PROSPECTUS

2.8 Million Common Shares

Nuveen Municipal High Income Opportunity Fund

Nuveen Municipal High Income Opportunity Fund (the Fund) is a diversified, closed-end management investment company. The Fund's primary investment objective is to provide high current income exempt from regular federal income tax. The Fund's secondary investment objective is to seek attractive total return consistent with its primary objective. The Fund invests at least 80% of its Managed Assets (as defined on page 1 of the Prospectus) in investments the income from which is exempt from regular federal income tax. The Fund seeks to achieve its investment objectives by investing in municipal securities that Nuveen Asset Management, LLC (Nuveen Asset Management), the Fund's investment sub-adviser, believes are underrated and undervalued. The Fund cannot assure you that it will achieve its investment objectives.

On December 14, 2012, the Board of Trustees of the Fund and Nuveen Municipal High Income Opportunity Fund 2 (NYSE: NMD) (together with the Fund, the Funds) approved a merger. The Fund will be the acquiring fund and Nuveen Municipal High Income Opportunity Fund 2 will be the acquired fund. The merger is subject to customary conditions, including shareholder approval at the Funds' regular shareholder meetings. The merger is intended to create a single, larger fund with lower operating expenses and increased trading volume on the exchange for its common shares. A joint Proxy Statement/Prospectus relating to the proposed merger has been filed with the Securities and Exchange Commission (the SEC) and contains important information relating to the merger. Free copies of the Proxy Statement/Prospectus are available on the SEC's web site at www.sec.gov. INVESTORS AND SECURITY HOLDERS OF THE FUNDS ARE URGED TO READ THE JOINT PROXY STATEMENT/PROSPECTUS AND OTHER DOCUMENTS FILED WITH THE SEC CAREFULLY IN THEIR ENTIRETY BECAUSE THEY CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED MERGER. INVESTORS SHOULD CONSIDER THE INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES OF THE FUNDS CAREFULLY. THE JOINT PROXY STATEMENT/PROSPECTUS CONTAIN INFORMATION WITH RESPECT TO THE INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES OF THE FUNDS AND OTHER IMPORTANT INFORMATION ABOUT THE FUNDS. THE JOINT PROXY STATEMENT/PROSPECTUS CONSTITUTE NEITHER AN OFFER TO SELL SECURITIES, NOR DOES IT CONSTITUTE A SOLICITATION OF AN OFFER TO BUY SECURITIES, IN ANY STATE WHERE SUCH OFFER OR SALE IS NOT PERMITTED.

Investing in the Fund's common shares involves certain risks that are described in the Risk Factors and How the Fund Manages Risks sections of this Prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Edgar Filing: NUVEEN MUNICIPAL HIGH INCOME OPPORTUNITY FUND - Form POS 8C

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information (the "SAI"), dated February 27, 2013, containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the SEC's web site (<http://www.sec.gov>).

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

Portfolio Contents. The Fund invests at least 80% of its Managed Assets in investments the income from which is exempt from regular federal income tax. Under normal circumstances, the Fund expects to be fully invested (at least 95% of its Managed Assets) in such tax-exempt municipal securities. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles), such as, but not limited to, the portion of assets in special purpose trusts of which the Fund owns the inverse floater certificates that has been effectively financed by the trust's issuance of floating rate certificates. The Fund invests in municipal securities that Nuveen Asset Management believes are underrated and undervalued. Up to 30% of the Fund's Managed Assets may be invested in municipal securities that pay interest that is taxable under the federal alternative minimum tax applicable to individuals. The Fund will invest at least 50% of its Managed Assets in municipal securities that at the time of investment are investment grade quality. A security is considered investment grade quality if it is rated within the four highest grades by all nationally recognized statistical rating organizations that rate such security, or if it is unrated but judged to be of comparable quality by the Fund's investment adviser. The Fund may invest up to 50% of its Managed Assets in municipal securities that at the time of investment are rated below investment grade quality or that are unrated but judged to be of comparable quality by the Fund's investment adviser. No more than 5% of the Fund's Managed Assets may be invested in municipal securities rated below B-/B3 or that are unrated but judged to be of comparable quality by the Fund's investment adviser. Municipal securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds. The Fund may invest up to approximately 10% of its Managed Assets in inverse floating rate securities.

Adviser and Sub-Adviser. Nuveen Fund Advisors, LLC, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategies and their implementation. Nuveen Asset Management, LLC is the Fund's investment sub-adviser and oversees the day-to-day investment operations of the Fund.

Common shares will not be sold at a price less than current net asset value plus the per share amount of the commission to be paid to Nuveen Securities, LLC (Nuveen Securities). The Fund and Nuveen Securities will suspend the sale of common shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For information on how Common Shares may be sold, see the Plan of Distribution section of this Prospectus.

Common shares are listed on the NYSE MKT. The trading or ticker symbol of the Fund is NMZ. The Fund's closing price on the NYSE MKT on January 8, 2013 was \$14.38. As of January 15, 2013, the Fund has sold in this offering an aggregate of 2,187,609 common shares, representing net proceeds to the Fund of \$30,117,664 after payment of commissions of \$304,226 in the aggregate.

The date of this Prospectus is February 27, 2013

The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund will update this Prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the SAI.

The Fund

Nuveen Municipal High Income Opportunity Fund (the Fund) is a diversified, closed-end management investment company. See The Fund. The Fund's Common shares, \$.01 par value (Common Shares), are traded on the NYSE MKT under the symbol NMZ. See Description of Common Shares. As of December 31, 2012, the Fund had 30,513,725 Common Shares outstanding 510 shares of Variable Rate MuniFund Term Preferred Shares (referred to herein as VMTP Shares) and net assets applicable to Common Shares of \$413,007,191.

Investment Objectives and Policies

The Fund's primary investment objective is to provide high current income exempt from regular federal income tax. The Fund's secondary investment objective is to seek attractive total return consistent with its primary objective. The Fund cannot assure you that it will achieve its investment objectives.

The Fund seeks to achieve its investment objective primarily by investing at least 80% of its Managed Assets in investments the income from which is exempt from regular federal income tax. Under normal circumstances, the Fund expects to be fully invested (at least 95% of its Managed Assets) in various municipal securities, which may include municipal bonds and notes, other securities used to finance and refinance public projects, and related securities and derivative investments creating exposure to municipal bonds, notes and securities that provide for the payment of interest income that is exempt from regular federal income tax (as used in this document, the term municipal securities refers to all such investments collectively). Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles), such as, but not limited to, the portion of assets in special purpose trusts of which the Fund owns the inverse floater certificates that has been effectively financed by the trust's issuance of floating rate certificates. The Fund seeks to achieve its investment objectives by investing in municipal securities that Nuveen Asset Management (defined below under Sub-Adviser) believes are underrated and undervalued. Up to 30% of the Fund's Managed Assets may be invested in municipal securities that pay interest that is taxable under the federal alternative minimum tax applicable to individuals. For a discussion of how the federal alternative minimum tax may affect shareholders, see Tax Matters.

The Fund will invest at least 50% of its Managed Assets in investment grade quality municipal securities. A security is considered investment grade quality if it is rated within the four highest grades (Baa or BBB or better by Standard & Poor's Corporation Ratings Group, a division of The McGraw-Hill Companies, Inc. (S&P), Moody's Investors Service, Inc. (Moody's) and Fitch Ratings, Inc. (Fitch)) by all nationally recognized statistical rating organizations (NRSROs) that rate such

security, or if it is unrated but judged to be of comparable quality by Nuveen Asset Management.

The Fund may invest up to 50% of its Managed Assets in municipal securities that at the time of investment are rated below investment grade. Below investment grade quality municipal securities include those municipal securities that are rated investment grade by one or more NRSROs but rated below investment grade by at least one NRSRO. No more than 5% of the Fund's Managed Assets may be invested in municipal securities rated below B3/B- or that are unrated but judged to be of comparable quality by Nuveen Asset Management. This means that the Fund may invest in municipal securities that are involved in bankruptcy or insolvency proceedings or are experiencing other financial difficulties at the time of acquisition (such securities are commonly referred to as distressed securities). The Fund may invest up to approximately 10% of its Managed Assets in inverse floating rate securities.

As of October 31, 2012, approximately 57% of the Fund's Managed Assets were invested in municipal securities rated investment grade (using the higher of S&P's, Moody's, or Fitch's rating). The relative percentages of the value of the investments attributable to investment grade municipal securities and to below investment grade municipal securities could change over time as a result of rebalancing the Fund's assets by Nuveen Asset Management, market value fluctuations, issuance of additional shares and other events.

See The Fund's Investments and Risk Factors.

Investment Adviser

Nuveen Fund Advisors, LLC (NFALLC), the Fund's investment adviser, is responsible for determining the Fund's overall strategy and its implementation. NFALLC, a registered investment adviser, is a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen Investments). Founded in 1898, Nuveen Investments and its affiliates had approximately \$220 billion in assets under management as of September 30, 2012. See Management of the Fund Investment Adviser, Sub-Adviser and Portfolio Manager.

Sub-Adviser

Nuveen Asset Management, LLC (Nuveen Asset Management) serves as the Fund's sub-adviser and is a wholly-owned subsidiary of NFALLC. Nuveen Asset Management is a registered investment adviser. Nuveen Asset Management oversees the day-to-day investment operations of the Fund.

Nuveen Securities, LLC (Nuveen Securities), a registered broker-dealer affiliate of NFALLC and Nuveen Asset Management, is involved in the offering of the Fund's Common Shares. See Plan of Distribution-Distribution Through At-the-Market Transactions.

Use of Leverage

The Fund currently employs financial leverage primarily through its outstanding VMTP Shares. As of December 31, 2012, the balance outstanding on VMTP Shares and annual dividend rate was 51,000,000 and 1.28%, respectively. As of December 31, 2012, VMTP Shares represented approximately 8% of the Fund's Managed Assets. Preferred shares, including VMTP Shares, have seniority over Common Shares. Financial leverage is also created as a result of the Fund's investments in residual interest certificates of tender option bond trusts, also called inverse floating rate securities, because the Fund's investment exposure to the underlying bonds held by the trust have been effectively financed by the trust's

issuance of floating rate certificates. The Fund may also use borrowings as a means of financial leverage. See The Fund's Investments Municipal Securities Inverse Floating Rate Securities and Risk Factors Inverse Floating Rate Securities Risk.

Leverage involves special risks. See Risk Factors Leverage Risk. There is no assurance that the Fund's leveraging strategy will be successful. The Fund will seek to invest the proceeds of any future financial leverage in a manner consistent with the Fund's investment objectives and policies. See Use of Leverage.

The Fund pays a management fee to NFALLC (which in turn pays a portion of its fee to the Fund's subadviser, Nuveen Asset Management) based on a percentage of Managed Assets. Managed Assets include the proceeds realized and managed from the Fund's use of leverage as set forth in the Fund's investment management agreement. NFALLC will be responsible for using leverage to pursue the Fund's investment objective and will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage will advance the Fund's investment objective. However, the fact that a decision to increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed Assets and therefore NFALLC's and Nuveen Asset Management's fees means that NFALLC and Nuveen Asset Management may have a conflict of interest in determining whether to increase the Fund's use of leverage. NFALLC will seek to manage that potential conflict by only increasing the Fund's use of leverage when it determines that such increase is consistent with the Fund's investment objective, and by periodically reviewing the Fund's performance and use of leverage with the Board.

Offering Methods

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions through one or more broker-dealers that have entered into a selected dealer agreement with Nuveen Securities, one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

Distribution Through At-the-Market Transactions. The Fund from time to time may offer its Common Shares through Nuveen Securities, to certain broker-dealers that have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with UBS Securities LLC ("UBS") pursuant to which UBS will be acting as Nuveen Securities' sub-placement agent with respect to at-the-market offerings of Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund and Nuveen Securities. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE MKT, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a fixed commission rate of 1.0% of the gross proceeds of

the sale of Common Shares. Nuveen Securities will compensate broker-dealers participating in the offering at a fixed rate of up to 0.8% of the gross sales proceeds of the sale of Common Shares sold by that broker-dealer. Nuveen Securities may from time to time change the dealer re-allowance. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen Securities may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the 1933 Act), and the compensation of Nuveen Securities may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, Nuveen Securities will act as underwriter on a reasonable efforts basis.

The offering of Common Shares pursuant to the Distribution Agreement will terminate upon the earlier of (i) the sale of all Shares subject thereto or (ii) termination of the Distribution Agreement. The Fund and Nuveen Securities each have the right to terminate the Distribution Agreement in its discretion at any time. See Plan of Distribution Distribution Through At-the-Market-Transactions.

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

The Fund's closing price on the NYSE MKT on January 8, 2013 was \$14.38.

UBS, its affiliates and their respective employees hold or may hold in the future, directly or indirectly, investment interests in Nuveen Investments, Inc. and its funds. The interests held by employees of UBS or its affiliates are not attributable to, and no investment discretion is held by, UBS or its affiliates.

The principal business address of Nuveen Securities is 333 West Wacker Drive, Suite 3300, Chicago, Illinois 60606.

As of January 15, 2013, the Fund has sold in this offering an aggregate of 2,187,609 Common Shares, representing net proceeds to the Fund of \$30,117,664 after payment of commissions of \$304,226 in the aggregate.

Distribution Through Underwriting Syndicates. The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, Underwriters will market and price the offering on an expedited basis (e.g., overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 5% from the closing market price of the Fund's Common Shares on the

day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See Plan of Distribution Distribution Through Underwriting Syndicates.

Distribution Through Privately Negotiated Transactions. The Fund, through Nuveen Securities, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share of the Fund's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

Investment and Market Risk. An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk

Recent Market Conditions. The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign, and in the net asset values of many investment companies, including to some

extent the Fund. Conditions in the U.S. and global economies have resulted, and may continue to result, in fixed income instruments experiencing unusual liquidity issues, increased price volatility and, in some cases, credit downgrades and increased likelihood of default. The financial condition of federal, state and local governments may be sensitive to market events, which may, in turn, adversely affect the marketability of notes and bonds they issue. Recent declines in real estate prices and general business activity are reducing tax revenues of many state and local governments and could affect the economic viability of projects that are the sole source of revenue to support various municipal securities. Further, some state and local governments have been and in the future may be subject to direct ballot referenda that could limit their financial flexibility, or their ability to levy taxes or raise tax revenues, which may adversely affect the marketability of notes and bonds issued by those state and local governments. In addition, global economies and financial markets are becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. Because the situation is widespread and largely unprecedented, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market conditions. The severity or duration of these conditions may also be affected by policy changes made by governments or quasi-governmental organizations. In addition, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to AA+ from AAA. The downgrade by S&P could increase volatility in both stock and bond markets, result in higher interest rates and higher U.S. Treasury yields and increase the costs of all kinds of debt. These events could have significant adverse effects on the economy generally.

See Risk Factors Recent Market Conditions Credit Crisis Liquidity and Volatility Risk and Risk Factors Municipal Securities Market Risk.

Economic and Political Events Risk. The Fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in the bonds of similar projects (such as those relating to the education, health care, housing, transportation, or utilities industries), industrial development bonds, or in particular types of municipal securities (such as general obligation bonds, private activity bonds or moral obligation bonds). Such developments may adversely affect a specific industry or local political and economic conditions, and thus may lead to declines in the bonds' creditworthiness and value.

Market Discount from Net Asset Value. Shares of closed-end investment companies like the Fund have during some periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at

the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund (estimated to be an additional 0.19% of the offering price assuming a Common Share offering price of \$14.38 (the Fund's closing price on the NYSE MKT on January 8, 2013)).

The net asset value per Common Share will also be reduced by costs associated with any future issuances of Common or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes. See Risk Factors Market Discount from Net Asset Value.

Credit and Below Investment Grade Risk. Credit risk is the risk that one or more municipal securities in the Fund's portfolio will decline in price, or the issuer thereof will fail to pay interest or principal when due, because the issuer experiences a decline in its financial status. Credit risk is increased when a portfolio security is downgraded or the perceived creditworthiness of the issuer deteriorates. The Fund may invest up to 50% (measured at the time of investment) of its Managed Assets in municipal securities that are rated below investment grade or that are unrated but judged to be of comparable quality by Nuveen Asset Management; provided, that no more than 5% of the Fund's Managed Assets may be invested in municipal securities rated below B-/B3 or that are unrated but judged to be of comparable quality by Nuveen Asset Management. If a municipal security satisfies the rating requirements described above at the time of investment and is subsequently downgraded below that rating, the Fund will not be required to dispose of the security. If a downgrade occurs, Nuveen Asset Management will consider what action, including the sale of the security, is in the best interests of the Fund and its shareholders. This means that the Fund may invest in municipal securities that are involved in bankruptcy or insolvency proceedings or are experiencing other financial difficulties at the time of acquisition (such securities are commonly referred to as distressed securities). Municipal securities of below investment grade quality are predominately speculative with respect to the issuer's capacity to pay interest and repay principal when due, and are susceptible to default or decline in market value due to adverse economic and business developments, and are commonly referred to as junk bonds. Also, to the extent that the rating assigned to a municipal security in the Fund's portfolio is downgraded by any NRSRO, the market price and liquidity of such security may be adversely affected. The market values for municipal securities of below investment grade quality tend to be volatile, and these securities are less liquid than investment grade municipal securities. For these reasons, an investment in the Fund compared with a portfolio consisting solely of investment grade securities, may experience the following:

increased price sensitivity resulting from changing interest rates and/or a deteriorating economic environment;

greater risk of loss due to default or declining credit quality;

adverse issuer specific events that are more likely to render the issuer unable to make interest and/or principal payments; and

the possibility that a negative perception of the below investment grade market develops, resulting in the price and liquidity of below investment grade securities becoming depressed, and this negative perception could last for a significant period of time.

See Risk Factors Credit and Below Investment Grade Risk.

Interest Rate Risk. Generally, when market interest rates rise, bond prices fall, and vice versa. Interest rate risk is the risk that the municipal securities in the Fund's portfolio will decline in value because of increases in market interest rates. As interest rates decline, issuers of municipal securities may prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities and potentially reducing the Fund's income. As interest rates increase, slower than expected principal payments may extend the average life of securities, potentially locking in a below-market interest rate and reducing the Fund's value. Currently, market interest rates are at or near historically low levels. In typical market interest rate environments, the prices of longer-term municipal securities generally fluctuate more than prices of shorter-term municipal securities as interest rates change. Because the Fund will invest primarily in long-term municipal securities, the Common Share net asset value and market price per share will fluctuate more in response to changes in market interest rates than if the Fund invested primarily in shorter-term municipal securities. Because the values of lower-rated and comparable unrated debt securities are affected both by credit risk and interest rate risk, the price movements of such lower grade securities in response to changes in interest rates typically have not been highly correlated to the fluctuations of the prices of investment grade quality securities in response to changes in market interest rates. The Fund's use of leverage, as described herein, will tend to increase Common Share interest rate risk. See Risk Factors Interest Rate Risk.

Municipal Securities Market Risk. The amount of public information available about the municipal securities in the Fund's portfolio is generally less than that for corporate equities or bonds, and the investment performance of the Fund may therefore be more dependent on the analytical abilities of Nuveen Asset Management than if the Fund were a stock fund or taxable bond fund. The secondary market for municipal securities, particularly the below investment grade bonds in which the Fund may invest, also tends to be less well-developed or liquid than many other securities markets, which may adversely affect the Fund's ability to sell its bonds at attractive prices. See Risk Factors Municipal Securities Market Risk and Risk Factors Special Risks Related to Certain Municipal Obligations.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Share's market price or your overall returns. See Risks Reinvestment Risk.

Tax Risk. To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, among other things, the Fund must derive in each taxable year at least 90% of its gross income

from certain prescribed sources and satisfy a diversification test on a quarterly basis. If the Fund fails to satisfy the qualifying income or diversification requirements in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the diversification requirements where the Fund corrects the failure within a specified period. In order to be eligible for the relief provisions with respect to a failure to meet the diversification requirements, the Fund may be required to dispose of certain assets. If these relief provisions were not available to the Fund and it were to fail to qualify for treatment as a regulated investment company for a taxable year, all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for distributions to stockholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. To qualify to pay exempt-interest dividends, which are treated as items of interest excludable from gross income for federal income tax purposes, at least 50% of the value of the total assets of the Fund must consist of obligations exempt from regular income tax as of the close of each quarter of the Fund's taxable year. If the proportion of taxable investments held by the Fund exceeded 50% of the Fund's total assets as of the close of any quarter of the Fund's taxable year, the Fund would not satisfy the general eligibility test that would permit it to pay exempt-interest dividends for that taxable year.

The value of the Fund's investments and its net asset value may be adversely affected by changes in tax rates and policies. Because interest income from municipal securities is normally not subject to regular federal income taxation, the attractiveness of municipal securities in relation to other investment alternatives is affected by changes in federal income tax rates or changes in the tax-exempt status of interest income from municipal securities. Any proposed or actual changes in such rates or exempt status, therefore, can significantly affect the demand for and supply, liquidity and marketability of municipal securities. This could in turn affect the Fund's net asset value and ability to acquire and dispose of municipal securities at desirable yield and price levels. Additionally, the Fund is not a suitable investment for individual retirement accounts, for other tax-exempt or tax-deferred accounts or for investors who are not sensitive to the federal income tax consequences of their investments.

Leverage Risk. The use of financial leverage created through borrowing, the Fund's outstanding preferred shares, or the use of tender option bonds creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. The risk of loss attributable to the Fund's use of leverage is borne by Common Shareholders. The Fund's use of financial leverage can result in a greater decrease in net asset values in declining markets. The Fund's use of financial leverage similarly can magnify the impact of changing market conditions on Common Share market prices. See Risk Factors Inverse Floating Rate Securities Risk.

Because the long-term municipal securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate-term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to fix the effective rate paid on all or a portion of the Fund's leverage, in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio securities and its cost of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if short- or intermediate-term and long-term municipal rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns, if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing, dividends paid on VMTP shares, or the interest expense attributable to tender option bonds (See Risk Factors Inverse Floating Rate Securities Risk), as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund is required to maintain certain regulatory and rating agency asset coverage requirements in connection with its use of leverage, in order to be able to maintain the ability to declare and pay Common Share distributions and to maintain the VMTP Shares' rating. An NRSRO could downgrade its ratings on the Fund's outstanding preferred shares, including VMTP Shares. A ratings downgrade of the Fund's preferred shares may result in higher dividend rates and may also force the redemption of such preferred shares at what might be an inopportune time in the market. These factors may result in reduced net earnings or returns to Common Shareholders.

In order to maintain required asset coverage levels, the Fund may be required to alter the composition of its investment portfolio or take other actions, such as redeeming preferred shares or reducing leverage levels with the proceeds from portfolio transactions, at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time.

Furthermore, the amount of fees paid to NFALLC (which in turn pays a portion of its fees to Nuveen Asset Management) for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets. This may create an incentive for NFALLC and Nuveen Asset Management to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

The Fund seeks to manage the risks associated with its use of financial leverage as described below under *How the Fund Manages Risk*, *Investment Portfolio* and *Capital Structure Strategies to Manage Leverage Risk*.

See *Risk Factors*, *Leverage Risk* and *Use of Leverage*.

Inverse Floating Rate Securities Risk. The Fund may invest in inverse floating rate securities. Typically, inverse floating rate securities represent beneficial interests in a special purpose trust (sometimes called a tender option bond trust) formed by a third party sponsor for the purpose of holding municipal bonds. See *The Fund's Investments*, *Inverse Floating Rate Securities*. In general, income on inverse floating rate securities will decrease when interest rates increase and increase when interest rates decrease. Investments in inverse floating rate securities may subject the Fund to the risks of reduced or eliminated interest payments and losses of principal. In addition, inverse floating rate securities may increase or decrease in value at a greater rate than the underlying interest rate, which effectively leverages the Fund's investment. As a result, the market value of such securities generally will be more volatile than that of fixed rate securities.

The Fund may invest in inverse floating rate securities, issued by special purpose trusts that have recourse to the Fund. In Nuveen Asset Management's discretion, the Fund may enter into a separate shortfall and forbearance agreement with the third party sponsor of a special purpose trust. The Fund may enter into such recourse agreements (i) when the liquidity provider to the special purpose trust requires such an agreement because the level of leverage in the special purpose trust exceeds the level that the liquidity provider is willing to support absent such an agreement; and/or (ii) to seek to prevent the liquidity provider from collapsing the special purpose trust in the event that the municipal obligation held in the trust has declined in value. Such an agreement would require the Fund to reimburse the third-party sponsor of the trust, upon termination of the trust issuing the inverse floater, the difference between the liquidation value of the bonds held in the trust and the principal amount due to the holders of floating rate interests. In such instances, the Fund may be at risk of loss that exceeds its investment in the inverse floating rate securities.

The Fund's investments in inverse floating rate securities issued by special purpose trusts that have recourse to the Fund may be highly leveraged. The structure and degree to which the Fund's inverse floating rate securities are highly leveraged will vary based upon a number of factors, including the size of the trust itself and the terms of the underlying municipal security. An inverse floating rate security generally is considered highly leveraged if the principal amount of the short-term floating rate interests issued by the related special purpose trust is in excess of three times the principal amount of the inverse floating rate securities owned by the trust (the ratio of the principal amount of such short-term floating rate interests to the principal amount of the inverse floating rate securities is referred to as the *gearing*). In the event of a significant decline in the value of an underlying security, the Fund may suffer losses in excess of the amount of its investment (up to an amount equal to the value of the municipal securities underlying the inverse floating rate securities) as a result of liquidating special purpose

trusts or other collateral required to maintain the Fund's anticipated effective leverage ratio.

The Fund's investment in inverse floating rate securities will create effective leverage, which will create an opportunity for increased Common Share net income and returns, but will also create the possibility that Common Share long-term returns will be diminished if the cost of leverage exceeds the return on the inverse floating rate securities purchased by the Fund. Inverse floating rate securities have varying degrees of liquidity based upon the liquidity of the underlying securities deposited in a special purpose trust. The market price of inverse floating rate securities is more volatile than the underlying securities due to leverage. The leverage attributable to such inverse floating rate securities may be called away on relatively short notice and therefore may be less permanent than more traditional forms of leverage. In certain circumstances, the likelihood of an increase in the volatility of net asset value and market price of the Common Share may be greater for a fund (like the Fund) that relies primarily on inverse floating rate securities to achieve a desired effective leverage ratio. The Fund may be required to sell its inverse floating rate securities at less than favorable prices, or liquidate other Fund portfolio holdings in certain circumstances, including, but not limited to, the following:

If the Fund has a need for cash and the securities in a special purpose trust are not actively trading due to adverse market conditions;

If special purpose trust sponsors (as a collective group or individually) experience financial hardship and consequently seek to terminate their respective outstanding special purpose trusts; and

If the value of an underlying security declines significantly (to a level below the notional value of the floating rate securities issued by the trust) and if additional collateral has not been posted by the Fund.

See Risk Factors Inverse Floating Rate Securities Risk.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

Derivatives Risk, Including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if Nuveen Asset Management correctly forecasts market values, interest rates and other applicable factors. If Nuveen Asset Management incorrectly forecasts these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative

instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by Nuveen Asset Management of not only of the referenced asset, rate or index, but also of the swap itself. Successful implementation of most hedging strategies would generate taxable income. The derivatives market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments. See Risk Factors Derivatives Risk, Including the Risk of Swaps, Risk Factors Counterparty Risk, Risk Factors Hedging Risk and the Statement of Additional Information.

Counterparty Risk. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, insured municipal securities or other transactions supported by another party's credit will affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant financial hardships including bankruptcy and losses as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using such derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. See Risk Factors Counterparty Risk.

Hedging Risk. The Fund's use of derivatives or other transactions to reduce risks involves costs and will be subject to Nuveen Asset Management's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors. No assurance can be given that Nuveen Asset Management's judgment in this respect will be correct. In addition, no assurance can be given that the Fund will enter into hedging or other transactions at times or under circumstances in which it may be advisable to do so. See Risk Factors Hedging Risk.

Potential Conflicts of Interest Risk. NFALLC and Nuveen Asset Management each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, NFALLC and Nuveen Asset Management may provide investment management services to other funds and accounts that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Nuveen Asset Management may have to allocate a limited investment opportunity among its clients, which include closed-end funds, open-end funds and other commingled funds. NFALLC and Nuveen Asset Management have each adopted policies and procedures designed to address such situations and other potential conflicts of interests. For additional information about potential conflicts of interest, and the way in which NFALLC and Nuveen Asset Management address such conflicts, please see the SAI.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-Laws (the By-Laws) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and By-Laws Anti-Takeover Provisions and Risks Anti-Takeover Provisions.

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the Risk Factors section of this Prospectus, including: reinvestment risk, sector and industry risk, special risks relating to certain municipal obligations, market disruption risk, impact of offering methods risk, risks relating to certain affiliations; and risks that provisions in the Fund's Declaration of Trust could affect the opportunities of Common Shareholders to sell their Common Shares. See Risk Factors.

Distributions

The Fund pays monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on VMTP Shares. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. Over time, the Fund will distribute all of its net investment income (after it pays accrued dividends on VMTP Shares). In addition, the Fund intends to effectively distribute, at least annually, the net capital gain and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares, including VMTP Shares, then outstanding or pay any interest and required principal payments on borrowings. You may elect to reinvest automatically some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan.

As explained more fully below in Tax Matters, at least annually, the Fund may elect to retain rather than distribute all or a portion of any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) otherwise allocable to Common Shareholders and pay federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their attributable share of the retained gain in their income for the year as a long-term capital gain, and will be entitled to an income tax credit or refund for the tax deemed paid on their behalf by the Fund. The Fund will treat the retained capital gain amount as a substitute for equivalent cash distributions. See Distributions and Dividend Reinvestment Plan.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time.

Custodian and Transfer Agent

State Street Bank and Trust Company serves as custodian and transfer agent of the Fund's assets. See Custodian and Transfer Agent.

Special Tax Considerations

The Fund may invest up to 30% of its Managed Assets in municipal securities that pay interest that is taxable under the federal alternative minimum tax

applicable to individuals. If you are, or as a result of investment in the Fund would become, subject to the federal alternative minimum tax, the Fund may not be a suitable investment for you. In addition, distributions of ordinary taxable income (including any net short-term capital gain) will be taxable to shareholders as ordinary income (and not eligible for favorable taxation as qualified dividend income), and capital gain dividends will be taxable as long-term capital gains. See Tax Matters.

Voting Rights

The holders of the Fund's VMTP Shares, voting as a separate class, would have the right to elect at least two trustees at all times and to elect a majority of the trustees in the event two full years dividends on the preferred shares, including VMTP Shares, are unpaid. In each case, the remaining trustees would be elected by holders of Common Shares and preferred shares voting together as a single class. The holders of shares of preferred shares, including VMTP Shares, will vote as a separate class or classes on certain other matters as required under the Declaration, the Investment Company Act of 1940, as amended (the 1940 Act) and Massachusetts law. See Description of Shares Preferred Shares Voting Rights and Certain Provisions in the Declaration of Trust.

SUMMARY OF FUND EXPENSES

The table shows the expenses of the Fund as a percentage of the average net assets applicable to Common Shares, and not as a percentage of total assets or Managed Assets.

Shareholder Transaction Expenses (as a percentage of offering price)	
Maximum Sales Charge	4.00%
Offering Costs Borne by the Fund(1)	0.19%
	As a Percentage of Net Assets Attributable to Common Shares(2)

Annual Expenses	
Management Fees	1.01%
Fees on VMTP Shares and Interest and Related Expenses from Inverse Floaters(3)	0.22%
Other Expenses	0.19%

Total Annual Expenses	1.42%

- (1) Assuming a Common Share offering price of \$14.38 (the Fund's closing price on the NYSE MKT on January 8, 2013).
- (2) Stated as percentages of average net assets attributable to Common Shares for the fiscal year ended October 31, 2012, adjusted to reflect the expiration of the Fee and Expense Reimbursement on November 30, 2011, the termination of the borrowing arrangement with the custodian bank on December 21, 2012 and the issuance of \$51 million of Variable Rate MuniFund Term Preferred Shares on that same date, and to exclude the expenses incurred during the 12-month period for dividend disbursing agent fees associated with Auction Rate Preferred Shares that are no longer outstanding.
- (3) Fees on VMTP Shares assumes annual dividends paid, as well as the amortization of offering costs. Interest and Related Expenses from Inverse Floaters includes interest expense that arises because accounting rules require the Fund to treat interest paid by trusts issuing certain inverse floating rate investments held by the Fund as having been paid (indirectly) by the Fund. Because the Fund also recognizes a corresponding amount of interest income (also indirectly), the Fund's net asset value, net investment income, and total return are not affected by this accounting treatment. The actual fees on VMTP Shares and Interest and Related Expenses from Inverse Floaters incurred in the future may be higher or lower.

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. See "Management of the Fund" Investment Adviser.

Examples

The following examples illustrate the expenses (including the applicable transaction fees, if any, and estimated offering costs of \$1.90) that a shareholder would pay on a \$1,000 investment that is held for the time periods provided in the table. Each example assumes that all dividends and other distributions are reinvested in the Fund and that the Fund's Annual Expenses, as provided above, remain the same. The examples also

assume a 5% annual return.(1)

Example # 1 (At-the-Market Transaction)

The following example assumes a transaction fee of 1.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$26	\$56	\$89	\$180

Example # 2 (Underwriting Syndicate Transaction)

The following example assumes a transaction fee of 4.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$56	\$85	\$116	\$205

Example # 3 (Privately Negotiated Transaction)

The following example assumes there is no transaction fee.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$16	\$47	\$79	\$172

The examples should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown above.

- (1) The examples assume that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

FINANCIAL HIGHLIGHTS

The following Financial Highlights table is intended to help a prospective investor understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single share of Common Stock of the Fund. The total returns in the table represent the rate an investor would have earned or lost on an investment in shares of Common Stock of the Fund (assuming reinvestment of all dividends). The information with respect to the fiscal year ended October 31, 2012 has been audited by Ernst & Young LLP, whose report for the fiscal year ended October 31, 2012, along with the financial statements of the Fund including the Financial Highlights for each of the periods indicated therein, are included in the Fund's 2012 Annual Report. A copy of the 2012 Annual Report may be obtained from www.sec.gov or by visiting www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus. Past results are not indicative of future performance.

The following per share data and ratios have been derived from information provided in the financial statements.

Selected data for a Common share outstanding throughout each period:

	Year Ended October 31								
PER SHARE OPERATING PERFORMANCE	2012	2011	2010	2009	2008	2007	2006	2005	2004(g)
