Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Ordinary shares, par value US\$0.0000005 per share*	The NASDAQ Stock Market LLC
American Depositary Shares, each representing 40 ordinary shares	(The NASDAQ Global Select Market)

* Not for trading, but only in connection with the listing on The NASDAQ Global Select Market of American Depositary Shares, or ADSs, each representing 40 ordinary shares.

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None
(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None
(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

Edgar Filing: KONGZHONG CORP - Form 20-F

As of December 31, 2011, 1,661,939,143 ordinary shares, par value US\$0.0000005 per share, were issued and outstanding.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

Edgar Filing: KONGZHONG CORP - Form 20-F

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Such forward-looking statements include, without limitation, statements that are not historical facts relating to:

our ability to successfully execute our business strategies and plans;

our financial performance and business operations;

our development and capital expenditure plans;

the expected benefit and future prospects of our strategic alliances and acquisitions, and our ability to cooperate with our alliance partners or integrate acquired businesses;

management estimations with respect to revenues from our wireless value-added services, or WVAS, mobile games, and Internet games businesses;

the development of our latest product offerings, including, but not limited to, offerings in our WVAS, mobile games and Internet games businesses;

our ability to anticipate and launch games that respond to changing consumer tastes and preferences and predict trends in the Internet games market in the PRC;

our ability to license quality Internet games from the PRC and overseas Internet game developers that complement our internally-developed Internet games;

our dependence on a small number of Internet games developed by third party Internet games developers for a significant portion of our Internet games revenues;

the development of the regulatory environment and changes in the policies or guidelines of the telecommunications operators in the People's Republic of China, or the PRC;

the development of the PRC smartphone mobile games market and the regulatory environment and changes in policies or guidelines relating to those markets;

the state of our relationship with telecommunications operators in the PRC;

our dependence on the substance and timing of the billing systems of the telecommunications operators in the PRC for our performance; and

competitive pressures and future growth in the WVAS, mobile games, telecommunications, Internet games and related industries in the PRC.

The words “forecast,” “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “seek,” “will,” “would” expressions, as they relate to us, are intended to identify a number of these forward-looking statements.

These forward-looking statements are subject to risks, uncertainties and assumptions, some of which are beyond our control. In addition, these forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. Actual results may differ materially from the information contained in the forward-looking statements as a result of a number of factors, including, without limitation, the risk factors set forth in “Item 3 — Key Information — Risk Factors” and the following:

- any changes in our relationship with telecommunications operators in the PRC;
- the effects of competition on the demand for or the price of our products or services;
- any changes in customer demand or usage preference for our products or services;

any changes in the telecommunications operators' systems for billing users of our WVAS or mobile games or remitting payments to us;

any changes in technologies related to telecommunications, WVAS, mobile games or Internet games or applications based on such technologies;

any changes in our relationships with our Internet games licensors whose games we have the rights to operate in the PRC or other markets;

future developments, trends, regulatory environment and consumer preferences in China with respect to mobile and Internet games and means by which these games are distributed;

any changes in the regulatory regime or the policies for the PRC telecommunications industry, including changes in the structure or functions of the primary industry regulator, the Ministry of Industry and Information Technology, or the MIIT (formerly the Ministry of Information Industry), or its policies, or the policies or other regulatory measures of other relevant government or industry authorities relating to, among other matters, the granting and approval of licenses, procedures for customers to access and subscribe to WVAS or mobile games, restrictions on wireless Internet content, or the introduction of new technology platforms, products and services;

any changes in the regulatory regime or the policies for the Internet games industry in the PRC, including changes in the structure, functions or policies of the regulators, which include (i) the MIIT, (ii) the State Administration for Industry and Commerce, or the SAIC, (iii) the Ministry of Culture, or the MOC, (iv) the General Administration of Press and Publication, or the GAPP, (v) the State Administration of Radio, Film and Television, or the SARFT, and (vi) the Ministry of Public Security, or the MPS;

any changes in political, economic, legal or social conditions in the PRC, including the PRC government's specific policies with respect to (i) foreign investment and entry by foreign companies into the telecommunications, WVAS, mobile games or Internet games market, (ii) economic growth, (iii) inflation, (iv) foreign exchange or (v) the availability of credit; and

changes in population growth or gross domestic product, or GDP, growth or the impact of those changes on the demand for our products or services.

We do not intend to update or otherwise revise the forward-looking statements in this annual report, whether as a result of new information, future events or otherwise. Due to these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this annual report might not occur in the way we expect, or at all. Accordingly, you should not place undue reliance on any forward-looking information. All forward-looking statements contained in this annual report are qualified by reference to the cautionary statements set out in this section.

Item 1. Identity of Directors, Senior Management and Advisers

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

Selected Financial Data

The following selected consolidated financial data should be read in conjunction with our audited consolidated financial statements, the notes thereto and “Item 5 — Operating and Financial Review and Prospects.” The selected consolidated statement of operations data for the years ended December 31, 2009, 2010 and 2011 and the selected consolidated balance sheet data as of December 31, 2010 and 2011, set forth below are derived from our audited consolidated financial statements and the notes thereto, which are included elsewhere in this annual report. The selected consolidated statement of operations data for the years ended December 31, 2007 and 2008 and the historical consolidated balance sheet data as of December 31, 2007, 2008 and 2009 set forth below are derived from our audited consolidated financial statements and the notes thereto, which are not included in this annual report.

Our audited consolidated financial statements have been prepared and presented in accordance with the generally accepted accounting principles in the United States, or U.S. GAAP.

(1) We combined our wireless Internet services, or WIS, business into our WVAS business in 2010. The segment reporting information of the WIS business has been combined into that of WVAS for all prior periods presented.

(2) Prior to October 1, 2009, we presented sales tax on a gross basis (included in revenues and general and administrative expenses). Since October 1, 2009, we have presented sales tax on a net basis (excluded from net revenues) in order to provide better comparability of our financial statements to those of our peer companies. We have applied this change in accounting principles retrospectively to all prior periods presented.

(3) As of December 31, 2007, 2008, 2009, 2010 and 2011, we had 82 million, 137 million, 76 million, 76 million and 210 million ordinary share equivalents, respectively, outstanding that could potentially dilute income per share in the future, but that were excluded in the computation of diluted income per share in the periods as their effect would have been anti-dilutive.

Exchange Rate Information

We present our consolidated financial statements in U.S. dollars. In addition, this annual report contains translations of certain Renminbi amounts to U.S. dollar amounts for transactions denominated in Renminbi. Unless otherwise specified or indicated by context, the translations of Renminbi amounts into U.S. dollar amounts have been made at the rate of RMB6.3009 = US\$1.00, the central parity rate set by the PBOC, China's central bank, on December 31, 2011. The translations are not a representation that the Renminbi amounts could actually be converted to U.S. dollars at this rate. For a discussion of the exchange rates used for the presentation of our financial statements, see Note 2 to our financial statements included elsewhere in this annual report on Form 20-F.

The PBOC sets and publishes daily central parity rates with reference primarily to the supply and demand of Renminbi against a basket of currencies in the market. The PBOC also takes into account other factors such as the general conditions existing in the international foreign exchange markets. Although PRC governmental policies were introduced in 1996 to reduce restrictions on the convertibility of Renminbi into foreign currency for current account items, conversion of Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of the State Administration for Foreign Exchange, or the SAFE, and other relevant authorities. We make no representation that the Renminbi or U.S. dollar amounts referred to in this annual report could have been or could be converted into U.S. dollars or Renminbi, as the case may be, at any particular rate or at all.

The noon buying rate in New York City for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York was RMB6.3052 = US\$1.00 on April 6, 2012. The following table sets forth the high and low noon buying rates between Renminbi and U.S. dollars for each of the periods shown:

Period	Noon Buying Rate RMB per US\$1.00	
	High	Low
October 2011	6.3825	6.3534
November 2011	6.3839	6.3400
December 2011	6.3733	6.2939
January 2012	6.3330	6.2940
February 2012	6.3120	6.2935
March 2012	6.3315	6.2975
April 2012 (through April 6, 2012)	6.3123	6.2975

The following table sets forth the average noon buying rates between Renminbi and U.S. dollars for each of 2007, 2008, 2009, 2010, 2011 and 2012 (through April 6, 2012), calculated by averaging the noon buying rates on the last

day of each month of the periods shown:

Period	Average Noon Buying Rate RMB per US\$1.00
2007	7.5806
2008	6.9193
2009	6.8295
2010	6.7696
2011	6.4630
2012 (through April 6, 2012)	6.3074

Capitalization and Indebtedness

Not applicable.

Reasons for the Offer and Use of Proceeds

Not applicable.

Risk Factors

You should consider carefully all of the information in this annual report, including the risks and uncertainties described below. If any of the following risks actually occurs, our business, financial condition or results of operations could be harmed. In such, the trading price of our ADSs could decline and you could lose all or part of your investment.

Risks Relating to Our Business

We depend on China Mobile and other PRC telecommunications operators for a majority of our revenues, and any loss or deterioration of our relationship with these telecommunications operators could result in severe disruptions to our business operations and the loss of the majority of our revenues.

We derive a majority of our revenues from the provision of WVAS and mobile games through the networks of the PRC telecommunications operators. We rely primarily on the networks of China Mobile Limited, or China Mobile, to deliver our products and services. In 2010 and 2011, we derived approximately 72% and 62%, respectively, of our total revenues from our cooperation arrangements with China Mobile. In 2011, we derived approximately 73% and 97%, respectively, of our WVAS and mobile games revenues from our cooperation arrangements with China Mobile. The remainder of our WVAS and mobile games revenues is derived from cooperation arrangements with China United Telecommunications Corporation, or China Unicom (which acquired China Network Communications Group Corporation, or China Netcom, in October 2008), and China Telecommunications Corporation, or China Telecom.

Through Beijing AirInbox Information Technologies Co., Ltd., or Beijing AirInbox, Beijing Boya Wuji Technologies Co., Ltd., or Beijing Boya Wuji, Beijing Wireless Interactive Network Technologies Co., Ltd., or Beijing WINT, Beijing Chengxitong Information Technology Co., Ltd., or Beijing Chengxitong, Nanjing Net Book Culture Co., Ltd., or Zhulang, Beijing Xinrui Technology Co., Ltd., or BJXR, Shanghai Mailifang Communications Ltd., or Mailifang, and Xiamen Xinreli Technology Co., Ltd., or Xinreli, as the case may be, we have entered into a series of cooperation agreements with the subsidiaries of China Mobile and other PRC telecommunications operators to provide WVAS and mobile games through the networks of these telecommunications operators. Pursuant to our agreements with these telecommunications operators, the telecommunications operators bill and collect fees from mobile phone users for the

WVAS and mobile games we provide. Our agreements with the telecommunications operators are generally for terms of one year or less, and are typically not renewed automatically. Therefore, we usually renew these agreements or enter into new agreements when the prior agreements expire, but on occasion the actual renewals, or entering into, of new contracts could be delayed for one month or more. Any inability to renew these contracts or enter into new contracts could severely disrupt our business and operations and materially reduce our revenues and profitability.

Furthermore, telecommunications operators could discontinue the use of external WVAS providers, such as our company. If any of the PRC telecommunications operators ceases to cooperate with us, we would no longer be able to provide WVAS or distribute mobile games to such operator's customers or generate related revenues. In particular, if China Mobile ceases to cooperate with us, it is unlikely that we would be able to build up sufficient number of new customers through the networks of other PRC telecommunications operators to timely replace those lost from China Mobile. Due to our reliance on China Mobile and other PRC telecommunications operators to deliver our WVAS and mobile games to our customers, any loss or deterioration of our relationship with China Mobile or other PRC telecommunications operators could result in severe disruptions to our business operations, the loss of the majority of our revenues and have a material adverse effect on our financial condition and results of operations.

The termination or alteration of our cooperation agreements with China Mobile or other PRC telecommunications operators could materially harm our business and have a material adverse effect on our financial condition and results of operations.

Our negotiating leverage with China Mobile and other PRC telecommunications operators is limited because China Mobile and other PRC telecommunications operators operate the telecommunications networks through which we deliver our products and services to mobile phone users in China. Our revenues and profitability could be materially reduced if China Mobile or other PRC telecommunications operators decided to change the terms of their cooperation agreements with us, such as by increasing their transmission or service fees, or if they fail to comply with the terms of these agreements. For example, in 2009, China Mobile relocated operations for certain of its WVAS and mobile games services to facilities of its provincial subsidiaries, including a majority of the operations of its mobile games services (covering 31 provinces) from its Beijing headquarters to a subsidiary in the Jiangsu province. As part of these relocations, we were required to alter our cooperation agreements with China Mobile. However, we cannot assure you that China Mobile will not seek to terminate or materially alter our cooperation agreements with its provincial subsidiaries as a result of similar relocations in the future.

In addition, China Mobile or other PRC telecommunications operators could impose monetary penalties on us or terminate cooperation with us under the terms of their cooperation agreements with us, for a variety of reasons, including:

- if we fail to achieve the performance standards established by the relevant operator from time to time;

· if we breach certain provisions under the agreements, which include, in many cases, the obligation not to deliver content that violates the relevant operator's policies and applicable law; or

- if the relevant operator receives a high level of customer complaints about our services.

Due to our dependence on our relationship with China Mobile and other PRC telecommunications operators, and as a result of our limited negotiating leverage, any termination or material alteration of our cooperation agreements with China Mobile or other PRC telecommunications operators could severely disrupt our business and operations and have a material adverse effect on our financial condition and results of operations.

Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us could result in lower revenues or additional costs for us and materially and adversely affect our business, financial condition, results of operations and prospects.

China Mobile or other PRC telecommunications operators may, from time to time, issue policies or guidelines, requesting or stating their preferences for certain actions to be taken, or not taken, by all WVAS providers using their networks. Due to our reliance on China Mobile and other PRC telecommunications operators, any significant change in their policies or guidelines could cause our revenues to decrease or operating costs to increase. As a result, we cannot assure you that our financial condition and results of operations will not be materially and adversely affected by policy or guideline changes by China Mobile or other PRC telecommunications operators.

For example, on November 30, 2009, China Mobile implemented a series of measures targeted at eliminating offensive or unauthorized content, including pornographic content, on PRC-based wireless application protocol, or WAP, sites. As a result, China Mobile and other PRC telecommunications operators suspended billing for their customers for all WAP and G+ mobile gaming platform services, including those services that do not contain offensive or unauthorized content, on behalf of third party service providers of such services. Largely due to these measures, our WVAS and mobile games revenues in the fourth quarter of 2009 decreased as compared to the third quarter of 2009.

In January 2010, China Mobile began implementing an additional series of measures targeted at further improving user experience for mobile handset embedded services, in addition to the introduction of a new short message service, or SMS, code management system. Under these measures, WVAS that are embedded in handsets are required to introduce additional notices and confirmations to end-consumers during the purchase of such services. In addition, services relating to SMS short codes are required to be more tailored to the specific service offerings or service partners. Previously, a single SMS code could be used for multiple service offerings or partners.

Accordingly, we cannot assure you that China Mobile or other PRC telecommunications operators will not introduce additional requirements with respect to the procedures for ordering monthly subscriptions or single-transaction downloads of our WVAS or mobile games, notifications to customers, the billing of customers, or other consumer-protection-related measures, or adopt other policies that may require significant changes in the way we promote, sell and distribute our WVAS and mobile games, the occurrence of any of which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Competition with services offered by China Mobile and other PRC telecommunications operators could lower our revenues and have a material adverse effect on our business, financial condition, results of operations and prospects.

We face competition from WVAS offered by PRC telecommunications operators. For example, China Mobile has been developing and marketing its own multimedia messaging service, or MMS, and WAP products that compete with our services, including its Monternet™ wireless portal, which competes with our wireless site Kong.net. The PRC telecommunications operators may launch additional competing services in the future. Similar to our practices, China Mobile and other PRC telecommunications operators have entered into cooperation agreements with mobile handset manufacturers to pre-load their icons and codes on new handsets, in order to make accessing and subscribing to WVAS provided by China Mobile and other telecommunications operators easier for users of those handsets. Furthermore, since 2007, China Mobile has entered into strategic alliances with selected handset manufacturers to embed menu items for only its own WVAS products and not the products of other WVAS providers, such as our company. In addition, China Mobile and other PRC telecommunications operators may view our own wireless Internet sites, Kong.net and Ko.cn, as being in direct competition with their Internet sites. The competing services offered by China Mobile and other PRC telecommunications operators could decrease our market share and result in a material decrease in our revenues, or harm our relationship with China Mobile and other PRC telecommunications operators, the occurrence of any of which could materially and adversely affect our business, financial condition, results of operations and prospects.

Our dependence on the billing systems and records of the telecommunications operators and their subsidiaries may require us to estimate portions of our reported revenues and cost of revenues for WVAS and mobile games, which could result in subsequent significant adjustments to our financial statements.

As we do not bill our WVAS and mobile games customers directly, we depend on the billing systems and records of the telecommunications operators to record the volume of our WVAS and mobile games provided, bill our customers, collect payments and remit to us our portion of the revenues. We record revenues based on monthly statements from the telecommunications operators confirming the value of our services that the telecommunications operators billed to customers during the month. Due to our past experience with the timing of receipt of the monthly statements from the operators, we expect that we may need to rely on our own internal estimates for the portion of our reported revenues and cost of revenues for which we will not have received monthly statements. In such an instance, our internal estimates would be based on our own internal data of expected revenues and related fees from services provided. As a result of reliance on our internal estimates, we may overstate or understate our revenues and cost of revenues for the relevant reporting period, which could result in significant adjustments in our financial reports when we actually

receive the telecommunications operators' monthly statements for such period. Moreover, to the extent that the telecommunications operators require longer periods of time to send us monthly statements, we may be required to increase our reliance on our internal estimates when preparing our financial statements. If we are required to make adjustments to our quarterly financial statements in subsequent quarters, it could have a material adverse effect on market sentiments toward us, and the trading price of our ADSs could decline significantly. In addition, we generally do not have the ability to independently verify or challenge the accuracy of the billing systems of the telecommunications operators. Nor can we assure you that any negotiations between us and the telecommunications operators to reconcile billing discrepancies will be resolved in our favor or that our financial condition and results of operations will not be materially and adversely affected as a result of such discrepancies. See "Item 5 — Operating and Financial Review and Prospects — Critical Accounting Policies — Revenue Recognition."

Our business and growth prospects would be severely disrupted if we lose the services of our key personnel, and we may not be able to grow effectively if we cannot attract and retain skilled management.

Our future success depends heavily upon the continued service of our key executives. In particular, we rely on the expertise and experience of Leilei Wang, the Chairman of our Board of Directors and our Chief Executive Officer, in our business operations, and on his personal relationships with the regulatory authorities, our clients, our suppliers, the telecommunications operators and our operating companies, Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng. If Mr. Wang becomes unable or unwilling to continue in his present positions, or if he joins a competitor or forms a competing company in contravention of his employment agreement, we may not be able to replace him easily, our business would be significantly disrupted and our financial condition, results of operations and prospects would be materially and adversely affected.

In addition, the incentives to attract and retain employees, in particular skilled management personnel, provided by our equity incentive plans may not be as effective as in the past, in light of the volatility of the market conditions and the price of our ADSs in recent years. Competitions among companies in the PRC Internet industry for skilled and experienced personnel may also result in our having to incur increased compensation costs. If we do not succeed in attracting skilled management personnel or retaining or motivating existing management personnel, we may be unable to manage or develop our business effectively.

Any damage to our reputation could have a material adverse effect on our business and prospects, as well as our financial condition and results of operations.

We are vulnerable to adverse market perceptions regarding our company, our products and services, our personnel and other aspects of our business. Furthermore, we are exposed to the risk that litigation, employee misconduct, operational failures, senior personnel changes, customer complaints, outcome of regulatory investigations or other proceedings, and negative publicity generally, among other things, whether or not with merit, could severely damage our reputation. In particular, negative publicity could be based, for example, on allegations that we have failed to comply with applicable regulatory requirements or could result from loss of customer or confidential data, misconduct by employees (including senior management), dissatisfied customers, decline in operating performance or actions by regulatory authorities. Any damage to our reputation could materially and adversely affect our business and prospects, as well as our financial condition and results of operations.

Our efforts to develop additional distribution channels for our WVAS and mobile games may not succeed or may be restricted or halted by the MIIT or the telecommunications operators.

Cooperation with mobile handset manufacturers has provided us with an important distribution channel for our WVAS and mobile games. We pre-load into the menus of certain mobile handsets our mobile games, WAP icons and short codes for products offered on the MMS, SMS and IVR platforms. A consumer who buys a new handset pre-loaded with our mobile games, icons and codes can access and subscribe to our services quickly and easily. Over the years, cooperation with mobile handset manufacturers has become one of the most important distribution channels for us, and a material portion of our revenues is derived from such cooperation. However, in recent years, China Mobile and other PRC telecommunications operators have entered into cooperation agreements with mobile handset manufacturers similar to our agreements with mobile handset manufacturers. We cannot assure you that mobile handset manufacturers will continue their cooperation with us or maintain their current revenue-sharing arrangements with us.

In addition, we cannot assure you that the MIIT, China Mobile or other PRC telecommunications operators will not restrict or halt our cooperation with the mobile handset manufacturers. For example, in addition to pre-loading our mobile games, WAP icons and MMS, SMS and IVR short codes into the menus of selected mobile handsets, until recently, we also embedded our icons and codes in selected handsets. On April 11, 2007, the MIIT issued a notice barring the production of mobile handsets with embedded icons and codes that cannot be changed or deleted by consumers. We subsequently altered our arrangements with mobile handset manufacturers to comply with the notice, which took effect on June 1, 2007. Although mobile handset manufacturers are still permitted to pre-load our icons into the handset menus, so long as such icons can be changed or deleted, we cannot assure you that the MIIT will not expand its regulations to bar the pre-loading of icons and codes in the future.

Beginning in May 2007, China Mobile has promoted only its own WVAS products in the embedded menus of those handsets with whose manufacturers China Mobile has entered into strategic alliances. We cannot assure you that China Mobile or other telecommunications operators will not, in the future, take other steps to limit or halt our use of mobile handsets as a distribution channel. Any further actions by the telecommunications operators or the MIIT to limit or halt our use of mobile handsets as a distribution channel could materially reduce our revenues, profitability and future growth.

We recently entered into the Internet games business, and our ability to succeed in the PRC Internet games market is subject to many challenges and uncertainties.

We entered into the Internet games business with our acquisition of Shanghai Dacheng Network Technology Co., Ltd., or Dacheng, in 2010. Our ability to succeed in the PRC Internet games market is subject to many challenges, such as our ability to develop and license popular games. In particular, new Internet games are regularly introduced in the PRC, but only a relatively small number of high-quality, popular games account for a significant portion of the PRC Internet games market. Moreover, it is difficult to predict prior to the introduction of an Internet game whether such game would be well received by PRC game players. Accordingly, any negative development relating to our Internet games could materially and adversely affect our business, financial condition, results of operations and prospects. Potential negative developments include:

- our failure to make quality upgrades, expansion packs, enhancements or improvements to our Internet games in a timely manner;
- our failure to avoid, or detect and correct, defects in our Internet games in a timely manner;
- any reduction in our server capacity for any reason, including our failure to adequately project our future server needs and make advanced purchases of servers to accommodate the expected increase in the number of game players;
- any reduction in or failure to grow our games or player base, or any decrease in the popularity of our Internet games in the market due to intensifying competition or other factors;
- any failure to license quality Internet games from other Internet game developers that complement our internally-developed Internet games;
- any failure to properly tailor and localize any foreign games we have licensed for PRC game players;
- a decrease in the number of Internet cafes through which a substantial number of players access our Internet games;

- any decrease in or failure to grow the amount of revenues generated from our Internet games;

any failure in our Internet games billing system, which we rely on for revenue recognition and tracking of the consumption patterns of game players; or

any breach of game-related software security or prolonged server interruption due to network failures or hacking activities.

In addition, our ability to succeed in the Internet games market is subject to many uncertainties beyond our control. As the Internet games industry is a relatively new and evolving industry, the growth of the Internet games industry and the level of demand and market acceptance of our Internet games are subject to a high degree of uncertainty. Our future operating results will depend on numerous factors, including:

the Internet infrastructure, growth of personal computer, Internet and broadband penetration in the PRC and other markets in which we offer our games;

whether the Internet games industry, particularly in the PRC and the rest of the Asia-Pacific region, continues to grow and the rate of any such growth;

our ability to license or operate our games in overseas markets;

laws, rules, regulations and policies affecting the Internet games industry, including those affecting Internet cafes in the PRC, where a substantial portion of our game players access Internet games;

general economic conditions, particularly economic conditions affecting discretionary consumer spending;

the availability and popularity of other forms of entertainment, particularly console game systems, such as those made by Sony, Nintendo and Microsoft, which are already popular in developed countries and may gain popularity in the PRC and other countries in which we market our games;

public opinion regarding Internet games;

the popularity and price of new Internet games and in-game items that we and our competitors launch and distribute; and

our ability to upgrade and improve our existing games to extend their life spans and to maintain their competitive positions in the Internet games market in a timely manner.

Due to these challenges and uncertainties, we cannot assure you that our Internet games business will make a positive contribution to our future revenues. Our failure to successfully develop this business could have a material adverse effect on our business, financial condition, results of operations and prospects.

If we fail to anticipate and launch games that respond to changing consumer tastes and preferences or predict trends in the PRC Internet games market, our revenues and profitability could be materially reduced, and our growth and prospects would suffer.

We plan to invest a significant amount of financial and personnel resources in developing, launching and operating our own Internet games, as well as launching and operating licensed Internet games. In addition, we will need to replace our existing Internet games as they reach the end of their useful economic lives, which we believe are typically one to three years, as well as to operate a larger number of Internet games to increase our overall player base and revenues to meet our growth strategy. The success of our Internet games business will largely depend on our ability to anticipate and launch games that effectively respond to changing consumer tastes and preferences, as well as

technological advances, in a timely manner. For example, we may need to license from overseas developers popular game titles that we believe may gain popularity in the PRC. However, licenses for these games may subject us to significant up-front non-refundable license fees, and there is no assurance these games will be commercially viable in the PRC market. If we fail to launch and operate these games successfully in the PRC in a timely manner to meet PRC consumers' changing tastes and preferences, or if these games fail to respond to their tastes and preferences, our operating costs could be materially increased, profitability could be materially reduced, and we may need to write down all or part of the up-front non-refundable license fees paid to game developers.

Moreover, any failure by us to predict and adapt our Internet games to meet trends in the Internet games market in the PRC could materially reduce our revenues and profitability, and have a material adverse effect on our growth and prospects. For example, a majority of our Internet games depend on our players to download and install large client-side software, which can be well over one thousand megabytes in many cases and take many hours to download. Game players in the PRC have been increasingly turning to web browser-based games in cases where downloading large client-side software is inconvenient or impracticable. As such, we cannot assure you that game players in the PRC will continue to download and install such types of software to play Internet games, nor can we assure you that our existing game players will not, in the future, find downloading and installing large software packages inconvenient or impracticable or otherwise prefer the convenience and ease of use offered by browser-based or other games.

In addition, expanding our Internet game portfolio may add complexities to our Internet games business and require us to effectively adapt our business and management processes to address the unique operational challenges and different requirements of new Internet games in which we operate, which we may not be able to do due to the lack of institutional expertise or otherwise. Accordingly, if we fail to anticipate and successfully launch and operate games that effectively respond to changing consumer tastes and preferences in a timely manner, our revenue and profitability could be materially reduced, and our growth and prospects would suffer.

Our mobile games business has a short operating history, and the mobile games market in the PRC is subject to many uncertainties.

We have made significant efforts in recent years to develop our mobile games business. Prior to 2008, we did not have a separate mobile games business segment. As our mobile games business has grown, it has required separate management in respect of decision making, allocation of resources and assessment of performance. However, our mobile games business has a short operating history. As a result, there is limited financial data that can be used to evaluate our mobile games business and its potential to generate revenues in the future. Moreover, our past success and financial data regarding the mobile games segment may not be indicative of our future performance. We cannot assure you that we will be successful in developing our mobile games business, which will depend, among other things, on our ability to:

respond to market developments, including the development of new platforms and technologies, such as smartphone mobile gaming platform, and changes in pricing and distribution models, such as the advent of application stores, or “app stores”, operated by handset manufacturers;

respond to changes in policies of China Mobile or other PRC telecommunications operators relating to mobile games distributed through them;

maintain and diversify our distribution channels, including through our own wireless Internet sites, China Mobile and the other PRC telecommunications operators and handset manufacturers;

develop new high-quality mobile games that can achieve significant market acceptance, and timely improve our existing mobile games to extend their life spans and to maintain their competitiveness in the mobile games market;

successfully identify, acquire and integrate other mobile games development companies that could complement our internal mobile games development resources;

supplement our internally developed mobile games by acquiring mobile games from third party mobile game developers or cooperating with third party, mobile game developers to jointly develop mobile games; and

- develop and upgrade our mobile-game platform technologies.

In addition, the mobile games market is an emerging market in the PRC. The growth of this market and the level of demand and market acceptance of our mobile games are subject to many uncertainties. The development of this market and our ability to derive revenues from this market depend on a number of factors, some of which are beyond our control, including but not limited to:

- the growth rate of mobile data services in the PRC;
- changes in consumer demographics, tastes and preferences;
- changes in handset platform technologies that accommodate consumer needs and preferences;
- changes in mobile games distribution channels that accommodate consumer needs and preferences;

the extent that the mobile games business remains a key area of development for our telecommunications operator partners;

potential competition from established companies that develop and operate personal-computer-based Internet games and may enter the mobile games market; and

the popularity and price of new mobile games and merchandise and premium features embedded in games that we and our competitors may launch and distribute in the future.

Due to the uncertainties in connection with our mobile games business in particular and the PRC mobile games market generally, we cannot assure you that our mobile games business will contribute significantly to our future revenues. Our failure to successfully develop this business could have a material adverse effect on our business, financial condition, results of operations and prospects.

We face increasing competition in the PRC from providers of WVAS, mobile games and Internet games, which could reduce our market share and materially and adversely affect our financial condition and results of operations.

The PRC WVAS market has experienced increasingly intense competition. The MIIT reported on its website that more than 1,700 service providers held nationwide licenses as of December 31, 2011 to supply WVAS on the PRC telecommunications operators' networks. We compete with these companies primarily on the basis of brand, price, type and timing of service offerings, content, customer service, business partners and distribution channel relationships. We also compete with these companies for experienced and talented employees. While we believe that we have certain advantages over our competitors, some of them may have greater personnel and financial resources and a longer operating history than we do. In particular, Internet portal companies that provide WVAS may have an advantage over us as a result of their more established brand names, user bases and Internet distribution channels. Furthermore, our competitors may be able to develop or exploit new technologies faster than we can, or offer a broader range of products and services than we are presently able to offer.

The development, distribution and sale of mobile games are also highly competitive in the PRC. We compete for customers primarily on the basis of game quality, brand and price. We also compete for telecommunications operators to distribute our mobile games, principally on the basis of the popularity of our games among customers, our historical performance, perception of our sales potential and our relationships with content and brand licensors. Furthermore, we compete for content and brand licensors who supply game content and brands, mainly on the basis of the economic terms, such as royalty rates, of our cooperation agreements with the licensors, the licensors' perception of our ability to develop games and pre-load games in mobile handsets, our speed of execution, diversity of distribution channels and relationships with telecommunications operators. We also compete for experienced and talented employees in the mobile games business. Moreover, the entry of new competitors, such as developers of personal-computer-based Internet games, major media companies, traditional video game developers, content aggregators, mobile software providers and independent mobile games developers, would likely intensify competition in the mobile games market.

Increasing competition in this market could make it difficult for us to maintain or increase our market share and have a material adverse effect on our business, financial condition, results of operations and prospects.

The Internet games business, which we entered recently, is also highly competitive in the PRC. We believe that there are over 160 Internet games operators in the PRC as of December 31, 2011. Given the relatively low entry barriers to operating Internet games, we expect more companies to enter the Internet games industry in the PRC and a wider range of Internet games to be introduced to the PRC market. Our principal competitors in the PRC include Perfect World Co. Ltd, Shanda Interactive Entertainment Limited, Netease.com, Inc., Changyou.com Limited, Giant Interactive Group Inc. and Tencent Holdings Limited. Our potential competitors include major Internet portal operators, other domestic and foreign game developers and publishers and alliances between our existing and new competitors. Many of our competitors have significantly greater financial and marketing resources and name recognition than we do. Some of our competitors or potential competitors, especially major foreign internet games developers, have greater game development resources than we do. In addition, many of our competitors have developed and operated games that have proven commercially successful for a longer period of time than our games and have a larger portfolio Internet games than we do.

Moreover, our competitors may introduce new business models that may be more attractive to customers than the business models we currently use. We believe that competition in the PRC Internet games market may become more intense as increasing numbers of Internet games are introduced in the market. We cannot assure you that we will be able to compete successfully against any new or existing competitors, or against any new business models implemented by them. In addition, the increased competition in the Internet games industry may also reduce the number of our players or growth rate of our player base, or create pressure for us to reduce usage fees or the prices of certain in-game items. Any of these events could materially reduce our revenues and profitability.

We apply an item-based revenue model for all our Internet games, which is a relatively new revenue model, and which may have a negative impact on our financial condition and results of operations.

We have adopted an item-based revenue model for all of our Internet games, under which players are able to play the Internet games free of charge for an unlimited amount of time, but are charged for purchases of in-game items, such as performance-enhancing items, clothing, accessories and pets. While several other Internet games companies have adopted the item-based model, it is still relatively new compared to time-based billing models, and may create new risks and uncertainties for us. The item-based model will require us to design games that not only attract players to spend more time playing, but also encourage them to purchase in-game items. The sale of in-game items will require us to track closely consumer tastes and preferences, particularly as shown by in-game spending trends. In addition, the item-based model may raise additional concerns for the PRC regulators, who have expressed reservations over the amount of time that Chinese youths spent on Internet games. A model that does not charge based on time spent may be viewed by the PRC regulators as undesirable. We cannot assure you that the item-based revenue model will be successful, or that it will not have a negative impact on our financial condition and results of operations.

In addition, our revenue recognition policy for the item-based games relies on our estimates of the useful lives of various items associated with each of our item-based games. As we have adopted the item-based revenue model beginning in 2009, we have a limited operating history and data for our item-based games on which to base our revenue recognition policy for these games. With respect to permanent ownership items that we sell to players, we recognize revenues over the estimated useful lives of such items. We consider the average period that players typically play our games and other player-behavior patterns to calculate our best estimates for the useful lives of these permanent ownership items, which, in some cases, may be as long as the estimated useful life of the related game. Given the relatively short operating history of our item-based games, however, our estimate of the period that players typically play our games may not accurately reflect the actual useful lives of the items. We have been revising our estimates as we continue to gain operating data, and refining our estimation process and results accordingly. Any future revisions to estimates could adversely affect the time period during which we recognize revenues from these items. In particular, an increase in the estimated lives of these items would increase the period over which the revenues from the items are recognized. If we are required to make adjustments to our financial statements as a result of revisions to our estimates, it could materially and adversely affect market sentiments toward us, and the trading price of our ADSs could decline significantly.

We depend on a small number of Internet games for a significant portion of our Internet games revenues. As a result, any factors that could have an adverse impact on the development, marketing and distribution of these Internet games, or on our business relationships with the licensors of these Internet games, could material reduce our Internet games revenues, and have a material adverse effect on our business, financial condition, results of operations and prospects.

A substantial portion of our Internet games revenues is generated from purchases of in-game items by game players based on a small number of Internet games we offer. The revenues generated from these Internet games are responsible for a disproportionate amount of our Internet games revenues. In 2011, revenues generated by in-game items purchased by game players who play the World of Tanks game represented over 69% of our Internet games revenues. If the World Tank game players become dissatisfied with the World of Tanks game or with the in-game items, they may choose not to purchase additional in-game credits in the future.

Moreover, we depend on Internet games licensors whose games we have the rights to operate in the PRC or other markets to make quality in-game items, upgrades, enhancements, and localized updates and improvements to our licensed Internet games. For example, we entered into a cooperation arrangement with WarGaming.net LLP, the licensor of the World of Tanks game, under which WarGaming.net LLP is responsible for developing upgrades, enhancements and improvements to the World of Tanks game. In addition, WarGaming.net LLP is responsible for providing timely localized updates and enhancements to the game, as well as developing new in-game items that tracks the preferences and tastes of game players in the PRC. If WarGaming.net LLP ceased to cooperate with us, we would no longer be able to provide the World of Tanks game to game players in the PRC or generate the corresponding revenues from the game.

Due to the concentration of our Internet games revenue in a small number of Internet games and our dependence on licensors of certain Internet games to continue to develop new in-game items and to upgrade and enhance those games, any factors that could have an adverse impact on the development, marketing and distribution of these Internet games, or on our business relationships with the licensors of these Internet games, could material reduce our Internet games revenues, and have a material adverse effect on our business, financial condition, results of operations and prospects.

Our Internet games business depends on our ability to acquire and maintain licenses to popular Internet games, as well as on our ability to license our internally-developed Internet games outside the PRC, and if we are unable to maintain or acquire licenses to popular Internet games, or fail to manage risks associated with licensing our internally-developed games, our business, financial condition, results of operations and prospects could be materially and adversely affected.

We have licensed six of our Internet games to operators outside the PRC. We plan to license our existing and new internally-developed games in additional countries and regions in the future. We would also need to license Internet games from other developers from time to time in order to diversify our Internet games revenues. Our ability to acquire and maintain licenses to popular Internet game from other Internet games developers, as well as our ability to license our internally-developed Internet games outside the PRC, depends on a number of factors, such as:

- identifying and maintaining good relationships with (i) licensees who are knowledgeable about, and can effectively distribute and operate our Internet games in, international markets and (ii) licensors whom we rely on to provide our game players with upgrades, expansion packs, enhancements or improvements;

- developing Internet games and expansion packs catered to markets outside the PRC;

- renewing our license agreements with licensees upon their expiration;

changes in the terms, or termination, of or the failure to renew, the Internet games licenses with our licensors, which could be caused by, among others, contractual breach by us or our licensors, demand for new royalty payments by our licensors or refusal by our licensors to renew licenses;

maintaining the reputation of our company and our games, given that our Internet games are operated by licensees in international markets pursuant to their own standards;

maintaining the reputation and continued marketability of our licensed games if our licensors cannot provide our game players with satisfactory upgrades, expansion packs or enhancements;

protecting our intellectual property rights both inside and outside the PRC;

complying with the different commercial and legal requirements of the international markets in which we offer our games, or from which we license our games, such as Internet games import regulatory procedures, taxes and other restrictions and expenses;

fluctuations in currency exchange rates; and

interruptions in cross-border Internet connections or other system failures.

Moreover, certain countries in Europe are considering banning the distribution of Internet games with violent content. Korea, which is one of the largest Internet games markets in Asia, also requires Internet games companies to obtain a rating classification for Internet games and implement procedures to restrict the distribution of Internet games to minors. As a result of such measures, our international expansion may also be adversely affected by public opinion or government policies outside the PRC. If we are unable to maintain or acquire licenses to popular Internet games, or fail to manage risks associated with licensing our internally-developed games, our business, financial condition, results of operations and prospects could be materially and adversely affected.

We could be liable for breaches of security of our website and third party online payment channels, which may have a material adverse effect on our reputation, business and prospects.

A portion of our Internet games revenues are generated from sales through third party online payment platforms. In such transactions, secure transmission of confidential information, such as customers' credit card information, personal information and billing addresses, over public networks, in some cases including our websites for our Internet games, is essential to maintain consumer confidence. While we have not experienced any breach of our security measures to date, we cannot assure you that our current security measures are adequate. In addition, we expect that an increasing amount of our sales will be conducted over the Internet as a result of the growing use of online payment systems over time. Over the same period, online theft of confidential information will likely increase and we must be prepared to increase our security measures and efforts so that our customers have confidence in the reliability of the online payment systems that we use. We do not have control over the security measures of our third party online payment vendors, and we cannot assure you that these vendors' security measures are adequate or will be adequate with the expected increased usage of online payment systems. Security breaches of the online payment systems that we use could expose us to litigation and possible liability for failing to secure confidential customer information, and could harm our reputation, ability to attract customers and ability to encourage customers to purchase in-game items, any of which could have a material adverse effect on our reputation, business and prospects.

Undetected errors or flaws in our services or failure to maintain effective customer service could harm our reputation or decrease market acceptance of our games, which may materially and adversely affect our financial condition and results of operations.

Our products and services, such as our WVAS, mobile games and Internet games, may contain errors or flaws, which may only become apparent after their release, particularly as we often launch new products or services or introduce new features to existing products or services under tight time constraints. From time to time, our customers have informed us of flaws affecting their experience with our products or services, which we were generally able to resolve promptly. Furthermore, customer service is critical for retaining customers, and we may not be able to maintain and continuously improve the quality of our services to meet customers' expectations. If our products or services contain programming errors or other flaws, or if we fail to provide effective customer service, our customers may be less inclined to continue using our products or services or recommend them to other potential customers, and may use our competitors' products and services. Undetected errors, defects and unsatisfactory customer service can disrupt our operations, adversely affect the experience of our customers, harm our reputation, cause our customers to stop using

our products and services, and delay market acceptance of our products and services, any of which could materially and adversely affect our financial condition and results of operations.

The trading price of our ADSs has been volatile and may continue to be volatile regardless of our operating performance.

The trading price of our ADSs has been and may continue to be subject to wide fluctuations. During the three-year period from December 31, 2008 until December 31, 2011, the closing prices of our ADSs ranged from US\$2.44 to US\$16.00 per ADS, and the closing price on April 13, 2012 was US\$5.26 per ADS. The market price for our ADSs may continue to be volatile and subject to wide fluctuations in response to factors including, among others, the following:

China Mobile and other PRC telecommunications operators' future policies and measures taken toward WVAS providers;

actual or anticipated fluctuations in our quarterly operating results;

conditions in the WVAS, mobile games, wireless Internet and Internet games markets;

changes in the economic performance or market valuations of other companies that are perceived to be comparable to us;

announcements by us or our competitors of new products, acquisitions, strategic partnerships, joint ventures or capital commitments;

addition or departure of key personnel;

changes in financial estimates by securities research analysts;

fluctuations of exchange rates between RMB and the U.S. dollar;

intellectual property litigation;

general conditions in the global financial markets; and

general economic or political conditions in the PRC.

The stock market in general, and the market prices for Internet and wireless Internet related companies with operations in the PRC in particular, have experienced volatility that has sometimes been unrelated to the operating performance of such companies. These broad market and industry fluctuations may materially and adversely affect the price of our ADSs, regardless of our operating performance. In addition, sales of our ADSs in the public market, or the perception that such sales could occur, could cause the market price of our ADSs to decline. Certain of our executive officers who hold our shares or ADSs may sell their shares or ADSs subject to applicable volume and other restrictions under Rule 144 of the Securities Act. To the extent that such shares or ADSs are sold into the market, the market price of our ADSs could decline.

Failure to achieve and maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have a material adverse effect on our business, our reputation, financial condition and results of operations and could cause the market price of our ADSs to decline significantly.

We are subject to reporting obligations under the U.S. Federal securities laws. We are required by the U.S. Securities and Exchange Commission, or SEC, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, or

Sarbanes-Oxley Act, to include a report by our management on our internal control over financial reporting in our annual reports on Form 20-F that contains an assessment by management of the effectiveness of our internal control over financial reporting. In addition, our annual reports on Form 20-F shall include an independent registered public accounting firm's attestation report on the effectiveness of our internal control over financial reporting.

Although our management and an independent registered public accounting firm have concluded that our internal controls over our financial reporting were effective as of December 31, 2011, the end of the period covered by this annual report, we may fail to maintain effective internal controls over financial reporting in the future, in which case we and the independent registered public accounting firm may not be able to conclude that we have effective internal control over financial reporting. In addition, even if our management concludes at the end of future reporting periods that our internal controls are effective, the independent registered public accounting firm, or the relevant regulator, may disagree. If such independent registered public accounting firm is not satisfied with our internal control over financial reporting or the level at which our internal control over financial reporting is documented, designed or operated, or if such independent registered public accounting firm interprets the requirements, rules or regulations differently from us, then it may issue an adverse opinion. Any of these possible outcomes could result in an adverse reaction in the financial marketplace due to a loss of investor confidence in the reliability of our consolidated financial statements, which ultimately could cause the market price of our ADSs to decline significantly. We also may need to incur significant costs and use significant management and other resources in an effort to comply with Section 404 of the Sarbanes-Oxley Act and other requirements.

Moreover, internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls or fraud. As a result, even effective internal control over financial reporting can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we fail to maintain the adequacy of our internal controls over financial reporting, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business could be harmed, we could fail to meet our reporting obligations, and the market price of our ADSs could materially decrease.

Business growth and a rapidly changing operating environment may strain our limited resources.

We have limited operational, administrative and financial resources, which may be inadequate to sustain the growth we want to achieve. As our user base increases and as we diversify into other business segments, we will need to increase our investment in our technological infrastructure, facilities and other areas of operations. In particular, our product development, customer service and sales and marketing are important to our future success. If we are unable to manage our growth and expansion effectively, the quality of our services and our customer support may deteriorate and our business may suffer. Any deterioration in performance could prompt China Mobile or other PRC telecommunications operators to cease offering our services over their networks. Our future success will depend on, among other things, our ability to:

· develop and quickly introduce new services, adapt our existing services and maintain and improve the quality of all of our services, particularly as new mobile technologies are introduced;

· effectively maintain our relationships with China Mobile and other PRC telecommunications operators;

· enter into and maintain relationships with our business partners;

· develop attractive mobile and Internet games that can generate recurring revenues;

· continue training, motivating and retaining our existing employees, attract new employees and integrate new employees, including into our senior management;

· expand the percentage of our revenues that are recurring and are derived from monthly subscription-based services;

· develop and improve our operational, financial, accounting and other internal systems and controls; and

maintain adequate controls and procedures to ensure that our periodic public disclosure under applicable laws, including the U.S. Federal securities laws, is complete and accurate.

We may need additional capital and may not be able to obtain such capital on acceptable terms.

Capital requirements are difficult to plan in our rapidly changing industry. We currently expect that we will need capital to fund our future acquisitions, service development, technological infrastructure and sales and marketing activities. Our ability to obtain additional capital on acceptable terms is subject to a variety of uncertainties, including:

investors' perceptions of, and demand for, securities of telecommunications value-added services companies and/or Internet games companies;

conditions of the U.S. and other capital markets in which we may seek to raise funds;

our future financial condition, results of operations and cash flows;

PRC governmental regulation of foreign investment in value-added telecommunications companies;

economic, political and other conditions in the PRC; and

PRC governmental policies relating to foreign currency borrowings.

Any failure by us to raise additional funds on terms favorable to us, or at all, may have a material adverse effect on our business, financial condition and results of operations. For example, we may not be able to carry out parts of our growth strategy to acquire assets, technologies and businesses that are complementary to our existing business or necessary to maintain our growth and competitiveness.

We were classified as a passive foreign investment company, or PFIC, in 2011, which resulted in adverse United States Federal income tax consequences to U.S. holders of our ADSs and may continue to result in additional adverse United States Federal income tax consequences to such holders in 2012 and future taxable years.

We have substantial passive assets in the form of cash and cash equivalents, which caused us to be classified as a PFIC for U.S. Federal income tax purposes in 2011. We cannot assure you that we will not continue to be classified as a PFIC in 2012 or future taxable years. The determination of whether we would continue to be a PFIC would be principally based upon:

the composition of our assets, including goodwill, the amount of which will depend, in part, on our total net assets and the market value of our ordinary shares and ADSs, which is subject to change; and

the amount and nature of our income from time to time.

We have limited control over these variables. Furthermore, with regards to any additional capital markets or corporate finance transactions we might conduct in the future, we cannot, at this stage, specify the timing, amounts or the particular uses of the net proceeds. As a result, we cannot provide any assurance as to how the net proceeds of any such transactions would impact whether we are classified as a PFIC in any future periods.

In respect of any taxable year during which we are a PFIC, U.S. investors will be subject to adverse U.S. Federal income tax consequences (and may be subject to adverse U.S. Federal income tax consequences in subsequent years as well). For further discussion regarding our status as a PFIC, please see “Item 10 — Additional Information — Taxation — United States Taxation — PFIC Rules.” U.S. investors are urged to consult their own tax advisors regarding the application of the PFIC rules to their particular circumstances.

The exercise of the warrant issued to Nokia Growth Partners could result in substantial dilution to the holders of our ordinary shares and ADSs and may depress the market price of our ADSs.

In March 2009, we issued to Nokia Growth Partners II, L.P., or NGP, a convertible senior note due in 2014 with an aggregate principal amount of US\$6,775,400, or the convertible senior note, and a warrant to purchase up to 80 million of our ordinary shares, exercisable within five years, or the warrant. In February 2011, we prepaid 70% of the aggregate principal amount of the convertible senior note, plus any accrued but unpaid interest. Subsequently, on March 1, 2012, NGP fully converted the convertible senior note into 22.8 million of our ordinary shares, which is equivalent to 570,000 of our ADSs. The issuance of additional ordinary shares under the warrant may result in substantial further dilution to the holders of our ordinary shares and ADSs, and the market price of our ADSs could decline significantly. The sale of the ordinary shares issued as a result of the exercise by NGP of the convertible senior note or upon the exercise of the warrant, or the perception that such events may occur, could also materially and adversely affect the market price of our ADSs. Furthermore, we may issue additional securities in the future that may have a dilutive effect to the holders of our ordinary shares and ADSs.

We may not be able to adequately protect our intellectual property, and we may be exposed to infringement claims by third parties.

We believe the copyrights, service marks, trademarks, trade secrets and other intellectual property we use are important to our business, and any unauthorized use of such intellectual property by third parties may harm our business and reputation. We rely on the intellectual property laws and contractual arrangements with our employees, clients, business partners and others to protect such intellectual property rights. Third parties may be able to obtain and use such intellectual property without authorization. Furthermore, the validity, enforceability and scope of protection of intellectual property in the WVAS, mobile games, and Internet games industries in the PRC is uncertain and still evolving, and these laws may not protect intellectual property rights to the same extent as the laws of some other jurisdictions, such as the United States. Moreover, litigation may be necessary in the future to enforce our intellectual property rights, which could result in substantial costs and diversion of our resources, and have a material adverse effect on our business, financial condition and results of operations.

Due to the manner in which we obtain, collect, produce and aggregate content and applications for our WVAS, mobile games, wireless Internet sites and Internet games, and because our services may be used for the distribution of information, claims may be filed against us for defamation, negligence, copyright or trademark infringement or other violations. In addition, third parties could assert claims against us for losses in reliance on information distributed by us. When we license third party content or other intellectual properties, we rely on the licensor's representations and warranties of its rights or titles to the content or intellectual properties. Although we perform reasonable due diligence, we cannot guarantee that such a licensor actually has the legal rights or titles to the content or intellectual properties that we distribute or use. We cannot assure you that third parties will not assert claims against us or challenge the validity of our license agreements. If we are found to have infringed any intellectual property rights of others, we may be enjoined from using such intellectual property, and we may incur licensing fees or be forced to develop alternative intellectual property. We may also incur significant costs in investigating and defending the claims even if they do not result in liability.

We are not able to register the Chinese name of our service mark "KongZhong Network" in the PRC, and we may not be able to effectively prevent its unauthorized use by third parties.

We are unable to register the Chinese name of "KongZhong Network" as our service mark because it is deemed a generic term under existing PRC trademark laws, rules and regulations, which prohibit registration of generic terms as trademarks or service marks. As a result, we may not be able to effectively prevent the unauthorized use of the Chinese name of our service mark, "KongZhong Network," and our brand name and reputation may be materially and adversely affected by such unauthorized use.

We may fail to realize the anticipated benefits of our acquisitions, and such acquisitions may also expose us to uncertainties and risks, any of which could materially and adversely affect our business, financial condition, results of

operations and prospects.

One of our growth strategies is to continue expanding our businesses and game development capabilities and resources through, among others, acquisitions. We believe that growing our businesses and game development capabilities and resources both organically and through selective acquisitions will enable us to expand our Internet and mobile games businesses more quickly and efficiently. However, we may fail to realize the anticipated benefits of our acquisitions, and such acquisitions may also expose us to uncertainties and risks. In particular, acquisitions may not meet our expectations and the realization of the anticipated benefits may be delayed or reduced as a result of numerous factors, some of which are outside of our control. These factors include, among other things:

- unforeseen contingent risks or latent liabilities relating to acquisitions that may only become apparent in the future;

- difficulties in managing a much larger business;

- loss of key personnel; and

- increases in competitions in the PRC Internet and mobile games industries, which, among other things, may require us to increase our development and/or marketing efforts.

Furthermore, acquisitions may also expose us to uncertainties and risks, including uncertainties and risks associated with:

the management and development of acquired businesses;

the integration of acquired businesses with our existing businesses and game development resources and infrastructures;

the integration of our accounting policies and procedures with those of acquired businesses;

unforeseen or potential liabilities and exposures relating to acquired businesses and their past financial results;

the diversion of financial or other resources from our existing businesses; and

potential loss of, or harm to, relationships with employees or customers.

For example, our acquisition of Dacheng was an important transaction that allowed us to diversify our revenue sources, lessen our dependence on telecommunications operators, benefit from increased economies of scale, improve our overall competitiveness and lay the foundation for sustainable long-term growth. However, the scale, scope and nature of the integration efforts required in connection with the Dacheng acquisition presented significant challenges to our then-existing businesses and management personnel. Accordingly, given the many challenges and uncertainties relating to acquisitions, we cannot assure you that we will be able to successfully integrate acquired businesses, or that any acquisition will contribute significantly to our future revenues or our growth and expansion, or at all, or that any acquisition will not result in losses for us for a prolonged period of time, the occurrence of any of which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Future acquisitions may severely disrupt our ability to manage our business as well as our future growth.

Selective acquisitions form part of our strategy to further expand our business and growth prospects. If we are presented with appropriate opportunities, we may acquire additional businesses, technologies, services or products that are complementary to our business, such as Dacheng. Any acquisition and the subsequent integration of new companies into our company may require significant attention from our management to ensure that, among other things, the acquisition does not disrupt our relationships with the telecommunications operators or affect our users' opinion of our services and customer support, and to ensure that the acquired company is effectively integrated with our existing operations. The diversion of our management's attention and any difficulties encountered in any integration process could have an adverse effect on our ability to manage our business. Acquisitions may also expose us to risks, including risks associated with the assimilation of new operations, services and personnel, unforeseen or hidden liabilities, the diversion of resources from our existing businesses and technologies, the inability to generate sufficient revenues to offset the costs and expenses of acquisitions and potential loss of, or harm to, relationships with

employees and content providers. Given the sophisticated technologies used in the WVAS, mobile games, wireless Internet and Internet games industries, the successful, cost-effective integration of other businesses' technology platforms and services into our company will also be a critical and highly complicated aspect of any acquisition. Acquisitions may also result in potentially dilutive issuances of equity securities.

In addition, we are required under U.S. GAAP to review our intangible assets with definite life for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Goodwill and intangible assets with indefinite life are required to be tested for impairment at least annually. Factors that may be considered a change in circumstances indicating that the carrying value of our intangible assets may not be recoverable include a decline in stock price and market capitalization and slower growth rates in our industry. We may be required to record a charge to earnings in our financial statements during the period in which any impairment of our goodwill or intangible assets is determined. For example, in the third quarter of 2011, we recorded a provision of US\$20.26 million for impairment of intangible assets and goodwill associated with the WVAS unit. As of December 31, 2011, our carrying value of goodwill and intangible assets arising from acquisitions was approximately US\$75 million.

We have limited business insurance coverage.

The insurance industry in the PRC is still at an early stage of development. Insurance companies in the PRC offer limited business insurance products, and do not, to our knowledge, offer business liability insurance. As a result, we do not have any business liability insurance coverage for our operations. Moreover, while business disruption insurance is available, we have determined that the risks of disruption and cost of the insurance are such that we do not require it at this time. Any business disruption, litigation or natural disaster could result in substantial costs and diversion of resources.

Our Articles of Association contain anti-takeover provisions that could adversely affect the rights of holders of our ordinary shares and ADSs.

Our Articles of Association include certain provisions that could limit the ability of others or discourage a third party to acquire control of our company and thus deprive holders of our ordinary shares and ADSs of the opportunity to sell their ordinary shares or ADSs at a premium over the prevailing market price. These provisions provide for, among others, the following:

- a classified board structure, with three classes of board members and each class having a three-year term;

· authority of our Board of Directors, or the Board, to issue up to a total of 1,000,000,000,000 ordinary shares, with or without preferred, deferred or other special rights or restrictions, whether with regard to dividend, voting, return of capital or otherwise and to such persons, at such time and on such other terms as the directors think proper;

· power of our Board to elect directors either as an addition to the existing directors or to fill a vacancy resulting from death, resignation, retirement, disqualification, removal from office or any other reason; and

- the directors' discretion to decline to register any transfer of ordinary shares without assigning any reason therefore.

Risk Relating to Our Corporate Structure

Our business and operations could be significantly disrupted, and we could be subject to sanctions, if the contractual arrangements between us and our consolidated variable interest entities that we depend on for operating our WVAS, mobile games, wireless Internet sites and Internet games are found to be non-compliant with applicable PRC law.

Under applicable PRC law, foreign investment in the PRC enterprises that provide value-added telecommunications services, including Internet content services, is subject to an ownership limitation of not more than 50%. In addition, foreign investment in Internet game operators in the PRC is also subject to restrictions. In particular, the PRC General Administration of Press and Publication, which is responsible for the registration of Internet games operated in the PRC, published a notice in September 2009 indicating that foreign investors are prohibited from obtaining control over Internet game operators in the PRC or participating in the Internet games sector through the establishment of joint venture companies or contractual or technical arrangements. As a result, our ability to directly engage in value-added telecommunications services or Internet games services is severely restricted.

We and our subsidiaries, KongZhong Information Technologies (Beijing) Co., Ltd., or KongZhong Beijing, KongZhong China Co., Ltd., or KongZhong China, and Simlife (Beijing) Science Co., Ltd., or Simlife Beijing, are considered foreign persons or foreign-invested enterprises under applicable PRC law. As a result, we operate our WVAS, mobile games, wireless Internet sites and Internet games in the PRC through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, each of which is owned by PRC citizens. We do not own any equity interest in these operating companies, which are considered to be our consolidated variable interest entities for U.S. GAAP purposes, but are able to enjoy the economic benefits through contractual arrangements entered into between us and these operating companies, including contractual arrangements relating to the provision of loans, provision of services and certain corporate governance and shareholder rights matters. These operating companies conduct substantially all of our operations and generate substantially all of our revenues, and also hold the licenses and approvals that are essential to our business. For a detailed description of these contractual arrangements, see “Item 7 — Related Party Transactions — Contractual Arrangements Relating to our Operating Companies.”

As the applicable PRC laws, rules and regulations governing the Internet games sector are evolving and subject to differing interpretations, there are substantial uncertainties regarding the validity and enforceability of the contractual arrangements between us and our consolidated variable interest entities. We have been advised by our PRC legal counsel, King & Wood Mallesons, that each of the contractual arrangements with our consolidated variable interest entities constitutes a valid and legally binding obligation under applicable PRC law. In addition, King & Wood Mallesons is of the opinion that, with respect to Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, no consent, approval or license, other than those already obtained, is required under any existing PRC laws, rules and regulations for the effectiveness and enforceability of the ownership structures, contractual arrangements, businesses and operations of these companies. We cannot assure you, however, that the relevant PRC regulatory authorities will not ultimately determine that these contractual arrangements are non-compliant with applicable PRC laws, rules and regulations.

If we or our operating companies were found to violate any existing or future PRC laws, rules or regulations, the relevant PRC regulatory authorities would have broad discretion in dealing with such violation, including, without limitation:

levying fines;

confiscating income;

revoking business licenses;

shutting down servers or blocking websites;

requiring us to revise our ownership structure or restructure our operations; and/or

requiring the discontinuation of businesses.

Any of these or similar actions could cause significant disruptions to our business, as well as materially reduce our revenues, profitability and cash flows.

Our contractual arrangements with Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng may not be as effective in providing operational control as direct ownership of these businesses and may be difficult to enforce.

The applicable PRC laws, rules and regulations currently restrict foreign ownership of companies that provide value-added telecommunications services, which include WVAS, mobile games and Internet content services, or that operate Internet games. As a result, we conduct substantially all of our operations and generate substantially all of our revenues through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng pursuant to a series of direct or indirect contractual arrangements with them and their respective shareholders. These agreements may not be as effective in providing control over our operating companies as direct ownership. In particular, our operating companies could fail to perform or make payments as required under the contractual agreements, and we will have to rely on the PRC legal system to enforce these agreements, which we cannot be certain would be effective.

Perfection of the pledges in our equity pledge agreements with our consolidated variable interest entities and their shareholders may not be effective due to failure to register these equity pledge agreements.

Under our equity pledge agreements with our consolidated variable interest entities and their shareholders, these shareholders have agreed to pledge all of their respective equity interests in the consolidated variable interest entities to us. The purpose of such pledges is to secure the performance of our consolidated variable interest entities' obligations under the various contractual arrangements, including the business operation agreements and technology development agreements. Under applicable PRC laws, pledges under equity pledge agreements are created by recording the pledges on our consolidated variable interest entities' registers of shareholders and registering the pledges with the relevant local SAIC. If we fail to properly register with the SAIC any of our equity pledge agreements or future pledges of equity interests by shareholders of our consolidated variable interest entities or if our consolidated variable interest entities or their shareholders breach their obligations under the agreements with us, we may not be able to successfully enforce these pledges, which could significantly disrupt our business operations and have a material adverse effect on our business, financial condition, results of operations and prospects.

The shareholders of our consolidated variable interest entities may have potential conflicts of interest with us, which may substantially disrupt our business.

The registered shareholders of our consolidated variable interest entities are our directors, officers or employees and their relatives. Conflicts of interest may arise between these shareholders' duties to us and our consolidated variable interest entities. If such conflicts arise, these shareholders may not act in our best interests and such conflicts of interest may not be resolved in our favor. In addition, these shareholders may breach or cause our consolidated variable interest entities to breach or refuse to renew their existing contractual arrangements that allow us to exercise effective control over them and to receive economic benefits from them. The laws of the Cayman Islands provide that directors of a company owe a fiduciary duty to the company, which requires them to act in good faith and in the best interests of the company and not to use their positions for personal gain. If certain shareholders of our consolidated variable interest entities do not comply with their fiduciary duties to us as our designated directors, or if we cannot resolve any conflicts of interest or disputes between us and any current or future registered shareholders of our consolidated variable interest entities, we would have to rely on legal proceedings to remedy the situation, the outcome of which is uncertain and which may result in substantial disruptions to our business.

The dividends and other distributions on equity we may receive from our subsidiaries are subject to restrictions under PRC law or agreements that our subsidiaries may enter into with third parties.

We are a holding company and rely largely on dividends and other distributions paid by our subsidiaries for cash, financing and other requirements. Our wholly-owned subsidiaries, KongZhong Beijing, KongZhong China and Simlife Beijing, have entered into contractual arrangements with Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng through which we conduct business and receive revenues in the

form of service fees. We rely on dividends and other distributions on equity paid by KongZhong Beijing, KongZhong China and Simlife Beijing, as well as service fees from Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, for our cash requirements in excess of any cash raised from investors and retained by us. If any of KongZhong Beijing, KongZhong China or Simlife Beijing incurs debt in the future, the instruments governing the debt may restrict its ability to pay dividends or make other distributions to us.

Furthermore, PRC law requires that payment of dividends by each of KongZhong Beijing, KongZhong China and Simlife Beijing can be made only out of their respective net income, if any, determined in accordance with PRC accounting standards and regulations. Under the applicable PRC laws, KongZhong Beijing, KongZhong China and Simlife Beijing also are required to set aside no less than 10% of their respective after-tax net income each year as reserve funds unless such reserve funds, after making up losses of preceding years, have reached 50% of their respective registered capital, and these reserves are not distributable as dividends. Any limitation on the payment of dividends by our subsidiaries could have a material adverse effect on our ability to grow, fund investments, make acquisitions, pay dividends and otherwise fund and conduct our business.

In addition, under the PRC enterprise income tax law that took effect on January 1, 2008, and its implementation regulation, a non-PRC-resident enterprise's net income originating from "sources within the PRC" will be subject a 10% enterprise income tax, or EIT, rate. Whether a dividend payment constitutes income from "sources within the PRC" is determined by the location of the enterprise which pays the dividend. Income tax on dividends from the PRC payable to a non-PRC-resident enterprise is at a rate of 10%. As a result, KongZhong Beijing, KongZhong China and Simlife Beijing may be required to withhold all or part of such income tax when paying us dividends. See "Item 5 — Operating and Financial Review and Prospects — Taxation."

We are controlled by a small group of our existing shareholders, whose interests may differ from other holders of our ordinary shares or ADSs.

Leilei Wang, our Chief Executive Officer and the Chairman of our Board of Directors, and Nick Yang, the former Vice Chairman of our Board of Directors, own 22.3% and 7.9% of our outstanding ordinary shares, respectively. Accordingly these shareholders acting together will have significant influence in determining the outcome of any corporate transaction or other matter submitted to the holders of our ordinary shares and ADSs for approval, including mergers, consolidations, the sale of all or substantially all of our assets, election of Directors and other significant corporate actions. They will also have significant influence in preventing or causing a change in control. In addition, without the consent of these shareholders, we may be prevented from entering into transactions that could be beneficial to us. The interests of these shareholders may differ from the interests of the other holders of our ordinary shares or ADSs.

Our contractual arrangements with our consolidated variable interest entities and their respective shareholders may require us to pay additional taxes.

Arrangements and transactions among related parties may be subject to audits or challenges by the PRC tax authorities. We could face material adverse tax consequences if the PRC tax authorities determine that our contractual arrangements between us and our consolidated variable interest entities are not arm's length transactions. If this were to occur, the tax authorities could adjust our subsidiaries' and our consolidated variable interest entities' income in the form of a transfer pricing adjustment. A transfer pricing adjustment could, for PRC tax purposes, increase the tax liabilities of our subsidiaries and our consolidated variable interest entities. If our subsidiaries and our consolidated variable interest entities' tax liabilities increase or if our subsidiaries and our consolidated variable interest entities are found to be subject to late payment fees or other penalties, our financial condition and results of operations could be materially and adversely affected.

Risks Relating to Our Industry

Our ability to generate revenues could suffer if the PRC markets for WVAS, mobile games and Internet games do not develop as anticipated.

The WVAS, mobile games and Internet games markets in the PRC have evolved rapidly in recent years, with the introduction of new and advanced services, development of consumer preferences, changes in policies and guidelines initiated government agencies and our partners, market entry by new competitors and adoption of new strategies by existing competitors. Accordingly, it is extremely difficult to accurately predict consumer acceptance and demand for various existing and potential new offerings and services, and the future size, as well as composition and growth, of

these markets. Furthermore, given the limited history and rapidly evolving nature of our markets, we cannot predict the prices that users will be willing to pay for our services and games or whether users will have concerns about security, reliability, cost and quality of service associated with WVAS, mobile games and Internet games. If acceptance of our WVAS, mobile games and Internet games is different from what we anticipate, our ability to maintain or increase our revenues and net income could be materially and adversely affected.

The laws, rules and regulations governing the WVAS, mobile games and Internet games industries in the PRC are developing and subject to future changes. Substantial uncertainties exist as to the interpretation and implementation of the applicable laws, rules and regulations.

In recent years, the PRC government has begun to promulgate laws, rules and regulations applicable to the WVAS, mobile games, Internet, wireless Internet and Internet games industries in the PRC, many of which are relatively new and untested and are subject to future changes. In addition, various regulatory authorities of the central PRC government, such as the State Council of the PRC, or the State Council, the MIIT, the MOC, the SAIC, the SARFT, the MPS and the GAPP, are empowered to issue and implement rules to regulate certain aspects of Internet-related and wireless Internet-related services and activities. Furthermore, certain local governments also have promulgated local rules applicable to Internet-related and wireless Internet-related services and activities within their respective jurisdictions. As the Internet industry itself is at an early stage of development in the PRC, it is likely that new laws, rules and regulations will be promulgated in the future to address issues that may arise from time to time. As a result, uncertainties exist regarding the interpretation and implementation of current and future applicable PRC laws, rules and regulations. We cannot assure you that we will not be found in violation of any current or future PRC laws, rules or regulations due to these uncertainties, in which case we could be subject to various penalties, including redressing the violations, confiscation of income, imposition of fines or even suspension of our operations. See “Item 4 — Information on the Company — Regulation.”

Each of Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, BJXR and Beijing Chengxitong has obtained a telecommunications and information services operating license for their Internet content businesses from the Beijing Telecommunications Administration Bureau. In addition, each of Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, BJXR, Beijing Chengxitong, Zhulang, Mailifang, Xinreli and Dacheng has obtained a value-added telecommunications license from the MIIT in order to provide services in multiple provinces, autonomous regions and municipalities. Each of Beijing AirInbox, Dacheng and Xinreli has an Internet culture business operations license for our Internet games business. If any of Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, BJXR, Beijing Chengxitong, Zhulang, Mailifang, Xinreli, or Dacheng fails to obtain or maintain any required licenses or permits, it may be subject to various penalties, including redressing the violations, confiscation of income, imposition of fines or even suspension of its operations. Any of these measures could materially disrupt our business and materially and adversely affect our financial condition and results of operations.

The PRC government has promulgated a series of rules, regulations and policies that may have negative impact on the Internet games industry, and we cannot assure you that the PRC government will not promulgate similar rules, regulations or policies in the future.

The PRC government has adopted a series of rules, regulations and policies to monitor and control the Internet games industry in response to, among other things, perceived addiction to Internet games and its perceived negative social effects, particularly for minors. For example, PRC governmental authorities issued a notice in April 2007 requiring all PRC Internet games operators to adopt an “anti-fatigue system” in an effort to curb addiction to Internet games by minors, under which game operators are required to reduce the value of game benefits for minor game players as their continuous playing time reaches certain thresholds. Internet game players in the PRC are also required to register their identity numbers before they can play. In addition, PRC governmental agencies have issued a series of rules and regulations limiting the use of virtual currencies in Internet games, which may result in higher costs for the operation of our Internet games and lowers sales of virtual items in our Internet games.

We cannot assure you that the PRC government will not promulgate similar rules, regulations or policies in the future, particularly during periods when public opinion does not favor Internet games. Such rules, regulations and policies may significantly reduce our revenues and net income from Internet games and materially and adversely affect our business, financial condition, results of operations and prospects. See “Item 4 — Information on the Company — Regulation.”

The PRC government or the telecommunications operators may prevent us from distributing, and we may be subject to sanctions for, content that any of them believes is inappropriate.

The PRC government has promulgated regulations governing telecommunications service providers, Internet access, the distribution of news and other information and the operation of Internet games. In the past, the PRC government has stopped the distribution of information over the Internet that it believes violates PRC law, including content that it

deems to be obscene, to incite violence, to endanger national security, to be contrary to the national interest or to be defamatory. The telecommunications operators also have their own policies that restrict the distribution by WVAS providers and wireless Internet sites of content they deem inappropriate. For instance, they have punished certain providers for distributing content deemed by them to be obscene. These punishments have included censoring of content, delays in payments of fees by the telecommunications operators to the offending service provider, forfeiture of fees owed by the telecommunications operators to the offending service provider and suspension of the service on the telecommunications operators' networks. Accordingly, even if we comply with PRC governmental regulations relating to licensing and foreign investment restrictions, if the PRC government or the telecommunications operators were to take any action to limit or prohibit the distribution of information we provide or to limit or regulate any current or future content or services available to our users, our revenues could be materially reduced, traffic to our wireless Internet sites decreased and our reputation severely damaged.

On November 30, 2009, China Mobile implemented a series of measures targeted at eliminating offensive or unauthorized content, including pornographic content, on PRC-based WAP sites. As a result, China Mobile and other PRC telecommunications operators suspended billing for their customers for all WAP and G+ mobile gaming platform services, including those services that do not contain offensive or unauthorized content, on behalf of third party service providers of such services. China Mobile and other operators have not yet indicated how long its new measures will remain in effect or whether it would expand its current measures. Mainly as a result of these measures, our WVAS and mobile games revenues in the fourth quarter of 2009 decreased slightly as compared to the third quarter of 2009. We cannot assure you that we will not be subject to sanctions in the future for violating content-related regulations of the PRC government or policies of any of the telecommunications operators.

Network interruptions, security breaches or computer virus attacks could have a material adverse effect on our business, financial condition and results of operations.

Any failure to maintain the satisfactory performance, reliability, security and availability of our network infrastructure may cause significant harm to our reputation and our ability to attract and maintain users. Major risks involved in such network infrastructure include, among others, any breakdowns or system failures resulting in a prolonged shutdown of all or a material portion of our servers, including failures which may be attributable to sustained power outages, or effort to gain unauthorized access to our systems causing loss or corruption of data or malfunctions of software or hardware. In addition, certain players of our Internet games may attempt to obtain unauthorized access to our Internet games to gain unfair advantages in the games. The growth of our business may also be inhibited if the public concern over the security and privacy of confidential user information transmitted over the Internet and wireless networks is not adequately addressed.

Our network systems are vulnerable to damage from fire, flood, power loss, telecommunications failures, computer viruses, hackings and other similar events. Any network interruption or inadequacy that causes interruptions in the availability of our services or deterioration in the quality of access to our services could reduce our user satisfaction and our competitiveness. In addition, any security breach caused by hacking, which involves effort to gain unauthorized access to information or systems, or to cause intentional malfunctions or loss or corruption of data, software, hardware or other computer equipment, and the inadvertent transmission of computer viruses could have a material adverse effect on our business, financial condition and results of operations. We do not maintain insurance policies covering losses relating to our systems, and we do not have business interruption insurance.

If we are unable to respond successfully to technological or industry developments, our business and prospects may be materially and adversely affected.

The WVAS, mobile games, wireless Internet telecommunications and Internet games industries are characterized by rapid advances in technology, industry standards and customer demands. In particular, new technologies, industry standards or market demands may render our existing products, services or technologies less competitive or even

obsolete. Moreover, telecommunications operators in the PRC are currently in the process of expanding 3G telecommunications services, while a number of different types of more advanced smart phone platforms have already entered the PRC market and are increasingly popular. Responding and adapting to the growing 3G telecommunications market and other technological developments and standard changes in our industry may require substantial time, effort and capital investment. In addition, updating and developing our proprietary game engines and game development platforms may also require significant expenditures in research and development. If we are unable to respond successfully to technology, industry and market developments, these developments may materially and adversely affect our business, financial condition and results of operations as well as our competitiveness.

Risks Relating to the PRC

Substantially all of our assets are located in the PRC and substantially all of our revenues are derived from our operations in the PRC. Accordingly, our financial condition and results of operations are subject, to a significant extent, to the economic, political and legal developments in the PRC.

Substantially all of our assets and end customers are located in China. Accordingly, our business, financial condition, results of operations and prospects are, to a significant degree, subject to the economic, political and social conditions in China. Although the PRC has been one of the world's fastest-growing economies in terms of GDP since 1978, we cannot assure you that such growth will be sustained in the future. Moreover, any negative development in the economies of the United States, the European Union and certain Asian countries may adversely affect economic growth in the PRC.

In addition, the PRC economy differs from the economies of most developed countries in many respects, including the amount of government involvement, level of development, growth rate, control of foreign exchange and allocation of resources. Although the PRC economy has experienced significant growth over the past decades, growth has been uneven, both geographically and among various sectors of the economy. The PRC government has implemented various measures to encourage economic growth and guide the allocation of resources. Some of these measures may benefit the overall PRC economy but have a negative effect on us. For example, our financial condition and results of operations may be adversely affected by government control over capital investments or changes in tax regulations that are applicable to us. However, we cannot assure you that the PRC economy will sustain this rate of growth in the future.

Although the PRC government has implemented measures since the late 1970s emphasizing the use of market forces for economic reform, the reduction of state ownership of productive assets and the establishment of sound corporate governance in business enterprises, a substantial portion of productive assets in the PRC is still owned by the PRC government. In addition, the PRC government continues to play a significant role in regulating industry development by imposing industrial policies. The PRC government also exercises significant control over PRC economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. We cannot assure you that the PRC's economic, political or legal systems will not develop in a way that is detrimental to our business, financial condition and results of operations.

Government control of currency conversion may adversely affect our financial condition and results of operations.

We receive substantially all of our revenues in Renminbi, which currently is not a freely convertible currency. A portion of these revenues must be converted into other currencies to meet our foreign currency obligations including, among others, payment of dividends declared, if any, in respect of our ordinary shares.

Under the PRC's existing foreign exchange regulations, our subsidiaries, KongZhong Beijing, KongZhong China and Simlife Beijing, are able to pay dividends in foreign currencies without prior approval from SAFE, by complying with certain procedural requirements. However, we cannot assure you that the PRC government will not take measures in the future to restrict access to foreign currencies for current account transactions.

Foreign exchange transactions under the capital accounts of our subsidiaries, KongZhong Beijing, KongZhong China and Simlife Beijing, and of our operating companies, Beijing AirInbox, Beijing WINT, Tianjin Mammoth, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, continue to be subject to significant foreign exchange controls and require the approval of PRC governmental authorities, including the SAFE. In particular, if KongZhong Beijing, KongZhong China or Simlife Beijing borrow foreign currency loans from us or other foreign lenders, these loans must be registered with SAFE, and if we finance KongZhong Beijing, KongZhong China or Simlife Beijing by means of additional capital contributions, these capital contributions must be approved by certain government authorities

including the Ministry of Commerce or its local counterparts. In addition, if we finance Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli or Dacheng by loans, we must obtain approval from SAFE. These limitations could affect the ability of KongZhong Beijing, KongZhong China, Simlife Beijing, Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli or Dacheng to obtain foreign exchange through debt or equity financing.

PRC regulations relating to offshore investment activities by PRC residents may increase the administrative burden we face and create regulatory uncertainties that could restrict our overseas and cross-border investment activity, and a failure by holders of our ordinary shares or ADSs who are PRC residents to make any required applications and filings pursuant to such regulations may prevent us from being able to distribute profits and could expose us and the PRC resident holders of our ordinary shares or ADSs to liability under PRC law.

SAFE has promulgated regulations that require PRC residents and PRC corporate entities to register with and obtain approvals from relevant PRC government authorities in connection with their direct or indirect offshore investment activities. These regulations may apply to holders of our ordinary shares and ADSs who are PRC residents in connection with our prior and any future offshore acquisitions.

The relevant SAFE regulation required registration by March 31, 2006 of direct or indirect investments previously made by PRC residents in offshore companies prior to the implementation of the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-Raising and Reverse Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies on November 1, 2005. If a PRC holder of our ordinary shares or ADSs with a direct or indirect stake in an offshore parent company fails to make the required SAFE registration, the PRC subsidiaries of such offshore parent company may be prohibited from making distributions of profit to the offshore parent and from paying the offshore parent proceeds from any reduction in capital, share transfer or liquidation in respect of the PRC subsidiaries. Furthermore, failure to comply with the various SAFE registration requirements described above could result in liability under PRC law for evasion of foreign exchange restrictions.

Those of our Directors and senior officers who are holders of our ordinary shares or ADSs and PRC residents have informed us that they have made the necessary applications and filings, as required under this regulation. However, there is uncertainty concerning the reconciliation of this regulation with other approval requirements, it is unclear how the regulation, and any future regulation concerning offshore or cross-border transactions, will be interpreted, amended, implemented or enforced by the relevant government authorities. The failure or inability of any PRC resident holder of our ordinary shares or ADSs to obtain any required approvals or make any required registrations may subject us to fines and other legal sanctions, and prevent us from being able to make distributions or pay dividends.

We may be subject to fines and legal sanctions if we or our employees who are PRC citizens fail to comply with the PRC regulations relating to employee share options granted by overseas listed companies to PRC citizens.

In February 2012, SAFE promulgated the Notice Relating to Foreign Exchange Administration for Domestic Individuals Participating in Stock Incentive Plan of Overseas-Listed Company, or SAFE Notice 7, replacing the Application Procedure of Foreign Exchange Administration for Domestic Individuals Participating in Employee Stock Holding Plan or Stock Option Plan of Overseas-Listed Company promulgated in March 2007, or SAFE Notice 78. Under SAFE Notice 7, PRC individuals and foreign citizens who have been a resident of the PRC for one year or more, or, collectively, Domestic Individuals, participating in a stock incentive plan of an overseas-listed company, are required, through a PRC domestic agent or PRC subsidiary of the overseas-listed company, to register with SAFE and complete certain other procedures. As we are an overseas-listed company, we and those employees deemed to be Domestic Individuals and who have been granted share options and/or restricted share units under our equity incentive plans are subject to the SAFE Notice 7. We and those employees subject to SAFE Notice 7 intend to make such application and complete all the requisite procedures. We have already registered, and have registered on behalf of those employees subject to SAFE Notice 7, with the relevant local SAFE branches our employee stock incentive plans in 2009, pursuant to regulations promulgated under SAFE Notice 78. However, there exist significant uncertainties in practice with respect to the interpretation and implementation of SAFE Notice 7, and we cannot assure you that our registration under SAFE Notice 78 would be sufficient for compliance with SAFE Notice 7. If SAFE or other PRC governmental authorities determine that we or those of our employees subject to SAFE Notice 7 have failed to comply with the provisions of the SAFE Notice 7, we or they may be subject to fines and legal sanctions, which could have a material adverse effect on the implementation of our equity incentive plans and our ability to attract and retain qualified personnel, as well as our business and prospects. See “Item 4 — Information on the Company — Regulation —

Regulation of Share Options and Restricted Share Units.”

Fluctuation of the Renminbi could adversely affect the value of and dividends payable on our ADSs.

The value of the Renminbi fluctuates and is subject to changes in PRC political and economic conditions. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the Renminbi to the U.S. dollar. Under the PRC government's new policy, the Renminbi is permitted to fluctuate within a managed band against a basket of certain foreign currencies. Although daily fluctuations of the Renminbi against the basket of currencies are currently limited to 1.0% per day, the Renminbi may appreciate or depreciate significantly in value against the U.S. dollar in the long term. On June 20, 2010, the People's Bank of China, or the PBOC, announced that the PRC government would further reform the Renminbi exchange rate regime and increase the flexibility of the exchange rate, and on April 14, 2012, the PBOC announced that, effective as of April 16, 2012, the Renminbi is permitted to fluctuate with a band of 1.0% per day, doubling the previous announced fluctuation limit of 0.5% per day. Therefore, we cannot assure you that the Renminbi will not be permitted to enter into a free float, which also may result in a significant appreciation or depreciation of the Renminbi against the U.S. dollar. As we receive substantially all of our revenues in Renminbi and a majority of our cash and cash equivalents are denominated in Renminbi, any fluctuation in the exchange rate against the U.S. dollar will affect our balance sheet and earnings per share in U.S. dollar terms and the value of dividends, if any, payable on our ordinary shares in U.S. dollar terms and the value of any U.S. dollar-denominated investments we may make in the future. As of December 31, 2011, we had cash and cash equivalents in the amount of US\$129.5 million. A 1.0% appreciation of the Renminbi against the U.S. dollar will result in an estimated increase of approximately US\$1.2 million in our total amount of cash and cash equivalents, and a 1.0% appreciation of the U.S. dollar against the Renminbi will result in a decrease of approximately US\$1.2 million in our total amount of cash and cash equivalents. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk.

The discontinuation of any of the preferential tax treatments available to us in the PRC or the rejection of our application for preferential tax treatments could adversely affect our business, operating results and financial condition.

On March 16, 2007, the National People's Congress adopted the Enterprise Income Tax Law, or the New EIT Law, which became effective on January 1, 2008. It imposes a tax rate of 25% on all enterprises, including foreign-invested enterprises, and terminates many of the tax exemptions, reductions and preferential treatments available under previous tax laws and regulations. However, under the New EIT Law, "high-and-new technology enterprises strongly supported by the State," or HNTE, are entitled to a preferential tax rate of 15%. In 2008 and 2011, KongZhong Beijing, Beijing AirInbox, BJXR and Tianjin Mammoth were granted the HNTE status by the PRC tax authority under the New EIT Law. In 2009, KongZhong China, Beijing Chengxitong and Beijing WINT were granted the HNTE status by the PRC tax authority under the New EIT Law. However, we cannot assure you that the PRC tax authorities will not revoke the HNTE status of such companies or that we will be able to renew the HNTE status for these companies in the future. The loss of preferential tax treatments by our subsidiaries and/or operating entities could materially reduce our net income and cash flows.

We may be subject to PRC income tax on our global income, or dividends we receive from our PRC subsidiaries may be subject to PRC withholding tax, depending on whether we are recognized as a resident enterprise in the PRC.

Pursuant to the New EIT Law and Enterprise Income Tax Law Implementation Rules under the New EIT Law, or the New EIT Implementation Regulation, enacted by the State Council on December 6, 2007 and which became effective on January 1, 2008, an enterprise established under the laws of a foreign country or region whose “de facto management body” is located within the PRC territory is considered a resident enterprise and will generally be subject to the enterprise income tax at the rate of 25% on its global income. According to the New EIT Implementation Regulation, “de facto management body” refers to a managing body that exercises, in substance, overall management and control over the production and business, personnel, accounting and assets of an enterprise. The PRC State Administration for Taxation, or the SAT, issued the Notice on Issues Relating to Determination of Chinese-Controlled Offshore Enterprises as PRC Resident Enterprises by Applying the “De Facto Management Body” Test, or the SAT Notice 82, on April 22, 2009. The SAT Notice 82 provides for certain specific criteria for determining whether the “de facto management body” of a Chinese-controlled offshore enterprise is located in the PRC. Although the SAT Notice 82 provides that it only applies to offshore enterprises controlled by PRC enterprises, not those controlled by PRC individuals, like our company, it is generally believed that the determining criteria set forth in the SAT Notice 82 very likely reflect the SAT’s general position as to how the “de facto management body” test should be applied to determine the tax residency of all offshore enterprises, regardless of whether they are controlled by PRC enterprises or individuals. We believe that we are not a PRC resident enterprise on the basis of the fact that (i) we are a Cayman Islands company that was incorporated outside the PRC and (ii) the SAT Notice 82 does not, on its face, apply to companies that are controlled by PRC individuals. However, if we were considered a PRC resident enterprise, we would be subject to the enterprise income tax at the rate of 25% on our global income. In such case, our profitability and cash flow would be adversely affected as a result of our global income being taxed under the New EIT Law.

If we are considered as a non-resident enterprise under the New EIT Law, we will not be subject to the enterprise income tax at the rate of 25% on our global income. In such case, however, dividends we receive from our PRC subsidiaries will be subject to a PRC withholding tax, the standard rate for which is 10%, subject to reductions pursuant to any applicable tax treaty. To the extent we are considered as a non-resident enterprise, dividends we receive from our PRC subsidiaries will be subject to the standard rate of 10%. Such withholding tax will increase our tax burden and reduce the amount of cash available to our company.

Dividends payable by us to our non-PRC shareholders and ADS holders, and gains on the sales of our ordinary shares or ADSs, may be subject to withholding taxes under PRC tax laws, which may materially reduce the value of your investment.

Prior to January 1, 2008, dividends payable to non-PRC investors were exempted from withholding tax. The New EIT Law and the New EIT Implementation Regulation, both of which became effective on January 1, 2008, provide that an income tax rate of 10% (subject reductions pursuant to any tax treaties between the PRC and other jurisdictions) will generally be applicable to dividends payable to non-PRC investors that are derived from sources within the PRC, provided that dividends are not subject to the 10% tax if they are paid out of distributable profits accumulated before January 1, 2008. Similarly, any gain realized on the transfer of shares by such investors is also subject to 10% tax if such gains are regarded as income derived from sources within the PRC.

We are a Cayman Islands holding company, and substantially all of our income may come from dividends we receive from our subsidiaries located in the PRC. As a result, dividends we receive from our PRC subsidiaries may be subject to withholding tax under the New EIT Law. See “Item 3 — Key Information — Risk Factors — Risks Relating to the PRC — We may be subject to PRC income tax on our global income, or dividends we receive from our PRC subsidiary may be subject to PRC withholding tax, depending on whether we are recognized as a resident enterprise in the PRC.” If we are recognized as a qualified PRC resident enterprise, the dividends we receive from our subsidiaries in the PRC will not be subject to any withholding tax. However, our dividends payable to our non-PRC shareholders and ADS holders would be subject to withholding tax under the New EIT Law.

If dividends we receive from our PRC subsidiaries or dividends payable to our non-PRC shareholders and ADS holders are subject to withholding tax under the New EIT Law, or if non-PRC foreign shareholders and ADS holders are required to pay PRC income tax on the transfer of their ordinary shares or ADSs, the value of your investment may be materially reduced.

Uncertainties in the interpretation and enforcement of PRC laws, rules and regulations could limit the legal protections available to you and us.

The PRC legal system is a civil law system based on written statutes. Unlike common law systems, it is a system in which decided legal cases have little precedential value. Although legislation in the PRC over the past 30 years has significantly improved the protection afforded to various forms of foreign investment and contractual arrangements in the PRC, these laws, regulations and legal requirements are relatively new and their interpretation and enforcement involve uncertainties, which could limit the legal protection available to us and foreign investors, including you. In addition, the PRC government may enact new laws or amend current laws that may be detrimental to our current contractual arrangements with Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, which may in turn have a material adverse effect on our business and prospects.

You may experience difficulties in effecting service of legal process and enforcing judgments against us and our management.

We are a company incorporated under the laws of the Cayman Islands, and our subsidiary and substantially all of our assets are located outside the United States. In addition, most of our Directors and officers and their assets are located outside the United States. As a result, it may not be possible to effect service of process within the United States upon our Directors or officers, including with respect to matters arising under U.S. Federal securities laws or applicable state securities laws.

Our PRC legal counsel, King & Wood Mallesons, has advised us that the PRC does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with the United States, the United Kingdom or most other Western countries. As a result, recognition and enforcement in the PRC of judgments of a court obtained in those jurisdictions may be difficult or impossible.

We have been advised by Maples and Calder, our Cayman Islands legal advisers, that although there is no statutory enforcement in the Cayman Islands of judgments obtained in the United States, or any state thereof, a judgment obtained in the United States, or any state thereof, will be recognized and enforced in the courts of the Cayman Islands under common law, without any re-examination of the merits of the underlying dispute, by an action commenced on the foreign judgment debt in the Grand Court of the Cayman Islands, provided that such judgment (i) was given by a foreign court of competent jurisdiction; (ii) imposes on the debtor a liability to pay a liquidated sum for which the judgment has been given; (iii) is final; (iv) is not in respect of taxes, a fine or a penalty; and (v) was not obtained in a manner and is not of a kind of enforcement that is contrary to natural justice or the public policy of the Cayman Islands.

Item 4. Information on the Company

History and Development of the Company

We were incorporated on May 6, 2002 under the laws of the Cayman Islands as Communication Over The Air Inc., an exempted limited liability company. In March 2004, we changed our name to KongZhong Corporation. We are headquartered in Beijing, the PRC, and provide WVAS, mobile games and wireless Internet sites to mobile phone users throughout the PRC. Since our acquisition of Dacheng in January 2010, we have also offered Internet games to Internet users throughout the PRC. See “— Investments and Acquisitions.” In January 2007, we established a wholly-owned subsidiary, Monkey King Search Corporation, or Monkey King, under the laws of the Cayman Islands in an effort to develop our wireless search business. Monkey King in turn established its own wholly-owned subsidiary, Wukong Shentong, under the laws of the PRC. After developing our wireless search business through Monkey King and Wukong Shentong for a period of time, in September 2008, we decided to terminate our project of developing wireless search business and liquidate Monkey King and Wukong Shentong, which did not have significant business activities at the time. We completed the liquidation of Wukong Shentong in July 2010. As part of the winding-up of the businesses of Monkey King and Wukong Shentong, we sold certain assets of these companies to Nick Yang, the former Vice Chairman of our Board of Directors. See “Item 7 — Major Shareholders and Related Party Transactions - Related Party Transactions.” In July 2008, we liquidated Beijing Shuziyuansu Advertising Co., Ltd., a company formerly owned by two of our operating companies, Beijing Boya Wuji and Beijing WINT, because it had not had any operating activity since its incorporation in September 2005. In July 2008, BJXR, one of our operating companies, established its own subsidiary, Beijing Shiyuan Leya, which operates certain types of our WVAS business. We completed the liquidation of Anjian Xingye Technology (Beijing) Co., Ltd., or Anjian Xingye, our wholly foreign owned enterprise in the PRC, in May 2010.

We conduct substantially all of our business in the PRC through our wholly-owned subsidiaries in the PRC, KongZhong Beijing, KongZhong China and Simlife Beijing. In order to meet domestic ownership requirements under PRC laws, which restrict us and our PRC subsidiaries, as either foreign or foreign-invested companies, from operating certain value-added telecommunications, Internet services and Internet games businesses. We operate WVAS, mobile games, wireless Internet sites and Internet games through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, all of which are based in the PRC and are wholly-owned by PRC citizens. We

do not have any equity interests in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli or Dacheng, but enjoy the economic benefits of these companies through a series of contractual arrangements as described below.

Our principal executive office is located at 35th Floor, Tengda Plaza, No. 168, Xizhimenwai Street, Beijing, 100044, the PRC. Our telephone number is (8610) 8857-6000. The address of our primary website is www.KongZhong.com and the address of our primary wireless Internet site is Kong.net. Information contained on our website or our wireless Internet site does not constitute a part of this annual report.

In July 2004, we completed the initial public offering of our ADSs representing our ordinary shares and listed the ADSs on the NASDAQ Global Market, or NASDAQ. Effective January 1, 2008, our ADSs are listed on the NASDAQ Global Select Market.

Investments and Acquisitions

In February 2005, we entered into a definitive agreement with Beijing WINT, its original shareholders and our designees pursuant to which the original shareholders transferred 100% of the equity interest in Beijing WINT to our designees for a consideration of RMB4.02 million (approximately US\$0.49 million) in cash.

On May 12, 2005, our operating companies, Beijing AirInbox and Beijing WINT, signed an agreement with the original shareholders of Tianjin Mammoth to acquire 95% and 5%, respectively, of the equity interest in Tianjin Mammoth for an aggregate consideration of RMB6 million, or approximately US\$724,944, of which US\$675,379 was paid in 2005 and the remaining balance of US\$49,565 was paid in June 2006. The acquisition was concluded on May 24, 2005. Tianjin Mammoth was founded in June 2002 and has become a well-known mobile games developer in the PRC.

In November 2005, we entered into a definitive agreement with Beijing Chengxitong, its original shareholders and our designees pursuant to which the original shareholders transferred 100% of the equity interest in Beijing Chengxitong, a WVAS provider in the Hubei province, for a consideration of RMB4.4 million (approximately US\$0.54 million) in cash, of which US\$0.50 million was paid in 2005 and US\$0.04 million was paid in January 2006. In July 2006, we changed Beijing Chengxitong's registered address from Wuhan, Hubei province, to Beijing and consequently changed its name from Wuhan Chengxitong to Beijing Chengxitong.

In January 2006, we sold our 10% equity interest in eFriendsNet Entertainment Corp., or EFN, a leading social networking company in the PRC, for cash consideration of US\$1.7 million. We received an additional cash payment of US\$0.2 million in February 2007 as EFN met certain financial performance milestones set forth in the sales agreement after the completion of the sale of our equity interest.

In January 2006, we entered into a definitive agreement to acquire 100% of Sharp Edge, a company incorporated in the British Virgin Islands and based in Beijing, which provided WVAS on the SMS, IVR and color ring-back tones, or CRBT, technology platforms through its operating entity, BJXR. We paid cash consideration of US\$7 million, US\$11 million and US\$17 million during the first quarter of 2006, the third quarter of 2006 and the first quarter of 2007, respectively. Following our acquisition, we deregistered Sharp Edge and became the direct owner of its wholly-owned PRC subsidiary, Anjian Xingye.

In January 2008, we entered into a definitive agreement with HiU! Media, a company incorporated in the Cayman Islands and based in the PRC, which provides residential community direct marketing advertising network and residential community marketing solutions in the PRC, to acquire 9.87% of the total equity interest of HiU! Media for a consideration of US\$1.5 million. We completed the investment in January 2008. We accounted for this investment

using the cost method. In 2009, we recorded a provision of US\$1.5 million for impairment in connection with this investment primarily because of the following reasons: (i) since January 2008, HiU! Media has been in a continuous loss-making position and has failed over time to create the type of profit-generating business that was contemplated at the time of our investment; and (ii) we were unable to create any value-generating synergies with HiU! Media for our former wireless Internet services business due to HiU! Media's failure to develop its advertising business and expand its customer base. As a result, we decided by the end of 2009 that, as a corporate strategy going forward, we plan to place less emphasis on our wireless Internet advertising business. For a further description of this transaction, see "Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions."

In May 2008, we entered into a definitive agreement with Beijing Xin Chuang Hang Yuan Technology Co., Ltd., or XCHY, a company that provides electronic coupons on mobile phones, to acquire 19.9% of the total equity interest of XCHY for a consideration of US\$1.5 million. We completed the investment in July 2008. In 2010, we recorded a provision of US\$1.5 million for impairment in connection with this investment primarily because of the following reasons: (i) since July 2008, XCHY has been in a continuous loss-making position and has failed over time to create the type of profit-generating business that was contemplated at the time of our investment; and (ii) we were unable to create any value-generating synergies with XCHY for our WVAS business due to XCHY's failure to develop its business and expand its customer base.

In January 2009, we entered into a definitive agreement to acquire 100% of Sigma Interactive Inc., or Sigma, a company incorporated in the British Virgin Islands and based in Beijing, for a total consideration of US\$1.02 million. Sigma is engaged in the business of developing technology solutions for mobile Internet, including the development of the on-device portal platform. The acquisition was completed in January 2009.

In March 2009, we issued to NGP a convertible senior note due in 2014 with an aggregate principal amount of US\$6,775,400, convertible into our ordinary shares. NGP also received a warrant to purchase up to 80 million of our ordinary shares at US\$0.125 per ordinary share, exercisable within five years. The issuance of the convertible senior note and warrant was completed in March 2009. In February 2011, we prepaid 70% of the aggregate principal amount, plus any accrued but unpaid interest thereof, of the convertible senior note for US\$9.31 million in cash. Subsequently, on March 1, 2012, NGP fully converted the convertible senior note into 22.8 million of our ordinary shares, which is equivalent to 570,000 of our ADSs, at a conversion price of US\$0.08915 per ordinary share (equivalent to US\$3.6 per ADS), representing approximately 1.0% of our total shares outstanding as of March 31, 2012.

In March 2009, we entered into a definitive agreement with Mailifang, its shareholders and our designees pursuant to which the shareholders transferred 100% of the equity interest in Mailifang to our designees for a total consideration of RMB5.05 million (approximately US\$0.74 million) in cash. Mailifang is engaged in the business of developing mobile games. The acquisition was completed in April 2009.

In June 2009, we entered into a definitive agreement to acquire the entire issued share capital of Simlife International, Inc., or Simlife. We paid the shareholders of Simlife US\$3 million upon the completion of the acquisition in June 2009. An additional payment of US\$1.25 million in cash and the issuance of 6 million of our ordinary shares (equivalent to 150,000 ADSs) to certain former shareholders of Simlife are contingent upon Simlife's performance in 2010. Simlife was founded in 2002 and is one of the leading developers of mobile games in the PRC. For a further description of this transaction, see "Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions."

In October 2009, we acquired 100% of Zhulang, and Success Blueprint Limited, or Success Blueprint, an affiliate of Zhulang for an aggregate price of US\$2.34 million in cash and 1,000,000 ordinary shares (equivalent to 25,000 ADSs). Zhulang is engaged in the management, aggregation and distribution of user-generated and professionally written Chinese novels. Success Blueprint is engaged in the overseas management of overseas of copyright of certain Chinese novels.

On December 15, 2009, we entered into a definitive share purchase agreement to acquire Dacheng. We agreed to pay up to US\$80 million, in a mix of cash and our ordinary shares, to Dacheng's shareholders, based on Dacheng's 2010 net profit after tax as calculated under U.S. GAAP. Dacheng agreed to engage in a reorganization whereby an offshore holding company would be established, and Dacheng would enter into certain contractual arrangements with such holding company and/or its subsidiary that would allow the holding company to enjoy, among other things, the

economic benefits of Dacheng's operations. On January 13, 2010, we amended the original share purchase agreement to permit one of our subsidiaries to enter into a series of contractual arrangements with Dacheng that allowed us to consolidate Dacheng's financial results. Subsequently, the reorganization was completed and we acquired the holding company. In March 2011, we completed the last payment due to Dacheng's shareholders under the share purchase agreement. The total consideration paid for the acquisition of Dacheng was US\$68.0 million, including US\$24.2 million in cash and 166,292,783 million of our ordinary shares. Dacheng is a leading developer of 3D massively multiplayer online role-playing games, or MMORPGs. For a further description of this transaction, see "Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions."

On February 23, 2010, we entered into a purchase agreement to acquire 100% of Shenzhen Zhidaxuntong Technology Co., Ltd., or Shenzhen Zhida, for a consideration of RMB8 million (approximately US\$1.2 million) in cash. Shenzhen Zhida is a technology developer for mobile device software platforms.

On February 15 and 10, 2012, respectively, we entered into definitive agreements to acquire 100% of the equity interest in Noumena Innovations (BVI) Ltd., or Noumena, and certain assets from a related party of Noumena for a total consideration of US\$15 million in cash and 40 million of our ordinary shares. Noumena is a developer of cross-platform smartphone mobile game engines. The Handymo game engine, which Noumena developed, enables proprietary JavaScript-based development environment and supports all major smartphone mobile game platforms, including iOS and Android, among other platforms. We completed the acquisition in March 2012.

Our Corporate Structure

The chart below sets forth our corporate and share ownership structure as of March 31, 2012.

We do not have any ownership interest in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, (1) Mailifang, Xinreli or Dacheng. Our wholly-owned subsidiaries have entered into a series of contractual arrangements with these companies and/or their respective shareholders.

The applicable PRC regulations currently restrict foreign ownership of companies that provide value-added telecommunications services, which include WVAS, or operate Internet games. See also “— Regulation.” To comply with PRC regulations, we conduct substantially all of our wireless value-added, mobile games and Internet games operations and generate substantially all of our revenues through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, which are wholly-owned by PRC citizens, and their subsidiaries.

Beijing AirInbox is 45% owned by Linguang Wu, one of our former employees; 10% owned by Guijun Wang, one of our former employees; 42% owned by Songlin Yang, uncle of Nick Yang, the former Vice Chairman of our Board of Directors; and 3% owned by Zhen Huang, wife of Nick Yang. Beijing Chengxitong is 90% owned by Yang Li and 10% owned by Xuelei Wu, both of whom are our former employees. Beijing WINT is 40% owned by Yang Yang, one of our employees, 30% owned by Jingye Sun and 30% owned by Li Ai, both of whom are our former employees. BJXR is 51% owned by Guijun Wang and 49% owned by Yang Li, both of whom are our former employees. Dacheng is 40.8% owned by Zhen Yang and 59.2% by Leilei Wang, both of whom are our employees. Zhulang is 100% owned by Beijing Chengxitong. Beijing Boya Wuji is 100% owned by Beijing AirInbox. Tianjin Mammoth is 95% owned by Beijing AirInbox and 5% owned by Beijing WINT. Shenzhen Zhida is 100% owned by Beijing WINT. Beijing Shiyuan Leya is 100% owned by BJXR. Xinreli is 80% owned by Tao Jia, one of our employees, and 20% owned by Junhong Chen, one of our former employees. Mailifang is 90% owned by Xu Guo and 10% owned by Yang Yang, both of whom are our employees.

We do not have any equity interests in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli or Dacheng, or their subsidiaries, but instead have effective control over and enjoy the economic benefits of these companies through a series of contractual arrangements, which we and our subsidiaries, KongZhong China, KongZhong Beijing and Simlife Beijing, have entered into with these companies and/or their respective shareholders as described below. For a further description of each of these agreements, see “Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions.”

Each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang and their respective shareholders also has entered into an exclusive share option agreement with KongZhong Beijing. Pursuant to these agreements, each of the shareholders of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang has granted an exclusive option to KongZhong Beijing or our designees to purchase all or part of such shareholder's equity interest in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR or Mailifang, as the case may be, in accordance with PRC laws, and has agreed not to encumber such equity interest in any manner other than as permitted by KongZhong Beijing.

KongZhong Beijing has entered into business operation agreements with each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang and their respective shareholders. Pursuant to these agreements, Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang and their respective shareholders agreed to appoint individuals designated by KongZhong Beijing to the management team of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang and to refrain from taking certain actions that may materially affect these companies' operations. Each of the shareholders of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang also has executed an irrevocable power of attorney in favor of individuals designated by KongZhong Beijing. Pursuant to these powers of attorney, those designated individuals have full power and authority to exercise all of such shareholders' rights with respect to their equity interests in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR or Mailifang.

KongZhong Beijing has entered into technical and consulting services agreements with each of Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang. Pursuant to these technical and consulting services agreements, KongZhong Beijing provides certain technical and consulting services to Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang in exchange for service fees. Each of the shareholders of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang has also entered into an equity pledge agreement with KongZhong Beijing, pursuant to which these shareholders pledged their respective interests in Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR or Mailifang, as the case may be, to guarantee the performance of such companies' payment obligations under the respective technical and consulting services agreements.

Dacheng and its shareholders have entered into an exclusive share option agreement with KongZhong China. Pursuant to this agreement, each of the shareholders of Dacheng has granted an exclusive option to KongZhong China or our designees to purchase all or part of such shareholder's equity interest in Dacheng in accordance with PRC law and has agreed not to encumber such equity interest in any manner other than as permitted by KongZhong China. KongZhong China has also entered into a business operation agreement with Dacheng and its shareholders. Pursuant to this agreement, Dacheng and its shareholders agreed to appoint individuals designated by KongZhong China to the management team of Dacheng and to refrain from taking certain actions that may materially affect Dacheng's operations. Each of the shareholders of Dacheng also has executed an irrevocable power of attorney in favor of individuals designated by KongZhong China. Pursuant to these powers of attorney, those designated individuals have full power and authority to exercise all of such shareholders' rights with respect to their equity interests in Dacheng. KongZhong China has entered into a technical and consulting services agreement with Dacheng. Pursuant to this technical and consulting services agreement, KongZhong China provides certain technical and consulting services to Dacheng in exchange for service fees. Each of the shareholders of Dacheng has entered into an equity pledge

agreement with KongZhong China, pursuant to which these shareholders pledged their respective interests in Dacheng to guarantee the performance of Dacheng's payment obligations under the technical and consulting services agreements.

Xinreli and its shareholders have entered into an option agreement with Simlife Beijing. Pursuant to this agreement, each of the shareholders granted Simlife Beijing an option to purchase all their respective interests in Xinreli for the lowest price permitted by applicable PRC law by Simlife Beijing or its designated third party. Simlife Beijing has also entered into a business operation agreement with Xinreli and its shareholders. Pursuant to this agreement, Xinreli and its shareholders will elect designees of Simlife Beijing as the executive directors of Xinreli, and will appoint designees of Simlife Beijing as the general manager, chief financial officer and other senior officers of Xinreli. Each of the shareholders has also agreed to execute a power of attorney to grant the designees of Simlife Beijing full power and authority to exercise all of the respective shareholders' rights in Xinreli. Pursuant to these powers of attorney, those designated individuals have full power and authority to exercise all of such shareholders' rights with respect to their equity interests in Xinreli. In addition, Simlife Beijing has entered into an exclusive technical and consulting services agreement with Xinreli. Pursuant to this agreement, Simlife Beijing will provide certain technical and consulting services to Xinreli on an exclusive basis. Each of the shareholders of Xinreli has also entered into an equity pledge agreement with Simlife Beijing, pursuant to which these shareholders pledged their respective interests in Xinreli to guarantee the normal collection of technical service fees by Simlife Beijing under the exclusive technical and consulting services agreement and to ensure the performance of obligations under the business operation agreement and option agreement.

In the opinion of our PRC legal counsel, King & Wood Mallesons, each of the agreements constitutes a valid and legally binding obligation of each party to such contractual agreements under PRC laws. In addition, King & Wood Mallesons, is of the opinion that, with respect to Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, no consent, approval or license, other than those already obtained, is required under any existing PRC laws, rules and regulations for the effectiveness and enforceability of the ownership structures, contractual arrangements, businesses and operations of these companies. However, there are substantial uncertainties regarding the interpretation and implementation of current PRC laws, rules and regulations. See “— Regulation” and “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — If the PRC government finds that the agreements that establish the structure for operating our business do not comply with PRC government restrictions on foreign investment in the value-added telecommunications industry, we could be subject to severe penalties,” and “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Our contractual arrangements with Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng may not be as effective in providing operational control as direct ownership of these businesses and may be difficult to enforce.” As discussed in those risk factors, certain events may cause us to lose the benefits and control intended to be created by these arrangements.

Capital Expenditures and Divestitures

See “Item 5 — Operating and Financial Review and Prospects — Capital Expenditures” for information concerning our principal capital expenditures since our inception and those planned for 2012. We have not undertaken any significant divestitures and do not have any significant divestitures currently in progress.

Business Overview

We are one of the leading providers of digital entertainment services for consumers in the PRC. We operate three main business units, namely WVAS, mobile games and Internet games. We are one of the leading providers of WVAS to mobile phone users and have been in cooperation with all major telecommunications operators in the PRC since 2002. In 2005, we began providing feature-phone mobile games on the networks of China Mobile with the acquisition of Tianjin Mammoth, a mobile games developer. To further expand our mobile games development capabilities, we acquired Noumena in 2012 in order to develop smartphone mobile games on smartphone mobile operating systems, such as iOS and Android. We commenced our Internet games business in 2010 through our acquisition of Dacheng, a developer and operator of Internet games in the PRC. In addition to developing and operating our self-developed Internet games, such as Loong, Demon Code and Kung Fu Hero, we are the exclusive operator of the popular World of Tanks game for the PRC Internet games market.

Our WVAS Business

We provide interactive entertainment, media and other interactive services to mobile phone users in China through various second generation standard, or 2G, technology platforms, including SMS, IVR and CRBT, and through various “second and a half” generation standard, or 2.5G, technology and operating platforms, including WAP and MMS, which offer higher quality graphics, richer content and more interactivity than 2G wireless services. Our WVAS are tailored to the technical or other requirements of our telecommunications operator partners, through whom we deliver most of our WVAS, and to various billing systems for WVAS. Our WVAS are also delivered and marketed through various media partners, including handset manufacturers, television stations, radio stations, print media and Internet sites. Our WVAS revenues accounted for 79.2%, 55.7% and 50.2% of our total revenues in 2009, 2010 and 2011, respectively.

We offer a variety of WVAS, such as mobile games, pictures, karaoke, electronic books, mobile phone personalization features, entertainment news, chat and message boards. Customers can access these services directly from their mobile phones: (i) by using our access code or by choosing a feature pre-loaded in select models of handsets; (ii) from a telecommunications operator's portal or website; and (iii) from our wireless Internet websites, including Kong.net. Substantially all of our services are ordered or accessed by users directly through their mobile phones, and all services are delivered through mobile phones.

We provide our services mainly pursuant to our cooperation arrangements with the telecommunications operators and their provincial subsidiaries, the terms of which are generally for one year or less. We do not directly bill our users, and depend on the billing systems and records of the telecommunications operators to bill and collect all fees. We generally do not have the ability to independently verify the accuracy of the billing systems of the telecommunications operators. As the telecommunications operators do not provide us with a detailed revenue breakdown on a service-by-service basis, we depend on our internal data management system to monitor revenues derived from each of our services. We make our business decisions based on our internal data, taking into account our historical experience in reconciling our internal data to our actual results of operations and other factors, including strategic considerations. See "Item 3 — Key Information — Risk Factors — Risks Relating to Our Business - Our dependence on the substance and timing of the billing systems of the telecommunications operators and their subsidiaries may require us to estimate portions of our reported revenues and cost of revenues for WVAS and mobile games. As a result, subsequent adjustments may have to be made to our financial statements."

Our WVAS business also includes what had previously been our WIS business, which consists of the operation of a variety of mobile Internet sites, such as: (i) Kong.net, our integrated mobile portal; (ii) ct.cn, our mobile Chinese literature site; and (iii) ko.cn, our internally-developed mobile games community site. These sites had previously been operated as a separate business segment, but we consolidated the majority of the WIS business segment, including our operation of Kong.net and ct.cn, into our WVAS business segment in 2010 to reflect certain changes in our WIS business, further streamline our WIS operations and take advantage of the synergies between our operation of Kong.net and ct.cn and our WVAS business. We expected a key factor in the future revenue growth for our WIS business to be our partnership with China Mobile's mobile literature and WAP platforms. The future growth of our WIS business, particularly our operation of Kong.net and ct.cn, was expected to be more dependent on our WVAS business and the partnership with China Mobile. Due to this anticipated synergy between our WVAS and WIS businesses, we believed it was more appropriate to combine our WIS business into our overall WVAS business.

Our Mobile Games Business

We are a leading developer and publisher of mobile games for mobile phone users in the PRC. Our internal development team develops mobile games based primarily on the Java™ technology, but more recently we have broadened our development of mobile games to include smartphone mobile operation systems, such as iOS and Android. The mobile games we develop include action, role-playing and leisure games.

We established a dedicated mobile games product development team, and acquired Tianjin Mammoth, a mobile games developer, in 2005. In 2009, we acquired Simlife, a leading mobile games developer in the PRC. In 2012, we acquired Noumena, a developer of cross-platform smartphone mobile game engines. For a detailed description of the acquisitions, see “—Investments and Acquisitions.” We believe the integration of the Noumena team into our existing mobile game development team will enable us to create new smartphone mobile games that can take advantage of the Handymo game engine technologies developed by Noumena. We believe these new smartphone mobile games will enable us to leverage our existing mobile game distribution channels in China and capture market share in the nascent PRC smartphone mobile games market.

Our Internet Games Business

In January 2010, we acquired Dacheng and with it our business unit, Internet games. We launched our self-developed 3D MMORPGs, Loong, EMoFaZe, XiaKeXing and ShengMoZhiXue from December 2009 to October 2010.

In 2010, we licensed the World of Tanks game from WarGaming.net LLP. World of Tanks is a “freemium” 3D team-based massive multiplayer online game, featuring historic fighting vehicles from the 1930s to the 1950s. Since its launch, the World of Tanks game has become one of the most popular games we offer. As of December 31, 2011, the World of Tanks game had been downloaded over 4.7 million times, with over 5 million registered users. As a result of the successful launching of the game, revenues generated from in-game items purchased by game players who play the World of Tanks game represented over 69% of our Internet games revenues in 2011.

In addition to licensed games, we also develop Internet games internally based mainly on our proprietary technologies, which include our proprietary game engine (Dazzler 3D), game development platforms and online game billing system, all developed by our internal team. In particular, our Dazzler 3D game engine enables us to create high-quality 3D graphics and visual effects, and provides the technical foundation for creating innovative features in our games. Furthermore, our game development platforms give us the capacity to develop Internet games within approximately six to 24 months and to update our Internet games frequently in response to players’ preferences. Based on these platforms, we made publicly available our newest self-developed game, Kung Fu Hero, a Chinese martial arts-themed 3D MMORPG, in March 2012 for open beta testing.

We use an item-based revenue model for our games, whether internally developed or licensed, under which players can play our games on the Internet free of charge, but have to pay for purchases of in-game virtual items, such as in-game currencies, performance-enhancing clothing, weapons, accessories and pets. We distribute our electronic prepaid game cards and game points, which can be used to purchase in-game virtual items, to players through multiple payment channels. Although we expect a substantial portion of our Internet games revenues to be generated in the PRC, we have licensed our games to leading game operators outside the PRC and plan to license them in additional countries and regions.

Strategic Relationships

We have established cooperation arrangements with telecommunications operators, mobile handset manufacturers, content providers and other business partners to produce, promote and market our services. We provide our WVAS and mobile games primarily pursuant to cooperation agreements with China Mobile and other telecommunications operators. In addition, we cooperate with several leading PRC mobile handset manufacturers, which make selected handset models with a WVAS icon in the handset’s menu that enables users to access our services directly. We pay service fees to the telecommunications operators, mobile handset manufacturers, mobile handset distributors, content providers and other partners, where relevant.

Telecommunications Operators

China Mobile is the world's largest mobile telecommunications network operator in terms of subscribers, with more than 639 million subscribers as of December 31, 2011, according to China Mobile's website. Our working relationship with China Mobile is critical to the operation and continued development of our WVAS and mobile games businesses. See "Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — We depend on China Mobile and other PRC telecommunications operators for the majority of our revenues, and any loss or deterioration of our relationship with these telecommunications operators may result in severe disruptions to our business operations and the loss of the majority of our revenues." We provide WVAS in 31 Chinese provinces or provincial-level municipalities pursuant to cooperation agreements with China Mobile and its provincial subsidiaries. Generally, these agreements have terms of one year or shorter, but may be renewed automatically unless either party objects. We were one of the first wireless service providers to work with China Mobile to develop and offer WAP, MMS and Java™ services. In 2010, we partnered with China Mobile's Jiangsu subsidiary on a new subscription-based mobile game download service launched by China Mobile to offer a portfolio of our mobile games to users for a fixed monthly fee. We continue to jointly develop and promote WVAS and mobile games businesses with China Mobile and its provincial subsidiaries, which is generally more cost-effective and far-reaching than if we were to promote these services through traditional advertising. In addition to our cooperation agreements with China Mobile and its provincial subsidiaries, we have entered into cooperation agreements with China Unicom, China Netcom and China Telecom.

We charge our customers content fees, which vary among our different services, on either a single-transaction or a monthly subscription basis. We establish the fees paid by our customers in consultation with the telecommunications operators and, in turn, pay a portion of these fees to the telecommunications operators through which our services are provided.

Pursuant to our agreements with the subsidiaries of China Mobile, we generally pay to these subsidiaries 15% of the revenues we generate from providing our services to customers through their networks, with the exception of IVR services, with respect to which we pay to these subsidiaries 30% of the revenues we generate. In addition, the subsidiaries of China Mobile deduct a net transmission charge from our portion of the fees for services provided on the MMS and SMS platforms. These transmission charges are equivalent to the transmission fee set forth in the table below multiplied by the number of messages we send through the telecommunications operator's network minus the number of messages we receive from users requesting our services.

Pursuant to our agreements with China Unicom and its subsidiaries, we generally pay each China Unicom subsidiary 15% to 52% of the revenues we generate from providing our services to customers through such subsidiary's network, with the exception of IVR services, with respect to which we pay 52% of the revenues we generate.

Pursuant to our agreements with China Telecom and China Netcom and their respective subsidiaries, we generally pay each China Telecom and China Netcom subsidiary 15% to 50% of the revenues we generate from providing our services to customers through such subsidiary's network, with the exception of IVR services, with respect to which we pay 50% of the revenues we generate.

The following table sets forth the principal fees that we charged our customers for our WVAS and mobile games related services and the service and transmission fees that we paid to the telecommunications operators as of December 31, 2011.

	Fees we charged customers		Fees we paid telecommunication operators	
	Transaction fee per unit (1) (in RMB, except percentages)	Monthly subscription fee	Service fees	Transmission fee (2)
WAP	1.00-2.00	5.00-8.00	15%-50%	N/A
MMS	2.00-3.00	8.00-30.00	15%	0.15-0.20
Mobile Games	1.00-15.00	5.00-15.00	15%-50%	N/A
SMS	1.00-3.00	5.00-15.00	15%-50%	0.02-0.08
IVR	1.00-3.00	5.00-15.00	20%-60%	N/A
CRBT	0.50-3.00	1.00-5.00	15%-50%	N/A
E-Book	0.04-5.00	3.00-5.00	40%	N/A

(1)

Transaction fees are per download for WAP, MMS, mobile games, SMS, CRBT and e-book services and per minute for IVR services.

A transmission fee is assessed for each message we send in excess of the number of messages we receive. The amount of the transmission fees for each month depends on the volume of messages sent in that month. No transmission fees are assessed for WAP, mobile games, IVR or CRBT services.

For our WVAS and mobile games, we rely primarily on the telecommunications operators to provide billing and collection services for us. Each telecommunications operator incorporates the fees for our services into the invoices that such operator sends to its customers on a monthly basis. We receive monthly statements from each of the telecommunications operators, which indicate the aggregate amount of fees that were charged to customers for services that we provided. For a description of our revenue recognition policy, see “Item 5 — Operating and Financial Review and Prospects — Critical Accounting Policies — Revenue Recognition.” Also see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — We depend on China Mobile and other PRC telecommunications operators for the majority of our revenues, and any loss or deterioration of our relationship with these telecommunications operators may result in severe disruptions to our business operations and the loss of the majority of our revenues.”

Material Contracts with Telecommunications Operators for WVAS and Mobile Games

The term of our contracts with the telecommunications operators is generally for one year or less. When these contracts expire, we generally execute an extension or enter into new contracts. On occasion, the extension or the execution of new contracts may be delayed by several months. Based on our experience, in the event that a contract expires and is not promptly renewed, the telecommunications operator typically continues to honor the terms of the expired contract until an extension or a new contract is signed. We cannot assure you that any telecommunications operator will in fact continue to honor the terms of an expired contract. The specific termination and other material provisions of our more significant contracts with the telecommunications operators are set forth below.

Beijing AirInbox has entered into a cooperation agreement with China Mobile to provide MMS services on China Mobile's nationwide. Pursuant to this agreement, Beijing AirInbox pays China Mobile a service fee of 15% of the revenues generated from providing MMS services to customers, plus net transmission charges.

Beijing AirInbox has entered into a cooperation agreement with China Mobile's Beijing subsidiary to provide IVR services on China Mobile's nationwide network. Pursuant to this agreement, Beijing AirInbox pays China Mobile a service fee of 30% of the revenues generated from providing IVR services to customers.

Beijing AirInbox and Beijing WINT have each entered into a cooperation agreement with China Mobile's Jiangsu subsidiary to provide mobile games on China Mobile's nationwide network. Pursuant to this agreement, Beijing AirInbox and Beijing WINT will each pay China Mobile service fees ranging from 15% to 70%, depending on the type of mobile games that are provided and the channel through which the mobile games are distributed. For example, Beijing AirInbox and Beijing WINT will each pay China Mobile a service fee of 30% of the revenues generated from providing online mobile games to customers.

Mobile Handset Manufacturers

We have established distribution arrangements with mobile handset manufacturers, including Nokia, Samsung, Lenovo, HuaweiTianchuang and other major international and domestic handset manufacturers. Pursuant to these distribution arrangements, we pre-load into the menu of certain mobile handsets our mobile games, WAP icons and MMS, SMS and IVR short codes, which enable customers to access our WVAS quickly and easily. We pay the mobile handset manufacturers 35% to 70% of the net revenues that we receive from the telecommunications operators, generally after deducting the telecommunications operators' service fees, with respect to our mobile games and WVAS that are accessed by means of the pre-loaded icons and short codes. The terms of these agreements are generally for one year, and pertain to specific mobile handset models. In addition, we leverage our relationships with the mobile handset manufacturers to enter into joint marketing programs.

In addition to pre-loading our mobile games, icons and short codes into selected mobile handsets, we used to embed our icons and codes in selected handsets. On April 11, 2007, the MIIT issued a notice prohibiting the production of mobile handsets with embedded icons and codes that cannot be changed or deleted by customers. We have altered our arrangements with mobile handset manufacturers to comply with the notice, which took effect on June 1, 2007. In addition, on January 27, 2010, China Mobile began implementing an additional series of measures which are targeted at further improving the user experience for mobile handset embedded services. Under the guidance of China Mobile, WVAS that are embedded in handsets will be required to introduce additional notices and confirmations to users during the purchase of such services. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us may result in lower revenues or additional costs for us and materially adversely affect our business operations, financial condition or results of operations.” and “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Our effort to develop additional distribution channels for our WVAS and mobile games may not succeed or may be halted by the MIIT or the telecommunications operators.”

Content Providers for Our WVAS and Mobile Games

We have entered into licensing agreements with content providers, whereby we contract to use their content for a fixed licensing fee or for a certain percentage, generally from 10% to 80%, of the net revenues we receive from telecommunications operators with respect to products and services that contain the licensed content, generally after deducting the fees paid to our distribution partners. These arrangements are typically for one or two years and are not exclusive, except for the content specifically produced for us by our freelance writers and certain content from our third party content providers. We currently license news content from www.qianlong.com and Beijing News Media Corporation, among others, and license music content from Korean CJ-Mnet Media and LeiMan CD. We use the music that we license in our CRBT, song dedication, song listening, mobile karaoke, true ringtone and music video streaming and download services. In addition, we have entered into licensing agreements with Gameloft, KONAMI and China Entertainment Television Broadcast., Limited to provide their games to mobile phone users in the PRC.

Content Providers for Our Internet Games

We also license Internet games from other developers from time to time. In 2010, Beijing AirInbox entered into an exclusive license agreement with WarGaming.net LLP to, among other things, distribute and operate the World of Tanks game, as well as market and sell World of Tanks merchandises, in the PRC. Pursuant to this agreement, Beijing AirInbox pays WarGaming.net LLP 41% of the gross revenues generated from the distributing and operating of World of Tanks as well as the selling of World of Tanks merchandises in the PRC.

Product Development

Product Development for Our WVAS and Mobile Games

Our product development team focuses on creating innovative products that use the latest standards and technologies with respect to our WVAS, mobile games and wireless Internet sites. In particular, the 2.5G standard enables WVAS providers to send more data in a shorter period of time, thereby facilitating the transmission of more advanced data services. We were one of the first WVAS providers to work with China Mobile to develop and offer MMS and WAP services, and have continued to be a leading developer of innovative services compatible with these technology platforms. At the same time, we have increased our product development team's emphasis on developing and supporting our 2G products, including IVR and CRBT, which we distribute on the networks of China Mobile, China Unicom and China Telecom. We have a dedicated mobile games development team that develops games for Java™ and other mobile games platforms. In addition, a portion of our product development team focuses on products and services for the wireless Internet sites we are operating, including Kong.net, Ko.cn and ct.cn. We believe that our timely delivery of new services that meet telecommunications operators' specifications demonstrates our technical

capabilities and strengthens our cooperation relationship with the telecommunications operators.

In addition to developing a range of innovative WVAS and mobile games, we also have developed a variety of programming tools that allow us to enhance customers' enjoyment of our services. For instance, in response to the current lack of a standard operating system among mobile phones produced by different manufacturers in the PRC, which may result in inconsistent experiences for customers accessing our services through different handset models, we have developed software tools that allow our services to be readily adapted for use on most mobile phones on the market. These tools reduce the cost of adapting our services to new models of mobile phones and optimize the user experience in terms of format and presentation of our services. In 2012, we acquired Noumena, a developer of cross-platform smartphone mobile game engines. We believe the integration of the Noumena team into our existing mobile game development team will enable us to create new smartphone mobile games that can take advantage of the Handymo game engine technologies developed by Noumena.

Product Development for Internet Games

We believe that timely and quality game development is critical to our Internet games business and our business as a whole, and we have formed a separate department for the development of Internet games, which had 201 employees as of December 31, 2011. Our Internet games development department mainly consists of a programming, design and graphics division.

Unlike many of our competitors that operate MMORPGs licensed from foreign game developers, we have in-house development capabilities that allow us to develop games in timely response to constantly changing market demands and trends. Our systematic game development process includes the following key steps:

Concept Generation. Our design division takes the lead in generating ideas for new games based on the latest trends in player preferences. We recruit game players for our design division to closely track popular topics among players and on the Internet. We also encourage all of our employees to provide creative ideas and concepts for game development.

Detailed Proposal. Upon our management's approval of a new game concept, the design division will prepare a detailed proposal that sets forth preliminary game storylines and characters, estimates of costs and targeted audience.

Development Plan. After the completion of the technical review of the detailed proposal, a project team consisting of our programming staff, design staff and graphics artists will work together to set the technical criteria for the development of the game and formulate a development plan with certain milestones.

Design, Style and Story Concepts. Based on the game development plan, our graphics artists will determine the style of the new game and design game characters, our game designers will develop the game story and define game environments and our program developers will develop both the server-end software and the user-end software modules.

Internal Reviews. Management reviews will take place upon the completion of each milestone of the development plan. Concurrently, our testing division will test the accuracy and completeness of the development milestones and our marketing department will initiate marketing campaigns according to the development milestones.

Closed Beta Testing and Open Beta Testing. We conduct closed beta testing to correct technical issues of a new game. Thereafter, we conduct open beta testing to test the operation of the new game under open market conditions. Finally, we introduce the new game to players online.

Anticipating the potential growth of 3D Internet games in the PRC and recognizing the importance of possessing our own game engine, we have also focused on the development of our proprietary game engine, Dazzler 3D. Our game engine enables us to create quality 3D graphics, innovative gameplay and visual effects to better capture characters' motions. Our game engine is designed to allow for effective game playing on both high-end and lower-end computers. In 2012, we plan to launch one or two internally-developed MMORPGs.

Sales, Marketing and Customer Service

We are committed to establishing our KongZhong name as a well-recognized and reputable brand not only among our customers and users, but also among telecommunications operators, key industry players and other owners of brand names. We sell our WVAS and mobile games principally through the telecommunication operators, as well as other distribution partners. We market through our website, promotional events, direct marketing and media advertising. We also provide support and technical services to China Mobile, China Unicom and China Telecom and to our customers and users.

Sales and Marketing

In the past, we have focused our marketing activities on enhancing our KongZhong brand name, as we believed that branding was important in the wireless Internet business. In 2007, we increased our efforts in advertising in traditional media such as television, billboards, newspapers and magazines, as well as through the Internet, to promote our wireless Internet sites, including Kong.net and Ko.cn, and our corporate brand name, KongZhong. We conducted a major advertising campaign in the first half of 2007 and have been cooperating with the NBA to promote cn.NBA.com since the second half of 2007.

However, beginning in 2008 and continuing into 2009, as we adjusted our business strategy to develop our mobile games business, we began to decrease branding efforts through traditional media channels and increase our effort to promote our mobile games in cooperation with the PRC telecommunications operators. In 2010 and 2011, we made efforts to enhance our marketing to include marketing activities for the launches of our new Internet games and game expansion packs.

We utilize our leading position among providers of WVAS and our knowledge of our customers to attract joint promotion arrangements with brand owners seeking effective channels of publicity among trend-conscious consumers. Through select distribution channels, we target young and fashion-driven consumers whom we believe set trends for consumer products and services in the PRC. In addition, we market through traditional offline media venues, such as through newspapers, magazines and flyers.

A majority of our revenues are derived from services provided through the networks of China Mobile. Accordingly, we devote significant resources to maintaining, expanding and strengthening our relationship with China Mobile and its subsidiaries. In addition, we have strengthened our sales and marketing of 2G and 2.5G services, which we provide through the networks of China Mobile as well as other telecommunications operators. As of December 31, 2011, our sales and marketing department consisted of 59 persons strategically located in 31 provinces across the PRC to work closely with the telecommunications operators at the provincial and local levels, where pricing and other important decisions on marketing and operations are made. Our localized sales team helps us gain insight into developments in the local markets and the competitive landscape, as well as new market opportunities.

We also continuously seek alternative distribution channels for our WVAS and mobile games, such as mobile handset manufacturers and mobile handset distributors. Our sales force also works with other distribution partners to promote our services.

To motivate our sales professionals, a portion of their compensation is based on the usage of our services in their respective regions. Sales quotas are assigned to all sales personnel according to quarterly sales plans. We also continuously explore other joint marketing strategies in order to maximize our cooperation arrangements and resources.

With our acquisition of Dacheng and commencement of our Internet games business, marketing of our Internet games has become an important part of our strategy. We aim to attract new game players and increase revenues from existing game players by introducing marketing and promotion strategies that are specifically tailored to each of our Internet games. We advertise primarily in sites devoted to Internet games and game magazines, and marketing events are usually timed with the release of a new game or updates of a game's content.

Customer Service

We view both the telecommunications operators and end users of our services as customers. Customer service is a key to building our brand and our relationships with the telecommunications operators. We train our customer service representatives with an emphasis on customer satisfaction. Our customer service center handles calls, faxes and e-mails from our end users, as well as inquiries forwarded from the telecommunications operators. Our customer service representatives interact regularly with, and provide training materials to, customer service representatives of telecommunications operators to enhance our customers' experience with our services. As of December 31, 2011, our customer service department consisted of 97 persons strategically located in eight provinces across the PRC.

We provide high-quality customer service and are responsive to the needs of the players of our Internet games. In particular, our game players can access our customer service center through in-game chats, phone or e-mail 24 hours a day, seven days a week. In addition, we have a website for game players to submit feedback and a service center in Shanghai, which is open to walk-in game players during normal business hours. We had 61 customer service representatives dedicated to our Internet games business as of December 31, 2011, many of whom are MMORPG enthusiasts with a deep understanding of Internet games players. We also have dedicated supervisors to monitor our calls to ensure quality services. Feedback collected by our customer service team is important to the integration of our product development and game operations teams. The information collected by our customer service team forms the basis of our feedback database, which helps us track the trends in players' tastes and preferences and provide direction when we design changes, upgrades and expansion packs for our Internet games.

Competition

We face significant competition in the WVAS, mobile games, wireless Internet and Internet games markets in the PRC. In particular, the MIIT has reported on its website that, as of December 31, 2011, more than 1,749 service providers held nationwide licenses to supply content and services on the PRC telecommunications operators' networks. Moreover, China Mobile has been developing and marketing its own MMS and WAP products, and other PRC telecommunications operators may decide to do the same. We compete with these companies primarily on the basis of brand, the type and timing of service offerings, content and business partner and channel relationships. The telecommunications operators may also decide to enter the mobile games market in the future. Other potential competitors in this market include developers of personal-computer-based Internet games, major media companies, traditional video game developers, content aggregators, mobile software providers and independent mobile games developers. In addition to competition for products, services and distribution channels, we also compete for experienced and talented employees.

Some of our competitors may have more personnel and financial resources and a longer operating history than us. For example, Internet portals providing WVAS may have an advantage over us with their longer operating history, more established brand name, larger user base and Internet distribution channels. Furthermore, some competitors may be able to develop or exploit new technologies faster than us, or offer a broader range of products and services than we are presently able to offer.

We also compete principally with the following three groups of competitors in the Internet games business in China: Internet games developers and operators in the PRC other private companies in the PRC devoted to game development or operation and international competitors. Our existing and potential competitors in the Internet games business compete with us for talent, game player spending, time spent on game playing, marketing activities, quality of games and distribution network. Some of our existing and potential competitors have significantly greater financial and marketing resources than we do.

See "Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — We face increasing competition in the PRC from providers of WVAS, mobile games and Internet games, which could reduce our market share and materially adversely affect our financial condition and results of operations."

WVAS Services

Competition is particularly intense in the 2G and 2.5G WVAS markets in the PRC as the barriers to entry are relatively low. Our primary competitors in this market include Internet portals, such as Sina Corporation, Sohu.com Inc. and TOM Online Inc., and providers focused on WVAS, such as Tencent Technology Limited and A8 Music

Group. We also face increasing competition from China Mobile in the 2.5G WVAS market.

Mobile Games Services

Our primary competitors in the mobile games market in the PRC include Internet portals, such as Sina Corporation, Sohu.com Inc., Phoenix New Media Limited and TOM Online Inc., as well as providers focused on WVAS and mobile games, such as Tencent Technology Limited.

Internet Games Business

Our principal competitors for our Internet games business in the PRC include other Internet games developers and operators, such as Perfect World Co. Ltd, Shanda Interactive Entertainment Limited, Netease.com, Inc., Changyou.com Limited, Giant Interactive Group Inc. and Tencent Holdings Limited.

Intellectual Property and Proprietary Rights

We regard our copyrights, trademarks, trade secrets and other intellectual property rights as critical to our business. We rely on trademark and copyright law, trade secret protection, non-competition, confidentiality and licensing agreements with our senior officers, clients, partners and others to protect our intellectual property rights. Despite our effort to protect our proprietary rights, we cannot be certain that the steps we have taken will prevent misappropriation of our content or technology, particularly in foreign countries where the relevant laws may not protect our proprietary rights as fully as in the United States or other jurisdictions. For a description of the regulations applicable to our industry in the PRC, see “— Regulation.”

We have registered KongZhong Network as a commercial website with the SAIC. As a result, no one else may operate a website, whether commercial or otherwise, using the name of KongZhong Network. We also have registered our logo, the KongZhong thumb, and certain of our product names as trademarks in the PRC, and have applied to register our wireless Internet portal logo, the K palm, as a trademark in the PRC. Our trademarks are registered in the name of Beijing AirInbox. In addition, Beijing AirInbox is the registered owner of a number of domain names, the principal ones of which are www.kongzhong.com, www.kongzhong.com.cn, www.kongzhong.net, www.kongzhong.net.cn, www.cota.com.cn, www.cota.cn, ko.cn and Kong.net. Xinreli is the registered owner of a number of domain names, the principal ones of which are Simlife.com, Simlife.com.cn, Simlife.cn, Simlife.net and Simlife.net.cn. Dacheng is also the registered owner of a number of domain names, the principal ones of which are Loong3d.com, gamall.net and dacn.com.cn.

We are unable to register the Chinese name of “KongZhong Network” as our service mark in the PRC because it is deemed a generic term under existing PRC trademark laws, rules and regulations, which prohibit registration of generic terms as trademarks or service marks. However, we do not expect to face a proliferation of counterfeit services or products without any legal remedy, as we may seek a remedy for piracy under the PRC’s Anti-Unfair Competition Law, by bringing a suit against a third party that uses the Chinese name of “KongZhong Network” if the overall design or appearance of that third party’s services is substantially the same as that of the well-known or established services provided by us. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — We may not be able to adequately protect our intellectual property, and we may be exposed to infringement claims by third parties.”

Information Technology Systems and Infrastructure

We maintain most of our servers at the premises of Beijing Telecommunication Corporation, which is the administrator of the central hub of the ChinaNet backbone. We also maintain servers at other Internet data centers, including China United Network Communications Corporation Limited, Chongqing Mobile Communications Company Limited and Hangzhou Mobile Communications Company Limited. Following our acquisition of Dacheng, most of our servers used for our Internet games are hosted at the premises of 21 Vianet Data Center, one of the largest Internet infrastructure service providers in China. We also maintain online game servers at other Internet data centers, including Nanjing Telecommunication Corporation, Zhuhai Telecommunication Corporation, Shandong United Network Communications Company Limited, Shenyang United Network Communications Company Limited, Shanghai Technology Network Company Limited and Beijing Capital Online Company Limited. We believe that utilizing these hosting partners provides significant operating benefits, such as protecting our systems from power loss, break-ins and other potential external causes of service interruption. In addition, we back up all of our data. We believe we will be able to increase our server capacity as needed to accommodate future growth.

Employees

General

Our senior management and many of our employees have had prior experience in the Internet portal, Internet games or telecommunications-related industries. Our employees receive a base salary and a performance-based bonus, with the amounts of such bonuses calculated based on the performance ranking of the employee. In addition, we have a broad-based equity incentive plan pursuant to which we grant share options and restricted share units, or nonvested shares, from time to time to employees who have passed their initial probation period. We also offer internal training programs tailored to different job requirements to help enhance our employees' talents and skills. We believe that these initiatives have contributed to the growth of our business.

As of December 31, 2011, we had 961 employees, all in the PRC. The table below sets forth the number of our employees by function as of the dates indicated:

	As of December 31,					
	2009		2010		2011	
	Number	% of Total	Number	% of Total	Number	% of Total
Sales, marketing and business development	144	14.4 %	117	11.1 %	142	14.8 %
Customer service	59	5.9	93	8.9	97	10.1
Product development	741	73.9	773	73.6	660	68.6
General and administrative	58	5.8	67	6.4	62	6.5
Total	1,002	100.0%	1,050	100.0%	961	100.0%

We believe that we maintain a good working relationship with our employees, and we have not experienced any significant labor disputes. Our employees are not represented through any collective bargaining agreements or by labor unions.

Employee Benefits Plan

Our full-time employees in the PRC participate in a government-mandated defined contribution plan, under which certain pension benefits, medical care, unemployment insurance, employee housing fund and other welfare benefits are provided to employees. The PRC labor regulations require us to accrue for these benefits based on certain percentages of the employees' salaries. The total provisions for such employee benefits were approximately US\$3.1 million, US\$4.1 million and US\$3.6 million in 2009, 2010 and 2011, respectively.

We have granted share options to our employees pursuant to our KongZhong Corporation 2002 Equity Incentive Plan, or the 2002 Plan, and our KongZhong Corporation 2006 Equity Incentive Plan, or the 2006 Plan, as described in "Item 6 — Directors, Senior Management and Employees — Share Options."

Properties

Our principal executive office currently occupies approximately 13,571 square meters of office space in Beijing, the PRC, primarily under leases that will expire in August 2012. We expect to be able to renew these leases upon their expiration. In addition, we lease sales offices in 11 provinces throughout the PRC.

Legal Proceedings

We are not currently a party to any material legal proceeding. From time to time, we may be subject to various claims and legal actions arising in the ordinary course of business.

Despite our effort to comply with the intellectual property rights of third parties, we cannot be certain that we have not, and will not, infringe on the intellectual property rights of others, which may subject us to legal proceedings and claims in the ordinary course of our business from time to time. Such legal proceedings or claims, even if not meritorious, could result in the expenditure of significant financial and managerial resources. In addition, we may also initiate litigation to protect our intellectual property rights. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — We may not be able to adequately protect our intellectual property, and we may be exposed to infringement claims by third parties.”

Regulation

The telecommunications industry in the PRC, including computer information and Internet access services, is highly regulated by the PRC government. In particular, regulations issued or implemented by the State Council, the MIIT, and other relevant government authorities cover virtually every aspect of telecommunications network operations, including entry into the telecommunications industry, the scope of permissible business activities, interconnection and transmission line arrangements, tariff policy and foreign investment.

The MIIT, under the leadership of the State Council, is responsible for, among other things:

- formulating and enforcing telecommunications industry policy, standards and regulations;
- granting licenses to provide telecommunications and Internet services;
- formulating tariff and service charge policies for telecommunications and Internet services;
- supervising the operations of telecommunications and Internet service providers; and
- maintaining fair and orderly market competition among operators.

In addition, other governmental agencies that may have jurisdiction over our business activities include, but are not limited to, the following:

- the MOC;
- the MPS;
- the SAIC;
- the GAPP;
- the State Council Information Office, or SCIO; and
- SAFE.

Telecom Regulations

In September 2000, the State Council promulgated the Telecommunications Regulations, or the Telecom Regulations. The Telecom Regulations categorize all telecommunications businesses in the PRC as either infrastructure telecommunications businesses or value-added telecommunications businesses, with WVAS, mobile games and Internet games classified as value-added telecommunications businesses. Pursuant to the Telecom Regulations, a commercial operator of value-added telecommunications business must obtain an operating license. The Telecom Regulations also set forth extensive guidelines with respect to different aspects of telecommunications operations in

the PRC.

In December 2001, in order to comply with the PRC's commitments with respect to its entry into the World Trade Organization, or the WTO, the State Council promulgated the Administrative Rules for Foreign Investments in Telecommunications Enterprises, or the Telecom FIE Rules. In September 2008, the State Council promulgated the Decree of the State Council No. 534 to amend certain provisions of the 2001 Telecom FIE Rules. The Telecom FIE Rules set forth detailed requirements with respect to capitalization, investor qualifications and application procedures in connection with the establishment of a foreign-invested telecommunications enterprise. Pursuant to the Telecom FIE Rules, the ultimate capital contribution ratio of the foreign investor(s) in a foreign-funded telecommunications enterprise that provides value-added telecommunications services shall not exceed 50%. In addition, all principal investors in such an enterprise must themselves be telecommunications operators. Pursuant to the Foreign Investment Industrial Guidance Catalogue, as of October 31, 2007, the permitted foreign investment ratio of value-added telecommunications services is no more than 50%. To comply with these regulations, we conduct substantially all of our operations through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng, which are wholly-owned by PRC citizens or entities and incorporated in the PRC. We do not have any equity interests in these operating companies, but instead enjoy the economic benefits of these operating companies through a series of contractual arrangements, which we and our wholly-owned subsidiaries, KongZhong Beijing and KongZhong China, have entered into with Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli, Dacheng and their respective shareholders as described in “— Our Corporate Structure” and “Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions.”

In July 2006, the MIIT issued the Circular on Strengthening the Administration of Foreign Investment in and Operation of Value-added Telecommunications Business. In the circular, the MIIT reiterated the existing regulations regarding foreign investment in telecommunications business, which require foreign investors to set up foreign-invested enterprises and obtain a business operating license for Internet content provision, or an ICP license, in order to conduct any value-added telecommunications business in the PRC. Under this circular, a domestic company that holds an ICP license is prohibited from leasing, transferring or selling the license to foreign investors in any form, and from providing resources, sites or facilities to foreign investors that conduct value-added telecommunications business illegally in the PRC. Furthermore, the relevant trademarks and domain names that are used in the value-added telecommunications business shall be owned by the local ICP license holder or its shareholders. This circular further requires each ICP license holder to have the necessary facilities for its approved business operations and to maintain such facilities in the regions covered by its license. In addition, all value-added telecommunications service providers are required to maintain network and information security in accordance with the standards set forth under relevant PRC regulations. Due to the lack of further interpretation from the PRC regulator, it remains unclear what impact the above circular will have on us or other PRC Internet companies that have adopted the same or similar corporate and contractual structures as ours.

In addition to the regulations promulgated by the central PRC government, some local governments have also promulgated local rules applicable to Internet or other value-added telecommunications companies operating within their respective jurisdictions. In Beijing, the Beijing Municipal Administrative Bureau of Industry and Commerce, or the Beijing AIC, has promulgated a number of Internet-related rules. In 2000, the Beijing AIC adopted the Administrative Rules on Filing Commercial Websites, which require owners of the domain names of commercial websites located within Beijing to file their website names and commercial websites with the Beijing AIC.

Regulation of Internet Content Services

Subsequent to the State Council's promulgation of the Telecom Regulations and the Internet Information Services Administrative Measures, or the Internet Information Measures, in September 2000, the MIIT and other regulatory authorities formulated and implemented a number of Internet-related regulations, including but not limited to the Internet Electronic Bulletin Board Service Administrative Measures, or the BBS Measures. The Internet Information Measures require that commercial Internet content providers must obtain an Internet information license from the appropriate telecommunications authorities in order to carry on any commercial Internet content operations within the PRC. Internet content operators must display their operating license numbers in a conspicuous location on their home page. Internet content operators are obliged to police their websites in order to remove categories of harmful content that are broadly defined. This obligation reiterates Internet content restrictions that have been promulgated by other ministries over the past few years. In addition, the Internet Information Measures also provide that Internet content operators which operate in sensitive and strategic sectors, including news, publishing, education, health care, medicine and medical devices, must obtain additional approvals from the relevant authorities in charge of those sectors as well. Furthermore, the Internet Information Measures stipulate that Internet content operators must obtain the consent of the MIIT prior to establishing an equity or cooperative joint venture with a foreign partner. The BBS Measures provide that any Internet content operator engaged in providing online BBS is subject to a special approval and filing process with the relevant PRC governmental telecommunications authorities.

Certain local governments have promulgated local rules applicable to Internet companies operating within their respective jurisdictions. In Beijing, the Beijing AIC has promulgated a number of Internet-related rules. In 2005, the Beijing AIC adopted the Administrative Rules on Filing Commercial Websites, which require owners of the domain names of commercial websites located within Beijing to file their website names and commercial websites with the Beijing AIC.

Each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng has a telecommunications and information services operating license for their Internet content businesses from the Beijing Telecommunications Administration Bureau. These licenses are subject to standard annual review.

Regulation of WVAS

Pursuant to the Telecom Regulations, a commercial operator of Internet content services must obtain an operating license. Other than this requirement, PRC legislation on wireless telecommunications is generally aimed at regulating equipment and infrastructure rather than applications and value-added service providers.

The Administrative Measures for Telecommunications Business Operating Licenses, or Telecom License Measures, were promulgated by the MIIT on March 5, 2009. The Telecom License Measures confirm that there are two types of telecommunications operations licenses for operators in the PRC (including foreign-invested telecommunications enterprises), namely, licenses for infrastructure services and licenses for value-added services, for which a distinction is made as to whether a license is granted for intra-provincial or nationwide activities. An appendix to the license details the permitted activities of the enterprise to which it was granted. An approved telecommunications service operator must conduct its business, for both infrastructure and value-added services types of businesses, according to the specifications recorded on its Telecom Business Operating License. The MIIT is the competent approval authority for foreign-invested telecommunications enterprises and for granting nationwide licenses to value-added telecommunications enterprises.

Other than a general classification of wireless information services as value-added telecommunications services by an appendix to the Telecom Regulations, as amended, there is currently no nationwide legislation in the PRC that specifically addresses the provision of WVAS, such as SMS, MMS, WAP, Java™, IVR or CRBT services. At this time, it is if or when national legislation may be enacted in the PRC to regulate this business.

Each of Beijing AirInbox and Beijing Boya Wuji has obtained a value-added telecommunications business operation permit in order to operate wireless value-added businesses in Beijing. Each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang and Xinreli has obtained a nationwide value-added telecommunications license from the MIIT in order to provide services in multiple provinces, autonomous regions and municipalities. These licenses are subject to standard annual review.

Regulation of Internet Culture Activities

On February 17, 2011, the MOC promulgated the Interim Measures on Administration of Internet Culture, or the Internet Culture Measures, replacing previous interim measures promulgated in May 2003 and amended in July 2004. “Internet cultural products” are classified as cultural products developed, published and disseminated via the Internet, which mainly include: (i) products for publication via Internet, such as, among other things, online music and entertainment files, network games, online performing arts and artworks and online animation features and cartoons, and (ii) products converted from traditional music entertainment products, games, performing arts, artworks and

animation features and cartoons, and published via the Internet. Pursuant to the Internet Culture Measures, entities are required to obtain Internet Culture Business Permits from a provincial counterpart of the MOC if they intend to commercially engage in any of the following types of activities: (1) production, duplication, import, sale or broadcasting of Internet cultural products; (2) publication of cultural products on the Internet or transmission thereof through information networks such as Internet and mobile network to computers, fixed-line or mobile phones, television sets, gaming consoles or Internet access service sites including Internet cafes for the purpose of browsing, reviewing, using or downloading such products by internet users; or (3) exhibitions or contests related to Internet cultural products.

Software Products Registration

On March 5, 2009, the MIIT issued the Measures Concerning Software Products Administration, or the Software Measures. Under the Software Measures, producers of software products registered with the relevant PRC authorities may be entitled to certain preferential policies in PRC. Software developers or producers are allowed to sell or license their registered software products independently or through agents. Software products must be registered with the local provincial government authorities in charge of the information industry and filed with the MIIT. Upon registration, the software products shall be granted registration certificates. Each registration certificate is valid for five years and may be renewed upon expiration. The MIIT and other relevant departments may carry out supervision and inspection over the development, production, operation and importing and exporting of software products in the PRC. Dacheng has registered the game Kung Fu World with the relevant PRC authority and has obtained software product registration certificates for Kung Fu World.

Regulation of Information Security and Censorship

PRC legislation concerning information security and censorship specifically prohibits the use of Internet infrastructure where it results in a breach of public security, the provision of socially destabilizing content or the divulgence of state secrets.

“A breach of public security” includes a breach of national security or disclosure of state secrets; infringement on state, social or collective interests or the legal rights and interests of citizens; or illegal or criminal activities.

“Socially destabilizing content” includes any action that: (1) incites defiance or violation of PRC laws; (2) incites subversion of state power and the overturning of the socialist system; fabricates or distorts the truth, spreads rumors or disrupts social order; (3) advocates cult activities; or (4) spreads feudal superstition, involves obscenities, pornography, gambling, violence, murder or horrific acts or instigates criminal acts.

“State secrets” are defined under applicable PRC law as matters that affect the security and interest of the state. The term covers such broad areas as national defense, diplomatic affairs, policy decisions on state affairs, national economic and social development, political parties and other state secrets that the State Secrecy Bureau has determined should be safeguarded.

According to the aforementioned legislation, it is mandatory for Internet companies in the PRC to complete security filing procedures with the local public security bureau and for them to update their filings regularly with the local public security bureau regarding information security and censorship systems for their websites. In this regard, the Measures for the Administration of Commercial Website Filing, promulgated in October 2004 by the Beijing AIC, state that websites must comply with the following requirements:

- they must file with the Beijing AIC and obtain electronic filing marks;
- they must place the filing marks on their websites' homepages; and
- they must register their website names with the Beijing AIC.

We have successfully filed our websites and website names with the Beijing AIC. Accordingly, we have obtained an electronic registration mark.

Regulation of Pornographic Materials

Since the development of the Internet, the PRC government has carried out a series of actions targeting pornographic materials on the Internet, mobile phones and other Internet-based equipment. On May 11, 2007, the MIIT issued the Notice of Schemes of Special Campaign Against Internet-Based Pornography and, on December 15, 2009, the MIIT issued the Further Schemes of Special Campaign against Mobile Phone Pornography to regulate the dissemination of pornographic materials through mobile phones and the Internet.

The Supreme People's Court and Supreme People's Procuratorate issued the Interpretation on Issues of Application of the Laws for Production, Reproduction, Publication, Sale and Dissemination, of Pornographic Information Through Internet, Mobile Equipment and Information Service Centers on September 3, 2004, and the Interpretation on Issues of Application of the Laws for Production, Reproduction, Publication, Sale and Dissemination, of Pornography Information Through Internet, Mobile Equipment and Information Service Centers II on February 4, 2010. These interpretations define the applicable laws, crimes and penalties for the dissemination of pornographic materials on the Internet or through mobile telecommunications equipment.

Due to the uncertainty over how the above-mentioned rules and regulations will be interpreted and enforced, we cannot predict how they will affect our business operations and future strategies. Although we believe that our products and services are in compliance with these rules and regulations, we cannot assure that any of the relevant governmental authorities will not disagree and will not take legal action against us.

Regulation of Advertisements

The principal regulations governing advertisements in the PRC are the Advertising Law (1996) and the Administrative Regulations of Advertisements (1987), pursuant to which an entity conducting advertising activities as a supplementary business must obtain a permit from the local AIC and specifically mention advertising activities as a permitted business activity in such entity's business license. The SAIC is the government agency responsible for regulating advertising activities in the PRC. The Advertising Law (1996) and the Administrative Regulations of Advertisements (1987) do not contain, and the SAIC has not promulgated, regulations specifically aimed at mobile advertising through SMS or MMS services.

As part of our non-telecommunications operator marketing activities, we have developed integrated marketing campaigns with traditional media companies and multinational corporations through certain cross-selling effort with these companies. Beijing AirInbox has applied to the Beijing AIC to amend its business license to specify that the mobile advertising business is a permitted business activity and Beijing AIC has informed Beijing AirInbox that this is not necessary because Beijing AirInbox's business license already permits it to undertake the mobile advertising activities that it presently conducts. We cannot assure you that the SAIC or Beijing AIC will not require Beijing AirInbox to obtain an advertising permit from the Beijing AIC and specifically mention advertising activities as a permitted business in its business license in the future. In such an event, failure to comply could result in penalties including being banned from engaging in online advertising activities, confiscation of illegal earnings and fines.

Regulation of News Dissemination

On November 17, 2000, the Internet News Measures were promulgated by the State Council News Office and the MIIT. These measures stipulate that general websites established by non-news organizations may publish news released by certain official news agencies if such websites satisfy the requirements set forth in Article 9 of the measures and have acquired the requisite approval, but may not publish news items produced by themselves or news sources from elsewhere. All the news that we publish and disseminate originates from official news agencies approved by the PRC government.

On September 25, 2005, the State Council News Office and the MIIT jointly promulgated the Administrative Regulations for Internet News Information Services, or Internet News Information Services Regulations. According to

the Internet News Information Services Regulations, the term “news information” means current affairs and political types of news information, including reports or comments on politics, economy, military affairs, diplomacy and other social and public affairs, as well as reports or comments related to unexpected social events, and the term “Internet news information services” includes publication of news information, provision of current affairs and political types of electronic messaging services and release of current affairs and political types of communication information to the public through the Internet. The Internet News Information Services Regulations specify that Internet news information service providers established by non-news organizations must apply for approval from the State Council News Office, through its provincial offices, to be allowed to engage in providing Internet news information service in relation to the news information released by official news agencies. Such Internet news information providers shall also enter into cooperation agreements with those official news agencies pursuant to which the general websites will publish news information provided by the official news agencies, and such cooperation agreements shall be submitted to the local provincial offices of the State Council News Office for record. Beijing AirInbox has obtained a license pursuant to the Internet News Information Services Regulations.

Technology of Import and Export

China imposes controls on technology import and export. On December 10, 2001, the State Council promulgated Regulations on Administration of Import and Export of Technologies. The term “technology import and export” is broadly defined in the regulations to include, without limitation, the transfer or license of patents, software and know-how, and the provision of services in relation to technology. Depending on the nature of the relevant technology, the import and export of technology require either approval by, or registration with, the relevant PRC governmental authorities. If we enter into licensing agreements with third parties outside of the PRC through our PRC entities, such licenses will be required to be registered with applicable PRC governmental authorities. We intend to register the licenses we have granted to the non-PRC entities.

Regulation of Online Publications

The GAPP is the government agency responsible for regulating publishing activities in the PRC. On December 30, 1997, the GAPP issued the Rules for the Administration of Electronic Publications, or Electronic Publication Rules, which took effect on January 1, 1998. These rules were replaced by new Electronic Publication Rules promulgated on February 21, 2008, which took effect on April 15, 2008. The Electronic Publication Rules regulate the production, publishing and importation of electronic publication in the PRC and outline a licensing system for business operations involving electronic publishing. Under the Electronic Publication Rules and other regulations issued by the GAPP, Internet games are classified as a kind of electronic production, and publishing of Internet games can be done only by licensed electronic publishing entities with standard publication codes.

On June 27, 2002, the MIIT and the GAPP jointly promulgated the Tentative Internet Publishing Administrative Measures, or the Internet Publishing Measures, which took effect on August 1, 2002. The Internet Publishing Measures require Internet publishers to secure approval from the GAPP. The term “Internet publishing” is defined as an act of online dissemination whereby Internet information service providers select, edit and process works created by themselves or others (including content from books, newspapers, periodicals, audio and video products, electronic publications, and other sources that have already been formally published or works that have been made public in other media) and subsequently post the same on the Internet or transmit the same to users via the Internet for browsing, using or downloading by the public.

The GAPP and the MIIT have not specified whether the aforementioned approval in the Internet Publishing Measures is applicable to dissemination of works through SMS, MMS, WAP, Java™, IVR, CRBT or other wireless technologies. If, in the future, the GAPP and the MIIT clarify that the Internet Publishing Measures are applicable to wireless value-added telecommunications services operators or issue new regulations or rules regulating wireless publishing, we may need to apply for a license or permit from governmental agencies in charge for our WVAS business. We cannot assure you that such application would be approved by the relevant governmental agencies. As the provision of Internet games is deemed an Internet publication activity, an Internet games operator needs to obtain an Internet publishing license in order to directly make its Internet games publicly available in PRC. As of December 31, 2011, Beijing AirInbox and Dacheng have each obtained an Internet publishing license from the GAPP. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Dacheng is applying for an Internet publishing license required under PRC regulations for its games. If it fails to obtain such license, it may become subject to various penalties, including restrictions on our operations.”

Regulation of Internet-Based Audio-Video Programming Services

On December 20, 2007, the SARFT and the MIIT jointly promulgated the Regulations on Administration of Internet-based Audio-Video Programming Service, or the Internet-based Audio-Video Regulations, which became effective as of January 31, 2008. The Internet-based Audio-Video Regulations are applicable to the public

dissemination of Internet-based, including wireless Internet-based, audio-video programming services within the territory of the PRC. Activities covered by the Internet-based Audio-Video Regulations include producing, compiling, integrating and public dissemination over the Internet of audio or video programs, as well as aiding others to upload and disseminate such programs.

Providers of Internet-based Audio-Video programming services are required to obtain the Internet-based Audio-Video License or complete registration procedures as required in the Internet-based Audio-Video Regulations. Pursuant to the Internet-based Audio-Video Regulations, such provider must:

be a limited liability company that is either wholly-owned or majority-controlled by the state, without any violation of law or regulation within three years before the application date;

- have measures that ensure the safe dissemination of audio-video programs and protect against security breaches;

have audio-video programming resources that are appropriate for their businesses and in compliance with laws and regulations;

- possess technical competence, network resources and lawful funds that are appropriate for their businesses;

retain professionals who are appropriate for their businesses, and its major investors and operators did not violate any law or regulation within three years before the application date;

- have network technical designs that comply with laws and regulations and industry standards and guidance;

be in compliance with plans, layouts and business guidelines issued by the departments in charge of radio, film and television operations under the State Council; and

- be in compliance with laws and administrative regulations.

Pursuant to explanations of the Internet-based Audio-Video Regulations provided by the responsible persons at the SARFT and the MIIT in a press conference, providers who engaged in Internet-based audio-video programming services before the promulgation of the Internet-based Audio-Video Regulations and who have not violated any other laws or regulations are eligible to register their business and continue their operations. Beijing AirInbox has obtained an Internet-based Audio-Video License. However, given the short history of the Internet-based Audio-Video Regulations and the lack of interpretations, we cannot assure you that other of our operating companies will be qualified to apply for the Internet-based Audio-Video License or complete the required registration, and we cannot assure you that we will be granted the Internet-based Audio-Video License.

Regulation of Internet Games

In addition to rules and regulations described above, the PRC authorities have promulgated other specific regulations for Internet games.

On July 12, 2005, the MOC and the MIIT promulgated the Opinions on the Development and Administration of Online Game, reflecting the PRC government's intent to foster and control the development of the Internet games industry in China. Accordingly, the MOC will censor Internet games that "threaten state security," "disturb the social order," or contain "obscenity" or "violence".

Many of our customers access our games in Internet cafes, which are also regulated by the PRC government. Internet cafes are required to obtain a license from the MOC and the SAIC, and are subject to requirements and regulations with respect to location, size, number of computers, age limit of customers and hours of operation. In 2004, the MOC, the SAIC and other PRC governmental authorities jointly issued a notice to suspend issuance of new Internet cafe licenses. Though this nationwide suspension has been generally lifted in 2005, the local authorities have the authority of controlling the number and recipients of new licenses at their discretion. In addition, local and higher-level governmental authorities may from time to time strictly enforce customer age limits and other requirements relating to Internet cafes, as a result of the occurrence of, and media attention on, gang fights, arsons or other incidents in or related to Internet cafes. On February 15, 2007, the MOC and other relevant governmental authorities jointly issued the Internet Cafes Notice, which suspended nationwide the approval for the establishment of new Internet cafes in 2007 and imposed tougher penalties for Internet cafes admitting minors. In 2008 and 2010, the MOC, SAIC and other relevant governmental authorities, individually or jointly, have issued several notices which provide various ways to strengthen the regulation of Internet cafes, including investigating and punishing the Internet cafes which accept minors, cracking down on Internet cafes without sufficient and valid licenses, limiting the total number of Internet cafes, screening unlawful games and websites, and improving the coordination of regulation over Internet cafes and Internet games. As many of our customers access our games from Internet cafes, any reduction in the number, or any slowdown in the growth, of Internet cafes in the PRC as a result of stricter Internet cafe regulation will limit our ability to maintain or increase our revenues and expand our customer base, which will in turn materially and adversely affect our business, financial condition and results of operations.

In April 2007, the GAPP and several other governmental authorities issued a circular requiring the implementation of an “anti-fatigue system” and a real-name registration (by Internet games players) system by all PRC Internet games operators, in an effort to curb addictive Internet games playing behaviors of minors. Under the anti-fatigue system, three hours or less of continuous playing by minors is considered to be “healthy”, three to five hours to be “fatiguing”, and five hours or more to be “unhealthy”. Game operators are required to reduce the value of in-game benefits to a player by half if the player has reached “fatiguing” level, and to zero in the case of “unhealthy” level. To identify whether a player is a minor and thus subject to the anti-fatigue system, a real-name registration system is also adopted, which requires Internet games players to register their real identity information before they play Internet games. Dacheng has successfully developed such an anti-fatigue system. On July 1, 2011, the GAPP and several other government authorities jointly promulgated a further notice to strengthen the implementation of the anti-fatigue system and real-name registration, entitled the Notice on Initializing the Verification of Real-Name Registration for Anti-Fatigue System on Internet Games, or the Real-Name Registration Notice, which took effect on October 1, 2011. The Real-Name Registration Notice’s main focus is to prevent minors from using adults’ identification card to play Internet games. Accordingly, the notice provides more stringent punishment for Internet game operators for not implementing the anti-fatigue and real-name registration measures properly and effectively. The most severe punishment contemplated by the Real-Name Registration Notice is termination of the operation of an Internet game if it is found to be in violation of the anti-fatigue and real-name registration requirements.

On September 7, 2009, the State Commission Office for Public Sector Reform issued the Notice on Interpretation of the State Commission Office for Public Sector Reform on Several Provisions relating to Animation, Online Game and Comprehensive Law Enforcement in Culture Market in the ‘Three Provisions’ jointly promulgated by the MOC, SARFT and the GAPP, which took effect on the same date of promulgation. According to this notice, the GAPP is responsible for the examination and approval of the Internet games prior to being uploaded on the Internet, after which the Internet games shall be administrated by the MOC.

On September 28, 2009, the GAPP, the National Copyright Administration and the National Office of Combating Pornography and Illegal Publications jointly published the Further Strengthening of the Administration of Pre-examination and Approval of Internet Games and the Examination and Approval of Imported Internet Games which took effect on the same date of promulgation. This notice restates that foreign investors are not permitted to invest in Internet games operating businesses in the PRC through wholly-owned, equity joint venture or cooperative joint venture investments and expressly prohibits foreign investors from gaining control over or participating in domestic Internet games operators through establishing other joint venture companies, or contractual or technical arrangements. According to this notice, where new versions, expansion packs or new content shall be updated for Internet games which have been approved by the GAPP, the operation entity shall undertake the same procedures for the examination and approval by the GAPP of such new versions, expansion packs or new content.

On November 13, 2009, the MOC issued the Circular on Improving and Strengthening the Administration of Content in Internet Games. This circular emphasizes that correct cultural values shall be maintained to enhance the cultural implications of Internet games. Internet games which comprise mainly of killing beasts, combat and marriage shall be further restricted. Minors should be guided in their choice of games and their playing time should be limited through technical measures. This circular also requires Internet games operators to establish and maintain committees to monitor game content. Dacheng has established such a committee.

On June 3, 2010, the MOC issued the Interim Measures for the Administration of Internet Games, or the Internet Game Measures, which took effect on August 1, 2010, to further strengthen the supervision over the Internet games industry. The Internet Game Measures regulate a broad range of operation activities relating to Internet games, including development and production of Internet games, operation of Internet games, issuance of virtual currencies used for Internet games, and virtual currency trading services. The Internet Game Measures provide that any entity that is engaged in the operation of Internet games must obtain an Internet Culture Business Permit. The Internet Game Measures require the content of an imported Internet game to be examined and approved by the MOC prior to the game's launch and the content of a domestic Internet game to be filed with the MOC. The Internet Game Measures also request Internet game operators to protect the interests of game players and stipulate that the service agreement between an Internet game operator and the players of its online games must include certain mandatory terms required by the MOC. On July 29, 2010, the MOC issued the Notice of the Ministry of Culture on the Implementation of the Interim Measures for the Administration of Internet Games, which took effect on date of its issuance. This notice provides details as to the requirements and procedures relating to applications for Internet Culture Business Permits and the MOC's review of the content of Internet games. In addition, the notice emphasizes the protection of minors who play online games and requests Internet games operators to promote real-name registration of their game players.

On June 22, 2010, the MOC issued the Provisional Measures for the Administration of Internet Games, or the Internet Game Measures, to strengthen the MOC's supervision of the development, production, operation and issuance of Internet games. A company must obtain the Internet culture operation license in order to operate Internet games. Such permit is valid for three years and renewable before its expiration. The Internet Game Measures sets forth detailed restrictions on Internet games operations, such as examination and filing of Internet games' content, installment of anti-fatigue system and implementation of real-name registration. Each of Beijing AirInbox, Dacheng and Xinreli has obtained Internet culture business operations license for our Internet games business.

Regulation of Virtual Currency

The use of "virtual currency," which is typically used to purchase in-game virtual items, is also regulated by the PRC government. Under the Internet Cafes Notice described above, the PBOC is directed to strengthen the administration of virtual currency in Internet games to avoid any adverse impact on the economy and financial system of the PRC. This notice provides that the total amount of virtual currency issued by Internet games operators and the amount purchased by individual game players should be limited, with a strict and clear division between virtual transactions and real transactions carried out by way of electronic commerce. This notice also provides that virtual currency should only be used to purchase virtual items.

On June 4, 2009, the MOC and Ministry of Commerce jointly issued a circular regulating the trading of Internet games virtual currencies. The circular clearly defines for the first time the meaning of virtual currency and places a set of restrictions on the trading and issuance of virtual currency. The circular also states that Internet games operators are not allowed to give out virtual items or virtual currency through lottery-base activities, such as lucky draws, betting or random computer sampling, in exchange for user's cash or virtual money. This regulation is mainly targeted at lottery-based activities found in some Internet games.

On July 20, 2009, the MOC promulgated the Filing Guidelines on Online Game Virtual Currency Issuing Enterprise and Online Game Virtual Currency Trading Enterprise, which specifically define the meaning of "issuing enterprise" and "trading enterprise" and stipulate that both of these businesses may not be operated by the same enterprise.

According to the Internet Game Measures, a company must also obtain an Internet culture business operations license in order to issue and conduct transactions in virtual currency. Furthermore, the virtual currency issued by an Internet games operator can only be used to exchange for such operator's Internet games assets. As an additional requirement, the Internet games operator must register the kind, price, total quantity of virtual currency used in its online games with the local provincial branch of the MOC.

Privacy Protection

The applicable PRC law does not prohibit Internet content providers from collecting and analyzing personal information from their users. We require the customers of our Internet games to accept a user agreement whereby they agree to provide certain personal information to us. Chinese law prohibits Internet content providers from disclosing to any third parties any information transmitted by users through their networks unless otherwise permitted by law. If an Internet content provider violates these regulations, the MIIT or its local bureaus may impose penalties and the Internet content provider may be liable for damages caused to its users.

Regulation of Foreign Exchange Control

The principal regulations governing foreign exchange in the PRC are the Foreign Exchange Control Regulations (Amended in 2008) and the Administration of Settlement, Sale and Payment of Foreign Exchange Regulations (1996), or together, the Exchange Regulations. Under the Exchange Regulations, the Renminbi is freely convertible into foreign exchange for current account items, including the distribution of dividends. Conversion of Renminbi for capital account items, such as direct investment, loans, security investment and repatriation of investment, however, is still subject to the approval of SAFE.

Under the Exchange Regulations, foreign-invested enterprises are required to open and maintain separate foreign exchange accounts for capital account items (but not for other items). In addition, foreign-invested enterprises may buy, sell or remit foreign currencies only at those banks authorized to conduct foreign exchange business after providing valid commercial documents and, in the case of capital account item transactions, obtaining approval from SAFE.

In October 2005, SAFE issued the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-raising and Return Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies, or Notice 75, which took effect on November 1, 2005. Notice 75 supersedes prior SAFE regulations promulgated in January and April of 2005. Notice 75 and relevant SAFE regulations require PRC residents to register with the relevant local SAFE branch in connection with their establishment or control of an offshore entity established for the purpose of overseas equity financing involving onshore assets or equity interests held by them and direct investment through such an offshore entity in the PRC. The term “PRC residents,” as used in Notice 75, includes not only PRC citizens but also other persons who habitually reside in the PRC for economic benefit. These PRC residents are required to register with the relevant SAFE branch before establishing or taking control of such an offshore entity and complete amended registrations with the relevant SAFE branch upon: (i) injection of equity interests or assets of an onshore enterprise into the offshore entity; (ii) subsequent overseas equity financing by such offshore entity; or (iii) any material change in the shareholding or capital of the offshore entity, such as changes in share capital, share transfers and long-term equity or debt investments, and providing security. The PRC residents who have already incorporated or gained control of offshore entities that had completed onshore investments in the PRC before Notice 75 took effect must register with the relevant local SAFE branch on or before March 31, 2006. In addition, such PRC residents are required to repatriate into the PRC all of their dividend profits or capital gains from their shareholdings in the offshore entity within 180 days of their receipt of such profits or gains.

The registration set forth by Notice 75 and relevant SAFE regulations are prerequisites for other approval and registration procedures necessary for capital inflow from the offshore entity, such as inbound investment or shareholders loans, or capital outflow to the offshore entity, such as the payment of profits or dividends, liquidating distributions, equity sale proceeds or the return of funds upon a capital reduction.

A number of terms and provisions in Notice 75 and relevant SAFE regulations remain unclear. Due to the uncertainty regarding the interpretation and implementation of Notice 75 and relevant SAFE regulations, we cannot predict how such notice and regulations will affect our business operations or future strategies. For example, the ability of our present and prospective PRC subsidiaries to conduct foreign exchange activities, such as remitting dividends and foreign currency-denominated borrowings, may be subject to compliance with requirements of Notice 75 and relevant SAFE regulations by the PRC resident holders of our ordinary shares and ADSs. Despite our efforts to fully comply with the SAFE regulations, we cannot assure you that we will obtain, or receive waivers from, any necessary approvals or not be found in violation of the SAFE regulations or any other related foreign exchange regulations. In particular, we cannot assure you that we will be able to cause all the present or prospective PRC resident holders of our ordinary shares or ADSs to comply with all SAFE regulations. A failure by the PRC resident holders of our ordinary shares or ADSs to comply with Notice 75 and relevant SAFE regulations or our inability to secure required approvals or registrations may subject us to fines or legal sanctions, limit our subsidiaries’ ability to make distributions or pay dividends, restrict our overseas or cross-border investment activities or affect our ownership structure, any of

which could affect our business and prospects.

A notice issued by SAFE on May 20, 2011, or Notice 19, further provides detailed provisions and requirements regarding the foreign exchange registration under SAFE Notice 75. Under Notice 19, any PRC citizen, resident, or entity which is a direct or indirect shareholder of an offshore entity is required to update any previously filed registration with the local branch of SAFE to reflect any material change in such offshore entity. Moreover, any offshore entity which fails to comply with Notice 75 may remedy by making the registration with the local branch of SAFE after fulfillment of the administrative penalties imposed by the relevant SAFE branch.

Regulation of Share Options and Restricted Share Units

On December 25, 2006, the PBOC, issued the Administration Measures on Individual Foreign Exchange Control, and its Implementation Rules was issued by SAFE on January 5, 2007, both of which became effective on February 1, 2007. Under these regulations, all foreign exchange matters involved in employee share ownership plans, share option plans and other equity incentive plans participated by PRC individuals shall be transacted upon the approval from the SAFE or its authorized branch.

In February, 2012, SAFE promulgated SAFE Notice 7, replacing the SAFE Notice 78. SAFE Notice 7 is applicable to (i) PRC directors, supervisors, senior management and other employees of an overseas-listed PRC company, (ii) PRC subsidiaries or branches of, and any PRC entities directly or indirectly controlled by, an overseas-listed company, and (iii) the Domestic Individuals. Under SAFE Notice 7, Domestic Individuals who are granted stock options or any other stock-related rights and benefits under a stock incentive plan by an overseas publicly-listed company are required to complete certain procedures and transactional foreign exchange matters under the stock incentive plan upon the examination by, and the approval of, SAFE or its authorized local counterparts.

We have already registered, and have registered on behalf of those employees subject to SAFE Notice 7, with the relevant local SAFE branches our employee stock incentive plans in 2009, pursuant to regulations promulgated under SAFE Notice 78. However, there exist significant uncertainties in practice with respect to the interpretation and implementation of SAFE Notice 7, and we cannot assure you that our registration under SAFE Notice 78 would be sufficient for compliance with SAFE Notice 7. If SAFE or other PRC governmental authorities determine that we or those of our employees subject to SAFE Notice 7 have failed to comply with the provisions of the SAFE Notice 7, we or they may be subject to fines and legal sanctions.

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

The following discussion and analysis should be read in conjunction with our audited consolidated financial statements and the related notes thereto included elsewhere in this annual report. Our audited consolidated financial statements have been prepared in accordance with U.S. GAAP. Actual results could differ materially from those projected in the forward-looking statements. In evaluating our business, you should carefully consider the information

provided in “Item 3 — Key Information — Risk Factors.”

Overview

We are one of the leading providers of digital entertainment services for consumers in the PRC. We operate three main business units, namely WVAS, mobile games and Internet games. We are one of the leading providers of WVAS to mobile phone users and have been in cooperation with all major telecommunications operators in the PRC since 2002. In 2005, we began providing feature-phone mobile games on the networks of China Mobile with the acquisition of Tianjin Mammoth, a mobile games developer. To further expand our mobile games development capabilities, we acquired Noumena in 2012 in order to develop smartphone mobile games on smartphone mobile operating systems, such as iOS and Android. We commenced our Internet games business in 2010 through our acquisition of Dacheng, a developer and operator of Internet games in the PRC. In addition to developing and operating our self-developed Internet games, such as Loong, Demon Code and Kung Fu Hero, we are the exclusive operator of the popular World of Tanks game for the PRC Internet games market.

We were incorporated under the laws of the Cayman Islands on May 6, 2002. Our revenues were US\$160.0 million in 2011 compared to US\$149.6 million in 2010. Our net loss was US\$7.7 million in 2011 compared to a net income of US\$11.9 million in 2010. As a percentage of our total revenues, revenues generated from WVAS, mobile games and Internet games accounted for 50.2%, 25.5% and 24.3% in 2011, respectively.

We have a limited operating history on which to base an evaluation of our business and prospects. Our prospects should be considered in light of the risks, uncertainties, expenses and difficulties frequently encountered by companies in the early stages of their development, particularly in new and rapidly evolving markets such as the WVAS, mobile games and Internet games markets.

The major factors affecting our financial condition and results of operations include:

- trends in the WVAS, mobile games and Internet games markets in the PRC;
- continued growth in the number of players for, and revenues generated from, the World of Tanks game;
- the successful launches of new smartphone mobile games and Internet games, which depend, in part, on our ability to anticipate and effectively respond to the changing consumer tastes and preferences and technological advances in a timely manner;
- changes in the policies or guidelines of China Mobile and other PRC telecommunications operators with respect to our WVAS and mobile games businesses;
- changes in laws, rules and regulation affecting our businesses;
- development of competing services from China Mobile, other PRC telecommunications operators, and increased competition in the mobile games and Internet games markets from the more established companies that develop and operate personal computer-based games, as well as the mobile platform application developers;
- our product development efforts to capitalize on market opportunities;
- effectiveness of our marketing and promotional activities;
- technological advancement of the mobile telecommunications market, including the adoption of 3G and subsequent standards of mobile handsets and networks, and the smartphone mobile games and Internet games market in the PRC; and
- changes in the number, scope and terms of our cooperation arrangements with the telecommunications operators, content providers, mobile handset manufacturers, mobile handset distributors and other key players in the PRC's mobile telecommunications industry.

In order to reduce the risk that our financial condition and results of operations will be overly dependent upon, and disproportionately impacted by, any particular service offering, technology platform or telecommunications operator, we have sought to broaden the range of our services, expand our distribution channels, cultivate new relationships with telecommunications operators and develop our smartphone mobile games and Internet games businesses, both of which are less dependent on the telecommunications operators than either WVAS or feature-phone mobile games business. Our acquisitions of Dacheng and Noumena are also part of this diversification strategy.

Prior to 2008, we operated two segments, WVAS and WIS. As our mobile games business grew over time, it has required separate management in respect of decision making, allocation of resources and assessment of performance. We anticipate that mobile games would become a significant contributor to our future revenues. As a result, we began reporting three business segments in 2008, which were WVAS, mobile games and WIS. In 2010, we consolidated the majority of the WIS business segment, including our operation of Kong.net and ct.cn, into our WVAS business segment to reflect certain changes in our existing WIS business, to further streamline our WIS operations and to take advantage of the synergies between our operation of Kong.net and ct.cn and our WVAS business. We have restated the segment reporting information in 2008 and 2009 for our WVAS business segment to include the results of our former WIS business segment.

Revenues

The following table sets forth the revenues attributable to services derived from the WVAS, mobile games and Internet games segments in terms of amount and as a percentage of our total revenues for the periods indicated:

	For the year ended December 31, 2009		2010		2011			
	Amount	Percentage of revenues	Amount	Percentage of revenues	Amount	Percentage of revenues		
	(in thousands of U.S. dollars, except percentages)							
WVAS	US\$ 104,001.6	79.2	% US\$ 83,280.3	55.7	% US\$ 80,265.9	50.2	%	
Mobile games	27,296.6	20.8	49,171.5	32.8	40,850.5	25.5		
Internet games	–	–	17,131.6	11.5	38,892.0	24.3		
Total	US\$ 131,298.2	100.0	% US\$ 149,583.4	100.0	% US\$ 160,008.4	100.0	%	

The following table sets forth the revenues attributable to services derived from each of our 2G and 2.5G technology platforms in terms of amount and as a percentage of our total revenues for the periods indicated:

	For the year ended December 31, 2009		2010		2011			
	Amount	Percentage of revenues	Amount	Percentage of revenues	Amount	Percentage of revenues		
	(in thousands of U.S. dollars, except percentages)

WVAS Revenues

Prior to 2004, we generated all of our WVAS revenues from fees paid by mobile phone users who use our services through China Mobile's network. Starting from 2004, we began cooperating with China Unicom, China Netcom and China Telecom and received revenues from services provided on their networks. In order to reduce our dependence on China Mobile for our WVAS business, we acquired Sharp Edge in January 2006, which derived most of its revenues from China Unicom, China Netcom and China Telecom. However, our dependence on China Mobile increased in 2011, as China Unicom and China Telecom continued to de-emphasize their WVAS businesses relative to China Mobile. Our WVAS business through China Mobile as a percentage of our total WVAS revenues grew as a result. As a percentage of our total WVAS revenues, WVAS revenues generated from China Mobile represented approximately 71% and 73% in 2010 and 2011, respectively. However, due to our dependence on China Mobile for a substantial portion of our WVAS revenues, our working relationship with China Mobile is critical to the financial condition and results of operations of our WVAS business. See "Item 3 — Key Information — Risk Factors - Risks Relating to Our Businesses — We depend on China Mobile and other PRC telecommunications operators for the majority of our revenues, and any loss or deterioration of our relationship with these telecommunications operators may result in severe disruptions to our business operations and the loss of the majority of our revenues."

We allocate our WVAS resources based on the geographic concentration of our customers. Due to our customer base being primarily concentrated in the coastal regions of the PRC, we generally allocate more of our WVAS resources to these regions, including maintaining sales offices in most of the coastal regions of the PRC.

We recognize revenues derived from our services before deducting the service fees and the net transmission charges that we pay to the telecommunications operators. Fees for our services are charged on either a single-transaction or monthly subscription basis and vary according to the type of services delivered. For a description of our fees and arrangements with the telecommunications operators, see "Item 4 — Information on the Company — Our Business — Strategic Relationships — Telecommunications Operators." We recognize all revenues in the period in which the services are performed.

As telecommunications operators do not provide us with a detailed revenue breakdown on a service-by-service basis, we depend on our internal data management system to monitor revenues derived from each of our services. We make our business decisions including research and development of new services and reallocation of resources to popular services based on our internal data, taking into account other factors including strategic considerations. For a description of our revenue recognition policy, see “— Critical Accounting Policies.”

Billing policies of the telecommunications operators have historically had a significant impact on our WVAS revenues. Since the second half of 2004, China Mobile and its provincial subsidiaries have been gradually implementing a series of policies designed to improve customer service and satisfaction. These policies include:

- not recognizing revenues to us and other service providers for MMS messages that cannot be delivered because of network or handset problems;

- canceling monthly subscriptions of customers who have not accessed their WVAS subscriptions for a certain period of time;

- implementing more complicated procedures for customers to confirm new subscriptions to certain WVAS; and

- removing from subscriber lists those customers who fail to pay China Mobile or the provincial subsidiaries, or who cannot be billed because they use pre-paid telecommunications service cards.

On July 6, 2006, China Mobile announced a series of additional measures with respect to the billing of customers of WVAS on its network, with focus on customers’ monthly subscriptions to WVAS. The measures that have had a significant impact on our financial condition and results of operations include:

- for any new monthly subscriptions to WVAS, China Mobile sends customers two reminder notices prior to charging monthly subscription fees in the customers’ monthly mobile phone bills, and customers must confirm twice, once in response to each reminder, that they wish to subscribe to those services on a monthly basis; previously China Mobile sent one reminder notice immediately after a monthly subscription order was placed, and customers needed to confirm only once;

- customers enjoy a free trial period of 11 to 41 days, depending on the day of the month on which they place their monthly subscriptions; previously customers enjoyed a free trial period of three to 11 days; and

- China Mobile cancels WAP monthly subscriptions that have not been active for more than four months.

During the fourth quarter of 2006, other PRC telecommunications operators also began implementing new policies requiring double confirmation of monthly subscriptions. In May 2007, China Mobile started sending notices of transmission fees to be incurred by using GPRS to the handsets of its customers when those customers launched their browsers, which discouraged some customers from purchasing our WAP products or visiting our wireless Internet sites Kong.net and Ko.cn.

On November 30, 2009, China Mobile implemented a series of measures targeted at eliminating offensive or unauthorized content, including pornographic content, on Chinese-based WAP sites. As a result, China Mobile and other Chinese telecommunications operators suspended billing for their customers for all WAP and G+ mobile gaming platform services, including those services that do not contain offensive or unauthorized content, on behalf of third party service providers of such services. China Mobile and other operators have not yet indicated how long these new measures would last or whether they would expand their current measures.

On January 27, 2010, China Mobile began implementing an additional series of measures targeted at further improving the user experience for mobile handset embedded services, in addition to the introduction of a new short message service, or SMS, code management system. Under these measures, WVAS that are embedded in handsets will be required to introduce additional notices and confirmations to end-consumers during the purchase of such services. In addition, services related to SMS short codes will be required to be more tailored to the specific service offerings or service partners. Previously, a single SMS code could be used for multiple service offerings or partners.

For a description of risks related to significant changes in the billing and service provider policies of the telecommunications operators, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us could result in lower revenues or additional costs for us and materially and adversely affect our business, financial condition, results of operations and prospects.”

Our WVAS revenues were US\$104.0 million, US\$83.3 million, US\$80.3 million in 2009, 2010 and 2011, respectively.

Mobile Games Revenues

We generate substantially all of our mobile games revenues by distributing mobile games through the networks of China Mobile. In 2011, we derived 93.2% of our mobile games revenues from the monthly subscription fees paid by our customers. As a percentage of our total mobile games revenues, mobile games revenues received through China Mobile accounted for 98.5%, 98.4% and 97.1% in 2009, 2010 and 2011, respectively. Due to our dependence on China Mobile for substantially all of our mobile games revenues, our working relationship with China Mobile is critical to the operation of our mobile games business. For a description of risks related to our dependence on China Mobile, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — We depend on China Mobile and other PRC telecommunications operators for the majority of our revenues, and any loss or deterioration of our relationship with these telecommunications operators may result in severe disruptions to our business operations and the loss of the majority of our revenues.” We expect to supplement these streams of revenues in 2012 with revenues that we expect to generate from sales of our internally-developed smartphone mobile games, which we plan to distribute through digital distribution platforms, such as app stores developed by smartphone handset manufacturers.

Our mobile games revenues increased to US\$49.2 million in 2010 from US\$27.3 million in 2009, principally as a result of our efforts in developing our mobile games business, decreases in 2.5G data tariffs and the increased penetration of higher-end feature-phones capable of playing mobile games. In 2011, our revenues generated from mobile games decreased to US\$40.9 million, which was primarily due to the adoption by China Mobile of measures similar to those that have affected our WVAS business, as described above, and China Mobile’s decision to de-emphasize its subscription-based mobile games download services. For a description of risks related to significant changes in the billing and service provider policies of the telecommunications operators, see “Item 3 — Key Information — Risk Factors —

Risks Relating to Our Businesses — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us could result in lower revenues or additional costs for us and materially and adversely affect our business, financial condition, results of operations and prospects.” The decrease in 2011 was also attributable to impact created by the overall market shift in the tastes and preferences of consumers in China from traditional feature-phone mobile games, which are mainly Java-based, to mobile games that are developed for smartphone mobile operating systems, such as iOS and Android mobile games. We believe this shift in tastes and preferences of consumers in China will continue in 2012. For a description of risks related to uncertainties in the PRC mobile games market, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — Our mobile games business has a short operating history, and the mobile games market in the PRC is subject to many uncertainties.”

Internet Games Revenues

The Internet games revenues are primarily derived from Internet games operation revenues and licensing revenues. We earn Internet games operation revenues through the provision of Internet games services to players under an item-based revenue model. Under such a model, the basic functions of a game are free of charge, and, instead, players are charged for purchases of in-game items, which can enhance the game-playing experience. In 2011, we derived a majority of our Internet games revenues from revenues generated through the operation of our licensed Internet games, especially the World of Tanks game, which generated over 69% of our Internet games revenues from the in-game items purchased for the World of Tanks game for 2011. We expect revenues generated from the World of Tanks game to continue to be a major driver for growing our Internet games revenues in 2012. Due to our dependence on the World of Tanks game for a majority of our Internet games revenues, our business relationship with WarGaming.net LLP is critical to the continued operation of the World of Tanks game. For a description of risks related to our dependence on a small number of Internet games for a significant portion of our Internet games revenues, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — We depend on a small number of Internet games for a significant portion of our Internet games revenues. As a result, any factors that could have an adverse impact on the development, marketing and distribution of these Internet games, or on our business relationships with the licensors of these Internet games, could material reduce our Internet games revenues, and have a material adverse effect on our business, financial condition, results of operations and prospects.”

Revenues from the sales of in-game items are recognized when items are consumed by customers or over the estimated lives of the items. The average period that players typically play the game and other player behavior patterns, which are affected by various factors such as acceptance and popularity of expansion packs, promotional events and market conditions, are utilized to arrive at the best estimates for lives of these in-game items. We assess the estimated lives of in-game items for all of our games on a quarterly basis. If there are indications of any significant changes to the estimated lives of the in-game items, such changes would be applied in the period of change prospectively.

Under the item-based revenue model, proceeds received from sales of game points, which can be used to purchase in-game items, to players are recorded as deferred revenues, while proceeds received from sales of game points to third parties other than players and sales of prepaid game cards, which can also be used to purchase in-game items, are initially recorded as advances from customers. As we do not have control and generally do not know the ultimate selling price of the prepaid game cards or game points sold by the distributors, net proceeds from distributors are recorded as advances from customers. Upon activation of the game cards or the game points, these advances from customers are immediately transferred to deferred revenues. For a description of our revenue recognition policy, see “— Critical Accounting Policies.”

In addition, we entered into licensing arrangements with various licensees to operate our games in the PRC and in other countries and regions. These licensing agreements provide for two revenue streams: the initial fees and the usage-based royalty fees. In certain licensing arrangements, we provide free upgrades, maintenance support and training, which are our post-sale customer support, or PCS, for the first year. The licensees have the option to

purchase PCS in subsequent years at specified renewal rates. In these arrangements, we allocate the initial fee into two parts. The first part represents the license of the game and is recognized as license revenue immediately upon the launch of the games in foreign countries or regions. The second part represents fees for the PCS and is recognized ratably over the contractual period of the PCS. In other licensing arrangements, we provide PCS over the full licensing period for no additional charge. In such cases, the total amount of the initial fee is recognized ratably over the full contractual licensing period.

According to our license agreements, we are also entitled to ongoing usage-based royalties determined based on the amount of fees charged to the players' accounts or services payable by players in a given country or region. The usage-based royalties are recognized when they are earned, provided that the collection is probable.

Our Internet games revenues were US\$38.9 million in 2011, of which 94.0% was generated from game operations and 6.0% was generated from licensing our Internet games to third party licensees.

Cost of Revenues

Our cost of revenues includes WVAS cost of revenues, mobile games cost of revenues and Internet games cost of revenues.

WVAS Cost of Revenues

Our WVAS cost of revenues includes the following:

Service fees payable by us to the telecommunications operators. In the case of China Mobile and its subsidiaries, service fees are generally 15% to 60% of the revenues, while in the case of China Unicom and China Telecom, service fees are in the range of 15% to 52%, varying according to the service platform. We are not obligated to pay the service fees to the telecommunications operators if the customers cannot be billed or do not pay the telecommunications operators;

Net transmission charges payable by us to the telecommunications operators, calculated as the number of messages we send to customers in any given month, minus the number of messages we receive from customers regarding our services in that month, multiplied by a per-message transmission fee. We are obligated to pay the telecommunications operators the net transmission charges even if the customers cannot be billed or do not pay the telecommunications operators;

Payments to content providers for the use of their content, and to mobile handset manufacturers and other industry partners with whom we have cooperation arrangements, in the form of a fixed fee or a percentage of our aggregate net revenues received from the telecommunications operators with respect to services provided through the cooperation arrangements;

· Bandwidth leasing charges and depreciation and facility costs relating to equipment used to provide WVAS; and

· Depreciation and facility maintenance.

Our total WVAS cost of revenues in 2009, 2010 and 2011 was US\$54.3 million, US\$48.3 million and US\$50.8 million, respectively. As a percentage of our WVAS revenues, our WVAS cost of revenues in 2009, 2010 and 2011 was 52.2%, 58.0% and 63.2%, respectively. In 2011, as a percentage of our WVAS cost of revenues, service fees to the telecommunications operators represented approximately 39.1%, payments to handset manufacturers represented approximately 19.5%, net transmission charges to the telecommunications operators represented approximately 27.5%, payments to content providers represented approximately 6.8%, payment to other cooperation partners represented approximately 0.5% and bandwidth leasing charges, depreciation and other facility costs represented approximately 6.6%.

Our WVAS cost of revenues increased in 2011 primarily as a result of increases in the content fees we paid to our content providers in 2011. As our overall WVAS revenues decreased, the amount that we paid to telecommunications operators in service fees and net transmission charges also decreased. The service fees that we paid to other business partners, including mobile handset manufacturers and media partners, also decreased as we sought to diversify our non-operator distribution channels.

As part of our business strategy, we expect to continue to pursue more cooperation arrangements with business partners, such as handset manufacturers, because these arrangements make it easier for customers to access our products and services and are a cost-effective way to increase our market share as compared to traditional advertising.

However, as we generally pay higher rates of service fees, in terms of percentages of revenues generated from cooperation arrangements, to such business partners than those paid to telecommunications operators, this strategy may result in a decrease in our gross profit margin.

Mobile Games Cost of Revenues

Our mobile games cost of revenues consists mainly of service fees and net transmission charges to the telecommunications operators, payments to content providers for the use of their content and bandwidth leasing charges.

Total mobile games cost of revenues in 2009, 2010 and 2011 was US\$11.7 million, US\$29.6 million and US\$25.2 million, respectively. The decrease in mobile games cost of revenues in 2011 resulted largely from a decrease in our overall mobile games business and associated service fees paid to telecommunications operators. In 2010, we began offering subscription-based mobile games download services through our partnership with China Mobile. Based on our agreement with China Mobile, we share approximately 50% of our subscription-based revenues with China Mobile, compared to approximately 15% for single-download games. See “Item 4. — Information on the Company — Business Overview — Material Contracts with Telecommunications Operators for WVAS and Mobile Games.” Largely as a result of the adoption by China Mobile of similar measures that have affected our WVAS business and China Mobile’s de-emphasizing of its feature-phone mobile games services, our mobile games cost of revenues in 2011 has decreased by 14.6% from 2010. For a description of policies and measures adopted by China Mobile, see “— Revenues — WVAS Revenues.” To a lesser extent, the decrease was also due to a decrease in the payments to content providers and licensors and lower bandwidth leasing charges associated with our online mobile games. We expect our mobile games cost of revenues to remain stable in 2012. We further expect our mobile games cost of revenues to correspondingly increase as a result of higher sales of our internally-developed smartphone mobile games, which we plan to distribute through digital distribution platforms, such as app stores developed by smartphone handset manufacturers. However, we expect such increase to be offset by continued decreases in the costs of distributing our mobile games through China Mobile as China Mobile continues to de-emphasize feature-phone mobile games.

We intend to develop internally the majority of our mobile games, which generally have lower cost of revenues. However, in order to expand our mobile games business and increase our market share, we also plan to actively identify quality mobile games to be acquired or licensed from third parties, which generally have higher cost of revenues.

Internet Games Cost of Revenues

Our Internet games cost of revenues consists mainly of revenue sharing paid to third party Internet game licensors, labor cost, bandwidth leasing charges, depreciation and facility costs relating to equipment used to provide Internet games services. Total Internet games cost of revenues in 2010 and 2011 was US\$2.3 million and US\$15.9 million, respectively. As a percentage of our Internet games cost of revenues, revenue sharing paid to third party Internet game licensors accounted for nil and 68.8% in 2010 and 2011, respectively. The increase in Internet games cost of revenues in 2011 was primarily due to increases in our overall Internet games business and associated revenue sharing paid to third party Internet game licensors. We began acquiring licenses to operate Internet games from other Internet games developers in 2011, as part of our plan to grow our portfolio of licensed Internet games that complement our internally developed games. We expect our Internet games cost of revenues to increase in 2012 as we expect revenues generated from the World of Tanks game to continue to be a major driver for growing our Internet games revenues in 2012. To a lesser extent, we expect our Internet games cost of revenues to increase in 2012 as a result of a new stream of revenues derived from the operation of one of our internally-developed Internet games, which we plan to launch in the first quarter of 2012.

Operating Expenses

Our operating expenses include product development, sales and marketing and general and administrative expenses.

The following table sets forth operating expenses data in terms of amount and as a percentage of our revenues for the periods indicated:

	For the year ended December 31, 2009		2010		2011			
	Amount	Percentage of revenues	Amount	Percentage of revenues	Amount	Percentage of revenues		
	(in thousands of U.S. dollars, except percentages)							
Product development	US\$ 18,272.0	13.9	% US\$ 23,964.7	16.0	% US\$ 15,416.9	9.6	%	
Selling and marketing	17,821.2	13.6	18,975.6	12.7	20,891.6	13.1		
General and administrative	10,186.9	7.8	10,481.8	7.0	11,582.2	7.2		
Goodwill and intangible assets impairment loss	—	—	8,728.9	5.8	20,259.2	12.7		
Total	US\$ 46,280.1	35.3	% US\$ 62,151.0	41.5	% US\$ 68,149.9	42.6	%	

Product Development Expenses

Our product development expenses consist primarily of compensation and benefits for our product and development team. Our product development expenses in 2009, 2010 and 2011 were US\$18.3 million, US\$24.0 million and US\$15.4 million, respectively. We expect our product development expenses to increase in 2012 as we continue to expand our offerings in mobile games and Internet games.

Sales and Marketing Expenses

Our sales and marketing expenses consist mainly of expenses associated with sponsoring promotional events and compensation and benefits for our sales, marketing and customer service teams. Our sales and marketing expenses in 2009, 2010 and 2011 were US\$17.8 million, US\$19.0 million, and US\$20.9 million, respectively. We expect our sales and marketing expenses to increase in 2012, as we plan to continue to promote our Internet and mobile games and to launch Kungfu Hero, one of our internally-developed Internet games, in 2012.

General and Administrative Expense

Our general and administrative expenses consist primarily of compensation and benefits for general management, finance and administrative personnel, professional fees and other office expenses. Our general and administrative expenses in 2009, 2010 and 2011 were US\$10.2 million, US\$10.5 million, and US\$11.6 million, respectively. We expect our general and administrative expenses to increase if our business grows in future periods as we may also incur more expenses relating to employee compensation and other administrative and professional fees.

Impairment of Goodwill and Intangibles

In the annual goodwill impairment test conducted in December 2009, the fair value of each reporting unit substantially exceeded its carrying value. Consequently, no goodwill impairment was recorded in 2009. In 2010, as certain of our Internet games performed significantly below our expectations, the goodwill and intangible assets impairment test performed in December 2010 found that the goodwill and intangible assets in the Internet games unit were impaired, resulting in a total impairment charge of US\$8.7 million.

In 2011, we experienced significant fluctuations in the prices of our ADSs, which resulted in our market capitalization falling below our book value during certain periods of the year and made it necessary for us to perform an impairment review of our business units. In the third quarter of 2011, we performed a goodwill impairment test and found that the goodwill and our intangible assets of our WVAS unit were impaired, resulting in a total impairment charge of US\$20.3 million and US\$4.0 thousand, respectively. However, based on the impairment test, our mobile games and Internet games units were not impaired. See Note 11 to our financial statements included elsewhere in this annual report on Form 20-F.

Critical Accounting Policies

The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Set forth below is a summary of our accounting policies that we believe are both important to the portrayal of our financial results and require us to make estimates and adjustments about the effect of matters that are inherently uncertain. Our critical accounting policies generally require us to make estimates or judgments that are difficult or subjective.

Revenue Recognition

WVAS Revenues

Our revenues are primarily derived from providing wireless interactive entertainment, media and community value-added services to customers of the PRC telecommunications operators. The fees for these services are determined by us in consultation with the telecommunications operators, are charged on a single-transaction basis or on a monthly subscription basis, and vary according to the type of services delivered.

We deliver WVAS to users through the networks of the telecommunications operators, and we rely upon the telecommunications operators to provide us with billing and collection services. We record revenues based on monthly statements from the telecommunications operators confirming the value of our services that they billed to users in the month. China Mobile and its provincial subsidiaries typically send such statements within 30 days after the end of each month.

The billing and collection cycles of China Unicom, China Telecom, China Netcom and their respective subsidiaries are generally longer than those of China Mobile. As a general matter, we receive statements from China Unicom within 120 days after the end of each month, and within 70 days after the end of each month from China Telecom and China Netcom. We cannot assure you that the length of the billing cycle will not increase further in the future.

Due to our past experience with the timing of receipt of the monthly statements from the operators, we expect that we may need to rely on our own internal estimates for the portion of our reported revenues and cost of revenues for which we will not have received monthly statements. In such an instance, our internal estimates would be based on our own internal data of expected revenues and related fees from services provided. As a result of reliance on our internal estimates, we may overstate or understate our revenues and cost of revenues for the relevant reporting period. Our internal estimates of revenues and cost of revenues for any period are subsequently adjusted in our financial reports when we actually receive the monthly statements for such period.

In 2010 and 2011, estimated revenues generally accounted for less than 5% of our reported quarterly revenues and less than 2% of our reported annual revenues. Our estimates are based on:

our internal data management system;

our past experience; and

our verbal communications with the telecommunications operators.

We internally tabulate the value of a WVAS that we have provided based in part on service delivery confirmations sent to us by the PRC telecommunications operators. There has historically been a discrepancy between the value that we estimate and the value that we are entitled to receive based on the monthly statements provided by the telecommunications operators. This discrepancy varies across different technology platforms and arises for various reasons, including the following:

Late notification of delinquent customers. The telecommunications operators may from time to time classify certain customers as delinquent customers for non-payment of services. The telecommunications operators would request all service providers to cease delivering services to customers once they are classified as delinquent. However, time lags often exist between when a customer is classified as delinquent and when we receive such information from the telecommunications operators. As a result, we occasionally provide services to these delinquent customers for which the telecommunications operators will not make any payments to us.

Customer database out of synchronization. Customers may cancel their subscriptions through the telecommunications operators. Although we synchronize the customer information databases of the telecommunications operators with our databases on an ongoing basis, the databases are not always completely in synchronization. As a result, until our databases are synchronized with those of the telecommunications operators, we could provide services to customers who have cancelled their subscriptions, for which we are not entitled to receive payment.

Duplicate billing. China Mobile typically generates system identification numbers to identify customers who use our WAP services, rather than using the actual mobile phone numbers. As a result, the platform operators may on occasion inadvertently generate multiple identification numbers for a mobile phone number. In such a case, the multiple bills generated need to be eliminated from the monthly statement the telecommunications operators provide to us.

Delivery failure. When telecommunications operators send us delivery confirmations within 72 hours of our delivery of value-added services, the confirmations will indicate three possible outcomes: success, failure or unknown. Our internal system recognizes successful confirmations as services provided. As a result, discrepancies may exist between our records and the monthly statement provided by the telecommunications operators for confirmations marked as “unknown” where our services were successfully delivered or where the confirmation was incorrect.

Unbillable users. Certain provincial subsidiaries of China Mobile have been offering 2.5G services since 2005 to customers who receive mobile telephone services on a pre-paid basis. These customers may subscribe to our services or download our products, and our internal databases do not distinguish between these and other customers. However, the telecommunications operators do not yet have any means to bill these pre-paying customers for the WVAS that they receive. As a result, the telecommunications operators’ monthly statements do not include fees for such users.

The telecommunications operators remit to us amounts net of an allowance they have made for the doubtful debts in respect of the amounts due to us from our customers. They also net their fees for the services they provide to us, including billing and collection services, and net transmission charges from their remittances to us. Certain telecommunications operators do not provide an itemized analysis of their remittances, and as a result we are unable to determine what allowance, if any, for doubtful or bad debts should be recorded for our services delivered through such telecommunications operators. Accordingly, recognition of revenues is based upon the amounts reported on the telecommunications operators’ monthly statements to us, which are net of doubtful debts and represent the amounts we reasonably believe will be collected.

Due to the factors set forth above, we would multiply our internal tabulation of expected revenues from telecommunications operators from whom we have not received monthly statements by a realization factor applicable to the relevant telecommunications operator and service and determined according to the average discrepancy over the previous 12 months between our internal tabulations of expected revenues and the actual revenues based on the monthly statements. In addition, we also seek to verify the estimated revenues through discussions with the billing personnel of the telecommunications operators, although we cannot assure that we would be able to reduce the discrepancy between our revenue estimates and the revenues calculated by telecommunications operators and their subsidiaries.

In 2011, the average time from our receipt of statements from the telecommunication operators until they paid us the amounts due under such statements was approximately 58 days. We cannot assure you that our period to collect accounts receivables will not increase in the future.

We evaluate our cooperation arrangements with the telecommunications operators to determine whether to recognize our revenues on a gross basis or net of the service fees and net transmission charges paid to the telecommunications operators. Our determination is based upon an assessment of whether we act as a principal or agent when providing our services. We have concluded that we act as principal in the arrangement. Factors that support our conclusion mainly include:

- we are the primary obligor in the arrangement;

- we are able to establish prices within price caps prescribed by the telecommunications operators to reflect or react to changes in the market;

- we determine the service specifications of the services we will be rendering;

- we are able to control the selection of our content suppliers; and

the telecommunications operators usually will not pay us if users cannot be billed or if users do not pay the telecommunications operators for services delivered and, as a result, we bear the delivery and billing risks for the revenues generated with respect to our services.

Based on these factors, we believe that recognizing revenues on a gross basis is appropriate. However, as noted above, our reported revenues are net of bad debt charges that have been deducted by the telecommunications operators.

Mobile Games Revenues

Mobile phone users download our mobile games in the same manner as our WVAS, and we recognize revenues from such mobile games services in the same way as the WVAS revenues are recognized.

Internet Games Revenues

We derive Internet games revenues primarily from Internet games operation revenues and licensing revenues. We earn Internet games operation revenues through providing Internet games services to players under an item-based revenue model. Under such a model, the basic functions of a game are free of charge, and players are charged for purchases of in-game items, which can enhance the game-playing experience. Revenues from the sales of in-game items are recognized when the items are consumed by the customers or over the estimated lives of the items. The average period that players typically play the game and other player behavior patterns, which are affected by various factors such as acceptance and popularity of expansion packs, promotional events and market conditions, are utilized to arrive at the best estimates for lives of these in-game items. We assess the estimated lives of in-game items for all of our games on a quarterly basis. If there are indications of any significant changes to the estimated lives of the in-game items, such changes would be applied in the period of change prospectively.

Under the item-based revenue model, proceeds received from sales of game points to players, which can be converted into in-game currencies to purchase in-game items, are initially recorded as advances from customers as game points are refundable. As players convert game points into in-game currencies, proceeds received from sales of those game points are transferred from advances from customers to deferred revenues. Deferred revenues are recognized as revenues when in-game items purchased with in-game currencies are consumed by players over the estimated lives of such items. In addition to game points that we sell and distribute, we distribute and sell a portion of our game points through third party vendor. As we do not have control over and generally do not know the ultimate selling price of game points sold by the third party vendors, net proceeds from sales of game points by vendors are recorded as advances from customers. These net proceeds are converted to deferred revenues and recognized as revenues in the same way we convert and recognize revenues as discussed in this paragraph.

In addition, we enter into licensing arrangements with various licensees to operate our games in other countries and regions. These licensing agreements provide for two revenue streams: the initial fees and the usage-based royalty fees. In certain licensing arrangements, we provide free PCS such as upgrades, maintenance support and training for the first year. The licensees have the option to purchase PCS in subsequent years at specified renewal rates. In these arrangements, we allocate the initial fee into two parts. The first part represents the license of the game and is recognized as license revenue immediately upon the launch of the games in foreign countries or regions. The second part represents fees for the PCS and is recognized ratably over the contractual period of the PCS. In other licensing arrangements, we provide PCS over the full licensing period for no additional charge. In such cases, the total amount of the initial fee is recognized ratably over the full contractual licensing period.

According to our license agreements, we are also entitled to ongoing usage-based royalties determined based on the amount of fees charged to the players' accounts or services payable by players in a given country or region. The usage-based royalties are recognized when they are earned, provided that the collection is probable.

Share-based Compensation Expense

Our share-based employee compensation plans are described in more detail under “Item 6 — Directors, Senior Management and Employees — Share Options.” Share-based compensation to employees is measured based on the fair value of the equity instrument on its grant date. We recognize these compensation costs net of a forfeiture rate on a straight-line basis over the requisite service period of the award, which is generally the vesting period of the award. The forfeiture rate is estimated based on historical forfeiture data and will be adjusted over the requisite service period to the extent that actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures will be recognized through a cumulative catch-up adjustment in the period of change, which will impact the amount of share-based compensation expense to be recognized in future periods.

We adopted valuation models to determine the fair value of equity awards granted, which is generally expensed over the vesting period. Significant judgment on parameters, such as the fair value of the underlying ordinary shares and estimated volatility, is required to be made by our management in applying the models.

Goodwill

The excess of the purchase price over the fair value of net assets acquired is recorded on our consolidated balance sheet as goodwill. Goodwill is not amortized but is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired, such as a significant change in the prices of our ADSs, among others. We perform our annual goodwill impairment test on December 31 of each fiscal year for all reporting units. Goodwill is tested following a two-step process. The first step compares the fair value of each reporting unit to its carrying amount, including goodwill. If the fair value of each reporting unit exceeds its carrying amount, goodwill is not considered to be impaired and the second step will not be required. If the carrying amount of a reporting unit exceeds its fair value, the second step compares the implied fair value of goodwill to the carrying value of a reporting unit’s goodwill. The implied fair value of goodwill is calculated in the same manner that goodwill is calculated in a business combination, whereby the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit, with the excess purchase price over the amounts assigned to assets and liability representing the implied fair value of goodwill. An impairment loss is recognized for any excess in the carrying value of goodwill over the implied fair value of goodwill.

As of December 31, 2008 and 2009, we had three reporting units: WVAS, mobile games and WIS. In 2010, we consolidated the majority of our WIS business unit, including our operation of Kong.net and ct.cn, into our WVAS business unit. As a result of the consolidation, we no longer generate or review the financial information of the WIS business separately. The segment reporting information of the WIS business has been combined into that of WVAS for all the periods presented. Also in 2010, we acquired Dacheng, which became our new business unit, Internet games. As of December 31, 2011, we had three reporting units: WVAS, mobile games and Internet games.

We estimate the fair value of our reporting units using the income approach valuation, which includes the discounted cash flow method, taking into consideration the market approach and certain market multiples as a validation of the values derived using the discounted cash flow methodology. The discounted cash flows for each reporting unit are based on discrete five years financial forecasts developed by the management for planning purposes. Cash flows beyond the forecasted period and discrete forecast are estimated using a terminal value calculation, which incorporates historical and forecasted financial trends for each reporting unit and considered long-term earnings growth rates for publicly traded peer companies. Publicly available information with respect to the market capitalization of our company is also considered in assessing the reasonableness of the aggregate fair value of our reporting units, estimated using the discounted cash flow methodology. In 2009, 2010, and 2011, we recognized goodwill impairments of US\$0 million, US\$3.0 million relating to our Internet games unit and US\$20.3 million relating to our WVAS unit, respectively.

In 2011, we experienced significant fluctuations in the prices of our ADSs, which resulted in our market capitalization falling below our book value during certain periods of the year, and made it necessary for us to perform an impairment review of our business units. In the third quarter of 2011, we performed a goodwill impairment test and found that the goodwill of our WVAS unit was impaired, resulting in the recognition of a total impairment loss of US\$20.3 million. The following table sets forth the details of the goodwill impairment test as of September 30, 2011.

	WVAS	Mobile Games	Internet Games
	(in thousands of U.S. dollars, except percentages)		
Estimated fair value	89,938.6	66,149.4	111,229.2
Carrying value net	105,289.1	50,152.8	103,869.5
Percentage by which the fair value exceed or (below) the carrying value	(14.6)%	31.9 %	7.1 %
The estimated fair value of goodwill allocated to the reporting unit	1,596.2	*	*
The carrying value of goodwill	21,941.6	5,217.8	64,983.9
Foreign currency adjustment	(90.2)	*	*
Goodwill impairment loss	20,255.2	*	*

*As the fair value of the reporting unit exceeded its carrying amount, goodwill was not considered to be impaired and the second step was not required.

The following table sets forth the details of the goodwill impairment test as of December 31, 2011.

	WVAS	Mobile Games	Internet Games
	(in thousands of U.S. dollars, except percentages)		
Estimated fair value	89,988.4	66,119.1	114,389.7
Carrying value net	87,316.3	48,687.2	110,174.4
Percentage by which the fair value exceed or (below) the carrying value	3.1 %	35.8 %	3.8 %
The estimated fair value of goodwill allocated to the reporting unit	*	*	*
The carrying value of goodwill	2,044.7	5,267.6	65,654.8
Foreign currency adjustment	*	*	*
Goodwill impairment loss	*	*	*

*As the fair value of the reporting unit exceeded its carrying amount, goodwill was not considered to be impaired and the second step was not required.

The principal assumptions made by management in determining goodwill impairment as of September 30, 2011 and December 31, 2011 include the following:

the annual revenue growth rate will be in the range of 4% to 5%, 5% and 5% to 35% for our WVAS, mobile games and Internet games units, respectively, and the cost and expense structure will remain consistent with historical trends in the coming five years, with reference to the overall and industry specific economic conditions and trends, the historical financial performance and the up-to-date business performance;

cash flow discount rates of 22.0%, 22.5% and 25.0% and terminal value growth rates of 3%, 3% and 3% were used for the WVAS, mobile games and Internet games units, respectively;

- there will be no major changes in the existing political, legal, fiscal and economic conditions in the PRC;

except for the new enterprise income tax law that took effect on January 1, 2008, there will be no major changes in the current tax law in the PRC and all applicable laws and regulations will be complied with;

- exchange rates and interest rates will not differ materially from those presently prevailing;

each reporting unit will retain and have competent management, key personnel, and technical staff to support its ongoing operations;

- the availability of financing will not be a constraint on the forecasted growth of operations; and

- industry trends and market conditions for related industries will not deviate significantly from economic forecasts.

Please see “Risk Factors” for a discussion of risks and uncertainties that may adversely affect our growth and could have negative effect on the estimated fair value.

Income Taxes

As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income and, to the extent we believe that recovery is not likely, we must establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a certain period, we must include an expense within the tax provision in the statement of operations.

Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our deferred tax assets. The valuation allowance is based on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred tax assets will be recoverable. In the event that actual results differ from these estimates or we adjust these estimates in future periods, we may need to establish an additional valuation allowance, which could materially impact our financial position and results of operations.

The impact of an uncertain income tax position on the income tax return is recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Interest and penalties on income taxes will be classified as a component of the provisions for income taxes. We have concluded that there were no significant uncertain tax positions requiring recognition in financial statements for the years ended December 31, 2009, 2010 and 2011. We did not incur any interest and penalties related to potential underpaid income tax expenses and also do not anticipate any significant increases or decreases in unrecognized tax benefits in the next 12 months. However, taxes relating to 2009 to 2011 remain subject to examination by the PRC tax authorities.

Business Combinations

We account for acquired businesses using the purchase method of accounting. On January 1, 2009, we adopted a new accounting pronouncement with prospective application which made certain changes to the previous authoritative literature on business combinations. From January 1, 2009, the assets acquired, the liabilities assumed, and any noncontrolling interest of the acquiree at the acquisition date, if any, are measured at their fair values as of that date. We adopted valuation models to determine the fair value of acquired assets and liabilities assumed. Significant judgment on parameters, such as fair value determined based on assumptions market participants would use in valuing comparable assets and liabilities, among others, is required to be made by our management in applying the models. Goodwill is recognized and measured as the excess of the total consideration transferred plus the fair value of any noncontrolling interest of the acquiree, if any, at the acquisition date over the fair values of the identifiable net assets

acquired. Previously, any noncontrolling interest was reflected at historical cost. Common forms of the consideration made in acquisitions include cash and common equity instruments. Consideration transferred in a business acquisition is measured at the fair value as at the date of acquisition. For shares issued in a business combination, we have estimated their fair value as of the date of acquisition.

From January 1, 2009, where the consideration in an acquisition includes contingent consideration, the payment of which depends on the achievement of certain specified conditions after the acquisition, the contingent consideration is recognized and measured at its fair value at the acquisition date. If recorded as a liability, it is subsequently carried at fair value with changes in fair value reflected in earnings. We had a gain of US\$10.9 million and a loss of US\$3.7 million arising from a change in fair value of contingent consideration for business acquisition, which were included in our results of operations in 2010 and 2011, respectively.

Recently Issued Accounting Standards

See Note 2 to our consolidated financial statements included elsewhere in this annual report on Form 20-F for recently issued accounting standards that we believe may have implications on our financial statements for future periods.

Results of Operations

Results of Operations for the Years Ended December 31, 2009, 2010 and 2011

The following table sets forth certain data from our consolidated results of operations for the periods indicated. This information should be read in conjunction with the consolidated financial statements and related notes included elsewhere in this annual report.

	For the year ended December 31, 2009		2010		2011			
	Amount	Percentage of revenues	Amount	Percentage of revenues	Amount	Percentage of revenues		
(in thousands of U.S. dollars, except percentages)

Year ended December 31, 2011 compared to year ended December 31, 2010

Revenues. Our total revenues increased by 7.0% to US\$160.0 million in 2011 from US\$149.6 million in 2010. This increase was driven largely by the growth of our Internet games business, led by growth in revenues generated from the World of Tanks game, a massive multiplayer online game that we commercially launched in the PRC on March 15, 2011. This increase in total revenues was partially offset by a decrease in revenues generated from our WVAS and mobile games businesses.

Our WVAS revenues decreased by 3.6% to US\$80.3 million in 2011 from US\$83.3 million in 2010. Revenues from our 2G services decreased by 2.6% to US\$71.3 million in 2011 from US\$73.2 million in 2010. Revenues from our 2.5G services decreased by 11.0% to US\$8.9 million in 2011 from US\$10.0 million in 2010. These decreases were mainly due to policies implemented by the PRC telecommunications operators since late 2009, including those policies which resulted in the suspension of billing on WAP and G+ mobile games by China Mobile and other PRC telecommunications operators on behalf of third party service providers of such services. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us may result in lower revenues or additional costs for us and materially and adversely affect our business operations, financial condition and results of operations.” To a lesser extent, the decreases were also due to a decrease in emphasis placed on WVAS by China Unicom, China Netcom and China Telecom, the three principal telecommunications operators in the PRC through which we collectively derived approximately 25% and 29% of our WVAS revenues in 2011 and 2010, respectively.

Our mobile games revenues decreased by 16.9% to US\$40.9 million in 2011 from US\$49.2 million in 2010. This decrease was mainly due to the adoption by China Mobile of measures similar to those that have affected our WVAS business, as described above, and China Mobile’s decision to de-emphasize its subscription-based mobile games download services. In addition, the decrease in our mobile games revenues was also attributable to an overall shift in the tastes and preferences of consumers in China from traditional feature-phone mobile games, which are mainly Java-based, to mobile games that are developed for smartphone platforms, such as iOS and Android mobile games. For a description of risks related to significant changes in service provider policies of the telecommunications operators, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us could result in lower revenues or additional costs for us and materially and adversely affect our business,

financial condition, results of operations and prospects.” For a description of risks related to uncertainties in the PRC mobile games market, see “Item 3 — Key Information — Risk Factors — Risks Relating to Our Businesses — Our mobile games business has a short operating history, and the mobile games market in the PRC is subject to many uncertainties.”

Our Internet games revenues increased to US\$38.9 million in 2011 from US\$17.1 million in 2010. This increase was driven largely by significant growth in revenues generated from the operation of our massive multiplayer online game, the World of Tanks game, in the PRC, which saw an increase in sales of in-game items purchased by the World of Tanks game players. We commercially launched the World of Tanks game on March 15, 2011. The increase in our Internet games revenues was partially offset by a decrease in our Internet games licensing revenues, which decreased by 3.7% from US\$2.4 million in 2010 to US\$2.3 million in 2011. Revenues generated within the PRC increased to US\$33.3 million in 2011 from US\$12.5 million in 2010, representing approximately 86% and 73% of our total Internet games revenues in 2011 and 2010, respectively. This increase was primarily attributable to increases in transaction volumes from sales of in-game items of the World of Tanks game. The portion of our Internet games revenues derived outside the PRC includes both license fees and revenue share generated from the operation of our self-developed games by third party publishing partners. Revenues generated outside the PRC increased by 20.0% to US\$5.6 million in 2011 from US\$4.6 million in 2010, representing approximately 14% and 27% of our Internet games revenues in 2011 and 2010, respectively. This increase was largely attributable to increases in licensing fees and revenue share generated from our self-developed games, such as Loong and Sheng Mo Zhi Xue, in overseas markets, such as Taiwan, Korea and South East Asia.

Sales Tax. Our total sales tax increased by 19.3% to US\$3.8 million in 2011 from US\$3.2 million in 2010.

Our WVAS sales tax decreased by 12.2% to US\$1.4 million in 2011 from US\$1.6 million in 2010. The decrease was mainly due to a decrease in the volume of our WVAS business.

Our mobile games sales tax decreased by 32.9% to US\$0.6 million in 2011 from US\$0.9 million in 2010, primarily due to a decrease in the volume of our mobile games business.

Our Internet games sales tax increased by 159.6% to US\$1.8 million in 2011 from US\$0.7 million in 2010, largely due to an increase in the volume of our internet games business.

Cost of Revenues. Our total cost of revenues increased by 14.6% to US\$91.9 million in 2011 from US\$80.2 million in 2010, representing 57.5% and 53.6% of our total revenues in 2011 and 2010, respectively. This increase was largely due to increases in revenue sharing paid to third party Internet games licensors and other costs associated with our Internet games business, as a result of increases in the volume of our Internet games business.

Our WVAS cost of revenues increased by 5.0% to US\$50.8 million in 2011 from US\$48.3 million in 2010, representing 63.2% and 58.0% of our WVAS revenues in 2011 and 2010, respectively. Despite a decrease in our WVAS revenues, WVAS cost of revenues increased in 2011 as a result of higher costs incurred by us to support additional compliance costs related to the changes in our WVAS business as required by the policies implemented since 2009 by the PRC telecommunications operators to improve consumer experience. In addition, the increase in our WVAS cost of revenues was also due to increases in the cost of distribution channels for our WVAS services, which was principally attributable to the stricter operating environment as a result of the policies implemented by the PRC telecommunications operators described above.

Our mobile games cost of revenues decreased by 14.6% to US\$25.2 million in 2011 from US\$29.6 million in 2010, representing 61.8% and 60.1% of our mobile games revenues in 2011 and 2010, respectively. The decrease in our mobile games cost of revenues was primarily due to decreases in service fees and net transmission charges paid to the telecommunications operators, as a result of decreases in our overall mobile games business.

Our Internet games cost of revenues increased to US\$15.9 million in 2011 from US\$2.3 million in 2010, representing 40.9% and 13.7% of our Internet games revenues in 2011 and 2010, respectively. The significant increase in our

Internet games revenues was primarily due to the significant increase in revenue sharing paid to third party Internet games licensors, as a result of significant increases in the volume of our Internet games business. In particular, the increase in revenue share paid to third party Internet games licensors was primarily due to increases in revenue sharing relating to the World of Tanks game.

Gross Profit and Gross Margin. Our total gross profit decreased by 2.9% to US\$64.3 million in 2011 from US\$66.1 million in 2010, primarily due to the decreased in the volume of our WVAS and mobile games business, which was partially offset by increases in the volume of our Internet games business. Our gross margin decreased slightly to 40.2% in 2011 from 44.2% in 2010.

Our WVAS gross profit decreased by 15.7% to US\$28.1 million in 2011 from US\$33.4 million in 2010, due to the decrease in our WVAS revenues relative to the increase in our WVAS cost of revenues, attributable primarily to a more strict operating environment as a result of the policies implemented by the PRC telecommunications operators described above. As a result of the foregoing, our WVAS gross profit margin decreased to 35.0% in 2011 from 40.1% in 2010.

Our mobile games gross profit decreased by 19.8% to US\$15.0 million in 2011 from US\$18.7 million in 2010, largely due to decreases in the volume of our mobile games business, as a result of the adoption by China Mobile of measures similar to those that have affected our WVAS business, as described above, and China Mobile's decision to de-emphasize its subscription-based mobile games download services. Our mobile games gross margin decreased to 36.7% in 2011 from 38.0% in 2010, as the de-emphasis by China Mobile of its subscription-based mobile games download services resulted in higher subscriber turnover, which increased the costs necessary to support a lower level of revenues generated from our mobile games segment.

Our Internet games gross profit increased by 50.1% to US\$21.2 million in 2011 from US\$14.1 million in 2010, largely due to increases in the volume of our Internet games business, driven primarily by increases in sales from in-game item purchases made by the World of Tanks game players and our successful operation of the World of Tanks game. Our internet games gross margin decreased to 54.4% in 2011 from 82.3% in 2010, principally as a result of increases in revenue sharing relating to the World of Tanks game.

Operating Expenses. Our operating expenses increased by 9.7% to US\$68.1 million in 2011 from US\$62.2 million in 2010, representing 42.6% and 41.5% of our total revenues in 2011 and 2010, respectively. The increase in our operating expenses primarily reflected the impact of an impairment loss of US\$20.3 million on goodwill and intangible assets for our WVAS segment, which was partially offset by a decrease in our product and development expenses. To a lesser extent, the increase in our operating expenses also reflected increases in our sales and marketing expenses, as a result of the increase in sales and marketing activity associated with our Internet games business.

Our product development expenses decreased by 35.7% to US\$15.4 million in 2011 from US\$24.0 million in 2010, representing 9.6% and 16.0% of our total revenues in 2011 and 2010, respectively. The decrease in our product and development expenses was primarily due to decreases in intangible assets amortization of our Internet games business and decreases in the number of our product development employees, which decreased to 660 as of December 31, 2011 from 773 as of December 31, 2010.

Our sales and marketing expenses increased by 10.1% to US\$20.9 million in 2011 from US\$19.0 million in 2010, representing 13.1% and 12.7% of our total revenues in 2011 and 2010, respectively. The increase in our sales and marketing expenses was primarily due to increase in sales and marketing activity associated with our Internet games business and increases in the number of our sales and marketing employees, which increased to 142 employees as of December 31, 2011 from 117 employees as of December 31, 2010, and, to a lesser extent, an increase in our customer service employees, which was increased to 97 employees as of December 31, 2011 from 93 employees as of December 31, 2010.

Our general and administrative expenses increased by 10.5% to US\$11.6 million in 2011 from US\$10.5 million in 2010, representing 7.2% and 7.0% of our total revenues in 2011 and 2010, respectively.

Change in Fair Value of Contingent Consideration for Business Acquisition. On March 23, 2011, we completed the last payment due to Dacheng's shareholders. This final payment included US\$14.6 million in cash and 123.5 million of our ordinary shares, which is equivalent to 3.1 million ADSs. The fair value of this payment was US\$44.6 million, which resulted in a US\$3.7 million change in fair value of the contingent consideration.

Loss on Extinguishment of Debt upon Prepayment of Convertible Senior Note. On February 25, 2011, we prepaid 70% of the aggregate principal amount of a 5-year convertible senior note issued to NGP in March 2009 for US\$9.31 million in cash, plus any accrued but unpaid interest on the note. We recorded a US\$1.6 million non-cash charge to our net income as a result of the premium paid to the underlying conversion price of the convertible senior note.

Income Tax. Our income tax decreased by 20.6% to US\$3.1 million in 2011 from US\$4.0 million in 2010, primarily reflecting the decrease in our taxable income.

Net income. As a result of the foregoing, we had a net loss of US\$7.7 million in 2011 compared to net income US\$11.9 million in 2010.

Year ended December 31, 2010 compared to year ended December 31, 2009

Revenues. Our total revenues increased by 13.9% to US\$149.6 million in 2010 from US\$131.3 million in 2009. The increase was due to the increase in our mobile games revenues, driven by the subscription-based mobile games download services China Mobile launched in partnership with us in late 2009, and the added revenue stream from the addition of our Internet games segment.

Our WVAS revenues decreased by 19.9% to US\$83.3 million in 2010 from US\$104.0 million in 2009. Revenues from our 2G services decreased by 11.4% to US\$73.2 million in 2010 from US\$82.7 million in 2009. Revenues from our 2.5G services decreased by 52.9% to US\$10.0 million in 2010 from US\$21.3 million in 2009. These decreases were mainly due to policies implemented by the PRC telecommunications operators since late 2009, which resulted in the suspension of billing on WAP and G+ mobile games by China Mobile and other PRC telecommunications operators on behalf of third party service providers of such services. See “Item 3 — Key Information — Risk Factors — Risks Relating to Our Business — Significant changes in the policies or guidelines of China Mobile or other PRC telecommunications operators with respect to services provided by us may result in lower revenues or additional costs for us and materially and adversely affect our business operations, financial condition and results of operations.” To a lesser extent, the decreases were also due to decreasing emphasis placed on WVAS by China Unicom, China Netcom and China Telecom, three of the telecommunications operators through which we derive approximately 28% and 29% of our WVAS revenues in 2009 and 2010, respectively.

Our mobile games revenues increased by 80.1% to US\$49.2 million in 2010 from US\$27.3 million in 2009 as we began to focus more overall company resources to develop our mobile games business in 2010. The increase in revenues was primarily due to the subscription-based mobile games download services China Mobile launched in partnership with us in late 2009.

Our Internet games revenues was US\$17.1 million in 2010. Overseas revenues and domestic revenues as percentages of total Internet games revenues were approximately 27% and 73%, respectively, in 2010.

Sales Tax. Our total sales tax increased by 11.2% to US\$3.2 million in 2010 from US\$2.9 million in 2009.

Our WVAS sales tax decreased by 30.3% to US\$1.6 million in 2010 from US\$2.3 million in 2009. The decrease was mainly due a decrease in the volume of our WVAS business.

Our mobile games sales tax increased by 51.3% to US\$0.9 million in 2010 from US\$0.6 million in 2009 primarily due to an increase in the volume of our mobile games business.

Our Internet games sales tax was US\$0.7 million in 2010.

Cost of Revenues. Our total cost of revenues increased by 21.7% to US\$80.2 million in 2010 from US\$65.9 million in 2009, principally as a result of the increase in our overall mobile games business and the addition of our Internet games business and the associated costs.

Our WVAS cost of revenues decreased by 10.9% to US\$48.3 million in 2010 from US\$54.3 million in 2009. This decrease was largely due to a decrease in the volume of our WVAS business, which was partially offset by increases in compliance costs related to the changes in our WVAS business required by policies implemented since late 2009 by the PRC telecommunications operators.

Our mobile games cost of revenues increased to US\$29.6 million in 2010 from US\$11.7 million in 2009, mainly due to an increase in the volume of our mobile games business. Specifically, the increase in our mobile games cost of revenues was primarily attributable to higher cost associated with the subscription-based mobile games download service we launched in partnership with China Mobile in late 2009. Based on our agreement with China Mobile, we must share approximately 50% of our subscription-based revenues with China Mobile, compared to approximately 15% for single-download games. See “Item 4. — Information on the Company — Business Overview — Material Contracts with Telecommunications Operators for WVAS and Mobile Games.”

Our Internet games cost of revenues was US\$2.3 million in 2010.

Gross Profit and Gross Margin. Our total gross profit increased by 5.9% to US\$66.1 million in 2010 from US\$62.5 million in 2009 due to the growth in our mobile games business and the added revenue stream from the addition of our Internet games segment. Our gross margin decreased slightly to 44.2% in 2010 from 47.6% in 2009.

Our WVAS gross profit decreased by 29.7% to US\$33.4 million in 2010 from US\$47.5 million in 2009, primarily due to the policies implemented by the PRC telecommunications operators since late 2009. Our WVAS gross profit margin decreased to 40.1% in 2010 from 45.6% in 2009. This decrease was mainly due to policies implemented by the PRC telecommunications operators since late 2009, which resulted in the suspension of billing by the PRC telecommunications operators on some of our higher-margined WVAS products, such as WAP and G+ mobile games.

Our mobile games gross profit increased by 24.5% to US\$18.7 million in 2010 from US\$15.0 million in 2009, largely due to the growth in our mobile games business. Our mobile games gross margin decreased to 38.0% in 2010 from 54.9% in 2009, principally as a result of our cooperation agreement with China Mobile, which requires us to share approximately 50% of our subscription-based revenues with China Mobile.

Our Internet games gross profit was US\$14.1 million in 2010. Our Internet games gross margin was 82.3% in 2010.

Operating Expenses. Our operating expenses increased by 34.3% to US\$62.2 million in 2010 from US\$46.3 million in 2009, primarily due to an impairment loss of US\$8.7 million on goodwill and intangible assets for our Internet games segment, as well as the increased amortization expenses relating to certain intangible assets acquired from Dacheng and expenses related to the operation our Internet games business.

Our product development expenses increased by 31.2% to US\$24.0 million in 2010 from US\$18.3 million in 2009, primarily due to increased employee compensation, office rental, intangible assets amortization and other expenses related to the development of our mobile games and our Internet games business. The number of our product development employees increased to 773 as of December 31, 2010 from 741 as of December 31, 2009.

Our sales and marketing expenses increased by 6.5% to US\$19.0 million in 2010 from US\$17.8 million in 2009 as a result of increased marketing expense on Internet games, which was partially offset by the spending reductions related to our wireless Internet sites. The number of our sales and marketing team decreased to 117 employees as of

December 31, 2010 from 144 employees as of December 31, 2009 due to the elimination of our mobile advertising department. Our customer service team increased to 93 employees as of December 31, 2010 from 59 employees as of December 31, 2009.

Our general and administrative expenses increased by 2.9% to US\$10.5 million in 2010 from US\$10.2 million in 2009.

Loss from Impairment of Cost Method Investment. We incurred a loss of US\$1.5 million from impairment of cost method investment in connection with our investment in XCHY. We made the impairment determination primarily because of the following reasons: (i) since July 2008, XCHY has been in a continuous loss-making position and has failed over time to create the type of profit-generating business that was contemplated at the time of our investment; and (ii) we were unable to create any value-generating synergies with XCHY for our WVAS business due to XCHY's failure to develop its business and expand its customer base.

Change in Fair Value of Contingent Consideration for Business Acquisition. We acquired Dacheng in January 2010. On March 23, 2011, we completed the last payment due to Dacheng's shareholders under the share purchase agreement, and finalized our acquisition of Dacheng. This last payment made by us to Dacheng included \$14.6 million in cash and US\$25.6 million in our ordinary shares, calculated based on our net profit of US\$8.03 million for 2010. The number of ordinary shares to be issued was calculated using the 30-day average price prior to the March 23, 2011 settlement date, and the final number of ordinary shares to be issued on March 23, 2011 was determined to be 123.5 million, or 3.1 million ADSs. The fair value of the last payment due to Dacheng's shareholders under the share purchase agreement was US\$44.6 million on March 23, 2011, which resulted in a change in fair value of the contingent consideration recorded in our financial statements in 2011. However, based on the estimated financial performance of Dacheng in 2010, the total contingent consideration to be paid for the acquisition of Dacheng was calculated to be US\$75.2 million, an increase of US\$10.9 million from the fair value of the last payment due to Dacheng's shareholders on March 23, 2011. This difference resulted in a change of US\$10.9 million in contingent consideration payable, which was reflected as a gain in our net income in 2010.

Income Tax. Our income tax decreased by 15.9% to US\$4.0 million in 2010 from US\$4.7 million in 2009, primarily reflecting the decrease in our taxable income.

Net income. As a result of the foregoing, our net income decreased by 5.25% to US\$11.9 million in 2010 from US\$12.6 million in 2009.

Liquidity and Capital Resources

Cash Flows and Working Capital

The following table sets forth our cash flows with respect to operating, investing and financing activities for the periods indicated.

	For the year ended December 31,		
	2009	2010	2011
	(in thousands of U.S. dollars)		
Net cash provided by operating activities	US\$ 15,289.1	US\$26,013.6	US\$ 33,433.8
Net cash used in investing activities	8,282.6	10,314.9	40,284.8
Net cash used in financing activities	3,865.7	776.5	26,335.0
Effect of exchange rate changes	94.4	2,959.1	5,526.7
Net (decrease) increase in cash and cash equivalents	3,235.2	17,881.3	(27,659.3)
Cash and cash equivalents, beginning of year	136,054.3	139,289.5	157,170.8
Cash and cash equivalents, end of year	US\$ 139,289.5	US\$ 157,170.8	US\$ 129,511.5

Since the completion of our initial public offering, our primary sources of liquidity have been cash flow from operating activities and the proceeds of our initial public offering. We used a portion of the proceeds of our public offering to expand our business through acquisitions, and as of December 31, 2011, we had used the entire net proceeds from the initial public offering. As of December 31, 2010 and December 31, 2011, our cash and cash equivalents were US\$157.2 million and US\$129.5 million, respectively.

We do not bill or collect payment from users of our WVAS and mobile games directly, but instead depend on the billing systems and records of China Mobile and other PRC telecommunications operators to record the volume of such services provided, charge our customers, collect payments and remit payments to us less transmission fees and

service fees. If China Mobile or any other PRC telecommunications operator ceases to continue cooperating with us, we would have to explore further cooperation with other telecommunications service providers and/or explore alternative billing systems to collect bills from customers.

Net cash provided by operating activities increased to US\$33.4 million in 2011 from US\$26.0 million in 2010 and US\$15.3 million in 2009. These increases were primarily due to cash provided by our Internet games business and a decrease in the turnover days of our accounts receivable.

Net cash used in investing activities increased to US\$40.3 million in 2011 from US\$10.3 million in 2010. This increase was mainly due to loans of RMB139.8 million, or US\$22.19 million, at an interest rate of 6.39% per annum, made to Chengdu Jinhua Tianchuang Investment Co., Ltd in 2011, with China Mingsheng Banking Co., Ltd. as the arranger of the loans. Net cash used in investing activities increased to US\$10.3 million in 2010 from US\$8.3 million in 2009. This increase was primarily due to our increased acquisition activities, including our acquisitions of Sigma, Mailifang, Simlife, Success Blueprint, Zhulang, Dacheng and Shenzhen Zhida.

Net cash used in financing activities was US\$26.3 million in 2011, compared to US\$0.8 million in 2010. The change was primarily due to the payment of the deferred consideration of US\$14.6 million for the acquisition of Dacheng in March 2011, prepayment of convertible senior note of US\$9.3 million in February 2011 and share repurchase of US\$2.7 million during 2011. Net cash used in financing activities was US\$0.8 million in 2010, compared to US\$3.9 million used in financing activities in 2009. The change was primarily due to the termination of our share repurchase plan, the cash we received from our employees when they exercised their share options in 2010 and the payment of the deferred consideration of US\$1.25 million for the acquisition of Simlife in June 2010.

We believe that our current cash and cash equivalents and cash flow from operations will be sufficient to meet our anticipated cash needs, including for working capital purposes, capital expenditures and various contractual obligations, for at least the next 12 months. We may, however, require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If these sources are insufficient to satisfy our cash requirements, we may seek to sell additional debt securities or equity or to obtain a credit facility. The sale of additional convertible debt securities or equity securities could result in additional dilution to holders of our ordinary shares and ADSs. The incurrence of indebtedness would result in incurring debt service obligations, which could result in operating and financial covenants that would restrict our operations. We currently do not have any lines of credit or loans with any commercial banks. As a result, we are unlikely to rely on any bank loans to meet our liquidity needs. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all.

We are a holding company with no operations of our own. Our operations are conducted through Beijing AirInbox, Beijing WINT, BJXR, Beijing Chengxitong, Mailifang, Xinreli and Dacheng and our subsidiaries in the PRC. As a result, our ability to pay dividends and to finance any debt that we may incur is dependent upon license and service fees paid by Beijing AirInbox, Beijing WINT, BJXR, Beijing Chengxitong, Mailifang, Xinreli and Dacheng and dividends and other distributions paid by our subsidiaries. If our subsidiaries incur debt on their own behalf in the future, the instruments governing the debt may restrict their ability to pay dividends to us. In addition, PRC legal restrictions permit payment of dividends to us by our subsidiaries only out of the net income from our subsidiaries, if any, determined in accordance with PRC accounting standards and regulations. Under PRC law, our subsidiaries are required to set aside no less than 10% of their respective after-tax net income each year as reserve funds unless such reserve funds, after making up losses of preceding years, have reached 50% of their respective registered capital, and these reserve funds are not distributable as cash dividends. See “Item 3 — Key Information — Risk Factors — The dividends and other distributions on equity we may receive from our subsidiaries are subject to restrictions under PRC law or agreements that our subsidiaries may enter into with third parties.”

Indebtedness

In March 2009, we issued to NGP a convertible senior note due in 2014 with an aggregate principal amount of US\$6,775,400. In February 2011, we prepaid 70% of the aggregate principal amount, plus any accrued but unpaid

interest thereof, of the convertible senior note for US\$9.31 million in cash. Subsequently, in March 2012, NGP fully converted the convertible senior note into 22.8 million of our ordinary shares, which is equivalent to 570,000 of our ADSs, at a conversion price of US\$0.08915 per ordinary share (equivalent to US\$3.6 per ADS), representing approximately 1.0% of our total shares outstanding as of March 31, 2012. For 2010 and 2011, we paid NGP US\$1,059,905 and US\$487,763, respectively, in interests on the convertible senior note.

Our indebtedness as of December 31, 2010 and 2011 was US\$3,552,716 and US\$1,272,619, respectively.

We intend to meet the majority of our future funding needs through cash flow generated from operating activities and our current cash and cash equivalents. Our treasury objective is to maintain safety and liquidity of our cash. Substantially all of our cash and cash equivalents are denominated in Renminbi.

Except as described above, as of December 31, 2011, we did not have any outstanding loan capital issued or agreed to be issued, bank overdrafts, loans, debt securities or other similar indebtedness, liabilities under acceptance (other than normal trade bills) or acceptance credits, debentures, mortgages, charges, finance leases or purchase commitments, guarantees or other material contingent liabilities.

Contractual Obligations and Commercial Commitments

The following table sets forth our contractual obligations as of December 31, 2011:

	Payments due by period				
	Total	Less than 1 year	1-3 years	Within 3-5 years	More than 5 years
	(in thousands of U.S. dollars)				
Short-Term Debt Obligations	US\$—	US\$ —	US\$ —	US\$ —	US\$ —
Convertible Senior Note:					
Principal	2,032.6	—	2,032.6	—	—
Interest	360.0	162.6	197.4	—	—
Other Long-Term Debt Obligations	—	—	—	—	—
Capital (Finance) Lease Obligations	—	—	—	—	—
Operating Lease Obligations	1,842.1	1,526.3	213.3	102.5	—
Purchase Obligations	4,395.1	3,550.8	612.3	232.0	—
Other Contractual Commitments	—	—	—	—	—
Total	8,629.8	5,239.7	3,055.6	334.5	—

In March 2009, we issued to NGP a convertible senior note due in 2014 with an aggregate principal amount of US\$6,775,400. In February 2011, we prepaid 70% of the aggregate principal amount, plus any accrued but unpaid interest thereof, of the convertible senior note for US\$9.31 million in cash. Subsequently, in March 2012, NGP fully converted the convertible senior note into 22.8 million of our ordinary shares, which is equivalent to 570,000 of our ADSs. See “— Liquidity and Capital Resources — Cash Flows and Working Capital.”

Capital Expenditures

Our total capital expenditures in 2009, 2010 and 2011 were US\$1.6 million, US\$1.7 million and US\$1.9 million, respectively. We did not have any material commitment for capital expenditures as of December 31, 2011. We currently do not have any material capital expenditures in progress.

Our capital expenditures are spent primarily on servers, computers, office equipment, leasehold improvement and vehicles. In general, there is a positive correlation between our revenues and the amount of traffic that passes through our servers and transmission equipment. From time to time we need to purchase additional servers and transmission

equipment as a result of increased business traffic. Our purchase of personal computers is primarily driven by headcount increases.

As the telecommunications operators do not provide us with detailed revenue breakdown on a service-by-service basis, we depend on our internal database system to monitor revenues derived from each of our services that are delivered through the telecommunications operators. We make our business decisions based on our internal data, taking into account other factors including strategic considerations.

Off-balance Sheet Arrangements

We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of any third parties. In addition, we have not entered into any derivative contracts that are indexed to our own shares and classified as shareholders' equity, or that are not reflected in our financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. Moreover, we do not have any variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Taxation

Cayman Islands

The Cayman Islands currently do not levy any taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty. In addition, pursuant to Section 6 of the Tax Concessions Law (1999 Revision) of the Cayman Islands, we have obtained an undertaking from the Governor-in-Council that (i) no law which is enacted in the Cayman Islands imposing any tax to be levied on profits or income or gains or appreciation shall apply to us or our operations and (ii) no tax to be levied on profits, income gains or appreciations or which is in the nature of estate duty or inheritance tax shall be payable by us on or in respect of our shares, debentures or other obligations or by way of the withholding in whole or in part of any relevant payment as defined in Section 6(3) of the Tax Concessions Law (1999 Revision). This undertaking is for a period of 20 years from May 21, 2002.

PRC

Our PRC subsidiaries and operating companies are subject to the New EIT Law, which ordinarily imposes a tax rate of 25% on all enterprises, including foreign-invested enterprises. However, under the New EIT Law, “high-and-new technology enterprises strongly supported by the State”, or HNTE, are entitled to a preferential tax rate of 15%. HNTE status allows qualifying PRC-based enterprises to use a 15% tax rate for three years, renewable for an additional three-year period if business operations of these enterprises continue to qualify for HNTE status. In 2008, Kongzhong Beijing, Beijing AirinBox, BJXR and Tianjin Mammoth were granted HNTE status by the PRC tax authority under the New EIT Law. KongZhong China, Beijing Chengxitong and Beijing WINT were subsequently granted HNTE status in 2009. In addition, KongZhong China, Beijing WINT, Beijing Chengxitong and BJXR were also granted 50% tax relief in 2009. In 2011, each of KongZhong Beijing, Beijing AirInbox, BJXR and Tianjin Mammoth renewed its HNTE status for an additional three-year period. In addition, the PRC tax authority also granted Xinreli and Dacheng in 2010 and 2011, respectively, an income tax exemption for two years and a 50% tax relief for three years thereafter. According to the New EIT Law, PRC-based enterprises that have already enjoyed HNTE status for six years must reapply for HNTE status at the end of the second three-year period. For risks relating to the discontinuation of any of the preferential tax treatments or the renewal of HNTE status, see “Item 3 — Key Information — Risk Factors — Risks Relating to the PRC – The discontinuation of any of the preferential tax treatments available to us in the PRC or the rejection of our application for preferential tax treatments could adversely affect our business, operating results and financial condition.”

Under the New EIT Law, enterprises are classified as either resident or non-resident. A resident enterprise refers to one that is incorporated under the PRC law or under the law of a jurisdiction outside the PRC with its “de facto

management organization” located within the PRC. Non-resident enterprise refers to one that is incorporated under the law of a jurisdiction outside the PRC with its “de facto management organization” located also outside of the PRC, but which has either set up institutions or establishments in the PRC or has income originating from the PRC without setting up any institution or establishment in the PRC. Under the New EIT Implementation Regulation, “de facto management organization” is defined as the organization of an enterprise through which substantial and comprehensive management and control over the business, operations, personnel, accounting and properties of the enterprise are exercised. Under the New EIT Law and the New EIT Implementation Regulation, a resident enterprise’s global net income will be subject to a 25% EIT rate. Uncertainties exist with respect to how the New EIT Law applies to our overall operations and, more specifically, with respect to the determination of tax residency for certain of our legal entities incorporated outside the PRC. We do not believe that our legal entities incorporated outside the PRC should be treated as residents under the New EIT Law. The SAT Notice 82 provides certain specific criteria for determining whether the “de facto management body” of a Chinese-controlled offshore incorporated enterprise is located in the PRC. However, The SAT Notice 82 applies only to offshore enterprises controlled by PRC enterprises, not those invested in by PRC individuals, like our company. Currently there are no further detailed rules or precedents applicable to us governing the procedures and specific criteria for determining “de facto management body” for the company of our type. If the PRC authorities were to subsequently determine, or any future regulation provides, that we should be treated as a PRC resident enterprise, we would be subject to a 25% enterprise income tax on our global income, which may significantly increase our tax burden and could materially and adversely affect our financial condition and results of operations.

In addition, the New EIT Law and the New EIT Implementation Regulation provide that, in some circumstances, an income tax rate of 10% would be applied to dividends payable to foreign investors. However, dividend income received by a resident enterprise from another resident enterprise is exempted from the EIT. Under the New EIT Law and the New EIT Implementation Regulation, a non-resident enterprise's net income originating from "sources within the PRC" will be subject to a 10% EIT rate. Under the New EIT Implementation Regulation, whether a dividend payment constitutes income from "sources within the PRC" is determined by the location of the enterprise which pays the dividend. Income tax on dividends from the PRC payable to a non-PRC-resident enterprise is at a rate of 10%. As a result, KongZhong Beijing, KongZhong China, Anjian Xingye and Simlife Beijing may be required to withhold all or part of such income tax when paying us dividends. The aggregate undistributed earnings of our subsidiaries and our PRC operating companies and their subsidiaries that are available for distribution to us as of December 31, 2011 are considered to be indefinitely reinvested and, accordingly, no provision has been made for the dividend withholding taxes that would be payable upon the distribution of those amounts to us under the New EIT Law and New EIT Implementation Regulation. The PRC tax authorities have also clarified that distributions made out of retained earnings derived from income before January 1, 2008 will not be subject to such withholding tax. See "Item 3 — Key Information — Risk Factors — Risks Relating to the PRC – We may be subject to PRC income tax on our global income, or dividends we receive from our PRC subsidiaries may be subject to PRC withholding tax, depending on whether we are recognized as a resident enterprise in the PRC."

Moreover, our revenues are subject to sales taxes. Since August 2003, each of Beijing AirInbox, Beijing Boya Wuji, Beijing WINT, Beijing Chengxitong, BJXR, Simlife Beijing, Beijing Shiyuan Leya, Mailifang, Xinreli, Zhulang, Dacheng and Shenzhen Zhida is subject to a 3% business tax for WVAS, an aggregate of 8% of sales tax and cultural business construction fee for mobile advertising services and 5% business tax for other services. Each of KongZhong Beijing, KongZhong China and Tianjin Mammoth is subject to a 5% sales tax. In future periods, we expect that a substantial portion of our revenues will be generated through Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang, Xinreli and Dacheng. In addition, pursuant to the arrangements that KongZhong Beijing has entered into with each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR and Mailifang, that KongZhong China has entered into with Dacheng and that Simlife Beijing has entered into with Xinreli, each of Beijing AirInbox, Beijing WINT, Beijing Chengxitong, BJXR, Mailifang, Xinreli and Dacheng pays us service fees. The amount of such payments will be subject to the 5% business tax payable by KongZhong Beijing, KongZhong China and Simlife Beijing. See "Item 7 — Major Shareholders and Related Party Transactions — Related Party Transactions."

PRC business tax is levied on PRC taxable revenues as defined by the related PRC tax rules and regulations. We have calculated our PRC taxable revenues after deducting certain costs of revenues, including service fees, transmission charges payable to the telecommunications operators and business cooperation fees. We believe that our calculation of our PRC taxable revenues is consistent with PRC tax rules and regulations. However, we cannot assure you that PRC tax authorities in the future will not require changes in our calculation of taxable revenues for historical periods, which could have a material adverse impact on our financial position and results of operations.

General

The functions and powers of our Board include, among others:

- convening shareholders' meetings and reporting its work to shareholders at such meetings;
- implementing shareholders' resolutions;
- determining our business plans and investment proposals;
- formulating our profit distribution plans and loss recovery plans;

· formulating our debt and finance policies and proposals for the increase or decrease in our issued capital and the issuance of debentures;

- formulating our major acquisition and disposal plans, and plans for merger, division or dissolution;
- formulating proposals for any amendments to our Memorandum and Articles of Association; and

exercising any other powers conferred by the shareholders' meetings or under our Memorandum and Articles of Association.

Directors and Senior Officers

The following table sets forth certain information concerning our Directors and senior officers. The business address of each of our Directors and executive officers is 35th Floor, Tengda Plaza, No. 168 Xizhimenwai Street, Beijing, 100044, the PRC.

Name	Age	Position
Leilei Wang	39	Chairman of the Board of Directors, Chief Executive Officer
Jay Chang	40	Director and Chief Financial Officer
Xiaoxin Chen	39	Independent Director
Hope Ni	39	Independent Director
Charles Xue	58	Independent Director
Tai Fan	40	Chief Investment Officer
Zhen Yang	47	President

Leilei Wang, 39, has served as the Chairman of the Board of Directors of our company and our Chief Executive Officer since October 2008. His current term expires in 2013. Mr. Wang was the chief executive officer of TOM Online from September 2003 to September 2008. Between 1999, when Mr. Wang joined TOM Group Limited, or TOM Group, TOM Online's parent company, and 2003, Mr. Wang held various management positions within TOM Group. Mr. Wang graduated in 1996 from the Electronic Engineering Department of Tsinghua University with a bachelor's degree in Electronic Technology and Information. See " — Recent Developments."

Jay Chang, 40, has served as the Chief Financial Officer of our company since February 2009 and has been a Director of our company since July 2010. His current term expires in 2014. Before joining our company, Mr. Chang was the president and chief financial officer of 56.com, a leading online video provider in the PRC. Before that, he was the chief financial officer of TOM Online for over two years. Prior to TOM Online, for nearly six years, Mr. Chang was the director of equity research at Credit Suisse, responsible for covering the Internet and telecommunications sectors in the PRC. Mr. Chang graduated in 1994 from University of Washington with a bachelor's degree in Electrical

Engineering.

Xiaoxin Chen, 39, has been an Independent Director of our company since September 2008. His current term expires in 2012. Mr. Chen has been a managing partner of Zeniphs China Capital, a private equity fund, since late 2007. Before joining the fund, Mr. Chen was the chief financial officer of Oak Pacific Interactive, or OPI, a leading next generation Internet platform provider that offers web 2.0 communities, content creation and distribution, gaming and integrated communication in the PRC. Before joining OPI, Mr. Chen was an investment banker at Citigroup Hong Kong. Mr. Chen was an independent director of Abax Global Capital (Hong Kong) Ltd. before August 2011. Mr. Chen is also the independent director of Prosten Technology Holdings Ltd., a Hong Kong Stock Exchange Growth Enterprise Market-listed company. Mr. Chen received his bachelor's degree in Operations Research and Industrial Engineering (summa cum laude) from Cornell University and his MBA degree from Stanford Graduate School of Business and was a recipient of the 2000 Arjay Miller Scholar Award upon graduation.

Hope Ni, 39, has been an Independent Director of our company since January 2007. Her current term expires in 2012. Ms. Ni has been the chairman of the board of directors of Inspire Capital, an investment and consulting company, since May 2008, which changed its name from Rising Year Group Limited in 2011. Until January 2008, Ms. Ni served as the chief financial officer and director for Cogo Group, Inc., a NASDAQ-listed company and a technology service provider in the PRC, which she joined in August 2004. Prior to joining Cogo, Ms. Ni spent six years as a practicing attorney at Skadden, Arps, Slate, Meagher & Flom LLP in New York and Hong Kong, specializing in corporate finance, during which she was actively involved in the initial public offerings and New York Stock Exchange/NASDAQ listings of a number of major global PRC-based companies. Prior to that, Ms. Ni worked at Merrill Lynch's investment banking division in New York. Ms. Ni is also an independent director at Digital China Holdings Ltd., a Hong Kong-listed company; JA Solar Holdings Co., Ltd., a NASDAQ-listed company; and ATA Inc., a NASDAQ-listed company. Ms. Ni received her J.D. degree from the University of Pennsylvania Law School and her bachelor's degree in Applied Economics and Business Management from Cornell University.

Charles Xue, 59, has been an Independent Director of our company since July 2009. His current term expires in 2014. Mr. Xue was the original founder and is the chairman of the board of directors of ChinaEdu Corporation, a leading NASDAQ-listed educational service provider in China. Before that, Mr. Xue was the original founder of UT Starcom, a global leader and a NASDAQ-listed company in the manufacture, integration and support of Internet protocol-based, end-to-end networking and telecommunications solutions, and served as its chairman and vice chairman from 1991 to 2001. Mr. Xue received his postgraduate degree in East Asia History Specialty from the University of California, Berkeley in 1983.

Tai Fan, 40, has served as the Chief Investment Officer of our company since March 2009. Since August 2002, Mr. Fan has served as the vice president of the department of finance at Beijing Super Channel, a subsidiary of TOM Online, and as an executive vice president of TOM Online. Prior to joining TOM Online, Mr. Fan served as the financial controller of Xin De Telecom and was an auditor at KPMG. Mr. Fan graduated in 2003 from the State University of New Jersey, Rutgers with an EMBA and in 1994 from Beijing College of Economics with a bachelor's degree in Accounting.

Zhen Yang, 47, has served as the President of our Company since January 2010, pursuant to the definitive share purchase agreement we entered into with Dacheng on December 15, 2009. Mr. Yang previously served as the chief executive officer and chairman of Dacheng. Since December 2002, Mr. Yang has served as the executive vice president of NC-Sina, a joint venture of Sina.com and NCsoft Corporation, and as a vice president of Sina.com. Prior to joining Sina.com, Mr. Yang served as the vice president of NetEase from January 2002 to November 2002, the vice president of UBISOFT China from September 1996 to October 2001, general manager of Topdisk Multimedia (Hangzhou) Ltd. from February 1994 to October 1996 and was a lecturer in Zhejiang University and Nanjing Communications Engineering College. Mr. Yang graduated in 1989 from Zhejiang University with a master's degree in Communication System and in 1984 from South China University of Science and Technology with a bachelor's degree in Radio Engineering.

There is no family relationship between any of our Directors or senior officers.

As a NASDAQ listed company, we are required by the NASDAQ Listing Rules to have a majority of the Board of Directors comprised of independent directors. Our Independent Directors currently are Hope Ni, Xiaoxin Chen and Charles Xue. Our Independent Directors held executive sessions at which only Independent Directors were present once each quarter of 2011.

Our Memorandum and Articles of Association provide for three classes of Directors, each with three-year terms. Retiring Directors are eligible for re-election. Each of our executive Directors has entered into a service contract with us, while other Directors have entered into no such agreements.

In 2011, each of our Independent Directors who served on three committees received US\$30,000 for each year of service. In addition, we granted restricted share units covering 160,000 of our ordinary shares per year to each of our Independent Directors when he or she was appointed. Such restricted share units are vested quarterly in 12 equal tranches as long as such Director is continuing his or her service.

Each of our senior officers has entered into an employment agreement and a non-compete agreement with us. Pursuant to the employment agreements, each of our senior officers is entitled to receive a basic salary and may also receive an annual bonus if a certain level of performance has been achieved. All senior officers are bound by the confidentiality and non-competition provisions in their respective employment agreements and non-compete agreements with us. Our senior officers receive no benefits upon termination of service.

Board Practices

To enhance our corporate governance, the Board of Directors established three board committees: an audit committee, a nominations committee and a compensation committee, which are comprised solely of Independent Directors. Our Independent Directors held one meeting each quarter at which only Independent Directors were present.

Audit Committee

We have established an audit committee in accordance with the NASDAQ Listing Rules, which reviews our internal accounting procedures and considers and reports to the Board of Directors with respect to other auditing and accounting matters, including the selection of an independent registered public accounting firm, the scope of annual audits, fees to be paid to the independent registered public accounting firm and the performance of the independent registered public accounting firm. The committee has a formal written charter that sets forth its duties and powers. The current members of our audit committee are Xiaoxin Chen, Hope Ni and Charles Xue, each of whom is an Independent Director. The Board of Directors has determined that each of Mr. Chen and Ms. Ni is an audit committee financial expert within the meaning of the U.S. securities laws. Our audit committee met at least once in each quarter of 2011.

Nominations Committee

We have established a nominations committee, which identifies individuals qualified to become Directors and recommends Director nominees to be approved by the Board of Directors. The committee has a formal written charter that sets forth its duties and powers. The current members of our nominations committee are Xiaoxin Chen and Charles Xue, each of whom is an Independent Director.

Compensation Committee

We have established a compensation committee to determine the salaries and benefits of our Directors and senior officers. The committee has a formal written charter that sets forth its duties and powers. The current members of our compensation committee are Xiaoxin Chen and Charles Xue, each of whom is an Independent Director.

Compensation of Directors, Senior Officers and Employees

Our senior officers receive compensation in the form of salaries, annual bonuses and stock options. We have entered into service agreements with each of our senior officers. None of these service agreements provides benefits to our senior officers upon termination. The aggregate remuneration paid and benefits in kind granted to our senior officers for the years ended December 31, 2010 and December 31, 2011 were approximately US\$3.2 million and US\$2.2 million, respectively. In addition, the aggregate remuneration paid to our Independent Directors was US\$147,000 and US\$142,000, respectively, in 2010 and 2011.

In 2011, the total amount set aside or accrued by us or our subsidiaries to provide housing, medical and pension benefits, unemployment insurance and staff welfare for employees, including our non-Independent Directors and senior officers, was US\$3.6 million.

Stock Options and Restricted Share Units

Our 2002 Plan and 2006 Plan are intended to provide incentives to our Directors, officers and employees as well as consultants and advisors of our company and its present or future parent company or subsidiaries, or any related corporations.

KongZhong Corporation 2002 Equity Incentive Plan

The 2002 Plan was approved by our shareholders at a meeting held on June 6, 2002. Pursuant to the 2002 Plan, we originally reserved a total of 70,000,000 ordinary shares for issuance under two categories of options: incentive stock options, which may be granted to officers and employees of our company and any present or future parent or subsidiary of our company, or the related corporations, and non-qualified options, which may be granted to any employee, officer, Director, consultant or advisor of our company and the related corporations. We increased the number of ordinary shares reserved for issuance under the 2002 Plan to 105,000,000 on February 15, 2004, and to 137,000,000 on September 6, 2005. Both increases have been approved by our shareholders.

As of December 31, 2011, under the 2002 Plan, we had granted options to purchase an aggregate of 275,930,280 of our ordinary shares, of which options to purchase 151,919,623 ordinary shares have lapsed and 19,389,427 were exercisable at exercise prices ranging from US\$0.0025 to US\$0.1508 per ordinary share. The exercise prices represent the fair market values of the underlying ordinary shares on the dates the options were granted.

During 2011, under the 2002 Plan, we granted options to purchase 19,800,000 of our ordinary shares, options to purchase 5,034,283 of our ordinary shares lapsed, and options to purchase 6,566,880 of our ordinary shares were exercised. For the options granted in 2011, the vesting schedule provides for 25% of the options to vest on the first anniversary of the date of the grant, and the remaining 75% to vest in 12 equal quarterly tranches beginning one calendar quarter after the date of such anniversary. With respect to the options that we have granted to our Independent Directors, the options are vested in 12 equal quarterly tranches beginning one calendar quarter after the grant date. The expiration date for each option is ten years from the date of grant.

KongZhong Corporation 2006 Equity Incentive Plan

The 2006 Plan was approved by our shareholders at our annual general meeting on October 12, 2006. Pursuant to the 2006 Plan, we originally reserved a total of 40,000,000 ordinary shares for issuance in respect of stock options, restricted share units and other forms of equity compensation. We increased the number of ordinary shares reserved for issuance under the 2006 Plan to 180,000,000 on December 18, 2008. This increase has been approved by our shareholders.

As of December 31, 2011, under the 2006 Plan, we had granted an aggregate of 224,440,000 restricted share units, of which 46,297,500 have lapsed.

During 2011, under the 2006 Plan, we granted restricted share units covering 16,160,000 of our ordinary shares, restricted share units covering 1,975,000 of our ordinary shares lapsed and restricted share units covering 35,303,333 of our ordinary shares were vested. With respect to the restricted share units that we have granted to our employees, the vesting schedule provides for 25% of the restricted share units to vest on the first anniversary of the date of the grant, and the remaining 75% to vest in 12 equal quarterly tranches beginning one calendar quarter after the date of such anniversary. With respect to the restricted share units that we have granted to our Independent Directors and advisors, the restricted share units are vested in 12 equal quarterly tranches beginning one calendar quarter after the grant date. The expiration date for each restricted share unit is ten years from the date of grant.

The Board of Directors administers the 2002 Plan and the 2006 Plan and has wide discretion in awarding stock options, restricted share units and other forms of equity compensation. Subject to the provisions of the 2002 Plan and the 2006 Plan, the Board of Directors determines who will be granted equity compensation, the type and timing of equity compensation to be granted, the vesting schedule and other terms and conditions of the equity compensation, including the exercise price of the stock options. On December 30, 2005, the Board of Directors, following the recommendation of the compensation committee, approved a resolution authorizing our Chief Executive Officer to grant up to 8,000,000 stock options to non-officer employees without prior written approval by the compensation committee or the Board.

Generally, if an outstanding equity compensation award granted under the 2002 Plan and the 2006 Plan has not vested by the date of termination of the grantee's employment with us, no further tranches of the grantee's equity compensation award will become exercisable following the date of such cessation of employment, and the grantee's already vested but unexercised equity compensation awards will terminate after a period of 90 days from such cessation of employment.

The Board of Directors may terminate or amend the 2002 Plan and the 2006 Plan at any time; provided, however, that the Board of Directors must seek our shareholders' approval with respect to certain major modifications to the 2002 Plan and the 2006 Plan, and, if such amendment or termination would adversely affect the rights of a grantee under any option granted, the approval of such grantee would be required. Without further action by our Board, the 2002 Plan will terminate on June 6, 2012 and the 2006 Plan will terminate on October 11, 2016.

The 2002 Plan and the 2006 Plan provide for acceleration of awards upon the occurrence of certain consolidations, mergers, acquisitions or sale of all or substantially all assets or shares of our company. In any such case, our Board shall take, among others, one or more of the following actions: accelerate the date of exercise of such options or any tranche of such options, provide a fixed period of time that the grantees must exercise such options or terminate all options in exchange for cash payment.

The following table sets forth information on stock options and restricted share units that have been granted and are outstanding as of December 31, 2011, pursuant to the 2002 Plan and the 2006 Plan.

	Ordinary shares underlying options			Exercise price per share (US dollars) ⁽¹⁾	Restricted Share Units	
	2011 option grants	Pre-2011 option grants	Expiration date		2011 grants	Pre-2011 grants
Directors and Senior Officers						
Leilei Wang	—	—	—	—	—	12,000,000 ⁽²⁾
Xiaoxin Chen	—	—	—	—	480,000 ⁽³⁾	—
Hope Ni	—	—	—	—	480,000 ⁽⁴⁾	—
Charles Xue	—	—	—	—	—	120,000 ⁽⁵⁾
Jay Chang	2,000,000	—	Oct. 2, 2021	0.0950	2,000,000	10,000,000 ⁽⁶⁾
Tai Fan	—	—	—	—	4,000,000	12,750,000 ⁽⁷⁾
Other employees (comprising 100 individuals)	17,800,000	30,885,617	Jun. 30, 2012 to Oct. 20, 2021	0.0025 to 0.1508	9,200,000	5,445,000
Total	19,800,000	30,885,617			16,160,000	40,315,000

- (1) The exercise price per share of options granted represents the fair market value of the underlying ordinary shares on the date the options were granted.

(2) Leilei Wang was granted 48,000,000 restricted share units on December 19, 2008, of which 25% vested on December 19, 2009, and the remaining 75% will vest in 12 equal tranches beginning from March 19, 2010 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 36,000,000 restricted share units were vested.

(3) Xiaoxin Chen was granted 480,000 restricted share units on September 16, 2008, which vest in 12 equal tranches beginning on December 16, 2008 and continuing at the end of each subsequent three-month period. He was granted 480,000 restricted share units on October 3, 2011, which vest in 12 equal tranches beginning on January 3, 2012 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 480,000 restricted share units were vested.

(4) Hope Ni was granted 480,000 restricted share units on February 14, 2007, which vest in 12 equal tranches beginning on May 14, 2007 and continuing at the end of each subsequent three-month period. She was granted 480,000 restricted share units on October 3, 2011, which vest in 12 equal tranches beginning on January 3, 2012 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 480,000 restricted share units were vested.

(5) Charles Xue was granted 480,000 restricted share units on July 15, 2009, which vest in 12 equal tranches beginning on October 15, 2009 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 360,000 restricted share units were vested.

(6) Jay Chang was granted 32,000,000 restricted share units on February 3, 2009, of which 25% vested on February 3, 2010, and the remaining 75% vest in 12 equal tranches beginning from May 3, 2010 and continuing at the end of each subsequent three-month period. He was granted 2,000,000 restricted share units and options for 2,000,000 ordinary shares on October 3, 2011, of which 25% will vest on October 3, 2012, and the remaining 75% will vest in 12 equal tranches beginning from January 3, 2013 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 22,000,000 restricted share units were vested.

(7) Tai Fan was granted 12,000,000 restricted share units on July 10, 2009, of which 25% vested on July 10, 2010, and the remaining 75% will vest in 12 equal tranches beginning from October 10, 2010 and continuing at the end of each subsequent three-month period. He was granted 12,000,000 restricted share units on June 22, 2010, of which 25% vested on June 22, 2011, and the remaining 75% will vest in 12 equal tranches beginning from October 10, 2010 and continuing at the end of each subsequent three-month period. He was granted 4,000,000 restricted share units on October 3, 2011, of which 25% will vest on October 3, 2012, and the remaining 75% will vest in 12 equal tranches beginning from January 3, 2013 and continuing at the end of each subsequent three-month period. As of December 31, 2011, 11,250,000 restricted share units were vested.

Stock-based Compensation Expense

We recorded stock-based compensation expenses of US\$4.2 million, US\$5.0 million and US\$4.6 million in 2009, 2010 and 2011, respectively.

Share Ownership

Under Exchange Act Rule 13d-3, a person is deemed to be a “beneficial owner” of a security if that person has or shares “voting power,” which includes the power to vote or to direct the voting of such security, or “investment power,” which includes the power to dispose of or to direct the disposition of such security. A person is also deemed to be the beneficial owner of any securities of which that person has a right to acquire beneficial ownership within 60 days. Under these rules, more than one person may be deemed a beneficial owner of securities as to which such person has no economic interest.

As of March 31, 2012, the following Directors and officers held beneficial ownership of ordinary shares in our company.

Name	Number of shares beneficially owned	Of which, shares underlying equity compensation awards that will vest within 60 days	% of our issued share capital as of March 31, 2012 ⁽¹⁾	
Leilei Wang	355,920,582	3,000,000	21.42	%
Zhen Yang	52,283,723	-	3.15	%
Jay Chang	24,000,000	2,000,000	1.44	%
Xiaoxin Chen	520,000	40,000	*	
Charles Xue	400,000	40,000	*	
Hope Ni	520,000	40,000	*	
Fan Tai	11,250,000	1,500,000	*	

(1) Adjusted to reflect the issuance of ordinary shares upon full exercise of all outstanding options and restricted share units granted under the 2002 Plan and 2006 Plan.

* Less than one percent.

Employees

See “Item 4 — Information on the Company — Employees.”

Item 7. Major Shareholders and Related Party Transactions

Major Shareholders

Under Exchange Act Rule 13d-3, a person is deemed to be a “beneficial owner” of a security if that person has or shares “voting power,” which includes the power to vote or to direct the voting of such security, or “investment power,” which includes the power to dispose of or to direct the disposition of such security. A person is also deemed to be the beneficial owner of any securities of which that person has a right to acquire beneficial ownership within 60 days. Under these rules, more than one person may be deemed a beneficial owner of securities as to which such person has no economic interest.

The table below sets forth certain information with respect to the beneficial owners of 5% or more of our ordinary shares as of March 31, 2012:

Name	Shares beneficially owned Number
------	-------------------------------------
