Notes to Schedule of Investments (amounts in thousands, except number of contracts):

- (a) Variable rate security.
- (b) As of October 31, 2005, portfolio securities with an aggregate market value of \$10,628 were valued with reference to securities whose prices are more readily obtainable.
- (c) Securities are grouped by coupon or range of coupons and represent a range of maturities.
- (d) The average amount of borrowings outstanding during the nine-months ended October 31, 2005 was \$33,995 at a weighted average interest rate of 4.65 %. On October 31, 2005, securities valued at \$73,338 were pledged as collateral for reverse repurchase agreements. The Fund is authorized to borrow funds and utilize leverage in amounts not exceeding thirty-three and one-third percent of its total assets. The Fund's ability to leverage creates an opportunity for increased net income, but at the same time poses special risks. If the income from the securities purchased with borrowed funds is not sufficient to cover the cost of borrowing, the net income of the Fund will be less than if borrowing had not been used, reducing the amount available for distribution to shareholders.
- (e) Securities with an aggregate market value of \$996 have been pledged as collateral for swap contracts on October 31, 2005.
- (f) Securities with an aggregate market value of \$1,120 have been segregated with the custodian to cover margin requirements for the following open futures contracts on October 31, 2005:

Description	Type	Expiration Month	# of Contracts	Unrealized Appreciation
U.S. Treasury 10-Year Note Futures	Short	12/2005	314	\$ 909
