OUR COMPANY

General

We are a leading global producer of styrenic block copolymers (SBCs) and other engineered polymers. We market our products under the Kraton® brand. SBCs are highly-engineered synthetic elastomers, which we invented and commercialized almost 50 years ago, that enhance the performance of numerous end use products by imparting greater flexibility, resilience, strength, durability and processability. Our SBC polymers are typically formulated or compounded with other products to achieve improved, customer specific performance characteristics in a variety of applications. We focus on the end use markets we believe offer the highest growth potential and greatest opportunity to differentiate our products from competing products. Within these end use markets, we provide our customers with a broad portfolio of highly-engineered polymers that we believe are value-enhancing and, in many cases, critical to the performance of their products. We seek to maximize the value of our product portfolio by emphasizing complex or specialized polymers and innovations that yield higher margins than more commoditized products. We sometimes refer to these complex or specialized polymers or innovations as being more differentiated. Our products are typically developed using our proprietary, and in many cases patent-protected, technology and require significant engineering, testing and certification. In 2011, we were awarded 79 patents for new products or applications and at December 31, 2011, we had 1,136 granted patents and 286 pending patent applications. We believe our almost 50-year track record of innovation, long-standing customer relationships and global infrastructure position us well to successfully execute our strategies.

Our SBC products are found in many everyday applications, including disposable diapers, the rubberized grips of toothbrushes, razor blades and power tools and asphalt formulations used to pave roads. We also produce Cariflex, isoprene rubber (IR) and isoprene rubber latex (IRL). Our Cariflex™ products are highly-engineered, non-SBC synthetic substitutes for natural rubber latex. Our IRL products, which have not been found to contain the proteins present in natural rubber latex and are, therefore, not known to cause allergies, are used in applications such as surgical gloves and condoms. We believe the versatility of IRL provides opportunities for new, high-margin applications. In addition to IRL, we have a portfolio of innovations at various stages of development and commercialization, including polyvinyl chloride (PVC), alternatives for wire, cable and medical applications, and polymers for use in slush molding for automotive applications, and our Nexar™ family of membrane polymers for applications such as water filtration and breathable fabrics.

Our total capacity as of December 31, 2011 was approximately 420 kilotons. We generated approximately \$1,437.5 million of sales revenue and 303.0 kilotons of sales volume for the year ended December 31, 2011. In 2011, we generated 14.3% of our sales revenue from innovation-driven revenue, which we define as revenue from products or applications introduced in the preceding five years. Our customers are diversified by industry and geography with more than 800 customers in over 60 countries. We manufacture our polymers at five manufacturing facilities globally, including our flagship facility in Belpre, Ohio, as well as facilities in Germany, France, Brazil, and Japan. The facility in Japan is operated by an unconsolidated manufacturing joint venture.

We have had relationships with many of our customers for 15 years or more and work closely with our customers to design products that meet application-specific performance and quality requirements. We have a diverse customer base, with no single customer accounting for more than 10.0% of our sales revenue in 2011 and our top 10 customers together representing approximately 29.2% of our sales revenues in 2011. Because of the technical expertise and investment required to develop many of our product formulations and the lead times required to replace them, our customers would likely incur additional costs by changing to an alternative vendor.

Over the past several years, we have implemented a range of strategic initiatives designed to enhance our profitability and end use market position. These include fixed asset investments to expand our capacity in specialized products, to enhance productivity at our existing facilities and to reduce our fixed costs through headcount reductions, production line closures at our Pernis, the Netherlands, facility (Pernis) and system upgrades. During this period, we have substantially exited the footwear applications business, which typically yielded lower margins than our other core end use markets, and implemented pricing strategies designed to

Table of Contents

enhance our overall margins and return on invested capital. We believe these initiatives provide us with a platform to benefit from volume growth that may occur in our end use markets.

DESCRIPTION OF NOTES

Kraton LLC and Kraton Capital may elect to offer 6.75% senior notes due 2019 from time to time as Additional Notes under an indenture dated as of February 11, 2011 (the Indenture) among us, the guarantors, as defined therein, and Wells Fargo Bank, National Association, as trustee. For a more detailed summary of the material provisions of the Indenture, you should read the description of general terms and provisions of the additional notes that will be set forth in the prospectus supplement. We urge you to read the Indenture, which is filed as an exhibit to this registration statement, as it will define your rights as holders of the Notes. You may request copies of the Indenture at our address set forth under Where You Can Find Additional Information.

PLAN OF DISTRIBUTION

We may sell the additional notes to or through underwriters or dealers and also may sell the additional notes directly to one or more other purchasers or through agents. The accompanying prospectus supplement and/or documents incorporated by reference will set forth the names of any underwriters or agents involved in the sale of the additional notes and any applicable commission or discounts.

The distribution of the additional notes may be effected from time to time in one or more transactions at a fixed price or prices, which may be changed, or at market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices.

The additional notes issued in each offering will constitute a further issuance, and will be fungible with, the issuers existing notes. We do not intend to apply for listing of the additional notes on any national securities exchange or for inclusion of the additional notes on any automated dealer quotation system. We may elect to list the additional notes on an exchange, but we will not be obligated to do so. It is possible that one or more underwriters currently are making and intend to continue to make a market in the existing notes, but will not be obligated to do so and may discontinue any market making at any time without notice. Therefore, we can give no assurance as to the liquidity of the trading market for the additional notes.

The additional notes may be offered to the public, from time to time, through broker-dealers acting as agent or principal, including through underwriting syndicates represented by one or more managing underwriters or directly by one or more of such firms in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The obligations of the underwriters to purchase the additional notes will be subject to the conditions set forth in the applicable underwriting agreement. Any public offering price and any discounts or concessions allowed or reallowed or paid by underwriters or dealers to other dealers may be changed from time to time. Registration of the additional notes covered by this prospectus does not mean, however, that those additional notes necessarily will be offered or sold.

In connection with an underwritten offering, underwriters or agents may receive compensation in the form of discounts, concessions or commissions from us or from purchasers of the offered additional notes for whom they may act as agents. In addition, underwriters may sell the additional notes to or through dealers, and those dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Any underwriters, dealers or agents participating in a distribution of the additional notes may be deemed to be underwriters within the meaning of the Securities Act, and any commissions received by broker-dealers may be deemed to be underwriting commissions under the Securities Act.

In compliance with the guidelines of the Financial Industry Regulatory Authority Inc., the maximum aggregate compensation to be paid to all broker-dealers participating in an offering of securities pursuant to this prospectus and any accompanying prospectus supplement will not exceed 8% of the gross proceeds from such offering.

Table of Contents

We may agree to indemnify an underwriter, broker-dealer or agent against certain liabilities related to the selling of the additional notes, including liabilities arising under the Securities Act.

At any time a particular offer of the additional notes covered by this prospectus is made, a revised prospectus or prospectus supplement, if required, will set forth the aggregate amount of additional notes covered by this prospectus being offered and the terms of the offering, including the name or names of any underwriters, dealers, brokers or agents. In addition, to the extent required, any discounts, commissions, concessions and other items constituting underwriters or agents compensation, as well as any discounts, commissions or concessions allowed or reallocated or paid to dealers, will be set forth in such revised prospectus or prospectus supplement. Any such required prospectus or prospectus supplement, and, if necessary, a post-effective amendment to the registration statement of which this prospectus is a part, will be filed with the SEC to reflect the disclosure of additional information with respect to the distribution of notes covered by this prospectus.

To facilitate the offering of the additional notes covered by this prospectus, certain persons participating in the offering may engage in transactions that stabilize, maintain or otherwise affect the price of the additional notes. This may include over-allotments or short sales of the securities, which involve the sale by persons participating in the offering of more securities than we sold to them. In these circumstances, these persons would cover such over-allotments or short positions by making purchases in the open market or by exercising their over-allotment option, if any. In addition, these persons may stabilize or maintain the price of the securities by bidding for or purchasing securities in the open market or by imposing penalty bids, whereby selling concessions allowed to dealers participating in the offering may be reclaimed if securities sold by them are repurchased in connection with stabilization transactions. The effect of these transactions may be to stabilize or maintain the market price of the securities at a level above that which might otherwise prevail in the open market. These transactions may be discontinued at any time.

In the ordinary course of their business activities, any underwriter, broker-dealer or agent and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve our securities and other instruments. Any underwriter, broker-dealer or agent and their respective affiliates may also engage in transactions with or perform services for us or provide other types of financing to us in the ordinary course of their business.

To the extent required, this prospectus may be amended and/or supplemented from time to time to describe a specific plan of distribution.

that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

5. That, for the purpose of determining liability of the registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

*(h) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers, and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer, or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer, or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.
