DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Annual Report to Shareholders of Friedman Industries, Incorporated for the fiscal year ended March 31, 2013 Part II.

Proxy Statement for the 2013 Annual Meeting of Shareholders of Friedman Industries, Incorporated Part III.

PART I

Item 1. Business

Friedman Industries, Incorporated (the Company), a Texas corporation incorporated in 1965, is engaged in steel processing, pipe manufacturing and processing and steel and pipe distribution.

The Company has two product groups: coil and tubular products. Significant financial information relating to the Company's product groups for the last two years is contained in Note 7 of the Consolidated Financial Statements included in the Company's Annual Report to Shareholders for the fiscal year ended March 31, 2013, which financial statements are incorporated herein by reference in Item 8 hereof.

Coil Products

The Company purchases prime hot-rolled steel coils, processes the coils into flat, finished sheet and plate and sells these products on a wholesale, rapid-delivery basis in competition with steel mills, importers and steel service centers.

The Company owns and operates two coil processing facilities located in Hickman, Arkansas (Hickman) and Decatur, Alabama (Decatur). Each facility operates a cut-to-length line and a steel temper mill. The cut-to-length lines are designed to level the steel and cut the material to prescribed lengths. The steel temper mills are designed to improve the flatness of the steel and its surface qualities. The Company's processing machinery is heavy, mill-type equipment capable of processing coils weighing up to 25 tons. Coils are processed to the specifications required for a particular order. Shipments are made via unaffiliated truckers or by rail and can generally be made within 48 hours of the receipt of a customer's order.

The Hickman and Decatur facilities are functionally equivalent with respect to machinery, equipment, capacities and products produced. The Company makes shipments of coil products based on which facility offers the desired product or, if the product is available at both facilities, based on other factors, such as customer location, freight conditions and the ability of the facility to fulfill the order on a timely basis.

The Company also purchases and markets non-standard hot-rolled steel coils through its XSCP Division (XSCP). In recent years, XSCP has increasingly marketed non-standard coils on a cut-to-length basis. XSCP operates from the Company's coil processing facilities located in Hickman, Arkansas and Decatur, Alabama and shares certain expenses and employees with Hickman and Decatur. In addition, Hickman and Decatur provide warehousing, processing and distribution services to XSCP.

The Company primarily purchases hot-rolled steel coils from steel mills operated by Nucor Steel Company (NSC) located near the Hickman and Decatur processing facilities. Loss of NSC as a source of coil supply could have a material adverse effect on the Company's business.

The Company also processes customer-owned coils on a fee basis. Revenues generated from processing customer-owned coils are not material to the Company's results of operations and financial condition, as a whole.

Tubular Products

Through its Texas Tubular Products Division (TTP) in Lone Star, Texas, the Company manufactures, purchases, processes and markets tubular products (pipe).

TTP operates two pipe mills. Both pipe mill #1 and pipe mill #2 are American Petroleum Institute-licensed to manufacture line and oil country pipe and also manufacture pipe for structural and piling purposes that meet other recognized industry standards. TTP also employs various pipe processing equipment, including beveling machines, pipe handling equipment and other related machinery.

In recent years, the Company has purchased steel coils from U.S. Steel Tubular Products, Inc. (USS), an affiliate of United States Steel Corporation, converted these coils into line and oil country pipe, and sold this pipe to USS pursuant to orders received from USS. The Company has also purchased pipe from USS and marketed it to other customers for structural and other miscellaneous applications. In addition, the Company manufactures pipe and markets it to other customers for structural and other miscellaneous applications.

Loss of USS as a supplier or customer could have a material adverse effect on the Company's business. The Company can make no assurances as to orders from USS or the amounts of pipe and coil material that will be available from USS in the future.

Marketing

The following table sets forth the approximate percentage of total sales contributed by each group of products and services during each of the Company's last two fiscal years:

Product and Service Groups	2013	2012
Coil Products	49%	43%
Tubular Products	51%	57%

Coil Products. The Company sells coil products and processing services to approximately 150 customers located primarily in the midwestern, southwestern and southeastern sections of the United States. The Company's principal customers for these products and services are steel distributors and customers fabricating steel products such as storage tanks, steel buildings, farm machinery and equipment, construction equipment, transportation equipment, conveyors and other similar products. During each of the fiscal years ended March 31, 2013 and 2012, seven and thirteen customers of coil products, respectively, accounted for approximately 25% of the Company's total sales. In fiscal 2013, sales of coil products to Trinity Industries, Inc. accounted for approximately 11% of the Company's total sales. No coil product customer accounted for as much as 10% of the Company's total sales during fiscal 2012.

The Company sells substantially all of its coil products through its own sales force. At March 31, 2013, the sales force was comprised of a vice president and three professional sales personnel under the direction of the Senior Vice President Sales and Marketing. Sales personnel are paid on a salary and commission basis.

The Company regularly contracts on a quarterly basis with many of its larger customers to supply minimum quantities of steel.

Tubular Products. The Company sells its tubular products nationally to approximately 170 customers. The Company's principal customers for these products are steel and pipe distributors, piling contractors and, historically, USS. Sales of pipe to USS accounted for approximately 14% and 24% of the Company's total sales in fiscal 2013 and 2012, respectively. The Company can make no assurances as to the amount of future sales to USS.

The Company sells its tubular products through its own sales force comprised of a sales manager and three professional sales personnel under the direction of the Senior Vice President Sales and Marketing. Sales personnel are paid on a salary and commission basis.

Competition

The Company is engaged in a non-seasonal, highly-competitive business. The Company competes with steel mills, importers and steel service centers. The steel industry, in general, is characterized by a small number of extremely large companies dominating the bulk of the market and a large number of relatively small companies, such as the Company, competing for a limited share of such market.

The Company believes that, generally, its ability to compete is dependent upon its ability to offer products at prices competitive with or below those of other steel suppliers, as well as its ability to provide products meeting customer specifications on a rapid-delivery basis.

Employees

At March 31, 2013, the Company had approximately 100 full-time employees.

Executive Officers of the Company

The following table sets forth as of March 31, 2013, the name, age, officer positions and arrangements with other persons regarding his selection as an officer, if any, of each executive officer of the Company and the period during which each officer has served in such capacity:

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer (CEO) and principal financial officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the CEO and CFO have concluded that, as of the end of such period, the Company's disclosure controls and procedures were effective to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Internal Control Over Financial Reporting

Management's report on internal control over financial reporting appears on page 14 of the Company's Annual Report to Shareholders for the year ended March 31, 2013, which is incorporated herein by reference. This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to the rules of the SEC that permit the Company to provide only management's report in this annual report.

There were no changes in the Company's internal control over financial reporting that occurred during the fiscal quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.
