Statement on results of the 2011 EBA EU-wide stress test

Barclays PLC notes the publication of the stress test outcomes for European banks by the European Banking Authority ("EBA") today. In summary and under EBA assumptions:

- The EBA-defined stressed Core Tier 1 capital ("CT1") ratio is 7.3%. This is significantly above the 5% minimum level set by the EBA.
  - The EBA methodology assumes zero capital value for Barclays investment in BlackRock. Without this deduction Barclays stressed CT1 ratio would be close to 8%.
  - Throughout the stressed period Barclays remains profitable and its capital resources increase.
  - RWAs are assumed to increase by about £150bn resulting in the reduced CT1 ratio.

Outcome of the modelled stressed scenario at 31 December 2012

2010 Basel-defined CT1 ratio	10.8%
2010 EBA-defined CT1 ratio	10.0%
EBA Stress Test Results	
2 year cumulative operating profit	£ 14,968m
2 year cumulative banking book impairment	£ (11,018m)
EBA-calculated risk weighted assets ("RWAs")	£567,454m
Resulting EBA stressed CT1 ratio	7.3%

Barclays regularly conducts stress tests, for internal purposes and for the FSA. The results consistently demonstrate that Barclays has capital in excess of all regulatory requirements.

Notes:

- The stress test was carried out based on the EBA common methodology and key common assumptions (e.g. constant balance sheet, uniform treatment of securitisation exposures) as published in the EBA Methodological Note and is intended by the EBA to provide a what-if analysis aimed at supporting the supervisory assessment of the adequacy of capital of European banks. Therefore, the information relative to the baseline scenarios is provided only for comparison purposes. Neither the baseline scenario nor the adverse scenario should in any way be construed as a Barclays forecast or directly compared to other information prepared by Barclays.
- More details on the scenarios, assumptions and methodology are available from the EBA website: http://eba.europe.eu/EU-wide-stress-testing/2011.aspx
- The EBA stress test methodology makes no allowance for management actions regarding portfolio composition over time or cost reductions to mitigate the modelled stresses. The full summary of EBA stress test results, attached in the Appendix to this announcement, provides further details of the impact of these stresses on Barclays. A GBP-denominated spreadsheet is available via the Investor Relations website: http://group.barclays.com/Investor-Relations/Investor-news/Regulatory-announcements
- Barclays expects to announce its Interim Results for the 6 months to the end of June 2011 on 2 August 2011.
- Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management with an extensive international presence in Europe, the Americas, Africa and Asia. With over 300 years of history and expertise in banking, Barclays operates in over 50 countries and employs over 147,000 people. Barclays moves, lends, invests and protects money for over 48 million customers and clients worldwide. For further information about Barclays, please visit our website www.barclays.com. Neither the content of the Barclays website nor any website accessible by hyperlinks on the Barclays website is incorporated in, or forms any part of, this announcement

Appendix

Results of the 2011 EBA EU-wide stress test: Summary (1-3)

Name of the bank: Barclays

Actual results at 31 December 2010	million EUR, %
Operating profit before impairments	13,243
Impairment losses on financial and non-financial assets in the banking book	-6,571
Risk weighted assets (4)	461,107
Core Tier 1 capital (4)	46,232
Core Tier 1 capital ratio, % (4)	10.0%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark	0

Outcomes of the adverse scenario at 31 December 2012, excluding all mitigating actions taken in 2011	%
Core Tier 1 Capital ratio	7.3%

Outcomes of the adverse scenario at 31 December 2012, including recognised mitigating measures as of 30 April 2011		million EUR, %
2 yr cumulative operating profit before impairments		17,340
of which 2 yr cumulative losses from the stress in the trading book	-6,137	
of which valuation losses due to sovereign shock	-752	
2 yr cumulative impairment losses on financial and non-financial assets in the banking book		-12,764
Risk weighted assets		657,378
Core Tier 1 Capital		48,039
Core Tier 1 Capital ratio (%)		7.3%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark		0

Effects from the recognised mitigating measures put in place until 30 April 2011 (5)	
Equity raisings announced and fully committed between 31 December 2010 and 30 April 2011 (CT1 million EUR)	
Effect of government support publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	

Additional taken or planned mitigating measures	percentage points contributing to capital ratio
Use of provisions and/or other reserves (including release of countercyclical provisions)	
Divestments and other management actions taken by 30 April 2011	
Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules	
Future planned issuances of common equity instruments (private issuances)	
Future planned government subscriptions of capital instruments (including hybrids)	
Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities	
Supervisory recognised capital ratio after all current and future mitigating actions as of 31 December 2012, % (6)	7.3%

Notes

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet

assumption and incorporates regulatory transitional floors, where binding (see http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Full static balance sheet assumption excluding any mitigating management actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures and capital raisings fully paid in before 31 December 2010 are included).

(5) Effects of capital raisings, government support and mandatory restructuring plans publicly announced and fully committed in period from 31 December 2010 to 30 April 2011, which are incorporated in the Core Tier 1 capital ratio reported as the outcome of the stress test.

(6) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital (1-4)

Name of the bank: Barclays

All in million EUR, or %

A. Results of the stress test based on the full static balance sheet assumption without any mitigating actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures fully paid in before 31 December 2010 are included)

All effects as compared to regulatory aggregates as reported in Section C	Baseline scenario		Adverse scenario	
	2011	2012	2011	2012
A) Use of provisions and/or other reserves (including release of countercyclical provisions), capital ratio effect (6)				
B) Divestments and other management actions taken by 30 April 2011, RWA effect (+/-)				
B1) Divestments and other business decisions taken by 30 April 2011, capital ratio effect (+/-)				
C) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules, RWA effect (+/-)				

C1) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules, capital ratio effect (+/-)				
D) Future planned issuances of common equity instruments (private issuances), capital ratio effect				
E) Future planned government subscriptions of capital instruments (including hybrids), capital ratio effect				
F) Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities, RWA effect (+/-)				
F1) Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities, capital ratio effect (+/-)				
Risk weighted assets after other mitigating measures (B+C+F)	527,522	541,911	595,739	657,378
Capital after other mitigating measures (A+B1+C1+D+E+F1)	49,141	54,148	46,101	48,039
Supervisory recognised capital ratio (%)(15)	9.3%	10.0%	7.7%	7.3%

Notes and definitions

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption (see http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Regulatory transitional floors are applied where binding. RWA for credit risk have been calculated in accordance with the EBA methodology assuming an additional floor imposed at a level of RWA, before regulatory transitional floors, for December 2010 for both IRB and STA portfolios.

(5) Banks are required to provide explanations of what "Other operating income" and "Other income" constitutes for.
Composition of "Other operating income" and "Other income":
Other operating income: Net fee and commission income, net investment income
Other income: Share of post-tax results of associates and joint ventures, profit on disposals and gain on acquisitions (2010 only)

(6) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported

in Section D as other mitigating measures.
(7) Net profit includes profit attributable to minority interests.
(8) Deferred tax assets as referred to in paragraph 69 of BCBS publication dated December 2010 : "Basel 3 - a global regulatory framework for more resilient banks and banking systems".
(9) Stock of provisions includes collective and specific provisions as well as countercyclical provisions, in the jurisdictions, where required by the national legislation.
(10) Provisions for non-defaulted exposures to sovereigns and financial institutions have been computed taking into account benchmark risk parameters (PDs and LGDs) provided by the EBA and referring to external credit ratings and assuming hypothetical scenario of rating agency downgrades of sovereigns.
(11) For definition of commercial real estate please refer to footnote (5) in the worksheet "4 - EADs".
(12) Coverage ratio = stock of provisions on defaulted assets / stock of defaulted assets expressed in EAD for the specific portfolio.
(13) Loss rate = total impairment flow (specific and collective impairment flow) for a year / total EAD for the specific portfolio (including defaulted and non-defaulted assets but excluding securitisation and counterparty credit risk exposures).
(14) All elements are be reported net of tax effects.
(15) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

Notes and
definitions
(1) The order of the measures
follows the order of mitigating
measures reported in the Section D
of the worksheet "1 - Aggregate
information".
(2) All
elements are be
reported net of
tax effects.
(3) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure
2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whe
under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D of the worksheet "1-
Aggregate information" as other mitigating measures and explained in this worksheet.
(4) If dated
please insert the
maturity date
(dd/mm/yy)
otherwise
specify
undated.

Results of the 2011 EBA EU-wide stress test: Credit risk
exposures (EAD - exposure at default), as of 31
December 2010, mln EUR, (1-5)

Notes and definitions

(1) EAD - Exposure at Default or exposure value in the meaning of the CRD.

(2) The EAD reported here are based on the methodologies and portfolio breakdowns used in the 2011 EU-wide stress test, and hence may differ from the EAD reported by banks in their Pillar 3 disclosures, which can vary based on national regulation. For example, this would affect breakdown of EAD for real estate exposures and SME exposures.

(3) Breakdown by country and macro area (e.g. Asia) when EAD >=5%. In any case coverage 100% of total EAD should be ensured (if exact mapping of some exposures to geographies is not possible, they should be allocated to the group "others").

(4) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm

(5) Residential real estate property which is or will be occupied or let by the owner, or the beneficial owner in the case of personal investment companies, and commercial real estate property, that is, offices and other commercial premises, which are recognised as eligible collateral in the meaning of the CRD, with the following criteria, which need to be met:

(a) the value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro economic factors affect both the value of the property and the performance of the borrower; and

(b) the risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.
(6) Loan to value ratio - ratio of EAD to the market value of real estate used as collateral for such exposures. Given the different methodologies applied to assessing the value, the bank is required to explain the computation of the ratio. In particular (a) whether collateral values is marked-to-market or any other valuation method is used, (b) whether the amount has been adjusted for principal repayments, and (c) how guarantees other than the underlying property are treated.

Definition of Loan to Value ratio used:
Residential Mortgages: Defined as the amount borrowed secured by residential property as a percentage of the appraised value.
Commercial Real Estate: Based on internal management estimates, defined as the ratio of nominal loan balance secured by commercial property to the appraised value of the property.
(7) Total exposures is the total EAD according to the CRD definition based on which the bank computes RWA for credit risk. Total exposures, in addition to the exposures broken down by regulatory portfolios in this table, include EAD for securitisation transactions, counterparty credit risk, sovereigns, guaranteed by sovereigns, public sector entities and central banks.

Results of the 2011 EBA EU-wide stress test: Exposures to sovereigns (central and local governments), as of 31 December 2010, mln EUR (1,2)
