GOLDCORP ANNOUNCES 2006 RESERVES, PRODUCTION AND CASH COSTS

(All figures are in US dollars unless stated otherwise)

Vancouver, British Columbia - February 23, 2007 - Goldcorp Inc. (GG:NYSE; G:TSX) today reported reserves, resources, production and cash costs as of and for the year ended December 31, 2006.

- Proven and Probable gold reserves increased by 170 percent to 39.8 million ounces.
- Measured and Indicated gold resources increased more than fivefold to 16.4 million ounces.
 - Inferred gold resources quadrupled to 30.8 million ounces.
- Proven and Probable silver reserves increase to 781 million ounces

“The acquisition of assets during the year from Placer Dome and Glamis Gold drove the dramatic increases in reserves and resources in 2006,” said Kevin McArthur, President and Chief Executive Officer. “Our priority going forward will be on organic growth initiatives designed to unlock further value from our very large mineral concession holdings. We will be investing over \$120 million in exploration during 2007, with most of that directed toward drilling in the shadows of our headframes.”

Complete reserves and resources calculations are as follows:

Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources: These tables use the terms "Measured", "Indicated" and "Inferred" Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred.

Mineral Resource exists, or is economically or legally mineable.

Production and Cash Costs

Gold production in 2006 increased 49 percent to 1.69 million ounces while total cash costs were \$33 per ounce. For the fourth quarter ended December 31, 2006, gold production was 587,800 ounces at a total cash cost of \$160 per ounce. Assuming the successful sale of the Company's Peak and Amapari mines, Goldcorp's forecast gold production for 2007 is approximately 2.6 million ounces at an estimated cash cost of less than \$150 per ounce. Production and cash cost data for 2006 on a mine-by-mine basis are as follows:

Mine	Gold Production (ounces)	Total Cash Cost (US\$ per ounce)
Red Lake	592,900	195
Musselwhite	113,500	349
Porcupine	99,700	430
