CTI Industries Corporation and Subsidiaries
Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying condensed consolidated financial statements are unaudited but in the opinion of management contain all the adjustments (consisting of those of a normal recurring nature) considered necessary to present fairly the consolidated financial position and the consolidated results of operations and consolidated cash flows for the periods presented in conformity with generally accepted accounting principles for interim consolidated financial information and the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. Operating results for the three and nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2010. It is suggested that these condensed financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2009.

Principles of consolidation and nature of operations:

The condensed consolidated financial statements include the accounts of CTI-US and its wholly-owned subsidiaries, CTI Balloons Limited, CTI Helium, Inc. and CTF International S.A. de C.V., as well as its majority-owned subsidiaries CTI Mexico S.A. de C.V., Flexo Universal, S.A. de C.V. and CTI Europe gmbH (the "Company"). All significant intercompany transactions and accounts have been eliminated in consolidation. The Company (i) designs, manufactures and distributes balloon products throughout the world and (ii) operates systems for the production, lamination, coating and printing of films used for food packaging and other commercial uses and for conversion of films to flexible packaging containers and other products.

Reclassification:

As of June 30, 2010, the Company reclassified obligations under capital leases from notes payable to capital leases including both the long term and current portions. This reclassification is reflected in the balance sheets for September 30, 2010 and December 31, 2009.

As of June 30, 2010, the company reclassified its equity in common stock from paid-in-capital. This reclassification is reflected in the balance sheets for September 30, 2010 and December 31, 2009.

Use of estimates:

In preparing condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amount of revenue and expenses during the reporting period in the condensed consolidated financial statements and accompanying notes. Actual results may differ from those estimates. The Company's significant estimates include reserves for doubtful accounts, reserves for the lower of cost or market of inventory, reserves for deferred tax assets and recovery value of goodwill.

Earnings per share:

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

Diluted earnings per share is computed by dividing the net income by the weighted average number of shares of common stock and equivalents (stock options and warrants), unless anti-dilutive, during each period.

As of September 30, 2010, shares to be issued upon the exercise of options and warrants aggregated 158,905 and 0, respectively. As of September 30, 2009, shares to be issued upon the exercise of options and warrants were 232,644 and 343,030, respectively. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three and nine months ended September 30, 2010 were 0 and 14,000, respectively, all of which were represented by options. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three and nine months ended September 30, 2009 were 479,935 of which 136,905 were represented by options and 343,030 were represented by warrants.

New Accounting Pronouncements:

The Company's significant accounting policies are summarized in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2009. There were no significant changes to these accounting policies during the three and nine months ended September 30, 2010 and the Company does not expect that the adoption of other recent accounting pronouncements will have a material impact in its consolidated financial statements.

Note 2 - Stock-Based Compensation; Changes in Equity

We have adopted Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 718 which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the condensed consolidated financial statements based on their grant-date fair values.

We have applied the Black-Scholes model to value stock-based awards. That model incorporates various assumptions in the valuation of stock-based awards relating to the risk-free rate of interest to be applied, the estimated dividend yield and expected volatility of our common stock. The risk-free rate of interest is the related U.S. Treasury yield curve for periods within the expected term of the option at the time of grant. The dividend yield on our common stock is assumed to be zero as we have historically not paid dividends. The expected volatility is based on historical volatility of the Company's common stock.

The Company's net income for the three months ended September 30, 2010 and 2009 includes approximately \$35,000 and \$21,000, respectively of compensation costs related to share based payments. The Company's net income for the nine months ended September 30, 2010 and 2009 includes approximately \$116,000 and \$66,000, respectively of compensation costs related to share based payments. As of September 30, 2010 there is \$46,000 of unrecognized compensation expense related to non-vested stock option grants and stock grants. We expect approximately \$21,000 to be recognized over the remainder of 2010, and approximately \$25,000 to be recognized during 2011.

As of September 30, 2010, the Company had four stock-based compensation plans pursuant to which stock options were, or may be, granted. The Plans provide for the award of options, which may either be incentive stock options (“ISOs”) within the meaning of Section 422A of the Internal Revenue Code of 1986, as amended (the “Code”) or non-qualified options (“NQOs”) which are not subject to special tax treatment under the Code.

On April 12, 2001, the Board of Directors approved for adoption, effective December 27, 2001, the 2001 Stock Option Plan (the “Plan”). The Plan authorizes the grant of options to purchase up to an aggregate of 119,050 shares of the Company’s Common Stock. As of September 30, 2010, 139,958 shares have been granted and were fully vested at the time of grant, 12,500 remain outstanding.

On April 24, 2002, the Board of Directors approved for adoption, effective October 12, 2002, the 2002 Stock Option Plan (“Plan”). The Plan authorizes the grant of options to purchase up to an aggregate of 142,860 shares of the Company’s Common Stock. As of September 30, 2010, 123,430 shares have been granted and were fully vested at the time of grant, 28,500 remain outstanding.

On April 30, 2007, the Board of Directors approved for adoption, effective October 1, 2007, the 2007 Stock Option Plan (“Plan”). The Plan authorizes the grant of options to purchase up to an aggregate of 150,000 shares of the Company’s Common Stock. As of September 30, 2010, 165,750 options had been granted and 106,000 remain outstanding.

On April 10, 2009, the Board of Directors approved for adoption, and on June 5, 2009, the shareholders of the Corporation approved, a 2009 Incentive Stock Plan (“Incentive Stock Plan”). The Incentive Stock Plan authorizes the issuance of up to 250,000 shares of stock or options to purchase stock of the Company. No stock or options have been granted under this Plan to date.

The aggregate intrinsic value in the tables above represents the total pre-tax intrinsic value (the difference between the closing price of the Company's common stock on the last trading day of the quarter ended September 30, 2010 and the exercise price, multiplied by the number of in-the-money options and warrants) that would have been received by the option and warrant holders had all the holders exercised their options on September 30, 2010.

On June 9, 2010, the Board of Directors of the Company declared a dividend of \$0.05 per share to be paid to all shareholders of record as of June 18, 2010. The dividend was paid on or about June 28, 2010.

Note 3 - Legal Proceedings

The Company is party to certain claims or actions arising in the normal course of business. The ultimate outcome of these matters is unknown but, in the opinion of management, the settlement of these matters is not expected to have a significant effect on the future financial position or results of operations of the Company.

Note 4 – Other Comprehensive Gain

In the three months ended September 30, 2010 the company incurred a comprehensive gain of \$276,000, principally from foreign currency translation adjustments. In the nine months ended September 30, 2010 the company realized a comprehensive gain of \$393,000, principally from an unrealized gain on a derivative instrument of \$189,000 and a gain of \$204,000 from foreign currency translation adjustments. The gain on derivative instruments in the periods ended September 30, 2010 reflects the adjustment to the accumulated balance of the loss on derivatives arising from the termination of the swap agreements.

The following table sets forth the accumulated balance of other comprehensive loss and each component.

	Foreign Currency Items	Unrealized Gains (Loss) on Derivatives	Accumulated Other Comprehensive (Loss)
Beginning balance as of January 1, 2010	\$ (1,614,000)	\$ (189,000)	\$ (1,803,000)
Current period change, net of tax	204,000	189,000	393,000
Ending Balance as of September 30, 2010	\$ (1,410,000)	\$ -	\$ (1,410,000)

For the three and nine months ended September 30, 2010 no tax benefit for foreign currency translation adjustments has been recorded as such amounts would result in a deferred tax asset. For the three and nine months ended September 30, 2010 no income tax benefit was recorded for the unrealized losses on the derivative instruments by reason of the fact that the tax benefit was offset by a valuation allowance with respect to the related deferred tax asset.

Note 5 - Fair Value Disclosures; Derivative Instruments

Effective January 1, 2008, the Company adopted the provisions of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 820 “Fair Value Measurements and Disclosures,” which defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. FASB ASC Topic 820 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. FASB ASC Topic 820 also requires that a fair value measurement reflect the assumptions market participants would use in pricing an asset or liability based upon the best information available. In February 2008, the FASB issued guidance now codified in FASB ASC Topic 820 which provides for delayed application of certain guidance related to non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

FASB ASC Topic 820 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy categorizes assets and liabilities at fair value into one of three different levels depending on the observability of the inputs employed in the measurement. The three levels are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of the input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. The following table presents information about the Company's liabilities measured at fair value on a recurring basis as of September 30, 2009 and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

Description	Amount as of 9/30/2009	Level 1	Level 2	Level 3
Interest Rate Swap 2006-1	\$ (23,000)	\$	(23,000)	
Interest Rate Swap 2006-2	(97,000)		(97,000)	
Interest Rate Swap 2008	(108,000)		(108,000)	
	\$ (228,000)	\$	(228,000)	

The Company's interest rate swap agreements have been valued using the counterparty's mark-to-market statement, which can be validated using modeling techniques that include market inputs such as publically available interest rate yield curves, and have been designated as Level 2 within the valuation hierarchy.

FASB ASC Topic 815 requires an entity to recognize all derivatives as either assets or liabilities in the consolidated balance sheet and to measure those instruments at fair value. Under certain conditions, a derivative may be specifically designated as a fair value hedge or a cash flow hedge.

On April 5, 2006, the Company entered into two swap agreements with RBS Citizens N.A. (“RBS”) in connection with portions (original notional amount totaling \$3,780,000) of the principal amounts of a mortgage loan and term loan to the Company fixing the interest rate on such floating rate loans from prime plus 0.75% to 8.49%. On January 28, 2008, the Company entered into an additional swap agreement with RBS with respect to a \$3,000,000 notional amount of a floating rate revolving loan, fixing the interest rate on such amount from prime plus 0.75% to 6.17%. These swap agreements were designated as cash flow hedges to hedge the Company’s exposure to interest rate fluctuations on the portions of the principal amount of loans with RBS that were covered by the swap agreements. These swap agreements were derivative financial instruments and the Company determined the fair market value of these agreements on a quarterly basis, based on RBS’s mark-to-market statement, recording the fair market value of these contracts on the balance sheet with the offset to other comprehensive loss. In connection with the entry into a new credit agreement with Harris N.A. and the pay off of its loan balances with RBS, on April 30, 2010, the Company terminated these swap agreements and paid to RBS the sum of \$146,000, representing the then fair value of the swap agreements, which was or will be, recorded as additional interest expense in the condensed consolidated statement of operations.

As of September 30, 2010 and December 31, 2009, the Company recorded the fair value of these swap agreements on the balance sheet as a liability of \$0 and \$189,000, respectively. For the three and nine months ended September 30, 2010, the Company recorded an unrealized gain of \$0 and \$189,000, compared to an unrealized gain of \$25,000 and \$113,000 for the same period in 2009, with respect to these swap agreements in other comprehensive income, which represents the change in value of these swap agreements for the quarters ended.

Since May 1, 2010, the Company has not entered into or maintained any swap agreements with respect to its outstanding indebtedness.

Note 8 - Concentration of Credit Risk

The Company performs ongoing credit evaluations and provides an allowance for potential credit losses against the portion of accounts receivable which is estimated to be uncollectible. Such losses have historically been within management's expectations. During the three and nine months ended September 30, 2010, there were two and three customers, respectively whose purchases represented more than 10% of the Company's consolidated net sales. During the three and nine months ended September 30, 2009, there were three customers whose purchases represented more than 10% of the Company's consolidated net sales. During the nine months ended September 30, 2010, the cost of sales represented 77.5% of net sales compared to 77.6% for the nine months ended September 30, 2009. During the three and nine months ended September 30, 2010, cost of sales were affected by (i) a reduction in the unit cost of production overhead arising from increased unit production, (ii) shifts in the mix of products sold and (iii) increases in raw materials cost including film, resin and latex.

General and Administrative. During the three months ended September 30, 2010, general and administrative expenses were \$1,239,000 or 11.3% of net sales, compared to \$1,047,000 or 10.3% of net sales for the same period in 2009. During the nine months ended September 30, 2010, general and administrative expenses were \$3,808,000 or 10.5% of net sales, compared to \$3,387,000 or 11.1% of net sales for the same period in 2009. The increase in general and administrative expenses compared to the corresponding period of 2009, is attributable to (i) an increase in administrative salaries of \$214,000 (ii) an increase in corporate legal expense of \$132,000 and (iii) administrative expenses of \$112,000 incurred at our Europe subsidiary.

Selling. During the three months ended September 30, 2010, selling expenses were \$113,000 or 1.0% of net sales, compared to \$221,000 or 2.2% of net sales for the same period in 2009. During the nine months ended September 30, 2010, selling expenses were \$671,000 or 1.8% of net sales, compared to \$602,000 or 2.0% of net sales for the same period in 2009. The increase in selling expenses compared to the corresponding period of 2009, is attributable to (i) an increase in royalties expense of \$38,000, and (ii) selling expenses of \$30,000 incurred in our Europe subsidiary.

Advertising and Marketing. During the three months ended September 30, 2010, advertising and marketing expenses were \$389,000 or 3.5% of net sales for the period, compared to \$404,000 or 4.0% of net sales for the same period of 2009. During the nine months ended September 30, 2010, advertising and marketing expenses were \$1,330,000 or 3.7% of net sales for the period, compared to \$1,213,000 or 4.0% of net sales for the same period of 2009. The increase in advertising and marketing expense is attributable to (i) increased compensation expense of \$57,000 and (ii) servicing fees for in-store servicing of balloon inventories in two retail accounts.

Other Income (Expense). During the three months ended September 30, 2010, the Company incurred net interest expense of \$159,000, compared to net interest expense during the same period of 2009 in the amount of \$257,000. During the nine months ended September 30, 2010, the Company incurred net interest expense of \$700,000, compared to net interest expense during the same period of 2009 in the amount of \$825,000. The decline in interest expense is attributable to lower applicable interest rates and reduced loan balance.

For the three months ended September 30, 2010, the Company had a foreign currency transaction loss of \$3,000 compared to a foreign currency transaction gain of \$13,000 during the same period of 2009. For the nine months ended September 30, 2010, the Company had a foreign currency transaction loss of \$37,000 compared to a foreign currency transaction loss of \$6,000 during the same period of 2009.

Income Taxes. For the three months ended September 30, 2010, the Company reported a consolidated income tax expense of \$113,000, compared to a consolidated income tax expense of \$56,000 for the same period of 2009. For the nine months ended September 30, 2010, the Company reported a consolidated income tax expense of \$208,000, compared to a consolidated income tax expense of \$102,000 for the same period of 2009. For the three and nine months ended September 30, 2010, this income tax provision was composed of provisions for income tax on the income of Flexo Universal, our Mexican subsidiary, CTI Europe gmbH, our German subsidiary, and CTI Balloons Limited, our United Kingdom subsidiary. The Company did not recognize any income tax expense in the United States for the three and nine months ended September 30, 2010, or for the same period of 2009 by reason of its net operating loss carryforward and reversals to the Company's valuation reserve against its deferred tax asset account.

As of September 30, 2010, the amount of the Company's valuation allowance with respect to its deferred tax asset has been reduced to \$72,000. During the past four years, the amount of book income tax expense which would have been realized by reason of net income of the Company in quarterly and annual periods has been offset by reductions in the valuation allowance against the Company's deferred tax assets, primarily operating loss carryforwards. By reason of the reduction of valuation allowance, in future periods in which the Company realizes net income, the book tax expense realized by the Company will not be fully offset by a reduction in the valuation allowance and the Company will be required to record book tax expense, which will affect net income of the Company. As of September 30, 2010, the net operating loss carryforward balance of the Company is \$3,210,000 so the Company will not be subject to income tax on income to such amount, but the Company will be required to record income tax expense in its statement of operations.

Net Income. For the three months ended September 30, 2010, the Company had net income of \$243,000 or \$0.08 per share (basic and diluted), compared to net income of \$205,000 for the same period of 2009 or \$0.07 per share (basic and diluted). For the nine months ended September 30, 2010, the Company had net income of \$1,449,000 or \$0.49 per share (basic and diluted), compared to net income of \$707,000 for the same period of 2009 or \$0.25 per share (basic and diluted).

During the nine months ended September 30, 2010, financing activities included payment of \$1,492,000 on long-term debt obligations.

Also, on a non-cash basis, subordinated indebtedness in the aggregate amount of \$1,027,000 was paid through the exercise of warrants to purchase an aggregate of 293,030 shares of common stock of the Company.

Liquidity and Capital Resources. At September 30, 2010, the Company had cash balances of \$682,000 compared to cash balances of \$366,000 for the same period in 2009.

At September 30, 2010, the Company had a working capital balance of \$4,092,000 compared to a working capital balance of \$2,408,000 at December 31, 2009.

The Company's liquidity is dependent significantly on its bank financing and the Company relies on its revolving line of credit to maintain liquidity. On April 29, 2010, the Company entered into a Credit Agreement with Harris N.A. ("Harris") replacing and paying off the Company's credit line with RBS Citizens N.A. (formerly Charter One Bank). Under the Credit Agreement, Harris agreed to provide loans and credits to the Company in the aggregate maximum amount of \$14,417,000. The arrangement includes:

- i. A revolving credit up to a maximum amount of \$9,000,000 based upon a borrowing base of 85% of eligible receivables and 60% of eligible inventory (up to a maximum of \$5,000,000);
- ii. A mortgage loan in the principal amount of \$2,333,350, amortized over 25 years, the principal balance due on April 29, 2013;
- iii. A term loan in the principal amount of \$583,333 maturing in monthly principal installments of \$58,333; and
- iv. An equipment loan commitment in the amount of up to \$2,500,000 providing for loan advances from time to time until April 29, 2011 based upon 100% of the purchase price of equipment purchased, the loans to be amortized on a five year basis commencing April 29, 2011, the balance due on April 29, 2013.

The Credit Agreement includes various representations, warranties and covenants of the Company, including various financial covenants.

In connection with the Credit Agreement, the Company executed and delivered to Harris, a Term Loan Note, a Mortgage Loan Note, an Equipment Note and a Revolving Note, as well as a form of Mortgage, Security Agreement, Pledge Agreement (pursuant to which shares of capital stock of the Registrant's Mexico subsidiary were pledged as security for the loans), Patent Security Agreement and Trademark Security Agreement. Two officers and principal shareholders of the Company, John H. Schwan and Stephen M. Merrick each executed Limited Guaranties of the loans and also executed Subordination Agreements with respect to obligations of the Company to them.

On April 29, 2010, Harris advanced a total of \$11,963,518 under these loans on behalf of the Company for the pay-off of all outstanding loan and lease financing balances of the Company to RBS Citizens N.A. and RBS Asset Finance.

Under the terms of the Credit Agreement, in order to obtain advances under the revolving line of credit and the equipment loan, the Company is required to meet various financial covenants including a senior leverage ratio, fixed charge coverage ratio and tangible net worth. As of September 30, 2010, we were in compliance with these covenants.

The Credit Agreement provides that the outstanding balance of all loans under the agreement will bear interest with reference to a base rate or, at the option of the Company, with reference to an adjusted LIBOR. At September 30, 2010, the effective rate on the outstanding loan balances was 4.0%.

Under the prior loan agreement with RBS Citizens N.A., we maintained swap agreements with respect to \$6,780,000 of our loan balances with RBS Citizens. These swap agreements were designated as a cash flow hedge to hedge the Company's exposure to interest rate fluctuations on the Company's floating rate loans. These swap arrangements were derivative financial instruments with respect to which we determined and recorded the fair market value each quarter. We recorded the fair market value of these contracts in the balance sheet, with an offset to other comprehensive loss. On April 29, 2010, at the time of the closing of the Credit Agreement with Harris, these swap agreements were terminated, and we paid to the counterparty under the agreements the then fair market value of the swap agreements which was \$146,000. As of September 30, 2010, the Company does not maintain any swap agreements with respect to its outstanding loans.
