UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

For the quarterly period ended September 30, 2011

OR

o Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____ .

Commission file number 1-13661

S.Y. BANCORP, INC.

(Exact name of registrant as specified in its charter)

Kentucky
(State or other jurisdiction of
incorporation or organization)

61-1137529
(I.R.S. Employer
Identification No.)

Edgar Filing: S Y BANCORP INC - Form 10-Q

1040 East Main Street, Louisville, Kentucky 40206

(Address of principal executive offices including zip code)

(502) 582-2571

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.). Yes No

The number of shares of the registrant's Common Stock, no par value, outstanding as of October 31, 2011, was 13,801,958.

S.Y. BANCORP, INC. AND SUBSIDIARY

(1) Summary of Significant Accounting Policies

The accompanying consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all information and footnotes required by U.S. generally accepted accounting principles (US GAAP) for complete financial statements. The consolidated financial statements of S.Y. Bancorp, Inc. (Bancorp) and its subsidiary reflect all adjustments (consisting only of adjustments of a normal recurring nature) which are, in the opinion of management, necessary for a fair presentation of financial condition and results of operations for the interim periods.

The consolidated financial statements include the accounts of S.Y. Bancorp, Inc. and its wholly-owned subsidiary, Stock Yards Bank & Trust Company (Bank). S.Y. Bancorp Capital Trust II is a Delaware statutory trust that is a wholly-owned unconsolidated finance subsidiary of S.Y. Bancorp, Inc. Significant intercompany transactions and accounts have been eliminated in consolidation.

A description of other significant accounting policies is presented in the notes to the Consolidated Financial Statements for the year ended December 31, 2010 included in S.Y. Bancorp, Inc.'s Annual Report on Form 10-K. Certain reclassifications have been made in the prior year financial statements to conform to current year classifications.

Interim results for the three and nine month periods ended September 30, 2011 are not necessarily indicative of the results for the entire year.

Critical Accounting Policies

Management has identified the accounting policy related to the allowance for loan losses as critical to the understanding of Bancorp's results of operations and discussed this conclusion with the Audit Committee of the Board of Directors. Since the application of this policy requires significant management assumptions and estimates, it could result in materially different amounts to be reported if conditions or underlying circumstances were to change. Assumptions include many factors such as changes in borrowers' financial condition which can change quickly or historical loss ratios related to certain loan portfolios which may or may not be indicative of future losses. To the extent that management's assumptions prove incorrect, the results from operations could be materially affected by a higher or lower provision for loan losses. The accounting policy related to the allowance for loan losses is applicable to the commercial banking segment of Bancorp.

Additionally, management has identified the accounting policy related to accounting for income taxes as critical to the understanding of Bancorp's results of operations and discussed this conclusion with the Audit Committee of the Board of Directors. The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. Judgment is required in assessing the future tax consequences of events that have been recognized in Bancorp's financial statements or tax returns. Fluctuations in the actual outcome of these future tax consequences, including the effects of periodic IRS and state agency examinations, could impact Bancorp's financial

position and its results from operations.

Recently Adopted Accounting Pronouncement

In April 2011, the FASB issued ASU No. 2011-02, *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring* as a result of stakeholders questioning whether additional guidance or clarification was needed to assist creditors with determining whether a modification is a Troubled Debt Restructuring (TDR). The final standard does not change the long-standing guidance that a restructuring of

Table of Contents

a debt constitutes a TDR if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. In other words, the creditor must conclude that both the restructuring constitutes a concession, and the debtor is experiencing financial difficulties. For the purposes of those two tests, the final ASU provides clarifications regarding the debtor's access to funds at current market rates, assessing the debtor's financial difficulties, and payment delays. The amendments in this update are effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. The adoption of ASU 2011-02 did not result in additional loans being identified as TDR.

(2) Securities

The amortized cost, unrealized gains and losses, and fair value of securities available for sale follow:

September 30, 2011 Securities available for sale (in thousands)	Amortized Cost	Gains	Unrealized Losses	Fair Value
U.S. Treasury and other U.S. government obligations	\$ 75,001	\$	\$ 1	\$ 75,000
Government sponsored enterprise obligations	51,379	3,046		54,425
Mortgage-backed securities	85,568	3,794		89,362
Obligations of states and political subdivisions	64,541	2,420	14	66,947
Trust preferred securities of other financial institutions	1,250	1		1,251
Total securities available for sale	\$ 277,739	\$ 9,261	\$ 15	\$ 286,985

December 31, 2010 Securities available for sale (in thousands)	Amortized Cost	Gains	Unrealized Losses	Fair Value
Government sponsored enterprise obligations	\$ 111,802	\$ 2,737	\$	\$ 114,539
Mortgage-backed securities	58,616	2,348	216	60,748
Obligations of states and political subdivisions	68,429	777	417	68,789
Trust preferred securities of other financial institutions	1,250	6		1,256
Total securities available for sale	\$ 240,097	\$ 5,868	\$ 633	\$ 245,332

Table of Contents

The investment portfolio includes a significant level of obligations of states and political subdivisions. The issuers of the bonds are generally school districts or essential-service public works projects. The bonds are concentrated in Kentucky, with a small percentage of the portfolio in Indiana and Ohio. Each of these securities has a rating of A or better by a recognized bond rating agency.

At December 31, 2010, Bancorp had mortgage-backed securities classified as held to maturity. These securities, with an amortized cost of \$20,000, had a fair value of \$22,000. There are no securities held to maturity as of September 30, 2011.

In addition to the available for sale portfolio, investment securities held by Bancorp include certain securities which are not readily marketable and are carried at cost. This category includes holdings of Federal Home Loan Bank of Cincinnati (FHLB) stock which are required as part of the condition for borrowing availability from the FHLB and are classified as restricted securities. See Note 5 for information relating to FHLB borrowings. Other securities consist of a Community Reinvestment Act (CRA) investment which matures in 2014, and is fully collateralized with a government agency security of similar duration.

A summary of the available for sale investment securities by maturity groupings as of September 30, 2011 is shown below. Actual maturities may differ from contractual maturities because some issuers have the right to call or prepay obligations. The investment portfolio includes agency mortgage-backed securities, which are guaranteed by agencies such as the FHLMC, FNMA, and GNMA. These securities differ from traditional debt securities primarily in that they may have uncertain maturity dates and are priced based on estimated prepayment rates on the underlying collateral. The Company does not have exposure to subprime originated mortgage-backed or collateralized debt obligation instruments.

Securities available for sale (in thousands)	Amortized Cost	Fair Value
Due within 1 year	85,546	85,654
Due after 1 but within 5 years	68,819	71,426
Due after 5 but within 10 years	32,461	34,964
Due after 10 years	5,345	5,579
Mortgage-backed securities	85,568	89,362
Total securities available for sale	\$ 277,739	\$ 286,985

Edgar Filing: S Y BANCORP INC - Form 10-Q

Table of Contents

Securities with unrealized losses not recognized in income at September 30, 2011 and December 31, 2010 are as follows:

(In thousands)	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
September 30, 2011						
U.S. Treasury and other U.S. government obligations.	\$ 75,000	\$ 1	\$	\$	\$ 75,000	1
Mortgage-backed securities						
Obligations of states and political subdivisions	315	1	1,028	13	1,343	14
Total temporarily impaired securities	\$ 75,315	\$ 2	\$ 1,028	\$ 13	\$ 76,343	\$ 15
December 31, 2010						
Mortgage-backed securities	\$ 9,620	\$ 216	\$	\$	\$ 9,620	\$ 216
Obligations of states and political subdivisions	31,444	417			31,444	417
Total temporarily impaired securities	\$ 41,064	\$ 633	\$	\$	\$ 41,064	\$ 633

Unrealized losses on Bancorp's investment securities portfolio have not been recognized in income because the securities are of high credit quality, and the decline in fair values is largely due to changes in the prevailing interest rate environment since the purchase date. The fair value is expected to recover as the securities reach their maturity date and/or the interest rate environment returns to conditions similar to when the securities were purchased. These investments consist of 3 and 49 separate investment positions as of September 30, 2011 and December 31, 2010, respectively, that are not considered other-than-temporarily impaired. Based on this information, Bancorp has not recorded other-than-temporary losses on any securities held at September 30, 2011.

Management evaluates the impairment of securities on an ongoing basis, considering various factors including issuer financial condition, agency rating, payment prospects, impairment duration and general industry condition. As of September 30, 2011, Bancorp had one security which had been impaired for 12 months or longer, and one trust preferred security with a credit rating below investment grade Caa1 by Moody's Investor Service. This security had an amortized cost and carrying value of \$1,000,000. Because management does not intend to sell the investments, and it is not likely that Bancorp will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, Bancorp does not consider these securities to be other-than-temporarily impaired at September 30, 2011.

Under Kentucky law, customer cash balances in investment management and trust accounts may be retained as deposits in the Bank. Kentucky law requires these deposit accounts above the \$250,000 per account protection provided by the FDIC to be backed by some form of collateral. At September 30, 2011 Bancorp pledged securities totaling \$24.8 million to collateralize these accounts beyond the FDIC protection.

Table of Contents**(3) Stock-Based Compensation**

The fair value of all new and modified awards granted, net of estimated forfeitures, is recognized as compensation expense over the respective service period. Forfeiture estimates are based on historical experience.

Bancorp currently has one stock-based compensation plan. Initially, in the 2005 Stock Incentive Plan, there were 735,000 shares of common stock reserved for issuance of stock based awards. In 2010, shareholders approved a proposal to amend the 2005 Stock Incentive Plan to reserve an additional 700,000 shares of common stock for issuance under the plan. As of September 30, 2011, there were 692,929 shares available for future awards. Bancorp's 1995 Stock Incentive Plan expired in 2005; however, options granted under this plan expire as late as 2015.

Options and stock appreciation rights (SARs) granted generally have been subject to a vesting schedule of 20% per year. Restricted shares generally vest over three to five years. All awards under both plans have been granted at an exercise price equal to the market value of common stock at the time of grant; options and SARs expire ten years after the grant date unless forfeited due to employment termination.

In April 2011, the Board of Directors of Bancorp approved an amendment to the 2005 Stock Incentive Plan to authorize restricted stock units (RSUs) as a type of award that the Company may grant pursuant to the Plan. The RSU awards entitle those officers to issuance of one share of common stock for each vested RSU shortly after expiration of a three-year performance period, provided certain goals are achieved. Executives do not have voting rights and do not receive dividends or other distributions paid on stock related to RSUs, until that stock is actually issued.

Bancorp has recognized stock-based compensation expense, within salaries and employee benefits in the consolidated statements of income, as follows:

	For three months ended September 30,		For nine months ended September 30,	
	2011	2010	2011	2010
Stock-based compensation expense before income taxes	\$ 305,000	\$ 249,000	\$ 869,000	\$ 704,000
Deferred tax benefit	107,000	87,000	304,000	246,000
Reduction of net income	\$ 198,000	\$ 162,000	\$ 565,000	\$ 458,000

Bancorp expects to record an additional \$321,000 of stock-based compensation expense in 2011 for equity grants outstanding as of September 30, 2011. As of September 30, 2011, Bancorp has \$3,070,000 of unrecognized stock-based compensation expense that will be recorded as compensation expense over the next five years as awards vest. Bancorp received cash of \$462,000 and \$507,000 from the exercise of options during the first nine months of 2011 and 2010, respectively.

The fair value of Bancorp's stock options and SARs is estimated at the date of grant using the Black-Scholes option pricing model, a leading formula for calculating the value of stock options. This model requires the input of subjective assumptions, changes to which can materially affect the fair value estimate. The fair value of restricted shares is determined by Bancorp's closing stock price on the date of grant. The fair

value of restricted stock units is determined by Bancorp's closing stock price on the date of the award, less the present value of dividends expected to be paid during the performance period.

Edgar Filing: S Y BANCORP INC - Form 10-Q

Table of Contents

The following assumptions were used in SAR/option valuations at the grant date in each year:

	2011	2010
Dividend yield	2.48%	2.18%
Expected volatility	22.64	23.87
Risk free interest rate	2.90	3.57
Forfeitures	6.07	5.96
Expected life of options and SARs (in years)	7.5	7.6

The dividend yield and expected volatility are based on historical information corresponding to the expected life of options and SARs granted. The expected volatility is the volatility of the underlying shares for the expected term on a monthly basis. The risk free interest rate is the implied yield currently available on U. S. Treasury issues with a remaining term equal to the expected life of the options.

All outstanding options and SARs have a 10-year contractual term from the date of grant. The expected life of options is based on actual experience of past like-term awards. Bancorp evaluated historical exercise and post-vesting termination behavior when determining the expected life of options and SARs.

A summary of stock option and SARs activity and related information for the nine months ended September 30, 2011 follows. The number of options and SARs and aggregate intrinsic value are stated in thousands.

	Options and SARs	Exercise Price	Weighted Average Exercise Price	Aggregate Intrinsic Value (1)	Weighted Average Fair Value	Weighted Average Remaining Contractual Life
At December 31, 2010						
Vested and exercisable	710	\$ 16.00-26.83	\$ 22.03	\$ 2,007	\$ 4.91	4.15
Unvested	273	21.03-26.83	22.85	552	5.36	7.72
Total outstanding	983	16.00-26.83	22.26	2,559	5.03	5.14
Granted	67	23.76-24.87	23.78		5.04	
Exercised	(52)	16.00-23.37	16.90	343	3.47	
Forfeited	(28)	18.05-26.83	21.79	1	4.85	
At September 30, 2011						
Vested and exercisable	737	16.00-26.83	22.62	100	5.09	3.79
Unvested	233	21.03-26.83	22.80		5.22	7.97
Total outstanding	970	16.00-26.83	22.66	\$ 100	5.12	4.79
Vested during year	95	21.03-26.83	23.58	\$	5.48	

(1) Intrinsic value for stock options is defined as the amount by which the current market price of the underlying stock exceeds the exercise price.

Table of Contents

In the first quarter of 2011, Bancorp granted 66,579 SARs at the weighted average current market price of \$23.78 and a Black-Scholes fair value of \$5.04. There were no SARs granted in the second or third quarters. In the first two quarters of 2011, Bancorp granted 41,991 shares of restricted common stock at the weighted average current market price of \$23.96. There were no restricted stock grants in the third quarter of 2011. Also in the second quarter of 2011, Bancorp awarded RSUs with a fair value of \$21.99 to executive officers of the Bank, the three-year performance period for which began January 1, 2011. Bancorp believes the most likely vesting of these RSUs will be 20,228 shares of common stock.

(4) Loans

The composition of loans by primary loan classification follows:

(In thousands)	September 30, 2011		December 31, 2010	
Commercial and industrial	\$	381,644	\$	343,956
Real estate mortgage:				
Commercial investment		362,498		362,904
Owner occupied commercial		328,893		316,291
1-4 family residential		158,594		157,983
Home equity - first lien		38,766		39,449
Home equity - junior lien		81,143		91,813
Subtotal: Real estate mortgage		969,894		968,440
Construction and development		152,891		159,482
Consumer		34,626		36,547
Total loans	\$	1,539,055	\$	1,508,425

An analysis of the changes in the allowance for loan losses for the nine months ended September 30, 2011 and 2010 follows:

(in thousands)	2011		2010	
Beginning balance January 1,	\$	25,543	\$	20,000
Provision for loan losses		9,500		7,774
Loans charged off		(6,463)		(3,992)
Recoveries		486		651
Ending balance September 30,	\$	29,066	\$	24,433

Table of Contents

The following table presents the balance in the recorded investment in loans and allowance for loan losses by portfolio segment and based on impairment method as of September 30, 2011 and December 31, 2010.

Consumer	\$ 95	\$ 140	\$
Total	\$ 17,270	\$ 19,804	\$ 1,814

Recorded investment reflects partial charge-offs which may have occurred over the life of the loans.

Impaired loans include non-accrual loans and loans accounted for as troubled debt restructuring. Non-performing loans include the balance of impaired loans plus any loans over 90 days past due and still accruing interest.

Edgar Filing: S Y BANCORP INC - Form 10-Q

Table of Contents

The following table presents the recorded investment in non-accrual loans as of September 30, 2011 and December 31, 2010.

(In thousands)	September 30, 2011	December 31, 2010
Commercial and industrial	\$ 3,191	\$ 2,328
Construction and development	5,479	4,589
Real estate mortgage	13,907	7,194
Consumer	96	277
Total	\$ 22,673	\$ 14,388

Included in non-performing loans are loans accounted for as troubled debt restructurings (TDR) which continue to accrue interest. The following table presents the recorded investment in loans accounted for as TDR as of September 30, 2011 and December 31, 2010.

September 30, 2011 (Dollars in thousands)	Number of contracts	Pre-modification outstanding recorded investment	Post-modification outstanding recorded investment
Commercial & industrial	3	\$ 1,583	\$ 1,583
Real estate mortgage	3	2,348	2,348
Total	6	\$ 3,931	\$ 3,931

December 31, 2010 (Dollars in thousands)	Number of contracts	Pre-modification outstanding recorded investment	Post-modification outstanding recorded investment
Real estate mortgage	2	\$ 2,882	\$ 2,882
Total	2	\$ 2,882	\$ 2,882

Bancorp has not had loans accounted for as TDR that have subsequently defaulted. At September 30, 2011, loans accounted for as TDR included temporary suspension of principal payments, resulting in payment of interest only. There has been no forgiveness of principal for loans accounted for as TDR. Loans accounted for as TDR are individually evaluated for impairment and, at September 30, 2011, had a total related allowance allocation of \$1,649,000, compared to \$652,000 at December 31, 2010.

Table of Contents

The following table presents the aging of the recorded investment in past due loans as of September 30, 2011 and December 31, 2010.

September 30, 2011 (in thousands)	30-59 days past due	60-89 days past due	Greater than 90 days past due	Total past due	Current	Total loans	Recorded investment > 90 days and accruing

Construction and development	256		700	956	158,526	159,482	
Consumer	69	4	146	219	36,328	36,547	51
Total	\$ 7,949	\$ 5,019	\$ 16,432	\$ 29,400	\$ 1,479,025	\$ 1,508,425	\$ 2,044

Bancorp categorizes loans into credit risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends. Pass-rated loans included all risk-rated loans other than those classified as special mention, substandard, and doubtful, which are defined below:

- **Special Mention:** Loans classified as special mention have a potential weakness that deserves management's close attention. These potential weaknesses may result in deterioration of repayment prospects for the loan or of the Bank's credit position at some future date.
- **Substandard:** Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize repayment of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.
- **Doubtful:** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or repayment in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Table of Contents

As of September 30, 2011 and December 31, 2010, the risk categories of loans were as follows:

Credit risk profile by internally assigned grade

(in thousands)

September 30, 2011	Commercial and industrial	Real estate mortgage	Construction and development	Consumer	Total

Table of Contents**(5) Federal Home Loan Bank Advances**

The Bank had outstanding borrowings of \$60,434,000 at September 30, 2011, via six separate advances. For five advances totaling \$60 million, all of which are non-callable, interest payments are due monthly, with principal due at maturity. The sixth advance totals \$434,000, and principal and interest payments are due monthly based on a 15 year amortization schedule. In the fourth quarter of 2010, Bancorp restructured and extended terms on two advances with FHLB resulting in lower interest cost over the remaining term of these advances. Prepayment penalties totaling \$1,336,000 were incurred. In accordance with US GAAP, prepayment penalties associated with the modification of advances are to be amortized over the life of the new advances as interest expense, resulting in effective interest rates greater than the contractual rate paid to FHLB. The following is a summary of the contractual maturities and average effective rates as of September 30, 2011:

(In thousands)	Advance	Rate
2013	\$ 20,000	1.55%
2014	20,000	2.43%
2015	20,000	3.34%
2024	434	2.40%
	\$ 60,434	2.44%

Advances from the FHLB are collateralized by certain commercial and residential real estate mortgage loans under a blanket mortgage collateral agreement and FHLB stock.

The Bank's agreement with the Federal Home Loan Bank of Cincinnati (FHLB) enables the Bank to borrow up to an additional \$113.1 million as of September 30, 2011 under terms to be established at the time of the advance. The Bank also has a standby letter of credit from the FHLB for \$2.8 million outstanding at September 30, 2011.

(6) Goodwill and Intangible Assets

US GAAP requires that goodwill and intangible assets with indefinite useful lives not be amortized, but instead be tested for impairment at least annually. Annual evaluations have resulted in no charges for impairment. Bancorp currently has goodwill from the acquisition of a bank in southern Indiana in the amount of \$682,000. This goodwill is assigned to the commercial banking segment of Bancorp.

Mortgage servicing rights (MSRs) are amortized in proportion to and over the period of estimated net servicing income, considering appropriate prepayment assumptions. MSRs are evaluated quarterly for impairment by comparing the carrying value to the fair value. The estimated fair values of MSRs at September 30, 2011 and December 31, 2010 were \$2,105,000 and \$2,188,000, respectively. The total outstanding principal balances of loans serviced for others were \$274,224,000 and \$254,988,000 at September 30, 2011, and December 31, 2010 respectively.

Table of Contents

Changes in the net carrying amount of MSRs for the nine months ended September 30, 2011 and 2010 are shown in the following table.

(in thousands)	2011		2010	
Balance at beginning of period	\$	1,785	\$	1,616
Originations		337		257
Amortization		(528)		(236)
Balance at September 30	\$	1,594	\$	1,637

(7) Defined Benefit Retirement Plan

The Bank sponsors an unfunded, non-qualified, defined benefit retirement plan for certain key officers with no plan to add additional participants. Benefits vest based on years of service. The actuarially determined pension costs are expensed and accrued over the service period, and benefits are paid from the Bank's assets. The net periodic benefits costs, which include interest cost and amortization of net losses, totaled \$31,000 for the three months ended September 30, 2011 and 2010. For each of the nine month periods ended September 30, 2011 and 2010, the net periodic benefit costs totaled \$93,000.

(8) Commitments and Contingent Liabilities

As of September 30, 2011, Bancorp had various commitments outstanding that arose in the normal course of business, including standby letters of credit and commitments to extend credit, which are properly not reflected in the consolidated financial statements. In management's opinion, commitments to extend credit of \$329,240,000 including standby letters of credit of \$7,815,000 represent normal banking transactions, and no significant losses are anticipated to result from these commitments as of September 30, 2011. Commitments to extend credit were \$350,314,000, including letters of credit of \$9,598,000, as of December 31, 2010. Bancorp's maximum exposure to credit loss in the event of nonperformance by the other party to these commitments is represented by the contractual amount of these instruments. Bancorp uses the same credit and collateral policies in making commitments and conditional guarantees as for on-balance sheet instruments. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses. Commitments to extend credit are mainly made up of commercial lines of credit, construction and home equity credit lines. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Bancorp evaluates each customer's creditworthiness on a case by case basis. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral held varies but may include accounts receivable, inventory, equipment, and real estate.

Standby letters of credit and financial guarantees written are conditional commitments issued by Bancorp to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Standby letters of credit generally have maturities of one to two years.

Bancorp has entered into agreements to guarantee the performance of several customers' contracts with other financial institutions. Bancorp will make payments under these agreements if a customer defaults on its obligations to the other financial institutions. The terms of the agreements range from 1 to 17 months. The maximum potential future payment guaranteed by Bancorp cannot be readily estimated because it is dependent upon the fair value of the contracts at the time of default. If an event of default on all contracts

Table of Contents

had occurred at September 30, 2011, Bancorp would have been required to make payments of approximately \$2,559,000. No payments have ever been required as a result of default on these contracts. These agreements are normally collateralized generally with real properties, equipment, inventories and receivables by the customer, which limits Bancorp's credit risk associated with the agreements.

(9) Preferred Stock

Bancorp has a class of preferred stock (no par value; 1,000,000 shares authorized), the relative rights, preferences and other terms of which or any series within the class will be determined by the Board of Directors prior to any issuance. Some of this preferred stock would be used in connection with a shareholders' rights plan upon the occurrence of certain triggering events. None of this stock had been issued as of September 30, 2011.

(10) Net Income Per Share

The following table reflects, for the three and nine months ended September 30, 2011 and 2010, net income (the numerator) and average shares outstanding (the denominator) for the basic and diluted net income per share computations:

(In thousands, except per share data)	Three months ended September 30		Nine months ended September 30	
	2011	2010	2011	2010
Net income, basic and diluted	\$ 5,774	\$ 6,365	\$ 17,262	\$ 16,902
Average shares outstanding	13,799	13,701	13,778	13,679
Effect of dilutive securities	39	106	66	91
Average shares outstanding including dilutive securities	13,838	13,807	13,844	13,770
Net income per share, basic	\$ 0.42	\$ 0.46	\$ 1.25	\$ 1.24
Net income per share, diluted	\$ 0.42	\$ 0.46	\$ 1.25	\$ 1.23

(11) Segments

The Bank's, and thus Bancorp's, principal activities include commercial banking and investment management and trust. Commercial banking provides a full range of loan and deposit products to individuals, consumers and businesses. Commercial banking also includes the Bank's mortgage banking and securities brokerage activity. Investment management and trust provides wealth management services including investment management, trust and estate administration, retirement plan services and financial planning.

The financial information for each business segment reflects that which is specifically identifiable or allocated based on an internal allocation method. Principally, all of the net assets of Bancorp are involved in the commercial banking segment. Income taxes are allocated to the

Edgar Filing: S Y BANCORP INC - Form 10-Q

investment management and trust segment based on the marginal federal tax rate since all activity giving rise to the difference between marginal and effective tax rates occurs in the commercial banking segment. The measurement of the performance of the business segments is based on the management structure of the Bank and is not

Edgar Filing: S Y BANCORP INC - Form 10-Q

Table of Contents

necessarily comparable with similar information for any other financial institution. The information presented is also not indicative of the segments' operations, if they were independent entities.

Selected financial information by business segment for the three and nine month periods ended September 30, 2011 and 2010 follows:

(In thousands)	Commercial banking	Investment management and trust	Total
Three months ended September 30, 2011			
Net interest income	\$ 17,751	\$ 39	\$ 17,790
Provision for loan losses	4,100		4,100

Tax expense	5,530	1,462	6,992
Net income	\$ 14,187	\$ 2,715	\$ 16,902

Table of Contents

(12) Income Taxes

US GAAP provides guidance on financial statement recognition and measurement of tax positions taken, or expected to be taken, in tax returns. As of September 30, 2011 and December 31, 2010 the gross amount of unrecognized tax benefits was \$197,000 and \$230,000, respectively. At September 30, 2011, if recognized, \$197,000 of the tax benefits would increase net income, resulting in a decrease of the effective tax rate. The amount of unrecognized tax benefits may increase or decrease in the future for various reasons including adding amounts for current tax year positions, expiration of open income tax returns due to statutes of limitation, changes in management's judgment about the level of uncertainty, status, if any, of examination, litigation and legislative activity and the addition or elimination of uncertain tax positions.

Bancorp's policy is to report interest and penalties, if any, related to unrecognized tax benefits in income tax expense. As of September 30, 2011 and December 31, 2010, the amount accrued for the potential payment of interest and penalties was \$18,000 and \$20,000, respectively.

(13) Fair Value Measurements

Bancorp follows the provisions of the authoritative guidance for fair value measurements. This guidance is definitional and disclosure oriented and addresses how companies should approach measuring fair value when required by US GAAP. The guidance prescribes various disclosures about financial statement categories and amounts which are measured at fair value, if such disclosures are not already specified elsewhere in US GAAP.

The authoritative guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants at the measurement date. The guidance also establishes a hierarchy to group assets and liabilities carried at fair value in three levels based upon the markets in which the assets and liabilities trade and the reliability of assumptions used to determine fair value. These levels are:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.

- Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

- Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions would reflect internal estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques could include pricing models, discounted cash flows and other similar techniques.

Edgar Filing: S Y BANCORP INC - Form 10-Q

Bancorp's policy is to maximize the use of observable inputs and minimize the use of unobservable inputs in fair value measurements. Where there exists limited or no observable market data, Bancorp uses its own estimates generally considering characteristics of the asset/liability, the current economic and competitive environment and other factors. For this reason, results cannot be determined with precision and may not be realized on an actual sale or immediate settlement of the asset or liability.

Bancorp's investment securities available for sale and derivative instruments are recorded at fair value on a recurring basis. Other accounts including mortgage loans held for sale, mortgage servicing rights, impaired loans and other real estate owned may be recorded at fair value on a non-recurring basis, generally in the application of lower of cost or market adjustments or write-downs of specific assets.

Table of Contents

The portfolio of investment securities available for sale is comprised of U.S. Treasury and other U.S. government obligations, debt securities of U.S. government-sponsored corporations, mortgage-backed securities, obligations of state and political subdivisions, and trust preferred securities of other banks. Trust preferred securities are priced using quoted prices of identical securities in an active market. These measurements are classified as Level 1 in the hierarchy above. All other securities are priced using standard industry models or matrices with various assumptions such as yield curves, volatility, prepayment speeds, default rates, time value, credit rating and market prices for the instruments. These assumptions are generally observable in the market place and can be derived from or supported by observable data. These measurements are classified as Level 2 in the hierarchy above.

Interest rate swaps are valued using primarily Level 2 inputs. Fair value measurements are obtained from an outside pricing service. Prices obtained are generally based on dealer quotes, benchmark forward yield curves, and other relevant observable market data. For purposes of potential valuation adjustments to derivative positions, Bancorp evaluates the credit risk of its counterparties as well as its own credit risk. To date, Bancorp has not realized any losses due to a counterparty's inability to perform and the change in value of derivative assets and liabilities attributable to credit risk was not significant during 2011.

Below are the carrying values of assets measured at fair value on a recurring basis (in thousands).

(In thousands)	Total	Fair Value at September 30, 2011		
		Level 1	Level 2	Level 3
Assets				
Investment securities available for sale				
U.S. Treasury and other U.S. government obligations	\$ 75,000	\$	\$ 75,000	\$

Interest rate swap	\$ 305	\$	\$ 305	\$

Mortgage loans held for sale are recorded at the lower of cost or market value. The portfolio is comprised of residential real estate loans and fair value is based on specific prices of underlying contracts for sales to investors. These measurements are classified as Level 2. Because the fair value of the loans held for sale exceeded their carrying value, they are not included in either table below for September 30, 2011 or December 31, 2010.

MSRs are recorded at fair value upon capitalization, are amortized to correspond with estimated servicing income, and are periodically assessed for impairment based on fair value at the reporting date. Fair value is based on a valuation model that calculates the present value of estimated net servicing income. The model incorporates assumptions that market participants would use in estimating future net servicing income. These measurements are classified as Level 3. At September 30, 2011 and December 31, 2010 there was no valuation allowance for the mortgage servicing rights, as the fair value exceeded the cost. Accordingly, the MSRs are not included in either table below for September 30, 2011 or December 31, 2010.

Other real estate owned, which is carried at the lower of cost or fair value, is periodically assessed for impairment based on fair value at the reporting date. Fair value is determined from external appraisals using judgments and estimates of external professionals. Many of these inputs are not observable and, accordingly, these measurements are classified as Level 3. At September 30, 2011 and December 31, 2010, the carrying value of other real estate owned was \$8,161,000 and \$5,445,000, respectively. Other real estate owned is not included in either table below, as the fair value of the properties exceeded their carrying value at September 30, 2011 and December 31, 2010.

Table of Contents

For impaired loans in the table below, the fair value is calculated as the carrying value of only loans with a specific valuation allowance, less the specific allowance. As of September 30, 2011, total impaired loans with a valuation allowance were \$15.2 million, and the specific allowance totaled \$3.7 million, resulting in a fair value of \$11.5 million, compared to total impaired loans with a valuation allowance of \$7.3 million, and the specific allowance allocation totaling \$1.8 million, resulting in a fair value of \$5.5 million at December 31, 2010. The losses represent the change in the specific allowances for the period indicated. See Note 4 for more information on impaired loans and allowances.

Below are the carrying values of assets measured at fair value on a non-recurring basis (in thousands).

(in thousands)	Total	Fair value at September 30, 2011			Losses for 9 month period ended September 30, 2011
		Level 1	Level 2	Level 3	
Impaired loans	\$ 11,527	\$	\$	\$ 11,527	\$ (3,001)

(in thousands)	Total	Fair value at December 31, 2010			Losses for year ended December 31, 2010
		Level 1	Level 2	Level 3	
Impaired loans	\$ 5,521	\$	\$	\$ 5,521	\$ (1,771)

Table of Contents**(14) Fair Value of Financial Instruments**

The estimated fair values of financial instruments are as follows:

(In thousands)	September 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets				
Cash and short-term investments	\$ 55,333	\$ 55,333	\$ 41,655	\$ 41,655
Mortgage loans held for sale	11,012	11,134	12,387	12,626
Securities	286,985	286,985	245,352	245,354
Federal Home Loan Bank stock and other securities	5,949	5,949	5,772	5,772
Loans, net	1,509,989	1,541,416	1,482,882	1,507,079
Accrued interest receivable	5,727	5,727	6,288	6,288
Interest rate swap	450	450	305	305
Financial liabilities				
Deposits	\$ 1,576,560	\$ 1,584,463	\$ 1,493,468	\$ 1,512,882
Short-term borrowings	84,495	84,495	87,509	87,509
Long-term borrowings	101,334	100,503	101,342	100,815
Accrued interest payable	155	155	304	304
Interest rate swap	450	450	305	305
Off balance sheet financial instruments				
Commitments to extend credit				
Standby letters of credit		(117)		(144)

Management used the following methods and assumptions to estimate the fair value of each class of financial instrument for which it is practicable to estimate the value.

Cash, Short-term investments, Accrued interest receivable/payable and Short-term borrowings

For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Securities

For securities, fair value equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities or dealer quotes.

Federal Home Loan Bank stock and other securities

For these securities without readily available market values, the carrying amount is a reasonable estimate of fair value.

Mortgage loans held for sale

The fair value of mortgage loans held for sale is determined by market quotes for each loan based on loan type, term, rate, size and the borrower's credit score.

Table of Contents

Loans, net

US GAAP prescribes the exit price concept for estimating fair value of loans. Because there is not a liquid market (exit price) for trading the predominant types of loans in Bancorp's portfolio, the fair value of loans is estimated by discounting future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities (e.g. entrance price).

Interest rate swaps

Fair value measurements are obtained from an outside pricing service. Prices obtained are generally based on dealer quotes, benchmark forward yield curves, and other relevant observable market data.

Deposits

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-rate certificates of deposits is estimated by discounting the future cash flows using the rates currently offered for deposits of similar remaining maturities.

Long-term borrowings

The fair value of long-term borrowings is estimated by discounting the future cash flows using estimates of the current market rate for instruments with similar terms and remaining maturities.

Commitments to extend credit and standby letters of credit

The fair values of commitments to extend credit are estimated using fees currently charged to enter into similar agreements and the creditworthiness of the customers. The fair values of standby letters of credit are based on fees currently charged for similar agreements or the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

Limitations

Edgar Filing: S Y BANCORP INC - Form 10-Q

The fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market exists for a significant portion of Bancorp's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Therefore, the calculated fair value estimates in many instances cannot be substantiated by comparison to independent markets and, in many cases, may not be realizable in a current sale of the instrument. Changes in assumptions could significantly affect the estimates.

Table of Contents**(15) Regulatory Matters**

Bancorp and the Bank are subject to various capital requirements prescribed by banking regulations and administered by federal banking agencies. Under these requirements, Bancorp and the Bank must meet minimum amounts and percentages of Tier I and total capital, as defined, to risk weighted assets and Tier I capital to average assets. Risk weighted assets are determined by applying certain risk weightings prescribed by the regulations to various categories of assets and off-balance sheet commitments. Capital and risk weighted assets may be further subject to qualitative judgments by regulators as to components, risk weighting and other factors. Failure to meet the capital requirements can result in certain mandatory, and possibly discretionary, corrective actions prescribed by the regulations or determined to be necessary by the regulators, which could materially affect the consolidated financial statements. Bancorp and the Bank met all capital requirements to which they were subject as of September 30, 2011.

The following table sets forth Bancorp's and the Bank's risk based capital amounts and ratios as of September 30, 2011 and December 31, 2010.

September 30, 2011 (Dollars in thousands)	Actual		Minimum For Adequate		Minimum For Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total risk-based capital (1)						
Consolidated	\$ 237,838	14.43%	\$ 131,858	8.00%	NA	NA
Bank	203,665	12.42%	131,185	8.00%	\$ 163,981	10.00%
Tier I risk-based capital (1)						
Consolidated	\$ 207,124	12.56%	\$ 65,963	4.00%	NA	NA
Bank	173,060	10.55%	65,615	4.00%	\$ 98,423	6.00%
Leverage (2)						
Consolidated	\$ 207,124	10.50%	\$ 59,178	3.00%	NA	NA
Bank	173,060	8.81%	58,931	3.00%	\$ 98,218	5.00%
December 31, 2010 (Dollars in thousands)						
Total risk-based capital (1)						
Consolidated	\$ 226,421	13.93%	\$ 130,034	8.00%	NA	NA
Bank	183,562	11.37%	129,155	8.00%	\$ 161,444	10.00%
Tier I risk-based capital (1)						
Consolidated	\$ 196,040	12.06%	\$ 65,022	4.00%	NA	NA
Bank	153,311	9.49%	64,620	4.00%	\$ 96,930	6.00%
Leverage (2)						
Consolidated	\$ 196,040	10.31%	\$ 57,044	3.00%	NA	NA
Bank	153,311	8.12%	56,642	3.00%	\$ 94,403	5.00%

(1) Ratio is computed in relation to risk-weighted assets.

(2) Ratio is computed in relation to average assets.

NA Not applicable. Regulatory framework does not define well capitalized for holding companies.

Table of Contents

The variance between the consolidated and the Bank's capital ratios is largely due to the Bancorp's 2008 issuance of \$30 million of trust preferred securities and a special dividend of \$25 million from the Bank to Bancorp in December 2009 as part of a strategy to minimize state bank taxes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This item discusses the results of operations for S.Y. Bancorp, Inc. (Bancorp or Company), and its subsidiary, Stock Yards Bank & Trust Company (Bank) for the three and nine months ended September 30, 2011 and compares these periods with the same periods of the previous year. Unless otherwise indicated, all references in this discussion to the Bank include Bancorp. In addition, the discussion describes the significant changes in the financial condition of Bancorp and the Bank that have occurred during the first nine months of 2011 compared to the year ended December 31, 2010. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes presented in Part 1, Item 1 of this report.

This report contains forward-looking statements under the Private Securities Litigation Reform Act that involve risks and uncertainties. Although Bancorp believes the assumptions underlying the forward-looking statements contained herein are reasonable, any of these assumptions could be inaccurate. Factors that could cause actual results to differ from results discussed in forward-looking statements include, but are not limited to the following: economic conditions both generally and more specifically in the markets in which Bancorp and the Bank operate; competition for Bancorp's customers from other providers of financial services; government legislation and regulation which change from time to time and over which Bancorp has no control; changes in interest rates; material unforeseen changes in liquidity, results of operations, or financial condition of Bancorp's customers; and other risks detailed in Bancorp's filings with the Securities and Exchange Commission, all of which are difficult to predict and many of which are beyond the control of Bancorp.

Overview of 2011 through September 30

Bancorp completed the first nine months of 2011 with net income of \$17.3 million, which was 2% more than the comparable period of 2010. The increase is primarily due to an improvement in net interest income, largely offset by a higher provision for loan losses, lower non-interest income, and increasing non-interest expenses. Diluted earnings per share for the first nine months of 2011 were \$1.25 compared to the first nine months of 2010 of \$1.23.

Year-over-year total loans increased \$50 million or 3%, and this helped growth in interest income. Increased loan volume more than offset the effect of the declining interest rates on loans and investment securities over the past year. Interest expense declined due to lower funding costs on and a more favorable mix of deposits and borrowings. Rates paid on liabilities decreased more than rates declined on assets, contributing to an increased net interest spread and margin compared to the first nine months of 2010.

Distinguishing Bancorp from other similarly sized community banks is the magnitude of its investment management and trust revenue, making total non-interest income a continuing key contributor to earnings. Income from investment management and trust services, which constitutes an average of 40% of non-interest income, increased 11% for the nine month period primarily due to higher asset values. A significant portion of recurring investment management revenue is earned as a percentage of the market value of the assets under management. While fees are based on market values, they typically do not fluctuate directly with the overall stock market. Accounts typically contain fixed income and equity asset classes, which generally react inversely to each other. As a broad approximation, a 10% drop in the S&P 500 index would decrease fees

approximately 2 - 4%. Nonrecurring fees such as estate, financial planning, insurance, and some retirement fees are not affected by the fluctuations in the market.

Table of Contents

Both bankcard transaction income and brokerage income increased, but were partially offset by decreases in service charges on deposit accounts and other non-interest income including declines in income from the domestic private investment fund. Non-interest income as a percentage of total revenues was 31% in the first nine months of 2011, compared to 33% in the first nine months of 2010. This metric has continued to trend significantly above that of \$1-to-\$2.5 billion publicly traded banks, which as of December 30, 2010, posted average non-interest income as a percentage of total revenue of 21.5%, according to a leading industry data service (2011 peer data is not yet available).

Higher non-interest expense in 2011 was reflected in almost all categories resulting largely from costs of market expansion, renovations of existing facilities and a new operations center.

Also affecting 2011 results, Bancorp's provision for loan losses was \$9.5 million in the first nine months compared to \$7.8 million in the same period of 2010. Management's action to provide for loan losses in 2011 reflected both change in credit quality of loans as well as the increase in charge-offs. The provision for the first nine months of 2011 results from a consistent allowance methodology that is driven by risk ratings. Bancorp's allowance for loan losses was 1.89% of total loans at September 30, 2011, compared with 1.69% of total loans at December 31, 2010, and 1.64% at September 30, 2010.

Tangible common equity (TCE), a non-GAAP measure, is a measure of a company's capital which is useful in evaluating the quality and adequacy of capital. The ratio of tangible common equity to total tangible assets was 9.20% as of September 30, 2011, compared to 8.89% at December 31, 2010. See the Non-GAAP Financial Measures section for details on reconciliation to US GAAP measures.

The following sections provide more details on subjects presented in this overview.

a) Results Of Operations

Net income of \$5,774,000 for the three months ended September 30, 2011 decreased \$591,000, or 9.3%, from \$6,365,000 for the comparable 2010 period. Net income per share was \$0.42 for the third quarter of 2011, compared to \$0.46 for the third quarter of 2010, an 8.7% decrease. Net income per share on a diluted basis was also \$0.42 for the third quarter of 2011, compared to \$0.46 for the third quarter of 2010. Annualized return on average assets and annualized return on average stockholders' equity were 1.16% and 12.59%, respectively, for the third quarter of 2011, compared to 1.35% and 15.25%, respectively, for the same period in 2010.

Net income of \$17,262,000 for the nine months ended September 30, 2011 increased \$360,000, or 2.1%, from \$16,902,000 for the comparable 2010 period. Basic net income per share was \$1.25 for the first nine months of 2011, compared to \$1.24 for the same period of 2010, a 0.8% increase. Net income per share on a diluted basis was also \$1.25 for the first nine months of 2011 compared to \$1.23 for the same period of 2010, an increase of 1.6%. Annualized return on average assets and annualized return on average stockholders' equity were 1.19% and 13.03%, respectively, for the first nine months of 2011, compared to 1.24% and 14.01%, respectively, for the same period in 2010.

Net Interest Income

Edgar Filing: S Y BANCORP INC - Form 10-Q

The following tables present the average balance sheets for the three and nine month periods ended September 30, 2011 and 2010 along with the related calculation of tax-equivalent net interest income, net interest margin and net interest spread for the related periods. See the notes following the tables for further explanation.

Table of Contents**Average Balances and Interest Rates Taxable Equivalent Basis**

(Dollars in thousands)	Average Balances	Three months ended September 30			2010 Interest	Average Rate

Table of Contents

Notes to the average balance and interest rate tables:

- Net interest income, the most significant component of the Bank's earnings is total interest income less total interest expense. The level of net interest income is determined by the mix and volume of interest earning assets, interest bearing deposits and borrowed funds, and changes in interest rates.
- Net interest spread is the difference between the taxable equivalent rate earned on interest earning assets and the rate expensed on interest bearing liabilities.
- Net interest margin represents net interest income on a taxable equivalent basis as a percentage of average interest earning assets. Net interest margin is affected by both the interest rate spread and the level of non-interest bearing sources of funds, primarily consisting of demand deposits and stockholders' equity.
- Interest income on a fully tax equivalent basis includes the additional amount of interest income that would have been earned if investments in certain tax-exempt interest earning assets had been made in assets subject to federal taxes yielding the same after-tax income. Interest income on municipal securities and loans have been calculated on a fully tax equivalent basis using a federal income tax rate of 35%. The approximate tax equivalent adjustments to interest income were \$370,000 and \$383,000, respectively, for the three month periods ended September 30, 2011 and 2010 and \$1,158,000 and \$986,000, respectively, for the nine month periods ended September 30, 2011 and 2010.

Fully taxable equivalent net interest income of \$18.2 million for the three months ended September 30, 2011 increased \$563,000, or 3.2%, from \$17.6 million when compared to the same period last year. Net interest spread and net interest margin were 3.66% and 3.87%, respectively, for the third quarter of 2011 and 3.70% and 3.97%, respectively, for the third quarter of 2010. Historically low interest rates combined with an ongoing higher level of non-accrual loans have pressured loan yields, and the low rates earned on excess liquidity also has had a detrimental effect on margins.

Fully taxable equivalent net interest income of \$53.9 million for the nine months ended September 30, 2011 increased \$3.3 million, or 6.6%, from \$50.5 million when compared to the same period last year. Net interest spread and net interest margin were 3.72% and 3.95%, respectively, for the first nine months of 2011 and 3.66% and 3.93%, respectively, for the first nine months of 2010.

Approximately \$613 million, or 40%, of the Bank's loans are variable rate and most of these loans are indexed to the Bank's prime rate and may reprice as the prime rate changes. However, approximately \$440 million, or 72%, of variable rate loans, have reached their contractual floor of 4% or higher. Approximately \$103 million, or 17%, of variable rate loans have no contractual floor; however, the Bank intends to establish floors whenever possible upon renewal of the loans. The remaining \$69 million of variable rate loans, or 11% of variable rate loans, have contractual floors below 4%. Most of the Bank's fixed rate loans are priced at inception in relation to the five year Treasury bond and the persistence of low short term rates has held those rates low.

Edgar Filing: S Y BANCORP INC - Form 10-Q

Average earning assets increased \$103.3 million, or 6.0%, to \$1.823 billion for the first nine months of 2011 compared to 2010, reflecting growth in the loan portfolio, investment securities and federal funds sold. Average interest bearing liabilities increased \$50.6 million, or 3.6%, to \$1.448 billion for the first nine months of 2011 compared to 2010 primarily due to increases in interest bearing demand and money market deposits, partially offset by decreases in certificates of deposits and FHLB advances.

Table of Contents**Asset/Liability Management and Interest Rate Risk**

Managing interest rate risk is fundamental for the financial services industry. The primary objective of interest rate risk management is to minimize effects of interest rate changes on net income. Bank management evaluates interest rate sensitivity while attempting to optimize net interest income within the constraints of prudent capital adequacy, liquidity needs, market opportunities and customer requirements.

Interest Rate Simulation Sensitivity Analysis

Bancorp uses an earnings simulation model to estimate and evaluate the impact of changing interest rates on earnings. The simulation model is designed to reflect the dynamics of interest earning assets, interest bearing liabilities and off-balance sheet financial instruments. By estimating the effects of interest rate increases and decreases, the model can reveal approximate interest rate risk exposure. The simulation model is used by management to gauge approximate results given a specific change in interest rates at a given point in time. The model is therefore a tool to indicate earnings trends in given interest rate scenarios and does not indicate actual expected results. The September 30, 2011 simulation analysis, which shows very little interest rate sensitivity, indicates that an increase in interest rates of 100 to 200 basis points would have a slightly negative effect on net interest income, and a decrease of 100 basis points in interest rates would have a slightly negative impact. These estimates are summarized below.

	Net interest income change
Increase 200bp	(0.64)%
Increase 100bp	(1.80)
Decrease 100bp	(0.42)
Decrease 200bp	(3.03)

Loans indexed to the prime rate, with floors of 4% or higher, comprise approximately 30% of total loans. Since the prime rate is currently 3.25%, rates would have to increase more than 75 bp before the rates on such loans will rise. This effect, captured in our simulation analysis above, negatively impacts the effect of rising rates. Analysis of rates increasing 300 bp or higher indicates a positive effect on net interest income.

The scenario of rates decreasing 200 bp is not reasonably possible given current low rates for short-term instruments and most deposits. In the third quarter of 2011, the Federal Reserve noted that they anticipate that economic conditions including low rates of resource utilization and a subdued outlook for inflation over the medium run are likely to warrant exceptionally low levels for the federal funds rate at least through mid-2013.

Undesignated derivative instruments described in Note 13 are recognized on the consolidated balance sheet at fair value, with changes in fair value, due to changes in prevailing interest rates, recorded in other noninterest income. Because of matching terms of offsetting contracts, in addition to collateral provisions which mitigate the impact of non-performance risk, changes in fair value subsequent to initial recognition have a minimal effect on earnings, and are therefore not included in the simulation analysis results above.

Provision for Loan Losses

The provision for loan losses was \$9.5 million for the first nine months of 2011 compared to \$7.8 million for the same period in 2010, and \$4.1 million for the third quarter of 2011 compared to \$2.7 million in the third quarter of 2010, which reflected both the increase in non-performing loans as well as the increase in net charge-offs. The provision for loan losses is calculated after considering credit quality factors, and

Table of Contents

ultimately relies on an overall internal analysis of the risk in the loan portfolio. The provision reflects an allowance methodology that is driven by risk ratings. Bancorp intends to remain cautious in assessing the potential risk in the loan portfolio. Accordingly, Bancorp expects the allowance for loan losses to remain at a high level compared with historic amounts until there are clearer signs of a sustained economic recovery and improvement in our customers' financial conditions and, thus, a reduction in overall credit risk. Management utilizes loan grading procedures which result in specific allowance allocations for the estimated inherent risk of loss. For all loans graded, but not individually reviewed, a general allowance allocation is computed using factors typically developed over time based on actual loss experience. The specific and general allocations plus consideration of qualitative factors represent management's best estimate of probable losses contained in the loan portfolio at the evaluation date. Although the allowance for loan losses is comprised of specific and general allocations the entire allowance is available to absorb any credit losses. Based on this detailed analysis of credit risk, management considers the allowance for loan losses adequate to cover probable losses inherent in the loan portfolio at September 30, 2011.

An analysis of the changes in the allowance for loan losses and selected ratios for the three and nine month periods ended September 30, 2011 and 2010 follows:

(Dollars in thousands)	Three months ended September 30		Nine months ended September 30	
	2011	2010	2011	2010
Balance at the beginning of the period	\$ 27,564	\$ 22,933	\$ 25,543	\$ 20,000
Provision for loan losses	4,100	2,695	9,500	7,774
Loan charge-offs, net of recoveries	(2,598)	(1,195)	(5,977)	(3,341)
Balance at the end of the period	\$ 29,066	\$ 24,433	\$ 29,066	\$ 24,433
Average loans, net of unearned income	\$ 1,541,899	\$ 1,484,741	\$ 1,526,296	\$ 1,461,179
Provision for loan losses to average loans (1)	0.27%	0.18%	0.62%	0.53%
Net loan charge-offs to average loans (1)	0.17%	0.08%	0.39%	0.23%
Allowance for loan losses to average loans	1.89%	1.65%	1.90%	1.67%
Allowance for loan losses to period-end loans	1.89%	1.64%	1.89%	1.64%

(1) Amounts not annualized

Loans are charged off when deemed uncollectible and typically after underlying collateral has been liquidated; however, collection efforts continue and future recoveries may occur.

Edgar Filing: S Y BANCORP INC - Form 10-Q

Table of Contents

An analysis of net charge-offs by loan category for the three and nine month periods ended September 30, 2011 and 2010 follows:

(in thousands) Net loan charge-offs (recoveries)	Three Months Ended September 30		Nine Months Ended September 30	
	2011	2010	2011	2010
Commercial and industrial	\$ 154	\$ (5)	\$ 950	\$ 781
Construction and development	(2)	537	1,225	835
Real estate mortgage - commercial investment	133	357	753	806
Real estate mortgage - owner occupied commercial	2,011		2,135	235
Real estate mortgage - 1-4 family residential	16		322	260
Home equity	204	232	403	305
Consumer	82	74	189	119
Total net loan charge-offs	\$ 2,598	\$ 1,195	\$ 5,977	\$ 3,341

The majority of the third quarter 2011 charge-offs arose from the same owner-occupied commercial real estate loan placed on non-accrual status. See the Non-Performing Loans and Assets section below.

Non-interest Income and Expenses

The following table sets forth the major components of non-interest income and expenses for the three and nine month periods ended September 30, 2011 and 2010.

(In thousands)	Three months ended September 30		Nine months ended September 30	
	2011	2010	2011	2010
Non-interest income:				
Investment management and trust services	\$ 3,347	\$ 3,045	\$ 10,545	\$ 9,538
Service charges on deposit accounts	2,167	2,250	6,125	6,435
Bankcard transaction revenue	945	837	2,782	2,451
Gains on sales of mortgage loans held for sale	574	601	1,397	1,431
Gains on sales of securities available for sale		159		159
Brokerage commissions and fees	570	525	1,613	1,484
Bank owned life insurance income	257	251	761	742
Other	(2)	594	792	1,921
Total non-interest income	\$ 7,858	\$ 8,262	\$ 24,015	\$ 24,161
Non-interest expenses:				
Salaries and employee benefits	\$ 7,528	\$ 8,197	\$ 24,576	\$ 24,605
Net occupancy expense	1,314	1,136	3,901	3,708
Data processing expense	1,283	1,119	3,766	3,578
Furniture and equipment expense	306	316	998	951
FDIC insurance expense	339	498	1,299	1,500
Other	2,532	2,643	8,314	7,706

Edgar Filing: S Y BANCORP INC - Form 10-Q

Total non-interest expenses	\$	13,302	\$	13,909	\$	42,854	\$	42,048
-----------------------------	----	--------	----	--------	----	--------	----	--------

Table of Contents

Total non-interest income decreased \$404,000, or 4.9%, for the third quarter of 2011 and decreased \$146,000, or 0.6% for the first nine months of 2011, compared to the same periods in 2010.

Investment management and trust services income increased \$302,000, or 9.9% in the third quarter of 2011 and \$1,007,000, or 10.6% for the first nine months of 2011, as compared to the same periods in 2010, primarily due to the effect of an increased market value of assets under management as a result of growth in net new accounts. Most recurring fees earned for managing accounts are based on a percentage of market value on a monthly basis. Trust assets under management at September 30, 2011 were \$1.72 billion, compared to \$1.58 billion at September 30, 2010.

Service charges on deposit accounts decreased \$83,000, or 3.7%, in the third quarter of 2011, and \$310,000, or 4.8%, for the first nine months of 2011, as compared to the same periods in 2010. Service charge income is driven by transaction volume, which can fluctuate throughout the year. Recent legislation required that our customers opt in to access their overdraft protection beginning in the third quarter of 2010. Management believes this requirement has resulted in fewer overdrafts and a corresponding decline in service charge income in 2011.

Bankcard transaction revenue increased \$108,000, or 12.9%, in the third quarter of 2011, and \$331,000, or 13.5%, for the first nine months of 2011, as compared to the same periods in 2010 and primarily represents income the Bank derives from customers use of debit cards. Results in 2011 compared favorably to 2010 as bankcard transaction volume continues to increase. Most of this revenue is interchange income based on rates set by service providers in a competitive market. Beginning in October 2011, this rate will be set by the Federal Reserve Board for banks with over \$10 billion in assets. While this threshold indicates we will not be directly affected, this change could indirectly affect Bancorp. While there are many uncertainties about its effect or ultimately when these changes may take place, the Dodd-Frank legislation may negatively affect this source of income.

The Bank's mortgage banking division originates residential mortgage loans to be sold in the secondary market. Interest rates on the loans sold are locked with the borrower and investor prior to closing the loans, thus Bancorp bears no interest rate risk related to these loans. The division offers conventional, VA and FHA financing, for purchases and refinances, as well as programs for low-income and first time home buyers. The mortgage banking division also offers home equity conversion mortgages or reverse mortgages insured by the U.S. Department of Housing and Urban Development (HUD). These HUD loans give homeowners 62 years of age or older a vehicle for converting equity in their homes to cash. Gains on sales of mortgage loans were virtually unchanged in the quarter and nine month periods ended September 30, 2011 compared to the same periods in 2010. Interest rates on mortgage loans directly impact the volume of business transacted by the mortgage banking division. Prevailing mortgage interest rates decreased in the third quarter of 2011 and refinance volume increased late in the quarter.

Brokerage commissions and fees increased \$45,000, or 8.6%, in the third quarter of 2011, and \$129,000 or 8.7%, for the first nine months of 2011, as compared to the same period in 2010. These increases corresponded to higher overall brokerage volume. Bancorp deploys its brokers primarily through its branch network, while larger managed accounts are serviced in the investment management and trust department.

Bank owned life insurance (BOLI) income totaled \$257,000 and \$251,000 for the third quarter of 2011 and 2010, respectively, and totaled \$761,000 and \$742,000 for the first nine months of 2011 and 2010, respectively. BOLI represents the cash surrender value for life insurance policies on certain key employees who have provided consent for the Bank to be the beneficiary of a portion of such policies. The related increase in cash surrender value and any proceeds received under the policies, none of which have

Table of Contents

occurred to date, are recorded as non-taxable non-interest income. This income helps offset the cost of employee benefits.

In the third quarter of 2010, for tax planning purposes, Bancorp sold securities resulting in gains totaling \$159,000. There were no sales of securities in 2011.

Other non-interest income decreased \$596,000, or 100.3%, in the third quarter of 2011 as compared to the same period in 2010, and \$1,129,000, or 58.8%, in the first nine months of 2011 as compared to the same period in 2010, primarily due to a decrease in income from the domestic private investment fund and a variety of other factors, none of which were individually significant. Bancorp's investment in a domestic private investment fund is comprised of bank and other financial industry securities, and is recorded using the equity method of accounting.

Total non-interest expenses decreased \$607,000, or 4.4%, for the third quarter of 2011 as compared to the same period in 2010 and increased \$806,000, or 1.9%, for the first nine months of 2011 as compared to the same period in 2010. Bancorp's third quarter 2011 efficiency ratio was 51.13% compared with 56.29% in the second quarter of 2011 and 53.79% in the third quarter last year.

Salaries and employee benefits decreased \$669,000, or 8.2%, for the third quarter of 2011 primarily due to reversals of accruals of performance-based bonuses, as Bancorp has not achieved specified performance thresholds. Salaries and employee benefits decreased \$29,000, or 0.1%, for the first nine months of 2011, as compared to the same periods of 2010. At September 30, 2011, Bancorp had 468 full time equivalent (FTE) employees compared to 473 at September 30, 2010. Bancorp has several open positions at September 30, 2011, and expects the number of FTE employees to increase as those are filled.

Net occupancy expense increased \$178,000, or 15.7%, in the third quarter of 2011, and \$193,000, or 5.2% in the first nine months of 2011, as compared to the same periods of 2010, largely due to the costs of a new operations center. Data processing expense increased \$164,000, or 14.7% in the third quarter of 2011, and \$188,000, or 5.3% for the first nine months of 2011, compared to the same periods of 2010, primarily due to data processing costs related to investment management and trust services. Furniture and equipment expense decreased \$10,000 or 3.2% for the third quarter of 2011, and increased \$47,000, or 4.9% for the first nine months of 2011, as compared to the same periods in 2010.

FDIC insurance expense declined \$159,000, or 31.9%, for the third quarter of 2011, and \$201,000 or 13.4% for the first nine months of 2011, as compared to the same periods in 2010. The decreases are due to a change in the base on which the assessment is calculated combined with lower assessment rates in 2011.

Other non-interest expenses decreased \$111,000 or 4.2% in the third quarter of 2011, and increased \$608,000 or 7.9% in the first nine months of 2011, as compared to the same periods in 2010. The increase for the nine months period was due largely to \$400,000 write-down on a previously foreclosed property, and \$312,000 write-down of fixed assets related to a building renovation. This category also includes legal and professional fees, MSR amortization, advertising, printing, mail and telecommunications, none of which had variances which were individually significant.

Income Taxes

Edgar Filing: S Y BANCORP INC - Form 10-Q

In the third quarter of 2011, Bancorp recorded income tax expense of \$2,472,000, compared to \$2,507,000 for the same period in 2010. The effective rate for the three month period was 30.0% in 2011 and 28.3% in 2010. Bancorp recorded income tax expense of \$7,115,000 for the first nine months of 2011, compared to \$6,992,000 for the same period in 2010. The effective rate for the nine month period was 29.2% in 2011

Table of Contents

and 29.3% in 2010. The increase in the effective tax rate from the quarter ended September 30, 2010 to the quarter ended September 30, 2011 was primarily related to decreases in the non-taxable income for cash value of life insurance in 2011, while this generated non-taxable income in 2010.

Commitments

Bancorp utilizes a variety of financial instruments in the normal course of business to meet the financial needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. A discussion of Bancorp's commitments is included in Note 8.

Other commitments discussed in Bancorp's Annual Report on Form 10-K for the year ended December 31, 2010, have not materially changed since that report was filed, relative to qualitative and quantitative disclosures of fixed and determinable contractual obligations.

b) Financial Condition

Balance Sheet

Total assets increased \$85.0 million, or 4.5%, from \$1.903 billion on December 31, 2010 to \$1.988 billion on September 30, 2011. Contributors of the increase in assets were loans, which increased \$30.6 million in the first nine months, and investment securities, which increased \$41.6 million as a result of purchasing short-term securities.

Total liabilities increased \$71.3 million, or 4.1%, from \$1.733 billion on December 31, 2010 to \$1.804 billion on September 30, 2011. The most significant component of the increase was in deposits of \$83.1 million or 5.6% in support of asset growth. Securities sold under agreement to repurchase increased \$9.7 million or 16.2%, while federal funds purchased decreased \$12.0 million or 47.3%. Other liabilities decreased \$8.6 million or 17.1%. In December 2010, Bancorp purchased \$4.9 million of securities for which payment was due in January 2011, resulting in a payable recorded in other liabilities.

Elements of Loan Portfolio

The following table sets forth the major classifications of the loan portfolio.

(In thousands)
Loans by Type

September 30, 2011

December 31, 2010

Edgar Filing: S Y BANCORP INC - Form 10-Q

Commercial and industrial	\$	381,644	\$	343,956
Construction and development		152,891		159,482
Real estate mortgage:				
Commercial investment		362,498		362,904
Owner occupied commercial		328,893		316,291
1-4 family residential		158,594		157,983
Home equity - first lien		38,766		39,449
Home equity - junior lien		81,143		91,813
Subtotal: Real estate mortgage		969,894		968,440
Consumer		34,626		36,547
Total loans	\$	1,539,055	\$	1,508,425

Table of Contents

Bancorp enters into loan participation agreements with downstream correspondent banks in the ordinary course of business to diversify credit risk. For certain participation loans, as the lead lender, Bancorp has retained effective control of the loans, typically by restricting the participating institutions from pledging or selling their share of the loan without permission from Bancorp. US GAAP requires these loans to be recorded as secured borrowings. These loans are included in the loan totals above, and a corresponding liability is recorded in other liabilities. At September 30, 2011 and December 31, 2010, the total loans of this nature were \$30.4 million and \$34.8 million, respectively.

Non-performing Loans and Assets

Information summarizing non-performing assets, including non-accrual loans follows:

(Dollars in thousands)	September 30, 2011	December 31, 2010
Non-accrual loans	\$ 22,673	\$ 14,388
Troubled debt restructuring	3,931	2,882
Loans past due 90 days or more and still accruing	1,290	2,044
Non-performing loans	27,894	19,314
Foreclosed real estate	8,165	5,445
Non-performing assets	\$ 36,059	\$ 24,759
Non-performing loans as a percentage of total loans	1.81%	1.28%
Non-performing assets as a percentage of total assets	1.81%	1.30%
Allowance for loan losses as a percentage of non-performing loans	104%	132%

Non-performing loans, which include non-accrual loans of \$22.7 million, loans past due over 90 days and still accruing of \$1.3 million, and loans accounted for as troubled debt restructuring of \$3.9 million, totaled \$27.9 million at September 30, 2011. Non-performing loans were \$19.3 million at December 31, 2010 including \$14.4 million of non-accrual loans, \$2.0 million of loans past due over 90 days and still accruing and loans accounted for as troubled debt restructuring (TDR) of \$2.9 million. The increase in non-accrual loans from the previous quarter primarily reflected the addition of a single owner-occupied commercial real estate loan that transitioned to non-performing status after an extended period of time on Bancorp's watch list. Bancorp believes this credit is now moving toward an orderly liquidation. All loans past due over 90 days and still accruing are well-collateralized and are in the process of collection. Non-performing loans represent 1.81% of total loans at September 30, 2011 compared to 1.28% at December 31, 2010. As noted in the Provision for Loan Losses section of this report, non-performing loans are analyzed in management's evaluation of the allowance and provision for loan losses.

Table of Contents

The following table sets forth the major classifications of non-accrual loans:

(in thousands)		
Non-accrual loans by type	September 30, 2011	December 31, 2010
Commercial and industrial	\$ 3,191	\$ 2,328
Construction and development	5,479	4,589
Real estate mortgage:		
Commercial investment	3,678	3,214
Owner occupied commercial	6,399	1,426
1-4 family residential	3,443	1,984
Home equity	387	570
Subtotal: Real estate mortgage	13,907	7,194
Consumer	96	277
Total loans	\$ 22,673	\$ 14,388

The increase in non-accrual loans from the second quarter of 2011 primarily reflected the impact of a single owner-occupied commercial real estate loan that transitioned to non-performing status as described above. However, thus far, the increase in these non-accrual loans has been confined to a relatively small number of borrowers within the portfolio. As of September 30, 2011, Bancorp has eight borrowers, all in our primary market, who account for \$16.3 million or 72% of total non-accrual loans. Each of these loans is secured by real estate or business assets, and management's estimated exposure is considered in the allowance for loan losses methodology.

Effects of Declines in Real Estate Collateral Values

Bancorp's principal market, Louisville, has had home values decline less than most markets nationwide according to the Federal Housing Finance Agency. However, continued decline in collateral values, including commercial properties, impacts Bancorp's ability to collect on certain real estate loans when borrowers are dependent on the values of the real estate as a source of cash flow. As borrowers experience difficulty, Bancorp evaluates their cash flow as well as the collateral value to determine prospects for collection. On an individual basis, loans are evaluated for changes in risk ratings, thereby affecting the provision and allowance for loan losses. Home equity loans are typically underwritten with consideration of the borrower's overall financial strength as a primary payment source, with some reliance on the value of the collateral. Bancorp typically requires appraisals on real estate at application and evaluates the transaction upon renewal to determine if market conditions and other factors such as cash flow warrant an updated valuation. Additionally, Bancorp evaluates the collateral condition and value upon classification as an impaired loan and upon foreclosure. Due to the above factors, the effects of declines in real estate collateral value have been considered in the allowance for loan losses.

c) *Liquidity*

The role of liquidity is to ensure that funds are available to meet depositors' withdrawals and borrowers' demands to fund credit commitments. This is accomplished by balancing changes in demand for funds with changes in the supply of those funds. Liquidity is provided by short-term liquid assets that can be converted to cash, investment securities available for sale, various lines of credit available to Bancorp, and the ability to attract funds from external sources, principally deposits. Management has maintained a

Table of Contents

significantly higher liquidity position in 2010 and 2011, because of the difficult economic environment, low loan demand, and large influxes of cash from depositors. When economic conditions improve and rates rise, Management expects higher utilization of lines of credit and potential cash outflow as customers seek alternatives to high cash balances. This would result in greater demand for liquidity. Management believes it has the ability to increase time deposits fairly quickly by offering rates slightly higher than the market rate and due to the Bancorp's relatively low market share.

Bancorp's most liquid assets are comprised of available for sale marketable investment securities and federal funds sold. Federal funds sold totaled \$25.1 million at September 30, 2011. These investments normally have overnight maturities and are used for general daily liquidity purposes. The fair value of the available for sale investment portfolio was \$287.0 million at September 30, 2011, and included an unrealized net gain of \$9.2 million. The portfolio includes maturities of approximately \$85.5 million over the next twelve months, which, combined with federal funds sold, offer substantial resources to meet either new loan demand or reductions in Bancorp's deposit funding base. Bancorp pledges portions of its investment securities portfolio to secure public fund deposits, trust deposits and securities sold under agreements to repurchase. At September 30, 2011, total investment securities pledged for these purposes comprised 42% of the available for sale investment portfolio, leaving \$165.2 million of unpledged securities.

Bancorp has a large base of core customer deposits, defined as demand, savings, and money market deposit accounts. At September 30, 2011, such deposits totaled \$1.159 billion and represented 74% of Bancorp's total deposits. Because these core deposits are less volatile and are often tied to other products of Bancorp through long lasting relationships they do not put heavy pressure on liquidity. However, many of our deposit balances are higher than usual. When market conditions improve, these balances will likely decrease, putting some strain on our liquidity position. As of September 30, 2011, Bancorp had only \$5.9 million or 0.4% of total deposits, in brokered deposits, which are entirely comprised of Certificate of Deposit Account Registry Service (CDARs) deposits, a program which allows Bancorp to accept customer deposits in excess of FDIC limits through reciprocal agreements with other network participating banks in order to offer FDIC insurance up to as much as \$50 million in deposits.

With regard to credit available to Bancorp, the Bank is a member of the Federal Home Loan Bank of Cincinnati (FHLB). As a member, the Bank has access to credit products of the FHLB. As of September 30, 2011, the Bank's additional borrowing capacity with the FHLB was approximately \$113.1 million. Additionally, the Bank had federal funds purchased lines with correspondent banks totaling \$85.0 million.

Bancorp's liquidity depends primarily on the dividends paid to it as the sole shareholder of the Bank. Bancorp had sufficient cash on hand from its 2008 trust preferred securities offering that it was not necessary for the Bank to fund 2010 quarterly cash dividends or the quarterly interest payments on its trust preferred securities. At September 30, 2011, the Bank may pay up to \$36.3 million in dividends to Bancorp without regulatory approval. Prior to the declaration of dividends, management considers the effect such payments will have on total stockholders' equity and capital ratios.

d) Capital Resources

At September 30, 2011, stockholders' equity totaled \$183.6 million, an increase of \$13.7 million since December 31, 2010. See the Consolidated Statement of Changes in Stockholders' Equity for further detail of the changes in equity since the end of 2010. Accumulated other comprehensive income which, for Bancorp, consists of net unrealized gains and losses on securities available for sale and a minimum pension

Table of Contents

liability adjustment, net of taxes, totaled \$5.7 million at September 30, 2011 and \$3.1 million at December 31, 2010. The change since year end is a reflection of maturities within the investment portfolio and the effect of change in interest rates on the valuation of the Bank's portfolio of securities available for sale. The unrealized pension liability is adjusted annually by reference to updated actuarial data.

Bank holding companies and their subsidiary banks are required by regulators to meet risk based capital standards. These standards, or ratios, measure the relationship of capital to a combination of balance sheet and off-balance sheet risks. The values of both balance sheet and off-balance sheet items are adjusted to reflect credit risks. To be categorized as well capitalized, the Bank must maintain a total risk-based capital ratio of at least 10%; a Tier 1 ratio of at least 6%; and a leverage ratio of at least 5%. The following table sets forth Bancorp's and the Bank's risk based capital ratios as of September 30, 2011 and December 31, 2010.

	September 30, 2011	December 31, 2010
Total risk-based capital (1)		
Consolidated	14.43%	13.93%
Bank	12.42%	11.37%
Tier I risk-based capital (1)		
Consolidated	12.56%	12.06%
Bank	10.55%	9.49%
Leverage (2)		
Consolidated	10.50%	10.31%
Bank	8.81%	8.12%

(1) Ratio is computed in relation to risk-weighted assets.

(2) Ratio is computed in relation to average assets.

Importantly, the strengthening of Bancorp's capital position has occurred concurrently with growth in assets, not as a result of shrinkage of the balance sheet. Bancorp intends to maintain capital ratios at these historically high levels at least until such time as the economy demonstrates sustained improvement.

The variance between the consolidated and the Bank's capital ratios is largely due to the Bancorp's 2008 issuance of \$30 million of trust preferred securities and a special dividend of \$25 million from the Bank to Bancorp in December 2009 as part of a strategy to minimize state bank taxes.

e) *Non-GAAP Financial Measures*

Edgar Filing: S Y BANCORP INC - Form 10-Q

In addition to capital ratios defined by banking regulators, Bancorp considers various ratios when evaluating capital adequacy, including tangible common equity to tangible assets, and tangible common equity per share, all of which are non-GAAP measures. Bancorp believes these ratios are important because of their widespread use by investors as means to evaluate capital adequacy, as they reflect the level of capital available to withstand unexpected market conditions. Because US GAAP does not include capital ratio measures, there are no US GAAP financial measures comparable to these ratios.

Table of Contents

The following table reconciles Bancorp's calculation of the measures to amounts reported under US GAAP.

(in thousands, except per share data)	September 30, 2011		December 31, 2010	
Total equity (a)	\$	183,553	\$	169,861
Less goodwill		(682)		(682)
Tangible common equity (c)	\$	182,871	\$	169,179
Total assets (b)	\$	1,987,954		1,902,945
Less goodwill		(682)		(682)
Total tangible assets (d)	\$	1,987,272	\$	1,902,263
Total shareholders' equity to total assets (a/b)		9.23%		8.93%
Tangible common equity ratio (c/d)		9.20%		8.89%
Number of outstanding shares (e)		13,801		13,737
Book value per share (a/e)	\$	13.30	\$	12.37
Tangible common equity per share (c/e)		13.25		12.32

f) Recently Issued Accounting Pronouncements

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other*, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test. The ASU is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of ASU 2011-08 is not expected to have an impact on Bancorp's financial statements.

In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (Topic 820)-Fair Value Measurement* (ASU 2011-04), to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting Standards. ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements particularly for level 3 fair value measurements. ASU 2011-04 is effective for Bancorp in its first quarter of fiscal 2012 and will be applied prospectively. Bancorp is evaluating the impact of ASU 2011-04, but currently believes there will be no significant impact on its consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Information required by this item is included in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of ContentsItem 4. Controls and Procedures

Bancorp maintains disclosure controls and procedures designed to ensure that it is able to collect the information it is required to disclose in reports it files with the Securities and Exchange Commission (SEC), and to record, process, summarize and report this information within the time periods specified in the rules and forms of the SEC. Based on their evaluation of Bancorp's disclosure controls and procedures as of the end of the quarterly period covered by this report, the Chief Executive and Chief Financial Officers believe that these controls and procedures are effective to ensure that Bancorp is able to collect, process and disclose the information it is required to disclose in reports it files with the SEC within the required time periods.

Based on the evaluation of Bancorp's disclosure controls and procedures by the Chief Executive and Chief Financial Officers, there were no significant changes during the quarter ended September 30, 2011 in Bancorp's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, Bancorp's internal control over financial reporting.

PART II OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table shows information relating to the repurchase of shares of common stock by Bancorp during the three months ended September 30, 2011.

	Total number of Shares Purchased (1)	Average price Paid Per Share	Total number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Shares that May Yet Be Purchased Under the Plan (2)
July 1 - July 31	9	\$ 23.97		
August 1 - August 31				
September 1 - September 30				
Total	9	\$ 23.97		

(1) Third quarter 2011 activity represents shares of stock withheld to pay taxes due upon the exercise of stock appreciation rights. This activity has no impact on the number of shares that may be purchased under a Board-approved plan.

(2) The Board of Directors of S.Y. Bancorp Inc. first approved a share buyback plan in 1999, and subsequently expanded the plan to allow for the repurchase of additional shares. The stock repurchase program expired in November 2008 and has not been renewed.
