Edgar Filing: CHURCH & DWIGHT CO INC /DE/ - Form 10-K

	<b>Name of each exchange on which registered</b>
Common Stock, \$1 par value	New York Stock Exchange
Preferred Stock Purchase Rights	New York Stock Exchange

**Securities registered pursuant to Section 12(g) of the Act:** None

---

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicated by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the voting and non-voting common equity held by non-affiliates as of June 30, 2006 (the last business day of the registrant's most recently completed second fiscal quarter) was approximately \$2.0 billion. For purposes of making this calculation only, the registrant included all directors, executive officers and beneficial owners of more than ten percent of the Common Stock of the Company as affiliates. The aggregate market value is based on the closing price of such stock on the New York Stock Exchange on June 30, 2006.

As of February 22, 2007, 65,602,111 shares of Common Stock were outstanding.

#### **Documents Incorporated by Reference**

Certain provisions of the registrant's definitive proxy statement to be filed not later than April 30, 2007 are incorporated by reference in Items 10 through 14 of Item III of this Annual Report on Form 10-K.

**CAUTIONARY NOTE ON FORWARD-LOOKING INFORMATION**

This Annual Report contains forward-looking statements relating among others, to short- and long-term financial objectives, sales and earnings growth, margin improvement, marketing spending, capital expenditures, pricing changes in certain of the Company's products and the timing of benefits from such pricing changes, new product introductions, the effect of the acquisition of substantially all of the net assets of Orange Glo International, Inc. and its integration with the Company, earnings per share and the adoption of certain accounting principles and the anticipated effect of such principles on earnings per share. These statements represent the intentions, plans, expectations and beliefs of the Company, and are subject to risk, uncertainties and other factors, many of which are outside the Company's control and could cause actual results to differ materially from such forward-looking statements. The uncertainties include assumptions as to market growth and consumer demand (including the effect of political and economic events on consumer demand), raw material and energy prices, the financial condition of major customers, unanticipated delays in the transition of the Orange Glo business and increased marketing spending. With regard to the new product introductions referred to in this report, there is particular uncertainty relating to trade, competitive and consumer reactions. Other factors, which could materially affect the results, include the outcome of contingencies, including litigation, pending regulatory proceedings, environmental remediation and the divestiture of assets.

The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our filings with the U.S. Securities and Exchange Commission.

**PART I**

**ITEM 1. BUSINESS**

**GENERAL; RECENT DEVELOPMENTS**

The Company, founded in 1846, develops, manufactures and markets a broad range of household, personal care and specialty products under well-recognized brand names, including ARM & HAMMER and TROJAN. The Company's business is divided into three primary segments, Consumer Domestic, Consumer International and Specialty Products. The Consumer Domestic segment includes household products for deodorizing and cleaning, such as ARM & HAMMER baking soda and cat litter and SCRUB FREE and BRILLO cleaning products; and laundry products, such as XTRA and ARM & HAMMER laundry detergents, OXICLEAN pre-wash laundry additive and XTRA NICE N FLUFFY fabric softeners. This segment also includes personal care products, such as TROJAN condoms, NAIR depilatories, FIRST RESPONSE and ANSWER home pregnancy and ovulation test kits, ARRID antiperspirant, ARM & HAMMER, MENTADENT, CLOSE-UP, PEPSODENT and AIM toothpastes and SPINBRUSH battery-operated toothbrushes. The Consumer International segment primarily sells a variety of personal care products, some of which use the same brands as our domestic product lines, in international markets, including France, the United Kingdom, Canada, Mexico, Australia, Spain and Brazil. The Specialty Products segment is the largest U.S. producer of sodium bicarbonate, which it sells together with other specialty inorganic chemicals for a variety of industrial, institutional, medical and food applications. This segment also sells a range of animal nutrition and specialty cleaning products. In 2006, the Consumer Domestic, Consumer International and Specialty Products segments represented approximately 72%, 17% and 11%, respectively, of the Company's net sales.

All brand rankings contained in this report are based on Information Resources, Inc. (IRI) FDTKS, excluding Wal-Mart, for the 52 weeks ending December 31, 2006. Foreign brand rankings are derived from several sources.

**2006 DEVELOPMENTS**

On August 7, 2006, the Company acquired substantially all of the net assets of Orange Glo International, Inc. (OGI Acquisition), which include laundry and cleaning products such as OXICLEAN, a premium-priced laundry pre-wash additive, KABOOM bathroom cleaner and ORANGE GLO household cleaner. The purchase price was \$325.4 million, plus fees of approximately \$4.4 million, which was financed through a \$250.0 million addition to the Company's existing bank credit facility and available cash. Sales for the acquired business for the year ended December 31, 2005 were approximately \$200.0 million, primarily in the United States. OXICLEAN pre-wash laundry additive is the number one brand in the laundry pre-wash additives market in the U.S. The Company allocated a significant portion of the purchase price to intangibles based upon a preliminary valuation. The Company has completed the order processing, logistics and accounting phases of integrating the acquired business and anticipates transferring the manufacturing of most products to its existing plants during the second half of 2007. See Note 5 to the consolidated financial statements included in this report.

On June 2, 2006, the Company reacquired the distribution rights from USA Detergents Inc. to sell XTRA laundry detergent and NICE N FLUFFY liquid fabric softener in Canada for \$7.0 million in cash plus an additional performance-based payment of up to \$2.5 million based upon one year performance targets from the closing date. The accompanying financial statements reflect the allocation of the purchase price to intangible assets.

On October 31, 2005, the Company acquired the SPINBRUSH battery-operated toothbrush business from the Procter & Gamble Company. The purchase price was \$75.0 million in cash, plus additional performance-based payments of up to \$30.0 million payable up to nine months following the closing. The Company did not pay any performance-based payments as the business results did not warrant any. SPINBRUSH is the market leader in the battery-operated segment of the toothbrush category with a range of product offerings for both adults and children. The Company fully integrated the SPINBRUSH business in the first quarter of 2006.

**Table of Contents****FINANCIAL INFORMATION ABOUT SEGMENTS**

As noted above, the Company's business is organized into three reportable segments, Consumer Domestic, Consumer International and Specialty Products (SPD). These segments are based on differences in the nature of products and organizational and ownership structures. None of these segments are seasonal, with the exception of the depilatories and waxes product group in the Consumer Domestic and Consumer International segments which generally performs better in the spring and summer months. Information concerning the net sales, operating income and identifiable assets of each of the segments is set forth in Note 17 to the consolidated financial statements and in Management's Discussion and Analysis of Financial Condition and Results of Operations, which is Item 7 of this report.

**CONSUMER PRODUCTS****Consumer Domestic****Principal Products**

The Company's founders first marketed baking soda in 1846 for use in home baking. Today, this product is known for a wide variety of uses in the home, including as a refrigerator and freezer deodorizer, scratchless cleaner and deodorizer for kitchen surfaces and cooking appliances, bath additive, dentifrice, cat litter deodorizer, and swimming pool pH stabilizer. The Company specializes in baking soda-based products, as well as other products which use the same raw materials or technology or are sold in the same markets. In addition, this segment includes other deodorizing and household cleaning products, as well as laundry and personal care products. The following table sets forth the principal products of the Company's Consumer Domestic segment.

*Household Products*

The Company's household products business began with baking soda in 1846 and has expanded through the introduction or acquisition of additional household products such as laundry detergent, carpet and room deodorizers, cat litter and other pet products and cleaners. In 2006, household products constituted approximately 60% of the Company's Domestic Consumer sales and approximately 43% of the Company's total sales.

The ARM & HAMMER trademark was adopted in 1867. ARM & HAMMER Baking Soda remains the leading brand of baking soda in terms of consumer recognition of the brand name and reputation for quality and value. The deodorizing properties of baking soda have led to the development of several household products. For example, in 2006, the Company launched ARM & HAMMER FRIDGE FRESH, a refrigerator deodorizer equipped with both a baking soda filter to keep food tasting fresher and an indicator to tell the consumer when the product needs to be replaced. In addition, ARM & HAMMER Carpet and Room Deodorizer continued to be the leading brand in the domestic carpet and room deodorizer market.

The Company's laundry detergents constitute its largest consumer business, measured by sales volume. The Company markets its ARM & HAMMER brand laundry detergents, in both powder and liquid forms, as value products, priced at a discount from products identified by the Company as market leaders. The Company markets its XTRA laundry detergent in both powder and liquid at a slightly lower price than ARM & HAMMER brand laundry detergents. Although the powder laundry detergent segment continued its long-term decline throughout 2006,

---

**Table of Contents**

ARM & HAMMER powder maintained its position as the leading powder detergent value brand by dollar share. In 2006, the Company launched in limited distribution XTRA SCENTSATIONS, a highly fragranced and concentrated liquid laundry detergent and ARM & HAMMER ESSENTIALS, a concentrated liquid laundry detergent formulated with plant-based soaps and containing no dyes, phosphates or bleaches. In 2007, the Company is significantly expanding distribution of these items. As a result of the OGI Acquisition, the Company began selling OXICLEAN pre-wash laundry additive. OXICLEAN is the number one brand in the laundry pre-wash additives market in the U.S. The Company is currently introducing a new OXICLEAN SPRAY AWAY portable instant stain remover.

The Company's laundry products also include fabric softener sheets that prevent static cling and soften and freshen clothes. The Company markets ARM & HAMMER FRESH 'N SOFT liquid fabric softener and offers another liquid fabric softener, XTRA NICE 'N FLUFFY, at a slightly lower price enabling the Company to compete at several price points.

The Company markets a line of cat litter products such as ARM & HAMMER SUPER SCOOP clumping cat litter, which is the number two brand in the clumping segment of the cat litter market. Line extensions of SUPER SCOOP include ARM & HAMMER EASY FLUSH clumping cat litter, a flushable cat litter that enables consumers to flush litter box clumps in the bathroom so odors do not escape into the home and ARM & HAMMER Multi-Cat cat litter, designed for households with more than one cat. In 2006, the Company introduced ARM & HAMMER HIGH PERFORMANCE clumping cat litter, a corn-based scoopable litter made for consumers who prefer to use products made from natural ingredients. The Company also markets a line of pet care products under the LAMBERT KAY brand name. The Company intends to continue to innovate and offer new products under the ARM & HAMMER brand in the household and pet care categories.

The Company markets a line of household cleaning products including CLEAN SHOWER daily shower cleaner, SCRUB FREE bathroom cleaners and SNO BOL toilet bowl cleaner. As a result of the OGI Acquisition in 2006, the Company began selling KABOOM bathroom cleaner and ORANGE GLO household cleaning products.

*Personal Care Products*

The Company entered the personal care business using the unique strengths of its ARM & HAMMER trademark and baking soda technology, and has expanded its presence through its acquisition of antiperspirants, oral care products, depilatories and reproductive health products. The personal care market is highly innovative and is characterized by a continuous flow of new products and line extensions and intense competition, requiring heavy advertising and promotion. In 2006, Personal Care Products constituted approximately 40% of the Company's Consumer Domestic sales and approximately 29% of the Company's total sales.

ARM & HAMMER Baking Soda, when used as a dentifrice, whitens and polishes teeth, removes plaque and leaves the mouth feeling fresh and clean. These properties led to the development of a complete line of sodium bicarbonate-based dentifrice products which are marketed and sold nationally primarily under the ARM & HAMMER DENTAL CARE brand name. The Company also markets ARM & HAMMER ENAMEL CARE advanced cleaning and natural whitening toothpastes, based on proprietary formulation technology, which combines the cleaning and whitening properties of baking soda with fluoride and liquid calcium to fill tooth surfaces and restore enamel luster.

The Company also manufactures and markets in the United States (including Puerto Rico) and Canada, the MENTADENT brand of toothpaste and toothbrushes, PEPSODENT and AIM toothpaste, and has exclusive licensing rights in those territories to CLOSE-UP toothpaste from Conopco, Inc., a wholly owned subsidiary of Unilever N.V. and Unilever PLC.

In 2005, the Company expanded its oral care line by acquiring the SPINBRUSH battery-operated toothbrush business from Procter & Gamble. In 2007, the Company is introducing a new SPINBRUSH Pro Slim toothbrush and a two speed version of SPINBRUSH.

## **Table of Contents**

The Company's deodorant and antiperspirant products are marketed under the ARM & HAMMER, ARRID and LADY'S CHOICE brand names.

Condoms are recognized as highly reliable contraceptives as well as an effective means of reducing the risk of sexually transmitted diseases (STDs). The TROJAN condom brand has been in use for more than 80 years. In 2006, the brand continued its market share leadership in the United States with the success of such products as EXTENDED PLEASURE, HER PLEASURE, TWISTED PLEASURE, SHARED PLEASURE and MAGNUM WITH WARM SENSATIONS, a unique lubricant system which warms the skin on contact for enhanced pleasure. Early in 2006, the Company launched TROJAN Ultra Thin condoms. In 2007, there will be several new additions to the TROJAN product line, including an Intense Ribbed condom and an expanded line of vibrating rings.

In 2006, FIRST RESPONSE was the number two brand in the home pregnancy and ovulation test kit business category. During 2006, the Company launched FIRST RESPONSE Rapid Result test kit, designed to tell a woman if she is pregnant within one minute after taking the test. The Company also markets a second brand, ANSWER, which competes in the value segment of the home pregnancy and ovulation test kit market.

The NAIR line of non-shaving hair removal products is the number two brand in the United States, with innovative products that address consumer needs for quick, complete and longer-lasting hair removal. The Company offers waxes, depilatory creams and cloth strips under the NAIR brand name. In 2007, the Company plans to introduce the NAIR Pretty line and a new NAIR sensitive formula line consisting of five new products.

## **Consumer International**

The Consumer International segment markets and sells a variety of personal care products, over-the-counter and household products in international markets, including France, the United Kingdom, Canada, Mexico, Australia, Spain and Brazil.

Certain of the Company's international product lines are similar to its domestic product lines. For example, the Company markets depilatories and waxes, home pregnancy and ovulation test kits and oral care products in most of its international markets and markets condoms in Canada, Mexico and the United Kingdom.

The Company believes that approximately 37% of its international net sales in this segment are attributable to brands which hold the number one or two positions in their respective local markets. With the exception of Canada, France and the United Kingdom, which account for 30%, 21% and 20%, respectively of the Company's international sales in this segment, no other country in which the Company operates accounts for more than 11% of its total international net sales in this segment, and no brand accounts for more than 13% of its total international net sales in this segment.

During the past few years, the Company has expanded its businesses by introducing new NAIR waxes and depilatory products into France, Spain, the United Kingdom, Canada, Mexico and Australia. The Company has also introduced new PEARL DROPS products into Europe and Australia. In addition, STERIMAR nasal hygiene products have been introduced into a number of markets in Europe and Latin America.

The majority of the products that the Company offers within the Consumer International segment are products acquired from and formerly manufactured by Carter-Wallace. However, the Company continues to seek opportunities to expand distribution of ARM & HAMMER products and in 2006 expanded ARM & HAMMER laundry and pet care products into Canada and Mexico. In 2006, the Company assumed distribution of SPINBRUSH, primarily in Canada, the United Kingdom and Japan and, as a result of the OGI Acquisition, OXICLEAN, KABOOM and ORANGE GLO, primarily in Mexico and Canada.

In 2007, the Company formed a small subsidiary in China to assist in launching new products and to manage the contract manufacturers who produce SPINBRUSH.

**Table of Contents**

**COMPETITION FOR CONSUMER DOMESTIC AND CONSUMER INTERNATIONAL**

For information regarding competition affecting the Company’s Consumer Domestic and Consumer International Products businesses, see “Competitive Environment” in Management’s Discussion and Analysis of Financial Condition and Results of Operations, which is Item 7 of this report.

Product introductions usually involve heavy marketing costs in the year of launch, and the eventual success of new products and line extensions described in this report will not be known for some time afterwards.

**DISTRIBUTION FOR CONSUMER DOMESTIC**

Products in the Consumer Domestic segment are primarily marketed throughout the United States and Canada and sold through a broad distribution platform that includes supermarkets, mass merchandisers, such as Wal-Mart, and drugstores. The Company employs a sales force based regionally throughout the United States. This sales force utilizes the services of independent food brokers in each market. The Company’s products are stored in Company plants and public warehouses and are either delivered by independent trucking companies or picked up by customers.

**DISTRIBUTION FOR CONSUMER INTERNATIONAL**

The Company’s Consumer International distribution network is based on capacity and cost considerations. In Canada, Mexico, Spain and Australia, finished goods are warehoused internally and shipped directly to customers through independent freight carriers. In the United Kingdom and Brazil, all product distribution is subcontracted to a professional distribution company. In France, distribution of consumer products to mass markets is handled internally while distribution of OTC products to pharmacies and professional diagnostics to laboratories is handled by outside agencies.

**SPECIALTY PRODUCTS**

**Specialty Products Division**

**Principal Products**

The Company’s SPD segment focuses on sales to businesses and participates in three product areas: Specialty Chemicals, Animal Nutrition and Specialty Cleaners. The following table sets forth the principal products of the Company’s SPD segment.

<b>Type of Product</b>	<b>Key Brand Names</b>
Specialty Chemicals	ARM & HAMMER Performance Grade Sodium Bicarbonate ARMAND PRODUCTS Potassium Carbonate and Potassium Bicarbonate <sup>(1)</sup>

 (3) Distributed by The ArmaKleen Company, an entity in which the Company holds a joint venture interest.

## **Table of Contents**

### *Specialty Chemicals*

The Company's specialty chemicals business primarily consists of the manufacture, marketing and sale of sodium bicarbonate in a range of grades and granulations for use in industrial and agricultural markets. In industrial markets, sodium bicarbonate is used by other manufacturing companies as a leavening agent for commercial baked goods, as an antacid in pharmaceuticals, as a carbon dioxide release agent in fire extinguishers, as an alkaline agent in swimming pool chemicals, and as a buffer in kidney dialysis.

The Company markets and sells ammonium bicarbonate and other specialty chemicals to food and agricultural markets in Europe through its wholly-owned British subsidiary, Brotherton Speciality Products Ltd.

The Company's 99.8% owned Brazilian subsidiary, Quimica Geral do Nordeste ( QGN ), is South America's leading provider of sodium bicarbonate.

The Company and Occidental Petroleum Corporation are equal partners in a joint venture named Armand Products Company, which produces and markets potassium carbonate and potassium bicarbonate. Potassium chemicals are sold to, among others, the glass industry for use in TV and computer monitor screens. Armand Products also manufactures for the Company a potassium carbonate-based animal feed additive for sale in the dairy industry.

### *Animal Nutrition Products*

A special grade of sodium bicarbonate, as well as sodium sesquicarbonate, is sold to the animal feed market as a feed additive for use by dairymen as a buffer, or antacid, for dairy cattle. The Company also markets and sells DCAD Plus feed grade potassium carbonate as a feed additive into the animal feed market.

The Company markets and sells MEGALAC rumen bypass fat, a nutritional supplement made from natural oils, which enables cows to maintain energy levels during the period of high-milk production, resulting in improved milk yields and minimal weight loss. The product and the trademark MEGALAC are licensed under a long-term license agreement from a British company, Volac Ltd.

The Company also manufactures, markets and sells BIO-CHLOR and FERMENTEN, a range of specialty feed ingredients for dairy cows, which improve rumen feed efficiency and help increase milk production.

### *Specialty Cleaners*

The Company also provides a line of cleaning and deodorizing products for use in commercial and industrial applications such as office buildings, hotels, restaurants and other facilities.

The Company has a joint venture with the Safety-Kleen Corporation called The ArmaKleen Company. The ArmaKleen Company was formed to build a specialty cleaning products business based on the Company's technology and Safety-Kleen's sales and distribution organization. This joint venture distributes the Company's proprietary product line of aqueous cleaners along with the Company's ARMEX blast media line, which is designed for the removal of a wide variety of surface coatings. The Company continues to pursue opportunities to build this industrial cleaning business using the Company's aqueous-based technology as well as the ArmaKleen Company's ARMEX blast media line of products.

## **COMPETITION FOR SPD**

For information regarding competition affecting the Company's Specialty Products business, see "Competitive Environment" in Management's Discussion and Analysis of Financial Condition and Results of Operations, which is Item 7 of this report. Product introductions usually involve heavy introductory costs in the year of launch, and the eventual success of the new products and line extensions is not known for some time afterwards.

## **Table of Contents**

### **DISTRIBUTION FOR SPD**

In the SPD segment, the Company markets sodium bicarbonate and other chemicals to industrial and agricultural customers primarily throughout the United States and Canada. Distribution is accomplished through regional sales offices and manufacturer's representatives, augmented by the sales personnel of independent distributors throughout the country. The Company's products in this segment are located in Company plants and public warehouses and are either delivered by independent trucking companies or picked up by customers at the Company's facilities.

### **RAW MATERIALS AND SOURCES OF SUPPLY**

The Company manufactures sodium bicarbonate for both of its consumer and specialty products businesses at its plants located at Green River, Wyoming and Old Fort, Ohio. The primary source of soda ash, a basic raw material in the production of sodium bicarbonate, used by the Company is the mineral trona, which is found in abundance in southwestern Wyoming near the Company's Green River plant. The Company has adequate trona reserves under mineral leases to support the requirements of its sodium bicarbonate business and may acquire other leases in the future as the need arises.

The Company is party to a partnership agreement with General Chemical Corporation, which mines and processes trona reserves in Wyoming. Through the partnership and related supply and services agreements, the Company fulfills a substantial amount of its soda ash requirements, enabling the Company to achieve some of the economies of an integrated business capable of producing sodium bicarbonate and related products from the basic raw material. The Company also has an agreement for the supply of soda ash from another company. The partnership agreement and other supply agreements between the Company and General Chemical are terminable upon two years notice by either company. The Company believes that alternative sources of supply are available.

The Company believes that ample sources of raw materials are available for all of its other major products. Detergent chemicals are used in a variety of the Company's products and are available from a number of sources. Bottles, paper products and clay are available from multiple suppliers, although the Company chooses to source most of these materials from single sources under long-term supply agreements in order to gain favorable pricing. The Company also uses a palm oil fraction in its rumen bypass fats products. Alternative sources of supply are available in case of disruption or termination of the agreements.

Continuing a trend that began in 2005, the cost of raw materials was substantially higher in 2006, particularly for oil-based raw and packaging materials used in the household and specialty products businesses. In 2006, the Company more than offset some of these increases with cost improvement programs and pricing actions. The price of palm oil generally fluctuates with the price of global vegetable oil. Additional increases in the prices of certain raw materials could further materially impact the Company's costs and financial results if the Company is unable to pass such costs along in the form of price increases to its customers.

In 2005, the Company acquired the SPINBRUSH battery-operated toothbrush business from the Procter & Gamble Company. The battery-operated toothbrushes are made by two contract manufacturers located in China.

The product lines acquired as part of the OGI Acquisition are all currently produced by contract manufacturers. During the second half of 2007, the manufacturing of certain products will be integrated into the Company's existing plants.

### **PATENTS AND TRADEMARKS**

The Company's trademarks (identified throughout this annual report in capitalized letters), including ARM & HAMMER, are registered with the United States Patent and Trademark Office and also with the trademark offices of many foreign countries. The ARM & HAMMER trademark has been used by the Company

## **Table of Contents**

since the late 1800 s, and is a valuable asset and important to the successful operation of the Company s business. The Company s other valuable trademarks include TROJAN, NAIR, FIRST RESPONSE, MENTADENT, CLOSE-UP, AIM, PEPSODENT, XTRA, BRILLO, ARRID, SNO BOL, PARSONS , SCRUB FREE, OXICLEAN, CLEAN SHOWER and SPINBRUSH. United States trademark registrations are for a term of 10 years, renewable every 10 years so long as the trademarks are used in the regular course of trade. The Company maintains a portfolio of trademarks representing substantial goodwill in the businesses using the trademarks.

United States patents are currently granted for a term of 20 years from the date the patent application is filed. Although the Company actively seeks and maintains a number of patents, no single patent is considered significant to the business as a whole.

## **CUSTOMERS AND ORDER BACKLOG**

A group of three Consumer Domestic customers accounted for approximately 29% of consolidated net sales in 2006, including a single customer, Wal-Mart Stores, Inc., which accounted for approximately 21%. A group of three Consumer Domestic customers accounted for approximately 25% of consolidated net sales in 2005 including Wal-Mart, which accounted for approximately 18%. This group also accounted for approximately 26% of net sales (of which Wal-Mart accounted for 18%) in 2004. The time between receipt of orders and shipment is generally short, and, as a result, backlog is not significant.

## **RESEARCH & DEVELOPMENT**

The Company conducts research and development activities primarily at its Princeton and Cranbury facilities in New Jersey. The Company devotes significant resources and attention to product development, process technology and basic research to develop differentiated products with new and distinctive features and to provide increased convenience and/or value to its customers. To increase its innovative capabilities, the Company engages outside contractors for general research and development in activities beyond its core areas of expertise. During 2006, \$44.7 million was spent on research activities as compared to \$38.7 million in 2005 and \$33.0 million in 2004.

## **GOVERNMENTAL REGULATION**

Some of the Company s products are subject to regulation under the Food, Drug and Cosmetic Act, which is administered by the Food and Drug Administration and the Insecticide, Fungicide and Rodenticide Act and the Toxic Substances Control Act, which are administered by the Environmental Protection Agency. The Company is also subject to regulation by the Federal Trade Commission in connection with the content of its labeling, advertising, promotion, trade practices and other matters. The Company s relationship with certain unionized employees may be overseen by the National Labor Relations Board. The Company s activities are also regulated by various agencies of the states, localities and foreign countries in which the Company sells its products.

## **ENVIRONMENTAL MATTERS**

The Company s operations are subject to federal, state and local regulations governing air emissions, waste and steam discharges, and solid and hazardous waste management activities. The Company endeavors to take actions necessary to comply with such regulations. These steps include periodic environmental audits of each Company facility. The audits, conducted by independent engineering firms with expertise in the area of environmental compliance, include site visits at each location, as well as a review of documentary information, to determine compliance with such federal, state and local regulations. The Company believes that its compliance with existing environmental regulations will not have a material adverse effect with regard to the Company s capital expenditures, earnings or competitive position. No material capital expenditures relating to environmental control or remediation are presently anticipated.

**Table of Contents****GEOGRAPHIC AREAS**

Approximately 79%, 78% and 83% of the net sales reported in the accompanying consolidated financial statements in 2006, 2005 and 2004, respectively were to customers in the United States. Approximately 93%, 88% and 92% of long-lived assets were located in the United States at December 31, 2006, 2005 and 2004, respectively. Other than the United States, no one country accounts for more than 5% of consolidated net sales and 5% of total assets.

**EMPLOYEES**

At December 31, 2006, the Company had approximately 3,700 employees. The Company is party to a labor contract with the United Industrial Workers of North America at its London, Ohio plant, which contract continues until September 28, 2007, and with the International Machinist Union at its Colonial Heights, Virginia plant, which contract continues until May 31, 2010. Internationally, the Company employs union employees in France, Brazil and Spain. The Company believes that its relations with both its union and non-union employees are satisfactory.

**CLASSES OF SIMILAR PRODUCTS**

The Company's operations, exclusive of unconsolidated entities, constitute three reportable segments, Consumer Domestic, Consumer International and SPD. The table set forth below shows the percentage of the Company's net sales contributed by each group of similar products marketed by the Company during the period from January 1, 2004 through December 31, 2006.

	% of Net Sales		
	2006	2005	2004
Consumer Domestic			
Household	43%	41%	47%
Personal Care	29%	29%	27%
Consumer International	17%	17%	12%
SPD	11%	13%	14%

The table above reflects consolidated net sales, exclusive of net sales of unconsolidated entities.

**PUBLIC INFORMATION**

The Company maintains a web site at [www.churchdwight.com](http://www.churchdwight.com) and makes available free of charge on this web site the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after the Company electronically files these materials with, or furnishes them to, the Securities and Exchange Commission. Also available on the Company's website are the Company's Corporate Governance Guidelines, charters for the Audit, Compensation & Organization and Governance & Nominating Committees of the Company's Board of Directors and the Company's Code of Conduct. Each of the foregoing is also available in print free of charge and may be obtained upon written request to: Church & Dwight Co., Inc., 469 North Harrison Street, Princeton, New Jersey 08543, attention: Secretary. The information presented in the Company's web site is not a part of this report and the reference to the Company's web site is intended to be an inactive textual reference only.

---

**Table of Contents**

**ITEM 1A. RISK FACTORS**

The following risks and uncertainties, as well as others described elsewhere in this report, could materially adversely affect our business, results of operations and financial condition:

**We have recently developed and commenced sales of a number of new products and line extensions, but if they do not gain widespread customer acceptance or if they cause sales of our existing products to decline, our financial performance could decline.**

We have recently introduced or will be introducing new consumer product line extensions, such as OXICLEAN SPRAY AWAY portable stain remover, SPINBRUSH Pro Slim toothbrushes, a two-speed SPINBRUSH toothbrush, and TROJAN Intense Ribbed condoms. In 2005, we introduced ELEXA, a line of sexual health products which did not meet our expectations. The development and introduction of new products involves substantial research, development and marketing expenditures, which we may be unable to recover if the new products do not gain widespread market acceptance. In addition, if sales generated by new products result in a concomitant decline in sales of our existing products, our financial performance could be harmed.

**We may discontinue products or product lines which could result in returns, asset write-offs and shutdown costs. We may also engage in product recalls which would reduce our cash flow and earnings.**

In the past, we have discontinued certain products and product lines which resulted in returns from customers, asset write-offs and shutdown costs. We may suffer similar adverse consequences in the future to the extent we discontinue products that do not meet expectations or no longer satisfy consumer demand. Product returns, write-offs or shutdown costs would reduce cash flow and earnings. Product efficacy or safety concerns could result in product recalls or declining sales, which also would reduce our cash flow and earnings.

**We face intense competition in a mature industry and we may be required to increase expenditures and accept lower profit margins to preserve or maintain our market share. Unless the markets in which we compete grow substantially, a loss of market share will result in reduced sales levels and declining operating results.**

During 2006, approximately 79% of our sales were generated in U.S. markets. U.S. markets for consumer products are considered mature and commonly characterized by high household penetration, particularly with respect to our most significant product categories, such as laundry detergents, deodorizers, household cleaning products, toothpastes, antiperspirants and deodorants. Our unit sales growth in domestic markets will depend on increased use of our products by consumers, product innovation and our ability to capture market share from competitors. We may not succeed in implementing strategies to increase domestic revenues.

The consumer products industry, particularly the laundry detergent, personal care and air deodorizer categories, is intensely competitive. To protect existing market share or to capture increased market share, we may need to increase expenditures for promotions and advertising and introduce and establish new products. Increased expenditures may not prove successful in maintaining or enhancing market share and could result in lower sales and profits. Many of our competitors are large companies, including The Procter & Gamble Company, Unilever, Inc., The Clorox Company, Colgate-Palmolive Company, Henkel, SSL International, Reckitt Benckiser, Johnson & Johnson, Inverness and S.C. Johnson & Son, Inc., many of which have greater financial resources than we do. These competitors have the capacity to outspend us should they attempt to gain market share. If we lose market share and the markets in which we compete do not grow, our sales levels and operating results will decline.

**Providing price concessions or trade terms that are acceptable to our trade customers, or the failure to do so, could adversely affect our sales and profitability.**

Consumer products, particularly those that are value-priced like many of our products, are subject to significant price competition and in recent years have been characterized by price deflation. From time to time,

---

**Table of Contents**

we may need to reduce the prices for some of our products to respond to competitive and customer pressures and to maintain market share. Any reduction in prices to respond to these pressures would harm profit margins. In addition, if our sales volumes fail to grow sufficiently to offset any reduction in margins, our results of operations would suffer.

Because of the competitive environment facing retailers, many of our trade customers, particularly our high-volume retail store customers, have increasingly sought to obtain pricing concessions or better trade terms. To the extent we provide concessions or better trade terms, our margins are reduced. Further, if we are unable to maintain terms that are acceptable to our trade customers, these trade customers could reduce purchases of our products and increase purchases of products from our competitors which would harm our sales and profitability.

**Reductions in inventory by our trade customers, including as a result of consolidations in the retail industry, could adversely affect sales in periods during which the reduction results in reduced orders for our products.**

From time to time our retail customers have reduced inventory levels in managing their working capital requirements. Any reduction in inventory levels by our retail customers would harm our operating results for the financial periods affected by the reductions. In particular, continued consolidation within the retail industry could potentially reduce inventory levels maintained by our retail customers, which could adversely affect our results of operations for the financial periods affected by the reductions.

**A continued shift in the retail market from food and drug stores to club stores and mass merchandisers could cause our sales to decline.**

Our performance also depends upon the general health of the economy and of the retail environment in particular and could be significantly harmed by changes affecting retailing and by the financial difficulties of retailers. Industry wide, consumer products such as those marketed by us are increasingly being sold by club stores and mass merchandisers, while sales of consumer products by food and drug stores are comprising a smaller proportion of the total volume of consumer products sold. Sales of our products are stronger in the food and drug channels of trade and not as strong with the club stores and mass merchandisers. Although we have taken steps to improve sales by club stores and mass merchandisers, if we are not successful in improving sales to these channels, and the current trend continues, our financial condition and operating results could suffer.

**Loss of any of our principal customers could significantly decrease our sales and profitability.**

Wal-Mart, including its affiliate Sam's Club, is our largest customer, accounting for approximately 21% of net sales in 2006, 18% of net sales in 2005 and 18% of net sales in 2004. Our top three Consumer Domestic customers accounted for approximately 29% of net sales in 2006, 25% of net sales in 2005 and 26% of net sales in 2004. The loss of or a substantial decrease in the volume of purchases by Wal-Mart or any of our other top customers would harm our sales and profitability.

**Our substantial indebtedness could adversely affect our financial condition and ability to operate our businesses and repay the indebtedness.**

As of December 31, 2006, we had \$933.3 million of total consolidated indebtedness. This level of indebtedness could (i) limit our ability to borrow money to fund working capital, capital expenditures, acquisitions and debt service requirements and other financing needs and (ii) make us more vulnerable to a downturn in our business, industry or the economy in general. In the event of a general increase in interest rates, our interest expense would increase because a substantial portion of the indebtedness, including all of the indebtedness under our senior credit facilities, bears interest at floating rates. To reduce the impact of interest rate fluctuations on some of our indebtedness, we entered into two cash flow hedge agreements. One was effective on September 29, 2006, and the other hedge was effective on December 29, 2006. Our failure to service our

---

## **Table of Contents**

indebtedness or obtain additional financing as needed could have a material adverse effect on our business operating results and financial condition. The terms of our subordinated notes and agreement relating to our credit facility place a limit on the amount of certain cash payments we can make. This limitation includes the amount we can pay in dividends on our common stock. As long as we are not in default under either agreement, we do not anticipate that the limitation will have an effect on our ability to pay dividends at the current rate.

### **We may make acquisitions that result in dilution to our current stockholders or increase our indebtedness, or both. In addition, acquisitions that are not properly integrated or are otherwise unsuccessful could strain or divert our resources.**

We have made several acquisitions in the past few years, including the OGI Acquisition, the SPINBRUSH battery-operated toothbrush brand, a skin care brand in South America, and the former consumer products businesses of Carter-Wallace, Inc., and may make additional acquisitions or substantial investments in complementary businesses or products in the future. Any future acquisitions or investments would entail various risks, including the difficulty of assimilating the operations and personnel of the acquired businesses or products, the potential disruption of our ongoing business and, generally, our potential inability to obtain the desired financial and strategic benefits from the acquisition or investment. The risks associated with assimilation are increased to the extent we acquire companies with businesses, operations or sources of supply outside of the United States and Canada, such as the acquisition of the SPINBRUSH business, for which products are manufactured by third party contract manufacturers in China, and the skin care brand in South America for which products are manufactured locally by third parties. These factors could harm our financial condition and operating results. Any future acquisitions or investments could result in substantial cash expenditures, the issuance of new equity by us and/or the incurrence of additional debt and contingent liabilities. In addition, any potential acquisitions or investments, whether or not they are ultimately completed, could divert the attention of management and divert other resources from other matters that are critical to our operations.

### **Our condom product line could suffer if the spermicide N-9 is proved or perceived to be harmful.**

Our distribution of condoms under the TROJAN and other trademarks is regulated by the U.S. Food and Drug Administration (FDA). Certain of our condoms contain the spermicide nonoxynol-9 (N-9). The World Health Organization and other interested groups have issued reports suggesting that N-9 should not be used rectally or for multiple daily acts of vaginal intercourse, given the ingredient's potential to cause irritation to human membranes. The FDA has recently issued non-binding draft guidance concerning the labeling of condoms in general and those with N-9 in particular. We have filed a response recommending alternative labeling with the FDA. We believe that our present labeling for condoms with N-9 is compliant with the overall objectives of the draft guidance, and that condoms with N-9 will remain a viable contraceptive choice for those couples who wish to use them. However, we cannot predict the nature of the labeling that ultimately will be required by the FDA. While awaiting further FDA guidance, we have implemented an interim label statement change cautioning against rectal use and more-than-once-a-day vaginal use of condoms with N-9, and have launched a public information campaign to communicate these messages to the affected communities.

If the FDA or state governments eventually promulgate rules which prohibit or restrict the use of N-9 in condoms (such as new or additional labeling requirements), we could incur costs from obsolete products, packaging or raw materials, and sales of condoms could decline, which, in turn, could decrease our operating income.

### **Price increases in raw and packaging materials or energy costs could erode our profit margins, which could harm operating results.**

Increases in the prices of raw materials such as surfactants, which are cleaning agents, paper products and bottles, or increases in energy costs, could significantly affect our profit margins. In particular, during 2005 and 2006 we experienced extraordinary price increases for raw and packaging materials, diesel fuel and energy costs,

## **Table of Contents**

particularly as a result of strong demand from China and supply interruptions in 2005 caused by Hurricanes Katrina and Rita. The damage to oil and chemical production facilities in the Gulf region resulted in widespread shortages that extended into 2006. These shortages, coupled with concerns about the adequacy of oil supply, continued to impact pricing. We use surfactants and bottles in the manufacture and marketing of laundry and household cleaning products. We use paper products for packaging in many of our consumer and specialty chemical products. We have attempted to address these price increases through cost reduction programs and price increases of our own products. If price increases continue to occur, we may not be able to increase the prices of our products to fully offset these increases. This could harm our financial condition and operating results.

### **We are subject to various government regulations in the countries in which we operate that could adversely affect our business.**

The manufacturing, processing, formulation, packaging, labeling and advertising of our products are subject to regulation by federal agencies, including the FDA, the Federal Trade Commission ( FTC ) and the Consumer Product Safety Commission. In addition, our operations are subject to the oversight of the Environmental Protection Agency, the Occupational Safety and Health Administration and the National Labor Relations Board. Our activities are also regulated by various agencies of the states, localities and foreign countries in which our products are sold.

In particular, the FDA regulates the safety, manufacturing, labeling and distribution of condoms, home pregnancy and ovulation test kits, and over-the-counter pharmaceuticals. The FDA also exercises a somewhat less rigorous oversight over cosmetic products such as depilatories. In addition, under a memorandum of understanding between the FDA and the FTC, the FTC has jurisdiction with regard to the promotion and advertising of these products, and the FTC regulates the promotion and advertising of our other products as well. As part of its regulatory authority, the FDA may periodically conduct inspections of the physical facilities, machinery, processes and procedures that we use to manufacture regulated products and may observe compliance issues that would require us to make certain changes in our manufacturing facilities and processes. It may be necessary to make additional expenditures to address these regulatory observations or possibly stop selling certain products until a compliance issue has been remediated. As a result, our business could be adversely affected.

Our international operations, including the production of over-the-counter drug products, are subject to regulation in each of the foreign jurisdictions in which we manufacture or market goods. Changes in product standards or manufacturing requirements in any of these jurisdictions could require us to make certain modifications to our operations or product formulations, or to cease manufacturing certain products completely. As a result, our international business could be adversely affected.

### **We are subject to risks related to our international operations that could adversely affect the results of operations.**

Our international operations subject us to risks customarily associated with foreign operations, including:

currency fluctuations;

import and export license requirements;

trade restrictions;

changes in tariffs and taxes;

restrictions or repatriating foreign profits back to the United States; and

difficulties in staffing and managing international operations.

Edgar Filing: CHURCH & DWIGHT CO INC /DE/ - Form 10-K

In all foreign jurisdictions in which we operate, we are subject to laws and regulations that govern foreign investment, foreign trade and currency exchange transactions. These laws and regulations may limit our ability to

## **Table of Contents**

repatriate cash as dividends or otherwise to the United States and may limit our ability to convert foreign currency cash flow into U.S. dollars. Outside the United States, sales and costs are denominated in a variety of currencies, including the euro, British pound, Brazilian real, Canadian dollar, Mexican peso and Australian dollar. A weakening of the currencies in which sales are generated relative to the currencies in which costs are denominated may decrease operating profits and cash flow.

### **Environmental matters create potential liability risks.**

We must comply with various environmental laws and regulations in the jurisdictions in which we operate, including those relating to the handling and disposal of solid and hazardous wastes and the remediation of contamination associated with the use and disposal of hazardous substances. A release of such chemicals due to accident or an intentional act could result in substantial liability to governmental authorities or to third parties. We have incurred, and will continue to incur, capital and operating expenditures and other costs in complying with environmental laws and regulations. It is possible that we could become subject to additional environmental liabilities in the future that could cause a material adverse effect on our results of operations or financial condition.

### **Failure to maximize or successfully assert intellectual property rights could materially adversely affect our competitiveness.**

We rely on trademark, trade secret, patent and copyright laws to protect our intellectual property rights. We cannot be sure that these intellectual property rights will be maximized or that they can be successfully asserted. There is a risk that we will not be able to obtain and perfect our own intellectual property rights, or, where appropriate, license intellectual property rights necessary to support new product introductions. We cannot be sure that these rights, if obtained, will not be invalidated, circumvented or challenged in the future. In addition, even if such rights are obtained in the United States, the laws of some of the other countries in which our products are or may be sold do not protect intellectual property rights to the same extent as the laws of the United States. Our failure to perfect or successfully assert intellectual property rights could make us less competitive and could have a material adverse effect on our business, operating results and financial condition.

## **ITEM 1B. UNRESOLVED STAFF COMMENTS**

Not applicable.

## **ITEM 2. PROPERTIES.**

The Company's executive offices and primary research and development facilities are owned by the Company and are located on 22 acres of land in Princeton, New Jersey. These facilities include approximately 127,000 square feet of office and laboratory space. The Company also owns a 36,000 square foot research and development facility in Cranbury, New Jersey. In addition, the Company leases space in three buildings adjacent to its Princeton facility that contain approximately 140,000 square feet of office space, pursuant to three multi-year leases. The Company also leases regional sales offices in various locations throughout the United States.

**Table of Contents**

The Company and its consolidated subsidiaries also own or lease other facilities as set forth in the following table:

<b>Location<sup>(1)</sup></b>	<b>Products Manufactured</b>	<b>Approximate Area (Sq. Feet)</b>
<b>Owned:</b>		
<i>Manufacturing facilities</i>

1. These facilities are owned unless otherwise indicated.
2. Lease expires in 2015, subject to one five-year extension at the option of the Company.
3. Manufacturing operations at this facility ceased in the first quarter of 2006. A portion of the plant is now being subleased to a third party.

## **Table of Contents**

4. Lease expires in 2010.
5. Lease expires in 2011.
6. Lease expires in 2009, subject to our ability to have two additional one year renewals.
7. Lease expires in 2007.

In 2006, the Company sold its manufacturing facility located in Chicago, Illinois and entered into a long-term supply agreement for powder laundry detergent with the purchaser of the facility.

In Syracuse, New York, the Company owns a 21 acre site which includes a group of connected buildings. This facility was closed in 2001 and a portion of the facility is now leased to a third party.

Armand Products Company, a joint venture of which the Company owns 50%, operates a potassium carbonate manufacturing plant located in Muscle Shoals, Alabama. This facility contains approximately 53,000 square feet of space and has a production capacity of 103,000 tons of potassium carbonate per year.

The Company's 99.8% owned Brazilian subsidiary, QGN, has its administrative headquarters in Rio de Janeiro.

The Old Fort, Ohio plant has a production capacity for sodium bicarbonate of 280,000 tons per year. The Green River plant has a production capacity for sodium bicarbonate of 200,000 tons per year.

The Company believes that its operating and administrative facilities are adequate and suitable for the conduct of its business. The Company also believes that its production facilities are suitable for current manufacturing requirements for its consumer and specialty products businesses. In addition, the facilities possess a capacity sufficient to accommodate the Company's estimated increases in production requirements over the next several years, based on its current product lines.

### **ITEM 3. LEGAL PROCEEDINGS**

On October 26, 2005, a New Jersey state court jury rendered a \$15.0 million verdict against the Company. The verdict followed a trial involving a claim against the Company by Andes Trading de Mexico S.A., alleging that the Company breached a purported agreement granting the plaintiff exclusive distribution rights in Mexico with respect to the Company's consumer products. Shortly after the verdict was rendered, the Company filed a motion for a new trial and for remittitur of the verdict. On December 9, 2005, the court granted the motion in part and denied it in part. The court reduced the damages to \$9.8 million but did not grant the Company's request for new trial. The Company disagrees with the verdict and believes that it is not supported by the evidence offered at the trial. Subsequent to the court's ruling, the Company filed an appeal and the New Jersey Superior Court, Appellate Division heard oral arguments on the appeal on December 6, 2006. The Court has not rendered a decision. The Company has recorded a reserve of \$9.8 million, plus accrued interest, and posted a bond for the verdict amount plus interest.

The Company, in the ordinary course of its business, is the subject of, or party to, various pending or threatened legal actions. The Company believes that any ultimate liability arising from these actions will not have a material adverse effect on its financial position or results of operation.

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS  
( MD&A )**

*Overview*

The Company develops, manufactures and markets a broad range of consumer and specialty products. It recognizes revenues and profits from selling its products under a variety of brands, including ARM & HAMMER and TROJAN, to consumers through supermarkets, drug stores and mass merchandisers; and to industrial customers and distributors.

On May 28, 2004, the Company acquired the joint venture interest in Armkel LLC ( Armkel ) owned by affiliates of Kelso & Company, and Armkel was merged into the Company. This is sometimes referred as the Armkel acquisition. Armkel initially was formed to purchase a portion of the consumer products business of Carter-Wallace.

On October 31, 2005, the Company acquired the SPINBRUSH battery-operated toothbrush business from The Procter & Gamble Company ( P&G ) which was funded from \$75.0 million of the Company's available cash. The accompanying financial statements reflect the final asset allocation, which assigned a significant amount of the purchase price to intangible assets.

On June 2, 2006, the Company reacquired from USA Detergents ( USAD ) the distribution rights to sell Xtra laundry detergent and Nice N Fluffy liquid fabric softener in Canada for \$7.0 million and agreed to make an additional performance-based payment of a maximum of \$2.5 million based upon the performance of the Canadian sales during the one year period following the closing date. The acquisition was funded out of the Company's available cash. The accompanying financial statements reflect the final asset allocation, which assigned the purchase price to intangible assets.

On August 7, 2006, the Company acquired substantially all of the net assets of Orange Glo International, Inc., ( OGI Acquisition ), which include laundry and cleaning products such as OXICLEAN, a premium-priced laundry pre-wash additive, KABOOM bathroom cleaner and ORANGE GLO household cleaner. The Company paid approximately \$325.4 million, plus fees of approximately \$4.4 million, which was financed through a \$250.0 million addition to its existing bank credit facility and available cash. The transaction was structured as an asset purchase and the preliminary appraisal value of the net assets is reflected in the accompanying balance sheet.

The discussion of results of operations of these acquisitions are reflected in the results of operations since their respective acquisition dates.

The Company operates in three primary segments, Consumer Domestic, Consumer International and Specialty Products. The Consumer Domestic segment includes household products for deodorizing such as ARM & HAMMER baking soda and cat litter products; laundry and cleaning products, such as XTRA and ARM & HAMMER laundry detergents, OXICLEAN, and SCRUB FREE and BRILLO cleaning products; and personal care products, such as TROJAN condoms, NAIR depilatories and waxes, FIRST RESPONSE and ANSWER home pregnancy and ovulation test kits, ARRID antiperspirant and ARM & HAMMER, MENTADENT, CLOSE-UP, PEPSODENT and AIM toothpastes, as well as SPINBRUSH battery-operated toothbrushes. Our Consumer International segment sells a variety of personal care products, some of which use the same brands as our domestic product lines, in international markets, including France, the United Kingdom, Canada, Mexico, Australia, Brazil and Spain. Our Specialty Products ( SPD ) segment is the largest U.S. producer of sodium bicarbonate, which it sells together with other specialty inorganic chemicals for a variety of industrial, institutional, medical and food applications. This segment also sells a range of animal nutrition and specialty cleaning products. For the twelve months ended December 31, 2006, our Consumer Domestic, Consumer International and Specialty Products segments represented approximately 72%, 17% and 11%, respectively, of net sales.

---

## **Table of Contents**

For the three year period ended December 31, 2006, the Company's diluted earnings per share has grown at an average rate of 17.9%, its sales has increased from \$1,056.9 million in 2003 to \$1,945.7 million in 2006 and its income from operations has increased from \$111.9 million in 2003 to \$252.1 million in 2006. These increases principally reflect sales of products acquired in the aforementioned acquisitions.

During 2005 and 2006, the Company experienced extraordinary price increases for raw and packaging materials, diesel fuel and energy costs, partially as a result of strong demand from China and supply interruptions in 2005 caused by hurricanes Katrina and Rita. The hurricanes devastating damage to oil and chemical production facilities in the Gulf region resulted in widespread shortages. These shortages, continued in 2006, and coupled with market forces concerned about the adequacy of oil supply, continued to impact pricing in 2006. While the Company was able to identify alternative supply sources and maintain normal service levels, the costs charged by these sources were much higher than costs previously charged by the Company's principal suppliers. Nevertheless, the Company was able to partially offset these higher costs through cost improvement programs and pricing actions taken over the last twelve months.

The Company operates in highly competitive consumer product markets, in which cost efficiency, new product offerings and innovation are critical to success. The consumer products markets are particularly mature in North America and are characterized by high household penetration, particularly with respect to the Company's most significant product categories such as laundry detergents and oral care. Furthermore, because of ongoing retail sector consolidation and the competitive environment facing retailers, the Company faces pricing pressure from these customers, particularly the high-volume retail store customers, who have increasingly sought to obtain pricing concessions or better trade terms. To protect its existing market share or to capture additional market share, the Company increased expenditures for promotions and advertising and introduced new products and line extensions. In order to fund the additional marketing expenses, the Company must sustain ongoing cost cutting initiatives. Furthermore, through its acquisitions and cost improvement initiatives, the Company has been able to lower its overall unit costs and increase the productivity of its various manufacturing facilities.

### *Critical Accounting Policies*

Management's Discussion and Analysis of Financial Condition and Results of Operations addresses matters set forth in our Consolidated Financial Statements, which have been prepared in accordance with accounting principals generally accepted in the United States of America (GAAP). The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. By their nature, these judgments are subject to an inherent degree of uncertainty. These judgments are based on our historical experience, our observation of trends in industry, information provided by our customers and information available from other outside sources, as appropriate. Our critical accounting policies include:

### *Revenue Recognition and Promotional and Sales Return Reserves*

Most of the Company's revenue represents sales of finished goods inventory and is recognized when delivered or picked up by our customers. The reserves for consumer and trade promotion liabilities and sales returns are established based on our best estimate of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. Promotional reserves are provided for sales incentives, such as coupons to consumers, and sales incentives provided to customers, (such as slotting, cooperative advertising, incentive discounts based on volume of sales and other arrangements made directly to customers). All such costs are netted against sales. Slotting costs are recorded when the product is delivered to the customer. Cooperative advertising costs are recorded when the customer places the advertisement for the Company's products. Discounts relating to price reduction arrangements are recorded when the related sale takes place. Costs associated with end-aisle or other in-store displays are recorded when product that is subject to the promotion is sold. The Company relies on historical experience and forecasted data to determine the required reserves. For example, the Company uses historical experience to project coupon redemption rates to determine reserve

**Table of Contents**

requirements. Based on the total face value of Consumer Domestic coupons redeemed over the past several years, if the actual rate of redemptions were to deviate by 0.1% from the rate for which reserves are accrued in the financial statements, an approximately \$1.1 million difference in the reserve required for coupons would result. With regard to other promotional reserves and sales returns, the Company uses experience-based estimates, customer and sales organization inputs and historical trend analysis in arriving at the reserves required. If the Company's estimates for promotional activities and sales returns were to differ by 10% the impact to promotional spending and sales return accruals would be approximately \$6.0 million. While management believes that its promotional and sales returns reserves are reasonable and that appropriate judgments have been made, estimated amounts could differ materially from actual future obligations. During the twelve months ended December 31, 2006, 2005 and 2004, the Company reduced promotion liabilities by approximately \$4.5 million, \$8.1 million and \$10.2 million, respectively based on actual experience and updated information.

*Impairment of goodwill, trademarks and other intangible assets and property, plant and equipment*

Carrying values of goodwill, trademarks and other indefinite lived intangible assets are reviewed periodically for possible impairment in accordance with Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets*. The Company's impairment review is based on a discounted cash flow approach that requires significant judgment with respect to volume, revenue and expense growth rates, and the selection of an appropriate discount rate. Management uses estimates based on expected trends in making these assumptions. With respect to goodwill, impairment occurs when the carrying value of the reporting unit exceeds the discounted present value of cash flows for that reporting unit. For trademarks and other intangible assets, an impairment charge is recorded for the difference between the carrying value and the net present value of estimated future cash flows, which represents the estimated fair value of the asset. The Company uses its judgment in assessing whether assets may have become impaired between annual valuations. Indicators such as unexpected adverse economic factors, unanticipated technological change, distribution losses, or competitive activities and acts by governments and courts may indicate that an asset has become impaired.

Property, plant and equipment and other long-lived assets are reviewed periodically for possible impairment in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The Company's impairment review is based on an undiscounted cash flow analysis at the lowest level at which cash flows of the long-lived assets are largely independent of other groups of Company assets and liabilities. The analysis requires management judgment with respect to changes in technology, the continued success of product lines, and future volume, revenue and expense growth rates. The Company conducts annual reviews for idle and underutilized equipment, and reviews business plans for possible impairment implications. Impairment occurs when the carrying value of the asset exceeds the future undiscounted cash flows. When an impairment is indicated, the estimated future cash flows are then discounted to determine the estimated fair value of the asset and an impairment charge is recorded for the difference between the carrying value and the net present value of estimated future cash flows.

In 2006, the Company recognized tradename impairment and equipment obsolescence charges of approximately \$16.8 million, of which \$12.7 million, \$3.8 million and \$0.3 million were included in the operating results of the Consumer Domestic, Consumer International and SPD segments, respectively. In 2005, the Company recognized tradename, equipment obsolescence and plant impairment charges of \$18.7 million, of which \$7.8 million, \$7.7 million and \$3.2 million were included in the Consumer Domestic, Consumer International and SPD segments, respectively. In 2004, the Company recognized tradename, equipment obsolescence and plant impairment charges of approximately \$6.7 million, which were charged to the Consumer Domestic segment.

The estimates and assumptions used in connection with impairment analyses are consistent with the business plans and estimates that the Company uses to manage its business operations. The use of different assumptions would increase or decrease the estimated value of future cash flows and would have increased or decreased any impairment charge taken. Future outcomes may also differ. If the Company's products fail to

---

**Table of Contents**

achieve estimated volume and pricing targets, market conditions unfavorably change or other significant estimates are not realized, then the Company's revenue and cost forecasts may not be achieved, and the Company may be required to recognize additional impairment charges.

*Inventory valuation*

When appropriate, the Company writes down the carrying value of its inventory to the lower of cost or market (net realizable value), including any costs to sell or dispose. The Company identifies any slow moving, obsolete or excess inventory to determine whether a valuation allowance is needed. The determination of whether inventory items are slow moving, obsolete or in excess of needs requires estimates and assumptions about the future demand for the Company's products, technological changes, and new product introductions. In addition, the Company's allowance for obsolescence may be impacted by the reduction of the number of stock keeping units (SKU's). Excluding acquisitions, the number of Domestic SKU's has been reduced in half over the last 3 years. The Company evaluates its inventory levels and expected usage on a periodic basis and records adjustments as required. Adjustments to the inventory's net realizable value were \$8.8 million at December 31, 2006, and \$5.8 million at December 31, 2005.

*Valuation of pension and postretirement benefit costs*

The Company's pension and postretirement benefit costs are developed from actuarial valuations. Inherent in these valuations are key assumptions provided by the Company to its actuaries, including the discount rate and expected long-term rate of return on plan assets. Material changes in the Company's pension and postretirement benefit costs may occur in the future due to changes in these assumptions.

The discount rate is subject to change each year, consistent with changes in applicable high-quality, long-term corporate bond indices. Based on the expected duration of the benefit payments for our pension plans and postretirement plans we refer to applicable indices such as the Moody's AA Corporate Bond Index to select a rate at which we believe the pension benefits could be effectively settled. Based on the published rates as of December 31, 2006, that matched our estimated cash flows for the plans, the Company used a discount rate of 5.75% for its three domestic plans. The Company's weighted average discount rate as of December 31, 2006, is 5.38% as compared to 5.36% used at December 31, 2005.

The expected long-term rate of return on pension plan assets is selected by taking into account a historical trend, the expected duration of the projected benefit obligation for the plans, the asset mix of the plans, and known economic and market conditions at the time of valuation. Based on these factors, the Company's weighted average expected long-term rate for the 2006 year is 6.80%, a decline of 57 basis points from the 7.37% rate used at December 31, 2005. This decrease is due principally to a decrease in expected returns in U.K. pension plans. A 50 basis point change in the expected long-term rate of return would result in less than a \$0.5 million change in pension expense for 2007.

In accordance with SFAS No. 87, *Employers' Accounting for Pensions*, the Company recognized an additional minimum pension liability of \$0.5 million included in long-term benefit obligations and recorded a charge, net of tax, to accumulated other comprehensive income which decreased stockholders' equity. The SFAS No. 158, *Employers' Accounting for Defined Benefit and Other Postretirement Plans*, impact to the balance sheet was an increase to the 2006 pension and postretirement accrued benefit liabilities of \$0.7 million and \$2.8 million, respectively. The amounts were recorded, net of tax, directly to the ending balance of accumulated other comprehensive income and not as a component of comprehensive income, in accordance with the new standard.

The Company made cash contributions of approximately \$11.2 million to its defined benefit pension plans in 2006. The Company estimates it will be required to make cash contributions to its pension plans of approximately \$9.2 million in 2007.

---

**Table of Contents**

*Tax contingencies*

The Company records liabilities in income taxes payable for potential assessments in various tax jurisdictions. The liabilities relate to tax return positions which, although supportable by the Company, may be challenged by the tax authorities. The Company adjusts these liabilities as a result of changes in tax legislation, interpretations of laws by courts, rulings by tax authorities, changes in estimates and the closing of the statute of limitations. The Company's tax rate includes the impact of the liabilities and any changes to the liabilities. Settlement of any issue with the tax authorities would require the use of cash. Favorable resolution of an issue would be recognized as a reduction to the Company's annual tax rate.

*Recent Accounting Pronouncements*

On January 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standards ( SFAS ) No. 123 (revised 2004) Share Based Payment ( SFAS No. 123R ), which requires the determination of the fair value of share-based compensation at the grant date and the recognition of the related expense over the period in which the share-based compensation vests. The Company adopted SFAS No. 123R using the modified prospective transition method under which the Company recognizes compensation cost on or after the effective date of the Company's adoption of SFAS No. 123R for the portion of outstanding awards for which the requisite service has not yet been rendered, based on the grant date fair value of those awards calculated under the original SFAS 123 for pro forma disclosures. Prior period financial statements have not been restated. In 2006, the Company recorded a pre-tax charge of \$10.3 million associated with the fair-value of unvested stock options, of which \$9.0 million was included in selling, general and administrative expenses and \$1.3 million in cost of goods sold. The after-tax impact of the charge was \$6.4 million. Diluted EPS was negatively impacted by \$0.09 per share.

On July 13, 2006, the Financial Accounting Standards Board ( FASB ) issued FASB Interpretation Number 48 ( FIN 48 ), Accounting for Uncertainty in Income Taxes. FIN 48 seeks to reduce the significant diversity in practice associated with recognition and measurement in the accounting for income taxes. It applies to all tax positions accounted for in accordance with Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes. The effective date of FIN 48 is the first fiscal year beginning after December 15, 2006. The Company is still evaluating the impact of the interpretation and does not expect it to have a material impact on its financial position.

SFAS No. 157, Fair Value Measurements , was issued in September 2006 and is effective for fiscal years beginning after November 15, 2007. SFAS No. 157 provides a single definition of fair value to be utilized under other accounting pronouncements that require fair value measurements, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. The statement generally is to be applied prospectively, so that it does not require any new fair value measurements. The Company is currently assessing what impact, if any, the adoption of this statement will have on its consolidated financial statements.

SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans , was issued in September 2006 and is effective for the Company as of the end of the Company's fiscal year ended December 31, 2006. SFAS No. 158 is an amendment of SFAS Nos. 87, 88, 106, and 132(R) and is intended to improve financial reporting of pension and postretirement plans. This statement requires employers to a) recognize the funded status of a benefit plan, b) recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost, c) measure the defined benefit plan assets and obligations as of the date of the employer's fiscal year-end, and d) include additional disclosures in the notes to the financial statements about effects on net periodic benefit cost that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition assets or obligations. The Company recorded the effect of SFAS No. 158 in the December 31, 2006 balance sheet.

---

## **Table of Contents**

SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" including an amendment of FASB Statement No. 115, was issued on February 15, 2007, and is effective for fiscal years beginning after November 15, 2007. SFAS No. 159 permits companies to choose to measure selected financial assets and liabilities at fair value. If the fair value option is elected, a company will report unrealized gains and losses on those assets and liabilities in each subsequent reporting date. The Company is currently assessing what impact, if any, the adoption of this statement will have on its consolidated financial statements.

SEC Staff Accounting Bulletin No. 108 (SAB 108), which expresses the staff's views regarding the effects of prior year misstatements when quantifying misstatements in current year financial statements, was issued in September 2006. The SEC staff issued SAB 108 to address the diversity in practice in quantifying material financial statement misstatements and the potential, under current practice, for the build up of improper amounts on the balance sheet. The effective date of SAB 108 is for fiscal years ending on or before November 15, 2006. This pronouncement did not have any impact on the Company's consolidated financial statements.

## **RESULTS OF OPERATIONS FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004**

The discussion of results of operations at the consolidated level presented below is followed by a more detailed discussion of results of operations by segment. The discussion of our segment operating results is presented on a historical basis for the years ending December 31, 2006, 2005, and 2004. The segment discussion also addresses certain product line information. The Company's reporting units are consistent with its reportable segments.

### **Consolidated results**

#### **2006 compared to 2005**

##### *Net Sales*

Net Sales increased \$209.2 million or 12.0% to \$1,945.7 million, compared to \$1,736.5 million in 2005. Included in the 2006 results are \$180.5 million associated with the acquisitions of the SPINBRUSH battery-operated toothbrush business, a skin care brand in Brazil, and OGI. The Company assumed responsibility for all SPINBRUSH sales and other functions in the U.S., Canada and the U.K. on April 1, 2006, and has recognized the gross amount of sales and expenses from the SPINBRUSH business for the U.S. and foreign locations since that date. During the transition period prior to April 1, 2006, when the seller of the SPINBRUSH business maintained these responsibilities, the Company accounted for the net cash received as other revenue. The full year results were also affected by favorable foreign exchange rates of \$6.8 million, reduction of promotion reserves of \$4.5 million, based on updated information, including actual experience, price increases that became effective February 1, 2006 and lower volumes. Due to the timing of previously planned promotional events, especially for laundry products, the full benefit of the price increases were not realized until the second quarter of 2006. The Company estimates that the effect of increased prices affected net sales by approximately 3%. Lower volumes reduced sales by less than 2%.

##### *Operating Costs*

The Company's gross profit increased by \$124.1 million to \$761.1 million in 2006 as compared to 2005 and its gross margin increased 240 basis points to 39.1% in 2006 from 36.7% in 2005. Approximately 110 basis points of the improvement was associated with the acquired businesses and the balance of the increase is primarily due to the effect of price increases and cost improvement programs of approximately 350 basis points, partially offset by an increase in commodity costs over the past year of approximately 290 basis points, particularly for oil-based raw and packaging materials used in the laundry and specialty products businesses. Gross margin in 2005 was negatively affected by a charge associated with the closure of a sub-scale, consumer products manufacturing operation abroad, and plant impairment and equipment obsolescence charges. The absence of these charges in 2006 helped improve gross margin by 50 basis points.

---

## **Table of Contents**

Marketing expenses for 2006 increased \$33.2 million as compared to 2005, primarily due to support for acquired businesses.

Selling, general and administrative expenses ( SG&A ) of \$292.4 million in 2006 increased \$51.6 million or 21.4% as compared to 2005. The 2006 expense includes tradename impairment charges of \$14.3 million, stock based compensation expense of \$9.3 million primarily associated with the Company's adoption of SFAS No. 123R on January 1, 2006, an increase of approximately \$10.0 million of fixed and variable personnel and related expenses, higher deferred compensation expenses of \$2.6 million, higher variable selling expense associated with higher net sales of \$4.3 million, higher research and development professional fee expenses of \$3.9 million and operating and amortization expense in support of the acquired businesses. The prior year includes \$6.3 million of tradename impairment charges and an \$8.3 million charge related to litigation involving Andes Trading de Mexico S.A. (the Andes litigation ). For a further explanation, please refer to Item 3 of this report.

### *Other Income and Expenses*

The increase in equity in earnings of affiliates of \$2.3 million reflects improved operating margins associated with the Company's Armand Products joint venture and the formation of a small joint venture by one of the Company's European subsidiaries.

Interest expense in 2006 increased \$9.9 million as compared to 2005 as a result of the increase in debt to fund the OGI Acquisition and higher interest rates partially offset by lower average pre-existing debt outstanding. Investment income for 2006 increased \$1.3 million as compared to 2005 as a result of higher interest rates.

Other income/expense in 2006 primarily includes the fair market value of common stock the Company received in connection with the demutualization of an insurance company in which the Company was the policyholder of a guaranteed annuity contract associated with a defined benefit plan, and foreign exchange gains related to intercompany loans between the Company's subsidiaries. In 2005, the Company reported foreign exchange losses associated with these loans.

Net loss on early extinguishment of debt in 2005 of \$1.2 million is associated with the fourth quarter 2005 refinancing of the Company's term loan.

### *Taxation*

The effective tax rate for 2006 was 34.8%, compared to 29.8% in 2005. This year's rate includes a \$4.2 million reduction of tax liabilities primarily as a result of the completion of a prior year federal tax audit, partially offset by a partial valuation allowance of \$1.9 million for one of the Company's foreign subsidiaries. The effective tax in 2005 reflects a \$7.4 million reduction of tax liabilities of which \$6.2 million relates to the expiration of the statute of limitations in connection with certain tax positions and \$1.2 million was due to a lower effective state tax rate.

## **2005 compared to 2004**

### *Net Sales*

Net Sales increased by \$274.4 million or 18.8% to \$1,736.5 million, compared to \$1,462.1 million in 2004. The increase was largely due to the May 2004 Armkel acquisition, which contributed sales through May 27, 2005 of \$208.1 million. Also contributing to the increase was the reversal of promotion reserves of \$8.1 million, and favorable foreign exchange rates of \$4.0 million. Effective price increases on certain domestic products and the third quarter introduction of ELEXA, a premium line of sexual health products for women, contributed to the higher sales. Late in 2005, the Company purchased the SPINBRUSH battery-operated toothbrush business from P&G. The Company accounted for the net cash received during a transition period in which P&G continued to provide significant services as other revenue, which amounted to an immaterial amount for the year.

**Table of Contents***Operating Costs*

The Company's gross margin of 36.7% was virtually unchanged as compared to the 36.5% gross margin in 2004. The 2005 gross margin was affected by a \$6.4 million charge associated with the closure of a sub-scale, consumer products manufacturing operation abroad, and plant impairment and equipment obsolescence charges of \$7.8 million. The gross margin was also impacted by higher commodity costs, particularly for oil-based raw and packaging materials used in household and specialty products businesses, partially offset by the effect of cost improvement programs, pricing actions and the previously mentioned reversal of promotion reserves. Gross margin was positively impacted by the full year effect of the Armkel acquisition, whose brands carry a higher gross margin than the Company's existing product lines prior to the acquisition. The 2004 gross margin was affected by a \$10.5 million inventory related purchase accounting charge associated with the Armkel acquisition and \$4.8 million in plant obsolescence and impairment charges.

Marketing expenses of \$183.4 million increased \$22.2 million or 13.8% from 2004, reflecting \$28.0 million associated with the acquired Armkel brands during the first five months of 2005. Expenses for the introduction of ELEXA were more than offset by lower expenses for certain other Personal Care and Laundry and Cleaning products.

Selling, general and administrative expenses ( SG&A ) of \$240.8 million increased \$40.4 million or 20.1% as compared to 2004. Costs associated with the former Armkel business for the five months ended May 27, 2005 were approximately \$38.0 million. Included in the 2005 SG&A expenses are tradename impairment charges of \$6.3 million and an \$8.3 million charge related to litigation involving Andes Trading de Mexico S.A. (the Andes litigation ). Other SG&A costs decreased in 2005 due to lower deferred and performance based compensation costs of approximately \$3.0 million, and lower Sarbanes-Oxley Act related expenses of \$2.2 million. Included in 2004's SG&A is \$4 million of severance costs and the termination costs relating to a foreign subsidiary's pension plan, and a \$1.9 million tradename impairment charge.

*Other Income and Expenses*

The decrease in equity in earnings of affiliates of \$10.3 million reflects the consolidation of the former Armkel business since the May 28, 2004 acquisition date. Included in the Company's equity earnings from Armkel in 2004 is a \$2.5 million tradename impairment charge. The combined results of the Company's other equity investments, Armand Products Company ( Armand ) and The ArmaKleen Company ( ArmaKleen ), increased by \$0.5 million.

Interest expense of \$44.1 million was \$2.7 million higher than 2004. The increase can be attributed primarily to increased debt that was assumed by the Company as part of the Armkel acquisition, and the full year effect of new debt required to purchase the remaining interest in Armkel. Included in 2004's interest expense was \$4.9 million associated with the Company's settlement of an appraisal action brought by former Carter-Wallace shareholders and an indemnification arrangement involving Armkel and the Company, which acquired Carter-Wallace's consumer products business in 2001.

Net loss on early extinguishment of debt of \$1.2 million is associated with the fourth quarter refinancing of the Company's term loan. In 2004, the Company incurred charges of \$22.9 million including an \$8.0 million charge associated with the Company's bank debt refinancing to effect the acquisition of Armkel and a \$14.9 million charge related to the redemption of the Armkel 9 1/2% Senior Subordinated Notes due 2009 assumed as part of the Armkel acquisition.

*Taxation*

The effective tax rate for 2005 was 29.8% as compared to 30.3% in 2004. The tax rate in 2005 was favorably impacted by the reversal of tax accruals of \$7.4 million, of which \$6.2 million related to the expiration

**Table of Contents**

of the statute of limitations in connection with tax positions and \$1.2 million was due to a lower effective state tax rate. The 2004 tax rate was favorably impacted by prior year research and development tax credits and other items totaling \$4.6 million.

**Segment results for 2006, 2005 and 2004**

Segment results are presented based upon segments as described in Note 17 of the notes to the Company's audited consolidated financial statements.

The Company has three reportable segments based on differences in the nature of products and organizational and ownership structures. Specifically, the Company has identified the following segments: Consumer Domestic, Consumer International and Specialty Products. The Company also has a Corporate segment.

Segment revenues are derived from the sale of the following products:

<b>Segment</b>	<b>Products</b>
Consumer Domestic	Household and personal care products
Consumer International	Primarily personal care products
Specialty Products	Specialty chemical products

The Company continues to have a 50 percent ownership interest in the Armand and ArmaKleen partnerships as of December 31, 2006. In 2006, the Company's U.K. Specialty Products subsidiary formed a joint venture with Esseco Group SRL, to market sulphur dioxide based chemical products. The Company's investment in this venture was approximately \$0.1 million. Since the Company did not control these entities as of December 31, 2006, they were accounted for under the equity method in the consolidated financial statements, and the Company's equity in earnings are included in Income Before Taxes and Minority Interest of the Corporate segment.

On May 28, 2004, the Company purchased the remaining 50% of Armkel that it did not own, and Armkel was merged into the Company. Operating results for the former Armkel business have been fully consolidated in the Consumer Domestic and Consumer International segments for periods subsequent to May 28, 2004. The Company's equity in earnings of Armkel's domestic operations for the period up to May 28, 2004 are included in Income Before Taxes and Minority Interest of the Consumer Domestic segment, and equity in earnings of Armkel's international operations for the period up to May 28, 2004 are included in Income Before Taxes and Minority Interest of the Consumer International segment.

Some of the subsidiaries that are included in the Consumer International segment manufacture and sell personal care products to the Consumer Domestic segment. These sales are eliminated from the Consumer International segment results.

The domestic results of operations for OGI are included in the Consumer Domestic segment commencing with the August 6, 2006, acquisition date. The results of operations for OGI's foreign operations since August 6, 2006, are included in the Consumer International segment.

**Table of Contents**

The following table presents selected financial information relating to the Company's segments for each of the three years in the period ended December 31, 2006. The segment discussion also presents product line fluctuations.

(Dollars in thousands)	Consumer Domestic	Consumer Intl	SPD	Corporate	Total
<b>Net Sales</b>					
<b>2006</b>	<b>\$ 1,388,500</b>	<b>\$ 336,868</b>	<b>\$ 220,293</b>	<b>\$</b>	<b>\$ 1,945,661</b>
2005	1,218,221	297,241	221,044		1,736,506
2004	1,077,101	176,694	208,267		1,462,062
<b>Income Before Taxes &amp; Minority Interest</b>					
<b>2006</b>	<b>\$ 166,490</b>	<b>\$ 25,305</b>	<b>\$ 14,164</b>	<b>\$ 7,135</b>	<b>\$ 213,094</b>
2005	142,669	14,322	14,343	3,549	174,883
2004	112,672	15,320	17,984	(18,533)	127,443

(1) In determining Income before Minority Interest and Income Taxes, interest expense, investment earnings, and other income (expense) were allocated to the segments based upon each segment's relative operating profit.

Product line revenues for external customers for the years ended December 31, 2006, 2005 and 2004 were as follows:

(In thousands)	2006	2005	2004
Household Products	<b>\$ 832,957</b>	\$ 713,489	\$ 680,309
Personal Care Products	<b>555,543</b>	504,732	396,792
<b>Total Consumer Domestic</b>	<b>1,388,500</b>	1,218,221	1,077,101
Total Consumer International	<b>336,868</b>	297,241	176,694
Total SPD	<b>220,293</b>	221,044	208,267
<b>Total Consolidated Net Sales</b>	<b>\$ 1,945,661</b>	\$ 1,736,506	\$ 1,462,062

**Consumer Domestic**

*2006 compared to 2005*

Consumer Domestic net sales were \$1,388.5 million in 2006, an increase of \$170.3 million or 14.0% as compared to 2005. The increase is primarily due to sales of SPINBRUSH and OGI products. These acquisitions contributed approximately \$155.0 million of incremental net sales. The Company assumed responsibility for all SPINBRUSH sales and other functions in the U.S., Canada and the U.K. on April 1, 2006, and recognized the gross amount of sales and expenses from the SPINBRUSH business within the consolidated statement of earnings for the U.S. and most foreign locations during the second quarter. During the transition period prior to April 1, 2006, when the seller of the SPINBRUSH business maintained these responsibilities, the Company accounted for the net cash received as other revenue. Sales of the segment's pre-existing product lines increased slightly as a result of higher prices, partially offset by slightly lower volume. Effective February 1, 2006, the Company implemented price increases ranging from 4% to over 10% for products representing about 35% of its U.S. consumer products portfolio's net sales. These products include ARM & HAMMER and XTRA liquid laundry detergents, ARM & HAMMER SUPER SCOOP cat litter and ARM & HAMMER baking soda. Management believes the price increase caused the Company to experience lower product demand as consumers adjusted to the higher prices. However, management believes that these price increases have improved the Company's margins and contributed to achieving its financial goals. Higher sales also reflected growth in liquid laundry detergents, pregnancy kits and pet care, and the reduction of promotion reserves of \$2.7 million, based on updated information, including actual experience, partially offset by lower toothpaste and deodorant sales.

**Table of Contents**

Consumer Domestic Income before Minority Interest and Income Taxes was \$166.5 million in 2006, a \$23.8 million increase as compared to 2005. The increase is primarily due to the contributions from OGI and SPINBRUSH products and the effect of higher gross margins for liquid laundry detergents. The higher profitability was partially offset by higher oil-based manufacturing and freight costs and higher SG&A expenses (primarily stock option expense, higher personnel related expenses, higher research and development costs, higher legal and professional fees and costs associated with the OGI and SPINBRUSH businesses). The segment's profitability was also negatively impacted by tradename and equipment obsolescence charges of \$13.5 million in 2006 and an increase in intangible assets amortization and higher allocated interest expense.

*2005 compared to 2004*

Consumer Domestic Net Sales increased \$141.1 million or 13.1% to \$1,218.2 million in 2005. Personal Care Products increased \$107.9 million primarily due to sales associated with the domestic results of the former Armkel products of \$102.3 million for the five months ended May 27, 2005, higher sales of condoms and diagnostic kits and sales associated with ELEXA, partially offset by lower oral care product sales. Household product sales increased \$33.2 million or 4.9% due to higher sales of ARM & HAMMER and XTRA liquid laundry products, and ARM & HAMMER SUPER SCOOP cat litter, partially offset by lower sales of powdered laundry detergent. Among other increases included in the segment's results is \$6.8 million associated with the reduction of promotion reserves due to a change in estimate. In an effort to reduce the impact of higher raw and packaging costs, the Company implemented price increases during the latter part of 2004 and 2005 for Consumer Domestic products that generated approximately 20% of Consumer Domestic's sales volume. During the fourth quarter of 2005, the Company announced price increases ranging from 4% to over 10% for products representing about 35% of its U.S. consumer products portfolio, effective February 1, 2006. The products affected include ARM & HAMMER and XTRA liquid laundry detergents, ARM & HAMMER SUPER SCOOP cat litter and ARM & HAMMER baking soda. Due to the timing of previously agreed promotional events, the full benefit of the price increase was not realized until the second quarter of 2006.

Consumer Domestic Income before Taxes and Minority Interest increased \$30.0 million to \$142.7 million. This is primarily due to the increased contribution from the former Armkel products for the entire year, the profit impact resulting from higher sales of liquid laundry detergent, TROJAN, FIRST RESPONSE and cat litter products, lower marketing expenses for certain personal care products lower performance based compensation costs, and lower interest expense (in 2004, interest expense reflected the segment's allocation of the interest expense portion of the settlement of the appraisal action brought by former Carter-Wallace shareholders). In addition, 2004 results reflected impairment charges of \$6.7 million and a \$10.5 million inventory step-up charge. The increased profitability was partially offset by higher manufacturing and freight costs in 2005 resulting from higher oil and natural gas prices due in part to Hurricanes Katrina and Rita, which the Company estimated to be \$6.0 million. These cost increases were partially offset by the effect of substantial cost improvements, as well as price increases for about 20% of the segment's products (in terms of net sales volume) which were implemented during 2005. The segment's profitability was also negatively impacted by tradename and plant impairment and obsolescence charges of \$7.8 million and an increase in intangible assets amortization.

**Consumer International***2006 compared to 2005*

Consumer International net sales were \$336.9 million in 2006, an increase of \$39.6 million or 13.3% as compared to 2005. The 2006 net sales reflect \$25.7 million associated with the OGI and SPINBRUSH products and the skin care product acquired late in 2005, favorable exchange rates of \$6.9 million and the reduction of promotion reserves of \$1.8 million, based on updated information, including actual experience. Other products in the segment experienced slight volume and pricing gains. Strong sales in Canada, U.K. and Australia were offset by lower sales of certain skin care brands in Europe.

Consumer International Income before Minority Interest and Income Taxes was \$25.3 million in 2006, an increase of \$11.0 million as compared to 2005. The increase is a result of the contribution from the products of

---

## **Table of Contents**

the acquired businesses. Moreover, the 2005 period reflected a litigation charge of \$8.3 million and a \$6.4 million restructuring charge (which includes both severance and asset impairment charges) associated with the closure of a consumer packaged goods plant at one of its international locations. Partially offsetting the increase was higher manufacturing and distribution costs, an unfavorable sales mix (more lower margin household products), and an increase in marketing expenses in England in support of certain personal care products. Both years include tradename impairment charges which totaled \$3.3 million in 2006 and \$3.0 million in 2005.

### *2005 compared to 2004*

Consumer International Net Sales increased \$120.5 million or 68.2% to \$297.3 million for the year. This is primarily due to \$105.8 million of sales associated with the former Armkel international business during the five months ended May 27, 2005 and \$ 4.2 million relating to favorable foreign exchange rates. The balance of the increase is primarily due to growth in Canada, which saw stronger sales of household products, the UK, which had higher sales of test kits and skin care products and Brazil, as a result of the skin care product acquired in late 2005. Also included in the segment's results was \$1.3 million associated with the reduction of promotion reserves due to a change in estimate.

Income before Taxes and Minority Interest for the year was \$14.3 million, a reduction of \$1.0 million as compared to last year. While 2005 results benefited from the inclusion of the former Armkel business for the five month period ended May 28, 2005, this was more than offset by tradename impairment charges of \$3.0 million, the charge for the Andes litigation and higher marketing expenses. During the fourth quarter of 2005, the Company recorded a \$6.4 million restructuring charge (which includes both severance and asset impairment charges) associated with the closure of a consumer packaged goods plant at one of its international locations. The prior year was negatively impacted by a \$1.6 million inventory step-up charge.

## **Specialty Products**

### *2006 compared to 2005*

Specialty Products net sales were \$220.3 million for 2006, a decrease of \$0.8 million as compared to 2005. The decrease is due to lower volumes, particularly animal nutrition products, largely offset by higher selling prices for specialty chemicals.

Specialty Products Income before Minority Interest and Income Taxes were \$14.2 million in 2006, essentially unchanged from 2005. This principally reflects higher manufacturing costs for certain animal nutrition products, increased SG&A expenses and higher allocated interest expense, offset by the effect of higher prices. In 2005, Specialty Products Income before Minority Interest and Income Taxes included fixed asset impairment charges at the segment's foreign operations of \$3.2 million.

### *2005 compared to 2004*

Specialty Products Net Sales grew \$12.8 million or 6.1% to \$221.0 million, as a result of higher sales of animal nutrition products and specialty chemical products.

Specialty Products Income before Taxes and Minority Interest for the year decreased \$3.6 million to \$14.3 million. The decrease is primarily due to fixed asset impairment charges at the segment's foreign operations of \$3.2 million. Higher contribution from higher sales of animal nutrition and specialty chemical products were offset by higher manufacturing costs worldwide.

## **Competitive Environment**

Many of our competitors are large companies, including The Procter & Gamble Company, Unilever, Inc., The Clorox Company, Colgate-Palmolive Company, S.C. Johnson & Son, Inc., Henkel, Reckitt Benckiser,

## **Table of Contents**

Johnson & Johnson, Inverness and SSL International, many of which have greater financial resources than the Company. These companies have the capacity to outspend the Company if they attempt to gain market share.

Because of the competitive environment facing retailers, the Company faces pricing pressure from these customers, particularly the high-volume retail store customers, who have increasingly sought to obtain pricing concessions or better trade terms. These concessions or terms could reduce the Company's margins. Furthermore, if the Company is unable to maintain price or trade terms acceptable to its trade customers, the customers could increase product purchases from competitors and reduce purchases from the Company, which would harm the Company's sales and profitability.

Consumer products, particularly those that are value-priced, such as laundry and household cleaning products, are subject to significant price competition. From time to time, the Company may need to reduce the prices for some of its products to respond to competitive and customer pressures and to maintain market share.

The Company competes in the oral care and personal care and deodorizing businesses using the unique strengths of its ARM & HAMMER trademark and baking soda technology. These are highly innovative markets, characterized by a continuous flow of new products and line extensions, and requiring heavy advertising and promotion.

In the toothpaste category, after leading its category in growth several years ago, driven by the success of ARM & HAMMER ADVANCE WHITE toothpaste, the Company's share dropped in 2003 mainly as a result of competitive new products and aggressive spending by other manufacturers in the category. However in 2004, share increased modestly based upon the introduction of ARM & HAMMER ENAMEL CARE. Shares in 2005 declined slightly and shares in 2006 were unchanged from 2005.

Early in 2004, the Company launched ARM & HAMMER ENAMEL CARE toothpaste, a product based on proprietary formulation and packaging technology which combines the cleaning and whitening properties of baking soda with fluoride.

Late in 2005, the Company entered the battery-operated toothbrush market as a result of the SPINBRUSH acquisition. The key competitors in this category are Procter & Gamble and Colgate. SPINBRUSH currently holds the number one share position in the category. In 2007, the Company is introducing new SPINBRUSH Pro Slim toothbrushes and a two-speed version of SPINBRUSH.

The domestic condom market is highly concentrated in product offerings with a limited number of competitors. The market is divided between premium brands and price brands, with companies competing on the basis of quality, innovation and price. The major domestic producers are the Company, with its TROJAN, NATURALAMB and CLASS ACT brands, SSL International with its Durex and Avanti brands, and Ansell with its Lifestyles brand. The Company is the market leader with an approximate 73% share in the U.S. The Company is currently the leading advertiser in the U.S. condom category based on dollars spent. In 2004, the Company added two new products to the TROJAN condom line, SHARED PLEASURE and MAGNUM WITH WARM SENSATION, a unique lubricant system which warms the skin on contact for advanced pleasure. In addition, the Warming Sensations lubricating system introduced last year was extended to the HER PLEASURE line of TROJAN condoms. In 2005, the Company introduced TROJAN MINT TINGLE, a uniquely flavored lubricated condom. In 2005, we introduced ELEXA, a line of sexual health products. While the product line did not meet our expectations, it did raise overall condom awareness, which contributed to an increase in TROJAN market share. In 2006, the Company introduced a new ultra-thin TROJAN condom. In 2007, the Company plans to add an intense ribbed TROJAN condom as well as an expanded line of vibrating rings.

The domestic market for home pregnancy and ovulation test kits is divided between premium and value brands. The Company markets its FIRST RESPONSE pregnancy kits in the premium segment with a superior first to detect positioning and ANSWER in the value segment of the category. The home pregnancy test kit

## **Table of Contents**

industry is highly competitive. The major domestic pregnancy test kit producers are the Company, Johnson & Johnson and Inverness. In 2005, the Company introduced ANSWER Daily Ovulation Tracker, which makes ovulation tracking simpler.

The domestic depilatories and waxes market is highly concentrated with a limited number of competitors. Products compete based on their functionality, innovation and price. The major domestic manufacturers are the Company with its NAIR brand, Del Labs with its Sally Hansen brand, and Reckitt Benckiser with its Veet brand. The Company believes that, as a result of its dedicated advertising and promotional programs, distinct packaging and several successful line extensions, NAIR is positioned to continue to be a major participant in lotion and cream depilatories. In 2004, the Company introduced a No Touch line of depilatory products. In 2005, there were several new additions to the NAIR depilatory line, including a novel bladeless shaving kit. In 2007, the Company plans to introduce the NAIR Pretty line and a new NAIR sensitive formula line consisting of five new products.

In 2006, the Company launched in limited distribution XTRA SCENTSATIONS, a highly fragranced and concentrated liquid laundry detergent and ARM & HAMMER ESSENTIALS, a concentrated liquid laundry detergent formulated with plant-based soaps and containing no dyes, phosphates or bleaches. In 2007, the Company is significantly expanding distribution of these items.

In 2006, the Company entered the pre-wash laundry additive category with the acquisition of OXICLEAN. The Company's principal competitors in this category are S.C. Johnson & Son Inc, Reckitt Benckiser and The Clorox Company. Significant competitive activity adversely affected the product line three years ago, but the product line recovered, and, through a strong brand image and high consumer loyalty, is the number one product in the category. In 2007, the Company plans to introduce a new OXICLEAN SPRAY AWAY portable instant stain remover.

Internationally, the Company's products compete in similar competitive categories. Some of the Company's U.S. branded products are also marketed in other countries, holding leading or number two market share positions. Examples include: TROJAN in Canada, Mexico, and the U.K. and NAIR in Canada, Mexico, France, Australia, and the U.K. In Spain, the Company's depilatory products are marketed under the TAKY brand name. The Company also has a position in the cosmetic whitening dentifrice segment with its PEARL DROPS brand in the U.K., Australia, Italy, and Germany (under the PERLWEISS brand), as well as in France (where the Company's products are marketed as EMAIL DIAMANT).

The Company markets home pregnancy test kits in many countries, under such brand names as FIRST RESPONSE, DISCOVER, CONFIDELLE, and ANSWER. This category has been negatively affected in international markets by the introduction of many lower-priced and private label products, but the Company has seen some growth for its international business recently as it introduced the use 4 days before an expected period claim.

In the skin care category, the Company markets such brands as LINEANCE and BARBARA GOULD in France, the former for anti-cellulite and general body care and the latter for facial care. In Spain, the Company markets EUDERMIN hand care cream in the mass market class of trade, where it has a number two position. Recently this line has been expanded to include body and foot care products. During the fourth quarter of 2005, the Company purchased a small skin care brand in South America.

In various countries the Company also markets over the counter pharmaceutical products. These include GRAVOL and OVOL, the leading anti-nauseant and anti-gas brands in Canada, the PANGAVIT range of vitamin supplements in Mexico, and STERIMAR, a sea-water nasal hygiene product sold in France and in about fifty other countries, and most recently in Mexico.

In 2007, the Company formed a small subsidiary in China to assist in launching new products and to manage the contract manufacturers who produce SPINBRUSH.

**Table of Contents**

In the Specialty Products segment, competition within the specialty chemicals and animal nutrition product lines remains intense. The specialty chemicals business operates in a competitive environment influenced by capacity utilization, buyers' leverage and the impact of raw material and energy costs. Both the specialty chemical and animal nutrition businesses have experienced increases in key raw material and energy costs. In addition, the animal nutrition business is affected by the general health of the dairy economy. Both businesses are passing on cost increases where possible and are developing products and applications designed to be differentiated by their value in use.

The Company has a joint venture with the Safety-Kleen Corporation called The ArmaKleen Company. The ArmaKleen Company was formed to build a specialty cleaning products business based on the Company's technology and Safety-Kleen's sales and distribution organization. This joint venture distributes the Company's proprietary product line of aqueous cleaners along with the Company's ARMEX blast media line. The Company continues to pursue opportunities to build this industrial cleaning business using the Company's aqueous-based technology as well as The ArmaKleen Company's ARMEX blast media line of products, which is designed for the removal of a wide variety of surface coatings.

**Liquidity and capital resources***Net Debt*

The Company had outstanding total debt of \$933.3 million and cash of \$110.5 million (of which \$51.3 million resides in foreign subsidiaries). Total debt less cash (Net debt) was \$822.8 million at December 31, 2006. The Company had outstanding total debt of \$756.5 million, and cash of \$126.7 million, resulting in net debt of \$629.8 million at December 31, 2005. The increase in the Company's net debt position of \$193.0 million is primarily due to \$250.0 million of new debt incurred in 2006 to purchase OGI and a \$16.2 million reduction in cash, offset by debt repayments of \$72.9 million. In 2007, the Company anticipates its forecasted cash from operations will be sufficient to meet its capital expenditure program costs, pay its dividends at current rates and meet its mandatory debt repayment schedule.

(in thousands)	Year Ending December 31,		
	2006	2005	2004
<b>Cash Flow Analysis</b>			
Net cash provided by operating activities	\$ 186,444	\$ 190,107	\$ 199,030
Net cash used in investing activities	(385,516)	(105,114)	(229,807)
Net cash (used in) provided by financing activities	177,653	(101,224)	96,381

**Net Cash Provided by Operations** The Company's net cash provided by operations decreased \$3.7 million, to \$186.4 million in 2006. The decrease in net cash provided by operations was due primarily to an increase in working capital (exclusive of cash and cash equivalents) and other liabilities of \$38.1 million in 2006, while in 2005, these items increased by \$4.9 million. The increase in working capital in 2006 was primarily due to the OGI and SPINBRUSH acquisitions. The impact of the increase in working capital was partially offset by higher operating income before non-cash charges for stock based compensation, depreciation, amortization and plant obsolescence, restructuring and impairment charges. In 2005, the Company's net cash provided by operations decreased \$8.9 million, to \$190.1 million. The decrease in net cash provided by operations was primarily due to an increase in working capital (exclusive of cash and cash equivalents) and other liabilities of \$4.9 million in 2005, while in 2004, these items decreased by \$63.3 million from 2003. The impact of the increase in working capital was partially offset by higher operating income before non-cash charges for depreciation, amortization, plant obsolescence, restructuring and impairment charges.

For the years ended December 31, 2006, 2005 and 2004, the components of working capital which impacted operating cash flow is as follows:

Accounts receivable increased by \$14.3 million in 2006 as compared to fiscal year end 2005. This increase was largely due to the Company's strong fourth quarter net sales, which were 22% higher than the fourth quarter

**Table of Contents**

of 2005. This is primarily associated with the OGI and SPINBRUSH acquisitions. In 2005, accounts receivable increased by \$28.4 million as compared to fiscal year end 2004. That increase was largely due to the Company's strong fourth quarter net sales, which were 6.5% higher than the fourth quarter of 2004. Accounts receivable in 2004 decreased \$42.7 million as compared to 2003 due to the impact of the Armkel acquisition, which had higher than average accounts receivable on the date of acquisition.

Inventories increased in 2006 by \$38.8 million due to the OGI and SPINBRUSH acquisitions. Inventories increased in 2005 by \$9.8 million due to the impact of higher raw and packaging costs experienced in 2005, inventory in support of the new ELEXA brand and the need to support higher sales. Inventories declined in 2004 by \$4.9 million reflecting lower raw material inventories.

The net decrease of \$6.2 million in accounts payable, taxes payable and other liabilities in 2006 is related to the timing of payments related to increased payables at December 31, 2005. The net increase of \$34.3 million in accounts payable, taxes payable and other liabilities in 2005 includes the additional reserve recorded in connection with the Andes litigation of \$8.3 million and the timing of tax payments. The increase in 2004 as compared to 2003 is primarily related to higher accrued employee compensation costs and higher sales promotion accruals.

**Net Cash Used in Investing Activities** Cash used in investing activities in 2006 of \$385.5 million reflected \$337.5 million utilized for the OGI and USAD Canadian acquisitions and investments of \$47.6 million in property, plant and equipment. Cash used in investing activities in 2005 of \$105.1 million reflected \$81.1 million utilized for the acquisitions of SPINBRUSH and the skin care product in South America, and investments of \$37.7 million in property, plant and equipment. These uses of cash were partially offset by proceeds of \$14.7 million associated mainly with the sale of the Company's former Cranbury facility. Cash used in investing activities in 2004 of \$229.8 million primarily reflected \$194.2 million utilized in the Armkel acquisition and investments of \$35.6 million in property, plant and equipment. 2007 capital expenditures are expected to be less than the investments made in 2006.

**Net Cash Provided by (Used in) Financing Activities** During 2006 the Company increased its total amount of debt by \$176.8 million. The increase resulted from \$250.0 million borrowed to fund the OGI Acquisition and making both voluntary and mandatory debt repayments of \$72.9 million. In addition, the Company paid cash dividends of \$16.9 million. These decreases were partially offset by proceeds and tax benefits on stock option exercises of \$19.8 million. During 2005, net cash used in financing activities was \$101.2 million. This represented Term Loan B voluntary debt payments of \$100.0 million, the redemption of all the remaining 9 1/2% Senior Subordinated Notes of \$6.4 million and the payments of dividends of \$15.3 million. These uses were partially offset by proceeds from stock option exercises of \$17.2 million.

The Company entered into two cash flow hedge agreements, one effective as of September 29, 2006, and the other effective as of December 29, 2006, to reduce the impact of interest rate fluctuations on its Tranche A term loan debt. Each hedge covers \$100.0 million of zero-cost collars for 5 and 3 years, respectively, with a cap of 6.50% and a floor of 3.57%. There was no income statement impact as a result of these agreements as all changes in the hedging option's fair value are recorded in Accumulated Other Comprehensive Income on the balance sheet.

**Adjusted EBITDA**

On December 23, 2005, the Company entered into an amended and restated credit agreement (the "Credit Agreement") with a number of banks and other financial institutions. This amended and restated Credit Agreement provides for a five year Term Loan A in a principal amount of \$300.0 million, and may be increased by up to an additional \$250.0 million through an accordion feature upon the satisfaction of certain conditions, and continues the existing five year multi-currency revolving credit and letter of credit facility in an aggregate principal amount of up to \$100.0 million. On August 7, 2006, the Company's existing bank credit facility was

**Table of Contents**

amended and increased to allow for the \$250.0 million the Company needed to fund the OGI Acquisition. The obligations of the Company under the Credit Agreement are secured by substantially all of the assets of the Company and certain of its domestic subsidiaries. Those domestic subsidiaries have also guaranteed the loan obligations under the Credit Agreement. Certain of the covenants in the amended and restated credit agreement were also modified. The Term Loan and the Revolving Loans bear interest under one of two rate options, selected by the Company, equal to (a) either (i) a eurocurrency rate (adjusted for any reserve requirements) ( Eurocurrency Rate ) or (ii) the greater of the prime rate, the secondary market rate for three-month certificates of deposit (adjusted for any reserve requirements) plus the applicable FDIC assessment rate plus 1.0%, or the federal funds effective rate plus 0.5% ( Alternate Base Rate ), plus (b) an applicable margin. On the closing date of the new agreement, the applicable margin was (a) 1.00% for the Eurocurrency rate and (b) 0% for the alternate rate. The term loan was used to refinance the Company's Term Loan B and the revolving loans are available for general corporate purposes.

Adjusted EBITDA is a required component of the financial covenants contained in the Company's primary credit facility and Senior Subordinated Notes. Management believes that the presentation of Adjusted EBITDA is useful to investors as a financial indicator of the Company's ability to service its indebtedness. Adjusted EBITDA may not be comparable to similarly titled measures used by other entities and should not be considered as an alternative to cash flows from operating activities, which is determined in accordance with accounting principles generally accepted in the United States. Financial covenants include a total debt to Adjusted EBITDA leverage ratio and an interest coverage ratio, which, if not met, could result in an event of default and trigger the early termination of the credit facility and notes, if not remedied within a certain period of time. The definition of Adjusted EBITDA in the notes is substantially similar to the definition in the credit agreement.

Adjusted EBITDA was approximately \$348.1 million for 2006. The leverage ratio (total debt to Adjusted EBITDA) for 2006 was 2.70 versus the Credit Agreement's maximum of 4.00 and the interest coverage ratio (Adjusted EBITDA to total interest expense) was 6.44 versus the Agreement's minimum of 3.0. The Credit Agreement is secured by the assets of the Company and certain domestic subsidiaries. The reconciliation of Net Cash Provided by Operating Activities (the most directly comparable GAAP financial measure) to Adjusted EBITDA is as follows (in millions):

Net Cash Provided by Operating Activities	\$ 186.4
Interest Expense	54.0
Current Income Tax Provision	65.1
Change in Working Capital and Other Liabilities	30.5
Tax Benefit on Stock Options Exercised	7.6
Investment Income	(5.3)
Other	9.8
Adjusted EBITDA (per loan agreement)	\$ 348.1
Net Cash Used in Investing Activities	\$ (385.5)
Net Cash Used in Financing Activities	\$ 177.7

**Table of Contents**

Commitments as of December 31, 2006

The table below summarizes the Company's material contractual obligations and commitments as of December 31, 2006.

(In thousands)	Total	Payments Due by Period			After 2011
		2007	2008 to 2009	2010 to 2011	
<b>Short &amp; Long-Term Debt</b>					
Syndicated Financing Loans	\$ 481,069	\$ 38,144	\$ 102,892	\$ 244,823	\$ 95,210
Senior Subordinated Notes	250,000				250,000
Convertible Debentures <sup>(1)</sup>	100,000				100,000
Securitization of A/R Facility	100,000	100,000			
Bank Overdrafts	1,979	1,979			
Various Debt from International Banks	288	288			
	933,336	140,411	102,892	244,823	445,210
<b>Interest on Fixed Rate Debt<sup>(2)</sup></b>	229,751	20,250	40,500	40,500	128,501
<b>Operating Lease Obligations</b>	101,597	17,022	25,626	18,681	40,268
<b>Other Long-Term Liabilities</b>					
Letters of Credit <sup>(3)</sup>	13,188	13,188			
Surety/Performance Bonds <sup>(4)</sup>	11,452	11,452			
Purchase Obligations <sup>(5)</sup>	72,593	47,964	24,629		
<b>Total</b>	<b>\$ 1,361,917</b>	<b>\$ 250,287</b>	<b>\$ 193,647</b>	<b>\$ 304,004</b>	<b>\$ 613,979</b>

- (1) On each of August 15, 2010, August 15, 2013, August 15, 2018, August 15, 2023 and August 15, 2028, or in the event of a change in control, holders may require the Company to repurchase all or any portion of the debentures at a purchase price equal to 100.0% of the principal amount of the debentures, plus accrued and unpaid interest to the date of repurchase. The Company must pay cash for any debentures repurchased on August 15, 2010. However, the Company may choose to pay cash, shares of its common stock, or a combination of cash or shares of its common stock for any debentures repurchased on August 15, 2013, August 15, 2018, August 15, 2023 or August 15, 2028 or following a change in control.
- (2) Represents interest on the Company's 5.25% senior convertible debentures due 2033 and interest on the 6% senior subordinated notes due in 2012. The Company did not include interest expense on its variable rate debt as it cannot predict future interest rates.
- (3) Letters of credit with several banks guarantee payment for items such as insurance claims in the event of the Company's insolvency, one year of lease payments on a warehouse and certain inventory purchases.
- (4) A surety bond was posted for the Andes Trading litigation for \$10.5 million (see "Legal Proceedings" in Item 3 of this report for additional details regarding the litigation). Additional surety/performance bonds were established for certain of the Company's construction activities.
- (5) The Company has outstanding purchase obligations with suppliers at the end of 2006 for raw, packaging and other materials and services in the normal course of business. These purchase obligation amounts represent only those items which are based on agreements that are enforceable and legally binding and do not represent total anticipated purchases.

**Off-Balance Sheet Arrangements**

The Company does not have off-balance sheet financing or unconsolidated special purpose entities.

**Financial Condition**

The Company generally relies on operating cash flows supplemented by borrowings to meet its financing requirements. The Company's broad product portfolio, strong brand names and market positions have provided a

## **Table of Contents**

stable base of cash flow. Our broad product line is marketed through multiple distribution channels. The Company believes that, as is the case with other basic consumer products, consumers purchase most of its products largely independent of economic cycles. However, the Company's ability to meet its financial obligations depends on successful financial and operating performance. The Company cannot guarantee that its business strategy will succeed or that it will achieve anticipated financial results. The Company's financial and operational performance depends upon a number of factors, many of which are beyond its control. These factors include:

Competitive conditions in the categories of the consumer products industry in which the Company competes;

The Company's ability to retain certain principal customers, such as Wal-Mart;

Operating difficulties, operating costs or pricing pressures the Company may experience;

Passage of legislation or other regulatory developments that affect the Company adversely;

Delays in implementing any strategic projects; and

Current geo-political events.

The Company has a total debt-to-capital ratio of approximately 52%. At December 31, 2006 the Company had \$75.4 million of additional borrowing capacity available through the revolving loans under its Credit Agreement and a \$250.0 million accordion feature associated with the Term Loan. Management believes that operating cash flow, coupled with the Company's access to credit markets, will be sufficient to meet the anticipated cash requirements for the coming year.

The Company cannot give assurance that it will generate sufficient cash flow from operations or that it will be able to obtain sufficient funding to satisfy all its obligations, including those noted above. If the Company is unable to pay its obligations, it will be required to pursue one or more alternative strategies, such as selling assets, refinancing or restructuring indebtedness or raising additional equity capital. The Company cannot give assurance that any alternative strategies will be feasible or prove adequate to satisfy its obligations.

## **OTHER ITEMS**

### **Market risk**

#### *Concentration of Risk*

A group of three Consumer Domestic customers accounted for approximately 29% of consolidated net sales in 2006, including a single customer, Wal-Mart Stores, Inc., which accounted for approximately 21%. A group of three Consumer Domestic customers accounted for approximately 25% of consolidated net sales in 2005 including Wal-Mart, which accounted for approximately 18%. This group also accounted for approximately 25% of net sales (of which Wal-Mart accounted for 18%) in 2004.

As part of the USA Detergents merger agreement in 2001, the Company divested USA Detergents non-laundry business and other non-core assets to former USA Detergents executives under the new company name of USA Metro, Inc. ( USAM ), subsequently renamed USA Detergents ( USAD ). The Company had a concentration of risk with USAD at December 31, 2006 in the form of accounts receivable of \$2.4 million at December 31, 2006 and approximately \$3.4 million at December 31, 2005, and a \$0.6 million equity interest in USAD and a note receivable of \$2.2 million.

#### *Interest Rate Risk*

Edgar Filing: CHURCH & DWIGHT CO INC /DE/ - Form 10-K

The Company has total debt outstanding at December 31, 2006 of \$933.3 million, of which \$350.0 million or 37% carries a fixed rate of interest. The remaining debt balance is primarily comprised of \$300.0 million in

---

## **Table of Contents**

Term Loans under the Credit Agreement (which may be increased by \$250.0 million upon the satisfaction of certain conditions), \$100.0 million outstanding under the receivables purchase agreement and a loan with a Brazilian bank of approximately \$0.3 million. The weighted average interest rate on all these borrowings at December 31, 2006, excluding deferred financing costs and commitment fees, was approximately 6.1%.

The Company entered into two cash flow hedge agreements, one effective as of September 29, 2006, and the other effective as of December 29, 2006, to reduce the impact of interest rate fluctuations on its Tranche A term loan debt. Each hedge covers \$100.0 million of zero-cost collars for 5 and 3 years, respectively with a cap of 6.50% and a floor of 3.57%. There was no income statement impact as a result of these agreements as all changes in the hedging option's fair value were recorded in Accumulated Other Comprehensive Income on the balance sheet.

The Company's domestic operations and its Brazilian subsidiary have other short and long-term debt that are floating rate obligations. If the floating rate were to change by 100 basis points from the December 31, 2006 level, annual interest expense associated with the floating rate debt would change by approximately \$5.8 million.

### *Foreign Currency*

The Company is subject to exposure from fluctuations in foreign currency exchange rates, primarily U.S. Dollar/Euro, U.S. Dollar/British Pound, U.S. Dollar/Canadian Dollar, U.S. Dollar/Mexican Peso, U.S. Dollar/Australian Dollar and U.S. Dollar/Brazilian Real.

As a result of the Armkel acquisition, the Company assumed intercompany loans with certain of its subsidiaries. The Company was exposed to foreign exchange accounting remeasurement gains and losses from these intercompany loans. The Company previously entered into several foreign exchange contracts to hedge the net accounting remeasurement exposure on these loans. However, at December 31, 2006, the Company had no outstanding hedges as the foreign exchange exposure has been virtually eliminated through the repayment of certain intercompany loans. The purpose of the Company's foreign currency hedging activities was to protect the Company from the risk that the eventual dollar net cash inflows or outflows would be adversely affected by changes in exchange rates. These contracts did not qualify for hedge accounting in accordance with SFAS No. 133 and were marked to market in Other Expenses in the Company's Income Statement.

The Company, from time to time, enters into forward exchange contracts to hedge anticipated but not yet committed sales or purchases denominated in the Canadian dollar, the British pound and the Euro. There were no contracts at December 31, 2006 to hedge these transactions and the Company had no outstanding material contracts at December 31, 2006.

The Company is also subject to translation exposure of the Company's foreign subsidiaries' financial statements. A hypothetical 10% change in the exchange rates for the U.S. Dollar to the currencies noted above at December 31, 2006 and 2005 would result in an annual currency translation gain or loss of approximately \$2.3 million in 2006 and \$1.9 million in 2005.

### *Equity Derivatives*

The Company has entered into equity derivative contracts of its own stock in order to minimize the impact on earnings resulting from fluctuations in the liability to plan participants for contributions designated to Company stock in the Company's deferred compensation plan as a result of changes in quoted fair values. These contracts, which consist of cash settled call options in the amount of 177,500 shares, covered approximately 58% of the notional shares in the plan and are marked to market through earnings. As a result of these contracts, the Company recognized income (expense) of approximately \$1.2 million in 2006, (\$0.3) million in 2005, and \$2.1 million in 2004, which reduced (increased) the total charge for deferred compensation.

---

## **Table of Contents**

### *Related Party Transactions*

Prior to the Armkel acquisition, the Company achieved substantial synergies by combining certain of its operations with those of Armkel, particularly in the areas of sales, manufacturing and distribution, and most service functions. Armkel retained its core marketing, research & development, and financial planning capabilities, and manufactured condoms, but purchased virtually all the support services it required for its U.S. domestic business from the Company under a management services agreement.

For the five months ended May 28, 2004, the Company invoiced Armkel \$10.2 million for administrative and management oversight services (which was included as a reduction of selling, general and administrative expenses), purchased \$0.8 million of deodorant anti-perspirant inventory produced by Armkel in the first five months of 2004 and sold Armkel \$0.7 million of ARM & HAMMER products to be sold in international markets.

In connection with its acquisition of USA Detergents in 2001, the Company divested the non-laundry business and other non-core assets to former executives of USA Detergents. The Company has a \$0.6 million ownership interest in the business operated by the former USA Detergents executives, which initially was known as USA Metro and is now known as USA Detergents ( USAD ). The Company has been supplying USAD with certain laundry and cleaning products at cost plus a mark-up, and USAD had the exclusive rights to sell these products in Canada. In addition, the Company leases office and laboratory space to USAD under a separate agreement.

On June 2, 2006, the Company reacquired the distribution rights from USAD to sell Xtra laundry detergent and Nice N Fluffy liquid fabric softener in Canada for \$7.0 million and agreed to make an additional performance-based payment of a maximum of \$2.5 million based upon the one year sales performance during the one year period following the closing date. The acquisition was funded out of the Company's available cash. If a payment is required, it will be accounted for as additional purchase price and reflected as an increase to goodwill.

During 2006 and 2005, the Company sold \$15.8 million, and \$23.1 million, respectively, of laundry and cleaning products to USAD. Furthermore, the Company billed USAD \$0.2 million and \$0.2 million for leased space during 2006 and 2005, respectively. For open amounts receivable at December 31, 2006 and 2005, see Concentration of Risk.

The Company's only financial interest in Armkel prior to the Armkel acquisition, and in USAD, has been the Company's direct equity investments in Armkel and USAD. The Company had no relationship with the other former equity holders of Armkel and the equity holders of USAD. For this reason, the Company believes it has had no incentive to negotiate with either Armkel (prior to the Armkel acquisition) or USAD in a manner that is not in the best interests of its stockholders generally.

In connection with its Armand and ArmaKleen joint ventures and its partnership with a supplier of sodium raw materials, the Company believes it has no incentive to negotiate with any of those entities in a manner that is not in the best interests of stockholders generally, since it has no equity interest in the other partners. The Company has entered into agreements with these entities in the ordinary course of business.

For the twelve months ended December 31, 2006, 2005, 2004, the Company invoiced Armand \$1.6, \$1.7 and \$1.5 million for administration and management oversight services (which was included as a reduction of selling, general and administrative expenses), respectively. Intercompany sales of Armand products to the Company over the same periods were \$9.7, \$10.7 and \$8.4 million, respectively. As of December 31, 2006 and 2005, the Company had outstanding receivables from Armand of \$0.6 and \$1.0 million. Also, the Company has outstanding accounts payable with Armand of \$0.6 and \$0.7 million as of December 31, 2006 and 2005, respectively.

For the twelve months ended December 31, 2006, 2005, 2004, the Company invoiced ArmaKleen \$2.8, \$2.6 and \$2.6 million for administration and management oversight services (which was included as a reduction of selling, general and administrative expenses), respectively. Intercompany sales of inventory to ArmaKleen over the same periods were \$5.2, \$4.7 and \$4.8 million, respectively. As of December 31, 2006 and 2005, the Company had outstanding receivables with ArmaKleen of \$0.7 and \$0.7 million, respectively.

**Table of Contents**

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Management of Church & Dwight Co., Inc (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management evaluated the Company's internal control over financial reporting as of December 31, 2006. In making this assessment, management used the framework established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). As a result of this assessment and based on the criteria in the COSO framework, management has concluded that, as of December 31, 2006, the Company's internal control over financial reporting was effective.

The Company's independent registered public accounting firm, Deloitte & Touche LLP, have audited management's assessment of the Company's internal control over financial reporting. Their opinion on management's assessment and their opinions on the effectiveness of the Company's internal control over financial reporting and on the Company's financial statements appear on pages 42 and 43 of this annual report on Form 10-K.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of

Church & Dwight Co., Inc.

Princeton, New Jersey

We have audited the accompanying consolidated balance sheets of Church & Dwight Co., Inc. and subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that
