TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Principles of Consolidation

The accompanying consolidated financial statements include the accounts of AmeriServ Financial, Inc. (the Company) and its wholly-owned subsidiaries, AmeriServ Financial Bank (the Bank), AmeriServ Trust and Financial Services Company (the Trust Company), and AmeriServ Life Insurance Company (AmeriServ Life). The Bank is a Pennsylvania state-chartered full service bank with 18 locations in Pennsylvania. The Trust Company offers a complete range of trust and financial services and administers assets valued at $1.6 billion that are not reported on the Company s balance sheet at September 30, 2013. AmeriServ Life is a captive insurance company that engages in underwriting as a reinsurer of credit life and disability insurance.

In addition, the Parent Company is an administrative group that provides support in such areas as audit, finance, investments, loan review, general services, and marketing. Significant intercompany accounts and transactions have been eliminated in preparing the consolidated financial statements.

2. Basis of Preparation

The unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. In the opinion of management, all adjustments consisting of normal recurring entries considered necessary for a fair presentation have been included. They are not, however, necessarily indicative of the results of consolidated operations for a full-year.

For further information, refer to the consolidated financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

3. Accounting Policies

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. The amendments in this Update require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. For public entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2012. Early adoption is permitted. The Company s disclosures reflecting the impact on its financial statements are presented in Note 12.

In July 2013, the FASB issued ASU 2013-10, *Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes.* The amendments in this Update permit the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge accounting purposes under Topic 815, in addition to UST and LIBOR. The amendments also remove the restriction on using different benchmark rates for similar hedges. The amendments are effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. This ASU did not have a significant impact on the Company s financial statements.

In July 2013, the FASB issued ASU 2013-11, *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists.* This Update applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. An unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss,

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

3. Accounting Policies (continued)

or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. This ASU is not expected to have a significant impact on the Company s financial statements.

4. Earnings Per Common Share

Basic earnings per share include only the weighted average common shares outstanding. Diluted earnings per share include the weighted average common shares outstanding and any potentially dilutive common stock equivalent shares in the calculation. Treasury shares are treated as retired for earnings per share purposes. Options to purchase 101,070 common shares, at exercise prices ranging from $3.23 to $5.75, and 182,351 common shares, at exercise prices ranging from $2.75 to $5.75, were outstanding as of September 30, 2013 and 2012, respectively, but were not included in the computation of diluted earnings per common share because to do so would be antidilutive. Dividends on preferred shares are deducted from net income in the calculation of earnings per common share.

5. Consolidated Statement of Cash Flows

On a consolidated basis, cash and cash equivalents include cash and due from depository institutions, interest-bearing deposits, federal funds sold and short-term investments in money market funds**.** The Company made $86,000 in income tax payments in the first nine months of 2013 as compared to $122,000 for the first nine months of 2012. The Company made total interest payments of $5,291,000 in the first nine months of 2013 compared to $6,306,000 in the same 2012 period. The Company had non-cash transfers to other real estate owned (OREO) in the amounts of $593,000 and $836,000 in the first nine months of 2013 and 2012, respectively.

Corporate bonds and other securities	3,995	14	(55)	3,954
Total	$ 13,723	$ 598	$ (55)	$ 14,266

Maintaining investment quality is a primary objective of the Company's investment policy which, subject to certain limited exceptions, prohibits the purchase of any investment security below a Moody's Investor's Service or Standard & Poor's rating of A. At September 30, 2013, 89.7% of the portfolio was rated AAA as compared to 92.2% at December 31, 2012. 1.2% of the portfolio was either rated below A or unrated at September 30, 2013. The Company has no exposure to subprime mortgage loans in the investment portfolio. At September 30, 2013, the Company s consolidated investment securities portfolio had an effective duration of approximately 3.30 years.

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

6. Investment Securities (continued)

Total proceeds from the sale of AFS securities for the first nine months of 2013 were $2.3 million resulting in $137,000 of gross investment security gains. Sales of investment securities in the three months ended September 30, 2013 were $1.1 million resulting in $66,000 of gross investment security gains. Total proceeds from the sale of AFS securities for the first nine months of 2012 were $4.2 million resulting in $59,000 of gross investment security gains and $47,000 of gross investment security losses. All of the investment security sales activity for 2012 occurred in the second quarter.

The book value of securities, both available for sale and held to maturity, pledged to secure public and trust deposits, and certain Federal Home Loan Bank borrowings was $112,085,000 at September 30, 2013 and $94,206,000 at December 31, 2012.

The following tables present information concerning investments with unrealized losses as of September 30, 2013 and December 31, 2012 (in thousands):

6. Investment Securities (continued)

The unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase. There are 54 positions that are considered temporarily impaired at September 30, 2013. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, management does not intend to sell these securities and does not believe it will be required to sell these securities before they recover in value.

Contractual maturities of securities at September 30, 2013 are shown below (in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without prepayment penalties.

7. Loans

The loan portfolio of the Company consists of the following (in thousands):

	September 30, 2013	December 31, 2012
Commercial	$ 115,912	$ 102,822
Commercial loans secured by real estate	396,740	383,339
Real estate-mortgage	231,910	217,584
Consumer	16,285	17,420
Loans, net of unearned income	$ 760,847	$ 721,165

Loan balances at September 30, 2013 and December 31, 2012 are net of unearned income of $612,000 and $637,000, respectively. Real estate-construction loans comprised 2.3%, and 2.0% of total loans, net of unearned income, at September 30, 2013 and December 31, 2012, respectively. The Company has no exposure to subprime mortgage loans in the loan portfolio.

8. Allowance for Loan Losses

The following tables summarize the rollforward of the allowance for loan losses by portfolio segment for the three and nine month periods ending September 30, 2013 and 2012 (in thousands).

Total	$ 14,623	$ (877)	$ 408	$ (1,325)	$ 12,829

As a result of successful ongoing problem credit resolution efforts, the Company achieved further asset quality improvements in the first nine months of 2013. These improvements are evidenced by reduced levels of non-accrual

loans, non-performing assets, classified assets and low loan delinquency levels that continue to be well below 1% of total loans. The higher charge-off in the commercial loans secured by real estate relate primarily to one loan for which a specific reserve had been previously established. The largest portion of the credit provision occurred in commercial loans secured by real-estate as this is the category that experienced the most meaningful improvement in asset quality which resulted in a reduction of the related qualitative factor. The $1 million provision for commercial loans was largely related to the downgrade to a substandard rating for a larger commercial credit.

Total allowance for loan losses	$ 3,688	$ 5,029	$ 1,323	$ 140	$ 1,003	$ 11,183

	At December 31, 2012				
Loans:	Commercial	Commercial Loans Secured by Real Estate	Real Estate-Mortgage	Consumer	Total
Individually evaluated for impairment	$	$ 4,793	$	$ 13	$ 4,806
Collectively evaluated for impairment	102,822	378,546	217,584	17,407	716,359
Total loans	$ 102,822	$ 383,339	$ 217,584	$ 17,420	$ 721,165

Allowance for loan losses:	Commercial	Commercial Loans	Real Estate-	Consumer	Allocation for	Total

		Secured by Real Estate	Mortgage		General Risk	
Specific reserve allocation	$	$ 1,586	$	$	$	$ 1,586
General reserve allocation	2,596	6,210	1,269	150	760	10,985
Total allowance for loan losses	$ 2,596	$ 7,796	$ 1,269	$ 150	$ 760	$ 12,571

The segments of the Company s loan portfolio are disaggregated to a level that allows management to monitor risk and performance. The loan segments used are consistent with the internal reports evaluated by the Company s management and Board of Directors to monitor risk and performance within various segments of its loan portfolio and therefore, no further disaggregation into classes is necessary. The overall risk profile for the commercial loan segment is impacted by non-owner occupied CRE loans, which include loans secured by non-owner occupied nonfarm nonresidential properties, as a meaningful but declining portion of the commercial portfolio is centered in these types of accounts. The residential mortgage loan segment is comprised of first lien amortizing residential mortgage loans and home equity loans. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

8. Allowance for Loan Losses (continued)

Management evaluates for possible impairment any individual loan in the commercial or commercial real estate segment with a loan balance in excess of $100,000 that is in nonaccrual status or classified as a Troubled Debt Restructure (TDR). Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The Company does not separately evaluate individual consumer and residential mortgage loans for impairment, unless such loans are part of a larger relationship that is impaired, or are classified as a TDR.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of three methods: (a) the present value of expected future cash flows discounted at the loan s effective interest rate; (b) the loan s observable market price; or (c) the fair value of the collateral less selling costs for collateral dependent loans. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis. The Company s policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The need for an updated appraisal on collateral dependent loans is determined on a case-by-case basis. The useful life of an appraisal or evaluation will vary depending upon the circumstances of the property and the economic conditions in the marketplace. A new appraisal is not required if there is an existing appraisal which, along with other information, is sufficient to determine a reasonable value for the property and to support an appropriate and adequate allowance for loan losses. At a minimum, annual documented reevaluation of the property is completed by the Bank s internal Assigned Risk Department to support the value of the property.

When reviewing an appraisal associated with an existing collateral real estate dependent transaction, the Bank s internal Assigned Risk Department must determine if there have been material changes to the underlying assumptions in the appraisal which affect the original estimate of value. Some of the factors that could cause material changes to reported values include:

- the passage of time;
- the volatility of the local market;
- the availability of financing;
- natural disasters;

- the inventory of competing properties;
- new improvements to, or lack of maintenance of, the subject property or competing properties upon physical inspection by the Bank;
- changes in underlying economic and market assumptions, such as material changes in current and projected vacancy, absorption rates, capitalization rates, lease terms, rental rates, sales prices, concessions, construction overruns and delays, zoning changes, etc.; and/or
- environmental contamination.

13

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

8. Allowance for Loan Losses (continued)

The value of the property is adjusted to appropriately reflect the above listed factors and the value is discounted to reflect the value impact of a forced or distressed sale, any outstanding senior liens, any outstanding unpaid real estate taxes, transfer taxes and closing costs that would occur with sale of the real estate. If the Assigned Risk Department personnel determine that a reasonable value cannot be derived based on available information, a new appraisal is ordered. The determination of the need for a new appraisal, versus completion of a property valuation by the Bank s Assigned Risk Department personnel rests with the Assigned Risk Department and not the originating account officer.

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary (in thousands).

	September 30, 2013				
	Impaired Loans with Specific Allowance		Impaired Loans with no Specific Allowance	Total Impaired Loans

8. Allowance for Loan Losses (continued)

Management uses a nine point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized. The first five Pass categories are aggregated, while the Pass-6, Special Mention, Substandard and Doubtful categories are disaggregated to separate pools. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due, or for which any portion of the loan represents a specific allocation of the allowance for loan losses are placed in Substandard or Doubtful.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan rating process, which dictates that, at a minimum, credit reviews are mandatory for all commercial and commercial mortgage loan relationships with aggregate balances in excess of $250,000 within a 12-month period. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as bankruptcy, delinquency, or death occurs to raise awareness of a possible credit event. The Company s commercial relationship managers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. Risk ratings are assigned by the account officer, but require independent review and rating concurrence from the Company s internal Loan Review Department. The Loan Review Department is an experienced independent function which reports directly to the Board s Audit Committee. The scope of commercial portfolio coverage by the Loan Review Department is defined and presented to the Audit Committee for approval on an annual basis. The approved scope of coverage for 2013 requires review of a minimum 55% of the commercial loan portfolio.

In addition to loan monitoring by the account officer and Loan Review Department, the Company also requires presentation of all credits rated Pass-6 with aggregate balances greater than $1,000,000, all credits rated Special Mention or Substandard with aggregate balances greater than $250,000, and all credits rated Doubtful with aggregate balances greater than $100,000 on an individual basis to the Company s Loan Loss Reserve Committee on a quarterly basis. Additionally, the Asset Quality Task Force, which is a group comprised of senior level personnel, meets bi-weekly to monitor the status of problem loans.

The following table presents the classes of the commercial loan portfolios summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk rating system (in thousands).

	September 30, 2013				
	Pass		Substandard	Doubtful	Total

		Special Mention			
Commercial	$ 104,296	$ 8,904	$ 2,712	$	$ 115,912

8. Allowance for Loan Losses (continued)

It is generally the policy of the Bank that the outstanding balance of any residential mortgage loan that exceeds 90-days past due as to principal and/or interest is transferred to non-accrual status and an evaluation is completed to determine the fair value of the collateral less selling costs, unless the balance is minor. A charge down is recorded for any deficiency balance determined from the collateral evaluation. The remaining non-accrual balance is reported as impaired with no specific allowance. It is the policy of the Bank that the outstanding balance of any consumer loan that exceeds 90-days past due as to principal and/or interest is charged off. The following tables present the performing and non-performing outstanding balances of the residential and consumer portfolios (in thousands).

	September 30, 2013	
	Performing	Non-Performing
Real estate-mortgage	$ 230,692	$ 1,218
Consumer	16,222	63
Total	$ 246,914	$ 1,281

	December 31, 2012

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

8. Allowance for Loan Losses (continued)

An allowance for loan losses (ALL) is maintained to absorb losses from the loan portfolio. The ALL is based on management s continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of non-performing loans.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are complemented by consideration of other qualitative factors.

Management tracks the historical net charge-off activity at each risk rating grade level for the entire commercial portfolio and at the aggregate level for the consumer, residential mortgage and small business portfolios. A historical charge-off factor is calculated utilizing a rolling 12 consecutive historical quarters for the commercial portfolios. This historical charge-off factor for the consumer, residential mortgage and small business portfolios are based on a three year historical average of actual loss experience.

The Company uses a comprehensive methodology and procedural discipline to maintain an ALL to absorb inherent losses in the loan portfolio. The Company believes this is a critical accounting policy since it involves significant estimates and judgments. The allowance consists of three elements: 1) an allowance established on specifically identified problem loans, 2) formula driven general reserves established for loan categories based upon historical loss experience and other qualitative factors which include delinquency, non-performing and TDR loans, loan trends, economic trends, concentrations of credit, trends in loan volume, experience and depth of management, examination and audit results, effects of any changes in lending policies, and trends in policy, financial information, and documentation exceptions, and 3) a general risk reserve which provides support for variance from our assessment of the previously listed qualitative factors, provides protection against credit risks resulting from other inherent risk factors contained in the Company s loan portfolio, and recognizes the model and estimation risk associated with the specific and formula driven allowances. The qualitative factors used in the formula driven general reserves are evaluated quarterly (and revised if necessary) by the Company s management to establish allocations which accommodate each of the listed risk factors.

Pass rated credits are segregated from Criticized and Classified credits for the application of qualitative factors.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

9. Non-performing Assets Including Troubled Debt Restructurings (TDR)

The following table presents information concerning non-performing assets including TDR (in thousands, except percentages):

	September 30, 2013	December 31, 2012
Non-accrual loans		
Commercial loans secured by real estate	$ 2,041	$ 4,623
Real estate-mortgage	1,218	1,191
Total	3,259	5,814
90 days past due still accruing		
Commercial loans secured by real estate	686	
Total	686	
Other real estate owned		
Commercial loans secured by real estate	344	1,101
Real estate-mortgage	522	127
Total	866	1,228
TDR s not in non-accrual	226	182
Total non-performing assets including TDR	$ 5,037	$ 7,224
Total non-performing assets as a percent of loans, net of unearned income, and other real estate owned	0.66 %	1.00 %

Consistent with accounting and regulatory guidance, the Bank recognizes a TDR when the Bank, for economic or legal reasons related to a borrower s financial difficulties, grants a concession to the borrower that would not normally be considered. Regardless of the form of concession granted, the Bank s objective in offering a troubled debt restructure is to increase the probability of repayment of the borrower s loan.

To be considered a TDR, both of the following criteria must be met:

- the borrower must be experiencing financial difficulties; and
- the Bank, for economic or legal reasons related to the borrower s financial difficulties, grants a concession to the borrower that would not otherwise be considered.

Factors that indicate a borrower is experiencing financial difficulties include, but are not limited to:

- the borrower is currently in default on their loan(s);
- the borrower has filed for bankruptcy;

the borrower has insufficient cash flows to service their loan(s); and
the borrower is unable to obtain refinancing from other sources at a market rate similar to rates available to a non-troubled debtor.

Factors that indicate that a concession has been granted include, but are not limited to:

the borrower is granted an interest rate reduction to a level below market rates for debt with similar risk; or

18

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

9. Non-performing Assets Including Troubled Debt Restructurings (TDR) (continued)

the borrower is granted a material maturity date extension, or extension of the amortization plan to provide payment relief. For purposes of this policy, a material maturity date extension will generally include any maturity date extension, or the aggregate of multiple consecutive maturity date extensions, that exceed 120 days. A restructuring that results in an insignificant delay in payment, i.e. 120 days or less, is not necessarily a TDR. Insignificant payment delays occur when the amount of the restructured payments subject to the delay is insignificant relative to the unpaid principal or collateral value, and will result in an insignificant shortfall in the originally scheduled contractual amount due, and/or the delay in timing of the restructured payment period is insignificant relative to the frequency of payments, the original maturity or the original amortization.

The determination of whether a restructured loan is a TDR requires consideration of all of the facts and circumstances surrounding the modification. No single factor is determinative of whether a restructuring is a TDR. An overall general decline in the economy or some deterioration in a borrower s financial condition does not automatically mean that the borrower is experiencing financial difficulty. Accordingly, determination of whether a modification is a TDR involves a large degree of judgment.

Any loan modification where the borrower s aggregate exposure is at least $250,000 and where the loan currently maintains a criticized or classified risk rating, i.e. Special Mention, Substandard or Doubtful, or where the loan will be assigned a criticized or classified rating after the modification is evaluated to determine the need for TDR classification.

The following table details the loans modified as TDRs during both the three and nine month periods ended September 30, 2013 (dollars in thousands).

Loans in accrual status	# of Loans	Current Balance	Concession Granted
Consumer	1	$ 51	Extension of maturity date

The following table details the loans modified as TDRs during both the three and nine month periods ended September 30, 2012 (dollars in thousands).

Loans in accrual status	# of Loans	Current Balance	Concession Granted
Commercial loan secured by real estate	1	$ 87	Extension of maturity date

Loans in non-accrual status	# of Loans	Current Balance	Concession Granted
Commercial loan secured by real estate	4	$ 2,990	Extension of maturity date

In all instances where loans have been modified in troubled debt restructurings the pre- and post-modified balances are the same.

Once a loan is classified as a TDR, this classification will remain until documented improvement in the financial position of the borrower supports confidence that all principal and interest will be paid according to terms. Additionally, the customer must have re-established a track record of timely payments according to the restructured contract terms for a minimum of six consecutive months prior to consideration for removing the loan from non-accrual TDR status. However, a loan will continue to be on non-accrual status until, consistent with our policy, the borrower has made a minimum of six consecutive payments in accordance with the terms of the loan.

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

9. Non-performing Assets Including Troubled Debt Restructurings (TDR) (continued)

The following table presents the recorded investment in loans that were modified as TDR s during each 12-month period prior to the current reporting periods, which begin January 1, 2013 and 2012 (nine month periods) and July 1, 2013 and 2012 (three month periods), respectively, and that subsequently defaulted during the current reporting periods (dollars in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Recorded investment of defaults				
Commercial loan secured by real estate	$	$ 724	$ 1,320	$ 1,312
Total	$	$ 724	$ 1,320	$ 1,312

All TDR s are individually evaluated for impairment and a related allowance is recorded, as needed. All TDR s which defaulted in the above table had a related allowance adequate to reserve for anticipated losses.

The Company is unaware of any additional loans which are required to either be charged-off or added to the non-performing asset totals disclosed above. Other real estate owned is recorded at fair value minus estimated costs to sell.

The following table sets forth, for the periods indicated, (1) the gross interest income that would have been recorded if non-accrual loans had been current in accordance with their original terms and had been outstanding throughout the period or since origination if held for part of the period, (2) the amount of interest income actually recorded on such loans, and (3) the net reduction in interest income attributable to such loans (in thousands).

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Interest income due in accordance with original terms	$ 37	$ 51	$ 139	$ 169
Interest income recorded				
Net reduction in interest income	$ 37	$ 51	$ 139	$ 169

10. Federal Home Loan Bank Borrowings

Total Federal Home Loan Bank (FHLB) borrowings and advances consist of the following (in thousands, except percentages):

	At September 30, 2013			
Type	Maturing	Amount	Weighted Average Rate	
Open Repo Plus	Overnight	$ 31,096	0.25	%
Advances	2015	4,000	0.52	
	2016	8,000	0.77	
	2017	7,000	1.07	
	2018	2,000	1.47	
Total advances		21,000	0.89	
Total FHLB borrowings		$ 52,096	0.51	%

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

10. Federal Home Loan Bank Borrowings (continued)

Type	At December 31, 2012 Maturing	Amount	Weighted Average Rate
Open Repo Plus	Overnight	$ 15,660	0.25 %
Advances	2015	4,000	0.52
	2016	5,000	0.74
	2017	4,000	0.92
Total advances		13,000	0.73
Total FHLB borrowings		$ 28,660	0.47 %

The rate on Open Repo Plus advances can change daily, while the rates on the advances are fixed until the maturity of the advance.

11. Preferred Stock

SBLF:

On August 11, 2011, pursuant to the Small Business Lending Fund (SBLF), the Company issued and sold to the US Treasury 21,000 shares of its Senior Non-Cumulative Perpetual Preferred Stock, Series E (Series E Preferred Stock) for the aggregate proceeds of $21 million. The SBLF is a voluntary program sponsored by the US Treasury that encourages small business lending by providing capital to qualified community banks at favorable rates. The initial interest rate on the Series E Preferred Stock had been initially set at 5% per annum and may be decreased to as low as 1% per annum if growth thresholds were met for qualified outstanding small business loans. The Company used the proceeds from the Series E Preferred Stock issued to the US Treasury to repurchase all 21,000 shares of its outstanding preferred shares previously issued to the US Treasury under the TARP Capital Purchase Program.

The Series E Preferred Stock has an aggregate liquidation preference of approximately $21 million and qualifies as Tier 1 Capital for regulatory purposes. The terms of the Series E Preferred Stock provide for the payment of non-cumulative dividends on a quarterly basis. The dividend rate, as a percentage of the liquidation amount, may fluctuate while the Series E Preferred Stock is outstanding based upon changes in the level of qualified small business lending (QSBL) by the Bank from its average level of QSBL at each of the four quarter ends leading up to September 30, 2010 (the Baseline) as follows:

DIVIDEND PERIOD ANNUALIZED ANNUALIZED

BEGINNING	ENDING	DIVIDEND RATE
August 11, 2011	December 31, 2011	5.0%
January 1, 2012	December 31, 2013	1.0% to 5.0%
January 1, 2014	February 7, 2016	1.0% to 7.0%(1)
February 8, 2016	Redemption	9.0%(2)

(1) Between January 1, 2014 and February 7, 2016, the dividend rate will be fixed at a rate in such range based upon the level of percentage change in QSBL between September 30, 2013 and the Baseline.

(2) Beginning on February 8, 2016, the dividend rate will be fixed at nine percent (9%) per annum.

In addition to the applicable dividend rates described above, beginning on January 1, 2014 and on all dividend payment dates thereafter ending on April 1, 2016, if we fail to increase our level of QSBL compared to the Baseline, we will be required to pay a quarterly lending incentive fee of 0.5% of the liquidation value. As of September 30, 2013, the Company had increased its QSBL to a level that reduced the dividend rate to 1%. Accordingly, this 1% rate will continue through February 7, 2016.

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

11. Preferred Stock (continued)

As long as shares of Series E Preferred Stock remain outstanding, we may not pay dividends to our common shareholders (nor may we repurchase or redeem any shares of our common stock) during any quarter in which we fail to declare and pay dividends on the Series E Preferred Stock and for the next three quarters following such failure. In addition, under the terms of the Series E Preferred Stock, we may only declare and pay dividends on our common stock (or repurchase shares of our common stock), if, after payment of such dividend, the dollar amount of our Tier 1 capital would be at least ninety percent (90%) of Tier 1 capital as of September 30, 2011, excluding any charge-offs and redemptions of the Series E Preferred Stock (the Tier 1 Dividend Threshold). The Tier 1 Dividend Threshold is subject to reduction, beginning January 1, 2014, based upon the extent by which, if at all, the QSBL at September 30, 2013 has increased over the Baseline.

We may redeem the Series E Preferred Stock at any time at our option, at a redemption price of 100% of the liquidation amount plus accrued but unpaid dividends, subject to the approval of our federal banking regulator.

12. Accumulated Other Comprehensive Loss

The following table presents the changes in each component of accumulated other comprehensive loss, net of tax, for the three and nine months ended September 30, 2013 (in thousands):

Three months ended September 30, 2013	Net Unrealized Gains and Losses on Investment Securities AFS(1)	Defined Benefit Pension Items(1)	Total
Balance at July 1, 2013	$ 1,714	$ (8,977)	$ (7,263)

Prior service cost	(10)	Salaries and employee benefits
Transition asset	(4)	Salaries and employee benefits
	668	Total before tax
	(228)	Provision for income tax expense
	$ 440	Net of tax
Total reclassifications for the period	$ 350	Net of tax

(1) Amounts in parentheses indicate credits.

(2) These accumulated other comprehensive loss components are included in the computation of net periodic benefit cost (see Note 16 for additional details).

13. Regulatory Capital

The Company is subject to various capital requirements administered by the federal banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. As of September 30, 2013, the Federal Reserve categorized the Company as Well Capitalized under the regulatory framework for prompt corrective action.

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

13. Regulatory Capital (continued)

The Company believes that no conditions or events have occurred that would change this conclusion. To be categorized as well capitalized, the Company must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. Additionally, while not a regulatory capital ratio, the Company s tangible common equity ratio was 7.48% at September 30, 2013 (in thousands, except ratios).

	At September 30, 2013					
	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (To Risk Weighted Assets) Consolidated	$126,358	15.35%	$65,841	8.00%	$82,301	10.00%

Tier 1 Capital (To Risk Weighted Assets) Consolidated	112,916	14.67	30,794	4.00	46,191	6.00
AmeriServ Financial Bank	92,200	12.08	30,530	4.00	45,795	6.00
Tier 1 Capital (To Average Assets) Consolidated	112,916	11.44	39,474	4.00	49,343	5.00

AmeriServ Financial Bank	92,200	9.55	38,616	4.00	48,269	5.00

On July 2, 2013, the Board of Governors of the Federal Reserve System approved final rules that substantially amend the regulatory risk-based capital rules applicable to the Company and the Bank. The final rules implement the Basel III regulatory capital reforms, as well as certain changes required by the Dodd-Frank Act, which will require institutions to, among other things, have more capital and a higher quality of capital by increasing the minimum regulatory capital ratios, and requiring capital buffers. The new rules become effective for the Company on January 1, 2015, with an implementation period that stretches to 2019. See further discussion under Capital Resources in the MD&A.

14. Segment Results

The financial performance of the Company is also monitored by an internal funds transfer pricing profitability measurement system which produces line of business results and key performance measures. The Company s major business units include retail banking, commercial lending, trust, and investment/parent. The reported results reflect the underlying economics of the business segments. Expenses for centrally provided services are allocated based upon the cost and estimated usage of those services. The businesses are match-funded and interest rate risk is centrally managed and accounted for within the investment/parent business segment. The key performance measure the Company focuses on for each business segment is net income contribution.

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

14. Segment Results (continued)

Retail banking includes the deposit-gathering branch franchise and lending to both individuals and small businesses. Lending activities include residential mortgage loans, direct consumer loans, and small business commercial loans. Commercial banking to businesses includes commercial loans, and commercial real-estate loans. The trust segment contains our wealth management businesses which include the Trust Company, West Chester Capital Advisors, our registered investment advisory firm and financial services. Wealth management includes personal trust products and services such as personal portfolio investment management, estate planning and administration, custodial services and pre-need trusts. Also, institutional trust products and services such as 401(k) plans, defined benefit and defined contribution employee benefit plans, and individual retirement accounts are included in this segment. Financial services include the sale of mutual funds, annuities, and insurance products. The wealth management businesses also includes the union collective investment funds, namely the ERECT and BUILD funds which are designed to use union pension dollars in construction projects that utilize union labor. The investment/parent includes the net results of investment securities and borrowing activities, general corporate expenses not allocated to the business segments, interest expense on guaranteed junior subordinated deferrable interest debentures, and centralized interest rate risk management. Inter-segment revenues were not material.

The contribution of the major business segments to the Consolidated Results of Operations for the three and nine months ended September 30, 2013 and 2012 were as follows (in thousands):

	Three months ended September 30, 2013		Nine months ended September 30, 2013		September 30, 2013
	Total revenue	Net income (loss)	Total revenue	Net income (loss)	Total assets
Retail banking	$ 6,775	$ 729	$ 20,285	$ 2,339	$ 340,545
Commercial banking	4,075	1,136	11,943	3,189	528,285
Trust	2,048	310	6,216	816	4,496
Investment/Parent	(712)	(949)	(2,304)	(2,992)	164,818
Total	$ 12,186	$ 1,226	$ 36,140	$ 3,352	$ 1,038,144

	Three months ended September 30, 2012		Nine months ended September 30, 2012		September 30, 2012
	Total revenue	Net income (loss)	Total revenue	Net income (loss)	Total assets
Retail banking	$ 6,883	$ 837	$ 20,283	$ 2,464	$ 338,267
Commercial banking	3,900	1,291	11,144	3,838	478,467
Trust	1,865	210	5,817	708	4,228

Investment/Parent	(857)	(1,031)	(2,067)	(2,706)	181,319
Total	$ 11,791	$ 1,307	$ 35,177	$ 4,304	$ 1,002,281

15. Commitments and Contingent Liabilities

The Company had various outstanding commitments to extend credit approximating $156.0 million and standby letters of credit of $12.7 million as of September 30, 2013. The Company s exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Bank uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

Additionally, the Company is also subject to a number of asserted and unasserted potential claims encountered in the normal course of business. In the opinion of the Company, neither the resolution of these claims nor the funding of these credit commitments will have a material adverse effect on the Company s consolidated financial position, results of operation or cash flows.

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

16. Pension Benefits

The Company has a noncontributory defined benefit pension plan covering certain employees who work at least 1,000 hours per year. The participants shall have a vested interest in their accrued benefit after five full years of service. The benefits of the plan are based upon the employee s years of service and average annual earnings for the highest five consecutive calendar years during the final ten year period of employment. Plan assets are primarily debt securities (including US Treasury and Agency securities, corporate notes and bonds), listed common stocks (including shares of AmeriServ Financial, Inc. common stock which is limited to 10% of the plan s assets), mutual funds, and short-term cash equivalent instruments. The net periodic pension cost for the three and nine months ended September 30, 2013 and 2012 were as follows (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Components of net periodic benefit cost				
Service cost	$ 453	$ 373	$ 1,359	$ 1,119
Interest cost	291	299	873	897
Expected return on plan assets	(440)	(406)	(1,320)	(1,218)
Amortization of prior year service cost	(5)	(5)	(15)	(15)
Amortization of transition asset	(2)	(4)	(6)	(12)
Recognized net actuarial loss	341	262	1,023	786
Net periodic pension cost	$ 638	$ 519	$ 1,914	$ 1,557

The higher pension expense in 2013 reflects the negative impact that the low interest rate environment is having on the discount rate used to calculate the plan liabilities. This increasing pension cost was a key factor causing the Company to implement a soft freeze of its defined benefit pension plan to provide that non-union employees hired on or after January 1, 2013 and union employees hired on or after January 1, 2014 are not eligible to participate in the pension plan. Instead, such employees are eligible to participate in a qualified 401(k) plan.

17. Disclosures About Fair Value Measurements

The following disclosures establish a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined within this hierarchy are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly

observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair-valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

Assets and Liability Measured on a Recurring Basis

Securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the

26

TABLE OF CONTENTS

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

17. Disclosures About Fair Value Measurements (continued)

US Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things.

The fair value of the swap asset and liability is based on an external derivative valuation model using data inputs as of the valuation date and classified Level 2.

The following tables present the assets reported on the consolidated balance sheets at their fair value as of September 30, 2013 and December 31, 2012, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Assets and liability measured at fair value on a recurring basis are summarized below (in thousands):

	Fair Value Measurements at September 30, 2013 Using			
	Total	(Level 1)	(Level 2)	(Level 3)
US Agency securities	$ 8,968	$	$ 8,968	$
US Agency mortgage-backed securities	128,335		128,335	
Corporate bonds	11,762		11,762	

	Fair Value Measurements at December 31, 2012 Using			
	Total	(Level 1)	(Level 2)	(Level 3)
US Agency securities	$ 5,911	$	$ 5,911	$
US Agency mortgage-backed securities	137,735		137,735	
Corporate bonds	7,892		7,892	
Fair value of swap asset	164		164	
Fair value of swap liability	164		164	

Assets Measured on a Non-recurring Basis

Loans considered impaired are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. As detailed in the allowance for loan loss footnote, impaired loans are reported at fair value of the underlying collateral if the repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on observable market data which at times are discounted. At September 30, 2013, impaired loans with a carrying value of $2.3 million were reduced by a specific valuation allowance totaling $805,000 resulting in a net fair value of $1.5

million. At December 31, 2012, impaired loans with a carrying value of $4.8 million were reduced by a specific valuation allowance totaling $1.6 million resulting in a net fair value of $3.2 million.

Other real estate owned (OREO) is measured at fair value based on appraisals, less cost to sell at the date of foreclosure. Valuations are periodically performed by management. Income and expenses from operations and changes in valuation allowance are included in the net expenses from OREO.

(1) Fair Value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses.

(3) Includes qualitative adjustments by management and estimated liquidation expenses.

DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

For the Company, as for most financial institutions, approximately 90% of its assets and liabilities are considered financial instruments. Many of the Company s financial instruments, however, lack an available trading market characterized by a willing buyer and willing seller engaging in an exchange transaction. Therefore, significant estimates and present value calculations were used by the Company for the purpose of this disclosure.

17. Disclosures About Fair Value Measurements (continued)

Fair values have been determined by the Company using independent third party valuations that use the best available data (Level 2) and an estimation methodology (Level 3) the Company believes is suitable for each category of financial instruments. Management believes that cash, cash equivalents, and loans and deposits with floating interest rates have estimated fair values which approximate the recorded book balances. The estimation methodologies used, the estimated fair values based on US GAAP measurements, and recorded book balances at September 30, 2013 and December 31, 2012, were as follows (in thousands):

	September 30, 2013				
	Carrying Value	Fair Value	(Level 1)	(Level 2)	(Level 3)
FINANCIAL ASSETS:					
Cash and cash equivalents	$28,702	$28,702	$28,702	$	$
Investment securities AFS	149,065	149,065		149,065	
Investment securities HTM	18,045	17,926		14,957	2,969

AMERISERV FINANCIAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

17. Disclosures About Fair Value Measurements (continued)

The fair value of cash and cash equivalents, regulatory stock, accrued income receivable, short-term borrowings, and accrued interest payable are equal to the current carrying value.

The fair value of investment securities is equal to the available quoted market price for similar securities. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the US Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things. The Level 3 security is valued by discounted cash flows using the US Treasury rate for the remaining term of the security.

Loans held for sale are priced individually at market rates on the day that the loan is locked for commitment with an investor. All loans in the held for sale account conform to Fannie Mae underwriting guidelines, with the specific intent of the loan being purchased by an investor at the predetermined rate structure. Loans in the held for sale account have specific delivery dates that must be executed to protect the pricing commitment (typically a 30, 45, or 60 day lock period).

The net loan portfolio has been valued using a present value discounted cash flow. The discount rate used in these calculations is based upon the treasury yield curve adjusted for non-interest operating costs, credit loss, current market prices and assumed prepayment risk.

The fair value of bank owned life insurance is based upon the cash surrender value of the underlying policies and matches the carrying value.

Deposits with stated maturities have been valued using a present value discounted cash flow with a discount rate approximating current market for similar assets and liabilities. Deposits with no stated maturities have an estimated fair value equal to both the amount payable on demand and the recorded carrying value.

The fair value of all other borrowings is based on the discounted value of contractual cash flows. The discount rates are estimated using rates currently offered for similar instruments with similar remaining maturities.

The fair values of the swaps used for interest rate risk management represents the amount the Company would have expected to receive or pay to terminate such agreements.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values. The Company s remaining assets and liabilities which are not considered financial instruments have not been valued differently than has been customary under historical cost accounting.

TABLE OF CONTENTS

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (M.D. & A.)

2013 THIRD QUARTER SUMMARY OVERVIEW

The Company reported net income available to common shareholders of $1,173,000 or $0.06 per share for the third quarter of 2013. This performance surpassed the per share earnings of the first and second quarters of 2013 as well as the third quarter of 2012. The current quarter required no adjustment to the allowance for loan losses, making it a very straightforward illustration of our community banking initiative.

At the conclusion of the second quarter of 2013 we called attention to the fact that loans outstanding were at a record level. However, at the end of the third quarter of 2013, AmeriServ established a new record surpassing the second quarter of 2013 by more than $12 million. This type of growth does not just happen, especially in the current economic climate. These records are the result of relentless business development calling which, thus far, has averaged 324 calls per month by AmeriServ s energetic lenders.

The performance of AmeriServ as a U.S. Treasury Department Small Business Loan Fund participant is noteworthy. Over the past 25 months, AmeriServ has leveraged the $21 million of capital provided by the Treasury into $68 million of new qualified small business loans. The Treasury Department has recognized this achievement by reducing the dividend rate on the 5% U.S. Treasury Preferred shares to just 1% through the February 7, 2016. These financial pluses are very exciting, but the real satisfaction lies in being able to aid the small businesses throughout our markets to grow. We know that small businesses are the real job creators and it is our responsibility to support them for the common good.

AmeriServ is also quite proud of the AmeriServ Trust & Financial Services Company. We are all aware of the firestorm that swept through the financial markets in 2008 and 2009. But this Trust Company is building an enviable record based on tried and true Wealth Management practices. Thus far, in 2013, the net contribution to the Parent Company income statement is 8.6% above 2012, and a strong 28.1% above 2011. There is no secret formula, just an intense focus on customer service and a never ending striving for more efficiency.

There are endless debates among academics and elected officials as to how to quicken our nation s economic pace. Unfortunately, these debates have left AmeriServ, and our fellow community banks, to contend with a Federal Reserve near zero interest rate policy for over 5 years. This controversial policy reduces interest paid to the thrifty, reduces the value of pension funds and narrows the net interest margin for community banks. For example, the AmeriServ net interest margin in the third quarter of 2013 was 13 basis points lower than in the third quarter of 2012, and 22 basis points lower than the third quarter of 2011. In such challenging times, AmeriServ is fortunate to have a well performing Trust Company which charges fees not interest for its services, and a strong mortgage origination function which, even in a year with erratic mortgage rate changes, is still 15.7% ahead of its record fee year of 2012.

Now a word about asset quality. There is always a present danger in weak economic times to reach too aggressively for loans and other varieties of earning assets. The AmeriServ level of non-performing assets on September 30, 2013, was $5,037,000 as compared with $5,372,000 at the same point in 2012 and $5,344,000 at the same point in 2011. This relative stability has enabled AmeriServ to maintain a loan loss reserve coverage ratio well beyond industry norms. We do understand that this is a risk business and we are careful to not test the outer limits of risk as some lenders do.

However, there is something of a paradox present in these AmeriServ financial statements. It is a fact that loans outstanding are at a record level, it is a fact that deposit totals are at the second highest quarter end level ever recorded as AmeriServ, and it is a fact that non-interest revenue is already 7.4% above 2012. But to find that the third quarter totals of 2013 net income produces a Return on Assets of just 47 basis points is an unwelcome occurrence. The third quarter result is the strongest quarterly level of 2013, but it is below our expectations. It is partially caused by the Federal Reserve near zero interest rate policy, a policy that seems likely to continue for some time to come. It is also partially caused by our historic operating expense levels. Management has begun a determined effort to bring expenses closer to the level more common to other community financial companies similar to AmeriServ. We have strong hopes for this effort.

TABLE OF CONTENTS

Meanwhile, AmeriServ will continue to seek to grow its lending activities, to emphasize and resource the future potential of the Trust Company and to seek more efficiency in every corner of the Company. The closing common stock price on September 30, 2013, was $3.15 a gain of 4.7% from the $3.01 on December 31, 2012. This represents a Market Price to Earnings Ratio of approximately 15 times, we believe, within the normal range for community banks. It is clear to this Board and this management that AmeriServ must find ways to leverage the strength which exists within this tale of strong capital, strong asset quality and market place growth to further improve earnings.

THREE MONTHS ENDED SEPTEMBER 30, 2013 VS. THREE MONTHS ENDED SEPTEMBER 30, 2012

PERFORMANCE OVERVIEW

The following table summarizes some of the Company's key performance indicators (in thousands, except per share and ratios).

	Three months ended September 30, 2013		Three months ended September 30, 2012	
Net income	$ 1,226		$ 1,307	
Net income available to common shareholders	1,173		1,056	
Diluted earnings per share	0.06		0.05	
Return on average assets (annualized)	0.47	%	0.52	%
Return on average equity (annualized)	4.44	%	4.66	%

The Company reported third quarter 2013 net income available to common shareholders of $1,173,000 or $0.06 per diluted common share. This represented a 20% increase in earnings per share from the third quarter of 2012 where net income available to common shareholders totaled $1,056,000 or $0.05 per diluted common share. Growth in total revenue, combined with effective capital management, caused the increase in earnings per share in the third quarter of 2013. Specifically, an increase in net interest income resulted from continued strong growth of our loan portfolio, as total loans grew by $57 million, or 8.1% over the past twelve months. Material loan growth occurred in loan categories that qualify for the Small Business Lending Fund (SBLF) and as a result we have now locked in for continued payment the lowest preferred dividend rate available under the program of 1% until the first quarter of 2016. This 1% dividend rate saves the Company $200,000 in preferred dividends on a quarterly basis. Non-interest income, the other key revenue component, also increased by $337,000 or over 9% between years, due largely to fee growth within our trust and wealth management businesses as a result of increased assets under management and continued good residential mortgage sales activity. These positive items were partially offset by increased non-interest expense and no benefit from a negative provision for loan losses in the third quarter of 2013.

NET INTEREST INCOME AND MARGIN

The Company's net interest income represents the amount by which interest income on average earning assets exceeds interest paid on average interest bearing liabilities. Net interest income is a primary source of the Company's earnings, and it is affected by interest rate fluctuations as well as changes in the amount and mix of average earning assets and average interest bearing liabilities. The following table compares the Company's net interest income performance for

the third quarter of 2013 to the third quarter of 2012 (in thousands, except percentages):

	Three months ended September 30, 2013	Three months ended September 30, 2012	$ Change	% Change
Interest income	$ 9,811	$ 10,030	$ (219)	(2.2)%
Interest expense	1,611	1,888	(277)	(14.7)
Net interest income	$ 8,200	$ 8,142	$ 58	0.7
Net interest margin	3.46 %	3.59 %	(0.13)	N/M

N/M not meaningful

32

TABLE OF CONTENTS

The Company s net interest income in the third quarter of 2013 increased by $58,000 or 0.7% when compared to the third quarter of 2012. The Company s third quarter 2013 net interest margin of 3.46% was 13 basis points lower than the net interest margin of 3.59% for the third quarter of 2012. The lower net interest margin demonstrates the impact of Federal Reserve low interest rate policies which have pressured interest revenue. The Company has sought to mitigate this net interest margin pressure and has modestly increased net interest income by reducing its cost of funds and growing its earning assets, particularly loans. Specifically, total loans have averaged $755 million in the third quarter of 2013, which is $54 million or 7.7% higher than the $701 million average in the third quarter of 2012. This loan growth reflects the successful results of the Company s more intensive sales calling efforts with an emphasis on generating commercial loans and owner occupied commercial real estate loans which qualify as SBLF loans, particularly through its loan production offices.

Despite this solid growth in loans, total interest revenue dropped by $219,000 between years and reflects the lower interest rate environment. However, careful management of funding costs has allowed the Company to mitigate this drop in interest revenue during the past year. Specifically, total interest expense for the third quarter of 2013 declined by $277,000 from the third quarter of 2012 due to the Company s proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which reflects the loyalty of its core deposit base and its ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits have averaged $855 million in the third quarter of 2013, which is $9 million or 1.1% higher than the $846 million average in the third quarter of 2012. The company is pleased that the majority of the deposit growth has occurred in non-interest bearing demand deposit accounts.

The table that follows provides an analysis of net interest income on a tax-equivalent basis for the three month periods ended September 30, 2013 and September 30, 2012 setting forth (i) average assets, liabilities, and stockholders' equity, (ii) interest income earned on interest earning assets and interest expense paid on interest bearing liabilities, (iii) average yields earned on interest earning assets and average rates paid on interest bearing liabilities, (iv) the Company s interest rate spread (the difference between the average yield earned on interest earning assets and the average rate paid on interest bearing liabilities), and (v) the Company s net interest margin (net interest income as a percentage of average total interest earning assets). For purposes of these tables, loan balances do include non-accrual loans, and interest income on loans includes loan fees or amortization of such fees which have been deferred, as well as interest recorded on certain non-accrual loans as cash is received. Additionally, a tax rate of 34% is used to compute tax-equivalent yields.

TABLE OF CONTENTS

PROVISION FOR LOAN LOSSES

The Company recorded no provision for loan losses in the third quarter of 2013 compared to a $200,000 negative provision recorded in the third quarter of 2012. Overall, sustained improvements in asset quality evidenced by low levels of non-performing assets and classified loans has allowed the Company to continue to benefit from negative or zero loan loss provisions while still maintaining strong coverage ratios. At September 30, 2013, non-performing assets totaled $5.0 million or 0.66% of total loans which is down by $2.2 million from December 31, 2012, but is comparable with the level they have operated at in six of the last seven quarters. The Company also experienced modest net loan recoveries of $38,000 in the third quarter of 2013 compared to $288,000 of net charge-offs in the third quarter of 2012. When determining the provision for loan losses, the Company considers a number of factors some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided 268% coverage of non-performing loans at September 30, 2013, compared to 210% of non-performing loans at December 31, 2012.

NON-INTEREST INCOME

The Company s growth in non-interest revenue has been a financial performance highlight in 2013. Non-interest income for the third quarter of 2013 totaled $4.0 million and increased $337,000, or 9.2%, from the third quarter 2012 performance. Factors contributing to this higher level of non-interest income for the quarter included:

a $178,000 or 10.4% increase in trust and investment advisory fees due to increased assets under management which reflects both successful new business development activities and market appreciation of existing assets.
a $66,000 investment security gain realized on the sale of certain rapidly prepaying mortgage backed securities. There were no investment security gains in the third quarter of 2012.
a $90,000 increase in other income due largely to a gain realized on the sale of an other real estate owned property in the third quarter of 2013.

NON-INTEREST EXPENSE

Non-interest expense for the third quarter of 2013 totaled $10.4 million and increased by $326,000, or 3.2%, from the prior year s third quarter. Factors contributing to the higher non-interest expense in the quarter included:

a $119,000 increase in salaries and employee benefits expense due to higher salaries expense and pension expense in the third quarter of 2013. The higher salaries expense reflects merit increases for non-union employees and contractual increases for union employees. The higher pension expense relates to the Company s defined benefit pension plan and reflects the negative impact that the low interest rate environment is having on the discount rate used to calculate the plan liabilities. This increasing pension cost was a key factor causing the Company to implement a soft freeze of its defined benefit pension plan to provide that non-union employees hired on or after January 1, 2013 are not eligible to participate. Instead, such employees are eligible to participate in a qualified 401(k) retirement plan.
a $111,000 increase in the reserve for unfunded commitments due to greater loan approval activity which is included within the other expense line item.

NINE MONTHS ENDED SEPTEMBER 30, 2013 VS. NINE MONTHS ENDED SEPTEMBER 30, 2012

PERFORMANCE OVERVIEW

The following table summarizes some of the Company's key performance indicators (in thousands, except per share and ratios).

	Nine months ended September 30, 2013	Nine months ended September 30, 2012
Net income	$ 3,352	$ 4,304
Net income available to common shareholders	3,195	3,528
Diluted earnings per share	0.17	0.18
Return on average assets (annualized)	0.44 %	0.59 %
Return on average equity (annualized)	4.05 %	5.15 %

The Company reported first nine months of 2013 net income available to common shareholders of $3,195,000 or $0.17 per diluted share. This represented a 5.6% decline in earnings per share from the same nine month period in 2012 where net income available to common shareholders totaled $3,528,000 or $0.18 per diluted common share. Overall, sustained improvements in asset quality continued to result in a negative provision for loan losses in the first nine months of 2013 but at a lesser level than in the first nine months of 2012. The Company s 2013 first nine months net income was also negatively impacted by a higher level of non-interest expense. These two negative items were partially offset by higher net interest income, non-interest income and reduced income tax expense in the first nine months of 2013. The Company has also saved $619,000 in preferred stock dividend payments so far in 2013 due to the previously discussed growth in SBLF qualified loans. Additionally, the calculation of earnings per share in 2013 has benefitted from an 818,000 or 4.1% reduction in average shares outstanding due to the success of the Company s common stock repurchase program that was completed in the second quarter of 2013.

NET INTEREST INCOME AND MARGIN

The following table compares the Company's net interest income performance for the first nine months of 2013 to the first nine months of 2012 (in thousands, except percentages):

	Nine months ended September 30, 2013	Nine months ended September 30, 2012	$ Change	% Change
Interest income	$ 29,140	$ 30,039	$ (899)	(3.0)%
Interest expense	4,877	5,918	(1,041)	(17.6)
Net interest income	$ 24,263	$ 24,121	$ 142	0.6
Net interest margin	3.52 %	3.63 %	(0.11)	N/M

N/M not meaningful

The Company s net interest income in the first nine months of 2013 has increased modestly by $142,000 or 0.6% when compared to the first nine months of 2012. The Company s first nine month 2013 net interest margin of 3.52% was 11 basis points lower than the net interest margin of 3.63% for the first nine months of 2012. The lower net interest margin demonstrates the impact of Federal Reserve low interest rate policies which have pressured interest revenue. The Company has been able to mitigate this net interest margin pressure and keep net interest income relatively constant by reducing its cost of funds and growing its earning assets, particularly loans. Specifically, total loans have averaged $737 million in the first nine months of 2013, which is $58 million or 8.5% higher than the $679 million average in the first nine months of 2012. The Company continues to have ample liquidity as evidenced by a loan to deposit ratio of 89.6% at September 30, 2013.

TABLE OF CONTENTS

COMPONENT CHANGES IN NET INTEREST INCOME

Regarding the separate components of net interest income, the Company's total interest income for the first nine months of 2013 decreased by $899,000 or 3.0% when compared to the same 2012 period. This decrease was due to a 30 basis point decline in the earning asset yield to 4.23%. Within the earning asset base, the yield on the total loan portfolio decreased by 41 basis points to 4.67% while the yield on total investment securities dropped by 26 basis points to 2.49%. During the continued low interest rate environment over the past year, new investment securities and loans that were booked typically had yields that were below the rate on the maturing instruments that they replaced. Despite a $58 million or 8.5% increase in total average loans, total loan interest revenue still dropped by $104,000 between years and reflects the impact of this lower interest rate environment. Investment securities interest revenue also declined by $784,000 during this same period due to a $22 million decrease in the average investment securities portfolio as the Company has utilized cash flow from securities to help fund the previously mentioned loan growth. Interest revenue, however, has benefitted from reduced premium amortization on mortgage backed securities due to a slowdown in mortgage prepayment speeds particularly in the third quarter of 2013.

The Company's total interest expense for the first nine months of 2013 decreased by $1.0 million or 17.6% when compared to the same 2012 period. This decrease in interest expense was due to a lower cost of funds as the cost of interest bearing liabilities declined by 22 basis points to 0.90%. Management s decision to further reduce interest rates paid on all deposit categories has not had a negative impact on deposit growth and reflects the loyalty of the bank s core deposit base. Specifically, total deposits have averaged $844 million in the first nine months of 2013 which is $14 million or 1.7% higher than the $830 million average in the first nine months of 2012. The Company has also utilized term advances from the FHLB, with maturities ranging between three and five years, to help fund its earning asset growth and manage interest rate risk over the past year. The average balance of FHLB term advances has increased by $11 million while the average cost of these advances has declined by 50 basis points to 0.80%. Overall, total FHLB borrowings have averaged $30 million or 3.0% of total assets during the first nine months of 2013.

The table that follows provides an analysis of net interest income on a tax-equivalent basis for the nine month periods ended September 30, 2013 and September 30, 2012. For a detailed discussion of the components and assumptions included in the table, see the paragraph before the quarterly table on page 33.

Net Interest Income	$24,263	$24,121

38

TABLE OF CONTENTS

PROVISION FOR LOAN LOSSES

For the nine month period in 2013, the Company recorded a negative loan loss provision of $100,000 compared to a $1.3 million negative provision in the first nine months of 2012. There has been $1.2 million less earnings benefit from negative loan loss provisions in 2013. Overall, sustained improvements in asset quality evidenced by low levels of non-performing assets and classified loans has allowed the Company to continue to benefit from negative or zero loan loss provisions in 2013 while still maintaining strong coverage ratios. For the first nine months of 2013, actual credit losses realized through net charge-offs totaled $1.3 million or 0.23% of total loans which represents an increase from the first nine months of 2012 when net charge-offs totaled $469,000 or 0.09% of total loans. The higher net charge-offs in 2013 reflect the resolution of a $2 million problem commercial real estate loan for which the Company had previously established specific reserves for in 2012. The allowance for loan losses was 1.46% of total loans, at September 30, 2013, compared to 1.74% of total loans, at December 31, 2012.

NON-INTEREST INCOME

Non-interest income for the first nine months of 2013 totaled $11.9 million and increased $821,000, or 7.4%, from the first nine months 2012 performance. Factors contributing to this higher level of non-interest income in 2013 included:

a $363,000 or 6.7% increase in trust and investment advisory fees due to increased assets under management which reflects both successful new business development activities and market appreciation of existing assets.

a $123,000 increase in gains realized on residential mortgage loan sales into the secondary market due to increased mortgage loan production in the first nine months of 2013. The higher residential mortgage loan production reflected both increased refinance and purchase activity although refinance activity did begin to slow in the third quarter of 2013 due to higher mortgage rates.

a $137,000 investment security gain realized on the sale of certain rapidly prepaying mortgage backed securities. There was only $12,000 of security gains realized in the third quarter of 2012.

a $149,000 increase in bank owned life insurance due to the receipt of a death claim payment.

NON-INTEREST EXPENSE

Non-interest expense for the first nine months of 2013 totaled $31.5 million and increased by $1.2 million, or 4.0%, from the prior year s first nine months. Factors contributing to the higher non-interest expense in 2013 included:

a $664,000 or 3.7% increase in salaries and employee benefits expense due to higher salaries expense and pension expense in the first nine months of 2013. The higher salaries expense reflects merit increases for non-union employees and contractual increases for union employees and 5 additional FTE employees in revenue generating positions. The higher pension expense relates to the Company s defined benefit pension plan and reflects the negative impact that the low interest rate environment is having on the discount rate used to calculate the plan liabilities.

a $382,000 increase in professional fees expense due largely to higher legal costs, recruitment fees and increases in several other professional fee categories.

INCOME TAX EXPENSE

The Company recorded an income tax expense of $1.4 million or an effective tax rate of 29.6% for the first nine months of 2013 compared to an income tax expense of $1.9 million or an effective tax rate of 30.9% for the first nine months of 2012. The lower income tax expense and effective rate in 2013 reflects the Company s reduced pre-tax earnings combined with an increased amount of tax free earnings from bank owned life insurance. The Company s deferred tax asset was $11.1 million at September 30, 2013 and relates primarily to net operating loss carryforwards

and the allowance for loan losses.

TABLE OF CONTENTS

SEGMENT RESULTS

Retail banking s net income contribution was $729,000 in the third quarter and $2.3 million for the first nine months of 2013 which was lower than the $837,000 and $2.5 million net income contributions for the same 2012 periods. This modest decline in earnings in 2013 was due to lower net interest income resulting from the previously discussed net interest margin pressure, modestly higher non-interest expense and less benefit from a negative loan loss provision in 2013. These negative items were partially offset by increased non-interest income due to strong residential mortgage banking revenues.

The commercial banking segment reported net income contributions of $1.1 million in the third quarter and $3.2 million for the first nine months of 2013 compared to $1.3 million and $3.8 million for the same 2012 periods. Sustained improvements in asset quality continued to result in a negative provision for loan losses in 2013 but at a lesser level than 2012. Overall, there has been $1.1 million less earnings benefit from negative loan loss provisions in this segment in 2013. This segment did benefit from higher net interest income due to increased loan balances in 2013. But this was partially offset by greater non-interest expense due to a $126,000 increase in the reserve for unfunded commitments due to increased loan approval activity and the costs associated with all three new loan production offices being operational for the entire nine months in 2013.

The trust segment s net income contributions amounted to $310,000 for the third quarter and $816,000 for the first nine months of 2013 compared to $210,000 and $708,000 for the same 2012 periods. The higher net income contribution in 2013 is due to greater revenue from increased assets under management which reflects both successful new business development activities and market appreciation of existing assets. This more than offset higher non-interest expense from increased personnel costs and legal fees.

The investment/parent segment reported net losses of $949,000 in the third quarter and $3.0 million for the first nine months of 2013 compared to net losses of $1.0 million and $2.7 million for the same 2012 periods. A reduced level of investment securities and declining yields in the investment securities portfolio due to the continued low interest rate environment have had a negative impact on this segment. This margin pressure was somewhat offset by gains realized on the sale of certain rapidly prepaying mortgage backed securities in 2013.

BALANCE SHEET

The Company's total consolidated assets were $1.038 billion at September 30, 2013, which was up by $37 million or 3.7% from December 31, 2012. This asset growth was due primarily to a $32 million or 4.4% increase in total loans during the first nine months of 2013. This loan growth reflects the successful results of the Company s more intensive sales calling efforts with an emphasis on generating commercial loans and owner occupied commercial real estate loans which qualify as SBLF loans, particularly through its loan production offices.

The Company funded the previously mentioned asset growth with a combination of both increased deposits($16 million) and FHLB short-term borrowings and advances($23 million). The FHLB term advances with maturities between 3 and 5 years now total $21 million as the Company s has utilized these advances to help manage interest rate risk in a rising rate environment. The Company s total shareholders equity decreased modestly by $98,000 over the first nine months of 2013 due to the Company s common stock repurchase program and an increase in accumulated other comprehensive loss. These two factors were slightly greater than the increase in retained earnings resulting from the net income available to common shareholders earned in the first nine months of 2013 which exceeded the payment of dividends by $2.8 million. The increase in intermediate to long term interest rates has caused the value in the AFS investment securities portfolio to decline by a net $2.4 million during the first nine months of 2013 which is reflected

in accumulated other comprehensive loss. The Company continues to be considered well capitalized for regulatory purposes with a risk based capital ratio of 15.35%, and an asset leverage ratio of 11.44% at September 30, 2013. The Company s book value per common share was $4.76, its tangible book value per common share was $4.09, and its tangible common equity to tangible assets ratio was 7.48% at September 30, 2013.

40

TABLE OF CONTENTS

LOAN QUALITY

The following table sets forth information concerning the Company s loan delinquency, non-performing assets, and classified assets (in thousands, except percentages):

	September 30, 2013	December 31, 2012	September 30, 2012
Total accruing loan delinquency (past due 30 to 89 days)	$3,882	$3,456	$2,398
Total non-accrual loans	3,259	5,814	4,455
Total non-performing assets including TDR*	5,037	7,224	5,372
Accruing loan delinquency, as a percentage of total loans, net of unearned income	0.51 %	0.48 %	0.34 %
Non-accrual loans, as a percentage of total loans, net of unearned income	0.43	0.81	0.64
Non-performing assets, as a percentage of total loans, net of unearned income, and other real estate owned	0.66	1.00	0.77
Non-performing assets as a percentage of total assets	0.49	0.72	0.54
As a percent of average loans, net of unearned income:			
Annualized net charge-offs	0.23	0.19	0.09
Annualized provision (credit) for loan losses	(0.02)	(0.11)	(0.26)
Total classified loans (loans rated substandard or doubtful)	$17,396	$22,717	$21,391

* Non-performing assets are comprised of (i) loans that are on a non-accrual basis, (ii) loans that are contractually past due 90 days or more as to interest and principal payments, (iii) performing loans classified as a troubled debt restructuring and (iv) other real estate owned.

As a result of successful ongoing problem credit resolution efforts, the Company achieved further asset quality improvements in the first nine months of 2013. These improvements are evidenced by reduced levels of non-accrual loans, non-performing assets, classified assets and low loan delinquency levels that continue to be well below 1% of total loans. We continue to closely monitor the loan portfolio given the slow recovery in the economy and the number of relatively large-sized commercial and commercial real estate loans within the portfolio. As of September 30, 2013, the 25 largest credits represented 30.1% of total loans outstanding.

ALLOWANCE FOR LOAN LOSSES

The following table sets forth the allowance for loan losses and certain ratios for the periods ended (in thousands, except percentages):

	September 30, 2013	December 31, 2012	September 30, 2012
Allowance for loan losses	$11,183	$12,571	$12,829
Allowance for loan losses as a percentage of each of the following:			
total loans, net of unearned income	1.47 %	1.74 %	1.83 %
	288.07	363.74	534.99

total accruing delinquent loans (past due 30 to 89 days)			
total non-accrual loans	343.14	216.22	287.97
total non-performing assets	222.02	174.02	238.86

The Company has reversed a portion of the allowance for loan losses into earnings in both 2013 and 2012 due to the previously discussed sustained improvement in asset quality. As a result of this reversal and higher net charge-off levels in the first nine months of 2013, the balance in the allowance for loan losses has declined but the Company has been able to still maintain strong coverage of non-accrual loans and non-performing assets as indicated in the above table.

TABLE OF CONTENTS

LIQUIDITY

The Company s liquidity position has been strong during the last several years. Our core retail deposit base has grown over the past three years and has been more than adequate to fund the Company s operations. Cash flow from maturities, prepayments and amortization of securities was also used to either fund loan growth, paydown borrowings, or reinvested back into the securities portfolio. We strive to operate our loan to deposit ratio in a range of 85% to 95%. At September 30, 2013, the Company s loan to deposit ratio was 89.3%. We are optimistic that we can increase the loan to deposit ratio in the future given current commercial loan pipelines, the further development of three new loan production offices, and our focus on small business lending.

Liquidity can be analyzed by utilizing the Consolidated Statement of Cash Flows. Cash and cash equivalents increased by $1.9 million from December 31, 2012, to September 30, 2013, due to $38.1 million of cash provided by financing activities and $12.6 million of cash provided by operating activities. This was partially offset by $48.8 million of cash used in investing activities. Within investing activities, cash provided from investment security maturities and sales was lower than cash used for new investment security purchases by $5.9 million. Cash advanced for new loan fundings and purchases (excluding residential mortgages sold in the secondary market) totaled $153.7 million and was $41.3 million higher than the $112.4 million of cash received from loan principal payments and participations. Within financing activities, deposit growth provided $16.4 million of cash. Total FHLB borrowings increased as advances, both short-term and long-term, exceeded paydowns by $23.4 million and was utilized to fund the earning asset growth. At September 30, 2013, the Company had immediately available $343 million of overnight borrowing capacity at the FHLB and $39 million of unsecured federal funds lines with correspondent banks.

The holding company had $18.1 million of cash, short-term investments, and investment securities at September 30, 2013, which represented an increase of approximately $1.4 million since year-end 2012. Additionally, dividend payments from our subsidiaries can also provide ongoing cash to the holding company. At September 30, 2013, our subsidiary Bank had $2.1 million of cash available for immediate dividends to the holding company under the applicable regulatory formulas. As such, the holding company has strong liquidity to meet its trust preferred debt service requirements and preferred stock dividends, which should approximate $1.2 million over the next twelve months. Additionally, the Company has ample cash to provide for its $0.01 per share quarterly common stock cash dividend which will require $188,000 of cash on a quarterly basis. The most recent $0.01 dividend was announced on October 18, 2013 payable on November 18, 2013 to shareholders of record on November 4, 2013.

CAPITAL RESOURCES

The Company meaningfully exceeds all regulatory capital ratios for each of the periods presented and is considered well capitalized. The asset leverage ratio was 11.44% and the risk based capital ratio was 15.35% at September 30, 2013. The Company s tangible common equity to tangible assets ratio was 7.48% at September 30, 2013. These ratios reflect the completion of $1.2 million common stock buyback program where we repurchased 2% of our outstanding common shares during the second quarter of 2013. We anticipate that we will maintain our strong capital ratios throughout the remainder of 2013. Capital generated from earnings will be utilized to pay the SBLF preferred dividend, common stock cash dividend and will also support anticipated balance sheet growth.

On July 2, 2013, the Board of Governors of the Federal Reserve System approved final rules that substantially amend the regulatory risk-based capital rules applicable to the Company and the Bank. The final rules implement the Basel III regulatory capital reforms, as well as certain changes required by the Dodd-Frank Act. The July 2013 final rules generally implement higher minimum capital requirements, add a new common equity tier 1 capital requirement, and establish criteria that instruments must meet to be considered common equity tier 1 capital, additional tier 1 capital or

tier 2 capital. The new minimum capital to risk-adjusted assets requirements are a common equity tier 1 capital ratio of 4.5% (6.5% to be considered well capitalized) and a tier 1 capital ratio of 6.0%, increased from 4.0% (and increased from 6.0% to 8.0% to be considered well capitalized); the total capital ratio remains at 8.0% under the new rules (10.0% to be considered well capitalized). Under the new rules, in order to avoid limitations on capital distributions (including dividend payments and certain discretionary bonus payments to executive officers), a banking

42

TABLE OF CONTENTS

organization must hold a capital conservation buffer comprised of common equity tier 1 capital above its minimum risk-based capital requirements in an amount greater than 2.5% of total risk-weighted assets. The new minimum capital requirements are effective on January 1, 2015. The capital contribution buffer requirements phase in over a three-year period beginning January 1, 2016.

The July 2013 final rules include three significant changes from the proposals initially made by federal banking regulators in June 2012: (i) the final rules do not change the current risk weighting for residential mortgage exposures; (ii) the final rules permit institutions, other than certain large institutions, to elect to continue to treat certain components of accumulated other comprehensive income as permitted under the current general risk-based capital rules, and not reflect unrealized gains and losses on available-for-sale securities in common equity tier 1 calculations; and (iii) the final rules permit institutions with less than $15.0 billion in assets to grandfather certain non-qualifying capital instruments (including trust preferred securities) issued prior to May 19, 2009 into tier 1 capital.

The Company and the Bank will continue to analyze these new rules and their effects on the business, operations and capital levels of the Company and the Bank.

INTEREST RATE SENSITIVITY

The following table presents an analysis of the sensitivity inherent in the Company s net interest income and market value of portfolio equity. The interest rate scenarios in the table compare the Company s base forecast, which was prepared using a flat interest rate scenario, to scenarios that reflect immediate interest rate changes of 100 and 200 basis points. Note that we suspended the 200 basis point downward rate shock since it has little value due to the absolute low level of interest rates. Each rate scenario contains unique prepayment and repricing assumptions that are applied to the Company s existing balance sheet that was developed under the flat interest rate scenario.

Interest Rate Scenario	Variability of Net Interest Income	Change in Market Value of Portfolio Equity
200bp increase	0.2 %	13.7 %
100bp increase	0.7	8.3
100bp decrease	(4.2)	(15.1)

The variability of net interest income is negative in the 100 basis point downward rate scenario as the Company has more exposure to assets repricing downward to a greater extent than liabilities due to the absolute low level of interest rates with the fed funds rate currently at 0.25%. The variability of net interest income is modestly positive in the upward rate shocks due to the Company s short duration investment securities portfolio and scheduled repricing of loans tied to LIBOR or prime. Also, the Company expects that it will not have to reprice its core deposit accounts up as quickly when interest rates rise. The market value of portfolio equity increases in the upward rate shocks due to the improved value of the Company s core deposit base. Negative variability of market value of portfolio equity occurs in the downward rate shock due to a reduced value for core deposits.

OFF BALANCE SHEET ARRANGEMENTS

The Company incurs off-balance sheet risks in the normal course of business in order to meet the financing needs of its customers. These risks derive from commitments to extend credit and standby letters of credit. Such commitments and standby letters of credit involve, to varying degrees, elements of credit risk in excess of the amount recognized in

the consolidated financial statements. The Company had various outstanding commitments to extend credit approximating $156.0 million and standby letters of credit of $12.7 million as of September 30, 2013. The Company s exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Company uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

43

TABLE OF CONTENTS

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The accounting and reporting policies of the Company are in accordance with Generally Accepted Accounting Principles and conform to general practices within the banking industry. Accounting and reporting policies for the allowance for loan losses, goodwill, income taxes, and investment securities are deemed critical because they involve the use of estimates and require significant management judgments. Application of assumptions different than those used by the Company could result in material changes in the Company s financial position or results of operation.

ACCOUNT Allowance for Loan Losses
BALANCE SHEET REFERENCE Allowance for loan losses
INCOME STATEMENT REFERENCE Provision (credit) for loan losses
DESCRIPTION

The allowance for loan losses is calculated with the objective of maintaining reserve levels believed by management to be sufficient to absorb estimated probable credit losses. Management s determination of the adequacy of the allowance is based on periodic evaluations of the credit portfolio and other relevant factors. However, this quarterly evaluation is inherently subjective as it requires material estimates, including, among others, likelihood of customer default, loss given default, exposure at default, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses on consumer loans and residential mortgages, and general amounts for historical loss experience. This process also considers economic conditions, uncertainties in estimating losses and inherent risks in the various credit portfolios. All of these factors may be susceptible to significant change. Also, the allocation of the allowance for credit losses to specific loan pools is based on historical loss trends and management s judgment concerning those trends.

Commercial and commercial real estate loans are the largest category of credits and the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan loss. Approximately $8.7 million, or 78%, of the total allowance for loan losses at September 30, 2013 has been allocated to these two loan categories. This allocation also considers other relevant factors such as actual versus estimated losses, economic trends, delinquencies, levels of non-performing and TDR loans, concentrations of credit, trends in loan volume, experience and depth of management, examination and audit results, effects of any changes in lending policies and trends in policy, financial information and documentation exceptions. To the extent actual outcomes differ from management estimates, additional provision for credit losses may be required that would adversely impact earnings in future periods.

ACCOUNT Goodwill
BALANCE SHEET REFERENCE Goodwill
INCOME STATEMENT REFERENCE Goodwill impairment
DESCRIPTION

The Company considers our accounting policies related to goodwill to be critical because the assumptions or judgment used in determining the fair value of assets and liabilities acquired in past acquisitions are subjective and

complex. As a result, changes in these assumptions or judgment could have a significant impact on our financial condition or results of operations.

The fair value of acquired assets and liabilities, including the resulting goodwill, was based either on quoted market prices or provided by other third party sources, when available. When third party information was not available, estimates were made in good faith by management primarily through the use of internal cash flow modeling techniques. The assumptions that were used in the cash flow modeling were subjective and are susceptible to significant changes. The Company routinely utilizes the services of an independent third party that is regarded within the banking industry as an expert in valuing core deposits to monitor the ongoing value and changes in the Company s core deposit base. These core deposit valuation updates are based upon specific data provided from statistical analysis of the Company s own deposit behavior to estimate the duration of these non-maturity deposits combined with market interest rates and other economic factors.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. The Company s goodwill relates to value inherent in the banking and wealth management businesses, and the value is dependent upon the Company s ability to provide quality, cost-effective services in the face of free competition from other market participants on a regional basis. This

ability relies upon continuing investments in processing systems, the development of value-added service features and the ease of use of the Company s services. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted and the loyalty of the Company s deposit and customer base over a longer time frame. The quality and value of a Company s assets is also an important factor to consider when performing goodwill impairment testing. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective value added services over sustained periods can lead to impairment of goodwill.

Goodwill which has an indefinite useful life is tested for impairment at least annually and written down and charged to results of operations only in periods in which the recorded value is more than the estimated fair value. As of September 30, 2013, goodwill was not considered impaired; however, deteriorating economic conditions could result in impairment, which could adversely affect earnings in future periods.

ACCOUNT Income Taxes
BALANCE SHEET REFERENCE Net deferred tax asset
INCOME STATEMENT REFERENCE Provision for income tax expense
DESCRIPTION

The provision for income taxes is the sum of income taxes both currently payable and deferred. The changes in deferred tax assets and liabilities are determined based upon the changes in differences between the basis of assets and liabilities for financial reporting purposes and the basis of assets and liabilities as measured by the enacted tax rates that management estimates will be in effect when the differences reverse. This income tax review is completed on a quarterly basis.

In relation to recording the provision for income taxes, management must estimate the future tax rates applicable to the reversal of tax differences, make certain assumptions regarding whether tax differences are permanent or temporary and the related timing of the expected reversal. Also, estimates are made as to whether taxable operating income in future periods will be sufficient to fully recognize any gross deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. Alternatively, we may make estimates about the potential usage of deferred tax assets that decrease our valuation allowances. As of September 30, 2013, we believe that all of the deferred tax assets recorded on our balance sheet will ultimately be recovered and that no valuation allowances were needed.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

ACCOUNT Investment Securities
BALANCE SHEET REFERENCE Investment securities

INCOME STATEMENT REFERENCE Net realized gains (losses) on investment securities

DESCRIPTION

Available-for-sale and held-to-maturity securities are reviewed quarterly for possible other-than-temporary impairment. The review includes an analysis of the facts and circumstances of each individual investment such as the severity of loss, the length of time the fair value has been below cost, the expectation for that security s performance, the creditworthiness of the issuer and the Company s intent and ability to hold the security to recovery. A decline in value that is considered to be other-than-temporary is recorded as a loss within non-interest income in the Consolidated Statements of Operations. At September 30, 2013, the unrealized losses in the available-for-sale security portfolio were comprised of securities issued by government agencies or government sponsored agencies and certain high quality corporate securities. The Company believes the unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired.

45

TABLE OF CONTENTS

Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, management does not intend to sell these securities and does not believe it will be required to sell these securities before they recover in value.

FORWARD LOOKING STATEMENT

THE STRATEGIC FOCUS:

The challenge for the future is to improve earnings performance to peer levels through a disciplined focus on community banking and improving the profitability of our Trust Company. In accordance with our strategic plan, AmeriServ will maintain its focus as a community bank delivering banking and trust services to the best of our ability and focus on further growing revenues by leveraging our strong capital base and infrastructure. This Company will not succumb to the lure of quick fixes and fancy financial gimmicks. It is our plan to continue to build AmeriServ into a potent banking force in this region and in this industry. Our focus encompasses the following:

Customer Service   it is the existing and prospective customer that AmeriServ must satisfy. This means good products and fair prices. But it also means quick response time and professional competence. It means speedy problem resolution and a minimizing of bureaucratic frustrations. AmeriServ is training and motivating its staff to meet these standards while providing customers with more banking options that involve leading technologies such as computers, smartphones, and tablets to conduct business.
Revenue Growth   It is necessary for AmeriServ to focus on growing revenues. This means loan growth, deposit growth and fee growth. It also means close coordination between all customer service areas so as many revenue producing products as possible can be presented to existing and prospective customers. The Company s Strategic Plan contains action plans in each of these areas particularly on increasing loans through the opening of several loan production offices. There will be a particular focus on small business commercial lending. An examination of the peer bank database provides ample proof that a well-executed community banking business model can generate a reliable and rewarding revenue stream.
Expense Rationalization   AmeriServ Financial remains focused on trying to rationalize expenses. This has not been a program of broad based cuts, but has been targeted so AmeriServ stays strong but spends less. The Company has established a goal of identifying $1 million of non-interest expense savings in 2014 some of which may be utilized to fund new revenue growth initiatives such as another loan production office. It is critical to be certain that future expenditures are directed to areas that are playing a positive role in the drive to improve revenues.

This Form 10-Q contains various forward-looking statements and includes assumptions concerning the Company s beliefs, plans, objectives, goals, expectations, anticipations, estimates, intentions, operations, future results, and prospects, including statements that include the words may, could, should, would, believe, expect, anticipat intend, plan or similar expressions. These forward-looking statements are based upon current expectations, are subject to risk and uncertainties and are applicable only as of the dates of such statements. Forward-looking statements involve risks, uncertainties and assumptions. Although we do not make forward-looking statements unless we believe we have a reasonable basis for doing so, we cannot guarantee their accuracy. You should not put undue reliance on any forward-looking statements. These statements speak only as of the date of this Form 10-Q, even if subsequently made available on our website or otherwise, and we undertake no obligation to update or revise these statements to reflect events or circumstances occurring after the date of this Form 10-Q. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company provides the following cautionary statement identifying important factors (some of which are beyond the Company s control) which could cause the actual results or events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) the effects of trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; (iii) significant changes in interest rates and prepayment speeds;

TABLE OF CONTENTS

(iv) inflation, stock and bond market, and monetary fluctuations; (v) credit risks of commercial, real estate, consumer, and other lending activities; (vi) changes in federal and state banking and financial services laws and regulations; (vii) the presence in the Company s market area of competitors with greater financial resources than the Company; (viii) the timely development of competitive new products and services by the Company and the acceptance of those products and services by customers and regulators (when required); (ix) the willingness of customers to substitute competitors products and services for those of the Company and vice versa; (x) changes in consumer spending and savings habits; (xi) unanticipated regulatory or judicial proceedings; and (xii) other external developments which could materially impact the Company s operational and financial performance.

The foregoing list of important factors is not exclusive, and neither such list nor any forward-looking statement takes into account the impact that any future acquisition may have on the Company and on any such forward-looking statement.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The Company manages market risk, which for the Company is primarily interest rate risk, through its asset liability management process and committee, see further discussion in Interest Rate Sensitivity section of the M.D. & A.

Item 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures. The Company s management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and the operation of the Company s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2013, pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer along with the Chief Financial Officer concluded that the Company s disclosure controls and procedures as of September 30, 2013, are effective.

(b) Changes in Internal Controls. There have been no changes in AmeriServ Financial Inc. s internal controls over financial reporting that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.
