7. Retirement and Postemployment Benefits

*Defined Benefit Plans*

Components of net pension costs were as follows:

(amounts in millions)	Three Months Ended		Nine Months Ended	
	2009	2008	2009	2008
Service costs	\$ 0.9	\$ 0.9	\$ 2.5	\$ 3.1

Edgar Filing: AMGEN INC - Form 424B3

Interest costs	3.2	3.1	9.5	8.2
Expected return on plan assets	(3.3)	(3.3)	(9.9)	(9.1)
Amortization of unrecognized prior service costs, net	0.2	0.2	0.6	0.5
Net pension costs	\$ 1.0	\$ 0.9	\$ 2.7	\$ 2.7

**Table of Contents**

The net postretirement healthcare costs recorded during the three months ended June 30, 2009 and 2008, were \$0.2 million and \$0.3 million, respectively. The net postretirement healthcare costs recorded during the nine months ended June 30, 2009 and 2008, were \$0.8 million and \$1.0 million, respectively.

During the quarter ended June 30, 2009, we made a discretionary contribution to our pension plan in the amount of \$7.8 million.

*Defined Contribution Plans*

For the three months ended June 30, 2009 and 2008, we recorded expenses related to our defined contribution plans in the amounts of \$1.3 million and \$1.1 million, respectively. For the nine months ended June 30, 2009 and 2008, we recorded expenses related to our defined contribution plans in the amounts of \$3.7 million and \$3.5 million, respectively.

8. **Income Taxes**

The effective tax rate for the three months ended June 30, 2009 and 2008, was 36.8% and 34.9%, respectively and 36.1% and 38.2%, for the nine months ended June 30, 2009 and 2008, respectively. The 1.9% increase in the quarterly effective tax rate was attributable to lower tax exempt interest income and higher state income tax rates based on recently filed returns. The decrease in the effective tax rates for the nine months period ended June 30, 2009, was primarily due to the non-deductible separation costs we incurred during the prior fiscal year.

The activity within our reserve for unrecognized tax benefits was as follows:

*(amounts in millions)*

Balance at September 30, 2008	\$	6.0
Additions for tax positions related to the current year		1.3
Additions for tax positions of prior years		
Reductions for tax positions of prior years		
Settlements		
Balance at June 30, 2009	\$	7.3
Other amount accrued at June 30, 2009 for interest and penalties	\$	1.5

9. **Income per Common Share**

The calculation of basic and diluted net income per common share and shares outstanding for the periods presented prior to April 1, 2008, is based on the number of shares outstanding at March 31, 2008 (plus unissued fully vested common shares). There is no dilutive impact from common stock equivalents for periods prior to April 1, 2008, as we had no dilutive equity awards outstanding. The dilutive effects of our time based restricted stock units and stock option awards are included in the computation of diluted net income per share in periods subsequent to March 31, 2008. At June 30, 2009, potential dilutive effects of these securities representing approximately 2.1 million common shares were excluded from the computation of income per common share as their effects were anti-dilutive. The dilutive effects of our performance based stock awards more fully described in Note 11 are included in the computation of diluted net income per share when the related performance criteria are met. At June 30, 2009, potential dilutive effects of these securities representing approximately 0.6 million common shares were excluded from the computation of income per common share as the related performance criteria had not been met, although they may be met in future periods. There is no significant difference in basic and diluted net income per share and average common shares outstanding as a result of dilutive equity awards for

the three month and nine month periods ended June 30, 2009 and 2008.

**Table of Contents**10. Shareholders Equity

During the nine months ended June 30, 2009, we paid cash dividends of \$34.2 million, purchased 0.7 million shares of our common stock for \$12.5 million, and issued 0.4 million shares of our common stock pursuant to our stock incentive plans.

11. Stock Based Compensation

We have stock based compensation plans (including the Stock Incentive Plan, the Board of Directors Deferred Compensation Plan, and the Executive Deferred Compensation Program) under which 4,785,436 common shares are registered and available for issuance. These programs are administered by our Board of Directors and its Compensation and Management Development Committee. As of June 30, 2009, options with respect to 2,245,276 shares were outstanding under these plans. In addition, a total of 883,723 RSUs and PBUs (both defined below) were outstanding, and a total of 277,221 common shares have been either issued or utilized under these plans as of June 30, 2009.

Compensation costs and the related income tax benefit charged against income (including the modification and acceleration charges recorded in connection with the separation during fiscal 2008 previously discussed in Note 6) were as follows:

<i>(amounts in millions)</i>	<b>Three Months Ended</b>		<b>Nine Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Stock based compensation costs	\$ 1.2	\$ 0.5	\$ 5.4	\$ 6.4
Income tax benefit	0.4	0.2	2.0	2.4
Stock based compensation costs, net-of-tax	\$ 0.8	\$ 0.3	\$ 3.4	\$ 4.0

*Stock Options*

The following table provides a summary of outstanding stock option awards:

	<b>Number of Shares</b>	<b>Weighted Average Exercise Price</b>
Outstanding at September 30, 2008	1,886,033	\$ 23.68
Granted	523,510	14.90
Exercised		
Forfeited	(13,671)	20.57
Expired	(150,596)	24.24
Outstanding at June 30, 2009	2,245,276	\$ 21.62
Exercisable at June 30, 2009	1,317,189	\$ 23.45

As of June 30, 2009, approximately \$2.3 million of unrecognized stock based compensation was associated with our unvested stock options expected to be recognized over a weighted average period of 1.8 years. This unrecognized compensation expense includes a reduction for our estimate of potential forfeitures. As of June 30, 2009, the average remaining life of the outstanding stock options was 6.5 years with an aggregate intrinsic value of \$0.8 million. As of June 30, 2009, the average remaining life of the exercisable stock options was 4.7 years with an aggregate intrinsic value of less than \$0.1 million.

**Table of Contents***Restricted Stock Units (RSUs) and Performance Based Restricted Stock Units (PBUs)*

The value of RSUs and PBUs in our common stock is the fair value at the date of grant. A summary of the unvested RSU and PBU activity presented below represents the maximum number of shares that could be earned or vested:

	<b>Maximum Number of Share Units</b>	<b>Weighted Average Grant Date Fair Value</b>
Unvested RSUs at September 30, 2008	137,708	\$ 22.96
Granted	46,592	18.66
Vested	(96,253)	19.88
Forfeited	(3,504)	22.35
Unvested RSUs at June 30, 2009	84,543	\$ 24.12
Unvested PBUs at September 30, 2008	16,755	\$ 27.97
Granted	587,038	14.89
Vested		
Forfeited	(6,894)	14.89
Unvested PBUs at June 30, 2009	596,899	\$ 15.26

As of June 30, 2009, approximately \$1.4 million and \$3.9 million of unrecognized stock based compensation was associated with our unvested RSUs and PBUs (based upon projected performance to date), respectively. These costs are expected to be recognized over a weighted average period of 3.5 years and 2.0 years, respectively. This unrecognized compensation expense includes a reduction for our estimate of potential forfeitures. As of June 30, 2009, the outstanding RSUs and PBUs had an aggregate intrinsic value of \$4.5 million and \$9.9 million, respectively.

Dividends payable in stock accrue on both RSUs and PBUs and are subject to the same specified terms as the original grants. As of June 30, 2009, a total of 18,161 stock units had accumulated on unvested RSUs and PBUs due to dividend reinvestments and are excluded from the tables above.

*Vested Deferred Stock*

Past stock based compensation programs, like the current RSU and PBU programs, allowed deferrals after vesting to be set-up as deferred stock. As of June 30, 2009, 184,120 of our shares had been deferred, fully vested and payable in our common stock under our stock based compensation programs and are excluded from the tables above.

**Table of Contents****12. Comprehensive Income and Accumulated Other Comprehensive Loss**

SFAS No. 130, *Reporting Comprehensive Income*, requires the net-of-tax effect of unrealized gains or losses on available-for-sale securities, foreign currency translation adjustments, changes in items not recognized as a component of net pension and postretirement healthcare costs, and unrealized gains or losses on derivative instruments to be included in comprehensive income.

The components of comprehensive income, each net of tax (corresponding to income tax rates from between 35% to 39%, excluding foreign currency translation adjustment), were as follows:

<i>(amounts in millions)</i>	<b>Three Months Ended</b>		<b>Nine Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Net income	\$ 25.4	\$ 26.7	\$ 79.7	\$ 74.0
Foreign currency translation adjustment	1.4	0.5	(1.4)	1.1
Changes in net unrealized gains on derivative instruments	(1.0)		(0.6)	0.1
Changes in net unrealized gains on available-for-sale securities	0.2	(1.0)	0.8	(1.0)
Changes in items not recognized as a component of net pension and postretirement healthcare cost	0.1	0.3	0.3	(5.4)
Comprehensive income	\$ 26.1	\$ 26.5	\$ 78.8	\$ 68.8

The components of accumulated other comprehensive loss, each net of tax (corresponding to income tax rates from between 35% to 39%, excluding cumulative foreign currency translation adjustment), were as follows:

<i>(amounts in millions)</i>	<b>June 30,</b>	<b>September 30,</b>
	<b>2009</b>	<b>2008</b>
Cumulative foreign currency translation adjustment	\$ (4.0)	\$ (2.6)
Net unrealized gain (loss) on derivative instruments	(0.3)	0.3
Net unrealized gain (loss) on available-for-sale securities	(0.8)	3.0
Items not recognized as a component of net pension and postretirement healthcare costs	(15.2)	(15.5)
Accumulated other comprehensive loss	\$ (20.3)	\$ (14.8)

**13. Investment Income (Loss) and Other**

The components of investment income (loss) and other were as follows:

<i>(amounts in millions)</i>	<b>Three Months Ended</b>		<b>Nine Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Interest income on cash and cash equivalents	\$ 0.1	\$ 0.5	\$ 0.2	\$ 0.6
Interest income on note receivable from Forethought	3.0	2.8	9.1	2.8
Interest income on ARS	0.1	0.5	0.8	0.5
Equity in net income (loss) of affiliates	(1.2)	0.4	(5.7)	0.4

Edgar Filing: AMGEN INC - Form 424B3

Foreign currency exchange income (loss)	0.1	0.1			(0.9)
Other, net	(0.2)	0.1	(0.2)		0.5
Investment income (loss) and other	\$ 1.9	\$ 4.4	\$ 4.2	\$	3.9

**Table of Contents**14. Commitments and ContingenciesAntitrust Litigation

Class certification hearings in the FCA Action and the Pioneer Valley Action were held before a Magistrate Judge in early December 2006. As explained in our previously filed Form 10-K for the fiscal year ended September 30, 2008, in 2005 the Funeral Consumers Alliance, Inc. ( FCA ) and a number of individual consumer casket purchasers filed a purported class action antitrust lawsuit on behalf of certain consumer purchasers of Batesville® caskets against the Company and its former parent company, Hillenbrand Industries, Inc., now Hill-Rom Holdings, Inc., and three national funeral home businesses (the FCA Action ). A similar purported antitrust class action lawsuit was later filed by Pioneer Valley Casket Co. and several so-called independent casket distributors on behalf of casket sellers who were unaffiliated with any licensed funeral home (the Pioneer Valley Action ). On November 24, 2008, the Magistrate Judge recommended that the plaintiffs motions for class certification in both cases be denied. On March 26, 2009, the District Judge adopted the memoranda and recommendations of the Magistrate Judge and denied class certification in both cases. On April 9, 2009, the plaintiffs in the FCA case filed a petition with the United States Court of Appeals for the Fifth Circuit for leave to file an appeal of the Court s order denying class certification. On June 19, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs petition. On July 9, 2009, the FCA plaintiffs filed a request for reconsideration of the denial of their petition. On July 29, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs motion for reconsideration and their alternative motion for leave to file a petition for rehearing en banc (by the all of the judges sitting on the Fifth Circuit Court of appeals.)

The Pioneer Valley plaintiffs did not appeal the District Court s order denying class certification, and on April 29, 2009, pursuant to a stipulation among the parties, the District Court dismissed the Pioneer Valley Action with prejudice (i.e., Pioneer Valley cannot appeal or otherwise reinstitute the case). Neither the Company nor Hill-Rom provided any payment or consideration for the plaintiffs to dismiss this case, other than agreeing to bear their own costs, rather than pursuing plaintiffs for costs.

Plaintiffs in the FCA Action generally seek monetary damages, trebling of any such damages that may be awarded, recovery of attorneys fees and costs, and injunctive relief. The plaintiffs in the FCA Action filed a report indicating that they are seeking damages ranging from approximately \$947.0 million to approximately \$1.46 billion before trebling on behalf of the purported class of consumers they seek to represent, based on approximately one million casket purchases by the purported class members.

Because Batesville continues to adhere to its long-standing policy of selling Batesville® caskets only to licensed funeral homes, a policy that it continues to believe is appropriate and lawful, if the case goes to trial the plaintiffs are likely to claim additional alleged damages for periods between their reports and the time of trial. At this point, it is not possible to estimate the amount of any additional alleged damage claims that they may make. The defendants are vigorously contesting both liability and the plaintiffs damages theories.

Despite the July 29, 2009 ruling, the FCA plaintiffs may continue to seek reversal of the Fifth Circuit s ruling by filing for an appeal with the United States Supreme Court or through other procedural avenues. Should the FCA plaintiffs succeed in their efforts to obtain a reversal of the District Court order denying class certification and a class is certified in the FCA Action filed against Hill-Rom and Batesville and if the plaintiffs prevail at trial, the damages awarded to the plaintiffs, which would be trebled as a matter of law, could have a significant material adverse effect on our results of operations, financial condition and/or liquidity. In antitrust actions such as the FCA Action the plaintiffs may elect to enforce any judgment against any or all of the codefendants, who have no statutory contribution rights against each other. As discussed in our previously filed Form 10-K, we and Hill-Rom have entered into a judgment sharing agreement that apportions the costs and any potential liabilities associated with this litigation between us and Hill-Rom.

If the FCA plaintiffs do not succeed in reversing the District Court's order denying class certification, they may, among other things, still seek to pursue their individual injunctive or damages claims. Their individual damages claims would be limited to the alleged overcharges on the plaintiffs' individual casket purchases (the complaint currently alleges a total of ten casket purchases by the individual plaintiffs), which would be trebled, plus reasonable attorneys fees and costs.

To date, we have incurred approximately \$22.3 million in legal and related costs associated with the FCA matter, of which \$2.1 million were incurred in the nine months ended June 30, 2009.

## **Table of Contents**

### *Other Pending Litigation Matter*

On August 17, 2007, a lawsuit styled Vertie Staples v. Batesville Casket Company, Inc. was filed against us in the United States District Court for the Eastern District of Arkansas. As amended, the case is a putative class action on behalf of the plaintiff and all others who purchased a Monoseal®, Monogard® or gasketed casket manufactured by Batesville from a licensed funeral home located in Arkansas from January 1, 1989 to August 31, 2002. The complaint alleges that the warranties on which the claims are predicated date from 1989 to 2002. The plaintiff claims that Monoseal®, Monogard® or gasketed caskets were marketed as completely resistant to the entrance of air and water when they allegedly were not completely resistant. The plaintiff asserts causes of action under the Arkansas Deceptive Trade Practices Act and for fraud, constructive fraud and breach of express and implied warranties. On January 9, 2008, the plaintiff filed an amended complaint that added another putative class plaintiff, restated the pending claims, and added a claim for unjust enrichment. The claims of the original plaintiff were subsequently dismissed by the Court and the case is now styled Garry Clayton v. Batesville Casket Company, Inc. In order to establish federal jurisdiction over the claims under the Class Action Fairness Act, the plaintiff alleges that the amount in controversy exceeds \$5.0 million.

On February 26, 2009, the plaintiff filed a Motion for Class Certification advancing arguments only with respect to Batesville's split-top gasketed caskets; thereby narrowing the scope of his claims and effectively dropping claims pertaining to Batesville's full top caskets. On August 10, 2009, the District Court denied class certification in the case. The plaintiffs may seek to appeal the class certification decision or may choose to pursue individual claims. Regardless, we believe the claims are without merit and will continue to vigorously defend the case. It is not unusual to have multiple copycat class actions suits filed after an initial filing, and it is possible that additional suits based on the same or similar allegations could be brought against us. One such suit, styled Robert Haught v. Batesville Casket Company, Inc., was filed on August 4, 2009, in the United States District Court for the Middle District of Florida. We have not yet been able to evaluate that case.

### *General*

We are involved on an ongoing basis in claims and lawsuits relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters. The ultimate outcome of these lawsuits cannot be predicted with certainty. An estimated loss from these contingencies is recognized when we believe it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. However, it is difficult to measure the actual loss that might be incurred related to litigation. The ultimate outcome of these lawsuits could have a material adverse effect on our financial condition, results of operations, and cash flow.

Legal fees associated with claims and lawsuits are generally expensed as incurred. Upon recognition of an estimated loss resulting from a settlement, an estimate of legal fees to complete the settlement is also included in the amount of the loss recognized.

We are also involved in other possible claims, including product and general liability, workers compensation, auto liability, and employment related matters. Claims other than employment and related matters have deductibles and self-insured retentions ranging from \$0.5 million to \$1.0 million per occurrence or per claim, depending upon the type of coverage and policy period. Outside insurance companies and third-party claims administrators establish individual claim reserves, and an independent outside actuary provides estimates of ultimate projected losses, including incurred but not reported claims, which are used to establish reserves for losses. Claim reserves for employment related matters are established based upon advice from internal and external counsel and historical settlement information for claims and related fees, when such amounts are considered probable of payment.

The recorded amounts represent our best estimate of the costs we will incur in relation to such exposures, but it is virtually certain that actual costs will differ from those estimates.

15. Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value.

The carrying amounts of current assets and liabilities approximate fair value because of the short maturity of those instruments.

The carrying amount of the private equity limited partnerships, included as a component of Investments within our consolidated balance sheet, was \$14.9 million at June 30, 2009. The fair value of equity method investments is not readily available.

The carrying amount of other equity investments, included as a component of Investments within our consolidated balance sheet, was \$3.6 million at June 30, 2009, and approximates fair value. The fair value was determined using present value or other techniques appropriate for a particular financial instrument. These techniques involve some degree of management judgment and as a result are not necessarily indicative of the amounts the Company would realize in a current market exchange.

**Table of Contents**

Auction rate securities and the related Put right are carried at estimated fair value. We estimate the fair value of derivative financial instruments based on the amount that we would receive or pay to terminate the agreements at the reporting date.

We estimate the fair value of the note receivable from Forethought based upon comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk adjusted for liquidity considerations. Based upon market data available to us, we estimate that the fair value of the note and accrued interest is approximately \$100 million based upon an estimated yield to maturity of approximately 16% as of June 30, 2009. This is approximately \$39 million below its carrying value at June 30, 2009. An increase or decrease of 1% in the discount rate utilized to estimate the fair value of the note (including interest receivable) would indicate a change in fair value of approximately \$6 million.

The fair value of our credit facility is estimated based on internally developed models, using current market interest rate data for similar issues as there is no active market for our debt. As of June 30, 2009, the fair value of our credit facility was estimated to be approximately \$73.3 million.

16. **Fair Value Measurements**

The Company adopted SFAS No. 157 effective October 1, 2008. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date. As permitted by FSP No. FAS 157-2, *Effective Date of FASB Statement No. 157*, we deferred the adoption of SFAS No. 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis (at least annually), until October 1, 2010. The full adoption of SFAS No. 157 is not expected to have a material effect on our consolidated financial statements.

The hierarchy of those valuation approaches is broken down into three levels based on the reliability of inputs as follows:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals or current market) and contractual prices for the underlying financial instrument, as well as other relevant economic measures.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Unobservable inputs shall reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

As of June 30, 2009, all significant assets or liabilities that are carried at fair value within our consolidated financial statements consist of ARS (\$47.9 million) and a related Put right (\$1.7 million), which are valued based upon Level 3 inputs, and derivative instruments (\$0.4 million) which are valued based upon Level 2 inputs. We have no other significant assets or liabilities that are carried at fair value within our financial statements (other than cash equivalents) as of June 30, 2009. In addition, we disclose in Note 15 the fair value of our note

receivable from Forethought, other equity investments, and credit facility, which are also based upon Level 3 inputs.

**Table of Contents**

While we continue to earn interest on the ARS at the contractual rate, these investments are not currently being bought and sold in an active market and therefore do not have a readily determinable market value. At June 30, 2009, the Company's investment advisors provided a valuation based on Level 3 inputs for the ARS. The investment advisors utilized a discounted cash flow approach (an *Income* approach) to arrive at this valuation, which was corroborated by separate and comparable discounted cash flow analysis prepared by us. The assumptions used in preparing the discounted cash flow model include estimates of, based on data available as of June 30, 2009, interest rates, timing and amount of cash flows, credit spread related yield and illiquidity premiums, and expected holding periods of the ARS. These assumptions are volatile and subject to change as the underlying sources of these assumptions and market conditions change. We valued the Put right based upon the difference between the par value and the fair value of ARS on a present value basis, as adjusted for any bearer risk associated with UBS's financial ability to repurchase the ARS beginning June 30, 2010. See the table in Note 4 for a reconciliation of the beginning to ending balances of these assets and the related change in the fair value of these assets from September 30, 2008 to June 30, 2009.

We estimate that the fair value of the note receivable from Forethought (and related interest receivable) has decreased from \$105 million at September 30, 2008 to \$100 million at June 30, 2009. This change was caused by two components. The estimated fair value increased by approximately \$10 million due to the natural decline in the period to maturity (closer to the collection date). This increase was more than offset by an increase of approximately 3% in the required yield to maturity (discount rate) observed in the marketplace on comparable debt instruments (adjusted for a liquidity premium).

**Table of Contents****Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Forward-Looking Statements and Factors That May Affect Future Results**

Throughout this Form 10-Q, we make a number of forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. As the words imply, forward-looking statements are statements about our future plans, objectives, beliefs, and expectations that might or might not happen in the future, as contrasted with historical information. Our forward-looking statements are based on assumptions that we believe are reasonable, but by their very nature they are subject to a wide range of risks.

Accordingly, in this Form 10-Q, we may say something like,

*We anticipate that the burial rate will be flat to slightly declining in future years.*

That is a forward-looking statement, as indicated by the word *anticipate* and by the clear meaning of the sentence.

Other words that could indicate we're making forward-looking statements include the following:

intend	believe	plan	expect	may	goal
become	pursue	estimate	will	forecast	continue
targeted	anticipate	promise	improve	progress	potential

This isn't an exhaustive list but is simply intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words, however, does not mean that the statement is not forward-looking.

**Here's the key point: Forward-looking statements are not guarantees of future performance, and our actual results could differ materially from those set forth in any forward-looking statements.** Any number of factors—many of which are beyond our control—could cause our performance to differ significantly from those described in the forward-looking statements.

For a discussion of factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading *Risk Factors* in Item 1A of our Form 10-K filed with the Securities and Exchange Commission (SEC) on December 9, 2008 and Part II, Item 1A of this Form 10-Q. We assume no obligation to update or revise any forward-looking statements.

**Overview**

In this section of the Form 10-Q, entitled *Management's Discussion and Analysis of Financial Condition and Results of Operations*, we attempt to give you a look at our Company through the eyes of management so that you can assess the financial condition and results of operations of our Company. The discussion that follows, when read in conjunction with *Management's Discussion and Analysis* included in our Form 10-K, should give you information that will help you understand our business and its performance. We intend for the discussion to be clear and to explain the drivers of our results so that you can assess the quality of our earnings and the predictability of our future results.

**Background, Death Care Industry Trends, and Strategy and Results**

Except as described below under *Recent Factors Impacting our Business*, there have been no significant long-term changes to this information during the nine month period ended June 30, 2009, as outlined in our previously filed Form 10-K for the fiscal year ended September 30, 2008.

**Table of Contents****Recent Factors Impacting our Business**

The first three quarters of this fiscal year have been very volatile. While our first quarter revenues were reasonably in line with our expectations (up 2.2% over the same period last year), our second quarter results saw a significant decrease in our revenues (down 10.8% over the same period last year). Although a much milder pneumonia and influenza season played a role in the second quarter decrease in the number of deaths, we now believe that increased cremation rates are playing a larger role in reducing casketed deaths based upon information we have been able to gather in the marketplace. This estimated increase in the cremation rate may be a result of how consumers and our customers are responding to recessionary pressures. It should be noted, however, that the volatile economic environment is creating a higher degree of uncertainty about our ability to accurately estimate the rate at which consumers are choosing cremations and the impact that cremations are having on the number of burials. We believe these factors increased competition for the remaining casket volume causing our competitors to become more aggressive in their pricing actions, particularly in lower priced areas of our product offering. This market assessment and these competitive dynamics appear consistent with the recent public reports from our competitors and customers. We took and continue to take actions to protect our market position, including additional sales promotions, readjustment of our production capacity, and the use of our lean business expertise.

During the third quarter our revenues decreased \$6.3 million, or 3.8%, over the same period last year. Despite the fact that the number of deaths is reported to be down over the same period last year, our responses to market conditions that developed during the second quarter appear to have successfully regained our market position. However, it is unclear whether the severity of the economic recession will have a long-term effect on the buying patterns of our customers or cremation rates. See our analysis of recent results of operations below for further discussion.

We experienced cost decreases for commodities used in manufacturing during the three months ended June 30, 2009, over the same period last year. These cost decreases were largely attributable to reduced prices paid for carbon and stainless steel. While these commodity prices have come down from their highs during fiscal 2008, during the nine months ended June 30, 2009 we experienced higher prices for commodities over the same period last year due to the timing of when the prices we pay went into effect. Although it is difficult to predict with certainty where these prices will go over time, based on commodity prices we experienced during the last quarter, we expect full year commodity costs to be flat over last fiscal year. In addition we expect the favorable effects from diesel fuel prices we have experienced throughout fiscal 2009 as compared to fiscal 2008 to continue in the near term. See our analysis of recent results of operations below for further discussion.

As previously reported, a self-styled consumer advocacy group, the Funeral Consumers Alliance, and several consumers who had purchased Batesville caskets had filed a consolidated purported class-action lawsuit against Batesville Casket Company, Hill-Rom Holdings, and three of Batesville's funeral home customers, alleging that the defendants violated antitrust laws. A related lawsuit was filed by four current and former independent casket retailers, alleging similar violations. On March 26, 2009, a United States District Judge in the Southern District of Texas (Houston), denied class certification in both lawsuits. After these rulings, the casket retailers dismissed their case with prejudice, while the Funeral Consumers Alliance plaintiffs filed a petition to appeal the ruling in their case. The Fifth Circuit's June 19, 2009 order denied that petition. On July 9, 2009, the FCA plaintiffs filed a request for reconsideration of the denial of their petition. On July 29, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs' motion for reconsideration and their alternative motion for leave to file a petition for rehearing en banc (by the all of the judges sitting on the Fifth Circuit Court of appeals.)

In addition to the above, Batesville Casket Company is involved in a case in Arkansas, Garry Clayton v. Batesville Casket Company, Inc., in which the plaintiffs are asserting a number of claims related to Batesville's warranties related to our gasketed caskets. The plaintiffs were seeking to have a state-wide class certified as to the claims. On August 10, 2009, the District Court denied class certification in that matter.

For a full discussion of these significant developments, see Note 14 to our consolidated financial statements included in Part I, Item 1 of this Form 10-Q.

During the three and nine months ended June 30, 2009, we recognized net losses of \$1.2 million and \$5.7 million from the limited partnership investments, respectively, that were transferred to us in connection with our separation from Hill-Rom last year. These losses resulted from decreases in the fair value of the investment portfolios of the partnerships. We believe their losses are being caused primarily by the current economic environment.

During the nine months ended June 30, 2009, our pension assets declined in value by 9.4%, from \$146.7 million to \$132.9 million (prior to our current year discretionary contribution). During the three months ended June 30, 2009, we made a discretionary contribution to our pension plans in the amount of \$7.8 million to improve our funding levels. This significantly reduced net cash provided by operating activities during this quarter.

**Table of Contents****Consolidated Results of Operations**

In this section, we provide an analysis of the significant items impacting our Company's results.  
***Three Months Ended June 30, 2009 Compared to Three Months Ended June 30, 2008***

<i>(amounts in millions)</i>	Three Months Ended June 30,	% of	Three Months Ended June 30,	% of
	2009	Revenues	2008	Revenues
Net revenues	\$ 158.7	100.0	\$ 165.0	100.0
Cost of goods sold	92.7	58.4	98.6	59.8
Gross profit	66.0	41.6	66.4	40.2
Operating expenses	27.3	17.2	28.3	17.2
Separation costs			0.1	
Operating profit	38.7	24.4	38.0	23.0
Interest expense	(0.3)	(0.2)	(1.4)	(0.8)
Investment income (loss) and other	1.9	1.2	4.4	2.7
Income before taxes	40.3	25.4	41.0	24.9
Income tax expense	14.9	9.4	14.3	8.7
Net income	\$ 25.4	16.0	\$ 26.7	16.2

**Revenue** Our net revenues for the quarter decreased \$6.3 million, or 3.8%, from the same period last year. Burial unit volume decreased 4.7% compared to the same period last year, and was the primary contributor to a reduction in revenue of \$9.0 million. As discussed earlier under "Recent Factors Impacting our Business", we believe this volume decrease was attributable to a lower number of reported deaths, increased cremation rates, and aggressive price competition. The continued unfavorable effect of downward product mix further reduced revenues \$4.9 million from the same period last year. Partially offsetting these effects, the Batesville brand continued to drive the favorable effects of price realization, which increased revenue by \$9.4 million over the same period last year. We expect to see continuing favorable price realization through the end of fiscal 2009, offset by continued downward product mix and volume declines over the same period last year. We cannot predict to what degree these factors will offset. Finally, we also experienced the unfavorable impact of currency fluctuations during the quarter from a stronger U.S. dollar, primarily compared to the Canadian dollar. This unfavorably impacted revenue by \$1.8 million over the same period last year. We cannot predict how currency rates will move either to help or hurt our results in the future.

**Cost of Goods Sold** Our cost of goods sold decreased \$5.9 million, or 6.0%, including a \$3.2 million decrease largely attributable to lower burial unit volume. In our manufacturing operations, we experienced cost decreases over the same period last year of \$1.5 million related primarily to lower commodity costs, most notably carbon and stainless steel. An increase of \$1.5 million in costs was attributable to other categories across our manufacturing activities. We also experienced a \$2.7 million decrease in our distribution operations of which \$1.9 million related to fuel costs. We are continuing to execute Continuous Improvement initiatives to further reduce our costs.

Operating Expenses Operating expenses decreased \$1.0 million, or 3.5%, excluding one-time separation costs. We are better able to analyze our operating cost structure without non-recurring effects of the separation. The primary drivers were a reduction to our legal fees of \$0.6 million related to the antitrust lawsuits and a decrease in sales compensation and benefits of \$0.8 million related to lower revenues. These reductions were offset by an increase of \$0.6 million related to personnel required to support our separate public company operations. An additional decrease of \$0.2 million was attributable to other components of our operating expense categories.

**Table of Contents**

**Separation Costs** In the third quarter we did not incur any significant costs associated with the separation of the Company from Hill-Rom.

**Interest Expense** The decrease in interest expense during the quarter as compared to the same period last year was driven by a decrease in the weighted average interest rate on the credit facility from 3.1% to 0.8% combined with a lower average principal balance.

**Investment Income (Loss) and Other** Investment income (loss) and other is down over the same period last year primarily due to increased losses from investments in affiliates (limited partnership investment) of \$1.6 million driven by write-downs within their investment portfolios. The volatility of the value of these portfolios is likely to be more pronounced given the recent economic environment and cannot be reasonably predicted.

**Income taxes** Our income tax rate for the last three months was 36.8%, which was 1.9% higher than the same period last year. This was primarily due to lower tax exempt interest income and higher state income tax rates based on recently filed returns.

**Nine Months Ended June 30, 2009 Compared to Nine Months Ended June 30, 2008**

<i>(amounts in millions)</i>	Nine Months Ended June 30,		Nine Months Ended June 30,	
	2009	% of Revenues	2008	% of Revenues
Net revenues	\$ 496.0	100.0	\$ 519.3	100.0
Cost of goods sold	285.9	57.6	302.8	58.3
Gross profit	210.1	42.4	216.5	41.7
Operating expenses	87.7	17.7	85.0	16.4
Separation costs	0.1		14.2	2.7
Operating profit	122.3	24.7	117.3	22.6
Interest expense	(1.8)	(0.4)	(1.4)	(0.3)
Investment income (loss) and other	4.2	0.9	3.9	0.8
Income before taxes	124.7	25.2	119.8	23.1
Income tax expense	45.0	9.1	45.8	8.9
Net income	\$ 79.7	16.1	\$ 74.0	14.2

**Revenue** Our net revenues for the past nine months decreased \$23.3 million, or 4.5%, from the same period last year. Burial unit volume decreased 6.6% over the same period. As discussed previously in our quarterly results, this was the primary contributor to a reduction in revenue of \$35.0 million, although improved volume on non-burial products slightly limited this impact. Additionally, the unfavorable effect of downward product mix reduced revenues \$10.9 million from the same period last year. Partially offsetting these effects, price realization increased revenue by \$29.6 million over the same period last year, helping us to recover commodity cost increases we experienced over the past year. The unfavorable impact of currency fluctuations resulted in decreased revenue of \$7.0 million over the same period last year.

*Cost of Goods Sold* Our cost of goods sold decreased \$16.9 million, or 5.6%, including an \$11.3 million decrease largely attributable to lower burial unit volume. In our manufacturing operations, we experienced cost increases over the same period last year of \$3.6 million related to higher commodity costs, most notably carbon steel. However, we expect the impact from higher commodity costs to decrease in the fourth quarter due to price declines on carbon and stainless steel. An aggregate decrease of \$2.7 million in costs was attributable to other categories across our manufacturing activities, primarily driven by healthcare and workers' compensation. In our distribution operations, our cost of fuel decreased approximately \$4.2 million and we experienced a \$2.3 million decrease in other categories, chiefly related to employee benefits.

**Table of Contents**

**Operating Expenses** Operating expenses increased \$2.7 million, or 3.2%, excluding one-time separation costs. We incurred \$11.5 million more of corporate costs during the past nine months compared to the same period last year. The increase for these costs was partially offset when, beginning with the third quarter of 2008, Hill-Rom ceased allocating corporate costs to us. As a result, these allocated costs decreased by \$7.4 million compared to last year. Additionally, last year we experienced a \$2.6 million benefit to our bad debt expense which was tied to a customer balance collection that had previously been nearly fully reserved (causing this year's expenses to be relatively higher). This increase was offset by a decrease in sales compensation and benefits of \$1.7 million tied to lower revenues and a decrease in legal fees related to anti-trust lawsuits of \$0.7 million. The remaining decrease of \$1.6 million was attributable to other components of our operating expense categories.

**Separation Costs** In the first nine months of the prior fiscal year, we incurred \$14.2 million in costs associated with the separation of the Company from Hill-Rom. These non-recurring costs include investment banking fees, legal, accounting, recruiting, and consulting fees. Also included are modification and acceleration charges related to stock based compensation.

**Interest Expense** We began to incur interest expense when we borrowed on our revolving credit facility (and paid the proceeds to Hill-Rom as part of the separation) at the end of the second quarter of fiscal 2008. This impact was reduced in the current year by lower weighted average interest rates.

**Investment Income (Loss) and Other** Although we began to realize returns from investments that were transferred to us on March 31, 2008, in connection with the separation, during the last nine months, losses from investments in affiliates (limited partnership investments) increased \$6.1 million compared to the same period last year due to write-downs within their investment portfolios. Conversely, we earned higher interest income of \$6.6 million, in aggregate, on the auction rate securities ( ARS ) and note receivable from Forethought Financial Group, Inc ( Forethought ) as compared to the prior year. As discussed in the notes to our consolidated financial statements in Part I, Item 1 of this Form 10-Q, we received a right (the Put ) from UBS Financial Services ( UBS ) that allows us to sell a portion of our existing ARS in the future. Since we received the Put, the fair value of the Put decreased by \$2.0 million which was offset by a corresponding increase in fair value of the related ARS by \$2.1 million. See *Other Liquidity Matters* included within Liquidity and Capital Resources for further discussion regarding our ARS investments.

**Income Taxes** Our income tax rate for the nine months ended June 30, 2009, was 36.1%, which was 2.1% lower than the same period last year. This was primarily due to the separation costs we incurred in the same period last year that were not deductible for income tax purposes.

**Liquidity and Capital Resources**

We believe the ability to generate cash is critical to the value of the Company. In this section, we tell you about our ability to generate and access cash to meet our business needs.

First, we will describe our actual results in generating and utilizing cash by comparing the first nine months to the same period last fiscal year. We will also talk about any significant trends we are seeing to help you understand how this could impact us going forward.

Second, we will tell you about how we see operating, investing, and financing cash flows being affected for the next 12 months. While it's not a certainty, we will tell you where we think the cash will come from and how we intend to use it. We will also talk about significant risks or possible changes to our thinking that could change our expectation.

Third, we will tell you about other significant matters that could affect our liquidity on an ongoing basis.

***Nine Months Ended June 30, 2009 Compared to Nine Months Ended June 30, 2008***

<i>(amounts in millions)</i>	<b>Nine Months Ended June 30,</b>	
	<b>2009</b>	<b>2008</b>
Net cash flows provided by (used in):		
Operating activities	\$ 84.9	\$ 90.8
Investing activities	(3.6)	(2.9)
Financing activities*	(66.8)	(66.8)

Effect of exchange rate changes on cash		(0.4)		
Increase in cash and cash equivalents	\$	14.1	\$	21.1

\* Also includes net cash and cash equivalents provided to our parent company prior to separation on March 31, 2008.

## **Table of Contents**

### **Operating Activities**

Historically, net cash flows from operating activities have represented our primary source of funds for the growth of our business. Prior to our separation from Hill-Rom, cash flows from operating activities were fairly stable, generally following the pattern of our overall net income. This pattern is now less correlated going forward as we incur non-cash related expenses (such as non-cash stock based compensation), non-cash earnings (such as interest income on our note receivable from Forethought), and make our own income tax payments. Interim periods can also be more volatile individually as they are affected to a greater degree by the seasonality of our revenues.

Our operating cash flow was \$5.9 million lower in total for the nine months ended June 30, 2009, as compared to same period last year. The noteworthy changes in its components were as follows:

We incurred \$14.1 million more of separation costs in the first nine months of last year compared to the same period this year, substantially all of which were paid by the end of that period. This reduced both our profitability and our operating cash flow in the same period last year.

Cash payments for income taxes increased \$10.4 million from the same period last year, including amounts paid to Hill-Rom to settle our pre-separation income tax obligations. This change was the result of the timing between when we had made these payments to Hill-Rom (prior to separation) and the timing of when we now make them directly to tax authorities as a separate company.

We made a \$7.8 million discretionary contribution to our pension plan in the first nine months of the current year that we did not make during the same period last year.

### **Investing Activities**

Historically, net cash flows used in investing activities consisted of purchases of plant, property, and equipment we use to run the business or to pay for a business acquisition. Our net investing activities in the nine months ended June 30, 2009, increased from the same period last year due primarily to increased capital expenditures of \$1.0 million.

### **Financing Activities**

During the last nine months, cash was utilized in financing the business, resulting primarily from our quarterly cash dividends of \$34.2 million. In addition, we elected to purchase 0.7 million shares of our common stock for \$12.5 million under our share repurchase program. We also borrowed \$40.0 million from our revolving credit facility to finance short term business needs. During this period, we repaid \$60.0 million on the facility, and through August 10, 2009, we repaid an additional \$20.0 million.

### ***12 Month Outlook***

#### **Operating activities**

We have no significant changes to report to the discussion included in our previously filed Form 10-K for the year ended September 30, 2008, except as follows:

During the nine months ended June 30, 2009, our pension assets declined in value by 9.4%, from \$146.7 million to \$132.9 million prior to a \$7.8 million discretionary contribution we made this quarter. Declines in plan asset values, if sustained, increase the likelihood that we will need to make additional contributions to fund our pension obligations in the future. Although not required, based upon our pension plans current funding levels at June 30, 2009, we anticipate making an additional discretionary contribution of \$7 million to \$9 million to our plans during fiscal 2010 in order to improve funding levels. These amounts could change depending on changes in plan asset values over the next 12 months. Any contributions we make will reduce our net cash flow from operations.

We will be entering into contract negotiations with United Steel Workers Local 9137, covering approximately 370 associates at our manufacturing plant in Manchester, Tennessee. Although we believe our relationship with our unionized associates is good, we have taken normal and customary precautions to protect our business should any potential breakdown in negotiations occur. Our current collective bargaining agreement with this union expires on August 30, 2009.

**Table of Contents**

As discussed in our most recent Form 10-K filed with the SEC on December 9, 2008, under Part I, Item 1A, Risk Factors and as it relates to a potential adverse outcome in the ongoing antitrust litigation in which we are a defendant and which could materially adversely affect our results of operations, financial position and liquidity, we disclosed that we anticipated our fiscal 2009 legal expenditures would be approximately \$19.0 million related to our defense in these two cases. Based on recent developments as discussed in more detail in Note 14 to our consolidated financial statements in Part 1, Item 1 of this report, we anticipate that those expenditures will now be less than \$7.0 million for fiscal 2009.

For information regarding the risks we face, see the discussion under Item 1A. Risk Factors in our Form 10-K for the year ended September 30, 2008.

**Investing activities**

We are continuing to move forward with our acquisition capabilities and strategy. As previously announced, we intend to utilize business acquisitions to increase the annual growth rate of our revenues and earnings. We are targeting approximately \$100 million to \$200 million (or greater, if the opportunity presents itself) in acquisitions through fiscal 2011, although any acquisition timetable depends on whether suitable opportunities are available. The timing or success of any acquisition effort cannot be predicted. We expect to fund future acquisitions primarily with cash on hand, cash flows from operations, and borrowings under our revolving credit facility.

We can be called upon by our private equity limited partnership investments to provide additional investment funds, the maximum amount being \$3.4 million in the aggregate.

**Financing activities**

In December 2008 we announced an increase in our quarterly dividend to \$0.185 per common share. We plan on paying cash dividends that will require about \$11.4 million each quarter based on our outstanding common stock at June 30, 2009. We may use additional cash generated by the business to pay down our revolving credit facility, depending on our working capital needs. As discussed under investing activities, we may utilize availability under the revolving credit facility to finance acquisitions. We may also continue purchasing additional shares of our common stock, depending on market conditions.

**Summary of 12 Month Outlook**

We believe that cash on hand, cash generated from operations, and cash available under our credit facility will be sufficient to fund operations, working capital needs, capital expenditure requirements, and financing obligations. However, it is important to understand that if a class is certified in any of the purported class action antitrust lawsuits filed against us, as described in Note 14 to our consolidated financial statements included in Part I, Item 1 of this Form 10-Q, and if the plaintiffs prevail at trial, potential damages awarded the plaintiffs could have a material adverse effect thereafter on our results of operations, financial condition, and liquidity and could exceed our capacity to raise sufficient cash to fund or post a bond to appeal such a judgment.

**Other Liquidity Matters**

At June 30, 2009, we held \$47.9 million in a portfolio of ARS (consisting of highly rated state and municipal bonds) recorded at fair value. We have estimated the current fair value of the portfolio using information provided by our investment advisors with expertise in valuing these securities, considering current liquidity limitations, interest rate risk, and the credit worthiness of the borrower, among other factors. The risk exists that the various valuation models utilized by our investment advisors will not reasonably predict the actual price necessary to attract interested buyers for these securities. As of June 30, 2009, the underlying securities in the portfolio consist of creditworthy borrowers with AAA or A3 debt ratings. Market conditions and auction failures have adversely impacted the liquidity of these securities. The continuing effect of these conditions has led us to conclude that an orderly conversion of the portfolio into cash will likely be beyond June 30, 2010 (although we expect the Put discussed further below to allow us to complete the liquidation of a portion of the ARS in July 2010.) Accordingly, we are classifying these securities as non-current. If current market conditions do not improve, or worsen, we may not be able to readily convert these securities to cash, and our earnings could suffer as a result. In November 2008 we received a Put from UBS that allows us to sell approximately \$28.6 million of our existing auction rate securities (carrying value at June 30, 2009) at par value (\$30.3 million at June 30, 2009) plus accrued interest. The Put has a carrying value based upon an estimated fair value of \$1.7 million as of June 30, 2009. We may exercise the Put at anytime during the period of

June 30, 2010, through July 2, 2012. Additionally, UBS may redeem these securities at par value plus accrued interest at any time prior to expiration at their discretion. We currently expect to utilize the Put to liquidate the applicable ARS position. We expect to classify this portion of our ARS portfolio as a component of working capital during the three months ended September 30, 2009.

**Table of Contents**

Although we are not scheduled to receive a payment under our note receivable (the Note) from Forethought over the next 12 months, we regularly evaluate the Note for impairment based upon collectability. If, based upon these evaluations, it is probable that the Note will not be paid in accordance with its terms, it is deemed impaired. Based upon information available to us regarding conditions existing on or prior to June 30, 2009, the Note is not impaired. We estimate the fair value of the Note based upon a comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk, adjusted for liquidity considerations. Although the Note is not impaired, we estimate that the fair value of the Note (and related interest receivable) has decreased from \$105 million at September 30, 2008, to \$100 million at June 30, 2009. This decrease in estimated fair value was caused by an increase in the required yield to maturity (discount rate) observed in the marketplace on comparable debt instruments (adjusted for a liquidity premium) partially offset by the natural decline in the period to maturity (closer to the collection date). The model used in estimating the fair value of the Note primarily utilizes market data and is not intended to imply that some or all of the future payments due under the Note will not be collected when due from Forethought.

**Off-Balance Sheet Arrangements**

We have no significant off-balance sheet arrangements.

**Contractual Obligations or Contingent Liabilities and Commitments**

There have been no significant changes to our contractual obligations or contingent liabilities and commitments during the nine months ended June 30, 2009, except as follows. During fiscal 2009, we entered into take-or-pay purchase commitments for certain commodities. These contracts run from January 2009 through December 2009 and require us to take delivery of approximately \$20.0 million in the related commodities during this time. Additionally, during the nine months ended June 30, 2009, our pension assets declined in value. Declines in plan asset values, if sustained, increase the likelihood we will need to make additional contributions to fund our pension obligations in the future. See our *12 Month Outlook* included within Liquidity and Capital Resources above for further discussion.

**Critical Accounting Policies**

In this section we tell you about accounting policies that inherently involve significant judgment on our part.

Our accounting policies require management to make significant estimates and assumptions using information available at the time the estimates are made. Such estimates and assumptions significantly affect various reported amounts of assets, liabilities, revenues and expenses. If future experience differs materially from these estimates and assumptions, our results of operations and financial condition could be affected. A detailed description of our accounting policies is included in the notes to our consolidated financial statements and the Critical Accounting Policies Section of Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Form 10-K.

The following has become an additional critical accounting policy related to significant activities or agreements since we last reported to you in our Form 10-K as follows:

**Performance Based Stock Compensation**

During the nine months ended June 30, 2009, we granted a substantial number of performance based restricted stock and units as described in the notes to our consolidated financial statements in Part I, Item 1 of this Form 10-Q. These awards vest when the performance criteria have been met rather than solely based upon continued employment. The actual performance of the Company is evaluated quarterly and the expense is adjusted according to the new projection. The value of an award is based upon the fair value of our common stock at the date of grant. In accordance with the Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*, we record the expense associated with these awards on a straight-line basis over the vesting period (generally three years) based upon an estimate of projected performance. As a result, depending on what level we achieve within the performance criteria, our operating expenses may become more volatile as we approach the final performance measurement date.

**Table of Contents****Investments**

We use the equity method of accounting for substantially all our private equity limited partnerships, with earnings or losses reported within the line item Investment income (loss) and other in our consolidated statements of income, including our portion of any unrealized gains or losses experienced by these affiliates. Earnings and carrying values for investments accounted for under the equity method are determined based upon financial statements provided by the investment companies.

**Recently Adopted Accounting Pronouncements**

In October 2008, the Financial Accounting Standards Board ( FASB ) issued FASB Staff Position ( FSP ) No. Financial Accounting Standard ( FAS ) 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*. The purpose of FSP No. FAS 157-3 was to clarify the application of Statement of Financial Accounting Standards ( SFAS ) No. 157, *Fair Value Measurements*, for a market that is not active. It also allows for the use of our internal assumptions about future cash flows with appropriately risk-adjusted discount rates when relevant observable market data does not exist. FSP No. FAS 157-3 did not change the objective of SFAS No. 157 which is to determine the price that would be received in an orderly transaction that is not a forced liquidation or distressed sale at the measurement date. FSP No. FAS 157-3 was effective upon issuance. Our adoption of FSP No. FAS 157-3 did not have a material effect on our financial position, results of operations, cash flows or disclosures.

In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Whether a Market is Not Active and a Transaction is Not Distressed*. FSP No. FAS 157-4 does not include any specific disclosure requirements, but provides additional guidance to highlight and expand on the factors that should be considered in estimating fair value when there has been a significant decrease in market activity for financial assets. This FSP is effective for interim and annual periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. We elected to early adopt FSP No. FAS 157-4 for the quarter ended March 31, 2009. This adoption did not have a material impact on our consolidated financial statements, although it may impact the determination of fair value of applicable instruments in future periods.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. This FSP amends the other-than-temporary guidance in U.S. GAAP for debt securities. The FSP changes the method for determining whether an other-than-temporary impairment exists for debt securities and the amount of the impairment charge to be recorded in earnings. Additionally, this FSP expands and increases the disclosure requirements about other-than-temporary impairments to include: a) the cost basis of available-for-sale and held-to-maturity debt securities by major security type, b) the methodology and key inputs used to measure the portion of an other-than-temporary impairment related to credit losses by major security type and c) a schedule of activity of amounts recognized in earnings for debt securities for which an other-than-temporary impairment has been recognized and the noncredit portion of the other-than-temporary impairment recognized in other comprehensive income. We elected to early adopt FSP No. FAS 115-2 and FAS 124-2 for the quarter ended March 31, 2009. This adoption did not have a material impact on our consolidated financial statements, although it may impact the amount of other-than-temporary impairments, if any, recorded in a future period.

In April 2009, the FASB issued FSP No. FAS 107, *Interim Disclosures about Fair Value of Financial Instruments*, amending FAS 107, *Disclosures about Fair Value of Financial Instruments* and requires public companies to disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments, in both interim and annual financial statements. This FSP is effective for all interim and annual periods ending after June 15, 2009. We elected to early adopt FSP No. FAS 107 for the quarter ended March 31, 2009.

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events*. SFAS No. 165 establishes general standards of accounting for, and disclosure of, events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, this statement sets forth: (1) the period after the balance sheet date during which management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (2) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and (3) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS No. 165 is effective for the interim or annual financial periods ending after June 15, 2009. Further, in connection with preparation of the

consolidated financial statements and in accordance with this guidance, management completed its evaluation of subsequent events through August 10, 2009.

**Table of Contents****Recently Issued Accounting Pronouncements**

In April 2008, the FASB issued FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*. This statement applies to recognized intangible assets that are accounted for pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets*. FSP No. FAS 142-3 requires an entity to consider its own historical renewal or extension experience in developing renewal or extension assumptions used in determining the useful life of a recognized intangible asset. In the absence of entity specific experience, FSP No. FAS 142-3 requires an entity to consider assumptions that a marketplace participant would use about renewal or extension that are consistent with the highest and best use of the asset by a marketplace participant. The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset. FSP No. FAS 142-3 applies prospectively to all intangible assets newly acquired during fiscal years beginning after December 15, 2008, our fiscal year ended September 30, 2010, and interim periods within those fiscal years; early adoption is prohibited. Additional disclosures are required for all capitalized intangible assets as of the effective date. We do not anticipate that the adoption of FSP No. FAS 142-3 on October 1, 2009 will have a significant impact on our consolidated financial statements, although it may impact the determination of the useful life of intangible assets acquired after September 30, 2009.

In December 2008, the FASB issued FSP No. FAS 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, which provides guidance on employers' disclosures about the plan assets of defined benefit plans, pensions or other postretirement plans. The disclosures required by FSP No. FAS 132(R)-1 include a description of how investment allocation decisions are made, major categories of plan assets, valuation techniques used to measure fair value of plan assets, the impact of measurements using significant unobservable inputs and concentrations of risks within plan assets. The disclosures required by this staff position are effective for fiscal years ending after December 15, 2009, our fiscal 2010, with earlier application permitted. We are currently evaluating the impact of adoption of FSP No. FAS 132(R)-1, but do not anticipate that the adoption of FSP No. FAS 132(R)-1 will have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination that Arise from Contingencies*. FSP No. 141(R)-1 addresses the initial recognition, measurement and subsequent accounting for assets and liabilities arising from contingencies in a business combination, and requires that assets acquired or liabilities assumed be initially measured at fair value at the acquisition date. When fair value cannot be determined, the FSP requires using the guidance under SFAS No. 5, *Accounting for Contingencies*, and FASB interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*. The disclosures required by this FSP are effective for fiscal years ending after December 15, 2008. We will adopt this FSP in connection with our adoption of SFAS No. 141(R) on October 1, 2009, as outlined in our previously filed Form 10-K.

In June 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, completing its accounting standards codification (the Codification) as the single source of authoritative U.S. accounting and reporting standards applicable for all non-governmental entities, with the exception of the SEC and its staff. The Codification, which changes the referencing of financial standards, is effective for interim or annual financial periods ending after September 15, 2009. Therefore in our financial statements to be filed on Form 10-K for the year ended September 30, 2009, all references made to U.S. GAAP will use the new Codification numbering system prescribed by the FASB. As the Codification is not intended to change or alter existing U.S. GAAP, it will not have any impact on our consolidated financial statements.

**Table of Contents****Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS**

In this section, we tell you about market risks we think could have a significant impact on our bottom line or the financial strength of our company. Market risks here generally mean how results of operations and the value of assets and liabilities could be affected by market factors such as interest rates, currency exchange rates, and the value of commodities. If those factors change significantly, it could help or hurt our bottom line, depending on how we react to them.

Other than as described below, there have been no significant changes to this information during the nine months ended June 30, 2009, as outlined in our Form 10-K for the year ended September 30, 2008.

In November 2008, we received an enforceable, non-transferable right (the Put) from UBS Financial Services (UBS) that allows us to sell a portion of our existing auction rate securities (ARS) in the future. Concurrently, in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity*, we have elected to reclassify the ARS related to the Put from available-for-sale to trading securities. Please see the notes to our consolidated financial statements in Part I, Item 1 for important information regarding the Put and related ARS.

We have an outstanding note receivable (the Note) and related interest receivable from Forethought Financial Group, Inc. (Forethought) with an aggregate carrying value of \$139.5 million as of June 30, 2009. Should Forethought underperform to an extent that it cannot meet its financial obligations, our earnings could be negatively impacted, resulting in a material adverse impact on our financial condition and results of operations. We currently do not expect this to be the case. We estimate the fair value of the note receivable from Forethought based upon comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk adjusted for liquidity considerations. Based upon market data available to us, we estimate that the fair value of the note and accrued interest is approximately \$100 million based upon an estimated yield to maturity of approximately 16% as of June 30, 2009. This is approximately \$39 million below its carrying value at June 30, 2009. An increase or decrease of 1% in the discount rate utilized to estimate the fair value of the note (including interest receivable) would indicate a change in fair value of approximately \$6 million.

**Item 4T. CONTROLS AND PROCEDURES**

Our management, with the participation of our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer (the Certifying Officers), has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based upon that evaluation, the Certifying Officers concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report for the information required to be disclosed in the reports we file or submit under the Exchange Act to be recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure. There were no changes in our internal control over financial reporting during the three months ended June 30, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****PART II OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

Our material legal proceedings are described in detail in Note 14 to our consolidated financial statements in Part I, Item 1 of this report. You should read that note carefully to understand the background and current status of those matters.

**Batesville Antitrust Litigation**

As indicated in Note 14 to our consolidated financial statements, on June 19, 2009, United States Court of Appeals for the Fifth Circuit denied the plaintiffs' petition to appeal a federal district court order that denied plaintiffs' motion for class certification in the previously disclosed antitrust lawsuit. On July 9, 2009, the FCA plaintiffs filed a request for reconsideration of the denial of their petition. On July 29, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs' motion for reconsideration and their alternative motion for leave to file a petition for rehearing en banc (by the all of the judges sitting on the Fifth Circuit Court of appeals.)

In addition to the above, Batesville Casket Company is involved in a case in Arkansas, Garry Clayton v. Batesville Casket Company, Inc., in which the plaintiffs are asserting a number of claims related to Batesville's warranties related to our gasketed caskets. The plaintiffs were seeking to have a state-wide class certified as to the claims. On August 10, 2009, the District Court denied class certification in that matter.

For a full discussion of these matters, see Note 14 to our consolidated financial statements.

**Item 1A. RISK FACTORS**

For information regarding the risks we face, see the discussion under Item 1A. Risk Factors in our Form 10-K for the year ended September 30, 2008. Other than the matter related to Pioneer Valley Casket Co discussed in Note 14 to our consolidated financial statements in Part I, Item 1 of this report, there have been no material changes to the risk factors described in that report.

**Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

There were no unregistered sales of equity securities in the nine months ended June 30, 2009.

**ISSUER PURCHASES OF EQUITY SECURITIES**

<b>Period</b>	<b>Total Number of Shares Purchased</b>	<b>Average Price Paid Per Share*</b>	<b>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs**</b>	<b>Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs</b>
April 2009		\$		\$ 81,250,009
May 2009				81,250,009
June 2009				81,250,009
<b>Total</b>		\$		\$ 81,250,009

\* Includes commissions paid.

\*\* On July 24, 2008, our Board

of Directors approved the repurchase of \$100 million of common stock. As of June 30, 2009, we had repurchased approximately 1.0 million shares for \$18.7 million. The stock repurchase approval has no expiration date, and there was no termination or expiration of the stock repurchase plan during the quarter ended June 30, 2009.

**Item 6. EXHIBITS**

The exhibits filed with this report are listed on the Exhibit Index, which is incorporated herein by reference.

In reviewing any agreements included as exhibits to this report, please remember that they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about us or the other parties to the agreements. The agreements may contain representations and warranties by the parties to the agreements, including us. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

may have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;

may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and

were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time.
