# SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

## FORM 10-K

x  
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934  
FOR THE FISCAL YEAR ENDED DECEMBER 31, 2011

COMMISSION FILE NUMBER 001-08524

## MYERS INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

**OHIO**  
(State or other jurisdiction of  
incorporation or organization)

**34-0778636**  
(IRS Employer Identification Number)

**1293 S. MAIN STREET, AKRON, OHIO**  
(Address of Principal Executive Offices)

**44301**  
(Zip Code)

**(330) 253-5592**  
(Telephone Number)

Securities Registered Pursuant to  
Section 12(b) of the Act:  
**Common Stock, Without Par Value**  
(Title of Class)

Name of Each Exchange  
On which registered:  
**New York Stock Exchange**

**Securities Registered Pursuant to Section 12(g) of the Act: None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days. Yes  No

## Edgar Filing: MYERS INDUSTRIES INC - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the closing sale price on the New York Stock Exchange as of June 30, 2011: \$330,081,620

Indicate the number of shares outstanding of registrant's common stock as of February 23, 2012: 33,449,669 Shares of Common Stock, without par value.

### **DOCUMENTS INCORPORATED BY REFERENCE:**

Portions of the Registrant's Definitive Proxy Statement for its 2012 Annual Meeting of Stockholders are incorporated by reference in Part III of this Form 10-K.

**PART I**

**ITEM 1. Business**

**(a) General Development of Business**

Myers Industries, Inc. (the Company) was founded in Akron, Ohio, in 1933. The terms Myers Industries, Company, we, us, or our, wherever used herein refer to the Company, unless the context indicates to the contrary. Since then, the Company has grown from a small storefront distributing tire service supplies into an international manufacturing and distribution enterprise. In 1971, the Company went public, and the stock is traded on the New York Stock Exchange under the ticker symbol MYE.

Headquartered in Akron, Ohio, the Company manufactures a diverse range of polymer products for industrial, agricultural, automotive, commercial and consumer markets. Myers Industries is a leader in the manufacturing of plastic reusable material handling containers and pallets and North America's leading producer of plastic horticultural pots, trays and flower planters. Other principal product lines include plastic storage and organization containers, plastic OEM parts, rubber tire repair products and custom plastic and rubber products.

The Company is also the largest wholesale distributor of tools, equipment and supplies for the tire, wheel and undervehicle service industry in the United States. The distribution products range from tire balancers and alignment systems to valve caps, tire repair tools and other consumable service supplies.

As of March 1, 2012, the Company operates 16 manufacturing facilities, 24 sales offices, four distribution centers and six distribution branches located throughout North, Central and South America; has approximately 12,000 manufactured products and over 10,000 distributed products; and 3,261 employees.

Serving customers around the world, products and related services from Myers Industries' brands provide a wide range of performance benefits to customers in diverse niche markets. Some of these benefits include increasing productivity, driving green initiatives, lowering material handling costs, improving product quality, reducing labor costs, shortening assembly times, eliminating solid waste and increasing profitability.

The Company's business strategy is focused on sustainable, profitable growth guided by five key operating principles: 1) Customer Dedication, 2) Innovation, 3) Operations Excellence, 4) Organizational Development, and 5) Financial Strength. Applying these principles to our business, the Company emphasizes:

Industry-leading innovation of niche, high margin products;

Being the low-cost provider of certain commodity products where our brands excel;

Achieving leadership in key product areas through breadth of offering, consistent quality and superior customer service;

Operations excellence initiatives to reduce costs and improve productivity within the Company's manufacturing and distribution footprint;

Leveraging brand equity and capabilities to grow business with existing customers and cultivate new ones, particularly in emerging growth markets where we can deliver the greatest value and achieve the best returns;

## Edgar Filing: MYERS INDUSTRIES INC - Form 10-K

Investing in new technologies and processes to reinforce customer dedication and market strength across our key business segments;

Succession plans through our management teams at all levels in the Company, ensuring the right people are in the right positions to grow for organization development; and

Selective acquisitions as opportunities arise to enhance our leadership in key markets.

**Table of Contents**

The Company continually reviews its segments and brands for strategic fit and growth potential. The review process is dedicated to furthering innovation and brand leadership in our markets, building strong customer relationships and positioning the Company for strong financial performance.

**(b) Financial Information About Segments**

The response to this section of Item 1 is contained in the Industry Segments footnote of the Notes to Consolidated Financial Statements under Item 8 of this report.

**(c) Description of Business**

The Company conducts its business activities in four distinct business segments, including three in manufacturing and one in distribution. The manufacturing segments consist of: Material Handling, Lawn and Garden, and Engineered Products. In 2009, the Company sold substantially all the assets of its Michigan Rubber Products, Inc. and Buckhorn Rubber Products Inc. businesses which were included in the Engineered Products Segment. As a result, these businesses were classified as discontinued operations in the third quarter of 2009.

In our manufacturing segments, we design, manufacture, and market a variety of plastic and rubber products. These range from plastic reusable material handling containers and small parts storage bins to plastic horticultural pots and hanging baskets, decorative resin planters, plastic OEM parts, tire repair materials and custom plastic and rubber products.

The Distribution Segment is engaged in the distribution of tools, equipment and supplies used for tire, wheel and undervehicle service on passenger, heavy truck and off-road vehicles.

**Table of Contents**

The following table summarizes the key attributes of our business segments in continuing operations for the year ended December 31, 2011:

<b>Continuing Operations</b>	<b>Material Handling Segment</b>	<b>Lawn and Garden Segment</b>	<b>Distribution Segment</b>	<b>Engineered Products Segment</b>

## Table of Contents

### *Manufacturing Segments Overview*

#### *Material Handling Segment*

The Material Handling Segment is comprised of plastic reusable material handling containers, pallets and bins, as well as metal shelving, cabinet and racking systems. The two major brands in this segment, **Buckhorn**<sup>®</sup> and **Akro-Mils**<sup>®</sup>, have strong leadership positions across markets such as automotive, appliance, general industrial/manufacturing, retail distribution, agriculture, and food processing. This leadership position is built through constant innovation, diverse manufacturing processes, consistent quality and superior customer service resulting in significant productivity and cost-saving benefits for our customers.

Buckhorn's reusable containers and pallets are used in closed-loop supply chains to help customers reduce material handling costs by replacing single-use cardboard boxes, easily damaged wooden pallets and high-cost steel containers. Cost-reduction benefits include: improving product protection, increasing handling efficiencies, reducing freight costs and eliminating solid waste and disposal costs. Small parts bins, storage systems and transport products from Akro-Mils provide similar benefits by creating storage and organization efficiency throughout our end users operations.

Buckhorn offers a product selection rich in both breadth and depth, as well as a direct sales force with the packaging and material handling expertise that makes Buckhorn a key solutions partner for our customers. Buckhorn's product line spans injection-molded hand-held containers and totes; injection and structural foam-molded bulk transport containers in both collapsible and fixed-wall styles; and injection and structural foam pallets. Buckhorn also produces custom material handling packaging. Customers rely on Buckhorn's single-source efficiency and the productivity and profitability benefits delivered through value-added innovation, broad product selection, quality and packaging conversion services.

Buckhorn hand-held containers include attached lid, detached lid, bi-color and specialty styles that stack and/or nest for efficient space usage, thus lowering freight and storage costs. In manufacturing plants across North America, our container and pallet systems are reused hundreds of times to ship products such as small fasteners or large components from suppliers directly to assembly areas protecting parts throughout the supply chain and reducing scrap rates. Our attached lid containers and pallets are used in retail distribution centers to organize inventory, sort orders and then transport products directly to stores. In the food processing and distribution industry, our specialty containers provide superior protection to food products while in transit and are more sanitary than cardboard boxes.

Buckhorn's selection of collapsible and fixed-wall bulk transport containers leads the North American material handling industry. Bulk containers perform both light and heavy-duty tasks, whether distributing seed products, carrying large automotive components or shipping liquids across long distances. These containers range in size from footprints of 32 x 30 to 70 x 48 ; heights up to 65 ; and weight capacities up to 3,000 lbs. Bulk containers are compatible with forklifts for easy handling. Many of the containers collapse to a third of their size for space-saving stacking, storage and return transport, thus helping to reduce freight and storage costs.

Examples of bulk container applications include our Center Flow Container, which is used by leading seed distributors to efficiently transport and dispense up to 2,500 lbs. of their products. The unique Center Flow Container can be emptied in approximately 30 seconds, then broken down for return shipping and refilling, thus eliminating waste created by traditional seed bags. Manufacturers of tomato paste employ our Caliber<sup>®</sup> and Citadel<sup>®</sup> bulk containers to move processed tomato products across the country in railcars. The smooth-sided, impact-resistant containers replace wooden crates and steel containers that can cause product damage and contamination. Citadel<sup>®</sup> containers can carry up to 3,000 lbs. /300 gallons of liquefied product, safely stack when fully loaded and are designed for long-term indoor or outdoor storage of loads. This product line is applicable to other food processing and ingredient niches such as concentrates, oils, syrups and similar products.

---

**Table of Contents**

Recently, Buckhorn introduced a new class of pallet-sized, collapsible containers featuring an integrated pallet and lid system. The Maximizer is a unique alternative for corrugated bulk container users. Unlike short-lived corrugated containers that are awkward to assemble and knock down Maximizer is easily constructed by one person and can be reused hundreds of times. The walls easily assemble and collapse, while the integrated locking system provides strength and stability in transport. It is made from durable, moisture-resistant plastic and can be stored indoors or outdoors. The container is an ideal solution for shipping and storing light-duty dry goods and maximizes productivity, cost savings, safety, space usage and sustainability.

Buckhorn's innovation in bulk containers also focuses on specific niche markets where the Company's expertise can bring significant value in a closed loop supply chain. For example, in 2011 Buckhorn acquired tooling assets and intellectual property for a new reusable plastic container used in producing, shipping, storing and processing bulk natural cheese. The new 640 Cheese Box is a natural extension to Buckhorn's bulk container product line, offering many benefits over the industry's traditional wood boxes by providing end users with less waste and faster cycle times. It is compatible with cheese industry manufacturing processes including dolly and forklift transport, automation, vacuum chambers, inverters, packaging and weighing. The 640 Cheesebox has a 24 x 30 x 37 footprint and a 710-lb. fill capacity. It reduces waste and improves sanitation and quality by replacing wood boxes, which can splinter and contaminate cheese during the material handling process. USDA approved, the container allows for faster cool down to 40 degrees within seven days, thereby minimizing cold storage requirements and producing more consistent cheese from the core to the outside surface.

Buckhorn's plastic pallets interwork with the hand-held containers and totes to create a completely reusable system and provide efficient space utilization in plants, warehouses and truck trailers helping customers to reduce storage and freight costs. Buckhorn also produces a wide range of specialty pallets for niche-type shipping applications, such as drum pallets for chemical and liquid transport.

Akro-Mils provides customers with virtually everything needed to store, organize and transport for greater productivity and profitability. These material handling products serve industrial and commercial end-users through leading industrial supply catalogers and material handling distributors. Products range from AkroBins® the industry's leading small parts bins to Super-Size AkroBins, metal panel and bin hanging systems, metal storage cabinet and bin systems, wire shelving systems, plastic and metal transport carts and a wide variety of custom storage and transport products. Capabilities used throughout the Akro-Mils product line include: injection molding, metal forming, powder-coat painting/metal finishing and wood fabrication.

Akro-Mils products deliver storage and organization solutions in a wide variety of applications, from creating assembly line workstations to organizing medical supplies and retail displays. Emphasis is placed on product bundling and customizing systems to create specific storage and organization configurations for customers' operations. For example, industrial manufacturers with specialized tool and parts storage areas known as tool cribs use a combination of Akro-Mils bins, racking, locking cabinets, work tables and transport carts to speed assembly times, maintain accurate inventories and reduce loss. Metal carts and dollies are paired with custom-made containers to create unique transport systems capable of handling parts and components both small and large. Our powder coating/painting capability allows for high-quality, scratch-resistant finishing of metal products in a multitude of colors and finish styles.

Cross-marketing and cross-selling are key synergies between the Material Handling Segment brands. Equally important are cross-manufacturing capabilities that allow each brand to offer customers a wider range of value-added design and molding benefits. In addition to standard material handling products, we utilize the extensive design and manufacturing capabilities between Buckhorn and Akro-Mils for turnkey production of custom material handling products.

With the resulting benefits of reducing packaging costs, improving safety and quality, simplifying workflows and eliminating waste, Akro-Mils products provide the perfect solution for workplace efficiency

## Table of Contents

programs, such as 5S Lean. In support of such programs, Akro-Mils has introduced several new product lines in the last year, including the clear Insight Bin for the healthcare industry and the unique, bi-colored Indicator Bin, which provides a visual cue to refill bins for efficient assembly line, supply room or distribution center work. As a result of such new product development and listening to the voice of the customer to provide solutions, the Akro-Mils brand is recognized throughout the material handling industry for continuous innovation, high quality and reliable service.

All of our Material Handling Segment products are designed to reduce the waste produced by cardboard boxes and wooden pallets in supply chains. In our own manufacturing and product innovation, we continue to seek eco-friendly alternatives for our own plastic products. For example, our Akro-Mils EarthSaver® AkroBins and Shelf Bins are produced from 100 percent recycled plastics. Available in earth tone colors of terra cotta, hunter green and sandstone, the EarthSaver Series offers users an eco-friendly choice in plastic storage and organization products, while boosting productivity in the workplace and helping companies make a positive impact on the environment. In addition, our Buckhorn business utilized more than 23 million lbs. of recycled or reprocessed plastics in its manufacturing process last year. This accounted for approximately 23 percent of Buckhorn's total material usage, applied to products ranging from hand-held totes to bulk containers.

Sustainable, profitable growth in this segment is fueled by: a strong focus on innovation with value-added new products; concentrating sales efforts on niche markets and applications; increasing awareness of plastic reusable material handling products to drive conversions from cardboard and wood products; and managing the balance of product pricing and raw material costs. The potential for strategic, bolt-on acquisitions also provides opportunities to expand the scope of our brand leadership and the range of value-added products and services that we bring to customers.

### *Lawn and Garden Segment*

The Company's Lawn and Garden Segment includes the **Dillen**, **ITML**®, **Pro Cal**®, **Listo**, **Planters**, **Pride**® and **Akro-Mils Lawn & Garden**® brands, which serve the horticultural container needs of the North American floriculture/horticulture market. Our product selection, manufacturing capabilities, quality and customer service rank at the top of our category in the market, which spans professional growers with 150-plus acre greenhouse facilities to regional nurseries to retail garden centers and retail home centers.

In 2009, the Company carried out a realignment of its Lawn and Garden Segment. This resulted in the decision to close three facilities and reallocate production to the segment's other five remaining facilities. These initiatives have enabled the Company to consolidate manufacturing and capacity, optimize distribution and supply chain channels, and drive increased productivity and customer service excellence through improved forecasting, workflow, and inventory management programs.

For growers, our Dillen®, ITML®, and Pro Cal® products are available both direct and through a network of leading horticultural distributors. Our product range is one of the most extensive in North America. Products include injection-molded and thermoformed pots, hanging baskets, flats and carry trays, plug trays, nursery containers, propagation sheets, and specialty pots. Product innovation is centered on the changing needs of the professional grower, including increased automation in growing operations, improving efficiency and reducing costs, while focusing on environmental friendliness. For example, a recent focus has been in lightweight co-extruded ( CoEx ) thermoformed pots. CoEx pots have a thinner wall construction compared to injection pots and combine a color exterior with a dark interior layer made from recycled material. This interior layer helps to protect plant roots against potential sunlight damage in both grower and retail operations, and the recycled material helps protect the environment.

In addition to working with growers on product innovation, we support their increasing needs for branding and retail merchandising programs with services such as in-mold labeling, multi-color offset printing and adhesive labeling. Once filled with plant material by the grower and shipped to retail, these customized pots serve as packaging for plants and create vibrant point-of-sale materials.

For retailers, our Listo brand encompasses decorative resin planters that feature intricate molding details and unique finishes in ceramic, metallic, weathered stone and textured styles. The upscale look of these

## Table of Contents

decorative planters captures the retailer's attention and the consumer's imagination. Products include a diverse offering of planters, window boxes, urns and hanging baskets for indoor and outdoor container gardening. Consistent new product development is key to success in the retail garden center and mass merchandiser channels. Proprietary molding and finishing processes, along with creative designs, deliver the unique look in the decorative resin planter category that sets our planters apart from the competition in leading retail stores across North America.

In addition to Listo, two other brands in the retail channel of the Lawn and Garden Segment include Planters® Pride and Akro-Mils Lawn & Garden® products. Planters® Pride has a diverse product offering dedicated to the at-home gardener. Featured products include a wide range of Fiber Grow® seed starting kits with 100 percent peat-free renewable coir pellets and other garden accessories, backed by customizable retail displays. Akro-Mils Lawn & Garden provides a wide range of plastic patio pots, planters and hanging baskets as well as watering cans and other related items for the home gardener.

Myers Industries seeks to expand its market leadership in the Lawn and Garden Segment through unrivaled product innovation and selection, diverse manufacturing processes and superior customer satisfaction. One of these initiatives continues to be expanding the use of reprocessed and recycled materials in the manufacturing process, which helps to reduce the Company's exposure to higher costs for virgin raw material and furthers our commitment to environmentally responsible manufacturing. In addition to sourcing sustainable eco-friendly materials, such as Coconut Coir (coconut husk) for Fiber Grow® products, the Lawn & Garden Group reprocesses plastic scrap into new containers. Our operations recycle and reprocess more than 100 million pounds of plastic annually, a capability unlike any other manufacturer in the business, to close the loop on waste.

Weather conditions, grower consolidation and grower supply chain adjustments to meet retail merchandising programs are some of the key external factors that influence this industry. As one of the industry leaders, however, the Company is well positioned to further align our capabilities to effectively meet the external challenges and changing needs of customers and the markets.

### *Engineered Products Segment*

Myers Industries serves diverse niche markets and customers with rubber and plastic products from the Engineered Products Segment. Through our **Ameri-Kart**, **Patch Rubber** and **WEK**® brands, we provide an array of engineered plastic original equipment and replacement parts, tire repair materials and custom rubber and plastic components and materials. We offer a unique combination of product design, molding and finishing expertise to support our customers' needs for efficient, single sourcing of parts and turnkey custom product development. In addition to our plastics molding capabilities, we utilize a full range of rubber molding processes that include: injection molding; compounding, calendaring and extrusion; and 3-D co-extrusion blow molding. Additional capabilities include custom rubber formulation, mixing and testing.

WEK® supports passenger car and truck manufacturers to create plastic components and assemblies for a wide variety of vehicle platforms. Our proven track record and expertise affords us guest engineering status with one of the world's leading automakers and suppliers. Our molding and assembly capabilities produce a diversified product mix, which includes: HVAC components, tubing assemblies and other custom items. The Company's focus in the automotive arena is on highly engineered, niche products for select automotive platforms and strategic, long-term customers—both transplants and domestics—who reward their value-added manufacturing partners. In addition, WEK provides plastic blow molded components for industries outside of automotive. In the marine industry, WEK produces a full range of Dock Floats for creating boat docks in marinas, private clubs, boatyards and elsewhere. The floats feature one piece, no seam construction, with resistance to oil, diesel fuel and saltwater. For the waste management industry, WEK produces several varieties of Waste Carts, Recycle Bins and Waste Can Liners in styles and sizes to meet the industry's diverse product needs. In the custom molding arena, WEK produces a wide variety of products, such as Double Wall Storage Cases, used as packaging and for storing and protecting tools, electronics, medical equipment, firearms and other valuables. Other custom items include Coolers, Residential and Commercial Downspout Systems, Trade Show

## **Table of Contents**

Display Cases and more. WEK's blow molding press sizes range from large and small to fit a customer's precise product needs.

Manufacturers of recreational vehicles (RV) and watercraft rely on our design expertise and production capabilities to provide them an assortment of products. Through our Ameri-Kart brand, we create rotationally-molded plastic tanks for water, fuel and waste handling that are assembled to fit the precise space constraints within RV and marine craft designs. We also utilize thermoforming and rotational molding to manufacture plastic trim and interior parts for RVs. In addition to molding fuel tanks, seat components, consoles and storage tanks for watercraft, Ameri-Kart recently introduced its patented Enviro-Fill® overfill prevention system (OPS) technology for its marine fuel tanks. Ameri-Kart is the industry's only turnkey provider with an integrated, Environmental Protection Agency (EPA)-compliant marine fuel tank and patented Enviro-Fill® diurnal system. This OPS/tank vent and sensor system provides venting and monitoring of the fuel level in the tank during filling and transfers a pressure signal to the deck fitting when fuel reaches a predetermined level. Integrated with its new low permeation fuel tanks, recently certified by the EPA to meet the standards of evaporative emissions, this makes Ameri-Kart unique in offering customers a total system for marine fuel tank solutions. This in turn affords boat manufacturers a single source to comply with new EPA and American Boat and Yacht Council (ABYC) refueling and emission regulations, effective for the 2012 model year.

Our manufacturing of rubber products began more than 60 years ago with our Patch Rubber brand, initially making tire patches. Today, we manufacture one of the most comprehensive lines of tire repair and retreading products in the United States. Service professionals rely on our extensive product selection and quality for safe, cost-effective repairs to passenger, truck and off-road tires. Products range from the plug that fills a puncture, the cement that seats the plug, the tire innerliner patch and the final sealing compound. Patch brand repair products maintain a strong position in the tire service markets including sales through our Distribution Segment's sales network.

Also within the capabilities of Patch Rubber, we apply our rubber calendaring and compounding expertise to create a diverse portfolio of products outside of the tire repair market, such as reflective highway marking tapes. Our rubber-based tape and symbols provide the durability and brightness that construction professionals demand to replace paint for marking road repair, intersections and hazardous areas. Compared with traditional highway paint, the tape stock is easier to apply, more reflective and longer lasting. It is available in both temporary and permanent grades to meet the customers' specific requirements.

Other custom products represent a wide range of markets and applications. These include: plastic elevated toilet seats and tub rails for the healthcare market, specialty tapes used for cable splicing in the telecommunications industry and custom rubber linings for material handling conveyors.

### ***Distribution Segment Overview***

Our Distribution Segment includes the **Myers Tire Supply®** and **Myers Tire Supply International®** brands. Myers Tire Supply is the largest U.S. distributor and single source for tire, wheel and undervehicle service tools, equipment and supplies. We buy and sell nearly 10,000 different items—everything that professionals need to service passenger, truck and off-road tires, wheels and related components. Independent tire dealers, mass merchandisers, commercial auto and truck fleets, tire retreaders and general repair facilities rely on our broad product selection, rapid availability and personal service to be more productive and profitably grow their business.

In 2011, we enhanced our business model to optimize our domestic distribution network. We now serve the domestic market through sales districts, sales offices, and four regional distribution centers compared to 33 branches that acted as individual profit centers historically. Our new network has improved overall customer service levels, reduced operating costs, and simplified the supply chain. Internationally, we have three branches in Canada and three in Central America. Sales personnel from our Akron, Ohio headquarters cover niche markets in the Far East, Middle East, South Pacific and South America.

---

## **Table of Contents**

We purchase products from trusted, industry-leading manufacturers to ensure quality is delivered to our customers. Each of the brand-name products we sell is associated with superior performance in its respective area. Some of these well-known brands include: *Chicago Pneumatic* air tools; *Hennessy* tire changing, balancing and alignment equipment; *Corghi* tire changers and balancers; *Ingersoll-Rand* air service equipment; *HofmannUSA* tire balancing and changing equipment; *Rotary* lifts and related equipment; *Alligator VentilFabrik GMBH* tire pressure monitoring systems and tire valve hardware; *Perfect Equipment* wheel weights; and our own Patch Rubber brand tire patches, cements and repair supplies.

An essential element of our success in the Distribution Segment is the network of field sales representatives, who deliver personalized service on a local level. Customers rely on Myers Tire Supply sales representatives to introduce the latest tools and technologies and to provide training in new product features and applications. Representatives also teach the proper use of diagnostic equipment and present on-site workshops demonstrating industry-approved techniques for tire repair and undervehicle service.

With a commitment to innovation for our customers, our Myers Tire Supply team has introduced several new product and service offerings that continue to make our customers' experience with Myers Tire Supply uniquely valuable. These included a full range of Tire Pressure Monitoring System products, a web-based Torque Tracker program for commercial fleet service providers, and a green nitrogen tire inflation program, which is designed to help our tire dealer customers with service to their customers through the benefits of greater fuel efficiency and tire life, as well as communications of regular tire maintenance updates.

While the needs and composition of our distribution markets constantly change, we adapt and deliver the new products and services that are crucial to our customers' success. The new product pipeline is driven by innovations from auto and tire manufacturers, which in turn prompts Myers Tire Supply and its suppliers to develop new equipment, supplies and service techniques to keep cars and trucks moving down the road with confidence.

The Distribution Segment is well positioned to continue its steady growth. The Myers Tire Supply (U.S.) brand is positioned to expand its leadership through superior product selection, rapid delivery and the personal service that is the hallmark of the Company's success in the tire, wheel, and undervehicle service marketplace. The Myers Tire Supply International brand is positioned to expand distribution of tire supplies in select regions of the world, presenting new growth opportunities for our diverse manufacturing businesses. All of this can be achieved through: 1) ongoing productivity improvements in our distribution network, 2) growing within key domestic market sectors and emerging international markets, 3) delivering a continuous flow of new products with first-to-market speed and 4) improving efficiency and customer satisfaction through implementation of innovative supply chain management technologies. Strategic, adjacent acquisitions or investments are also a potential growth avenue in this segment.

### ***Raw Materials & Suppliers    Manufacturing and Distribution Segments***

For the manufacturing segments, the Company purchases substantially all of its raw materials from a wide range of third-party suppliers. These materials are primarily polyethylene, polypropylene, and polystyrene plastic resins, as well as synthetic and natural rubber. Most raw materials are commodity products and available from several domestic suppliers. We believe that the loss of any one supplier or group of suppliers would not have a material adverse effect on our business.

Our Distribution Segment purchases substantially all of its components from third-party suppliers and has multiple sources for its products.

### ***Competition***

Competition in the manufacturing segments is substantial and varied in form and size from manufacturers of similar products and of other products which can be substituted for those produced by the Company. In general, most direct competitors with the Company's brands are private entities. Myers Industries maintains strong brand presence and market positions in the niche sectors of the markets it serves. The Company does not command substantial, overall market presence in the broad market sectors.

## **Table of Contents**

Competition in our Distribution Segment is generally from private, smaller local and regional businesses. Within the overall tire, wheel and undervehicle service market, Myers is the largest North American distributor of tools, equipment and supplies offered based on national coverage.

### ***Customer Dependence***

In 2011, there was no customer that accounted for more than five percent of total net sales. In 2010 and 2009, the Company's largest customer accounted for approximately 6.0% and 13%, respectively of total net sales. Myers Industries serves thousands of customers who demand value through product selection, innovation, quality, delivery and responsive personal service. Our brands foster satisfied, loyal customers who have recognized our performance through numerous supplier quality awards.

### ***Employees***

As of December 31, 2011, Myers Industries had a total of 3,261 full-time and part-time employees. Of these, 2,732 were employed in the Company's manufacturing segments, including: 782 in Material Handling, 745 in Engineered Products, and 1,205 in Lawn and Garden. The Distribution Segment employed 471 personnel. The Company's corporate offices had 58 employees.

As of December 31, 2011, the Company had no employees under collective bargaining arrangements.

### **(d) Financial Information About Geographic Areas**

The response to this section of Item 1 is contained in the Industry Segments footnote of the Notes to Consolidated Financial Statements under Item 8 of this report.

### **(e) Available Information**

Filings with the SEC. As a public company, we regularly file reports and proxy statements with the Securities and Exchange Commission (SEC), such as:

- \* annual reports on Form 10-K;
- \* quarterly reports on Form 10-Q;
- \* current reports on Form 8-K; and
- \* proxy statements on Schedule 14A.

Anyone may read and copy any of the materials we file with the SEC at its Public Reference Room at 100 F Street, N.E., Room 1580, Washington, DC 20549. Information regarding operations of the Public Reference Room may also be obtained by calling the SEC at 1-800-SEC-0330. The SEC also maintains an internet website that contains our reports, proxy and information statements, and our other SEC filings; the address of that site is <http://www.sec.gov>.

Also, we make our SEC filings available free of charge on our own internet site as soon as reasonably practicable after we have filed with the SEC. Our internet address is <http://www.myersindustries.com>. The content on the Company's website is available for informational purposes only and is not incorporated by reference into this Form 10-K.

Corporate Governance. We have a Code of Business Conduct for our employees and members of our Board of Directors. A copy of this Code is posted on our website in the section titled "Investor Relations". We

## **Table of Contents**

will satisfy any disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, any provision of this Code with respect to our executive officers or directors by disclosing the nature of that amendment or waiver.

Our website also contains additional information about our corporate governance policies, including the charters of our standing board committees. Any of these items are available in print to any shareholder who requests them. Requests should be sent to Corporate Secretary, Myers Industries, Inc., 1293 S. Main Street, Akron, Ohio 44301.

### **ITEM 1A. Risk Factors**

This Form 10-K and the information we are incorporating by reference contain forward-looking statements within the meaning of federal securities laws, including information regarding the Company's 2012 financial outlook, future plans, objectives, business prospects and anticipated financial performance. You can identify these statements by the fact that they include words such as will, believe, anticipate, expect, estimate, intend, plan, or variations of these words, or similar expressions. These forward-looking statements are not statements of historical facts and represent only our current expectations regarding such matters. These statements inherently involve a wide range of known and unknown uncertainties. The Company's actual actions and results could differ materially from what is expressed or implied by these statements. Specific factors that could cause such a difference include those set forth below and other important factors disclosed previously and from time to time in our other filings with the Securities and Exchange Commission. Given these factors, as well as other variables that may affect our operating results, you should not rely on forward-looking statements, assume that past financial performance will be a reliable indicator of future performance, nor use historical trends to anticipate results or trends in future periods. We expressly disclaim any obligation or intention to provide updates to the forward-looking statements and the estimates and assumptions associated with them.

Risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the applicable statements include:

*Any significant increase in the cost of raw materials or disruption in the availability of raw materials could adversely affect our performance.*

Our ability to manage our cost structure can be adversely affected by movements in commodity and other raw material prices. Our primary raw materials include plastic resins, colorants and natural and synthetic rubbers. Plastic resins in particular are subject to substantial short term price fluctuations, including those arising from supply shortages and changes in the price of natural gas, crude oil and other petrochemical intermediates from which resins are produced, as well as other factors. Over the past several years, we have at times experienced rapidly increasing resin prices. The Company's revenue and profitability may be materially and adversely affected by these price fluctuations.

Market conditions may limit our ability to raise selling prices to offset increases in our raw material input costs. If we are unsuccessful in developing ways to mitigate raw material cost increases, we may not be able to improve productivity or realize our ongoing cost reduction programs sufficiently to help offset the impact of these increased raw material costs. As a result, higher raw material costs could result in declining margins and operating results.

Changes in raw material availability may also occur due to events beyond our control, including natural disasters such as floods, tornados and hurricanes. Our specific molding technologies and/or product specifications can limit our ability to locate alternative suppliers to produce certain products.

## **Table of Contents**

*We may incur inherent risks associated with our strategic growth initiatives.*

Our growth initiatives include: internal growth driven by strong brands and new product innovation; development of new, high-growth markets and expansion in existing niche markets; strengthened customer relationships through value-added initiatives and key product partnerships; investments in new technology and processes to reinforce market strength and capabilities in key business groups; consolidation and rationalization activities to further reduce costs and improve productivity within our manufacturing and distribution footprint; an opportunistic and disciplined approach to strategic, bolt-on acquisitions to accelerate growth in our market positions; and potential divestitures of businesses with non-strategic products or markets.

While this is a continuous process, all of these activities and initiatives have inherent risks and there remain significant challenges and uncertainties, including economic and general business conditions that could limit our ability to achieve anticipated benefits associated with announced strategic initiatives and affect our financial results. We may not achieve any or all of these goals and are unable to predict whether these initiatives will produce significant revenues or profits.

*We may not realize the improved operating results that we anticipate from past acquisitions or from acquisitions we may make in the future and we may experience difficulties in integrating the acquired businesses or may inherit significant liabilities related to such businesses.*

We explore opportunities to acquire businesses that we believe are related to our core competencies from time to time, some of which may be material to us. We expect such acquisitions will produce operating results consistent with our other operations; however, we may be unable to achieve the benefits expected to be realized from our acquisitions. In addition, we may incur additional costs and our management's attention may be diverted because of unforeseen expenses, difficulties, complications, delays and other risks inherent in acquiring businesses, including the following:

we may have difficulty integrating the acquired businesses as planned, which may include integration of systems of internal controls over financial reporting and other financial and administrative functions;

we may have delays in realizing the benefits of our strategies for an acquired business;

we may not be able to retain key employees necessary to continue the operations of an acquired business;

acquisition costs may be met with cash or debt, increasing the risk that we will be unable to satisfy current financial obligations; and

acquired companies may have unknown liabilities that could require us to spend significant amounts of additional capital.

*Our results of operations and financial condition could be adversely affected by a downturn in the general markets or the general economic environment.*

We operate in a wide range of geographies, primarily North America, Central America and South America. Worldwide and regional economic, business and political conditions, including changes in the economic conditions of the broader markets and in our individual niche markets, could have an adverse affect on one or more of our operating segments.

## **Table of Contents**

### ***We operate in a very competitive business environment.***

Each of our segments participates in markets that are highly competitive. Many of our competitors sell their products at prices lower than ours and we compete primarily on the basis of product quality, product performance, value, and supply chain competency. Our competitive success also depends on our ability to maintain strong brands, customer relationships and the belief that customers will need our products and services to meet their growth requirements. The development and maintenance of such brands requires continuous investment in brand building, marketing initiatives and advertising. The competition that we face in all of our markets which varies depending on the particular business segment, product lines and customers may prevent us from achieving sales, product pricing and income goals, which could affect our financial condition and results of operations.

### ***The results of operations for our Lawn and Garden Segment are influenced by weather conditions.***

Demand for our Lawn and Garden Segment products is influenced by weather, particularly weekend weather during the peak gardening season. Additionally, product demand in this segment is strongest in the first and fourth quarters and weakest in the third quarter, as our customers (in particular greenhouses and nurseries) order our products in advance of the growing season. As a result, our business, financial results, cash flow and our ability to service our debt could be adversely affected by certain weather patterns such as unseasonably cool or warm temperatures, hurricanes, water shortages or floods.

### ***Our operations depend on our ability to maintain continuous, uninterrupted production at our manufacturing facilities, which are subject to physical and other risks that could disrupt production.***

We are subject to inherent risks in our diverse manufacturing and distribution activities, including, but not limited to: product quality, safety, licensing requirements and other regulatory issues, environmental events, loss or impairment of key manufacturing or distribution sites, disruptions in logistics and transportation services, labor disputes and industrial accidents. While we maintain insurance covering our manufacturing and production facilities, including business interruption insurance, a catastrophic loss of the use of all or a portion of our facilities due to accident, fire, explosion, or natural disaster, whether short or long-term, could have a material adverse effect on our business, financial condition and results of operations.

Unexpected failures of our equipment and machinery may also result in production delays, revenue loss and significant repair costs, as well as injuries to our employees. Any interruption in production capability may require us to make large capital expenditures to remedy the situation, which could have a negative impact on our profitability and cash flows. Our business interruption insurance may not be sufficient to offset the lost revenues or increased costs that we may experience during a disruption of our operations. A temporary or long-term business disruption could result in a permanent loss of customers. If this were to occur, our future sales levels, and therefore our profitability, could be materially adversely affected.

### ***We derive a portion of our revenues from direct and indirect sales outside the United States and are subject to the risks of doing business in foreign countries.***

We currently operate manufacturing, sales and service facilities outside of the United States, particularly in Canada and Brazil. For the twelve months ended December 31, 2011, international net sales accounted for approximately 14% of our total net sales from continuing operations. Accordingly, we are subject to risks associated with operations in foreign countries, including:

fluctuations in currency exchange rates;

limitations on the remittance of dividends and other payments by foreign subsidiaries;

limitations on foreign investment;

**Table of Contents**

additional costs of compliance with local regulations; and

in certain countries, higher rates of inflation than in the United States.

In addition, our operations outside the United States are subject to the risk of new and different legal and regulatory requirements in local jurisdictions, potential difficulties in staffing and managing local operations and potentially adverse tax consequences. The costs related to our international operations could adversely affect our operations and financial results in the future.

***Our future performance depends in part on our ability to develop and market new products if there are changes in technology, regulatory requirements or competitive processes.***

Changes in technology, regulatory requirements and competitive processes may render certain products obsolete or less attractive. Our performance in the future will depend in part on our ability to develop and market new products that will gain customer acceptance and loyalty, as well as our ability to adapt our product offerings and control our costs to meet changing market conditions. Our operating performance would be adversely affected if we were to incur delays in developing new products or if such products did not gain market acceptance. There can be no assurance that existing or future products will be sufficiently successful to enable us to effectively compete in our markets or, should new product offerings meet with significant customer acceptance, that one or more current or future competitors will not introduce products that render our products noncompetitive.

***We may not be successful in protecting our intellectual property rights, including our unpatented proprietary know-how and trade secrets, or in avoiding claims that we infringed on the intellectual property rights of others.***

In addition to relying on patent and trademark rights, we rely on unpatented proprietary know-how and trade secrets and employ various methods, including confidentiality agreements with employees and consultants, to protect our know-how and trade secrets. However, these methods and our patents and trademarks may not afford complete protection and there can be no assurance that others will not independently develop the know-how and trade secrets or develop better production methods than us. Further, we may not be able to deter current and former employees, contractors and other parties from breaching confidentiality agreements and misappropriating proprietary information and it is possible that third parties may copy or otherwise obtain and use our information and proprietary technology without authorization or otherwise infringe on our intellectual property rights. Additionally, in the future we may license patents, trademarks, trade secrets and similar proprietary rights to third parties. While we attempt to ensure that our intellectual property and similar proprietary rights are protected when entering into business relationships, third parties may take actions that could materially and adversely affect our rights or the value of our intellectual property, similar proprietary rights or reputation. In the future, we may also rely on litigation to enforce our intellectual property rights and contractual rights and, if not successful, we may not be able to protect the value of our intellectual property. Furthermore, no assurance can be given that we will not be subject to claims asserting the infringement of the intellectual property rights of third parties seeking damages, the payment of royalties or licensing fees and/or injunctions against the sale of our products. Any litigation could be protracted and costly and could have a material adverse effect on our business and results of operations regardless of its outcome.

***If we are unable to maintain access to credit financing, our business may be adversely affected.***

The Company's ability to make payments and to refinance our indebtedness, fund planned capital expenditures and acquisitions and pay dividends will depend on our ability to generate cash in the future and retain access to credit financing. This, to some extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

## **Table of Contents**

We cannot provide assurance that our business will generate sufficient cash flow from operating activities or that future borrowings will be available to us under our credit facilities in amounts sufficient to enable us to service debt, make necessary capital expenditures or fund other liquidity needs. We may need to refinance all or a portion of our indebtedness, on or before maturity. We cannot be sure that we would be able to refinance any of our indebtedness on commercially reasonable terms or at all.

The credit facilities contain restrictive covenants and cross default provisions that require us to maintain specified financial ratios. The Company's ability to satisfy those financial ratios can be affected by events beyond our control, and we cannot be assured we will satisfy those ratios. A breach of any of these financial ratio covenants or other covenants could result in a default. Upon the occurrence of an event of default, the lenders could elect to declare the applicable outstanding indebtedness due immediately and payable and terminate all commitments to extend further credit. We cannot be sure that our lenders would waive a default or that we could pay the indebtedness in full if it were accelerated.

### ***Future claims, litigation and regulatory actions could adversely affect our financial condition and our ability to conduct our business.***

While we strive to ensure that our products comply with applicable government regulatory standards and internal requirements and that our products perform effectively and safely, customers from time to time could claim that our products do not meet contractual requirements, and users could be harmed by use or misuse of our products. This could give rise to breach of contract, warranty or recall claims, or claims for negligence, product liability, strict liability, personal injury or property damage. Product liability insurance coverage may not be available or adequate in all circumstances. In addition, claims may arise related to patent infringement, environmental liabilities, distributor terminations, commercial contracts, antitrust or competition law, employment law and employee benefits issues and other regulatory matters. While we have in place processes and policies to mitigate these risks and to investigate and address such claims as they arise, we cannot predict the underlying costs to defend or resolve such claims.

### ***Current and future environmental and other governmental laws and requirements could adversely affect our financial condition and our ability to conduct our business.***

Our operations are subject to federal, state, local and foreign environmental laws and regulations that impose limitations on the discharge of pollutants into the air and water and establish standards for the handling, use, treatment, storage and disposal of, or exposure to, hazardous wastes and other materials and require clean up of contaminated sites. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines, penalties and other civil or criminal sanctions may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators (or their predecessor entities) and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation.

While we have not been required historically to make significant capital expenditures in order to comply with applicable environmental laws and regulations, we cannot predict with any certainty our future capital expenditure requirements because of continually changing compliance standards and environmental technology. Furthermore, violations or contaminated sites that we do not know about, including contamination caused by

**Table of Contents**

prior owners and operators of such sites, or at sites formerly owned or operated by us or our predecessors in connection with discontinued operations, could result in additional compliance or remediation costs or other liabilities, which could be material.

In that we may be a potentially responsible party ( PRP ) of the New Idria Mercury Mine, the Company accrued costs related to performing a remedial investigation and feasibility study. As investigation and remediation proceed, it is likely that adjustments to the liability will be necessary to reflect new information. Estimates of the Company s liability are based on current facts, laws, regulations and technology. Estimates of the Company s environmental liabilities are further subject to uncertainties regarding the nature and extent of site contamination, the range of remediation alternatives available, evolving remediation standards, imprecise engineering evaluation and cost estimates, the extent of corrective actions that may be required and the number and financial condition of other PRPs, as well as the extent of their responsibility for the remediation, and the availability of insurance coverage for these expenses.

We have limited insurance coverage for potential environmental liabilities associated with historic and current operations and we do not anticipate increasing such coverage in the future. We may also assume significant environmental liabilities in acquisitions. Such costs or liabilities could adversely affect our financial situation and our ability to conduct our business.

***Environmental regulations specific to plastic products and containers could adversely affect our ability to conduct our business.***

Federal, state, local and foreign governments could enact laws or regulations concerning environmental matters that increase the cost of producing, or otherwise adversely affect the demand for, plastic products. Legislation that would prohibit, tax or restrict the sale or use of certain types of plastic and other containers, and would require diversion of solid wastes such as packaging materials from disposal in landfills, has been or may be introduced in the U.S. Congress, in state legislatures and other legislative bodies. While container legislation has been adopted in a few jurisdictions, similar legislation has been defeated in public referenda in several states, local elections and many state and local legislative sessions. There can be no assurance that future legislation or regulation would not have a material adverse effect on us. Furthermore, a decline in consumer preference for plastic products due to environmental considerations could have a negative effect on our business.

***Our insurance coverage may be inadequate to protect against potential hazardous incidents to our business.***

We maintain property, business interruption, product liability and casualty insurance coverage, but such insurance may not provide adequate coverage against potential claims, including losses resulting from war risks, terrorist acts or product liability claims relating to products we manufacture. Consistent with market conditions in the insurance industry, premiums and deductibles for some of our insurance policies have been increasing and may continue to increase in the future. In some instances, some types of insurance may become available only for reduced amounts of coverage, if at all. In addition, there can be no assurance that our insurers would not challenge coverage for certain claims. If we were to incur a significant liability for which we were not fully insured or that our insurers disputed, it could have a material adverse effect on our financial position, results of operations or cash flows.

***Our business operations could be significantly disrupted if members of our senior management team were to leave.***

Our success depends to a significant degree upon the continued contributions of our senior management team. Our senior management team has extensive manufacturing, finance and engineering experience, and we believe that the depth of our management team is instrumental to our continued success. The loss of any of our key executive officers in the future could significantly impede our ability to successfully implement our business strategy, financial plans, expansion of services, marketing and other objectives.

**Table of Contents**

***Unforeseen future events may negatively impact our economic condition.***

Future events may occur that would adversely affect the reported value of our assets. Such events may include, but are not limited to, strategic decisions made in response to changes in economic and competitive conditions, the impact of the economic environment on our customer base, or a material adverse change in our relationship with significant customers.

***Equity Ownership Concentration***

Stephen E. Myers, former Chief Executive Officer of the Company, a descendent of the Company's co-founder Louis S. Myers beneficially owned approximately 8.3% of the Company's outstanding common shares as of March 1, 2012. This shareholder may have sufficient voting power to influence actions requiring the approval of our shareholders.

Based solely on the Schedule 13D/A filed on February 15, 2012, by Gabelli Funds, LLC, GAMCO Asset Management Inc., MJG Associates, Inc., Gabelli Securities, Inc., Teton Advisors, Inc., GGCP, Inc., GAMCO Investors, Inc., and Mario J. Gabelli (collectively, the Gamco Group), for which the Company disclaims any responsibility, the Gamco Group beneficially owned 5,329,671 shares of our common shares as of February 15, 2012, representing 15.97% of our outstanding common shares. Combined, these parties may have sufficient voting power to influence actions requiring the approval of our shareholders.

***Legal & Regulatory Actions***

Changes in laws and regulations and approvals and decisions of courts, regulators, and governmental bodies on any legal claims known or unknown, could have an adverse affect on the Company's financial results.

**ITEM 1B. Unresolved Staff Comments**

None.

**Table of Contents****ITEM 2. Properties**

The following table sets forth by segment certain information with respect to properties owned by the Company:

<b>Distribution</b>			
<b>Location</b>	<b>Approximate Floor Space (Square Feet)</b>	<b>Approximate Land Area (Acres)</b>	<b>Use</b>
Akron, Ohio	129,000	8	Executive offices and warehousing
Akron, Ohio	60,000	5	Warehousing
Akron, Ohio	31,000	2	Warehousing
Pomona, California	17,700	1	Sales and distribution
Phoenix, Arizona	8,200	1	Sales and distribution
Indianapolis, Indiana	7,800	2	Sales and distribution
Cincinnati, Ohio	7,500	1	Held for sale
York, Pennsylvania	7,400	3	Sales and distribution

Burlington, Ontario, Canada	46,000	January 9, 2013	Manufacturing and distribution
Mississauga, Ontario, Canada	20,000	January 31, 2014	Manufacturing and distribution
Milford, Ohio	22,000	November 30, 2012	Administration and sales
Southaven, Mississippi	56,000	September 30, 2016	Distribution center
Salt Lake City, Utah	31,000	October 31, 2016	Distribution center

---

**Table of Contents**

The Company also leases facilities in 21 locations throughout the United States and Canada which, in the aggregate, amount to approximately 150,000 square feet of warehouse and office space. All of these locations are used by the Distribution Segment. Consistent with our business model change to optimize our domestic distribution network, branch leases expiring in 2012 will be replaced by new sales office leases.

The Company believes that all of its properties, machinery and equipment generally are well maintained and adequate for the purposes for which they are used.

**ITEM 3. Legal Proceedings**

The Company is a defendant in various lawsuits and a party to various other legal proceedings, in the ordinary course of business, some of which are covered in whole or in part by insurance. We believe that the outcome of these lawsuits and other proceedings will not individually or in the aggregate have a future material adverse effect on our consolidated financial position, results of operations or cash flows.

**New Idria Mercury Mine**

Effective October 2011, the U.S. Environmental Protection Agency ( EPA ) added the New Idria Mercury Mine site located near Hollister, California to the Superfund National Priorities List because of alleged contaminants discharged to California waterways. The New Idria Quicksilver Mining Company, founded in 1936, owned and operated the New Idria Mine through 1972. In 1981 New Idria was merged into Buckhorn Inc. and subsequently acquired by Myers Industries in 1987. The EPA contends that past mining operations have resulted in mercury contamination and acid mine drainage in the San Carlos Creek, Silver Creek and a portion of Panoche Creek and that other downstream locations may also be impacted.

Since Buckhorn Inc. may be a potentially responsible party ( PRP ) of the New Idria Mercury Mine, the Company recognized an expense of \$1.9 million in 2011 related to performing a remedial investigation and feasibility study to determine the extent of remediation and the screening of alternatives. As investigation and remediation proceed, it is likely that adjustments to the liability will be necessary to reflect new information. Estimates of the Company s liability are based on current facts, laws, regulations and technology. Estimates of the Company s environmental liabilities are further subject to uncertainties regarding the nature and extent of site contamination, the range of remediation alternatives available, evolving remediation standards, imprecise engineering evaluation and cost estimates, the extent of corrective actions that may be required and the number and financial condition of other PRPs, as well as the extent of their responsibility for the remediation, and the availability of insurance coverage for these expenses. At this time, further remediation cost estimates are not known and have not been prepared.

In November 2011 the EPA completed an interim removal project at the New Idria Mercury Mine site. It is expected this removal action will be part of the final remediation plan for the site. The EPA s interim removal project costs are unknown at this time. It is possible that at some future date the EPA will seek recovery of the costs of this work from PRPs.

**California Regional Water Quality Control Board**

A number of parties, including the Company and its subsidiary, Buckhorn Inc. ( Buckhorn ), were identified in a planning document adopted in October 2008 by the California Regional Water Quality Control Board, San Francisco Bay Region ( RWQCB ). The planning document relates to the presence of mercury, including amounts contained in mining wastes, in and around the Guadalupe River Watershed ( Watershed ) region in Santa Clara County, California. Buckhorn has been alleged to be a successor in interest to an entity that performed mining operations in a portion of the Watershed area. The Company has not been contacted by the RWQCB with respect to Watershed clean-up efforts that may result from the adoption of this planning document. The extent of the mining wastes that may be the subject of future cleanup has yet to be determined, and the

**Table of Contents**

actions of the RWQCB have not yet advanced to the stage where a reasonable estimate of remediation cost, if any, is available. Although assertion of a claim by the RWQCB is reasonably possible, it is not possible at this time to estimate the amount of any obligation the Company may incur for these cleanup efforts within the Watershed region, or whether such cost would be material to the Company's financial statements.

**EXECUTIVE OFFICERS OF THE REGISTRANT**

Set forth below is certain information concerning the executive officers of the Registrant as of December 31, 2011. Executive officers are appointed annually by the Board of Directors.

Name	Age	Years as Executive Officer	Title
John C. Orr	61	9	President and Chief Executive Officer
Donald A. Merrill	47	6	Senior Vice President, Chief Financial Officer and Corporate Secretary
David B. Knowles	51	3	Executive Vice President and Chief Operating Officer

Mr. Orr, President and Chief Executive Officer, was appointed to his current position on May 1, 2005. Mr. Orr had been President and Chief Operating Officer since 2003. Prior to that Mr. Orr was General Manager of Buckhorn Inc., one of the Company's material handling subsidiaries. Before coming to the Company, Mr. Orr had been employed by The Goodyear Tire & Rubber Company for 28 years. His last position at Goodyear was Vice President - North America.

Mr. Merrill, Senior Vice President, Chief Financial Officer and Corporate Secretary, was appointed to his current position on April 26, 2006. Mr. Merrill joined the Company on January 25, 2006. Prior to that he was with Newell Rubbermaid Inc. - Rubbermaid Home Products Division, where he served as Vice President and Chief Financial Officer since 2003. Mr. Merrill joined Newell Rubbermaid in 2001 where he served as Chief Financial Officer of Newell Rubbermaid - Little Tikes.

Mr. Knowles joined the Company and was named Executive Vice President and Chief Operating Officer on June 19, 2009. Prior to that, he was President and Chief Executive Officer of Aristech Acrylics LLC since 2003.

Section 16(a) of the Securities Exchange Act of 1934 requires the Registrant's Directors, certain of its executive officers and persons who own more than ten percent of its Common Stock ( "Insiders" ) to file reports of ownership and changes in ownership with the Securities and Exchange Commission and the New York Stock Exchange, Inc., and to furnish the Company with copies of all such forms they file. The Company understands from the information provided to it by the Insiders that they adhered to all filing requirements applicable to the Section 16 Filers.

**Table of Contents****PART II****ITEM 5. Market for Registrant's Common Stock and Related Stockholder Matters and Issuer Purchases of Equity Securities**

The Company's Common Stock is traded on the New York Stock Exchange (ticker symbol MYE). The approximate number of shareholders of record at December 31, 2011 was 1,427. High and low stock prices and dividends for the last two years were:

2011 Quarter Ended	Sales Price		Dividends
	High	Low	
March 31	\$ 10.25	\$ 8.75	\$ 0.070
June 30	11.01	9.63	0.070
September 30	12.15	9.47	0.070
December 31	13.66	9.49	0.070

  

2010 Quarter Ended	Sales Price		Dividends
	High	Low

(1) In 2011, the Company recorded \$0.9 million of impairment charges for long-lived assets related to the Material Handling Segment and \$0.3 million of impairment charges for long-lived assets in the Lawn and Garden Segment. In 2010, the Company recorded a goodwill

## Edgar Filing: MYERS INDUSTRIES INC - Form 10-K

impairment charge of \$72.0 million in its Lawn and Garden Segment. In 2009, the Company had impairment charges of \$5.5 million related to certain property, plant and equipment related to the restructuring plans in its manufacturing segments. In 2008, a goodwill impairment charge of \$60.1 million related to the Company's Engineered Products Segment and impairment charges of \$10.0 million for long-lived assets in the Lawn and Garden Segment were recorded.

- (2) In 2010, the Company recorded a non-operating gain of \$3.8 million (\$4.4 million, net of related expenses) related to a favorable claims settlement. A non-operating gain of \$26.8 million (\$35.0 million, net of related expenses) was recognized in 2007. This gain resulted from a termination fee paid in connection with the Company's proposed merger.
- (3) Dividends in 2007 include a special dividend of \$9.9 million accrued but not paid until 2008.

**Table of Contents****ITEM 7. Management's Discussion and Analysis of Results of Operations and Financial Condition**  
**Executive Overview**

The Company conducts its business activities in four distinct business segments, including three in manufacturing and one in distribution. The manufacturing segments consist of: Material Handling, Lawn and Garden, and Engineered Products.

In our manufacturing segments, the Company designs, manufactures, and markets a variety of plastic and rubber products. These products range from plastic reusable material handling containers and small parts storage bins to plastic horticultural pots and hanging baskets, decorative resin planters, plastic and rubber OEM parts, tire repair materials, and custom plastic and rubber products. Our Distribution Segment is engaged in the distribution of tools, equipment and supplies used for tire, wheel and undervehicle service on passenger, heavy truck and off-road vehicles.

**Results of Operations: 2011 versus 2010***Net Sales:**(dollars in millions)*

<b>Segment</b>	<b>2011</b>	<b>2010</b>	<b>Change</b>	<b>% Change</b>
Material Handling	\$ 261.8	\$ 257.8	\$ 4.0	2%
Lawn & Garden	\$ 217.1	\$ 223.8	\$ (6.7)	(3%)
Distribution	\$ 183.7	\$ 175.0	\$ 8.7	5%
Engineered Products	\$ 116.2	\$ 104.8	\$ 11.4	11%
Intra-segment elimination	\$ (23.1)	\$ (23.8)	\$ 0.7	3%
<b>TOTAL</b>	<b>\$ 755.7</b>	<b>\$ 737.6</b>	<b>\$ 18.1</b>	<b>2%</b>

Net sales for 2011 were \$755.7 million, an increase of \$18.1 million or 2% compared to the prior year. A favorable product and service mix along with higher selling prices increased sales by \$42.2 million. Sales were also impacted by \$4.4 million from favorable foreign currency translation, primarily from the Canadian dollar. These increases were partially offset by lower sales volumes of \$28.5 million, primarily from a reduction in lower margin custom pallet sales in our Material Handling Segment and lower volumes in the Lawn and Garden Segment.

Net sales in the Material Handling Segment increased \$4.0 million or 2% in 2011 compared to 2010. The increase in current year net sales included \$22.9 million from improved pricing actions in response to higher raw material costs and customer mix and \$0.9 million from the effect of favorable foreign currency translation. Strong demand in the agricultural, industrial, manufacturing and automotive markets drove higher sales volumes of \$17.8 million partially offsetting the reduction of \$37.6 million in lower margin custom pallet sales in 2011 versus 2010.

Net sales in the Lawn and Garden Segment in 2011 were down \$6.7 million or 3% compared to 2010. The decrease in net sales primarily reflected lower volume of \$22.0 million resulting from a prolonged effect of the weak 2011 growing season due to poor weather conditions. The lower sales volumes were partially offset by \$12.2 million from favorable pricing actions taken to offset rising raw material costs and \$3.1 million from the effect of foreign currency translation.

Net sales in the Distribution Segment increased \$8.7 million or 5% in 2011 compared to 2010. The higher sales reflect \$5.4 million from improved pricing to offset increased product costs. In addition, sales volume increased \$2.9 million as a result of new products and service offerings. Sales were also impacted favorably by \$0.4 million from the effect of foreign currency translation.

**Table of Contents**

In the Engineered Products Segment, net sales in 2011 increased \$11.4 million, or 11% compared to 2010. Net sales increased due to higher sales volumes of \$9.8 million driven by strong demand in the recreational vehicle, marine and contract manufacturing markets. Higher selling prices of \$1.6 million also contributed to the increase.

**Cost of Sales & Gross Profit:***(dollars in millions)*

<b>Cost of Sales and Gross Profit</b>	<b>2011</b>	<b>2010</b>
Cost of sales	\$ 557.4	\$ 573.1
Gross profit	\$ 198.3	\$ 164.5
Gross profit as a percentage of sales	26.2%	22.3%

Gross profit margin increased to 26.2% for 2011 compared to 22.3% in the prior year. Improved product pricing, customer mix and productivity improvements resulted in higher gross profit margin year over year. Product pricing strategies, primarily in the Material Handling and Lawn and Garden Segments, mitigated the impact of higher costs for raw material plastic resins. Prices for plastic resins were, on average, approximately 16% higher for polypropylene and 11% higher for high density polyethylene in 2011 compared to the prior year. Lower manufacturing costs resulting from our operations excellence initiatives reduced unabsorbed and labor costs in 2011 compared to 2010.

**Selling, General and Administrative Expenses:***(dollars in millions)*

<b>SG&amp;A Expenses</b>	<b>2011</b>	<b>2010</b>	<b>Change</b>
SG&A expenses	\$ 158.6	\$ 140.1	\$ 18.5
SG&A expenses as a percentage of sales	21.0%	19.0%	

Selling, general and administrative ( SG&A ) expenses increased \$18.5 million or 13.2% compared with 2010. The increase was primarily due to higher selling and distribution costs of \$7.2 million, higher general and corporate administrative costs of \$3.8 million, employee related costs of \$3.0 million, and increased provision for bad debts of \$0.9 million. SG&A expense for 2011 also included restructuring charges of \$2.7 million and other unusual charges of \$1.9 million related to the New Idria investigation and feasibility study. Restructuring charges in 2010 were \$2.7 million. In 2011 and 2010, gains of \$0.7 million in each year were realized from the sale of facilities.

**Impairment Charges:**

In 2011, there were impairment charges of \$1.2 million related to two closed manufacturing facilities and fixed asset impairment charges. In 2010, the Company recorded goodwill impairment charges of \$72.0 million related to its Lawn and Garden business as discussed in the Goodwill and Intangible Assets footnote to Consolidated Financial Statements in Item 8.

**Interest Expense:***(dollars in millions)*

<b>Net Interest Expense</b>	<b>2011</b>	<b>2010</b>	<b>Change</b>	<b>% Change</b>
Net interest expense	\$ 4.7	\$ 7.2	\$ (2.5)	(35%)
Outstanding borrowings	\$ 74.0	\$ 83.8	\$ (9.8)	(12%)
Average borrowing rate	5.22%	6.32%		

Net interest expense in 2011 was \$4.7 million, a decrease of 35% compared to the prior year. Lower borrowing levels and a reduction in average interest rates of 90 basis points resulted in a reduction in interest expense in 2011.

**Table of Contents****Income (Loss) Before Taxes:***(dollars in millions)*

Segment	2011	2010	Change	% Change
Material Handling	\$ 34.1	\$ 22.6	\$ 11.5	51%
Lawn & Garden	\$ 4.2	\$ (74.6)	\$ 78.8	106%
Distribution	\$ 15.7	\$ 15.2	\$ 0.5	3%
Engineered Products	\$ 10.8	\$ 8.9	\$ 1.9	21%
Corporate and interest	\$ (31.1)	\$ (23.1)	\$ (8.0)	(35%)
<b>TOTAL</b>	<b>\$ 33.7</b>	<b>\$ (51.0)</b>	<b>\$ 84.7</b>	<b>166%</b>

Income before taxes in 2011 was \$33.7 million, an improvement of \$84.7 million compared to a loss of \$51.0 million in 2010. Prior year results were significantly impacted by the goodwill impairment charge in our Lawn and Garden Segment of \$72.0 million, which was partially offset by a non-operating gain of \$3.8 million related to a claims settlement. The claims settlement gain was included in Other Income, net on the Consolidated Statement of Income (Loss) in 2010. The remaining increase was primarily due to higher net sales and a more favorable sales mix resulting in increased gross profit margins compared to the prior year.

**Income Taxes:***(dollars in millions)*

	2011	2010
Income (loss) before taxes	\$ 33.7	\$ (51.0)
Income tax (benefit) expense	\$ 9.2	\$ (8.2)
Effective tax rate	27.3%	16.0%

The effective tax rate was 27.3% in 2011 compared to 16.0% in 2010. The 2011 effective tax rate reflects the Company's reversal of approximately \$4.9 million of previously unrecognized tax benefits, primarily related to the incurred loss on the sale of its European Material Handling business in 2007 and other tax adjustments, including provision to return adjustments resulting from changes in estimates. The 2010 effective tax rate of 16.0% on the loss before taxes of \$51.0 million was primarily due to the \$72.0 million goodwill impairment charge recognized in that year, \$26.7 million of which was not deductible.

**Results of Operations: 2010 versus 2009****Net Sales from Continuing Operations:***(dollars in millions)*

Segment	2010	2009	Change	% Change
Material Handling	\$ 257.8	\$ 254.1	\$ 3.7	1%
Lawn & Garden	\$ 223.8	\$ 220.3	\$ 3.5	2%
Distribution	\$ 175.0	\$ 163.0	\$ 12.0	7%
Engineered Products	\$ 104.8	\$ 86.0	\$ 18.8	22%
Intra-segment elimination	\$ (23.8)	\$ (21.5)	\$ (2.3)	(11%)
<b>TOTAL</b>	<b>\$ 737.6</b>	<b>\$ 701.8</b>	<b>\$ 35.7</b>	<b>5%</b>

Net sales for 2010 increased 5% primarily due to improved sales volumes in all of the Company's business segments. In addition, higher selling prices increased sales approximately \$9.1 million and sales increased \$11.5 million from the effect of foreign currency translation, primarily the Canadian dollar.

**Table of Contents**

In the Material Handling Segment, sales increased \$3.7 million or 1% in 2010 compared to 2009. The increase reflects the impact of \$6.7 million from higher selling prices and \$2.2 million from foreign currency translation, which was partially offset by reduced volumes. Sales volumes were significantly lower for custom pallets in 2010 but partially offset by increased sales of legacy product lines such as reusable bulk containers for agriculture.

Net sales in the Lawn and Garden Segment in 2010 increased by \$3.5 million or 2% compared to 2009. Sales increased \$8.4 million due to foreign currency translation related to the favorable impact of exchange rates mostly for the Canadian dollar. In 2010, sales declined \$2.2 million from reduced volume and \$2.3 million from lower selling prices in the year.

Net sales in the Distribution Segment increased \$12.0 million or 7% in 2010 compared to 2009. Sales increased \$7.2 million due to higher volumes and \$3.1 million from increased selling prices. The Distribution Segment experienced steady improvement in demand in 2010 and sales benefited from stronger replacement tire sales.

In the Engineered Products Segment, net sales in 2010 increased \$18.8 million, or 22% compared to 2009. The increase is due to significant volume increases in the automotive, recreational vehicle, marine and custom markets of approximately \$15.0 million.

**Cost of Sales & Gross Profit from Continuing Operations:**

(dollars in millions)

<b>Cost of Sales and Gross Profit</b>	<b>2010</b>	<b>2009</b>
Cost of sales	\$ 573.1	\$ 530.9
Gross profit	\$ 164.5	\$ 170.9
Gross profit as a percentage of sales	22.3%	24.3%

Gross profit margin in 2010 of 22.3% was down slightly compared to 2009. Raw material costs, primarily for plastic resins, were, on average, approximately 47% higher for polypropylene and 29% higher for polyethylene in 2010 compared to the prior year. In addition, the liquidation of inventories valued at LIFO cost reduced cost of sales by approximately \$4.0 million in 2009 compared to \$0.7 million in 2010. The impact of higher raw material costs and the liquidation of LIFO inventories were largely offset by lower manufacturing costs and a reduction in unabsorbed overhead resulting from restructuring cost savings and higher sales volumes.

**Selling, General and Administrative Expenses:**

(dollars in millions)

<b>SG&amp;A Expenses</b>	<b>2010</b>	<b>2009</b>	<b>Change</b>
SG&A expenses	\$ 140.1	\$ 148.3	\$ (8.2)
SG&A expenses as a percentage of sales	19.0%	21.1%	

SG&A expenses decreased \$8.2 million or 5.5% compared with 2009. Expenses in 2010 include charges of approximately \$2.7 million for the movement of machinery and equipment and other restructuring activities. SG&A expenses in 2009 included \$16.6 million of charges related to consulting and severance costs in restructuring the Company's manufacturing businesses. Excluding these charges, other SG&A expenses in 2010 increased \$5.7 million compared to 2009, primarily from freight and selling expenses due to increased sales volumes.

**Impairment Charges:**

In 2010, the Company recorded goodwill impairment charges of \$72.0 million related to its Lawn and Garden business as discussed in the Goodwill and Intangible Assets footnote to the Consolidated Financial

**Table of Contents**

Statements in Item 8. In 2009, the Company recorded fixed asset impairment charges of \$2.0 million related to restructuring its Lawn and Garden business, \$1.3 million for its Material Handling business, and \$2.2 million in the Engineered Products business. The 2009 fixed asset impairment charges were the result of closing manufacturing facilities.

**Interest Expense:***(dollars in millions)*

<b>Net Interest Expense</b>	<b>2010</b>	<b>2009</b>	<b>Change</b>	<b>% Change</b>
Net interest expense	\$ 7.2	\$ 8.3	\$ (1.1)	(13%)
Outstanding borrowings	\$ 83.8	\$ 104.3	\$ (20.5)	(20%)
Average borrowing rate	6.32%	5.25%		

Net interest expense in 2010 decreased \$1.1 million because of lower average borrowing levels.

**Income (Loss) Before Taxes:***(dollars in millions)*

<b>Segment</b>	<b>2010</b>	<b>2009</b>	<b>Change</b>	<b>% Change</b>
Material Handling	\$ 22.6	\$ 13.6	\$ 9.0	66%
Lawn & Garden	\$ (74.6)	\$ 16.7	\$ (91.3)	547%
Distribution	\$ 15.2	\$ 13.7	\$ 1.5	11%
Engineered Products	\$ 8.9	\$ 0.8	\$ 8.1	1,013%
Corporate and interest	\$ (23.1)	\$ (35.9)	\$ 12.8	36%
<b>TOTAL</b>	<b>\$ (51.0)</b>	<b>\$ 8.8</b>	<b>\$ (59.8)</b>	<b>680%</b>

Loss before taxes in 2010 was \$51.0 million compared to income of \$8.8 million in 2009. Results were significantly impacted by the goodwill impairment charge of \$72.0 million in 2010 and restructuring and impairment charges totaling \$24.8 million in 2009. In addition, in 2010 the Company recorded a non-operating gain of \$3.8 million related to a claims settlement.

**Income Taxes:***(dollars in millions)*

	<b>2010</b>	<b>2009</b>
Income (loss) before taxes	\$ (51.0)	\$ 8.8
Income tax (benefit) expense	\$ (8.2)	\$ 1.8
Effective tax rate	16.0%	20.8%

The effective tax rate decreased to 16.0% in 2010 compared to 20.8% in 2009. The effective rate for 2010 is lower than the 35% U.S. Federal statutory rate primarily due to the goodwill impairment charge, \$26.7 million of which is not deductible. In addition, the effective rate was impacted by the mix of domestic and foreign composition of income and the related foreign tax rate differences. The effective tax rate for 2009 was impacted by the mix of domestic and foreign composition income and the related foreign tax rate differences. Also in 2009, the Company made an adjustment to record previously unrecognized deferred tax assets which increased the income tax benefit and deferred tax assets by \$0.4 million and recognized tax benefits of \$0.3 million from a reduction in valuation allowances and \$0.2 million from a reduction of uncertain tax liabilities.

**Financial Condition & Liquidity and Capital Resources**

Cash provided by operating activities from operations was \$64.2 million for the year ended December 31, 2011 compared to \$45.6 million in 2010. The increase of \$18.6 million was primarily attributable

**Table of Contents**

to improved earnings. Net income was \$24.5 million in 2011 compared to a loss of \$42.8 million in 2010. Non-cash charges including depreciation and impairment charges were \$42.2 million compared to non-cash charges of \$20.5 million and a \$72.0 million goodwill impairment charge in 2010. Funds used for working capital improved by \$1.6 million in 2011 versus 2010.

Cash used for working capital was \$2.5 million in 2011 compared to cash used of \$4.1 million in 2010. In 2011, a reduction of inventories generated approximately \$0.5 million of cash compared to \$5.0 million in 2010. The reduction of inventories in 2011 resulted from ongoing working capital initiatives; however, more significant reductions of inventory were achieved in 2010 due to restructuring programs. In 2011, increasing sales resulted in higher accounts receivable and the use of \$8.7 million of working capital compared with \$10.0 million of cash used in 2010. In addition, there was an increase of \$2.6 million in cash generated by accounts payable and accrued expenses in 2011 compared to 2010. The increase in cash from accounts payable and accrued expenses in 2011 was the result of employee compensation and royalties incurred but not yet paid.

Capital expenditures were approximately \$21.9 million in 2011 compared to \$20.5 million in 2010. Capital spending in 2011 was higher than the preceding year as investments were made for new manufacturing, molding and automated handling technology. In 2011, the Company paid out cash of \$1.1 million in connection with the acquisition of Material Improvements Cheesebox and in 2010, the Company paid \$0.4 million for the acquisition of Enviro-Fill. In 2011 and 2010, the Company received approximately \$1.1 million and \$5.2 million, respectively, in cash proceeds from the sale of property, plant & equipment.

During 2011, the Company used cash of \$20.9 million to purchase two million shares of its own stock under a share repurchase plan. The shares were repurchased in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934. In addition, the Company used cash to pay dividends of \$9.5 million and \$9.2 million for the years ended 2011 and 2010, respectively.

Total debt at December 31, 2011 was approximately \$74.0 million compared with \$83.8 million at December 31, 2010. The Company's 2010 Credit Agreement provides available borrowing up to \$180 million, reduced for letters of credit issued, and, as of December 31, 2011, there was \$135.5 million available under this agreement. In December 2010, the Company paid the \$65 million Senior Notes that matured. As of December 31, 2011 the Company was in compliance with all its debt covenants. The most restrictive financial covenants for all of the Company's debt are an interest coverage ratio, defined as earnings before interest and taxes divided by interest expense, and a leverage ratio, defined as earnings before interest, taxes, depreciation and amortization, as adjusted, compared to total debt. The ratios as of and for the period ended December 31, 2011 are shown in the following table:

	<b>Required Level</b>	<b>Actual Level</b>
Interest Coverage Ratio	2.25 to 1 (minimum)	8.76
Leverage Ratio	3.25 to 1 (maximum)	1.07

The Company believes that cash flows from operations and available borrowing under its Credit Agreement will be sufficient to meet expected business requirements including capital expenditures, dividends, working capital, and debt service into the foreseeable future.

In addition, at December 31, 2011, the Company had approximately \$1.2 million of industrial revenue bonds with a weighted average interest rate of 0.19 percent. In 2011, the Company repaid \$0.3 million of industrial revenue bonds.

As of December 31, 2011, the Company also has \$6.7 million of letters of credit issued related to insurance and other financing contracts in the ordinary course of business.

**Table of Contents**

The following summarizes the Company's estimated future cash outflows from financial contracts and commitments:

	Less than 1 Year	2-3 Years	4-5 Years	Thereafter	Total
	(Amounts in Thousands)				
Principal payments on debt	\$ 305	\$ 35,650	\$ 38,075	\$	\$ 74,030
Interest	3,731	7,457	1,343		12,531
Lease payments	9,674	10,341	7,952	16,818	44,785
Purchase commitments	5,616				5,616
Retirement benefits	1,114	876	1,086	5,627	8,703
Total	\$ 20,440	\$ 54,324	\$ 48,456	\$ 22,445	\$ 145,665

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**  
**Market Risk and Derivative Financial Instruments**

The Company has certain financing arrangements that require interest payments based on floating interest rates. The Company's financial results are subject to changes in the market rate of interest. At present, the Company has not entered into any interest rate swaps or other derivative instruments to fix the interest rate on any portion of its financing arrangements with floating rates. Accordingly, based on current debt levels at December 31, 2011, if market interest rates increase one percent, the Company's interest expense would increase approximately \$0.4 million annually.

Some of the Company's subsidiaries operate in foreign countries and their financial results are subject to exchange rate movements. The Company has operations in Canada with foreign currency exposure, primarily due to sales made from businesses in Canada to customers in the United States. These sales are denominated in U.S. dollars. In addition, the Company's subsidiary in Brazil has loans denominated in U.S. dollars. In 2007, the Company began a systematic program to limit its exposure to fluctuations in exchange rates related to certain assets and liabilities of its operations in Canada and Brazil that are denominated in U.S. dollars. The net exposure generally ranges from \$5 to \$10 million. The foreign currency contracts and arrangements created under this program are not designated as hedged items under Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) 815, *Derivatives and Hedging*, and accordingly, the changes in the fair value of the foreign currency arrangements, which have been immaterial, are recorded in the income statement. The Company's foreign currency arrangements are generally three months or less and, as of December 31, 2011, the Company had no foreign currency arrangements or contracts in place.

The Company uses certain commodities, primarily plastic resins, in its manufacturing processes. The cost of operations can be affected as the market for these commodities changes. The Company currently has no derivative contracts to hedge this risk; however, the Company also has no significant purchase obligations to purchase fixed quantities of such commodities in future periods. Significant future increases in the cost of plastic resin or other adverse changes in the general economic environment could have a material adverse impact on the Company's financial position, results of operations or cash flows.

**Critical Accounting Policies**

Our discussion and analysis of the Company's financial condition and results of operations are based on the accompanying consolidated financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America. As indicated in the Summary of Significant Accounting Policies included in the Notes to Consolidated Financial Statements (included in Item 8 of this report), the amount of assets, liabilities, revenue and expenses reported are affected by estimates and judgments that are

## Table of Contents

necessary to comply with generally accepted accounting principles. We base our estimates on prior experience and other assumptions that we consider reasonable to our circumstances. We believe the following matters may involve a high degree of judgment and complexity.

**Bad Debts** The Company evaluates the collectability of accounts receivable based on a combination of factors. In circumstances where the Company is aware of a specific customer's inability to meet its financial obligations, a specific allowance for doubtful accounts is recorded against amounts due to reduce the net recognized receivable to the amount the Company reasonably believes will be collected. Additionally, the Company also reviews historical trends for collectability in determining an estimate for its allowance for doubtful accounts. If economic circumstances change substantially, estimates of the recoverability of amounts due the Company could be reduced by a material amount.

**Inventory** Inventories are valued at the lower of cost or market. Cost is determined by the last-in, first-out ( LIFO ) method for approximately 20 percent of the Company's inventories and the first-in, first-out ( FIFO ) method for all other inventories. Where appropriate, standard cost systems are utilized and appropriate variances are evaluated for purposes of determining cost; the standards are adjusted as necessary to ensure they approximate actual costs. Estimates of lower of cost or market value of inventory are determined based upon current economic conditions, historical sales quantities and patterns and, in some cases, the specific risk of loss on specifically identified inventories.

**Goodwill** Goodwill is subjected to annual impairment testing, unless significant changes in circumstances indicate a potential impairment may have occurred sooner. Goodwill impairment testing requires, in part, that we estimate the fair value of our reporting units which, in turn, requires that we make judgments concerning future cash flows and appropriate discount rates for those reporting units. Fair values are established using comparative market multiples in the current market conditions and discounted cash flows. The discount rates used are based on the weighted average cost of capital determined for each of the Company's reporting units and ranged from 9.1% to 13.7% in 2011. In addition we make certain judgments about the selection of comparable companies used in determining market multiples in valuing our business units. We also compare our book value and the estimates of fair value of the reporting units to our market capitalization as of and at dates near the annual testing date. Management uses this comparison as additional evidence of the fair value of the Company, as our market capitalization may be suppressed by other factors such as the control premium associated with a controlling shareholder, our leverage or general expectations regarding future operating results and cash flows. In situations where the implied value of the Company under the Income or Market Approach are significantly different than our market capitalization we re-evaluate and adjust, if necessary, the assumptions underlying our Income and Market Approach models.

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other* (Topic 350) effective for fiscal years beginning after December 15, 2011. The Company conducted its annual impairment assessment as of October 1, 2011 which included adoption of this guidance. The update gives companies the option to perform a qualitative assessment that may enable them to forgo the annual two-step test for impairment. ASU No. 2011-08 allows a qualitative assessment to first be performed to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the Company concludes that this is the case, we must perform the two-step test. Otherwise we do not have to perform the two-step test. The ASU also includes a revised list of events and circumstances to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

**Contingencies** In the ordinary course of business, we are involved in various legal proceedings and contingencies. We have recorded liabilities for these matters in accordance with FASB ASC 450, *Contingencies* ( ASC 450 ). ASC 450 requires a liability to be recorded based on our estimate of the probable cost of the resolution of a contingency. The actual resolution of these contingencies may differ from our estimates. If a contingency were settled for an amount greater than our estimate, a future charge to income would result. Likewise, if a contingency were settled for an amount that is less than our estimate, a future credit to income would result.

## **Table of Contents**

**Revenue Recognition** we recognize revenues from the sale of products, net of actual and estimated returns, at the point of passage of title and risk of loss, which is generally at time of shipment, and collectability of the fixed or determinable sales price is reasonably assured.

**Income Taxes** Deferred income taxes are provided to recognize the effect of temporary differences between financial and tax reporting. Deferred income taxes are not provided for undistributed earnings of foreign consolidated subsidiaries as it is our intention to reinvest such earnings for an indefinite period of time. The Company has significant operations outside the United States and in jurisdictions with statutory tax rates lower than in the United States. As a result, significant tax and treasury planning of future operations are necessary to determine the proper amounts of tax assets, liabilities and expense to be recognized. FASB ASC 740, *Income Taxes* (ASC 740) requires that deferred tax assets be reduced by a valuation allowance, if based on all available evidence, it is more likely than not that the deferred tax asset will not be realized. The Company evaluates the recovery of its deferred tax assets by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income inherently rely heavily on estimates.

Also, significant judgment is required in determining the Company's tax expense and in evaluating its tax positions, including evaluating uncertainties under ASC 740. We review our tax positions quarterly and adjust the balances as new information becomes available.

## **Recent Pronouncements**

In June 2011, the FASB issued Accounting Standards Updated ( ASU ) No. 2011-05, *Comprehensive Income (Topic 220) Presentation of Comprehensive Income*. The new accounting standard will require companies to present the components of net income and other comprehensive income either as one continuous statement or two separate but consecutive statements. The update eliminates the option to report other comprehensive income and its components in the statement of changes in equity. The Company plans to adopt this guidance beginning in the first quarter of 2012. The Company does not believe the adoption of this guidance will have a material impact on the Company's consolidated financial statements, as this guidance modifies presentation of other comprehensive income already disclosed in the financial statements.

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other (Topic 350)*. The update gives companies the option to perform a qualitative assessment that may enable them to forgo the annual two-step test for impairment. ASU No. 2011-08 allows a qualitative assessment to first be performed to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If a company concludes that this is the case, it must perform the two-step test. Otherwise a company does not have to perform the two-step test. The ASU also includes a revised list of events and circumstances to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The ASU is effective for fiscal years beginning after December 15, 2011 with early adoption permitted. The Company adopted the new guidance as part of its annual impairment assessment as of October 1, 2011.

**Myers Industries, Inc.**

We have audited the accompanying consolidated statement of financial position of Myers Industries, Inc. and Subsidiaries as of December 31, 2011, and the related consolidated statements of income (loss), shareholders' equity and comprehensive income (loss), and cash flows for the year ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Myers Industries, Inc. and Subsidiaries as of December 31, 2011, and its results of operations and cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Myers Industries, Inc.'s and Subsidiaries internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 2, 2012, expressed an unqualified opinion thereon.

**Table of Contents**

**MYERS INDUSTRIES, INC. AND SUBSIDIARIES.**

**Notes to Consolidated Financial Statements**

**(Dollar amounts in thousands, except where otherwise indicated)**

**Summary of Significant Accounting Policies**

**Basis of Presentation**

The consolidated financial statements include the accounts of Myers Industries, Inc. and all wholly owned subsidiaries ( Company ). All intercompany accounts and transactions have been eliminated in consolidation. All subsidiaries that are not wholly owned and are not included in the consolidated operating results of the Company are immaterial investments which have been accounted for under the cost method. The preparation of financial statements in conformity with U.S. generally accepted accounting principles ( GAAP ) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures at the date of the financial statements and the reported amount of revenues and expenses during the reported period. Actual results could differ from those estimates.

**Reclassification**

Certain prior year amounts in the accompanying consolidated financial statements have been reclassified in conformity with generally accepted accounting principles to conform to the current year s presentation.

**Recent Accounting Pronouncements**

In June 2011, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Updated ( ASU ) No. 2011-05, *Comprehensive Income (Topic 220) Presentation of Comprehensive Income*. The new accounting standard will require companies to present the components of net income and other comprehensive income either as one continuous statement or two separate but consecutive statements. The update eliminates the option to report other comprehensive income and its components in the statement of changes in equity. On December 23, 2011, the FASB issued a final standard to defer the new requirement to present components of reclassifications of other comprehensive income on the face of the income statement. The Company does not believe the adoption of this guidance will have a material impact on the Company s consolidated financial statements, as this guidance modifies presentation of other comprehensive income already disclosed in the financial statements. The Company plans to adopt this guidance beginning in the first quarter of 2012.

**Translation of Foreign Currencies**

All asset and liability accounts of consolidated foreign subsidiaries are translated at the current exchange rate as of the end of the accounting period and income statement items are translated monthly at an average currency exchange rate for the period. The resulting translation adjustment is recorded in other comprehensive income (loss) as a separate component of shareholders equity.

**Fair Value Measurement**

The Company follows guidance included in ASC 820, *Fair Value Measurements and Disclosures*, for its financial assets and liabilities, as required. The guidance established a common definition for fair value to be applied to U.S. GAAP requiring the use of fair value, established a framework for measuring fair value, and expanded disclosure requirements about such fair value measurements. The guidance did not require any new fair value measurements, but rather applied to all other accounting pronouncements that require or permit fair value measurements. Under ASC 820, the hierarchy that prioritizes the inputs to valuation techniques used to measure fair value is divided into three levels:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

---

**Table of Contents**

**MYERS INDUSTRIES, INC. AND SUBSIDIARIES.**

**Notes to Consolidated Financial Statements (Continued)**

**(Dollar amounts in thousands, except where otherwise indicated)**

Level 2: Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active or inputs that are observable either directly or indirectly.

Level 3: Unobservable inputs for which there is little or no market data or which reflect the entity's own assumptions.

The fair value of the Company's cash, accounts receivable, accounts payable and accrued expenses are considered to have a fair value which approximates carrying value due to the nature and relative short maturity of these assets and liabilities.

The fair value of debt under the Company's Credit Agreement approximates carrying value due to the floating interest rates and relative short maturity (less than 90 days) of the revolving borrowings under this agreement. The fair value of the Company's \$35 million fixed rate senior notes was estimated at \$37.6 million at December 31, 2011 using market observable inputs for the Company's comparable peers with public debt, including quoted prices in active markets and interest rate measurements which are considered level 2 inputs.

**Concentration of Credit Risk**

Financial instruments that potentially subject the Company to concentration of credit risk primarily consist of trade accounts receivable. The concentration of accounts receivable credit risk is generally limited based on the Company's diversified operations, with customers spread across many industries and countries. The Company's largest single customer accounts for approximately four percent of total sales, with only one other customer greater than three percent. Outside of the United States, only Canada, which accounts for approximately nine percent of total sales, is significant to the Company's operations. In addition, management has established certain requirements that customers must meet before credit is extended. The financial condition of customers is continually monitored and collateral is usually not required. The Company evaluates the collectability of accounts receivable based on a combination of factors. In circumstances where the Company is aware of a specific customer's inability to meet its financial obligations, a specific allowance for doubtful accounts is recorded against amounts due to reduce the net recognized receivable to the amount the Company reasonably believes will be collected. Additionally, the Company also reviews historical trends for collectability in determining an estimate for its allowance for doubtful accounts. If economic circumstances change substantially, estimates of the recoverability of amounts due the Company could be reduced by a material amount. Expense related to bad debts was approximately \$2,343, \$1,117 and \$861 for the years 2011, 2010 and 2009, respectively.

**Inventories**

Inventories are stated at the lower of cost or market. Approximately 20 percent of our inventories are valued using the last-in, first-out (LIFO) method of determining cost. All other inventories are valued at the first-in, first-out (FIFO) method of determining cost.

If the FIFO method of inventory cost valuation had been used exclusively by the Company, inventories would have been \$9.6 million, \$9.9 million and \$9.4 million higher than reported at December 31, 2011, 2010 and 2009, respectively. In 2011, 2010 and 2009, the liquidation of LIFO inventories decreased cost of sales and increased income before taxes by approximately \$0.8 million, \$0.7 million and \$4.2 million, respectively.

**Table of Contents****MYERS INDUSTRIES, INC. AND SUBSIDIARIES.****Notes to Consolidated Financial Statements (Continued)****(Dollar amounts in thousands, except where otherwise indicated)****Property, Plant and Equipment**

Property, plant and equipment are carried at cost less accumulated depreciation and amortization. The Company provides for depreciation and amortization on the basis of the straight-line method over the estimated useful lives of the assets as follows:

Buildings	20 to 30 years
Machinery and Equipment	3 to 12 years
Vehicles	1 to 3 years
Leasehold Improvements	7 to 10 years

**Long-Lived Assets**

The Company reviews its long-lived assets and identifiable intangible assets with finite lives for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Determination of potential impairment related to assets to be held and used is based upon undiscounted future cash flows resulting from the use and ultimate disposition of the asset. For assets held for disposal, the amount of potential impairment may be based upon appraisal of the asset, estimated market value of similar assets or estimated cash flow from the disposition of the asset.

At December 31, 2011 and 2010, the Company had approximately \$5.7 million and \$5.0 million, respectively, of property, plant, and equipment held for sale, which represents the lower of net book value or estimated fair value based on level 2 inputs, and is included in other assets on the accompanying Consolidated Statement of Financial Position. In 2009, the Company recorded impairment charges of \$5.5 million for impairment of certain property, plant and equipment as a result of restructuring its Material Handling, Lawn and Garden and Engineered Products businesses.

**Revenue Recognition**

The Company recognizes revenues from the sale of products, net of actual and estimated returns, at the point of passage of title and risk of loss, which is generally at time of shipment, and collectability of the fixed or determinable sales price is reasonably assured.

**Accumulated Other Comprehensive Income (Loss)**

As of December 31, 2011, 2010, and 2009, the balance in the Company's accumulated other comprehensive income (loss) is comprised of the following:

	2011	2010	2009
Foreign currency translation adjustments	\$ 9,994	\$ 12,234	\$ 8,821
Pension adjustments	(2,700)	(2,070)	(2,044)
Total	\$ 7,294	\$ 10,164	\$ 6,777

**Shipping and Handling**

## Edgar Filing: MYERS INDUSTRIES INC - Form 10-K

Shipping and handling expenses are primarily classified as selling expenses in the accompanying Consolidated Statements of Income (Loss). The Company incurred shipping and handling costs of approximately \$26.6 million, \$24.5 million and \$20.9 million for the years ended December 31, 2011, 2010 and 2009, respectively.

---

**Table of Contents**

**MYERS INDUSTRIES, INC. AND SUBSIDIARIES.**

**Notes to Consolidated Financial Statements (Continued)**

**(Dollar amounts in thousands, except where otherwise indicated)**

**Stock Based Compensation**

The Company has stock plans that provide for the granting of stock-based compensation to employees and, in certain instances, to non-employee directors. Shares are issued upon exercise from authorized, unissued shares. The Company records the costs of the plan under the provisions of ASC 718, *Compensation - Stock Compensation*. For transactions in which we obtain employee services in exchange for an award of equity instruments, we measure the cost of the services based on the grant date fair value of the award. The Company recognizes the cost over the period during which an employee is required to provide services in exchange for the award, referred to as the requisite service period (usually the vesting period). Cash flows resulting from tax benefits for deductions in excess of compensation cost recognized are included in financing cash flows.

**Income Taxes**

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those differences are expected to be received or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company evaluates its tax positions in accordance with ASC 740 *Income Taxes* (ASC 740). ASC 740 provides detailed guidance for the financial statement recognition, measurement and disclosure of uncertain tax positions recognized in an enterprise's financial statements. Income tax positions must meet a more-likely-than-not recognition threshold at the effective date to be recognized under ASC 740. The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits within operations as income tax expense.

**Cash and Cash Equivalents**

The Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents. Cash equivalents are stated at cost, which approximates market value. The Company maintains operating cash and reserves for replacement balances in financial institutions which, from time to time, may exceed federally insured limits. The Company periodically assesses the financial condition of these institutions and believes that the risk of loss is minimal.

Cash flows used in investing activities excluded \$1.8 million of accrued capital expenditures in 2011.

**Goodwill and Intangible Assets**

The Company is required to test for impairment on at least an annual basis. The Company conducted its annual impairment assessment as of October 1. In addition, the Company tests for impairment whenever events or circumstances indicate that it is more likely than not that the fair value of a reporting unit is below its carrying amount. Such events may include, but are not limited to, significant changes in economic and competitive conditions, the impact of the economic environment on the Company's customer base or its businesses, or a material negative change in its relationships with significant customers.

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other* (Topic 350) effective for fiscal years beginning after December 15, 2011. The update gives companies the option to perform a

---

**Table of Contents**

**MYERS INDUSTRIES, INC. AND SUBSIDIARIES.**

**Notes to Consolidated Financial Statements (Continued)**

**(Dollar amounts in thousands, except where otherwise indicated)**

qualitative assessment that may enable them to forgo the annual two-step test for impairment. ASU No. 2011-08 allows a qualitative assessment to first be performed to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If a company concludes that this is the case, it must perform the two-step test. Otherwise a company does not have to perform the two-step test. The ASU also includes a revised list of events and circumstances to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The Company conducted its annual impairment assessment as of October 1, 2011 which included adoption of this guidance.

In evaluating goodwill for impairment using the two-step test, the Company uses a combination of valuation techniques primarily using discounted cash flows to determine the fair values of its business reporting units and market based multiples as supporting evidence. The variables and assumptions used, all of which are level 3 fair value inputs, including the projections of future revenues and expenses, working capital, terminal values, discount rates and long term growth rates. The market multiples observed in sale transactions are determined separately for each reporting unit are based on the weighted average cost of capital determined for each of the Company's reporting units and ranged from 9.1% to 13.7% in 2011. In addition we make certain judgments about the selection of comparable companies used in determining market multiples in valuing our business units, as well as certain assumptions to allocate shared assets and liabilities to calculate values for each of our business units. The underlying assumptions used are based on historical actual experience and future expectations that are consistent with those used in the Company's strategic plan. The Company compares the fair value of each of its reporting units to their respective carrying values, including related goodwill. We also compare our book value and the estimates of fair value of the reporting units to our market capitalization as of and at dates near the annual testing date. Management uses this comparison as additional evidence of the fair value of the Company, as our market capitalization may be suppressed by other factors such as the control premium associated with a controlling shareholder, our leverage or general expectations regarding future operating results and cash flows. In situations where the implied value of the Company under the Income or Market Approach are significantly different than our market capitalization we re-evaluate and adjust, if necessary, the assumptions underlying our Income and Market Approach models. Our estimate of the fair values of these business units, and the related goodwill, could change over time based on a variety of factors, including the aggregate market value of the Company's common stock, actual operating performance of the underlying businesses or the impact of future events on the cost of capital and the related discount rates used.

In 2010, the Company determined that all reporting units had an estimated fair value substantially in excess of carrying value except for Lawn and Garden which initially passed but not by a substantial amount. In the fourth quarter, persistently high raw material costs and weak demand resulted in operating results and cash flows in the Lawn and Garden Segment that were significantly below forecasts which also impacted projections for future years. As a result of this triggering event, the Company determined that the Lawn and Garden reporting unit needed to complete a Step 1 test as of December 31, 2010. This reporting unit failed Step 1 of this impairment test, requiring a Step 2 test to be performed. Based on the results of Step 2 testing, which included a valuation of the reporting unit's net assets in accordance with ASC 805, *Business Combinations* (ASC 805), a goodwill impairment charge of \$72 million was recorded in the fourth quarter of 2010 writing down its implied fair value to \$9.3 million. The fair values for the valuation of the net assets were developed using both level 2 and 3 inputs.

**Table of Contents****MYERS INDUSTRIES, INC. AND SUBSIDIARIES.****Notes to Consolidated Financial Statements (Continued)****(Dollar amounts in thousands, except where otherwise indicated)**

The changes in the carrying amount of goodwill for the years ended December 31, 2011 and 2010 is as follows:

	<b>Distribution</b>	<b>Material Handling</b>	<b>Engineered Products</b>	<b>Lawn and Garden</b>	<b>Total</b>
