**Table of Contents**

CITIZENS HOLDING COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As of and for the three months ended March 31, 2009

(Unaudited)

**Note 1. Summary of Significant Accounting Policies**

These interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. However, these financial statements do not include all of the information and footnotes required by generally accepted accounting principles (GAAP) for complete financial statements. The interim consolidated financial statements are unaudited and reflect all adjustments and reclassifications, which, in the opinion of management, are necessary for a fair presentation of the results of operations and financial condition as of and for the interim periods presented. All adjustments and reclassifications are of a normal and recurring nature. Results for the period ended March 31, 2008 are not necessarily indicative of the results that may be expected for any other interim periods or for the year as a whole.

The interim consolidated financial statements of Citizens Holding Company include the accounts of its wholly-owned subsidiary, The Citizens Bank of Philadelphia (the Bank) and collectively with Citizens Holding Company, the Corporation. On January 2, 2007, the Bank completed a one-for-one thousand (1-for-1,000) reverse stock split with all fractional shares paid in cash. As a result of this transaction, the Corporation became the 100% owner of the Bank on January 2, 2007. All significant intercompany transactions have been eliminated in consolidation.

For additional significant accounting policies of the Corporation, see Note 1 of the Notes to Consolidated Financial Statements of Citizens Holding Company included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2008, filed with the Securities and Exchange Commission on March 13, 2009.

**Note 2. Commitments and Contingent Liabilities**

In the ordinary course of business, the Corporation enters into commitments to extend credit to its customers. The unused portion of these commitments is not reflected in the accompanying financial statements. As of March 31, 2009, the Corporation had entered into loan commitments with certain customers with an aggregate unused balance of \$46,792,746 compared to an aggregate unused balance of \$44,441,409 at December 31, 2008. There were \$3,609,144 of letters of credit outstanding at March 31, 2009 and \$3,323,809 at December 31, 2008. The fair value of such contracts is not considered material because letters of credit and loan commitments often are not used in their entirety, if at all, before they expire. The balances of such letters and commitments should not be used to project actual future liquidity requirements. However, the Corporation does incorporate expectations about the level of draws under its credit-related commitments into its asset and liability management program.

The Corporation is a party to lawsuits and other claims that arise in the ordinary course of business, all of which are being vigorously contested. In the regular course of business, management evaluates estimated losses or costs related to litigation, and provisions are made for anticipated losses whenever management believes that such losses are probable and can be reasonably estimated. At the present time, management believes, based on the advice of legal counsel, that the final resolution of pending legal proceedings will not have a material impact on the Corporation's consolidated financial condition or results of operations.

**Table of Contents****Note 3. Net Income per Share**

Net income per share - basic has been computed based on the weighted average number of shares outstanding during each period. Net income per share - diluted has been computed based on the weighted average number of shares outstanding during each period plus the dilutive effect of outstanding granted stock options using the treasury stock method. Earnings per share was computed as follows:

	<b>For the Three Months Ended March 31,</b>	
	<b>2009</b>	<b>2008</b>
Basic weighted average shares outstanding	4,851,339	4,865,769
Dilutive effect of granted options	36,138	37,431
<b>Diluted weighted average shares outstanding</b>	<b>4,887,477</b>	<b>4,903,200</b>
Net income	\$ 1,858,644	\$ 1,638,546
Net income per share-basic	\$ 0.38	\$ 0.34
Net income per share-diluted	\$ 0.38	\$ 0.33

**Note 4. Stock Option Plan**

At March 31, 2009, the Corporation had two stock-based compensation plans, which are the 1999 Employees Long-Term Incentive Plan and the 1999 Directors Stock Compensation Plan. As of January 1, 2006, the Corporation began accounting for these plans under the recognition and measurement principles of fair value set forth in Statement of Financial Accounting Standards No. 123R, Share-Based Payment, ( SFAS 123R ) and the Securities and Exchange Commission Staff Accounting Bulletin 107 ( SAB 107 ). SAB 107 provides guidance related to share-based payments transactions, including valuation methods (including assumptions such as expected volatility and expected term), the classification of compensation expense, non-GAAP financial measures, first time adoption of SFAS 123R in an interim period and disclosure in Management s Discussion and Analysis subsequent to the adoption of SFAS 123R.

To determine the expected term of the options granted, the Corporation chose to use the simplified method for plain vanilla options as detailed in SAB 107 for those options granted prior to December 31, 2007. The Corporation determined that those options granted comply with the requirements under SAB 107 and used this method for estimating the expected term of the options granted until December 31, 2007. Beginning with options granted after this date, the Corporation uses the methods prescribed by SFAS 123R. Volatility is determined by using the standard deviation of the differences of the closing stock price of the Corporation s common stock as quoted on the American Stock Exchange (through November 15, 2006, the date of the transfer of the listing of the Corporation s common stock to The NASDAQ Global Market) or The NASDAQ Global Market (since November 16, 2006) on or about the 15<sup>th</sup> of each month starting January 15, 2002. Stock prices prior to that date experienced volatility that is not representative of the volatility experienced since that time and therefore are not used in this calculation.

Although the option grants are not subject to an explicit vesting schedule, the Corporation recognizes that the restriction on exercising options before six months and one day after the grant date constitutes a de facto vesting schedule and must be considered when applying SFAS 123R. SFAS 123R states that a requisite service period may be explicit, implicit or derived and that an implicit service period is one that may be inferred from an analysis of the award s terms. Based on its analysis of the terms of the option awards, management concluded that the restriction on exercising options until six months and one day have passed since the date of grant constitutes a service period under SFAS 123R and the compensation costs should be amortized over this six month period.

The fair value of each option granted is estimated on the date of the grant using the Black-Scholes option-pricing model.

**Table of Contents**

On April 23, 2008, the members of the Board of Directors were granted a total of 13,500 options as specified in the 1999 Directors' Stock Compensation Plan and 1,500 options were granted to an officer under the 1999 Employees' Stock Incentive Plan. These options were granted at an exercise price of \$18.00 per option, which was the closing price of Citizens Holding Company stock on that day. These options are first exercisable on October 24, 2008 and must be exercised no later than April 23, 2018.

The following assumptions were used in estimating the fair value of the options granted to the directors and the officer in the second quarter of 2008.

Assumption	Officer	Directors
Dividend Yield	4.10%	4.10%
Risk-Free Interest Rate	3.15%	3.15%
Expected Life	8.46 years	6.75 years
Expected Volatility	44.82%	44.82%
Calculated Value per Option	\$ 5.92	\$ 5.76

Using the Black-Scholes option-pricing model with the foregoing assumptions, it was determined that the cost of options granted to directors in April 2008 was \$79,952 and should be recognized as an expense of \$13,325 per month over the six month requisite service period, beginning in April 2008. This was recorded as salary expense with a credit to paid-in capital. A deferred tax on these options was recorded in the aggregate amount of \$29,582, or \$4,930 per month, over the six month requisite service period, beginning in April 2008.

Using the assumptions in the previous table, it was also determined that the cost of options granted to the officer was \$8,462 and should be recognized as an expense of \$1,440 over the six month requisite service period, beginning in April 2008. This was recorded as salary expense with a credit to paid-in capital. No deferred taxes were recorded on this option grant.

The following table below is a summary of the stock option activity for the three months ended March 31, 2009.

	Directors' Plan		Employees' Plan	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
Outstanding at December 31, 2008	91,500	\$ 18.05	176,800	\$ 18.64
Granted				
Exercised	(10,500)	13.56	(4,500)	10.94
Expired				
Outstanding at March 31, 2009	81,000	\$ 18.63	172,300	\$ 18.84

The intrinsic value of options granted under the Directors' Plan at March 31, 2009 was \$435,780 and the intrinsic value of options granted under the Employees' Plan at March 31, 2009 was \$863,223 for a total intrinsic value at March 31, 2009 of \$1,299,003.

## **Table of Contents**

### **Note 5. Income Taxes**

FASB Interpretation 48, Accounting for Income Tax Uncertainties ( FIN 48 ), was issued in June 2006 and defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. FIN 48 also provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with any related interest and penalties, and includes guidance concerning accounting for income tax uncertainties in interim periods. The Corporation adopted the provisions of FIN 48 on January 1, 2007, and determined there was no need to make an adjustment to retained earnings upon adoption of FIN 48. As of March 31, 2008, the Corporation had no unrecognized tax benefits related to federal and state income tax matters. Therefore, the Corporation does not anticipate any material increase or decrease in the effective tax rate during 2009 relative to any tax positions taken. It is the Corporation's policy to recognize interest and/or penalties related to income tax matters in income tax expense.

The Corporation and its subsidiaries file a consolidated U. S. federal income tax return. The Corporation is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ending December 31, 2005 through 2008. The Corporation and its subsidiaries' state income tax returns are open to audit under the statute of limitations for the years ended December 31, 2005 through 2008.

### **Note 6. Recent Accounting Pronouncements**

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( SFAS No. 157 ), which establishes a hierarchy to be used in performing measurements of fair value. SFAS No. 157 emphasizes that fair value should be determined from the perspective of a market participant while also indicating that valuation methodologies should first reference available market data before using internally developed assumptions. Additionally, SFAS No. 157 provides expanded disclosure requirements regarding the effects of fair value measurements on the financial statements. This statement applies whenever other standards require or permit assets and liabilities to be measured at fair value. This statement does not mandate the use of fair value in any circumstance. The Corporation adopted SFAS No. 157 on January 1, 2008. The adoption of SFAS No. 157 did not have a material impact on the financial position or results of operations of the Corporation.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (an amendment of FASB Statements No. 87, 88, 106, and 132R) ( SFAS No. 158 ), which requires an employer to: (1) recognize in its statement of financial position an asset for a plan's over funded status or a liability for a plan's under funded status; (2) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (3) recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur. Those changes will be reported in comprehensive income. The requirement by SFAS No. 158 to recognize the funded status of a benefit plan and the disclosure requirements of SFAS No. 158 are effective as of the end of the first fiscal year ending after December 15, 2006 for entities with publicly traded equity securities. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The adoption of SFAS No. 158 did not have a material effect on the Corporation's financial condition or results of operations.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities ( SFAS No. 159 ), which allows an irrevocable election to measure certain financial assets and financial liabilities at fair value on an instrument-by-instrument basis, with unrealized gains and losses recognized currently in earnings. Under SFAS No. 159, the fair value option may only be elected at the time of initial recognition of a financial asset or financial liability or upon the occurrence of certain specified events. SFAS No. 159 requires that assets and liabilities which are measured at fair value be reported in the financial statements in a manner that separates those fair values from the carrying amounts of similar assets and liabilities which are measured using another measurement attribute. SFAS No. 159 also provides expanded disclosure requirements regarding the effects of electing the fair value option on the financial statements. The Corporation adopted SFAS No. 159 on January 1, 2008. The adoption of SFAS No. 159 did not have an impact on the financial position or results of operations of the Corporation.

---

**Table of Contents**

In December 2007, the FASB issued Statement No. 141(R), *Business Combinations* (Statement 141R), which replaces Statement No. 141, *Business Combinations* (Statement 141). Statement 141R retains the fundamental requirements in Statement 141 that the acquisition method of accounting (formerly referred to as purchase method) be used for all business combinations and that an acquirer be identified for each business combination. Statement 141R defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as of the date that the acquirer achieves control. Statement 141R requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values. Statement 141R requires the acquirer to account for acquisition related costs and restructuring costs separately from the business combination as period expense. Statement 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of Statement 141R did not have a material impact on the financial position or results of operations of the Corporation.

In December 2007, the FASB issued Statement No. 160, *Noncontrolling Interest in Consolidated Financial Statements* an Amendment to ARB No 51 (Statement 160). Statement 160 establishes new accounting and reporting standards that require the ownership interests in the subsidiaries held by parties other than the parent be clearly identified, labeled and presented in the consolidated statement of financial position within equity, but separate from the parent's equity. Statement 160 requires the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income. In addition, when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary shall be initially measured at fair value, with the gain or loss on the deconsolidation of the subsidiary measured using the fair value of any noncontrolling equity investment rather than the carrying amount of that retained investment. Statement 160 clarifies that changes in a parent's ownership in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. Statement 160 includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. Statement 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Early adoption is prohibited. The adoption of Statement 160 did not have a material impact on the financial position or results of operations of the Corporation.

In May 2008, the FASB issued SFAS 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. SFAS 162 was approved in November 2008. The Corporation does not expect the implementation of SFAS 162 to have a material impact on its consolidated financial statements.

In April 2009, the FASB issued three FASB Staff Positions (FSP):

FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* amends the other-than-temporary impairment guidance under U.S. GAAP for debt securities to make the guidance more operational and improve the presentation and disclosure in the financial statement. The FSP specifies that if a company does not have the intent to sell a debt security prior to recovery and it is more likely than not that it will not have to sell the debt security prior to recovery, the security would not be considered other-than-temporarily impaired unless there is a credit loss. The credit loss component of an other-than-temporarily impaired debt security must be determined based on the company's best estimate of cash flows expected to be collected.

FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly* provides additional guidance for estimating fair value in accordance with SFAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset and liability have significantly decreased and for identifying circumstances that indicate a transaction is not orderly. SFAS 157 does not prescribe a methodology for making significant adjustments to transactions or quoted prices when estimating fair value in these situations but this FSP states that a change in valuation technique or the use of multiple valuation techniques may be appropriate.

**Table of Contents**

FAS 107-1 and APB 28-1, Interim Disclosure about Fair Value of Financial Instruments - requires companies to provide the same fair value of financial instruments disclosures presently required on an annual basis on a quarterly interim basis.

These three FSP s will be effective for the interim and annual periods ending after June 15, 2009 and are not expected to have a significant impact on the Corporations financial position, results of operations or cash flows other than additional disclosures.

**Note 7. Fair Value of Financial Instruments**

SFAS No.157 establishes a framework for measuring the fair value of assets and liabilities. SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Corporation estimates the fair values of financial assets and liabilities on a recurring basis using the following methods and assumptions:

Securities available for sale: Fair values for securities are based on quoted market prices, where available. If quoted prices are not available, fair values are based on quoted market prices of similar instruments. Level 2 securities include debt securities including obligations of U. S. Government agencies and corporations, mortgage-backed securities, state, county and municipal bonds and preferred stock.

The following table presents assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2009:

	<b>Quoted Prices in Active Markets for Identical Assets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>	<b>Significant Unobservable Inputs (Level 3)</b>	<b>Totals</b>
Securities available for sale	\$	\$ 273,791,271	\$	\$ 273,791,271

The Corporation recorded no gains or losses in earnings for the period that were attributable to the change in unrealized gains or losses relating to assets still held at the reporting date.

**Table of Contents**

CITIZENS HOLDING COMPANY

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Management's discussion and analysis is written to provide greater insight into the results of operations and the financial condition of Citizens Holding Company and its wholly owned subsidiary, The Citizens Bank of Philadelphia (the Bank, and collectively with Citizens Holding Company, the Corporation).

**LIQUIDITY**

The Corporation has an asset and liability management program that assists management in maintaining net interest margins during times of both rising and falling interest rates and in maintaining sufficient liquidity. A measurement of liquidity is the ratio of net deposits and short-term liabilities divided by the sum of net cash, short-term investments and marketable assets. This measurement for liquidity of the Corporation at March 31, 2009 was 37.32% and at December 31, 2008 was 36.17%. Management believes it maintains adequate liquidity for the Corporation's current needs.

The Corporation's primary source of liquidity is customer deposits, which were \$564,598,068 at March 31, 2009 and \$545,927,422 at December 31, 2008. Other sources of liquidity include investment securities, the Corporation's line of credit with the Federal Home Loan Bank (FHLB) and federal funds lines with correspondent banks. The Corporation had \$273,791,271 invested in investment securities at March 31, 2009 and \$258,023,206 at December 31, 2008. The Corporation had secured and unsecured federal funds lines with correspondent banks in the amount of \$40,500,000 at March 31, 2009 and \$19,500,000 at December 31, 2008. In addition, the Corporation has the ability to draw on its line of credit with the FHLB. At March 31, 2009, the Corporation had unused and available \$133,907,051 of its line of credit with the FHLB and at December 31, 2008, the Corporation had unused and available \$127,285,491 of its line of credit with the FHLB. The increase in the amount available under the Corporation's line of credit with the FHLB from the end of 2008 to March 31, 2009 was the result of increased collateral available as calculated quarterly by the FHLB.

At March 31, 2009, the Corporation had \$4,200,000 in federal funds sold compared to none at December 31, 2008. The Corporation invests its excess liquidity in federal funds sold on a daily basis. The amount of increase in federal funds sold from December 31, 2008 to March 31, 2009 was the excess of the increase in deposits that were not utilized to fund loans or invested in investment securities.

When the Corporation has more funds than it needs for its reserve requirements or short-term liquidity needs, the Corporation increases its investment portfolio or sells federal funds. It is management's policy to maintain an adequate portion of its portfolio of assets and liabilities on a short-term basis to insure rate flexibility and to meet loan funding and liquidity needs. When deposits decline or do not grow sufficiently to fund loan demand, management will seek funding either through federal funds purchased or advances from the FHLB.

**CAPITAL RESOURCES**

The Corporation's equity capital was \$72,834,139 at March 31, 2009 as compared to \$71,399,638 at December 31, 2008. The main reason for the increase in equity capital was net earnings in excess of dividends paid. Equity capital was also positively impacted by the FASB 115 adjustment due to an increase in the market value of the Corporation's investment portfolio. This market value increase was due to general market conditions, specifically the decrease in short term interest rates, which caused an increase in the market price of the investment portfolio.

Certain employees and directors exercised stock options for 19,238 shares of stock in 2008. These option exercises brought the number of shares outstanding to 4,849,296 at December 31, 2008. In the first three months of 2009, 4 directors and 2 employees exercised stock options for 15,000 shares of stock. Commencing March 1, 2007, the Corporation implemented a stock repurchase program under which the

**Table of Contents**

Corporation may repurchase up to 250,000 shares of its stock on the open market. At the end of the program, February 29, 2008, the Corporation had purchased 160,186 shares at an average price of \$21.66.

Commencing May 1, 2008 the Corporation implemented a stock repurchase program under which the Corporation may repurchase up to 250,000 shares of the Company's common stock on the open market. The Plan is effective as of May 1, 2008 and will terminate no later than April 30, 2009. At March 31, 2009, the Corporation had purchased 44,284 shares at an average price of \$21.03. This reduced the number of shares outstanding at March 31, 2009 to 4,852,696.

Effective May 1, 2009 the Corporation renewed its stock repurchase program whereby the Corporation may purchase up to 250,000 shares of the Corporation's common stock on the open market. This plan will terminate no later than April 30, 2010.

Cash dividends in the amount of \$970,679, or \$0.20 per share, have been paid in 2009 as of the end of the first quarter.

Quantitative measures established by federal regulations to ensure capital adequacy require the Corporation to maintain minimum amounts and ratios of Total and Tier 1 capital (primarily common stock and retained earnings, less goodwill) to risk weighted assets, and of Tier 1 capital to average assets. Management believes that as of March 31, 2009, the Corporation meets all capital adequacy requirements to which it is subject.

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Actions Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2009						
Total Capital (to Risk-Weighted Assets)	\$ 74,484,803	15.50%	\$ 38,438,186	>8.00%	\$ 48,047,733	>10.00%
Tier 1 Capital (to Risk-Weighted Assets)	\$ 69,801,690	14.53%	\$ 19,219,093	>4.00%	\$ 28,828,640	>6.00%
Tier 1 Capital (to Average Assets)	\$ 69,801,690	9.15%	\$ 30,499,064	>4.00%	\$ 38,123,829	>5.00%

**Table of Contents**

## RESULTS OF OPERATIONS

The following table sets forth for the periods indicated, certain items in the consolidated statements of income of the Corporation and the related changes between those periods:

	<b>For the Three Months Ended March 31,</b>	
	<b>2009</b>	<b>2008</b>
Interest Income, including fees	\$ 9,982,767	\$ 9,729,351
Interest Expense	3,231,936	4,187,337
<b>Net Interest Income</b>	<b>6,750,831</b>	<b>5,542,014</b>
Provision for Loan Losses	316,012	97,617
<b>Net Interest Income after Provision for Loan Losses</b>	<b>6,434,819</b>	<b>5,444,397</b>
<b>Other Income</b>	<b>1,561,716</b>	<b>2,004,344</b>
Other Expense	5,623,659	5,359,194
<b>Income before Provision For Income Taxes</b>	<b>2,372,876</b>	<b>2,089,547</b>
Provision for Income Taxes	514,232	450,001
<b>Net Income</b>	<b>\$ 1,858,644</b>	<b>\$ 1,639,546</b>
<b>Net Income Per share - Basic</b>	<b>\$ 0.38</b>	<b>\$ 0.34</b>
<b>Net Income Per Share-Diluted</b>	<b>\$ 0.38</b>	<b>\$ 0.33</b>

See Note 3 to the Corporation's Consolidated Financial Statements for an explanation regarding the Corporation's calculation of Net Income Per Share - basic and - diluted.

Annualized return on average equity ( ROE ) was 10.23% for the three months ended March 31, 2009 and 9.43% for the corresponding period in 2008. The increase in ROE was caused by the increase in net income for the first three months of 2009.

The book value per share increased to \$15.01 at March 31, 2009 compared to \$14.72 at December 31, 2008. The increase in book value per share reflects the increase in equity due to the amount of earnings in excess of dividends and the increase as a result of the FASB 115 adjustment. Average assets for the three months ended March 31, 2009 were \$766,211,100 compared to \$702,189,790 for the year ended December 31, 2008.

## NET INTEREST INCOME / NET INTEREST MARGIN

One component of the Corporation's earnings is net interest income, which is the difference between the interest and fees earned on loans and investments and the interest paid for deposits and borrowed funds. The net interest margin is net interest income expressed as a percentage of average earning assets.

The annualized net interest margin was 4.09% for the first quarter of 2009 compared to 4.24% for the corresponding period of 2008. The decrease in net interest margin from 2008 to 2009 is the result of a

**Table of Contents**

greater decrease in yields on earning assets compared to the decrease in rates paid on deposits and borrowed funds, as detailed below. Earning assets averaged \$692,972,155 for the three months ended March 31, 2009. This represents an increase of \$54,679,025, or 8.56%, over average earning assets of \$638,293,130 for the three month period ended March 31, 2008. The increase in earning assets for the three months ended March 31, 2009 is the result of the normal growth pattern of the Corporation and not due to any special investments or acquisitions.

Interest bearing deposits averaged \$463,639,816 for the three months ended March 31, 2009. This represents an increase of \$51,477,792, or 12.48%, over the average of interest bearing deposits of \$412,162,024 for the three month period ended March 31, 2008. This was due to an increase in interest bearing deposits and in certificates of deposit outstanding. Other borrowed funds averaged \$139,714,642 for the three months ended March 31, 2009. This represents an increase of \$3,801,669, or 2.79%, over the other borrowed funds of \$135,912,973 for the three month period ended March 31, 2008. This increase in other borrowed funds was due to a \$51,503,974 decrease in the Sweep Account Liability, a \$58,066,891 increase in the Commercial Repo Liability, a \$216,963 decrease in the ABE Loan Liability, a \$532,637 increase in Federal Funds Purchased and a decrease in the Federal Home Loan Bank advances of \$3,076,923 for the three month period ended March 31, 2009 when compared to the three month period ended March 31, 2008.

Net interest income was \$6,750,831 for the three month period ended March 31, 2009, an increase of \$1,208,817 from the \$5,542,014 for the three month period ended March 31, 2008, primarily due to changes in both volume and rate. The changes in volume in earning assets and in deposits and in borrowed funds are discussed above. As to changes in rate, in the three month period ended March 31, 2009, the rates paid on deposits and borrowed funds decreased faster than the yield on earning assets as compared to the changes in rates and yields in the same period in 2008. The yield on all interest bearing assets decreased 87 basis points to 5.97% in the first quarter of 2009 from 6.84% for the same period in 2008. At the same time, the rate paid on all interest bearing liabilities for the first quarter of 2009 decreased by 91 basis points to 2.17% from 3.08% in the same period of 2008. As longer term interest bearing assets and liabilities mature and reprice, management believes that the yields on interest bearing assets and rates on interest bearing liabilities will both decrease.

The following table shows the interest and fees and corresponding yields for loans only.

	<b>For the Three Months Ended March 31,</b>	
	<b>2009</b>	<b>2008</b>
Interest and Fees	\$ 7,341,401	\$ 7,362,527
Average Loans	433,990,307	379,994,171
Annualized Yield	6.77%	7.75%

The decrease in interest rates in the three month period ended March 31, 2009 reflects the decrease in all loan interest rates for both new and refinanced loans in the period.

**CREDIT LOSS EXPERIENCE**

As a natural corollary to the Corporation's lending activities, some loan losses are to be expected. The risk of loss varies with the type of loan being made and the creditworthiness of the borrower over the term of the loan. The degree of perceived risk is taken into account in establishing the structure of, and interest rates and security for, specific loans and for various types of loans. The Corporation attempts to minimize its credit risk exposure by use of thorough loan application and approval procedures.

The Corporation maintains a program of systematic review of its existing loans. Loans are graded for their overall quality. Those loans, which the Corporation's management determines require further monitoring and supervision, are segregated and reviewed on a periodic basis. Significant problem loans are reviewed on a monthly basis by the Corporation's Board of Directors.

**Table of Contents**

The Corporation charges off that portion of any loan that management has determined to be a loss. A loan is generally considered by management to represent a loss in whole or in part when exposure beyond the collateral value is apparent, servicing of the unsecured portion has been discontinued or collection is not anticipated based on the borrower's financial condition. The general economic conditions in the borrower's industry influence this determination. The principal amount of any loan which is declared a loss is charged against the Corporation's allowance for loan losses.

The Corporation's allowance for loan losses is designed to provide for loan losses that can be reasonably anticipated. The allowance for loan losses is established through charges to operating expenses in the form of provisions for loan losses. Actual loan losses or recoveries are charged or credited to the allowance for loan losses. Management of the Corporation determines the amount of the allowance. Among the factors considered in determining the allowance for loan losses are the current financial condition of the Corporation's borrowers and the value of security, if any, for their loans. Estimates of future economic conditions and their impact on various industries and individual borrowers are also taken into consideration, as are the Corporation's historical loan loss experience and reports of banking regulatory authorities. As these estimates, factors and evaluations are primarily judgmental, no assurance can be given as to whether the Corporation will sustain loan losses in excess or below its allowance or that subsequent evaluation of the loan portfolio may not require material increases or decreases in such allowance.

The following table summarizes the Corporation's allowance for loan losses for the dates indicated:

	Quarter Ended March 31, 2009	Year to Date December 31, 2008	Amount of Increase (Decrease)	Percent of Increase (Decrease)
<b>BALANCES:</b>				
Gross Loans	\$ 441,609,683	\$ 428,705,256	\$ 12,904,427	3.01%
Allowance for Loan Losses	4,683,113	4,479,585	203,528	4.54%
Nonaccrual Loans	1,237,287	1,396,885	(159,598)	-11.43%
<b>Ratios:</b>				
Allowance for loan losses to gross loans	1.06%	1.04%		
Net loans charged off to allowance for loan losses	3.38%	20.27%		

The provision for loan losses for the three months ended March 31, 2009 was \$316,012, an increase of \$218,395 from the \$97,617 provision for the same period in 2008. The increase in our loan loss provisions is a result of slightly higher loan losses and a substantial increase in loans outstanding. The Corporation's model used to calculate the provision is based on the percentage of historical charge-offs applied to the current loan balances by loan segment. The provision in the three month period ended March 31, 2009 reflects an increase in the amount of loans outstanding and the need to replenish the allowance for loans charged-off in the first quarter of 2009.

For the three months ended March 31, 2009, net loan losses charged to the allowance for loan losses totaled \$158,286, a decrease of \$12,814 from the \$171,100 charged off in the same period in 2008.

Management of the Corporation reviews with the Board of Directors the adequacy of the allowance for loan losses on a quarterly basis. The loan loss provision is adjusted when specific items reflect a need for such an adjustment. Management believes that there were no material loan losses during the first three months of 2009 that have not been charged off. Management also believes that the Corporation's allowance will be

**Table of Contents**

adequate to absorb probable losses inherent in the Corporation's loan portfolio. However, in light of overall economic conditions in the Corporation's geographic area and the nation as a whole, it is possible that additional provisions for loan loss may be required.

**NON-INTEREST INCOME**

Non-interest income includes service charges on deposit accounts, wire transfer fees, safe deposit box rentals and other revenue not derived from interest on earning assets. Non-interest income for the three months ended March 31, 2009 was \$1,561,716, a decrease of \$442,628, or 22.08%, over the same period in 2008. Service charges on deposit accounts decreased by \$18,132, or 1.94%, to \$914,889 in the three months ended March 31, 2009 compared to \$933,021 for the same period in 2008. Other service charges and fees increased by \$53,537, or 19.83%, in the three months ended March 31, 2009 compared to the same period in 2008. The difference in fee income was the result of fluctuations in volume and not a direct result of fee changes. The program that generated the Shay Investments Income was discontinued during 2008.

The following is a detail of the other major income classifications that are included in Other Income under Non-Interest Income on the income statement.

	<b>Three months ended March 31,</b>	
	<b>2009</b>	<b>2008</b>
<b><u>Other Income</u></b>		
BOLI Insurance	\$ 181,409	\$ 181,005
Mortgage Loan Origination Income	59,248	37,799
Shay Investments Income		369,713
Other Income	82,739	212,912
 Total Other Income	 \$ 323,396	 \$ 801,429

**NON-INTEREST EXPENSE**

Non-interest expenses include salaries and employee benefits, occupancy and equipment, and other operating expenses. Aggregate non-interest expenses for the three month period ended March 31, 2009 and 2008 were \$5,623,659 and \$5,359,194, respectively, an increase of \$264,465, or 4.93%, from 2008 to 2009. Salaries and benefits increased to \$3,143,628 for the three months ended March 31, 2009 from \$3,008,381 for the same period in 2008. This represents an increase of \$135,247, or 4.49%. This increase was the result of an increase in staffing related to the new branches added since the first half of 2008 and normal yearly increases to staff. Occupancy expense increased by \$87,814, or 10.14%, to \$953,411 for the three months ended March 31, 2009 when compared to the same period of 2008. This also reflects the increase in expenses due to the addition of new branches.

The following is a detail of the major expense classifications that make up the other operating expense line item in the income statement.

**Table of Contents**

	Three months ended March 31,	
	2009	2008
<b>Other Operating Expense</b>		
Intangible Amortization	\$ 46,173	\$ 134,376
Advertising	172,196	196,585
Office Supplies	125,126	168,845
Legal and Audit Fees	128,499	90,504
Telephone expense	139,796	113,155
Postage and Freight	89,454	86,719
Loan Collection Expense	58,267	39,708
Other Losses	69,077	30,259
Other expenses	698,032	625,065
<b>Total Other Expense</b>	<b>\$ 1,526,620</b>	<b>\$ 1,485,216</b>

The Corporation's efficiency ratio for the three months ended March 31, 2009 was 65.36% compared to the 68.55% for the same period in 2008. The efficiency ratio is the ratio of non-interest expenses divided by the sum of net interest income (on a fully tax equivalent basis) and non-interest income.

**BALANCE SHEET ANALYSIS**

	March 31, 2009	December 31, 2008	Amount of Increase (Decrease)	Percent of Increase (Decrease)
Cash and Due From Banks	\$ 17,541,752	\$ 28,844,221	\$ (11,302,469)	-39.18%
Investment Securities	273,791,271	258,023,206	15,768,065	6.11%
Loans, net	436,889,936	424,225,671	12,664,265	2.99%
Total Assets	787,310,435	766,047,332	21,263,103	2.78%
Total Deposits	564,598,068	545,927,422	18,670,646	3.42%
Total Stockholders' Equity	72,834,139	71,399,638	1,434,501	2.01%

**CASH AND CASH EQUIVALENTS**

Cash and cash equivalents are made up of cash, balances at correspondent banks and items in process of collection. The balance at March 31, 2009 was \$17,541,752, a decrease of \$11,302,469 from the balance of \$28,844,211 at December 31, 2008 due to an increase in the availability of cash letters sent for collection on the last day of the period.

**PREMISES AND EQUIPMENT**

During the quarter ended March 31, 2009, premises and equipment increased by \$976,305, or 5.68%, to \$18,158,387 when compared to \$17,182,082 at December 31, 2008. The increase was due to the addition of property and equipment in the normal course of business as well as the purchase of a lot in Hattiesburg, MS for the future development of a new branch building. The Bank completed construction and opened a new full service branch in Carthage, Mississippi in late 2008.

**Table of Contents****INVESTMENT SECURITIES**

The investment securities portfolio is made up of U. S. Treasury Notes, U. S. Agency debentures, mortgage-backed securities, obligations of states, counties and municipal governments and FHLB stock. Investments at March 31, 2009 increased \$15,768,065, or 6.11%, to \$273,791,271 from the balance at December 31, 2008. This increase is due to the investment of excess liquidity not needed to fund loan activity. These securities will provide a higher yield than federal funds sold.

**LOANS**

The loan balance increased by \$12,664,265 during the quarter ended March 31, 2009 to \$436,889,936 from \$424,225,671 at December 31, 2008. Residential housing loans continue to be in demand along with commercial and industrial loans. No material changes were made to the loan products offered by the Corporation during this period.

**DEPOSITS**

The following table shows the balance and percentage change in the various deposits:

	March 31, 2009	December 31, 2008	Amount of Increase (Decrease)	Percent of Increase (Decrease)
Noninterest-bearing Deposits	\$ 80,602,784	\$ 95,650,137	\$ (15,047,353)	-15.73%
Interest-bearing Deposits	154,839,569	151,173,161	3,666,408	2.43%
Savings	34,100,812	32,162,992	1,937,820	6.02%
Certificates of Deposit	295,054,903	266,941,132	28,113,771	10.53%
<b>Total Deposits</b>	<b>\$ 564,598,068</b>	<b>\$ 545,927,422</b>	<b>\$ 18,670,646</b>	<b>3.42%</b>

All classifications of deposits, with the exception of non interest-bearing deposits, increased during the quarter ended March 31, 2009. The Corporation decreased its rates paid on interest bearing deposits in response to the rates paid in our market area brought about by the increases in deposits. Management continually monitors the interest rates on loan and deposit products to ensure that the Corporation is in line with the rates dictated by the market.

**OFF-BALANCE SHEET ARRANGEMENTS**

Refer to Note 2 in the notes to the consolidated financial statements included in this report for a discussion of the nature and extent of the Corporation's off-balance sheet arrangements, which consist of commitments to fund loans and letters of credit.

**CONTRACTUAL OBLIGATIONS**

There have been no material changes outside of the ordinary course of the Corporation's business to the contractual obligations set forth in Note 12 to the Corporation's financial statements contained in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2008.

**FORWARD LOOKING STATEMENTS**

In addition to historical information, this report contains statements which constitute forward-looking statements and information within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are based on management's beliefs, plans, expectations and assumptions and on information currently available to management. The

**Table of Contents**

words may, should, expect, anticipate, intend, plan, continue, believe, seek, estimate, and similar expressions used in this report to historical facts are intended to identify forward-looking statements. These statements appear in a number of places in this report, including, but not limited to, statements found in Item 1, Notes to Consolidated Financial Statements and in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations. The Corporation notes that a variety of factors could cause the actual results or experience to differ materially from the anticipated results or other expectations described or implied by such forward-looking statements. The risks and uncertainties that may affect the operation, performance, development and results of the Corporation's business include, but are not limited to, the following: (a) the risk of adverse changes in business conditions in the banking industry generally and in the specific markets in which the Corporation operates; (b) changes in the legislative and regulatory environment that negatively impact the Corporation through increased operating expenses; (c) increased competition from other financial institutions; (d) the impact of technological advances; (e) expectations about the movement of interest rates, including actions that may be taken by the Federal Reserve Board in response to changing economic conditions; (f) changes in asset quality and loan demand; (g) expectations about overall economic strength and the performance of the economies in the Corporation's market area and (h) other risks detailed from time to time in the Corporation's filings with the Securities and Exchange Commission. The Corporation does not undertake any obligation to update or revise any forward-looking statements subsequent to the date on which they are made.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

This item outlines specific risks that could affect the Corporation's ability to compete, change the Corporation's risk profile, or eventually impact the Corporation's financial results. The risks the Corporation faces generally are similar to those experienced, to varying degrees, by all financial services companies.

Our strategies and management's ability to react to changing competitive and economic environments have enabled us historically to compete effectively and manage risks to acceptable levels. The Corporation has outlined potential risk factors below that we presently believe could be important; however, other risks may prove to be important in the future. New risks may emerge at any time and the Corporation cannot predict with certainty all potential developments which could affect the Corporation's financial performance. The following discussion highlights potential risks which could intensify over time or shift dynamically in a way that might change the Corporation's risk profile.

#### Competition Risks

The market in which the Corporation competes is saturated with community banks seeking to provide a service oriented banking experience to individuals and businesses compared with what the Corporation believes, is the more rigid and less friendly environment found in large banks. This requires us to offer most, if not all, of the products and conveniences that are offered by the larger banks with a service differentiation. In doing so, it is imperative that the Corporation identify the lines of business that the Corporation can excel in, prudently utilize the Corporation's available capital to acquire the people and platforms required thereof and execute on the strategy.

#### Credit Risks

Like all lenders, the Corporation faces the risk that the Corporation's customers may not repay their loans and that the realizable value of collateral may be insufficient to avoid a loss of principal. In the Corporation's business, some level of credit loss is unavoidable and overall levels of credit loss can vary over time. Our ability to manage credit risks depends primarily upon the Corporation's ability to assess the creditworthiness of customers and the value of collateral, including real estate. We control credit risk by diversifying the Corporation's loan portfolio and managing its composition, and by recording and managing an allowance for expected loan losses in accordance with applicable accounting rules. At the end of March 2009, the Corporation had \$4.68 million of available reserves to cover such losses. The models and approaches the Corporation uses to originate and manage loans are regularly updated to take into account changes in the competitive environment, in real estate prices and other collateral values, and in the economy, among other things based on the Corporation's experience originating loans and servicing loan portfolios.

#### Financing, Funding and Liquidity Risks

One of the most important aspects of management's efforts to sustain long-term profitability for the Corporation is the management of interest rate risk. Management's goal is to maximize net interest income within acceptable levels of interest-rate risk and liquidity.

The Corporation's assets and liabilities are principally financial in nature and the resulting earnings thereon are subject to significant variability due to the timing and extent to which the Corporation can reprice the yields on interest-earning assets and the costs of interest bearing liabilities as a result of changes in market interest rates. Interest rates in the financial markets affect the Corporation's decisions on pricing its assets and liabilities which impacts net interest income, an important cash flow stream for the Corporation. As a result, a substantial part of the Corporation's risk-management activities are devoted to managing interest-rate risk. There is also focus on managing the risks associated with the volatility of fair value in both mortgage loan servicing rights and mortgage banking assets. Currently, the Corporation does not have any significant risks related to foreign exchange, commodities or equity risk exposures.

## **Table of Contents**

### **Interest Rate and Yield Curve Risks**

A significant portion of the Corporation's business involves borrowing and lending money. Accordingly, changes in interest rates directly impact the Corporation's revenues and expenses, and potentially could compress the Corporation's net interest margin. The Corporation actively manages its balance sheet to control the risks of a reduction in net interest margin brought about by ordinary fluctuations in rates.

The Corporation's mortgage lending and servicing businesses also are affected by changes in interest rates. Generally, when rates increase demand for mortgage loans decreases (and the Corporation's revenues from new originations fall), and when rates decrease, demand increases (and the Corporation's origination revenues increase). In a contrary fashion, when interest rates increase the value of mortgage servicing rights (MSR) that the Corporation retains generally increases, and when rates decline the value of MSR declines. Within the Corporation's mortgage businesses, therefore, there is a partial natural hedge against ordinary interest rate changes.

Like all financial services companies, the Corporation faces the risks of abnormalities in the yield curve. The yield curve simply shows the interest rates applicable to short and long term debt. The curve is steep when short-term rates are much lower than long-term rates: it is flat when short-term rates are equal, or nearly equal, to long-term rates; and it is inverted when short-term rates exceed long-term rates. Historically, the yield curve is positively sloped. However, during much of 2006 the yield curve was inverted and the degree of inversion generally worsened as the year progressed. A flat or inverted yield curve tends to decrease net interest margin, as funding costs increase relative to the yield on assets.

### **Regulatory and Legal Risks**

We operate in a heavily regulated industry and therefore are subject to many banking, deposit, and consumer lending regulations in addition to the rules applicable to all companies publicly traded in the U.S. securities markets. Failure to comply with applicable regulations could result in financial, structural, and operational penalties. In addition, efforts to comply with applicable regulations may increase the Corporation's costs and, or limit the Corporation's ability to pursue certain business opportunities. Federal and state regulations significantly limit the types of activities in which the Corporation, as a financial institution, may engage. In addition, the Corporation is subject to a wide array of other regulations that govern other aspects of how the Corporation conducts the Corporation's business, such as in the areas of employment and intellectual property. Federal and state legislative and regulatory authorities occasionally consider changing these regulations or adopting new ones. Such actions could limit the amount of interest or fees the Corporation can charge, could restrict the Corporation's ability to collect loans or realize on collateral, or could materially affect us in other ways. Additional federal and state consumer protection regulations also could expand the privacy protections afforded to customers of financial institutions, restricting the Corporation's ability to share or receive customer information and increasing the Corporation's costs. In addition, changes in accounting rules can significantly affect how the Corporation records and reports assets, liabilities, revenues, expenses, and earnings.

We also face litigation risks from customers (singly or in class actions) and from federal or state regulators. Litigation is an unavoidable part of doing business, and the Corporation manages those risks through internal controls, personnel training, insurance, litigation management, the Corporation's compliance and ethics processes and other means. However, the commencement, outcome, and magnitude of litigation cannot be predicted or controlled with certainty.

### **Accounting Estimate Risks**

The preparation of the Corporation's consolidated financial statements in conformity with U.S generally accepted accounting principles requires management to make significant estimates that affect the financial statements. Two of the Corporation's most critical estimates are the level of the allowance for credit losses and the valuation of mortgage servicing rights. However, other estimates occasionally become highly significant, especially in volatile situations such as litigation and other loss contingency matters. Estimates are made at specific points in time; as actual events unfold, estimates are adjusted accordingly. Due to the

**Table of Contents**

inherent nature of these estimates, it is possible that, at some time in the future, the Corporation may significantly increase the allowance for credit losses and/or sustain credit losses that are significantly higher than the provided allowance, or the Corporation may recognize a significant provision for impairment of the Corporation's mortgage servicing rights, or the Corporation may make some other adjustment that will differ materially from the estimates that the Corporation make today.

**Expense Control**

Expenses and other costs directly affect the Corporation's earnings. Our ability to successfully manage expenses is important to the Corporation's long-term profitability. Many factors can influence the amount of the Corporation's expenses, as well as how quickly they grow. As the Corporation's businesses change or expand, additional expenses can arise from asset purchases, structural reorganization evolving business strategies, and changing regulations, among other things. The Corporation manages expense growth and risk through a variety of means, including actual versus budget management, imposition of expense authorization, and procurement coordination and processes.

**ITEM 4. CONTROLS AND PROCEDURES**

The management of the Corporation, with the participation of our principal executive and financial officers, has evaluated the effectiveness of our disclosure controls and procedures in ensuring that the information required to be disclosed in our filings under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, including ensuring that such information is accumulated and communicated to the Corporation's management as appropriate to allow timely decision regarding required disclosure. Based on such evaluation, our principal executive and financial officers have concluded that such disclosure controls and procedures were effective as of March 31, 2009 (the end of the period covered by this Quarterly Report on Form 10-Q).

There were no changes to the Corporation's internal control over financial reporting that occurred in the three months ended March 31, 2009 that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

**Table of Contents**

## PART II. - OTHER INFORMATION

**ITEM 1A. RISK FACTORS.**

Information regarding risk factors appears in Part I, Item 1A, Risk Factors, of the Corporation's Annual Report on Form 10-K for the year ended December 31, 2008. There have been no material changes in the risk factors previously disclosed in such Annual Report on Form 10-K.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.****Repurchases of Securities**

The following table summarizes the Corporation's purchases of its own securities for the three-month period ended March 31, 2009:

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1) (2)	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
January 1 to January 31	2,400	\$ 21.14	2,400	
February 1 to February 28	100	19.97	100	
March 1 to March 31	9,100	21.53	200	205,716
Total	11,600	\$ 21.43	2,700	205,716

(1) All shares were purchased through the Corporation's publicly announced share buy-back plan.

(2) On April 30, 2008, the Corporation's board of directors adopted a stock repurchase program which authorizes the Corporation to repurchase up to 250,000 shares of its outstanding common stock. The plan is effective May 1, 2008 and will terminate no later than April 30, 2009. As of March 31, 2009, 44,784 shares of the Corporation's common stock had been purchased and 205,216 shares under the plan were not purchased. All share purchases during 2007, 2008 and 2009 were made pursuant to open market transactions.
