SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended September 30, 2016

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**
For the transition period from _____ to _____

Commission File Number: 001-12111

MEDNAX, INC.
(Exact name of registrant as specified in its charter)

Florida
(State or other jurisdiction of
Incorporation or organization)

26-3667538
(I.R.S. Employer
Identification No.)

1301 Concord Terrace

Sunrise, Florida
(Address of principal executive offices)
(954) 384-0175

33323
(Zip Code)

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

On October 21, 2016, the registrant had outstanding 93,637,203 shares of Common Stock, par value \$.01 per share.

MEDNAX, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2016

(Unaudited)

1. Basis of Presentation and New Accounting Pronouncements:

The accompanying unaudited Condensed Consolidated Financial Statements of the Company and the notes thereto presented in this Form 10-Q have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (SEC) applicable to interim financial statements, and do not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP) for complete financial statements. In the opinion of management, these financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results of interim periods. The financial statements include all the accounts of MEDNAX, Inc. and its consolidated subsidiaries (collectively, MDX) together with the accounts of MDX 's affiliated business corporations or professional associations, professional corporations, limited liability companies and partnerships (the affiliated professional contractors). Certain subsidiaries of MDX have contractual management arrangements with its affiliated professional contractors, which are separate legal entities that provide physician services in certain states and Puerto Rico. The terms MEDNAX and the Company refer collectively to MEDNAX, Inc., its subsidiaries and the affiliated professional contractors.

The Company has a joint venture in which it owns a 75% economic interest. The Company has a management agreement with the joint venture and, based on the terms of the agreement, the Company has determined that the joint venture is a variable interest entity for which the Company is the primary beneficiary as defined in the accounting guidance for consolidation. Accordingly, the financial results of the joint venture are fully consolidated into the Company 's operating results. The equity interests of the outside investor in the equity and results of operations of this consolidated entity are accounted for and presented as noncontrolling interests. The Company has a second joint venture in which it owns a 37.5% economic interest. The Company accounts for this joint venture under the equity method of accounting because the Company exercises significant influence over, but does not control, this entity.

The consolidated results of operations for the interim periods presented are not necessarily indicative of the results to be experienced for the entire fiscal year. In addition, the accompanying unaudited Condensed Consolidated Financial Statements and the notes thereto should be read in conjunction with the Consolidated Financial Statements and the notes thereto included in the Company 's most recent Annual Report on Form 10-K (the Form 10-K).

Recently Adopted Accounting Pronouncements

In September 2015, the accounting guidance related to business combinations was amended to require that adjustments to provisional amounts that are identified during the measurement period be recognized in the reporting period in which the adjustment amounts are determined rather than being retrospectively recognized as of the acquisition date. Such amounts will be required to either be presented separately on the face of the income statement or within a footnote disclosure stating what the impacts on prior period financial statements would have been had such amounts been recognized as of the acquisition date. This guidance became effective for the Company on January 1, 2016. The adoption of this guidance did not have an impact on the Company 's Consolidated Financial Statements.

In February 2015, the accounting guidance related to consolidation was amended to include changes to both the variable and voting interest models used by companies to evaluate whether an entity should be consolidated. This guidance became effective for the Company on January 1, 2016. The adoption of this guidance did not have an impact on the Company's Consolidated Financial Statements.

New Accounting Pronouncements

In August 2016, the accounting guidance related to the statement of cash flows was amended with the intent of reducing diversity in practice as to the classification of certain transactions in the statement of cash flows. This guidance will become effective for the Company on January 1, 2018, with early adoption permitted. The Company does not believe the adoption of this guidance will have a material impact on its Consolidated Financial Statements.

Table of Contents

In March 2016, the accounting guidance related to various aspects of share-based payment transactions was amended, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Under the new guidance, income tax benefits and deficiencies are to be recognized as income tax expense or benefit in the income statement and the tax effects of exercised or vested awards should be treated as discrete items in the reporting period in which they occur. An entity should also recognize excess tax benefits regardless of whether the benefit reduces taxes payable in the current period. Excess tax benefits should be classified along with other income tax cash flows as an operating activity. With regard to forfeitures, the entity may make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. This guidance will become effective for the Company on January 1, 2017, with early adoption permitted. The Company expects that the adoption of this guidance will have an impact on its Consolidated Financial Statements, however, the impact will be dependent upon future prices of the Company's common stock and stock-based compensation exercise and vesting activity and therefore cannot be determined.

In February 2016, accounting guidance related to leases was issued that will require an entity to recognize leased assets and the rights and obligations created by those leased assets on the balance sheet and to disclose key information about the entity's leasing arrangements. This guidance will become effective for the Company on January 1, 2019, with early adoption permitted. The Company is currently evaluating the impact that the adoption of this guidance will have on its Consolidated Financial Statements and its evaluation is expected to continue into 2017.

In May 2014, the accounting guidance related to revenue recognition was amended to outline a single, comprehensive model for accounting for revenue from contracts with customers. The new guidance will become effective for the Company on January 1, 2018, with early adoption permitted on January 1, 2017. The Company does not believe the adoption of this guidance will have a material impact on its Consolidated Financial Statements and expects to complete its evaluation by December 31, 2016.

2. Cash Equivalents and Investments:

As of September 30, 2016 and December 31, 2015, the Company's cash equivalents consisted entirely of money market funds totaling \$8.1 million and \$13.9 million, respectively.

Investments consist of municipal debt securities, federal home loan securities and certificates of deposit. Investments with remaining maturities of less than one year are classified as short-term investments. Investments classified as long-term have maturities of one year to seven years.

The Company intends and has the ability to hold its held-to-maturity securities to maturity, and therefore carries such investments at amortized cost in accordance with the provisions of the accounting guidance for investments in debt and equity securities.

Investments held at September 30, 2016 and December 31, 2015 are summarized as follows (in thousands):

	September 30, 2016		December 31, 2015	
	Short-Term	Long-Term	Short-Term	Long-Term
Municipal debt securities	\$ 9,999	\$ 47,948	\$ 8,608	\$ 34,858
Federal home loan securities		26,748		26,715
Certificates of deposit	490	4,450	245	1,715

\$ 10,489 \$ 79,146 \$ 8,853 \$ 63,288

Contractual maturities of long-term investments are summarized as follows (in thousands):

	September 30, 2016	December 31, 2015
Due after one year through five years	\$ 70,867	\$ 60,383
Due after five years through seven years	8,279	2,905
	\$ 79,146	\$ 63,288

Table of Contents**3. Fair Value Measurements:**

In accordance with the accounting guidance for fair value measurements and disclosures, the Company carries its money market funds included in cash and cash equivalents at fair value. In accordance with the three-tier fair value hierarchy under this guidance, the Company determined the fair value using quoted market prices, a Level 1 input as defined under the accounting guidance for fair value measurements. At September 30, 2016 and December 31, 2015, the Company's money market funds had a carrying amount of \$8.1 million and \$13.9 million, respectively.

The Company also carries the cash surrender value of life insurance related to its deferred compensation arrangements at fair value. The investments underlying the life insurance contracts consist primarily of exchange-traded equity securities and mutual funds with quoted prices in active markets. In accordance with the three-tier fair value hierarchy, the Company determined the fair value using the cash surrender value of the life insurance, a Level 2 input as defined under the accounting guidance for fair value measurements. At September 30, 2016 and December 31, 2015, the Company's cash surrender value of life insurance had a carrying amount of \$15.5 million and \$14.5 million, respectively.

In addition, the Company carries its contingent consideration liabilities related to acquisitions at fair value. In accordance with the three-tier fair value hierarchy, the Company determined the fair value of its contingent consideration liabilities using the income approach with assumed discount rates and payment probabilities. The income approach uses Level 3, or unobservable inputs as defined under the accounting guidance for fair value measurements. At September 30, 2016 and December 31, 2015, the Company's contingent consideration liabilities had a fair value of \$19.9 million and \$24.9 million, respectively. See Note 5 for more information regarding the Company's contingent consideration liabilities.

The carrying amounts of cash equivalents, short-term investments, accounts receivable and accounts payable and accrued expenses approximate fair value due to the short maturities of the respective instruments. The carrying values of long-term investments, line of credit, long-term debt and capital lease obligations approximate fair value. If the Company's investments, line of credit and long-term debt were measured at fair value, they would be categorized as Level 2 in the fair value hierarchy.

4. Accounts Receivable:

Accounts receivable, net consists of the following (in thousands):

	September 30, 2016	December 31, 2015
Gross accounts receivable	\$ 1,659,304	\$ 1,574,038
Allowance for contractual adjustments and uncollectibles	(1,172,347)	(1,129,301)
	\$ 486,957	\$ 444,737

5. Business Acquisitions:

During the nine months ended September 30, 2016, the Company completed the acquisition of 12 physician group practices, including seven anesthesiology practices, two other pediatric subspecialty practices, one neonatology practice, one maternal-fetal medicine practice and one pediatric cardiology practice. In addition, the Company acquired a third-party receivables company and a patient engagement software company. The total consideration for the 14 acquisitions was \$722.2 million, net of \$15.0 million of cash acquired. Approximately \$718.7 million was paid in cash, and \$3.5 million was recorded as a contingent consideration liability.

The 12 physician practice acquisitions expand the Company's national network of physician practices. The Company expects to improve the results of these physician practices through improved managed care contracting, improved collections, identification of growth initiatives, as well as, operating and cost savings based on the significant infrastructure it has developed. The acquisitions of the third-party receivables company and patient engagement software company were additions to the Company's existing revenue cycle management services company and are expected to further enhance the Company's service offerings for its hospital and health system partners.

Table of Contents

The Company's preliminary allocation of purchase price for the 14 acquisitions is as follows (in thousands):

	Third-Party Receivables Acquisition	Other Acquisitions	Total
Current assets	\$ 18,689	\$ 200	\$ 18,889
Property and equipment	5,807	83	5,890
Other noncurrent assets	115	643	758
Goodwill	201,796	271,837	473,633
Other intangible assets	221,870	68,724	290,594
Current liabilities	(5,863)	(333)	(6,196)
Deferred income tax liabilities long-term	(41,934)	(18,602)	(60,536)
Other long-term liabilities	(829)		(829)
	\$ 399,651	\$ 322,552	\$ 722,203

Other intangible assets consist primarily of customer relationships, technology, physician and hospital agreements and trade names. The Company recorded provisional estimates for certain intangible assets acquired during the three months ended September 30, 2016, and one of the acquisitions completed during the three months ended September 30, 2016 is subject to a working capital adjustment. The final valuation and working capital adjustment will be completed within the measurement period, and management does not believe the additional adjustments will be material. The Company expects that \$151.1 million of the goodwill recorded during the nine months ended September 30, 2016 will be deductible for tax purposes.

The contingent consideration of \$3.5 million recorded during the nine months ended September 30, 2016 is related to an agreement to pay an additional cash amount based on the achievement of certain performance measures for up to five years after the acquisition date. The accrued contingent consideration was recorded as a liability at acquisition-date fair value using the income approach with assumed discount rates ranging from 4.5% to 5.3% over the applicable terms and an assumed payment probability of 100% over the applicable years. The range of the undiscounted amount the Company could pay under the contingent consideration agreement is between \$0 and \$4.1 million. In addition, during the nine months ended September 30, 2016, the Company paid \$9.0 million for contingent consideration related to certain prior-period acquisitions, of which all but the accretion recorded during 2016 was accrued as of December 31, 2015.

In connection with certain prior-period acquisitions, the Company also made additional cash payments of \$6.2 million, recorded an increase in deferred tax assets of \$19.9 million, a decrease in current assets of \$0.2 million, an increase in deferred tax liabilities of \$2.5 million and a net decrease of \$11.0 million in goodwill for measurement-period adjustments resulting from the finalization of certain income tax acquisition accounting.

The results of operations of the acquisitions completed during the nine months ended September 30, 2016 and 2015 have been included in the Company's Condensed Consolidated Financial Statements from the dates of acquisition. The following unaudited pro forma information combines the consolidated results of operations of the Company on a GAAP basis and the acquisitions completed during 2016 and 2015, including adjustments for pro forma amortization and interest expense, as if the transactions had occurred on January 1, 2015 and January 1, 2014, respectively (in thousands, except per share data):

	Nine Months Ended September 30,	
	2016	2015
Pro forma net revenue	\$ 2,492,022	\$ 2,442,735
Pro forma net income ⁽¹⁾	\$ 251,873	\$ 257,331
Pro forma net income per common share ⁽²⁾ :		
Basic	\$ 2.73	\$ 2.76
Diluted	\$ 2.71	\$ 2.73
Weighted average common shares ⁽²⁾ :		
Basic	92,336	93,195
Diluted	93,045	94,123

Table of Contents

- (1) The effective tax rate used to calculate pro forma net income for the nine months ended September 30, 2016 of 38.8% excludes the income tax benefit related to the settlement of a tax matter.
- (2) The comparison of net income per common share is affected by the changes in the number of weighted average shares outstanding in each period.

The pro forma results do not necessarily represent results which would have occurred if the acquisitions had taken place at the beginning of the periods indicated, nor are they indicative of the results of future combined operations.

6. Accounts Payable and Accrued Expenses:

Accounts payable and accrued expenses consist of the following (in thousands):

	September 30, 2016	December 31, 2015
Accounts payable	\$ 23,346	\$ 21,969
Accrued salaries and bonuses	184,450	233,499
Accrued payroll taxes and benefits	64,938	58,979
Accrued professional liabilities	26,988	25,995
Accrued contingent consideration	7,086	13,565
Accrued uncertain tax positions		7,000
Accrued interest	14,884	2,655
Other accrued expenses	41,599	32,145
	\$ 363,291	\$ 395,807

The net decrease in accrued salaries and bonuses of \$49.0 million, from December 31, 2015 to September 30, 2016, is primarily due to the payment of performance-based incentive compensation, principally to the Company's physicians, partially offset by performance-based incentive compensation accrued during the nine months ended September 30, 2016. A majority of the Company's payments for performance-based incentive compensation is paid annually during the first quarter.

7. Income Taxes:

During the three months ended September 30, 2016, the Company settled a certain tax matter with a taxing authority. In connection with this settlement, the Company's liability for uncertain tax positions decreased by \$17.6 million, of which \$10.6 million favorably impacted the Company's effective income tax rate. As of September 30, 2016, the Company's liability for uncertain tax positions, including accrued interest and penalties, was \$11.4 million.

8. Common and Common Equivalent Shares:

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share is calculated by dividing net income by the weighted average number of common and potential common shares outstanding during the period. Potential common shares consist of outstanding restricted and deferred stock and stock options and is calculated using the

treasury stock method. Under the treasury stock method, the Company includes the assumed excess tax benefits related to the potential exercise or vesting of its stock-based awards using the difference between the average market price for the applicable period less the option price, if any, and the fair value of the stock-based award on the date of grant multiplied by the applicable tax rate.

Table of Contents

The calculation of shares used in the basic and diluted net income per common share calculation for the three and nine months ended September 30, 2016 and 2015 is as follows (in thousands):

	Three Months Ended September 30, 2016 2015		Nine Months Ended September 30, 2016 2015	
Weighted average number of common shares outstanding	92,604	92,949	92,336	93,195
Weighted average number of dilutive common share equivalents	542	697	709	928
Weighted average number of common and common equivalent shares outstanding	93,146	93,646	93,045	94,123

Antidilutive securities not included in the diluted net income per common share calculation

9. Stock Incentive Plans and Stock Purchase Plans:

The Company's Amended and Restated 2008 Incentive Compensation Plan, as amended (the "Amended and Restated 2008 Incentive Plan") provides for grants of stock options, stock appreciation rights, restricted stock, deferred stock, and other stock-related awards and performance awards that may be settled in cash, stock or other property.

Under the Amended and Restated 2008 Incentive Plan, options to purchase shares of common stock may be granted at a price not less than the fair market value of the shares on the date of grant. The options must be exercised within 10 years from the date of grant and generally become exercisable on a pro rata basis over a three-year period from the date of grant. The Company issues new shares of its common stock upon exercise of its stock options. Restricted stock awards generally vest over periods of three years upon the fulfillment of specified service-based conditions and in certain instances performance-based conditions. The Company recognizes compensation expense related to its restricted stock awards ratably over the corresponding vesting periods. During the nine months ended September 30, 2016, the Company granted 501,325 shares of restricted stock to its employees and non-employee directors under the Amended and Restated 2008 Incentive Plan. At September 30, 2016, the Company had approximately 4.5 million shares available for future grants and awards under its Amended and Restated 2008 Incentive Plan.

Under the Company's 1996 Non-Qualified Employee Stock Purchase Plan, as amended (the "ESPP"), employees are permitted to purchase the Company's common stock at 85% of market value on January 1st, April 1st, July 1st and October 1st of each year. Under the Company's 2015 Non-Qualified Stock Purchase Plan (the "SPP"), certain eligible non-employee service providers are permitted to purchase the Company's common stock at 90% of market value on January 1st, April 1st, July 1st and October 1st of each year, beginning upon the SPP's effective date of January 1, 2016.

Each of the ESPP and the SPP provide for the issuance of an aggregate of 2.5 million shares of the Company's common stock less the number of shares of common stock purchased under the other plan. In accordance with the provisions of the accounting guidance for stock-based compensation, the Company recognizes stock-based compensation expense for the discount received by participating employees and non-employee service providers.

Edgar Filing: MEDNAX, INC. - Form 10-Q

During the nine months ended September 30, 2016, 226,798 shares were issued under the ESPP and SPP. At September 30, 2016, the Company had approximately 2.4 million shares in aggregate reserved for issuance under the ESPP and SPP.

During the three and nine months ended September 30, 2016 and 2015, the Company recognized approximately \$8.7 million and \$25.9 million, and \$8.2 million and \$24.0 million, respectively, of stock-based compensation expense. The net excess tax benefit recognized in additional paid-in capital related primarily to restricted stock and stock options for the nine months ended September 30, 2016 was approximately \$3.3 million.

Table of Contents

10. Common Stock Repurchase Program:

In July 2013, the Company's Board of Directors authorized the repurchase of shares of the Company's common stock up to an amount sufficient to offset the dilutive impact from the issuance of shares under the Company's equity compensation programs. The share repurchase program allows the Company to make open market purchases from time-to-time based on general economic and market conditions and trading restrictions. The repurchase program also allows for the repurchase of shares of the Company's common stock to offset the dilutive impact from the issuance of shares, if any, related to the Company's acquisition program. During the nine months ended September 30, 2016, the Company repurchased approximately 0.9 million shares of its common stock for approximately \$61.8 million, inclusive of 46,490 shares withheld to satisfy minimum stock withholding obligations of \$3.2 million in connection with the vesting of restricted stock during the three months ended June 30, 2016. These stock repurchases completed the repurchases under the program with respect to issuances of shares under the Company's equity compensation programs during 2016. The Company intends to utilize various methods to effect any future share repurchases, including, among others, open market purchases and accelerated share repurchase programs. The amount and timing of repurchases will depend upon several factors, including general economic and market conditions and trading restrictions.

11. Commitments and Contingencies:

The Company expects that audits, inquiries and investigations from government authorities and agencies will occur in the ordinary course of business. Such audits, inquiries and investigations and their ultimate resolutions, individually or in the aggregate, could have a material adverse effect on the Company's business, financial condition, results of operations, cash flows and the trading price of its common stock. The Company has not included an accrual for these matters as of September 30, 2016 in its Condensed Consolidated Financial Statements, as the variables affecting any potential eventual liability depend on the currently unknown facts and circumstances that arise out of, and are specific to, any particular future audit, inquiry and investigation and cannot be reasonably estimated at this time.

In the ordinary course of business, the Company becomes involved in pending and threatened legal actions and proceedings, most of which involve claims of medical malpractice related to medical services provided by the Company's affiliated physicians. The Company's contracts with hospitals generally require the Company to indemnify them and their affiliates for losses resulting from the negligence of the Company's affiliated physicians. The Company may also become subject to other lawsuits which could involve large claims and significant costs. The Company believes, based upon a review of pending actions and proceedings, that the outcome of such legal actions and proceedings will not have a material adverse effect on its business, financial condition, results of operations, cash flows and the trading price of its securities. The outcome of such actions and proceedings, however, cannot be predicted with certainty and an unfavorable resolution of one or more of them could have a material adverse effect on the Company's business, financial condition, results of operations, cash flows and the trading price of its securities.

Although the Company currently maintains liability insurance coverage intended to cover professional liability and certain other claims, the Company cannot assure that its insurance coverage will be adequate to cover liabilities arising out of claims asserted against it in the future where the outcomes of such claims are unfavorable. With respect to professional liability risk, the Company generally self-insures a portion of this risk through its wholly owned captive insurance subsidiary. Liabilities in excess of the Company's insurance coverage, including coverage for professional liability and certain other claims, could have a material adverse effect on the Company's business, financial condition, results of operations, cash flows and the trading price of its securities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion highlights the principal factors that have affected our financial condition and results of operations, as well as our liquidity and capital resources, for the periods described. This discussion should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and the notes thereto included in this Quarterly Report. In addition, reference is made to our audited consolidated financial statements and notes thereto and related Management's Discussion and Analysis of Financial Condition and Results of Operations included in our most recent Annual Report on Form 10-K. As used in this Quarterly Report, the terms "MEDNAX," the "Company," "we," "us" or "our" refer to the parent company, MEDNAX, Inc., a Florida corporation, and the consolidated subsidiaries through which its businesses are actually conducted (collectively, "MDX"), together with MDX's affiliated business corporations or professional associations, professional corporations, limited liability companies and partnerships ("affiliated professional contractors"). Certain subsidiaries of MDX have contracts with our affiliated professional contractors, which are separate legal entities that provide physician services in certain states and Puerto Rico. The following discussion contains forward-looking statements. Please see the Company's most recent Annual Report on Form 10-K, including Item 1A, Risk Factors, for a discussion of the uncertainties, risks and assumptions associated with these forward-looking statements. In addition, please see "Caution Concerning Forward-Looking Statements" below.

Overview

MEDNAX is a leading provider of physician services including newborn, anesthesia, maternal-fetal and other pediatric subspecialties. Our national network is composed of affiliated physicians, including those who provide neonatal clinical care in 35 states and Puerto Rico, primarily within hospital-based neonatal intensive care units, to babies born prematurely or with medical complications. We also have physicians who provide anesthesia care to patients in connection with surgical and other procedures as well as pain management. In addition, we have affiliated physicians who provide maternal-fetal and obstetrical medical care to expectant mothers experiencing complicated pregnancies primarily in areas where our affiliated neonatal physicians practice. Our network also includes other affiliated pediatric subspecialists, including those who provide pediatric intensive care, pediatric cardiology care, hospital-based pediatric care and pediatric surgical care. MEDNAX also provides teleradiology services in all 50 states, the District of Columbia and Puerto Rico through a network of affiliated radiologists. In addition to our national physician network, we provide services nationwide to medical providers, including ours, through complementary businesses, consisting of a revenue cycle management company and a consulting services company.

2016 Acquisition Activity

During the nine months ended September 30, 2016, we completed the acquisition of 12 physician group practices including seven anesthesiology practices, two other pediatric subspecialty practices, one neonatology practice, one maternal-fetal medicine practice and one pediatric cardiology practice. In addition, we acquired a third-party receivables company and a patient engagement software company as additions to our existing revenue cycle management services organization.

Based on our experience, we expect that we can improve the results of all of our acquired physician practices through improved managed care contracting, improved collections, identification of growth initiatives, as well as, operating and cost savings based upon the significant infrastructure that we have developed. In addition, we expect that the acquisition of the third-party receivables company and the patient engagement software company will further expand our revenue cycle management service offerings to our hospital and health system partners. Our results of operations for the nine months ended September 30, 2016 include the results for these 14 acquisitions from their respective dates of acquisition and therefore are not comparable in some respects.

Common Stock Repurchase Program

In July 2013, our board of directors authorized the repurchase of shares of our common stock up to an amount sufficient to offset the dilutive impact from the issuance of shares under our equity compensation programs. The share repurchase program permits us to make open market purchases from time-to-time based upon general economic and market conditions and trading restrictions. This repurchase program was expanded to allow for the repurchase of shares of our common stock to offset the dilutive impact from the issuance of shares, if any, related to our acquisition program. During the nine months ended September 30, 2016, we repurchased 0.9 million shares of our common stock for approximately \$61.8 million, inclusive of 46,490 shares withheld to satisfy minimum stock withholding obligations of \$3.2 million in connection with the vesting of restricted stock during the three months ended June 30, 2016. The share repurchases made during the nine months ended September 30, 2016 completed the repurchases under our existing program with respect to issuances of shares under our equity compensation programs during 2016.

Table of Contents

We may utilize various methods to effect any future share repurchases, including, among others, open market purchases and accelerated share repurchase programs. The amount and timing of repurchases will depend upon several factors, including general economic and market conditions and trading restrictions.

General Economic Conditions

The healthcare industry is impacted by the overall United States economy. Budget deficits at federal, state and local government entities have had a negative impact on spending for many government-sponsored or funded healthcare programs (the "GHC Programs"). Although economic conditions in the United States have gradually improved, the number of unemployed and under-employed workers remains significant. During the three months ended September 30, 2016, the percentage of our patient service revenue being reimbursed under GHC Programs was flat as compared to the three months ended September 30, 2015 but increased by 130 basis points as compared to the three months ended June 30, 2016. We could experience additional shifts toward GHC Programs and patient volumes could decline if economic conditions do not continue to improve or if they deteriorate. Payments received from GHC Programs are substantially less for equivalent services than payments received from commercial insurance payors. In addition, due to the rising costs of managed care premiums and an increased shift in financial responsibility to patients, we may experience increased bad debt due to patients' inability to pay for certain services.

Healthcare Reform

The Patient Protection and Affordable Care Act (the "ACA") contains a number of provisions that could affect us over the next several years. These provisions include the establishment of health insurance exchanges to facilitate the purchase of qualified health plans, expanding Medicaid eligibility, subsidizing insurance premiums and creating requirements and incentives for businesses to provide healthcare benefits, the effects of which are unpredictable and complex. Other provisions contain changes to healthcare fraud and abuse laws and expand the scope of the Federal False Claims Act. In addition, payment modifiers are being developed that will differentiate payments to physicians under federal healthcare programs based on quality and cost of care while other provisions authorize voluntary demonstration projects relating to the bundling of payments for episodes of hospital care and the sharing of cost savings achieved under the Medicare program.

The ACA mandated the establishment of state-based and federally facilitated insurance exchanges to provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. Following three enrollment periods, the most recent of which ran through January 31, 2016, it has been projected that approximately 10 million people, including new applicants and returning customers, are enrolled. In some cases, the shift in financial responsibility to patients related to healthcare plans obtained through the insurance exchanges may be significant and could increase in the future. As a result, we may experience increased bad debt due to patients' inability to pay for certain services.

Federal and state agencies are expected to continue to implement provisions of the ACA. However, given the complexity and the number of changes expected as a result of the ACA, as well as the implementation timetable and delays for many of them, we cannot predict the ultimate impacts of the ACA as they may not be known for several years. The ACA also remains subject to continuing legislative scrutiny, including efforts by Congress to amend or repeal a number of its provisions as well as administrative actions delaying the effectiveness of key provisions. In addition, there have been lawsuits filed by various stakeholders pertaining to the ACA that may have the effect of modifying or altering various parts of the law. As a result, we cannot predict with any assurance the ultimate effect of the ACA on our Company, nor can we provide any assurance that its provisions will not have a material adverse effect on our business, financial condition, results of operations, cash flows and the trading price of our securities.

Medicaid to Medicare Payment Parity

In 2012, the Centers for Medicare & Medicaid Services (CMS) adopted a rule under the ACA that generally allowed physicians who provided eligible primary care services to be paid at the Medicare reimbursement rates in effect in calendar years 2013 and 2014 instead of state-established Medicaid reimbursement rates that would have been applicable in those years (parity revenue). Federal funding for the enhanced Medicaid payments expired for dates of service beyond December 31, 2014. Advocacy efforts by various parties took place at both the federal and state legislative levels to continue this program, but only a limited number of states committed to either extend this program, at least in part, for a limited period of time or increase their pre-parity base Medicaid rates. We did not recognize any parity revenue during the three and nine months ended September 30, 2016. During the three and nine months ended September 30, 2015, we recognized approximately \$1.5 million and \$10.5 million in parity revenue, respectively. The contribution to our net income per diluted share during the three months ended September 30, 2015 was negligible and during the nine months ended September 30, 2015 was \$0.03, reflecting the impacts from incentive compensation and income taxes.

Table of Contents

Medicaid Expansion

The ACA also allows states to expand their Medicaid programs through federal payments that fund most of the cost of increasing the Medicaid eligibility income limit from a state's historic eligibility levels to 133% of the federal poverty level. As of October 14, 2016, 31 states and the District of Columbia are implementing the expansion of Medicaid eligibility, and 19 states have expressed their intent not to expand Medicaid eligibility. All of the states in which we operate, however, already cover children in the first year of life and pregnant women if their household income is at or below 133% of the federal poverty level.

Medicare Sequestration

The Budget Control Act of 2011, as amended by the American Taxpayer Relief Act of 2012, required across-the-board cuts (sequestrations) to Medicare reimbursement rates. These annual reductions of 2%, on average, began in April 2013 and apply to mandatory and discretionary spending in the years 2013 to 2025. Unless Congress takes action in the future to modify these sequestrations, Medicare reimbursements will be reduced by 2%, on average, annually. However, this reduction in Medicare reimbursement rates is not expected to have a material adverse effect on our business, financial condition, results of operations, cash flows or the trading price of our securities.

Medicare Fee Schedule and The Medicare Access and CHIP Reauthorization Act of 2015

Historically, Medicare paid for all physician services based upon a national fee schedule that contained a list of uniform rates. The fee schedule was adjusted annually based on a complex formula that was linked in part to the use of services by Medicare beneficiaries and the growth in gross domestic product (the Sustainable Growth Rate formula or SGR). Since 2002, this SGR formula resulted in negative payment updates for physicians under the fee schedule that grew larger each year, and Congress took repeated legislative action to reverse scheduled payment reductions. In 2015, Congress passed MACRA, which eliminated the SGR formula and instead provided physicians with a 0.5% increase in Medicare reimbursement from July 2015 through December 2015, and will provide 0.5% annual increases through 2019 as Medicare transitions to a payment system designed to reward physicians for the quality of care provided, rather than the quantity of procedures performed. Beginning in 2019, MACRA is intended to provide increased Medicare reimbursement for physicians who excel in meeting certain quality and cost metrics and to reduce Medicare reimbursement for physicians who are underperforming against those metrics. Physicians who are meaningful participants in alternative payment models will receive bonus payments pursuant to the law. Regulations interpreting MACRA are expected to be forthcoming over the next several years, and we will assess MACRA's impact on our operations as these regulations are released.

CMS issued a final rule in October 2015 that updates payment policies, payment rates and quality provisions for services furnished under the Medicare fee schedule on or after January 1, 2016. CMS finalized several new policies as well as finalized changes to several of the quality reporting initiatives that are associated with physician services payments. At this time we cannot predict the ultimate effect that the final rule will have on us, nor can we provide any assurance that its provisions will not have a material adverse effect on our business, financial condition, results of operations, cash flows and the trading price of our securities.

Non-GAAP Measures

In our analysis of our results of operations, we use certain non-GAAP financial measures. Earnings before interest, taxes and depreciation and amortization (EBITDA) consists of net income attributable to MEDNAX, Inc. before interest expense, net, income tax provision and depreciation and amortization. Adjusted earnings per common share

(Adjusted EPS) consists of diluted net income attributable to MEDNAX, Inc. per common and common equivalent share adjusted for amortization expense and stock-based compensation expense. Additionally, Adjusted EPS for the three and nine month periods ended September 30, 2016 excludes the net income tax benefit resulting from the reversal of a liability for uncertain tax positions related to the favorable settlement of a tax matter during the third quarter of 2016.

We believe these measures, in addition to income from operations, net income attributable to MEDNAX, Inc. and diluted net income attributable to MEDNAX, Inc. per common and common equivalent share, provide investors with useful supplemental information to compare and understand our underlying business trends and performance across reporting periods on a consistent basis. These measures should be considered a supplement to, and not a substitute for, financial performance measures determined in accordance with GAAP. In addition, since these non-GAAP measures are not determined in accordance with GAAP, they are susceptible to varying calculations and may not be comparable to other similarly titled measures of other companies.

Table of Contents

For a reconciliation of each of EBITDA and Adjusted EPS to the most directly comparable GAAP measures for the three and nine months ended September 30, 2016 and 2015, refer to the tables below (in thousands, except per share data). In addition, historical reconciliations of EBITDA and Adjusted EPS are available on our Internet website at www.mednax.com under the Investors tab. Our Internet website and the information contained therein or connected thereto are not incorporated into or deemed a part of this Form 10-Q.

Results of Operations

Three Months Ended September 30, 2016 as Compared to Three Months Ended September 30, 2015

Our net revenue increased \$105.7 million, or 14.6%, to \$828.0 million for the three months ended September 30, 2016, as compared to \$722.3 million for the same period in 2015. Of this \$105.7 million increase, \$95.5 million, or 13.2%, was attributable to revenue generated from acquisitions completed after June 30, 2015. Same-unit net revenue increased \$10.2 million, or 1.4%, for the three months ended September 30, 2016. Same units are those units at which we provided services for

Table of Contents

the entire current period and the entire comparable period. The change in same-unit net revenue was the result of a net increase in revenue of \$8.2 million, or 1.1%, from increases in patient service volumes and an increase of \$2.0 million, or 0.3%, from net reimbursement-related factors. The increase in revenue of \$8.2 million from higher patient service volumes was primarily related to increases in our hospital-based neonatology, anesthesia and other pediatric physician services, primarily newborn nursery, as well as in our radiology services. The increase in revenue of \$2.0 million related to net reimbursement-related factors was primarily due to slight improvements in managed care contracting, partially offset by the unfavorable impact from a shift in the mix of teleradiology services provided.

Practice salaries and benefits increased \$71.8 million, or 16.0%, to \$521.8 million for the three months ended September 30, 2016, as compared to \$450.0 million for the same period in 2015. This \$71.8 million increase was primarily attributable to increased costs associated with new physicians and other staff to support acquisition-related growth and growth at existing units, of which \$65.7 million was related to salaries and \$6.1 million was related to benefits and incentive compensation.

Practice supplies and other operating expenses increased \$7.6 million, or 31.8%, to \$31.6 million for the three months ended September 30, 2016, as compared to \$24.0 million for the same period in 2015. The increase was attributable to supplies, rent and other costs related to our acquisitions as well as our existing units.

General and administrative expenses include all billing and collection functions and all other salaries, benefits, supplies and operating expenses not specifically related to the day-to-day operations of our physician practices and services as well as those attributable to our non-physician service businesses. General and administrative expenses increased \$13.3 million, or 16.6%, to \$93.5 million for the three months ended September 30, 2016, as compared to \$80.2 million for the same period in 2015. The increase is attributable to the overall growth of the Company including acquisition-related growth. General and administrative expenses as a percentage of net revenue was 11.3% for the three months ended September 30, 2016, as compared to 11.1% for the same period in 2015.

Depreciation and amortization expense increased \$7.3 million, or 43.0%, to \$24.2 million for the three months ended September 30, 2016, as compared to \$16.9 million for the same period in 2015. The increase was primarily attributable to the amortization of intangible assets related to acquisitions.

Income from operations increased \$5.8 million, or 3.8%, to \$156.9 million for the three months ended September 30, 2016, as compared to \$151.1 million for the same period in 2015. Our operating margin was 18.9% for the three months ended September 30, 2016, as compared to 20.9% for the same period in 2015. The decrease of 198 basis points was primarily due to the unfavorable impact from the mix of teleradiology services provided and the variability in margins related to the mix of acquisitions completed after June 30, 2015.

Net non-operating expenses were \$16.2 million for the three months ended September 30, 2016, as compared to \$4.9 million for the same period in 2015. The net increase in non-operating expenses was primarily related to an increase in interest expense for our \$750.0 million 5.25% senior unsecured notes due 2023 (the 2023 Notes).

Our effective income tax rates were 31.4% and 38.0% for the three months ended September 30, 2016 and 2015, respectively. Our effective income tax rate for the three months ended September 30, 2016 was 39.0% after excluding the \$10.6 million income tax benefit resulting from the reversal of a liability for uncertain tax positions related to the favorable settlement of a tax matter during the third quarter of 2016. We believe that excluding the favorable impact on our effective income tax rate related to the settlement provides a more comparable view of our effective income tax rate. After excluding this favorable impact, the effective tax rate increased by 1.0%, from 38.0% for the three months ended September 30, 2015 to 39.0% for the three months ended September 30, 2016, primarily reflecting a change in our expected earnings mix between various states.

Net income attributable to MEDNAX, Inc. was \$96.5 million for the three months ended September 30, 2016, as compared to \$90.8 million for the same period in 2015. EBITDA increased by 7.7% to \$181.2 million for the three months ended September 30, 2016, as compared to \$168.2 million for the same period in 2015.

Diluted net income attributable to MEDNAX, Inc. per common and common equivalent share was \$1.04 on weighted average shares outstanding of 93.1 million for the three months ended September 30, 2016, as compared to \$0.97 on weighted average shares outstanding of 93.6 million for the same period in 2015. Adjusted EPS was \$1.09 on weighted average shares outstanding of 93.1 million for the three months ended September 30, 2016, as compared to \$1.10 on weighted average shares outstanding of 93.6 million for the same period in 2015. The decrease of 0.5 million in our weighted average shares outstanding is primarily due to the impact of shares repurchased under our repurchase programs, partially offset by the vesting of restricted stock, the exercise of employee stock options and the issuance of shares under our 1996 Non-Qualified Employee Stock Purchase Plan, as amended (ESPP) and our 2015 Non-Qualified Stock Purchase Plan (SPP).

Table of Contents***Nine Months Ended September 30, 2016 as Compared to Nine Months Ended September 30, 2015***

Our net revenue increased \$314.1 million, or 15.4%, to \$2.35 billion for the nine months ended September 30, 2016, as compared to \$2.04 billion for the same period in 2015. Of this \$314.1 million increase, \$274.5 million, or 13.3%, was attributable to revenue generated from acquisitions completed after December 31, 2014. Same-unit net revenue increased \$39.6 million, or 2.1%, for the nine months ended September 30, 2016. Same units are those units at which we provided services for the entire current period and the entire comparable period. The change in same-unit net revenue was the result of an increase in revenue of \$25.4 million, or 1.3%, from net reimbursement-related factors, and an increase of \$14.2 million, or 0.8%, related to patient service volumes. The increase in revenue of \$25.4 million related to net reimbursement-related factors was primarily due to modest improvements in managed care contracting and the flow through of revenue from modest price increases, partially offset by the unfavorable impact from the parity revenue recorded during the nine months ended September 30, 2016, as compared to the nine months ended September 30, 2015, and a decrease in revenue caused by an increase in the percentage of our patients being enrolled in GHC Programs. The increase in revenue of \$14.2 million from patient service volumes is primarily related to growth in our hospital-based anesthesiology and other pediatric services, primarily newborn nursery, partially offset by a decrease in our office-based maternal-fetal medicine services. Same-unit revenue in our hospital-based neonatology services was essentially flat. Our overall same-unit revenue increased \$50.1 million, or 2.6% after excluding the unfavorable impact of the \$10.5 million decrease in parity revenue, and our revenue from net-reimbursement related factors increased by \$35.9 million, or 1.8% after excluding this same unfavorable impact. We believe that excluding the unfavorable impact from the decrease in parity revenue year over year provides a more comparable view of our changes in same-unit revenue.

Practice salaries and benefits increased \$205.8 million, or 15.9%, to \$1.5 billion for the nine months ended September 30, 2016, as compared to \$1.3 billion for the same period in 2015. This \$205.8 million increase was primarily attributable to increased costs associated with new physicians and other staff to support acquisition-related growth and growth at existing units, of which \$187.1 million was related to salaries and \$18.7 million was related to benefits and incentive compensation.

Practice supplies and other operating expenses increased \$13.4 million, or 18.5%, to \$85.7 million for the nine months ended September 30, 2016, as compared to \$72.3 million for the same period in 2015. The increase was attributable to supplies, rent and other costs related to our acquisitions as well as our existing units.

General and administrative expenses include all billing and collection functions and all other salaries, benefits, supplies and operating expenses not specifically related to the day-to-day operations of our physician practices and services as well as those attributable to our non-physician service businesses. General and administrative expenses increased \$55.0 million, or 24.9%, to \$275.5 million for the nine months ended September 30, 2016, as compared to \$220.5 million for the same period in 2015. The increase is attributable to the overall growth of the Company including acquisition-related growth. General and administrative expenses as a percentage of net revenue was 11.7% for the nine months ended September 30, 2016, as compared to 10.8% for the same period in 2015. The increase of 89 basis points was driven primarily by the mix of acquisitions, principally our non-practice physician services business.

Depreciation and amortization expense increased \$17.9 million, or 38.9%, to \$64.0 million for the nine months ended September 30, 2016, as compared to \$46.1 million for the same period in 2015. The increase was primarily attributable to the amortization of intangible assets related to acquisitions.

Income from operations increased \$22.0 million, or 5.4%, to \$428.9 million for the nine months ended September 30, 2016, as compared to \$406.9 million for the same period in 2015. Our operating margin was 18.2% for the nine months ended September 30, 2016, as compared to 20.0% for the same period in 2015. The decrease of 173 basis

points was primarily due to the variability in margins related to the mix of acquisitions completed after December 31, 2014.

Net non-operating expenses were \$43.1 million for the nine months ended September 30, 2016, as compared to \$11.2 million for the same period in 2015. The net increase in non-operating expenses was primarily related to an increase in interest expense for our 2023 Notes.

Our effective income tax rates were 36.1% and 38.5% for the nine months ended September 30, 2016 and 2015, respectively. Our effective income tax rate for the nine months ended September 30, 2016 was 38.8% after excluding the \$10.6 million income tax benefit resulting from the reversal of a liability for uncertain tax positions related to the favorable settlement of a tax matter during the third quarter of 2016. We believe that excluding the favorable impact on our effective income tax rate related to the settlement provides a more comparable view of our effective income tax rate.

Net income attributable to MEDNAX, Inc. was \$246.8 million for the nine months ended September 30, 2016, as compared to \$243.6 million for the same period in 2015. EBITDA increased by 8.8% to \$493.2 million for the nine months ended September 30, 2016, as compared to \$453.3 million for the same period in 2015.

Table of Contents

Diluted net income attributable to MEDNAX, Inc. per common and common equivalent share was \$2.65 on weighted average shares outstanding of 93.0 million for the nine months ended September 30, 2016, as compared to \$2.59 on weighted average shares outstanding of 94.1 million for the same period in 2015. Adjusted EPS was \$2.99 on weighted average shares outstanding of 93.0 million for the nine months ended September 30, 2016, as compared to \$2.95 on weighted average shares outstanding of 94.1 million for the same period in 2015. The decrease of 1.1 million in our weighted average shares outstanding is primarily due to the impact of shares repurchased under our repurchase programs, partially offset by the vesting of restricted stock, the exercise of employee stock options and the issuance of shares under our ESPP and SPP.

Liquidity and Capital Resources

As of September 30, 2016, we had \$52.8 million of cash and cash equivalents on hand as compared to \$51.6 million at December 31, 2015. Additionally, we had working capital of \$162.4 million at September 30, 2016, an increase of \$63.4 million from working capital of \$99.0 million at December 31, 2015. This net increase in working capital is primarily due to net borrowings on our Credit Agreement, year-to-date earnings and increases in our long-term deferred tax liabilities, partially offset by the use of funds for acquisitions and repurchases of our common stock.

Our net cash provided from operating activities was \$312.8 million for the nine months ended September 30, 2016, as compared to \$264.6 million for the same period in 2015. This net increase in cash provided of \$48.2 million for the nine months ended September 30, 2016 is primarily due to a net increase in cash flow related to changes in the components of our accounts payable and accrued expenses, an increase in the adjustment to net income for non-cash depreciation and amortization expense and a net increase in cash flow related changes in deferred income taxes, partially offset by a net decrease in cash flow related to accounts receivable.

During the nine months ended September 30, 2016, accounts receivable increased by \$42.2 million, as compared to an increase of \$54.6 million for the same period in 2015. The increase in accounts receivable in both years is primarily due to higher accounts receivable balances related to acquisitions.

Our accounts receivable are principally due from managed care payors, government payors, and other third-parties, including insurance payors, hospitals and other healthcare providers. We track our collections from these sources, monitor the age of our accounts receivable, and make all reasonable efforts to collect outstanding accounts receivable through our systems, processes and personnel at our corporate and regional billing and collection offices. We use customary collection practices, including the use of outside collection agencies, for accounts receivable due from private pay patients when appropriate. Almost all of our accounts receivable adjustments consist of contractual adjustments due to the difference between gross amounts billed and the amounts allowed by our payors. Any amounts written off related to private pay patients are based on the specific facts and circumstances related to each individual patient account.

Days sales outstanding (DSO) is one of the key factors that we use to evaluate the condition of our accounts receivable and the related allowances for contractual adjustments and uncollectibles. DSO reflects the timeliness of cash collections on billed revenue and the level of reserves on outstanding accounts receivable. Our DSO was 54.1 days at September 30, 2016 as compared to 55.2 days at December 31, 2015.

During the nine months ended September 30, 2016, our net cash used in investing activities of \$771.9 million included acquisition payments, net of cash acquired, of \$724.9 million, capital expenditures of \$28.4 million and net purchases of \$18.6 million related to the purchase and maturity of investments.

During the nine months ended September 30, 2016, our net cash provided from financing activities of \$460.3 million consisted primarily of net borrowings on our Credit Agreement of \$513.0 million and proceeds from the exercise of employee stock options and the issuance of common stock under our ESPP and SPP of \$15.6 million, partially offset by the repurchase of \$61.8 million of our common stock and the payment of \$8.3 million for contingent consideration liabilities.

Our Credit Agreement provides for a \$1.7 billion unsecured revolving credit facility and a \$200.0 million term loan and includes a \$75.0 million sub-facility for swingline loans and a \$37.5 million sub-facility for the issuance of letters of credit. We may increase the Credit Agreement to up to \$2.2 billion on an unsecured basis, subject to the satisfaction of specified conditions. The Credit Agreement matures in October 2019 and is guaranteed by substantially all of our subsidiaries and affiliated professional contractors. At our option, borrowings under the Credit Agreement (other than swingline loans) will bear interest at (i) the Alternate Base Rate (defined as the highest of (a) the prime rate, (b) the Federal Funds Rate plus 1/2 of 1.00% and (c) LIBOR for an interest period of one month plus 1.00%) plus an applicable margin rate ranging from 0.125% to 0.750% based on our consolidated leverage ratio or (ii) the LIBOR rate plus an applicable margin rate ranging from 1.125% to 1.750% based on our consolidated leverage ratio. Swingline loans will bear interest at the Alternate Base Rate plus the applicable margin. The Credit Agreement also calls for other customary fees and charges, including an unused commitment fee ranging from 0.150% to 0.300% of the unused lending commitments, based on the our consolidated leverage ratio. The Credit Agreement

Table of Contents

contains customary covenants and restrictions, including covenants that require us to maintain a minimum interest coverage ratio, not to exceed a specified consolidated leverage ratio and to comply with laws. The Credit Agreement permits us to pay dividends and make certain other distributions, subject to limitations specified therein. Failure to comply with these covenants would constitute an event of default under the Credit Agreement, notwithstanding the ability of the Company to meet its debt service obligations. The Credit Agreement also includes various customary remedies for the lenders following an event of default, including the acceleration of repayment of outstanding amounts under the Credit Agreement.

At September 30, 2016, we had an outstanding principal balance of \$1.05 billion on our Credit Agreement, composed of \$864.0 million under our revolving line of credit and a \$182.5 million term loan. We also had outstanding letters of credit associated with our professional liability insurance program of \$0.4 million which reduced the amount available on our Credit Agreement to approximately \$835.6 million at September 30, 2016.

At September 30, 2016, the outstanding principal balance on our 2023 Senior Notes was \$750.0 million. Our obligations under the 2023 Senior Notes are guaranteed on an unsecured senior basis by the same subsidiaries and affiliated professional contractors that guarantee the Credit Agreement. Interest on the 2023 Senior Notes accrues at the rate of 5.25% per annum, or \$39.4 million, and is payable semi-annually in arrears on June 1 and December 1.

The indenture under which the 2023 Senior Notes are issued, among other things, limits our ability to (1) incur liens and (2) enter into sale and lease-back transactions, and also limits our ability to merge or dispose of all or substantially all of our assets, in all cases, subject to a number of customary exceptions. Although we are not required to make mandatory redemption or sinking fund payments with respect to the 2023 Senior Notes, upon the occurrence of a change in control of MEDNAX, we may be required to repurchase the 2023 Senior Notes at a purchase price equal to 101% of the aggregate principal amount of the 2023 Senior Notes repurchased plus accrued and unpaid interest.

At September 30, 2016, we believe we were in compliance, in all material respects, with the financial covenants and other restrictions applicable to us under our Credit Agreement and the 2023 Senior Notes. We believe we will be in compliance with these covenants throughout 2016.

We maintain professional liability insurance policies with third-party insurers, subject to self-insured retention, exclusions and other restrictions. We self-insure our liabilities to pay self-insured retention amounts under our professional liability insurance coverage through a wholly owned captive insurance subsidiary. We record liabilities for self-insured amounts and claims incurred but not reported based on an actuarial valuation using historical loss information, claim emergence patterns and various actuarial assumptions. Our total liability related to professional liability risks at September 30, 2016 was \$207.0 million, of which \$27.0 million is classified as a current liability within accounts payable and accrued expenses in the Condensed Consolidated Balance Sheet.

We anticipate that funds generated from operations, together with our current cash on hand and funds available under our Credit Agreement, will be sufficient to finance our working capital requirements, fund anticipated acquisitions and capital expenditures, fund our share repurchase program and meet our contractual obligations for at least the next 12 months.

Caution Concerning Forward-Looking Statements

Certain information included or incorporated by reference in this Quarterly Report may be deemed to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements may include, but are not limited to, statements relating to our objectives, plans and

strategies, and all statements (other than statements of historical facts) that address activities, events or developments that we intend, expect, project, believe or anticipate will or may occur in the future are forward-looking statements. These statements are often characterized by terminology such as believe, hope, may, anticipate, should, intend, will, expect, estimate, project, positioned, strategy and similar expressions and are based on assumptions and assessments made by our management in light of their experience and their perception of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. Any forward-looking statements in this Quarterly Report are made as of the date hereof, and we undertake no duty to update or revise any such statements, whether as a result of new information, future events or otherwise. Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties. Important factors that could cause actual results, developments and business decisions to differ materially from forward-looking statements are described in the Company's most recent Annual Report on Form 10-K, including the section entitled Risk Factors.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are subject to market risk primarily from exposure to changes in interest rates based on our financing, investing and cash management activities. We intend to manage interest rate risk through the use of a combination of fixed rate and variable rate debt. We borrow under our Credit Agreement at various interest rate options based on the Alternate Base Rate or LIBOR rate depending on certain financial ratios. At September 30, 2016, the outstanding principal balance on our Credit Agreement was \$1.05 billion, composed of \$864.0 million under our revolving line of credit and \$182.5 million under our term loan. Considering the total outstanding balance of \$1.05 billion, a 1% change in interest rates would result in an impact to income before income taxes of approximately \$10.5 million per year.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed by the Company in reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and (ii) accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of the end of the period covered by this report.

Changes in Internal Controls Over Financial Reporting

No changes in our internal control over financial reporting occurred during the quarter ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We expect that audits, inquiries and investigations from government authorities and agencies will occur in the ordinary course of business. Such audits, inquiries and investigations and their ultimate resolutions, individually or in the aggregate, could have a material adverse effect on our business, financial condition, results of operations, cash flows and the trading price of our common stock.

In the ordinary course of our business, we become involved in pending and threatened legal actions and proceedings, most of which involve claims of medical malpractice related to medical services provided by our affiliated physicians. Our contracts with hospitals generally require us to indemnify them and their affiliates for losses resulting from the negligence of our affiliated physicians and other clinicians. We may also become subject to other lawsuits that could involve large claims and significant defense costs. We believe, based upon a review of pending actions and proceedings, that the outcome of such legal actions and proceedings will not have a material adverse effect on our business, financial condition or results of operations. The outcome of such actions and proceedings, however, cannot be predicted with certainty and an unfavorable resolution of one or more of them could have a material adverse effect on our business, financial condition, results of operations, cash flows and the trading price of our common stock.

Although we currently maintain liability insurance coverage intended to cover professional liability and certain other claims, we cannot assure that our insurance coverage will be adequate to cover liabilities arising out of claims asserted against us in the future where the outcomes of such claims are unfavorable to us. With respect to professional liability risk, we self-insure a significant portion of this risk through our wholly owned captive insurance subsidiary. Liabilities in excess of our insurance coverage, including coverage for professional liability and certain other claims, could have a material adverse effect on our business, financial condition, results of operations, cash flows and the trading price of our common stock.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in the Company's most recent Annual Report on Form 10-K.
