Notes to Quarterly Consolidated Financial Statements (Unaudited)

Komatsu Ltd. and Consolidated Subsidiaries

Nine months ended December 31, 2013 and 2012

1. Basis of Quarterly Financial Statement Presentation and Summary of Significant Accounting Policies

Basis of Quarterly Financial Statement Presentation

Komatsu Ltd. (Company) and its consolidated subsidiaries (together Komatsu) prepare and present the accompanying quarterly consolidated financial statements in accordance with generally accepted accounting principles in the United States of America.

Summary of Significant Accounting Policies

(1) Adoption of new accounting standards

Komatsu adopted the Accounting Standards Update (ASU) 2013-02 Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income , starting in the first quarter period of FY2013, ending March 31, 2014. This update requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component, and to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. ASU 2013-02 being a disclosure regulation, such adoption did not have any impact on Komatsu s financial position and results of operations. The disclosures required by ASU2013-02 are provided in Note 6. Other Comprehensive Income (Loss).

(2) Change in depreciation method

The Company and some of its consolidated subsidiaries which had adopted the declining balance method for depreciation of property, plant and equipment changed the depreciation method to the straight-line method beginning April 1, 2013.

Komatsu promotes continuous innovation of technologies by concentrating the production of high-value added and technologically important key components in Japan, and also undertakes integrated development and production under the Mother Plant system. As a general rule, Komatsu engages in local production in different parts of the world where there is sufficient market demand for its products. With respect to mainstay products, however, Komatsu has facilitated effective use of its global production capacities by cross sourcing finished products after producing them at its most cost-effective plants and exporting them in light of changes in market demand and foreign exchange rate. Komatsu is establishing its production efficiency, standardization of production and stable operation of production facilities through renewing its old factory buildings in Japan, reassessing logistics and reforming production process by technology innovation as well as cutting down electric power consumption to half at its plants in Japan. With respect to capital investment, Komatsu continues to invest in its production facilities for renovation at a constant level. In light of those activities, Komatsu expects stable production and facility utilization within its production capacity, and is able to receive economic benefits from those facilities at a constant rate throughout their durable periods.

As a result of reviewing its depreciation method, Komatsu concluded that the straight-line method would be an appropriate depreciation method to reflect its usage of property, plants and equipment and to allocate the costs in earnings.

The effect of the change in depreciation method is recognized prospectively as a change in accounting estimate in accordance with the FASB Accounting Standards Codification (ASC) 250 Accounting Changes and Error Corrections .

As a result of the change in depreciation method, depreciation expense for the nine months ended December 31, 2013 decreased by ¥8,651 million. Net Income attributable to Komatsu Ltd. for the nine months ended December 31, 2013 increased by ¥5,355 million. Basic and Diluted net income attributable to Komatsu Ltd. per common share for the nine months ended December 31, 2013 increased by ¥5.62, and ¥5.61, respectively.

Excluding the above, there is no material change for Summary of Significant Accounting Policies stated in annual report for the year ended March 31, 2013.

2. Supplemental Cash Flow Information

Additional cash flow information and noncash investing and financing activities for the nine months ended December 31, 2013 and 2012 are as follows:

	Millions of yen

Other investment securities primarily include non-marketable equity securities.

Proceeds from the sales of investment securities available for sale during the nine months ended December 31, 2013 and 2012, amounted to ¥4,332 million and ¥595 million, respectively.

Impairment loss and net gain (loss) from sale of investment securities available for sale during the nine months ended December 31, 2013 and 2012, amounted to gains of ¥1,605 million and losses of ¥97 million, respectively. Impairment loss and net gain (loss) from sale of investment securities available for sale during the three months ended December 31, 2013 and 2012, amounted to gains of ¥107 million and losses of ¥16 million, respectively. Such gains and losses were included in other income (expenses), net in the accompanying consolidated statements of income.

The cost of the investment securities sold was computed based on the average-cost method.

Gross unrealized holding losses and the fair value of available-for-sale securities, aggregated by length of time that individual securities have been in a continuous unrealized loss position at December 31, 2013 and at March 31, 2013, are as follows:

7. Share-Based Compensation

The Company has two types of stock option plans as share-based compensation for directors and certain employees and certain directors of subsidiaries.

The stock option plans resolved by the Board of Directors meetings held in and before June 2010

The right to purchase the Company's shares is granted at a predetermined price to directors and certain employees and certain directors of subsidiaries. The purchase price is the amount calculated by taking the average of the closing prices applicable to ordinary transactions of shares of the Company on the Tokyo Stock Exchange on all days for a month immediately preceding the month in which the date of grant falls and multiplying by 1.05, provided that the exercise price shall not be less than the closing price of the shares of the Company on the Tokyo Stock Exchange on the date of the grant.

The stock option plans resolved by the Board of Directors meetings held in and after July 2010

The right to purchase the Company's shares is granted at an exercise price of ¥1 per share to directors and certain employees and certain directors of subsidiaries.

Based on the resolutions of the shareholders' meeting on June 23, 2010 and the Board of Directors on July 12, 2012, the Company issued 843 rights of its share acquisition rights to directors. Based on the resolutions of the shareholders' meeting on June 20, 2012 and the Board of Directors on July 12, 2012, the Company also issued 2,555 rights of its share acquisition rights to certain employees and certain directors of subsidiaries during the year ended March 31, 2013. The options vest 100% on each of the grant dates and are exercisable from August 1, 2015.

In addition, based on the resolutions of the shareholders' meeting on June 23, 2010 and the Board of Directors on July 17, 2013, the Company issued 561 rights of its share acquisition rights to directors. Based on the resolutions of the shareholders' meeting on June 19, 2013 and the Board of Directors on July 17, 2013, the Company also issued 2,358 rights of its share acquisition rights to certain employees and certain directors of subsidiaries during the year ending March 31, 2014. The options vest 100% on each of the grant dates and are exercisable from August 1, 2016.

The number of shares subject to one share acquisition rights is 100 shares.

The Company recognizes compensation expense using the fair value method. Compensation expenses during the nine months ended December 31, 2013 and 2012 were ¥564 million and ¥500 million, respectively, and were recorded in selling, general and administrative expenses. Compensation expenses during the three months ended December 31, 2013 and 2012 were ¥338 million and ¥300 million, respectively, and were recorded in selling, general and administrative expenses.

The Company transfers treasury stock without issuance of new stock when the share acquisition rights are exercised.

9. Contingent Liabilities

At December 31, 2013 and at March 31, 2013, Komatsu was contingently liable for discounted and transferred receivables on a recourse basis with the financial institutions of ¥314 million and ¥406 million, respectively.

Komatsu provides guarantees to third parties of loans of the employees, affiliated companies, customers and other companies. The guarantees of loans relating to the employees are mainly made for their housing loans. The guarantees of loans relating to the affiliated companies, customers and other companies are made to enhance the credit of those companies.

For each guarantee provided, Komatsu would have to perform under a guarantee, if the borrower defaults on a payment within the contract terms. The contract terms are from 10 years to 30 years in the case of employees with housing loans, and from 1 year to 11 years in the case of loans relating to the affiliated companies, customers and other companies. The maximum amount of undiscounted payments Komatsu would have had to make in the event of default was ¥78,879 million and ¥94,776 million at December 31, 2013 and at March 31, 2013, respectively. The fair value of the liabilities recognized for Komatsu's obligations as guarantors under those guarantees at December 31, 2013 was insignificant. Certain of those guarantees were secured by collateral and insurance issued to the Company.

Management of Komatsu believes that losses from those contingent liabilities, if any, would not have a material effect on the consolidated financial statements.

Komatsu is involved in certain legal actions and claims arising in the ordinary course of its business. It is the opinion of management and legal counsel that such litigation and claims will be resolved without material effect on Komatsu's financial statements.

Komatsu has business activities with customers, dealers and associates around the world and its trade receivables from such parties and the guarantees for them are well diversified to minimize concentrations of credit risks. Management does not anticipate incurring losses on its trade receivables in excess of established allowances.

11. Fair Values of Financial Instruments

(1) Cash and cash equivalents, Time deposits, Trade notes and accounts receivable, Other current assets, Short-term debt, Trade notes, bills and accounts payables, and Other current liabilities

The carrying amount approximates fair value because of the short maturity of these instruments.

(2) Investment securities, marketable equity securities

The fair values of investment securities available for sale for which it is practicable to estimate fair value are based on quoted market prices and are recognized on the accompanying consolidated balance sheets.

(3) Long-term trade receivables

The fair values of long-term trade receivables are based on the present value of future cash flows through maturity, discounted using estimated current interest rates. The fair values computed on such a basis approximate the carrying amounts.

(4) Long-term debt, including current portion (Note 12)

The fair values of each of the long-term debts are based on the quoted price in the most active market or the present value of future cash flows associated with each instrument discounted using the current borrowing rate for similar debt of comparable maturity and is classified in Level 2 in the fair value hierarchy.

(5) Derivatives (Notes 10 and 12)

The fair values of derivative financial instruments, consisting principally of foreign exchange contracts and interest swap agreements, are estimated by obtaining quotes from brokers and are recognized on the accompanying consolidated balance sheets.

The carrying amounts and the estimated fair values of the financial instruments, including financial instruments not qualifying as hedge, at December 31, 2013 and at March 31, 2013, are summarized as follows:

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could affect the estimates.

12. Fair value measurements

ASC 820, Fair Value Measurements and Disclosures defines that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 establishes a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. The three levels of inputs used to measure fair value are as follows:

- Level 1** Quoted prices in active markets for identical assets or liabilities
- Level 2** Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly
- Level 3** Unobservable inputs for the assets or liabilities

Assets and liabilities that are measured at fair value on a recurring basis

The fair value hierarchy levels of assets and liabilities that are measured at fair value on a recurring basis at December 31, 2013 and at March 31, 2013 are as follows:

Investment securities available for sale

Marketable equity securities are classified in Level 1 in the fair value hierarchy. Marketable equity securities are measured using a market approach based on the quoted market prices in active markets.

Derivatives (Notes 10 and 11)

Derivatives primarily represent foreign exchange contracts and interest rate swap agreements. The fair value of foreign exchange contracts is based on a valuation model that discounts cash flows resulting from the differential between contract rate and the market-based forward rate and is classified in Level 2 in the fair value hierarchy. The fair value of interest rate swap agreements is based on a valuation model that discounts cash flows based on the terms of the contract and the swap curves and is classified in Level 2 in the fair value hierarchy.

Other

Other primarily represents loans which are measured at fair value under the Fair Value Option of ASC 825, Financial Instruments. The fair value of loans is based on a valuation model based on market yield curve data and credit spread data and is classified in Level 2 in the fair value hierarchy. The credit spread data was obtained through use of credit default swaps for each counterparty.

15. Business Segment and Geographic Information

Komatsu has two operating segments: 1) Construction, Mining and Utility Equipment, and 2) Industrial Machinery and Others.

The accounting policies used by the segments are the same as those used in the preparation of the quarterly consolidated financial statements.

Segment profit is determined by subtracting the cost of sales and selling, general and administrative expenses from net sales attributed to the operating segment. Segment profit excludes certain general corporate administration and finance expenses, such as costs of executive management, corporate development, corporate finance, human resources, internal audit, investor relations, legal and public relations. Segment profit also excludes certain charges which may otherwise relate to operating segments, including impairments of long lived assets and goodwill.
