WELLS FARGO & COMPANY

We are a diversified, community-based financial services company organized under the laws of the State of Delaware and registered as a financial holding company and a bank holding company under the Bank Holding Company Act of 1956, as amended. We provide banking, insurance, investments, mortgage and consumer and commercial finance through banking stores and offices, ATMs, the internet, mobile banking and other distribution channels to individuals, businesses and institutions in all 50 states, the District of Columbia and elsewhere internationally to support customers who conduct business in the global economy. We are a separate and distinct legal entity from our banking and other subsidiaries. A significant source of funds to pay debt service on our debt and dividends on our common and preferred stock is dividends from our subsidiaries. U.S. FEDERAL INCOME TAX CONSIDERATIONS

For a brief description of the United States tax effects of an investment in the notes, see [Certain U.S. Federal Income Tax Considerations](#) in the accompanying prospectus.

Pursuant to published guidance by the Internal Revenue Service, withholding on gross proceeds under the Foreign Account Tax Compliance Act will be delayed until January 1, 2019 rather than January 1, 2017. See [Certain U.S. Federal Income Tax Considerations Legislation Affecting the Taxation of Debt Securities, Common Stock and Preferred Stock Held by or through Foreign Entities](#) in the accompanying prospectus.

EU DIRECTIVE ON THE TAXATION OF SAVINGS INCOME

On November 10, 2015, the Council of the European Union adopted a Council Directive repealing the EC Council Directive 2003/48/EC on the taxation of savings income, as amended (the [Directive](#)), from January 1, 2017, in the case of Austria, and from January 1, 2016, in the case of all other EU Member States (subject to on-going requirements to fulfill administrative obligations such as the reporting and exchange of information relating to, and accounting for withholding taxes on, payments made before those dates). The repeal is meant to prevent overlap between the Directive and a new automatic exchange of information regime to be implemented under Council Directive 2011/16/EU on Administrative Cooperation in the field of Taxation (as amended by Council Directive 2014/107/EU). The new regime under Council Directive 2011/16/EU (as amended) is in accordance with the Global Standard released by the Organization for Economic Co-operation and Development in July 2014. Council Directive 2011/16/EU (as amended) is generally broader in scope than the Directive, although it does not impose withholding taxes. See [EU Directive on the Taxation of Savings Income](#) in the accompanying prospectus.

UNDERWRITING (CONFLICTS OF INTEREST)

Wells Fargo Securities, LLC is acting as representative of the underwriters named below. We and the underwriters for the offering named below have entered into an underwriting agreement, dated February , 2016, with respect to the notes. Subject to certain conditions, the underwriters have agreed to purchase the principal amount of notes indicated in the following tables.

Floating Rate Notes Due

Underwriter	Principal Amount
Wells Fargo Securities, LLC	
Total	\$

% Notes Due

Underwriter	Principal Amount
Wells Fargo Securities, LLC	
Total	\$

Notes sold by the underwriters to the public will initially be offered at the public offering prices set forth on the cover page of this prospectus supplement. Any floating rate notes sold by the underwriters to securities dealers may be sold at a discount from the initial public offering price of up to % of the principal amount of the floating rate notes. The underwriters may allow, and those dealers may reallow, a discount of % of the principal amount of the floating rate notes to other broker/dealers. Any fixed rate notes sold by the underwriters to securities dealers may be sold at a discount from the initial public offering price of up to % of the principal amount of the fixed rate notes. The underwriters may allow, and those dealers may reallow, a discount of % of the principal amount of the fixed rate notes to other broker/dealers. If all the notes are not sold at the applicable initial offering price, the underwriters may change the offering price and the other selling terms. The maximum discount or commission that may be received by any member of FINRA for sales of securities pursuant to the accompanying prospectus, together with the reimbursement of any counsel fees by us, will not exceed 8.00% of the initial gross proceeds from the sale of such securities.

The notes are a new issue of securities with no established trading market. We have been advised by the underwriters that the underwriters intend to make a market in the notes but are not obligated to do so and may discontinue market making at any time without notice. No assurance can be given as to the liquidity of the trading market for the notes.

Table of Contents

In connection with the offering, the underwriters may purchase and sell notes in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of notes than the underwriters are required to purchase in the offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the notes while the offering is in progress.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the other underwriters have repurchased notes sold by or for the account of such underwriter in stabilizing or short covering transactions.

These activities by the underwriters may stabilize, maintain or otherwise affect the market price of the notes. As a result, the price of the notes may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time. These transactions may be effected in the over-the-counter market or otherwise.

We estimate that our share of the total expenses of the offering will be approximately \$75,000.

We have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The notes are offered for sale in the United States and elsewhere where such offer and sale is permitted.

The underwriting agreement provides that the underwriters are obligated to purchase all of the notes if any are purchased. The underwriting agreement provides that if an underwriter defaults, the purchase commitment of non-defaulting underwriters may be increased or the offering of notes may be terminated. The underwriting agreement may be terminated by the underwriters prior to the issuance of the notes in certain circumstances.

The representative of the underwriters, Wells Fargo Securities, LLC, is our affiliate. The distribution arrangements for this offering comply with the requirements of FINRA Rule 5121, regarding a FINRA member firm's participation in the distribution of securities of an affiliate. In accordance with Rule 5121, no FINRA member firm that has a conflict of interest under Rule 5121 may make sales in this offering to any discretionary account without the prior approval of the customer. Wells Fargo Securities, LLC, may use this prospectus supplement and the accompanying prospectus in connection with offers and sales of the notes in the secondary market.

We expect that delivery of the notes will be made against payment therefor on or about the closing date specified on the cover page of this prospectus supplement, which will be on the fifth business day following the date the notes are priced. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days after the date the notes are priced, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade notes on the date of pricing or the next succeeding business day will be required, by virtue of the fact that the notes will settle in T+5, to specify an alternative settlement cycle at the time of any such trade to prevent a failed settlement; such purchasers should also consult their own advisors in this regard.

Sales Restrictions

Each underwriter will agree that it will, to the best of its knowledge and belief, comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers the notes or possesses or distributes this prospectus supplement or the accompanying prospectus or any other offering material and will use its reasonable efforts to obtain any required consent, approval or permission for its purchase, offer, sale or delivery of such notes under the laws and regulations in force in any jurisdiction to

THE COMPANY

We are a diversified, community-based financial services company organized under the laws of the State of Delaware and registered as a financial holding company and a bank holding company under the Bank Holding Company Act of 1956, as amended. We provide banking, insurance, trust and investments, mortgage banking, investment banking, retail banking, brokerage and consumer finance through banking stores and offices, ATMs, the internet and other distribution channels to individuals, businesses and institutions in all 50 states, the District of Columbia and elsewhere internationally to support customers who conduct business in the global economy.

We are a separate and distinct legal entity from our banking and other subsidiaries. A significant source of funds to pay dividends on our common and preferred stock and debt service on our debt is dividends from our subsidiaries. Various federal and state statutes and regulations limit the amount of dividends that our banking and other subsidiaries may pay to us without regulatory approval.

(fixed charges)

(fixed charges)

The ratio of earnings to fixed charges and preferred stock dividends is calculated as follows:

(income before income taxes tax expense)

(net income from noncontrolling interests) +

(fixed charges)

(fixed charges) + (pretax earnings required to cover preferred stock dividends)

Pretax earnings required to cover preferred stock dividends are calculated as follows:

preferred stock dividends

Fixed charges, excluding interest on deposits, consist of

interest on short-term borrowings and long-term debt,
amortization of debt expense,
capitalized interest, and
one-third of net rental expense, which we believe is representative of the interest factor.

Fixed charges, including interest on deposits, consist of all of the items listed immediately above plus interest on deposits.

The preferred dividends, including accretion, were increased to amounts representing the pretax earnings that would be required to cover such dividend and accretion requirements.

We have included these ratios to comply with SEC regulations. However, we believe that the fixed charge ratios are not meaningful measures for our business due to two factors. First, even if our net income did not change, our ratios would decline if the proportion of our income that is tax-exempt increased. Conversely, our ratios would increase if the proportion of our income that is tax-exempt decreased. Second, even if our net income did not change, our ratios would decline if our interest income and interest expense increased by the same amount due to an increase in the level of interest rates. Conversely, our ratios would increase if our interest income and interest expense decreased by the same amount due to a decrease in the level of interest rates.

RISK FACTORS

Your investment in our securities involves risks. This prospectus does not describe all of those risks. Before purchasing any securities, you should carefully consider the following risk factors, in addition to the other information contained or incorporated by reference in this prospectus, including the risk factors contained in our annual and quarterly reports. **Additional risks specific to particular securities will be detailed in the applicable prospectus supplement.** You should consult your financial, legal, tax and other professional advisors as to the risks associated with an investment in our securities and the suitability of the investment for you.

General

The Securities Are Subject To The Credit Risk Of Wells Fargo.

Any securities that we may issue are our obligations and are not, either directly or indirectly, an obligation of any third party. Any amounts payable under any securities are subject to our creditworthiness. As a result, our actual and perceived creditworthiness may affect the value of our securities and, in the event we were to default on our obligations, you may not receive any amounts owed to you under the terms of such securities.

The Securities May Not Be Listed On Any Securities Exchange And An Active Trading Market For The Securities May Not Develop.

Any securities that we issue will constitute a new issue of securities with no established trading market. The securities may not be listed or displayed on any securities exchange or any automated quotation system. Even if the securities are listed on a securities exchange or automated quotation system, such listing does not guarantee that a trading market will develop. Although underwriters, dealers or agents, as applicable, may purchase our securities from you, they are not obligated to do so and are not required to make a market for our securities. As such, there can be no assurance that a secondary market will develop. Because we do not expect that any market makers will participate in a secondary market for our securities, the price at which you may be able to sell your securities is likely to depend on the price, if any, at which an underwriter, dealer or agent, as applicable, is willing to buy your securities. If a secondary market does exist, it may be limited. Accordingly, there may be a limited number of buyers if you decide to sell your securities, and no assurance can be given as to the liquidity of any trading market for the securities or the price you receive upon a sale of your securities.

One Of Our Affiliates May Act As The Calculation Agent Or Quotation Agent In Connection With An Issuance Of Securities And, As A Result, Potential Conflicts Of Interest Could Arise.

One of our affiliates may act as the calculation agent or quotation agent in connection with an issuance of securities. Although any affiliate will exercise its judgment in good faith when performing its functions, potential conflicts of interest may exist between such affiliate and you.

If The Securities We Issue May Be Redeemed At Our Option, You May Not Be Able To Reinvest The Redemption Price You Receive In A Similar Security.

The terms of our securities may permit us to redeem the securities, subject to any required regulatory approval. Any such redemption may occur at a time when prevailing interest rates are relatively low. As a result, if we redeem our securities, you may not be able to reinvest the redemption price you receive in a similar security.

Foreign Currency Risks

You should consult your financial and legal advisors as to any specific risks entailed by an investment in securities that are denominated or payable in a currency other than the currency of the country in which you are resident or in which you conduct your business, which we refer to as your home currency. These securities are not appropriate investments for investors who are not sophisticated in foreign currency transactions. We disclaim any responsibility to advise prospective purchasers who are residents of countries other than the United States of any matters arising under non-U.S. law that may affect the purchase of or holding of, or the receipt of payments on, these securities. These persons should consult their own legal and financial advisors concerning these matters.

Exchange Rates And Exchange Controls May Affect Securities Value Or Return

General Exchange Rate And Exchange Control Risks. An investment in a security that is denominated or payable in currencies other than your home currency entails significant risks. These risks include the possibility of significant changes in rates of exchange between your home currency and the relevant foreign currencies and the possibility of the imposition or modification of exchange controls by the relevant governmental entities. These risks generally depend on economic and political events over which we have no control.

Exchange Rates Will Affect Your Investment. In recent years, rates of exchange between some currencies have been highly volatile and this volatility may continue in the future. Fluctuations in any particular exchange rate that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any security. Depreciation of the currency in which a security is payable against your home currency would result in a decrease in the effective yield of the security below its coupon rate or in the payout of the security and could result in an overall loss to you on a home currency basis.

There May Be Specific Exchange Rate Risks Applicable To Warrants And Purchase Contracts. Fluctuations in the rates of exchange between your home currency and other currency (i) in which the exercise price of a warrant or the purchase price of a purchase contract is payable, (ii) in which the value of the property underlying a warrant or purchase contract is quoted or (iii) to be purchased or sold by exercise of a warrant or pursuant to a purchase contract or in the rates of exchange among any of these currencies may change the value of a warrant, a purchase contract or a unit that includes a warrant or purchase contract. You could lose money on your investment as a result of these fluctuations, even if the spot

Table of Contents

price of the property underlying the warrant or purchase contract were such that the warrant or purchase contract appeared to be in the money.

We Have No Control Over Exchange Rates. Currency exchange rates can either float or be fixed by sovereign governments. Exchange rates of most economically developed nations are permitted to fluctuate in value relative to each other. However, from time to time governments may use a variety of techniques, such as intervention by a country's central bank, the imposition of regulatory controls or taxes or changes in interest rates to influence the exchange rates of their currencies. Governments may also issue a new currency to replace an existing currency or alter the exchange rate or relative exchange characteristics by a devaluation or revaluation of a currency. These governmental actions could change or interfere with currency valuations and currency fluctuations that would otherwise occur in response to economic forces, as well as in response to the movement of currencies across borders.

As a consequence, these government actions could adversely affect yields or payouts in your home currency for (i) securities denominated or payable in currencies other than your home currency, (ii) warrants or purchase contracts where the exercise price or the purchase price is denominated in a currency differing from your home currency or where the value of the property underlying the warrants or purchase contracts is quoted in a currency other than your home currency and (iii) warrants or purchase contracts to purchase or sell foreign currency.

We will not make any adjustment or change in the terms of the securities in the event that exchange rates should become fixed, or in the event of any devaluation or revaluation or imposition of exchange or other regulatory controls or taxes, or in the event of other developments affecting your home currency or any specified foreign currency. You will bear those risks.

Some Foreign Currencies May Become Unavailable. Governments have imposed from time to time, and may in the future impose, exchange controls that could also affect the availability of a specified currency. Even if there are no actual exchange controls, it is possible that the specified currency for any security would not be available when payments on that security are due.

Alternative Payment Currency Used If Payment Currency Becomes Unavailable. Unless otherwise specified in the applicable prospectus supplement, if a payment currency is unavailable, we will make required payments in U.S. dollars on the basis of the market exchange rate. However, if the specified currency for any security is not available because the euro has been substituted for that currency, we will make the payments in euro. The mechanisms for making payments in these alternative currencies are explained in *Description of Debt Securities Interest and Principal Payments* below.

Currency Conversions May Affect Payments On Some Securities

The applicable prospectus supplement may provide for (i) payments on a non-U.S. dollar denominated security to be made in U.S. dollars or (ii) payments on a U.S. dollar denominated security to be made in a currency other than U.S. dollars. In these cases, the

Table of Contents

exchange agent identified in the applicable prospectus supplement will convert the currencies. You will bear the costs of conversion through deductions from those payments.

Exchange Rates May Affect the Value Of A New York Judgment Involving Non-U.S. Dollar Denominated Securities

The securities will be governed by and construed in accordance with the laws of the State of New York. If a New York court were to enter a judgment in an action on any securities denominated in a foreign currency, such court would either enter a judgment in U.S. dollars based on the prevailing rate of exchange between the foreign currency and the U.S. dollar on the date such judgment is entered or enter judgment in the foreign currency and convert the judgment or decree into U.S. dollars at the prevailing rate of exchange on the date such judgment or decree is entered.

DESCRIPTION OF DEBT SECURITIES

This section describes the general terms and provisions of our debt securities, which could be senior debt securities or subordinated debt securities. The prospectus supplement will describe the specific terms of the debt securities offered through that prospectus supplement and any general terms outlined in this section that will not apply to those debt securities.

Unless otherwise specified in the applicable prospectus supplement, the senior debt securities will be issued under an indenture dated as of July 21, 1999 between us and Citibank, N.A., as senior trustee, referred to herein as the senior indenture, and the subordinated debt securities will be issued under an indenture dated as of August 30, 1999 between us and The Bank of New York Mellon Trust Company, National Association (as successor in interest to The Bank of New York Trust Company, N.A., as successor in interest to J.P. Morgan Trust Company, National Association, as successor in interest to Bank One Trust Company, N.A., as successor in interest to The First National Bank of Chicago), as subordinated trustee, referred to herein as the subordinated indenture.

We have summarized the material terms and provisions of the senior and subordinated indentures in this section. We have also filed each of these indentures as exhibits to the registration statement of which this prospectus is a part. You should read the applicable indenture for additional information before you buy any debt securities. The summary that follows includes references to section numbers of these indentures so that you can more easily locate these provisions.

General

The debt securities will be our direct unsecured obligations. Neither of the indentures limits the amount of debt securities that we may issue. Both indentures permit us to issue debt securities from time to time and debt securities issued under an indenture will be issued as part of a series that has been established by us under such indenture. (Section 301)

The senior debt securities will be unsecured and will rank equally with all of our other unsecured unsubordinated debt. The subordinated debt securities will be unsecured and will rank equally with all of our other subordinated debt securities and, together with such other subordinated debt securities, will be subordinated to all of our existing and future Senior Debt. See Subordination below. Holders of our debt securities may be fully subordinated to interests held by the U.S. government in the event that we enter into a receivership, insolvency, liquidation or similar proceeding.

The debt securities are our unsecured senior or subordinated debt securities, as the case may be, but our assets consist primarily of equity in our subsidiaries. We are a separate and distinct legal entity from our subsidiaries. As a result, our ability to make payments on our debt securities depends on our receipt of dividends, loan payments and other funds from our subsidiaries. Various federal and state statutes and regulations limit the amount of dividends that our banking and other subsidiaries may pay us without regulatory approval. In addition, if any of our subsidiaries becomes insolvent, the direct creditors of that subsidiary will have a

Table of Contents

prior claim on its assets. Our rights and the rights of our creditors, including your rights as an owner of our debt securities, will be subject to that prior claim, unless we are also a direct creditor of that subsidiary. This subordination of creditors of a parent company to prior claims of creditors of its subsidiaries is commonly referred to as structural subordination.

Unless otherwise specified in the applicable prospectus supplement, we may, without the consent of the holders of a series of debt securities, issue additional debt securities of that series having the same ranking and the same interest rate, maturity date and other terms (except for the price to public and issue date) as such debt securities. Any such additional debt securities, together with the initial debt securities, will constitute a single series of debt securities under the applicable indenture. No additional debt securities of a series may be issued if an event of default under the applicable indenture has occurred and is continuing with respect to that series of debt securities.

A prospectus supplement relating to a series of debt securities being offered will include specific terms relating to the offering. (Section 301) These terms will include some or all of the following:

the title and type of the debt securities;

any limit on the total principal amount of the debt securities of that series;

the price at which the debt securities will be issued;

the date or dates on which the principal of and any premium on the debt securities will be payable;

the maturity date or dates of the debt securities or the method by which those dates can be determined;

if the debt securities will bear interest:

the interest rate on the debt securities or the method by which the interest rate may be determined;

the date from which interest will accrue;

the record and interest payment dates for the debt securities;

the first interest payment date; and

any circumstances under which we may defer interest payments;

if the amount of principal or interest payable on the debt securities will be determined by reference to one or more securities, indices, exchange traded funds, commodities or currencies, or baskets comprised of any of the foregoing, or any other market measure, information as to such market measures;

any terms on which the debt securities may be optionally or mandatorily converted or exchanged into or for stock or other securities of an entity
