Foreign Investments

Investing in securities issued by companies whose principal business activities are outside the United States may involve significant risks not present in domestic investments. For example, there is generally less publicly available information about foreign companies, particularly those not subject to the disclosure and reporting requirements of the U.S. securities laws. Foreign issuers are generally not bound by uniform accounting, auditing, and financial reporting requirements and standards of practice comparable to those applicable to domestic issuers. Investments in foreign securities also involve the risk of possible adverse changes in investment or exchange control regulations, expropriation or confiscatory taxation, limitation on the removal of funds or other assets of the Fund, political or financial instability or diplomatic and other developments which could affect such investments. Foreign stock markets, while growing in volume and sophistication, are generally not as developed as those in the United States, and securities of some foreign issuers (particularly those located in developing countries) may be less liquid and more volatile than securities of comparable U.S. companies. In general, there is less overall governmental supervision and regulation of foreign securities markets, broker-dealers and issuers than in the United States.

9 Financial Instruments

The Fund regularly trades in financial instruments with off-balance sheet risk in the normal course of its investing activities to assist in managing exposure to various market risks. These financial instruments include written options, forward foreign currency contracts, financial futures contracts, and swap contracts and may

NOTES TO FINANCIAL STATEMENTS CONT'D

involve, to a varying degree, elements of risk in excess of the amounts recognized for financial statement purposes. The notional or contractual amounts of these instruments represent the investment the Fund has in particular classes of financial instruments and does not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered. A summary of obligations under these financial instruments at October 31, 2006 is as follows:

Forward Foreign Currency Exchange Contracts

NOTES TO FINANCIAL STATEMENTS CONT'D

Description of the underlying instruments to futures contracts: Japanese Government Bonds (JGB) having a maturity of 7 years or more but less than 11 years.

At October 31, 2006, the Fund had sufficient cash and/or securities to cover potential obligations arising from open futures and forward foreign currency exchange contracts as well as margin requirements on the open futures contracts.

Credit Default Swaps

The Fund has entered into credit default swaps whereby the Fund is buying or selling exposure to an increase in credit spreads for the underlying instrument. The maximum payouts are limited to the notional amount of each swap.
