Intertape Polymer Group Reports Second Quarter 2011 Results

Adjusted EBITDA and Adjusted Net Earnings Improved Significantly

MONTREAL, QUEBEC and BRADENTON, FLORIDA - August 10, 2011 - Intertape Polymer Group Inc. (TSX:ITP) (Intertape or the Company) today released results for the second quarter ended June 30, 2011. All dollar amounts are US denominated unless otherwise indicated.

Second Quarter Highlights:

Revenue for the quarter increased 16.3% to \$209.7 million year-over-year

Second quarter gross margin increased to 15.6% from 12.3% last year

Adjusted EBITDA of \$18.5 million increased 83.3% over last year

EPS of \$0.06, and Adjusted EPS of \$0.11

Cash flows from operations before changes in working capital was \$14.1 million

The positive performance we realized during the second quarter reflects the successful execution of our strategic plan. The progress achieved is the result of an improved industry pricing environment, continued internal efforts to reduce manufacturing costs, as well as the contribution of higher-margin products in our mix. While we have regained some pricing power in recent months due to improved market dynamics, the spread between selling prices and raw material costs remains well below our historical and target levels, stated Intertape President and Chief Executive Officer, Greg Yull.

Second quarter revenue increased 16.3% to \$209.7 million, compared to \$180.3 million for the second quarter of 2010 and was up 8.9% sequentially from \$192.6 million for the first quarter of 2011. Sales volume increased by approximately 2% over the second quarter of 2010 and selling prices for the same period increased by approximately 14%. Excluding revenue and sales volume related to products manufactured at the Brantford facility that will no longer be sold, revenue for the second quarter would have been \$207.6 million, an increase of 17.1% compared to \$177.3 million for the same period last year.

Gross profit for the second quarter totalled \$32.7 million, compared to \$22.2 million a year ago and \$23.8 million for the first quarter of 2011. Second quarter gross margin was 15.6% compared to 12.3% for the prior year and 12.4% for the first quarter of 2011. When compared to the second quarter of 2010 and sequentially, gross profit and gross margin were higher due to higher selling prices and improved product mix. Selling prices increased more than conversion costs and slightly more than raw material costs. Sales volume increased approximately 2% from the second quarter of 2010 which further contributed to the increase in gross profit and gross margin. The spread between selling prices and raw material costs is still compressed when compared to periods prior to 2010.

Adjusted EBITDA for the second quarter was \$18.5 million compared to \$10.1 million for the second quarter of 2010 and \$11.8 million for the first quarter of 2011. The higher Adjusted EBITDA when compared to the second quarter of 2010 and the first quarter of 2011 reflects higher revenue and gross margin.

Adjusted net earnings were \$6.3 million for the second quarter of 2011 as compared to an adjusted net loss of \$2.5 million for the second quarter of 2010 and an adjusted net loss of less than \$0.1 million in the first quarter of 2011. Adjusted earnings per share for the second quarter of 2011 was \$0.11 compared with an adjusted loss per share of \$0.04 for the same period last year and an adjusted loss per share of less than \$0.01 for the first quarter of 2011.

Whenever Intertape uses such non-GAAP measures, it will provide a reconciliation of non-GAAP financial measures to the most closely applicable GAAP financial measure. Investors and other readers are encouraged to review the related GAAP financial measures and the reconciliation of non-GAAP measures to their most closely applicable GAAP measure set forth below and should consider non-GAAP measures only as a supplement to, not as a substitute for or as a superior measure to, measures of financial performance prepared in accordance with generally accepted accounting principles (GAAP).

The Company generated cash flows from operating activities before changes in working capital items for the second quarter of \$14.1 million compared to \$9.0 million in the same period last year. The increase was primarily due to Intertape's improved net earnings.

As of June 30, 2011, the Company had cash and unused availability under its Asset-based loan (ABL) totalling \$54.1 million. As of August 8, 2011, the Company had cash and unused availability under its ABL exceeding \$43 million after the \$5.0 million semi-annual interest payment related to the Senior Subordinated Notes was made in the first week of August 2011.

The planned shutdown of the Brantford, Ontario facility was completed on schedule during the second quarter. As indicated previously, this closure will likely have a negative impact on revenue of approximately \$10 million and a positive contribution to EBITDA of approximately \$4 million on an annualized basis. During the six months ended June 30, 2011, \$1.7 million in closure costs were recorded and an additional amount of between \$0.5 to \$1.0 million is expected in the third quarter of 2011. The closure of the Brantford facility had a favorable impact of \$0.3 million on Adjusted EBITDA for the second quarter of 2011 compared to the same quarter last year.

On May 19, 2011 the Company entered into a settlement agreement with Inspired Technologies, Inc. (ITI) with respect to all outstanding litigation between the parties. Pursuant to the terms of the settlement, the Company paid approximately \$1.0 million to ITI in full and complete settlement of all matters between them with respect to the litigation. The charge related to the payment was included in selling, general and administrative expenses for the second quarter of 2011.

As a result of the Company's structural, operational, management and reporting realignments during the third quarter of 2010, the Company no longer has operating divisions and now operates as a single segment. The Company is no longer required to present operating results at a divisional level; however, in the interest of historical reporting consistency, the results discussed below are as per the previously-defined divisions.

T&F Division

Revenue for the Tapes & Films (T&F) Division for the second quarter totalled \$178.5 million, representing a 19.1% increase compared to \$149.8 million for the second quarter of 2010 and a 9.9% increase compared to \$162.4 million for the first quarter of 2011. Sales volume increased by approximately 6% as compared to the second quarter of 2010 and increased approximately 3% sequentially over the first quarter of 2011. Revenue across most product lines contributed to both the year-over-year and sequential increases.

Second quarter gross profit for the T&F Division totalled \$28.9 million at a gross margin of 16.2% compared to \$19.0 million at a gross margin of 12.7% for the second quarter of last year and to \$21.1 million at a gross margin of 13.0% for the first quarter of 2011. The increase in gross profit when compared to last year and sequentially over the first quarter of 2011 was primarily due to increased selling prices and higher sales volume.

The T&F Division's Adjusted EBITDA was \$17.3 million for the second quarter compared to \$9.0 million for the comparable period a year ago and \$11.3 million for the first quarter of 2011.

ECP Division

Revenue for the Engineered Coated Products (ECP) Division for the second quarter was \$31.3 million, representing a 2.8% increase when compared to \$30.4 million for the second quarter of 2010 and a 3.4% increase when compared to \$30.3 million for the first quarter of 2011. Excluding revenue and sales volume related to products manufactured at the Brantford facility that will no longer be sold, ECP revenue for the second quarter would have been \$29.1 million, an increase of 5.9% compared to \$27.5 million for the same period last year.

Excluding revenue and sales volume related to products manufactured at the Brantford facility that will no longer be sold, sales volume would have decreased by approximately 10% compared to the second quarter of 2010 and by approximately 1% over the first quarter of 2011. The decrease in sales volume from the second quarter of 2010 is primarily due to the decision to selectively stop selling certain low-margin products produced at locations other than Brantford. Selling prices would have increased by approximately 18% compared to the second quarter of 2010 and by approximately 7% sequentially from the first quarter of 2011 due to the exclusion of Brantford products that will no longer be sold and a shift in the mix of products sold.

Gross profit for the ECP Division for the second quarter totalled \$3.8 million at a gross margin of 12.1%, compared to \$3.2 million at a gross margin of 10.5% for the second quarter of 2010 and \$2.7 million at a gross margin of 8.9% for the first quarter of 2011. As compared to the second quarter of 2010, gross profit and gross margin increased primarily due to higher selling prices and product mix. Although sales volume decreased, most of the decrease was from low-margin products.

Adjusted EBITDA for the second quarter of 2011 was \$2.0 million compared to \$1.7 million for the same period last year and \$1.2 million for the first quarter of 2011. As indicated before, the closure of the Brantford facility had a positive impact of \$0.3 million in Adjusted EBITDA for the second quarter of 2011 compared to the same quarter last year.

Outlook

The Brantford, Ontario ECP facility closed on schedule during the second quarter and we expect to see the full benefit on Adjusted EBITDA commencing in the third quarter. We are pleased with the significant progress made in second quarter gross margin. Considering the various components impacting this metric, gross margin can vary on a quarterly basis.

Due to economic uncertainty in several of our markets, the sales volume for the third quarter of 2011 is difficult to predict. At this time, the Company anticipates that third quarter revenue and Adjusted EBITDA will be lower than the second quarter of 2011, said Mr. Yull.

EBITDA

A reconciliation of the Company's EBITDA, a non-GAAP financial measure, to GAAP net earnings (loss) is set out in the EBITDA reconciliation table below. EBITDA should not be construed as earnings (loss) before income taxes, net earnings (loss) or cash flows from operating activities as determined by GAAP. The Company defines EBITDA as net earnings (loss) before (i) income taxes (recovery); (ii) finance costs, net of amortization (including foreign exchange gain (loss)); (iii) refinancing expense, net of amortization; (iv) amortization of debt issue expenses; (v) amortization of intangibles assets and deferred charges; and (vi) depreciation of property, plant and equipment. Adjusted EBITDA is defined as EBITDA before (i) manufacturing facility closures, restructuring, strategic alternatives and other charges; (ii) impairment of goodwill; (iii) impairment of long-lived assets and other assets; (iv) write-down on assets classified as held-for-sale; and (v) other items as disclosed. The terms EBITDA and Adjusted EBITDA do not have any standardized meanings prescribed by GAAP in Canada and are therefore unlikely to be comparable to similar measures presented by other issuers. EBITDA and Adjusted EBITDA are not measurements of financial performance under GAAP and should not be considered as alternatives to cash flows from operating activities or as alternatives to net earnings (loss) as indicators of the Company's operating performance or any other measures of performance derived in accordance with GAAP. The Company has included these non-GAAP financial measures because it believes that it permits investors to make a more meaningful comparison of the Company's performance between periods presented. In addition, EBITDA and Adjusted EBITDA are used by management and the Company's lenders in evaluating the Company's performance.

Adjusted Net Earnings (Loss)					

A reconciliation of the Company's adjusted net earnings (loss), a non-GAAP financial measure, to GAAP net earnings (loss) is set out in the adjusted net earnings (loss) reconciliation table below. Adjusted net earnings (loss) should not be construed as net earnings (loss) as determined by GAAP. The Company defines adjusted net earnings (loss) as net earnings (loss) before (i) manufacturing facility closures, restructuring, and other charges; and (ii) other items as disclosed. The term "adjusted net earnings (loss)" does not have any standardized meaning prescribed by GAAP in Canada and is therefore unlikely to be comparable to similar measures presented by other issuers. Adjusted net earnings (loss) is not a measurement of financial performance under GAAP and should not be considered as an alternative to net earnings (loss) as an indicator of the Company's operating performance or any other measures of performance derived in accordance with GAAP. The Company has included this non-GAAP financial measure because it believes that it permits investors to make a more meaningful comparison of the Company's performance between periods presented. In addition, adjusted net earnings (loss) is used by management in evaluating the Company's performance because it believes it provides a more accurate indicator of the Company's performance.

Adjusted earnings (loss) per share is also presented in the following table. Adjusted earnings (loss) per share is a non-GAAP financial measure. Adjusted earnings (loss) per share should not be construed as earnings (loss) per share as determined by GAAP. The Company defines adjusted earnings (loss) per share as adjusted net earnings (loss) divided by the weighted average number of common shares outstanding, both basic and diluted. The term "adjusted earnings (loss) per share" does not have any standardized meaning prescribed by GAAP in Canada and is therefore unlikely to be comparable to similar measures presented by other issuers. Adjusted earnings (loss) per share is not a measurement of financial performance under GAAP and should not be considered as an alternative to earnings (loss) per share as an indicator of the Company's operating performance or any other measures of performance derived in accordance with GAAP. The Company has included this non-GAAP financial measure because it believes that it permits investors to make a more meaningful comparison of the Company's performance between periods presented. In addition, adjusted earnings (loss) per share is used by management in evaluating the Company's performance because it believes it provides a more accurate indicator of the Company's performance.
