FOR IMMEDIATE RELEASE

Alvarion and ArrayComm to Deliver Best of Breed Advanced Antenna Technology

Joint Offer to Leverage ArrayComm's Advanced Multi-antenna Signal Processing and Alvarion's Industry-leading WiMAX Platform in 4Motion Mobile WiMAX Solution

TEL AVIV, ISRAEL and SAN JOSE, CALIFORNIA — Alvarion Ltd. (NASDAQ: ALVR) and ArrayComm LLC, announced today their ongoing technology partnership for integration of ArrayComm's multi-antenna signal processing software (A-MAS™) into Alvarion's 4Motion's Radio Access Network Solutions.

Alvarion is the world's leading provider of WiMAX and wireless broadband solutions. Its all-IP OPENWiMAX ecosystem opens the door to complete, best-of-breed networks that optimize all elements of a WiMAX network – from core equipment and service offerings to end-devices and even the end-user's experience.

Alvarion's WiMAX platform will leverage ArrayComm's A-MAS™ Advanced Multi-Antenna software in order to offer 2 to 4 times more coverage and spectral efficiency than the WiMAX Forum's™ baseline profiles, through a unique combination of Beamforming, MIMO and adaptive interference cancellation, while maintaining full profile and standards compliance.

“ArrayComm's MAS technology significantly improves the economics of WiMAX systems, increasing the range and data throughput per base station,” said Tzvika Friedman, President and CEO of Alvarion. “The relationship between the two companies will benefit operators worldwide with solutions that use ArrayComm's unique A-MAS software and our WiMAX radio access network (RAN).”

“Alvarion's clear leadership and momentum in WiMAX deployments across the globe creates a significant opportunity for both of companies,” said Steve Sifferman, President of ArrayComm, “and Alvarion's OPEN WiMAX approach has made the integration of our A-MAS software very straightforward.”

About Alvarion

With more than 3 million units deployed in 150 countries, Alvarion (www.alvarion.com) is the world's leading provider of innovative wireless broadband network solutions enabling Personal Broadband to improve lifestyles and productivity with portable and mobile data, VoIP, video and other services.

Alvarion is leading the market to Open WiMAX solutions with the most extensive deployments and proven product portfolio in the industry covering the full range of frequency bands with both fixed and mobile solutions. Alvarion's products enable the delivery of personal mobile broadband, business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications, and mobile voice and data.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for over 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, the Company's prominent work in the WiMAX Forum is focused on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to Open WiMAX solutions.

About ArrayComm

ArrayComm LLC, a Ygomi company, is the leader in multi-antenna signal processing (MAS) software for wireless systems. ArrayComm's A-MAS™ software improves network economics and user experiences through gains in coverage, client data rates, and capacity for all wireless communications protocols, in base station, client device, or MIMO architectures. A-MAS implementations include W-CDMA, HSDPA, WiMAX, PHS, GSM, and HC-SDMA networks and are operating in more than 300,000 commercial deployments today. For wireless equipment manufacturers, tapping ArrayComm's unmatched experience in MAS applications enables significant performance and time-to-market advantages while reducing development cost and technical risk.
