**Tokyo, January 30, 2014** Nomura Holdings, Inc. today announced its consolidated financial results for the third quarter of the fiscal year ending March 31, 2014.

Net revenue for the third quarter was 379.4 billion yen (US\$3.6 billion)<sup>1</sup>, income before income taxes was 86.9 billion yen (US\$826 million), and net income attributable to Nomura Holdings shareholders was 48.3 billion yen (US\$459 million).

We demonstrated consistent performance across all of our core businesses in the third quarter, reporting growth in revenues and pretax income compared to the previous quarter, said Koji Nagai, Group Chief Executive Officer.

Our results were driven by our robust Retail business which saw increased demand for stocks and investment trusts on the back of the market rally in Japan. Asset Management booked higher pretax income as assets under management climbed to their highest level ever on inflows into investment trusts and from institutional investors around the world.

Wholesale posted an increase in revenues and pretax income driven by continued strong revenues in Fixed Income, private equity unrealized gains in Investment Banking, and initiatives taken to lower the division's break-even point.

Looking ahead, we remain well positioned to connect markets east and west as Asia's global investment bank to deliver value-added products and services for our clients and contribute to economic growth.

	<b>FY2013/14</b>		
	<b>Q3</b>	<b>QoQ</b>	<b>YoY</b>
<b>Net revenue</b>	Y188.7bn	+3%	-0.2%
<b>Income before income taxes</b>	Y27.8bn	+10%	-37%

Income before income taxes increased 10 percent quarter on quarter to 27.8 billion yen, representing a decline of 37 percent compared to the same quarter last year. Higher revenues in Japan and the Americas led to an improved revenue mix across regions.

Global Markets reported net revenue in line with the prior quarter on stronger revenues in Fixed Income in EMEA and the Americas.

Fixed Income net revenue rose quarter on quarter as Credit and Securitized Products revenues increased due to the improved market environment.

While Equities net revenue softened from the previous quarter due to a slowdown in the Derivatives business, stronger flows from primary transactions contributed to robust revenues in Cash Equities.

Investment Banking revenues declined in Japan due to a reduction in the overall fee pool and large ECM transactions. However, internationally IPOs drove growth in ECM related revenues.
