## NATIONAL PRESTO INDUSTRIES, INC., AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE A EARNINGS PER SHARE

The Company's basic net earnings per share amounts have been computed by dividing net earnings by the weighted average number of outstanding common shares. The Company's diluted net earnings per share is computed by dividing net earnings by the weighted average number of outstanding common shares and common share equivalents relating to stock options, when dilutive.

NOTE B RECLASSIFICATIONS

Certain reclassifications have been made to the prior period's financial statements to conform to the current period's financial statement presentation. These reclassifications did not affect net earnings or stockholders' equity as previously reported.

NOTE C BUSINESS SEGMENTS

In the following summary, operating profit (loss) represents earnings (loss) before other income, principally interest income and income taxes. The Company's segments operate discretely from each other with no shared manufacturing facilities. Costs associated with corporate activities (such as cash and marketable securities management) and the assets associated with such activities are included within the Housewares/Small Appliances segment for all periods presented.

**NOTE D - CASH, CASH EQUIVALENTS AND MARKETABLE SECURITIES**

The Company considers all highly liquid marketable securities with an original maturity of three months or less to be cash equivalents. Cash equivalents include money market funds. The Company deposits its cash in high quality financial institutions. The balances, at times, may exceed federally insured limits. Money market funds are reported at fair value determined using quoted prices in active markets for identical securities (Level 1, as defined by Statement of Financial Accounting Standards No. 157, *Fair Value Measurements*).

The Company has classified all marketable securities as available-for-sale, which requires the securities to be reported at fair value, with unrealized gains and losses, net of tax, reported as a separate component of stockholders' equity. Highly liquid, tax-exempt variable rate demand notes with put options exercisable in three months or less are classified as marketable securities.

At July 5, 2009 and December 31, 2008, cost for marketable securities was determined using the specific identification method. A summary of the amortized costs and fair values of the Company's marketable securities at the end of the periods presented is shown in the table below. Fair values are determined using significant other observable inputs (Level 2, as defined by Statement of Financial Accounting Standards No. 157, *Fair Value Measurements*), which include quoted prices in markets that are not active, quoted prices of similar securities, or other inputs that are observable.

(In Thousands)

**MARKETABLE SECURITIES**

	<b>Amortized</b>	<b>Fair</b>	<b>Gross</b>	<b>Gross</b>
	<b>Cost</b>	<b>Value</b>	<b>Unrealized</b>	<b>Unrealized</b>
			<b>Gains</b>	<b>Losses</b>
<b>July 5, 2009</b>				
Tax-exempt Government Bonds	\$ 111,376	\$ 112,186	\$ 832	\$ 22
<b>December 31, 2008</b>				
Tax-exempt Government Bonds	\$ 120,392	\$ 121,217	\$ 833	\$ 8

The Company considers the declines in market value of its marketable securities to be temporary in nature. The unrealized losses on the Company's marketable securities, which are insignificant in relation to total marketable securities, were caused primarily by changes in market interest rates. The Company typically invests in highly-rated securities with the objective of minimizing the potential risk of principal loss. When evaluating the investments for other-than-temporary impairment, the Company reviews factors such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer and any changes thereto, and the Company's intent to sell, or whether it is more likely than not it will be required to sell, the investment before recovery of the investment's amortized cost basis. During the three- and six-month periods ended July 5, 2009 and June 29, 2008, the Company did not recognize any impairment charges on outstanding securities. As of July 5, 2009, the Company does not consider any of its investments to be other-than-temporarily impaired.

Proceeds from sales of marketable securities totaled \$26,504,000 and \$48,904,000 for the three and six month periods ended July 5, 2009, respectively. There were no gross gains or losses related to sales of marketable securities during the same periods. Net unrealized gains (losses) are reported as a separate component of accumulated other comprehensive income and were gains (losses) of (\$294,000) and (\$16,000) before taxes for the three and six month periods ended July 5, 2009, respectively. No unrealized gains were reclassified out of accumulated other comprehensive income during the same periods.

The contractual maturities of the marketable securities held at July 5, 2009 are as follows: \$30,998,000 within one year; \$51,123,000 beyond one year to five years; \$7,831,000 beyond five years to ten years, and \$22,234,000 beyond ten years. All of the instruments in the beyond five year ranges, as well as a limited number of instruments in the shorter maturity ranges, are variable rate demand notes which can be tendered for cash at par plus interest within seven days. Despite the stated contractual maturity date, to the extent a tender is not honored, the notes become immediately due and payable.

#### NOTE E COMMITMENTS AND CONTINGENCIES

The Company is involved in largely routine litigation incidental to its business. Management believes the ultimate outcome of the litigation will not have a material effect on the Company's consolidated financial position, liquidity, or results of operations.

#### NOTE F ACCUMULATED OTHER COMPREHENSIVE INCOME

The \$526,000 of accumulated comprehensive income at July 5, 2009 reflects the unrealized gain, net of tax, of available-for-sale marketable security investments. Total comprehensive income net of tax effect was \$13,155,000 and \$9,451,000 for the three-month periods ended July 5, 2009 and June 29, 2008, respectively, \$24,190,000 and 15,927,000 for the six-month periods ended July 5, 2009 and June 29, 2008, respectively.

#### NOTE G FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of cash and cash equivalents, accounts receivable, trade accounts payable and accrued liabilities approximates carrying value due to the short-term nature of these instruments.

#### NOTE H ADOPTION OF NEW ACCOUNTING STANDARDS

##### FSP FAS 107-1 and APB 28-1

In April 2009, the Financial Accounting Standards Board ( FASB ) issued FASB Staff Position ( FSP ) No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. FSP FAS 107-1 and APB 28-1 amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial

statements. This FSP also amends APB Opinion No. 28, *Interim Financial Reporting*, to require those disclosures in summarized financial information at interim reporting periods. FSP FAS 107-1 and APB 28-1 is effective for interim and annual reporting periods ending after June 15, 2009, and is to be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company adopted FSP FAS 107-1 and APB 28-1 during the first quarter of 2009. The adoption of FSP FAS 107-1 and APB 28-1 did not have a significant impact on the Company's consolidated financial statements.

FSP FAS 115-2 and FAS 124-2

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. The objective of an other-than-temporary impairment analysis under existing U.S. generally accepted accounting principles (GAAP) is to determine whether the holder of an investment in a debt or equity security for which changes in fair value are not regularly recognized in earnings (such as securities classified as held-to-maturity or available-for-sale) should recognize a loss in earnings when the investment is impaired. An investment is impaired if the fair value of the investment is less than its amortized cost basis. FSP FAS 115-2 and FAS 124-2 amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. FSP FAS 115-2 and FAS 124-2 is effective for interim and annual reporting periods ending after June 15, 2009, and is to be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company adopted FSP FAS 115-2 and FAS 124-2 during the first quarter of 2009. The adoption of FSP FAS 115-2 and FAS 124-2 did not result in a cumulative effect adjustment and did not have a significant impact on the Company's consolidated financial statements.

FASB 141(R)

In December 2007, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 141 (revised 2007) *Business Combinations* ("SFAS 141(R)"). SFAS 141(R) retains the fundamental requirements of the original pronouncement requiring that the purchase method be used for all business combinations. SFAS 141(R) defines the acquirer as the entity that obtains control of one or more businesses in the business combination, establishes the acquisition date as the date that the acquirer achieves control and requires the acquirer to recognize the assets acquired, liabilities assumed and any non-controlling interest at their fair values as of the acquisition date. SFAS 141(R) also requires that acquisition-related costs be recognized separately from the acquisition. SFAS 141(R) is effective for fiscal years beginning after December 15, 2008. The Company does not expect the adoption of SFAS 141(R) to have a material impact on its current consolidated financial position and results of operations. However, depending upon the size, nature and complexity of future acquisition transactions, the adoption of SFAS 141(R) could materially impact the Company's consolidated financial statements.

FSP FAS 141(R)-1

In April 2009, the FASB issued FSP No. FAS 141(R)-1 *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies*. FSP FAS 141(R)-1 amends and clarifies FASB Statement No. 141 (revised 2007), *Business Combinations*, to address application issues raised by preparers, auditors, and members of the legal profession on initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. FSP 141(R)-1 is effective for assets or liabilities arising from contingencies in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company does not expect the adoption of FSP 141(R)-1 to have a material impact on its current consolidated financial position and results of operations. However, depending upon the size, nature and complexity of future acquisition transactions, the adoption of FSP 141(R)-1 could materially impact the Company's consolidated financial statements.

FASB 157

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* ("SFAS 157") which defines fair value, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. SFAS 157 requires companies to disclose the fair value of their financial instruments according to a fair value hierarchy that distinguishes between (a) market participant assumptions developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (b) the reporting entity's own

assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). SFAS 157 requires companies to provide additional disclosures based on that hierarchy. SFAS 157 was to be effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. In February 2008, the FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157,

which delayed for one year the applicability of SFAS 157's fair-value measurements to certain nonfinancial assets and liabilities. The Company adopted SFAS 157 as of January 1, 2008, except as it applies to those nonfinancial assets and liabilities affected by the one-year delay. The Company adopted SFAS 157 for certain nonfinancial assets and liabilities as of January 1, 2009. The financial assets of the Company are primarily comprised of cash equivalents, whose fair value was measured using Level 1 observable inputs, and marketable securities, whose fair value was measured using Level 2 observable inputs. The adoption of SFAS 157 did not have a material impact on the Company's consolidated financial position or results of operations.

#### FSP FAS 157-3

In October 2008, the FASB issued FSP 157-3 *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* (FSP 157-3). FSP 157-3 clarifies the application of SFAS No. 157 in a market that is not active, and addresses application issues such as the use of internal assumptions when relevant observable data does not exist, the use of observable market information when the market is not active, and the use of market quotes when assessing the relevance of observable and unobservable data. FSP 157-3 is effective for all periods presented in accordance with SFAS No. 157. The adoption of FSP 157-3 did not have a significant impact on the Company's consolidated financial statements.

#### FSP FAS 157-4

In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. FSP FAS 157-4 provides additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. FSP FAS 157-4 is effective for interim and annual reporting periods ending after June 15, 2009, and is to be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company adopted FSP FAS 157-4 during the first quarter of 2009. The adoption of FSP FAS 157-4 did not have a significant impact on the Company's consolidated financial statements.

#### FASB 160

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51* ("SFAS 160"), which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The Statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS 160 is effective as of the beginning of an entity's fiscal year that begins after December 15, 2008. The Company does not have any noncontrolling interests and, accordingly, the adoption of SFAS No. 160 did not have a material impact on the Company's consolidated financial position or results of operations.

#### FASB 161

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities - an amendment of SFAS No. 133* (SFAS 161) to enhance disclosures about an entity's derivative and hedging activities and improve the transparency of financial reporting. Entities will be required to provide enhanced disclosures about (a) how and why derivatives instruments are used, (b) how derivative instruments are accounted for, and (c) how derivative instruments affect the entity's financial position, financial performance and cash flows. These disclosures better convey the purpose of derivative use in terms of the risks that the entity is intending to manage by requiring fair

value disclosures in a tabular format, providing more information about an entity's liquidity and requiring cross-referencing within the footnotes. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early adoption encouraged. The Company does not hold the applicable derivative instruments and therefore the adoption of SFAS 161 did not have a material impact on the Company's consolidated financial position or results of operations.

### FASB 165

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events* ( SFAS 165 ). The objective of SFAS 165 is to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, this Statement sets forth: 1) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements; 2) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and 3) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. In accordance with this Statement, an entity should apply the requirements to interim or annual financial periods ending after June 15, 2009. The company adopted SFAS 165 during the second quarter of 2009. The adoption of SFAS 165 did not have a material impact on the Company's consolidated financial statements.

### FASB 168

In June 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* ( SFAS 168 ), a replacement of SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, which identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States of America (the GAAP hierarchy). This Statement is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company does not expect the adoption of SFAS 168 will have a material effect on the Company's consolidated financial statements or related disclosures.

### NOTE I PENSION PLAN

Prior to the end of 2008, the Company contributed to a union-sponsored, multi-employer pension plan on behalf of union employees of the Amron division of its AMTEC subsidiary in accordance with the applicable union labor agreement. In December 2008, the union membership voted in favor of a withdrawal from the plan, and an amendment was made to the labor agreement authorizing the withdrawal. In December 2008, the Company permanently ceased to be obligated to contribute to the multi-employer pension plan, and instead agreed to contribute to a Company 401(k) Plan. It is possible in the future under the amendment to the labor agreement, if certain conditions are met, that contributions may be made once again to a pension plan rather than to the 401(k) Plan.

In a letter dated March 30, 2009, the pension plan provided Amron with documentation stating that the cost to withdraw from the plan was \$238,509. In April 2009, a payment representing the settlement of the withdrawal liability was made in the same amount. However, should all participants in the plan withdraw within the next two years, some portion of the plan liability could be reallocated to AMTEC. If that were to occur, AMTEC might be assessed retroactively for an additional withdrawal charge. The amount of a potential additional withdrawal charge, if any, cannot be currently estimated.

### NOTE J SUBSEQUENT EVENTS

On July 31, 2009, the term of the contract between the Company and the Absorbent Products segment's major customer expired. The Company is continuing its program to diversify its customer base. Discussions with the major customer are also ongoing.

The Company has evaluated events occurring after the balance sheet date through August 13, 2009, the date the financial statements were issued, to ensure appropriate disclosure of events recognized in the financial statements as of the balance sheet date and events that occurred subsequent to the balance sheet date but were not recognized in the financial statements.

The foregoing information for the periods ended July 5, 2009, and June 29, 2008, is unaudited; however, in the opinion of management of the Registrant, it reflects all the adjustments, which were of a normal recurring nature, necessary for a fair statement of the results for the interim periods. The condensed consolidated balance sheet as of December 31, 2008 is summarized from consolidated financial statements, but does not include all the disclosures contained therein and should be read in conjunction with the 2008 annual report on Form 10-K. Interim results for the period are not indicative of those for the year.

**ITEM 2.**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Forward-looking statements in this Management's Discussion and Analysis of Financial Condition and Results of Operations, elsewhere in this Form 10-Q, in the Company's 2008 Annual Report to Shareholders, in the Proxy Statement for the annual meeting held May 19, 2009, and in the Company's press releases and oral statements made with the approval of an authorized executive officer are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. There are certain important factors that could cause results to differ materially from those anticipated by some of the statements made herein. Investors are cautioned that all forward-looking statements involve risks and uncertainty. In addition to the factors discussed herein and in the notes to consolidated financial statements, among the other factors that could cause actual results to differ materially are the following: consumer spending and debt levels; interest rates; continuity of relationships with and purchases by major customers; product mix; the benefit and risk of business acquisitions; competitive pressure on sales and pricing; increases in material, freight/shipping, or production cost which cannot be recouped in product pricing; delays or interruptions in shipping or production from machine issues; work or labor disruptions stemming from a unionized work force; changes in government requirements and funding of government contracts, failure of subcontractors or vendors to perform as required by contract; and the efficient start-up and utilization of capital equipment investments. Additional information concerning these and other factors is contained in the Company's Securities and Exchange Commission filings, copies of which are available from the Company without charge.

**Comparison of Second Quarter 2009 and 2008**

Readers are directed to Note C to the Consolidated Financial Statements, Business Segments for data on the financial results of the Company's three business segments for the Quarters ended July 5, 2009 and June 29, 2008.

On a consolidated basis, sales decreased by \$6,841,000 (6%), gross margins increased by \$6,663,000 (38%), selling and general expense increased by \$828,000 (20%), and other income decreased by \$57,000 (6%). Earnings before the provision for income taxes increased by \$5,778,000 (40%), as did net earnings by \$3,764,000 (39%). Details concerning these changes can be found in the comments by segment below.

Housewares/small appliance net sales increased by \$1,255,000 from \$23,331,000 to \$24,586,000, or 5%, as a result of higher unit prices secured in second quarter 2009 versus those in effect during the comparable prior year quarter, offset in part (20%) by a decrease in units shipped due in largest part to promotional timing differences between the two quarters. Defense net sales decreased by \$9,005,000 from \$68,650,000 to \$59,645,000, or 13%, stemming primarily from a decrease in sales related to the US Department of the Army 40mm Systems program. Absorbent products net sales increased by \$909,000 from \$18,021,000 to \$18,930,000, or 5%, approximately 40% of which stemmed from an increase in unit shipments, with the balance attributable to a one-time negotiated adjustment.

Housewares/small appliance gross profits increased \$3,020,000 from \$3,458,000 (15% of sales) to \$6,478,000 (26% of sales), or 87%, reflecting reductions in commodity costs, augmented by the increased sales mentioned above. Defense gross profits increased \$671,000 from \$14,450,000 (21%) from the prior year's quarter to \$15,121,000 (25%) stemming from an improved mix of products shipped. Absorbent products gross profits were \$2,765,000 in the current quarter versus a loss of \$207,000 in the prior period, a favorable change of \$2,972,000, primarily reflecting decreased commodity costs, augmented by higher production levels/improved efficiency.

Selling and general expenses for the Housewares/small appliance segment increased \$446,000, primarily reflecting increased employee health care costs. Defense selling and general expenses were essentially flat. Absorbent selling and general expenses increased \$274,000, reflecting losses on the write-off of equipment that was no longer used for operations.

The above items were responsible for the change in operating profit.

Earnings before provision for income taxes increased \$5,778,000 from \$14,575,000 to \$20,353,000. The provision for income taxes increased from \$4,993,000 to \$7,007,000, resulting in an effective income tax rate of 34% for both periods. Net earnings increased \$3,764,000 from \$9,582,000 to \$13,346,000, or 39%.

## Comparison of First Six Months 2009 and 2008

Readers are directed to Note C to the Consolidated Financial Statements, Business Segments for data on the financial results of the Company's three business segments for the Six Months ended July 5, 2009 and June 29, 2008.

On a consolidated basis, sales increased by \$23,940,000 (13%), gross margins increased by \$13,383,000 (44%), selling and general expense increased by \$731,000 (9%), and other income decreased by \$318,000 (14%). Earnings before the provision for income taxes increased by \$12,334,000 (50%), as did net earnings by \$8,368,000 (53%). Details concerning these changes can be found in the comments by segment below.

Housewares/small appliance net sales increased by \$6,002,000 from \$42,704,000 to \$48,706,000, or 14%, 44% of which was attributable to an increase in units shipped, with the remaining increase attributable to higher unit prices secured in the first half of 2009 versus those in effect during the comparable prior year period. Defense net sales increased by \$13,272,000 from \$111,544,000 to \$124,816,000, or 12%, stemming primarily from an increase in sales related to the US Department of the Army 40mm Systems program. Absorbent products net sales increased by \$4,666,000 from \$32,899,000 to \$37,565,000, or 14%, stemming primarily from an increase in unit shipments.

Housewares/small appliance gross profits increased \$3,036,000 from \$7,312,000 (17% of sales) to \$10,348,000 (21% of sales), or 42%, reflecting lower commodity costs, augmented by the increased sales mentioned above. Defense gross profits increased \$6,783,000 from \$23,385,000 (21%) from the prior year's quarter to \$30,168,000 (24%). The dollar increase reflected the sales increase noted above, while the percent increase related to a more favorable mix of product shipped. Absorbent products gross profits were \$3,506,000 in the current quarter versus a loss of \$58,000 in the prior period, a favorable change of \$3,564,000, primarily reflecting decreased commodity costs, augmented by higher production levels/improved efficiency.

Selling and general expenses for the Housewares/small appliance segment increased \$377,000, primarily reflecting increased employee health care costs. Defense selling and general expenses were essentially flat. Absorbent selling and general expenses increased \$252,000, reflecting losses on the write-off of equipment that was no longer used for operations.

The above items were responsible for the change in operating profit.

Other income decreased \$318,000, due primarily to lower interest income resulting from decreased yields which were offset in most part by an increased level of investments.

Earnings before provision for income taxes increased \$12,334,000 from \$24,705,000 to \$37,039,000. The provision for income taxes increased from \$8,873,000 to \$12,839,000, which resulted in an effective income tax rate decrease from 36% to 35%, reflecting the increase in the FIN 48 tax reserve made in the prior period that was not repeated in the current period. Net earnings increased \$8,368,000 from \$15,832,000 to \$24,200,000, or 53%.

## Liquidity and Capital Resources

Net cash provided by operating activities was \$29,105,000 and \$9,897,000 for the six months ended July 5, 2009 and June 29, 2008, respectively. The principal factors contributing to the increase can be found in the changes in the components of working capital within the Consolidated Statements of Cash Flows. Of particular note during the first six months of 2009 were net earnings of \$24,200,000, a decrease in accounts receivable levels stemming from cash collections on customer sales, which were partially offset by an increase in inventory levels. Of particular note during the first six months of 2008 were net earnings of \$15,832,000, a decrease in accounts receivable levels stemming from cash collections on customer sales, offset by an increase in inventory levels and a decrease in payable levels in the Defense segment.

Net cash provided by investing activities during the first six months of 2009 was \$7,172,000, as compared to \$10,601,000 provided during the first six months of 2008. The change in investing activity cash flow is attributable to a decrease in net maturities and sales of marketable securities. Effectively, fewer marketable security sales were required in 2009 to fund the increased dividend paid, reflecting the increase in cash provided by operating activities.

Cash flows from financing activities for the first six months of 2009 and 2008 primarily differed as a result of the \$1.30 per share increase in the extra dividend paid during those periods.

Working capital decreased by \$10,639,000 to \$236,988,000 at July 5, 2009, for the reasons stated above. The Company's current ratio was 5.8 to 1.0 at both July 5, 2009 and December 31, 2008.

The Company expects to continue to evaluate acquisition opportunities that align with its business segments and will make further acquisitions as well as continue to make capital investments in these segments if the appropriate return on investment is projected.

The Company has substantial liquidity in the form of cash and short-term maturity marketable securities to meet all of its anticipated capital requirements, to make dividend payments, and to fund growth through acquisitions and other means. The bulk of its marketable securities are invested in the tax exempt variable rate demand notes described above and in municipal bonds that are pre-refunded with escrowed U.S. Treasuries. The company intends to continue its investment strategy of safety and short-term liquidity throughout its investment holdings. Comparative yields during the first six months of 2009 were lower than those in the first six months of the preceding year, reflecting the seven federal funds rate reductions made during 2008. The lower yields, which were offset in most part by an increase in the Company's investment holdings, served to decrease interest income. There can be no assurance that interest rates will not continue to decline. The interest rate environment is a function of national and international monetary policies as well as the growth and inflation rates of the U.S. and foreign economies and is not controllable by the Company.

### **Critical Accounting Policies**

The preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States requires management to make certain estimates and assumptions that affect the amount of reported assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and revenues and expenses during the periods reported. Actual results may differ from those estimates. The Company reviewed the development and selection of the critical accounting policies and believes the following are the most critical accounting policies that could have an effect on the Company's reported results. These critical accounting policies and estimates have been reviewed with the Audit Committee of the Board of Directors.

#### Inventories

New Housewares/Small Appliance product introductions are an important part of the Company's sales to offset the morbidity rate of other Housewares/Small Appliance products and/or the effect of lowered acceptance of seasonal products due to weather conditions. New products entail unusual risks and have occasionally in the past resulted in losses related to obsolete or excess inventory as a result of low or diminishing demand for a product. There were no such obsolescence issues that had a material effect during the current year and, accordingly, the Company did not record a reserve for obsolete product. In the future should product demand issues arise, the Company may incur losses related to the obsolescence of the related inventory. Inventory risk for the Company's other segments is not deemed to be significant, as products are largely built pursuant to customers' specific orders.

#### Product Liability

The Company is subject to product liability claims in the normal course of business. The Company does carry insurance to limit its product liability claims in excess of a self-insured retention. The self-insured retention and excess coverage vary from policy year to policy year. Moreover, there is typically a limit on all types of insurance coverage. The limits also vary from policy year to policy year. The Company records an accrual for known claims, including an estimate for related legal fees in the Company's consolidated financial statements. It utilizes historical trends and other analysis to assist in determining the appropriate accrual. Currently, there are no known claims that would have a material adverse impact on the Company beyond the reserve levels that have been accrued and recorded on the Company's books. An increase in the number or magnitude of claims could have a material impact on the Company's financial condition and results of operations.

Sales and Returns

Sales are recorded net of discounts and returns. The latter pertain primarily to warranty returns, returns of seasonal items, and returns of those newly introduced products sold with a return privilege. The calculation of warranty returns is based in large part on historical data, while seasonal and new product returns are primarily developed using customer provided information.

## **New Accounting Pronouncements**

Please refer to Note H in the Notes to the Consolidated Financial Statements for information related to the effect of adopting new accounting pronouncements on the Company's consolidated financial statements.

### **ITEM 3.**

## **QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The Company's interest income on cash equivalents and marketable securities is affected by changes in interest rates in the United States. Cash equivalents include money market funds. Based on the accounting profession's 2005 interpretation of cash equivalents under FASB Statement No. 95, the company's seven-day variable rate demand notes are classified as marketable securities rather than as cash equivalents. The demand notes are highly liquid instruments with interest rates set every 7 days that can be tendered to the trustee or remarketer upon 7 days notice for payment of principal and accrued interest amounts. The 7-day tender feature of these variable rate demand notes is further supported by an irrevocable letter of credit from highly rated U.S. banks. To the extent a bond is not remarketed at par plus accrued interest, the difference is drawn from the bank's letter of credit. The Company has had no issues tendering these notes to the trustees or remarketers. Other than a failure of a major U.S. bank, there are no risks of which the Company is aware that relate to these notes in the current market. The balance of the Company's investments is held primarily in fixed and variable rate municipal bonds with a weighted average life of 1.2 years. Accordingly, changes in interest rates have not had a material effect on the Company, and the Company does not anticipate that future exposure to interest rate market risk will be material. The Company uses sensitivity analysis to determine its exposure to changes in interest rates.

The Company has no history of, and does not anticipate in the future, investing in derivative financial instruments, i.e., instruments whose value changes in response to changes in underlying variables. Most transactions with international customers are entered into in U.S. dollars, precluding the need for foreign currency cash flow hedges. The Company's manufacturing contracts with its foreign suppliers contain provisions to share the impact of fluctuations in the exchange rate between the U.S. dollar and the Hong Kong dollar above and below a fixed range contained in the contracts. All transactions with the foreign suppliers were within the exchange rate range specified in the contracts during 2009 and 2008. There is no similar provision applicable to the Chinese Renminbi (RMB), which until 2005 had been tied to the U.S. Dollar, and has since appreciated dramatically. Further appreciation of the RMB vis-à-vis the U.S. Dollar is not expected to have any material impact on existing orders.

### **ITEM 4.**

## **CONTROLS AND PROCEDURES**

The Company's management, including the Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 (the "1934 Act") as of July 5, 2009. The Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of that date.

There were no changes in internal controls over financial reporting during the quarter ended July 5, 2009 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II - OTHER INFORMATION**

**ITEM 1.**

**LEGAL PROCEEDINGS**

See Note E in the Notes to Consolidated Financial Statements set forth under Part I - Item 1 above.

**ITEM 2.**

**UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

There were no purchases or sales of securities during the quarter ended July 5, 2009.

**ITEM 4.**

**SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

The Company held its annual meeting on May 19, 2009, at which the election of one director, Maryjo Cohen was submitted for a vote. Ms. Cohen was elected and received the following votes: For : 6,491,522; Against : 0; Abstain : 80,634; Withheld : 652; and Broker Non-Votes : 69,228.
