**CAMTEK INTRODUCES PEGASUS 200S**

**A NEW HDI SUBSTRATE INSPECTION SYSTEM**

MIGDAL HA EMEK, Israel, December 11, 2006 Camtek Ltd. (**Nasdaq: CAMT, TASE: CAMT**) announced today the introduction of Pegasus 200S a new model in Camtek's Pegasus product line of automated optical inspection (AOI) systems for finished high-density interconnect substrates (HDI-S).

The Pegasus 200S has completed a series of field tests at customers' sites. Camtek has installed so far around ten systems of the new model, the majority of which have already been qualified for production.

We have been witnessing a growing interest in replacing the manual quality assurance operation by an automatic yet intelligent inspection equipment commented Yankee Yavor, VP of PCB and HDI-S inspection products at Camtek. We believe that the new Pegasus model delivers the throughput and intelligent logic to become a standard tool in the fast-growing HDI substrate industry.

**ABOUT PEGASUS 200S**

Pegasus 200S is an advanced Automated Optical Inspection (AOI) system dedicated to the inspection of finished High-Density Interconnect Substrates (HDI-S) such as PBGA & CSP strips, and other gold plated applications.

The Pegasus 200S is equipped with a new high-sensitivity CCD camera and with dedicated illumination systems, especially designed and optimized for the inspection of plated metallic surfaces (gold / silver / tin / OTC) and for solder mask materials. Its enhanced Image Acquisition system, along with its robust image processing engine, enable the detection of fine defects and micro-cracks in demanding applications.

Thanks to its technological advantages, the Pegasus 200S raises the standards of final inspection in the HDI-S industry by enabling the detection of critical defects on both the interconnect pads and solder mask areas, providing high throughput and yield improvement of the final product.

**ABOUT CAMTEK LTD.**

With headquarters in Migdal Ha Emek Israel, Camtek Ltd., designs, develops, manufactures, and markets automatic optical inspection systems and related products. Camtek's automatic inspection systems are used to enhance both production processes and yield for manufacturers in the printed circuit board industry, the high density interconnect substrate industry and the semiconductor manufacturing and packaging industry. This press release is available at [www.camtek.co.il](http://www.camtek.co.il).

This press release may contain projections or other forward-looking statements regarding future events or the future performance of the Company. These statements are only predictions and may change as time passes. We do not assume any obligation to update that information. Actual events or results may differ materially from those projected, including as a result of changing industry and market trends, reduced demand for our products, the timely development of our new products and their adoption by the market, increased competition in the industry, price reductions as well as due to risks identified in the documents filed by the Company with the SEC.
