

POWDER RIVER PETROLEUM INTERNATIONAL, INC.

Form 10-Q

May 28, 2008

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED SEPTEMBER 30, 2007.

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE TRANSITION FROM _____ TO _____.

COMMISSION FILE NUMBER: **000-31945**

POWDER RIVER BASIN GAS CORP.

(Exact name of registrant as specified in its charter)

OKLAHOMA

84-1521645

(State or other jurisdiction of incorporation (I.R.S. Employer Identification No.)
or organization)

Suite 202, 1212 31st Ave NE, Calgary, Alberta, Canada T2E 7S8

(Address of principal executive offices)

Issuer's telephone number: **(403) 263-5010**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filing

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date:

At May 9, 2008, there were outstanding 147,845,980 shares of the Registrant's Common Stock, \$.001 par value.

PART I

FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS (UNAUDITED)

The accompanying unaudited financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission and, therefore, do not include all information and footnotes necessary for a complete presentation of our financial position, results of operations, cash flows, and stockholders' equity in conformity with generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation of the results of operations and financial position have been included and all such adjustments are of a normal recurring nature.

Our unaudited balance sheet at March 31, 2008 and our audited balance sheet at December 31, 2007; the related unaudited statements of operations for the three month period ended March 31, 2008 and 2007; and the related unaudited statement of cash flows for the three month period ended March 31, 2008 and 2007, are attached hereto.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 1 -

BASIS OF PRESENTATION

The financial information included herein is unaudited and has been prepared consistent with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 8-03 of Regulation S-X. Accordingly, these financial statements do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. These statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2007. In the opinion of management, these financial statements contain all adjustments (consisting solely of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim period presented.

The results of operations for the three months ended March 31, 2008 and 2007 are not necessarily indicative of the results to be expected for the full year.

NOTE 2 -

BASIS AND FULLY DILUTED INCOME PER SHARE

The computation of basic and fully diluted income per share of common stock is based on the weighted average number of shares outstanding for the three months ended March 31, 2008 and 2007.

	Income/(Loss)	Shares	Per-Share
	(Numerator)	(Denominator)	Amount
For the three months ended March 31, 2008:			
Basic EPS Income to common stockholders			
Continuing Operations	\$ (3,209,221)	151,064,591	\$ (0.02)
Net Loss	\$ (2,243,551)	151,064,591	\$ (0.01)

For the three months ended March 31, 2007:

Basic EPS Income to common stockholders

Continuing Operations	\$	2,921,799	138,689,861	\$	0.02
Net Income	\$	1,928,387	138,689,861	\$	0.01

Common stock equivalents that have been used in the fully diluted calculation of EPS are as follows:

Reconciliation of Denominator:	2008	2007
Weighted Average Shares Outstanding	151,064,591	138,689,861
Stock Warrants Weighted Average	27,232,609	19,600,447
Weighted Average Fully Diluted Shares	178,297,200	158,290,308

	Income	Shares	Per-Share
	(Numerator)	(Denominator)	Amount
For the three months ended March 31, 2008:			
Fully Diluted EPS Income to common stockholders:			
Continuing Operations	\$ (3,209,221)	151,064,591	\$ (0.02)
Net Income	\$ (2,243,551)	151,064,591	\$ (0.01)

For the three months ended March 31, 2007:

Fully Diluted EPS Income to common stockholders

Continuing Operations	\$	2,921,799	158,290,308	\$	0.02
Net Income	\$	1,928,387	158,290,308	\$	0.01

Common stock equivalents, consisting of 27,232,609 in warrants were considered but were not included in the computation of loss per share at March 31, 2008, because they would have been anti-dilutive. The 4,700,000 warrants considered during March 31, 2007 were included in the computation of diluted earnings per share at March 31, 2007.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 3 -

OIL AND GAS PROPERTIES

The full cost method is used in accounting for oil and gas properties. Accordingly, all costs associated with acquisition, exploration, and development of oil and gas reserves, including directly related overhead costs, are capitalized. In addition, depreciation on property and equipment used in oil and gas exploration and interest costs incurred with respect to financing oil and gas acquisition, exploration and development activities are capitalized in accordance with full cost accounting. Capitalized interest for the three months ended March 31, 2008 and 2007 was \$0. All capitalized costs of proved oil and gas properties subject to amortization are being amortized on the unit-of-production method using estimates of proved reserves. Investments in unproved properties and major development projects not subject to amortization are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is added to the capitalized costs to be amortized. As of March 31, 2008 and December 31, 2007, proved oil and gas reserves had been identified on certain of the Company's oil and gas properties. During the three months ended March 31, 2008 and 2007, the Company recorded depletion of \$46,161 and \$44,953 on its producing properties. All other wells are incomplete as of March 31, 2008.

NOTE 4 -

COMMITMENTS AND CONTINGENCIES

The Company has entered into various oil and gas leases from several land owners. Associated with the agreements, the Company is committed to various royalty agreements ranging from 15% to 25% of gross revenue production. Some of the leases also provide for a minimum royalty. As of March 31, 2008, and December 31, 2007, no royalties were due.

Property Lease

The Company has entered into lease agreements for its corporate office in Calgary as well as office space in Tulsa, Oklahoma and an investor relations office in Singapore. The term of the Calgary lease is for five years, expiring on

Edgar Filing: POWDER RIVER PETROLEUM INTERNATIONAL, INC. - Form 10-Q

April 27, 2010. The annual basic rent payment in Canadian dollars is \$28,460 plus GST for year one, \$29,883 plus GST for years 2 - 3 and \$31,306 plus GST for years 4 - 5. The total area leased in Calgary is 2,846 square feet. The Tulsa lease is on a month to month basis with monthly rental payments of \$1,195. The Singapore lease is for a term of two years, expiring on September 13, 2009. The monthly rent payment in Singapore dollars is \$5,400. We believe these administrative offices will be adequate for our needs for the next 12 months.

The future minimum lease payments are as follows:

For the Years Ending December 31,	
2008	\$ 48,733
2009	62,135
2010	10,064
Thereafter	-
Total future minimum lease payments	\$ 120,932

The Company recorded an expense of \$26,555 and \$7,015 for three month period ending March 31, 2008 and 2007, respectively, related to these property leases.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 4 -

COMMITMENTS AND CONTINGENCIES (Continued)

Future Commitment on the Sales of Working Interest

Per the terms of the Company's agreement with the investors that have purchased working interests in the Company's oil and gas leases, each working interest purchased by the investors provides the holder with a pro-rata percentage of production revenues which is based on the portion of the working interest that they actually invested in. However, regardless of production generated from the property, the Company has guaranteed a minimum payment of at least 9% per annum of the holder's investment until the full amount of the holder's investment has been repaid (breakeven point). Therefore, until the holders break even point has been met, or until that Company is no longer able to meet this commitment there will be a monthly payment made to these investors. As of March 31, 2008, the Company's future commitment related to these agreements was approximately \$33,082,449, as follows.

For the Years Ending	
December 31,	
2008	\$ 6,106,892
2009	6,106,892
2010	6,106,892
2011	6,106,892
2012	6,106,892
Thereafter	2,547,989
Total future working interest payments	\$ 33,082,449

The Company recorded a contra-revenue of \$664,711 for the three months ended March 31, 2008, related to these future commitments. This amount represents the amount owed to working interest holders in relation to their working interest agreements with the Company.

NOTE 5 -

SIGNIFICANT TRANSACTIONS

During February 2008, the Company issued 362,069 shares of common stock for expenses incurred on drilling projects and property development. The issuance was valued at \$0.20 per share, the market value of the shares on the date of the agreement. This resulted in a total cost of \$72,414 to the Company.

The Company uses the Black-Scholes model to value stock options. The Black-Scholes model requires the use of employee exercise behavior data and the use of a number of assumptions, including volatility of the Company's stock price, the weighted average risk-free rate, and the weighted average expected life of the options. Because the Company does not pay dividends, the dividend rate variable in the Black-Scholes model is zero. The Company estimated the fair value of the stock options at the grant date based on the following weighted average assumptions:

	For the three month period ended Mar. 31, 2008	For the three month period ended Mar. 31, 2007
Risk free interest rate	3.07-3.94%	2.89%
Expected life	1.25 years	1.25 years
Expected volatility	58.10%	58.10%
Dividend yield	0.00%	0.00%

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 5 -

SIGNIFICANT TRANSACTIONS (Continued)

During the three months ended March 31, 2008, the Company sold approximately 2.5% of their working interest in this property to an unrelated party for a total of \$840,000, less a commission of \$140,000. The receivable balance related to this transaction at March 31, 2008 was \$-0-.

Since the Company is in the business of buying and selling working interest in producing oil and gas properties, the sale of working interests is being recorded as revenue in the accompanying statements of operations for the three months ended March 31, 2008 and 2007.

NOTE 6 -

PURCHASE OF TEXOMA

In the review process in connection with the preparation of the financial statements included in this report, we have determined that there are a number of outstanding and unresolved issues in connection with the Company's previously announced acquisition of Texoma Oil Field Services, Inc. (Texoma), a Nevada corporation. Although the purchase documents for the first half of the Texoma transaction were executed, Texoma never supplied the required list of assets held by Texoma. These assets were represented to include three complete drilling rigs and related equipment. It now appears that no such assets were ever held by Texoma. In addition, it appears that although the agreement on the second half of the transaction was announced and draft documents were prepared, no agreements were actually executed by the parties. At this filing date, the Company is therefore reporting all of the expenses incurred in connection with the transaction to date (see Note 7 below) but cannot report that any assets were acquired. Management is working with Texoma to resolve this matter as quickly as possible and a tentative settlement has been reached (see Note 9 below).

On October 31, 2007 (the effective date of this agreement was later amended to be January 1, 2008), the Board of Directors approved a stock purchase agreement (the Agreement), whereby the Company would enter into a long-term drilling and oil field services agreement pursuant to which Texoma was engaged on a priority basis to serve the needs

of the Company with customary terms and conditions. The original Agreement stipulated that the Company would purchase 50% of the issued and outstanding shares of Texoma, and the subsequent amended agreement stipulated that the Company would purchase the remaining 50% of the issued and outstanding shares of Texoma. In exchange the Company agreed to pay the following; the Company was to issue a total of 4,000,000 shares of common stock of the Company at an agreed price of \$1.00 per share, plus warrants to purchase an additional 4,000,000 shares of the Company, exercisable at \$0.25 per share on or before October 31, 2010. In addition, the Company issued an 8% promissory note in the principal amount of \$500,000 to Texoma, payable in five payments of \$100,000, with the final payment along with any accrued but unpaid interest to be made no later than November 1, 2008. As of March 31, 2008, the Company had made the first payment of \$100,000.

The Agreement also had a purchase price guarantee, whereby the Company agreed that if the fair market value (FMV) of its common stock on the OTC BB or other market in which the Company's common stock is trading on October 31, 2009 was not equal to or above \$1.00 per share, then the Company would purchase at the Seller's option that number of shares (up to 2,000,000) as shall equal \$2,000,000 paid for at the FMV on October 31, 2009. FMV shall mean for shares traded on the OTC BB, the average between the bid and the ask on the 20 trading days prior to the date in question and if traded on an exchange, then the average closing price on the 20 days prior to the date in question.

When the transaction was initially recorded on the books of the Company, it was recorded as Goodwill in the amount of \$1,322,760 (see Note 7 below).

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 7 -

GOODWILL IMPAIRMENT

Because the Company has been unable to confirm that Texoma had any assets at the time it entered into the purchase agreement described above (see Note 5), we are recording all expenses in connection with the transaction as well as some previously outstanding receivables from Texoma as a goodwill impairment as follows:

2,000,000 shares of common stock at \$0.18 per share	\$	360,000
Promissory Note		500,000
2,000,000 common stock warrants		187,760
Drilling costs prepaid by PWDR in 2006, services were never performed		100,000
Stock issued in 2006 for prepaid drilling services that were never performed		175,000
Total amount paid for a 50% interest in Texoma		1,322,760
Impairment on purchase of Texoma		(1,322,760)
Remaining value of Goodwill in Texoma	\$	-

NOTE 8 -

GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has a large working capital deficit and is currently dependent upon financing to continue operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. It is management's plan to continue to implement their business strategy to generate the necessary revenue to support operations. The Company expects revenues to continue to increase, and management expects to report net income in the coming year.

NOTE 9 - SUBSEQUENT EVENT

On May 23, 2008, the Company signed a Letter of Intent (LOI), with CAVU Capital, LLC (CAVU) to purchase oil field drilling rigs and other related equipment. It is intended that the Company will deliver a promissory note currently estimated at \$3,380,000, secured by the property purchased, which will automatically be reduced to the fair market value of the assets purchased based upon an independent appraisal of the property. The term of the note has not yet been agreed upon, but the anticipated interest rate is 10% per annum.

It is also intended that the Company will enter into an agreement with CAVU, whereby, it will purchase a property lease in Baylor County, Texas. The purchase price is intended to be \$1,000,000, secured by the property being leased. This agreement is intended to close no later than July 31, 2008, which deadline may be extended for 90 days by payment of \$100,000.

Upon execution of this LOI, CAVU has agreed to loan Brian Fox, President and CEO, \$300,000, and Brian Fox agrees to repay the amount by execution of a term note secured by his personal guaranty. The \$300,000 will then be loaned to the Company for required operating capital.

POWDER RIVER BASIN GAS CORP.

Notes to the Consolidated Financial Statements

March 31, 2008

NOTE 9 - SUBSEQUENT EVENT (Continued)

One May 23, 2008, the Company also signed a Binding Memorandum of Settlement agreement (the Agreement), with Mark Cook, whereby the parties have agreed to settle all existing disputes relating to the previously disclosed purchase of Texoma Oil Field Services, Inc (Texoma), as well as related agreements with Mark Cook, including his management agreement and the purchase of the Baylor County property that was mentioned above. Settlement terms are currently being negotiated but the initial terms require the issuance of an additional 2,000,000 shares of common stock, plus 4,000,000 common stock warrants at an exercise price 20% above the closing price on May 23, 2008. In addition, Mark Cook would be entitled to receive \$120,000 for management services through May 31, 2008, as well as approximately \$35,000 in expenses incurred on behalf of the Company. This amount will be offset against funds that have been advanced by the Company to Mark Cook in the approximate amount of \$200,000. The amounts will be reconciled and agreed to by both parties.

In April 2008, we entered into a lease arrangement for certain equipment, including a deep drilling rig and related equipment as well as a large combo pumping unit. It is management's intent to use the leased equipment continue to develop and maintain the leased properties that the Company now has. It is also our intent to outsource the equipment to other oil and gas companies as an additional way to generate revenue. It is estimated that our monthly payment obligations under this lease agreement will be approximately \$150,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward-looking Statements

This report may contain "forward-looking" statements. Examples of forward-looking statements include, but are not limited to: (a) projections of revenues, capital expenditures, growth, prospects, dividends, capital structure and other financial matters; (b) statements of plans and objectives of our management or Board of Directors; (c) statements of our future economic performance; (d) statements of assumptions underlying other statements and statements about us and our business relating to the future; and (e) any statements using the words "anticipate," "expect," "may," "project," "intend" or similar expressions.

General. We are in the business of acquiring and developing working interests in oil and gas properties. Through the period covered by this report, we have sold portions of working interests in acquired properties to help fund development of the properties as well as the acquisition of additional properties. Effective April 1, 2008, we have determined to cease selling working interests as described below. Management reviews and evaluates geological and other applicable technical data in order to determine the likely viability and possible profitability of commencing and completing multiple well drilling programs on the properties covered by the leases. If we determine such programs to be viable, we use our own contractor or engage third party contractors to explore for, drill, re-work and further develop the properties in order to maximize economically justified oil and gas production from the leases in a cost effective manner.

During May 2007, the Company acquired a 95% working interest in the Biamante project in Goliad County, Texas, containing approximately 489 acres. One well is currently in production. During the three months ended March 31, 2008, the Company sold approximately 2.5% of their working interest in this property for a total of \$840,000 less a commission of \$140,000. Since the Company is in the business of buying and selling working interest in producing oil and gas properties, the sale of working interests is being recorded as revenue in the accompanying statements of operations for the three months ended March 31, 2008 and 2007.

Recent Developments

Texoma Transaction - In the review process in connection with the preparation of the financial statements included in this report, we have determined that there are a number of outstanding and unresolved issues in connection with the Company's previously announced acquisition of Texoma Oil Field Services, Inc. (Texoma), a Nevada corporation. Although the purchase documents for the first half of the Texoma transaction were executed, Texoma never supplied

the required list of assets held by Texoma. These assets were represented to include three complete drilling rigs and related equipment. It now appears that no such assets were ever held by Texoma. In addition, it appears that although the agreement on the second half of the transaction was announced and draft documents were prepared, no agreements were actually executed by the parties. At this filing date, the Company is therefore reporting all of the expenses incurred in connection with the transaction to date (see Note 7 to the financial statements) but cannot report that any assets were acquired or that the Company's acquisition of Texoma was ever completed. Management is working with Texoma to resolve this matter as quickly as possible and a tentative settlement has been reached (see Note 9 to the financial statements).

Working Interest Sales and Assignment of Properties - In March 2008, management entered into discussions with OilPods, our exclusive working interest marketing and sales partner, about changing the relationship between the parties. As a result of these discussions, management determined that the Company and its shareholders would be best served by severing existing relationship with OilPods and entering into a new agreement under which OilPods would own the working interest in certain properties directly, undertake the obligations to the working interest holders and hire us as the operator to develop and sustain production, all effective as of April 1, 2008. Accordingly, management has assigned the Company's working interests in three of the Texas properties, Weesatche Goliad, Brookshire and Biamante, to OilPods. Final details of the operating agreement between OilPods and the Company and the assumption of responsibilities by OilPods are being negotiated and management expects to file the final agreements when they are executed.

Liquidity and Capital Resources

At this filing date, we have a large working capital deficit and are currently dependent upon financing to continue operations. We are actively seeking funding to maintain and expand oil and gas production activities for the

balance of the 2008 fiscal year. We are in the process of evaluating prospects for funding which management hopes will shortly result in adequate cash to insure the successful continuation of operations and development plans.

However, we cannot assure you that our financing efforts will be successful or that, if unsuccessful, we will be able to continue operating.

Our need for new capital is directly related to development, drilling and operating expenses to maintain and increase production on acquired properties as well as the possible acquisition of new oil and gas properties. Management expects to eventually be able to finance new acquisitions and existing development, drilling and operating activities primarily out of cash flow but we have not yet achieved sufficient oil and gas production revenues to do so. In addition, as of April 1, 2008, management determined to cease selling working interests through OilPods, as explained above. Until now, we have relied on sales of such working interests to help fund development expenses.

As previously announced, we have also entered into an investment banking arrangement. However, we must complete a current reserves evaluation prior to receiving any funding under that agreement and the reserves evaluation is proceeding much more slowly than we anticipated due to a combination of difficulty in locating a reserves engineering company that can complete the evaluation and some problems we have experienced in obtaining, assembling and supplying the necessary information to the engineering firm we have located. We are now making every effort to work with the engineering company to expedite the evaluation process but cannot predict when the evaluation will be completed.

In April 2008, we entered into a lease arrangement for certain equipment, including a deep drilling rig and related equipment as well as a large combo pumping unit. It is management's intent to use the leased equipment continue to develop and maintain the leased properties that the Company now has. It is also our intent to outsource the equipment to other oil and gas companies as an additional way to generate revenue. It is estimated that our monthly payment obligations under this lease agreement will be approximately \$150,000.

Cash and cash equivalents on hand at March 31, 2008, was \$183,340 as compared to \$965,489 at March 31, 2007. At March 31, 2008, accounts receivable from related parties totaled a net of \$657,336 compared to \$653,927 in the prior year period. The related party is a company that is partially owned by our President. Accounts receivable totaled \$89,302 compared to \$1,200,850 in the prior year period.

Net property and equipment at March 31, 2008 was \$88,716, increased from \$51,724 at March 31, 2007. The increase is due to the acquisition of some machinery and equipment during the period. Property and equipment consists primarily of vehicles and computer equipment associated with operations.

At March 31, 2008, net oil and gas properties totaled \$23,675,586 compared to \$22,888,754 at March 31, 2007. Management continues to examine potential prospects for new acquisitions but must first obtain adequate financing for continuing to develop and operate our existing properties.

At March 31, 2008, total assets were \$26,546,866 compared to \$27,841,623 at March 31, 2007. Total liabilities increased to \$10,785,796 at March 31, 2008 from \$10,632,076 at March 31, 2007 due primarily to increases in accounts payable and notes payable, offset by decreases in accrued expenses and income taxes payable.

For the three months ended March 31, 2008, cash flows from operations totaled \$120,299 compared to \$2,712,790 in the prior year period. The large decrease in net cash provided by operating activities is due to a large decrease in oil and gas sales. This is due primarily to problems encountered during our transition from our previous drilling arrangement to having Texoma be our exclusive drilling company (but see Recent Developments above concerning the viability of our reliance on Texoma). It is also due to a very large decrease in property and working interest sales. Historically, cash for operations has been generated primarily from sales of properties and working interests. As stated above, management has determined to stop selling working interests and will focus on increasing production revenues. Management hopes that oil and gas sales will increase substantially during the balance of fiscal 2008 provided that adequate financing can be secured.

For the three months ended March 31, 2008, cash used by investing activities totaled \$802,448, for the development of oil and gas properties and for purchase of equipment. In the prior year, cash used by investing activities totaled \$2,869,969, primarily for the development of properties. The decrease in cash used investing activities reflects the constraints imposed by lack of funding. It is management's intention to continue to pursue its acquisition strategy as financing permits.

For the three months ended March 31, 2008, cash used by financing activities was \$100,000 for payments on notes payable and long-term liabilities. In the prior year, cash used cash used by financing activities was \$250,222,

including payments on notes payable and long-term liabilities, offset by stock deposits received and proceeds from the issuance of common stock.

Plans for continuing operations. Provided that financing can be obtained, management believes that revenues from operations of developed properties will increase in the balance of fiscal 2008. As of April 1, 2008, we are no longer selling working interests to finance new acquisitions or develop existing properties. This change in management's business strategy may require some adjustments and take some time to implement. However, we believe that a renewed focus on increasing production will benefit the company and its shareholders in the future.

Results of Operations for the Three Months Ended March 31, 2008 compared with 2007

Revenues: Total revenues decreased to \$581,779 in the three months ended March 31, 2008 from \$5,203,321 in the prior year period. During the three months ended March 31, 2008, we had revenues from oil and gas sales of \$546,490, a decrease of \$405,701 or approximately 43% compared to the three months ended March 31, 2007. We also had revenues from property and working interest sales of \$700,000, a decrease of \$4,040,843 or approximately 85% compared to the three months ended March 31, 2007. The decrease in revenues from property and working interest sales for the three months ended March 31, 2008 is due primarily to the change in management's business strategy, which is to move away from the sale of working interest and turn the Company's focus to oil and gas production as well as a new income stream related to outsourcing our drilling company. The decrease in oil and gas sales is due primarily to slower than anticipated production as well as problems encountered during our transition from our previous drilling arrangement to having Texoma be our exclusive drilling company (see Recent Developments above concerning the viability of our reliance on Texoma).

Expenses: Total expenses increased slightly for the three months ended March 31, 2008 over the prior year period, to \$2,483,240 from \$2,293,944. The increase is attributable primarily to large increases in general and administrative expenses, marketing administration and salaries and wages, offset by decreases in lease operating costs and bonuses.

Other Expense: Because we have been unable to confirm that Texoma had any assets at the time it entered into a purchase agreement with us (see Notes 5 and 7 to the financial statements and Recent Developments above), we are recording \$1,322,760 as a loss on goodwill impairment at March 31, 2008. Included in this total are all expenses incurred in connection with the Texoma transaction as well as some previously outstanding receivables from Texoma.

Net Loss: Due primarily to the significant decrease in revenues and the loss on goodwill impairment recorded in connection with the Texoma transaction, we experienced a net loss of \$2,243,551 for the three months ended March 31, 2008 compared to net income of \$1,928,387 for the three months ended March 31, 2007. Management believes that the change in business strategy to focus on production activities and related oil and gas sales can be successful if sufficient financing can be obtained to support operations through the balance of fiscal 2008.

Impact of Inflation

At this time, we do not anticipate that inflation will have a material impact on our current or future operations.

Critical Accounting Policies and Estimates

Except with regard to the estimated future cash flows of the capitalized oil and gas properties, the Company does not employ any critical accounting policies or estimates that are either selected from among available alternatives or require the exercise of significant management judgment to apply or that if changed are likely to materially affect future periods. Management reviews the carrying value of the capitalized oil and gas properties annually for evidence of impairment and considers, based on its current marketing activities, plans and expectations, and the perceived effects of competitive factors, whether any write-downs should be taken or whether the estimated reserves should be changed.

Recent Accounting Pronouncements

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115* (SFAS 159), which allows an entity the irrevocable option to elect fair value for the initial and subsequent measurement for certain financial assets and liabilities under an instrument-by-instrument election. Subsequent measurements for the financial assets and liabilities an entity elects to fair value will be recognized in earnings. SFAS 159 also

establishes additional disclosure requirements. SFAS 159 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted provided that the entity also adopts SFAS 157. We have not yet determined the impact this standard will have on our financial statements.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* (SFAS 141(R)). SFAS 141(R) replaces SFAS No. 141, *Business Combinations*, but retains the requirement that the purchase method of accounting for acquisitions be used for all business combinations. SFAS 141(R) expands on the disclosures previously required by SFAS 141, better defines the acquirer and the acquisition date in a business combination, and establishes principles for recognizing and measuring the assets acquired (including goodwill), the liabilities assumed and any non-controlling interests in the acquired business. SFAS 141(R) also requires an acquirer to record an adjustment to income tax expense for changes in valuation allowances or uncertain tax positions related to acquired businesses. SFAS 141(R) is effective for all business combinations with an acquisition date in the first annual period following December 15, 2008; early adoption is not permitted. The impact of SFAS 141(R) will have on our consolidated financial statements will depend on the nature and size of acquisitions we complete after we adopt SFAS 141(R).

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51* (SFAS 160). SFAS 160 requires that non-controlling (or minority) interests in subsidiaries be reported in the equity section of the company's balance sheet, rather than in a mezzanine section of the balance sheet between liabilities and equity. SFAS 160 also changes the manner in which the net income of the subsidiary is reported and disclosed in the controlling company's income statement. SFAS 160 also establishes guidelines for accounting for changes in ownership percentages and for deconsolidation. SFAS 160 is effective for financial statements for fiscal years beginning on or after December 1, 2008 and interim periods within those years; early adoption is not permitted. The adoption of SFAS 160 is not expected to have a material impact on our financial position, results of operations or cash flows.

In March 2008, the FASB issued SFAS No 161, *Disclosures about Derivative Instruments and Hedging Activities* an Amendment of SFAS No. 133. SFAS No 161 establishes, among other things, the disclosure requirements for derivative instruments and for hedging activities. This Statement amends and expands the disclosure requirements SFAS No. 133 with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. To meet those objectives, this Statement requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Company does not expect the adoption of SFAS No. 161 to have an impact on the Company's consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Since May 2006, management has invested a total amount of \$1,500,000 in a fund with a company in Calgary that is involved primarily in commercial property development in and around the Calgary area. The real estate and property development market in the Calgary area has fallen over the past several years however the commercial building market is still relatively strong. Management is in the process of withdrawing the funds but as of this filing date has

not been able to do so. The amount is recorded as a loan receivable on the Company's balance sheet in the amount of \$1,500,000 along with interest receivable of \$92,253.

ITEM 4T. CONTROLS AND PROCEDURES

Our principal executive and principal financial officer have participated with management in the evaluation of effectiveness of the controls and procedures required by paragraph (b) of Rule 13a-15 or Rule 15d-15 under the Exchange Act as of the end of the period covered by this report. Based on that evaluation, our principal executive officer and principal financial officer cannot report that that our disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Exchange Act) are effective as of the end of the period covered by the report.

In our report on Form 10-K for the year ended December 31, 2007, we included management's assessment that we had a number of material or significant deficiencies in our internal controls. We have not yet been able to

implement changes to address these deficiencies. There have been no changes in our internal controls that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting during the period covered by this report.

PART II

OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

The Company is a named defendant in a personal injury suit, Michael Tripkovich, et al, v Affiliated Holdings, Inc., et al, No. 72217, filed in the 16th Judicial District Court, Parish of St. Martin, State of Louisiana filed July 17, 2007. The suit names more than 100 companies and plaintiff requests damages related to exposure to toxic chemicals, including radon and benzene, while plaintiff was working as a natural gas technician. The Company owns working interests in a small number of properties in Louisiana but does not operate any of the properties. At this time, management believes the Company's potential exposure is small but cannot fully assess the suit which is in the early stages.

The Company is named defendant in a suit, Mader v. Powder River Basin Gas Corp., filed in Johnson County, Wyoming, CV 2007-0085. The Plaintiff claims to have loaned \$100,000 to the Company in January 2001, however the Company has no records of such a loan ever being received. Brian Fox purchased a large block of common stock of the Company from Imperial Petroleum, Inc. with the usual and customary representations and warranties. No disclosure was made regarding this loan. The Company's attempts to verify the existence of the alleged Mader loan have been unsuccessful. A summary judgment in favor of the Plaintiff has been rendered for the full amount of the purported loan plus interest and attorneys' fees totaling approximately \$180,000. The Company intends to appeal the summary judgment.

ITEM 2 UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the three months ended March 31, 2008, we issued the following shares of common stock:

-

2,000,000 shares through the exercise of common stock warrants to acquire 50% of Texoma, at \$0.23 per share, for a total expense of \$187,760.

-
2,000,000 shares to acquire 50% of Texoma, at \$0.18 per share for a total cost of \$360,000.

-
362,069 shares for expenses incurred on drilling projects and property development, at \$0.20 per share, the market value of the shares on the date of the agreement. This resulted in a total cost of \$72,414 to the Company.

The shares issued in the foregoing transactions were issued in reliance on the exemption from registration and prospectus delivery requirements of the Act set forth in Section 3(b) and/or Section 4(2) of the Securities Act and the regulations promulgated thereunder.

ITEM 3 - DEFAULTS BY THE COMPANY ON ITS SENIOR SECURITIES

None.

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5 - OTHER INFORMATION

In connection with the preparation of this report, we have determined that there are a number of outstanding and unresolved issues in connection with the Company's previously announced acquisition of Texoma Oil Field Services, Inc. (Texoma), a Nevada corporation. Texoma represented it held assets including three complete drilling rigs and related equipment. It now appears that no such assets were ever held by Texoma. Also, although the agreement on the second half of the transaction was announced and draft documents were prepared, no agreements were actually executed by the parties. Therefore the Company is reporting all of the expenses incurred in connection with the transaction to date but cannot report that any assets were acquired or that the Company's acquisition of Texoma is completed (see Notes 5 and 7 to the financial statements). Management is working with Texoma to resolve this matter as quickly as possible and has reached a tentative settlement (see Note 9).

On March 31, 2008, management assigned the Company's working interests in three of the Texas properties, Weesatche / Goliad, Brookshire and Biamante, to OilPods. This assignment was made in connection with discussions with OilPods, our exclusive working interest marketing and sales partner, about changing our relationship. As a result of these discussions, management determined that the Company and its shareholders would be best served by severing existing relationship with OilPods and entering into a new agreement under which OilPods would own the working interest in certain properties directly, undertake the obligations to the working interest holders and hire us as the operator to develop and sustain production, all effective as of April 1, 2008. Final details of the operating agreement between OilPods and the Company and the assumption of responsibilities by OilPods are being negotiated and management expects to file the final agreements when they are executed.

ITEM 6 - EXHIBITS

<u>Exhibit No.</u>	<u>Description</u>
31.1	Certification of principal executive officer per Section 302 of the Sarbanes-Oxley Act Of 2002
31.2	Certification of principal financial officer per Section 302 of the Sarbanes-Oxley Act Of 2002
32.1	Certification of principal executive officer per Section 906 of the Sarbanes-Oxley Act of 2002
32.2	Certification of principal financial officer per Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
