PART I FINANCIAL INFORMATION

This quarterly report contains forward-looking statements within the meaning of the U.S. federal securities laws. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the United States securities laws. In some cases, these statements can be identified by the use of forward-looking words such as “may”, “should”, “could”, “anticipate”, “estimate”, “expect”, “plan”, “believe”, “predict”, “potential” and “intend”. Forward-looking statements contained in this report may include information regarding our estimates of losses related to catastrophes and other large losses, measurements of potential losses in the fair value of our investment portfolio and derivative contracts, our expectations regarding pricing and other market conditions, our growth prospects, and valuations of the potential impact of movements in interest rates, equity prices, credit spreads and foreign currency rates. Forward-looking statements only reflect our expectations and are not guarantees of performance.

These statements involve risks, uncertainties and assumptions. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements. We believe that these factors include, but are not limited to, the following:

- the occurrence and magnitude of natural and man-made disasters,
- actual claims exceeding our loss reserves,
- general economic, capital and credit market conditions,
- the failure of any of the loss limitation methods we employ,
- the effects of emerging claims, coverage and regulatory issues, including uncertainty related to coverage definitions, limits, terms and conditions,
- the failure of our cedants to adequately evaluate risks,
- inability to obtain additional capital on favorable terms, or at all,
- the loss of one or more key executives,
- a decline in our ratings with rating agencies,
- loss of business provided to us by our major brokers,
- changes in accounting policies or practices,
- the use of industry catastrophe models and changes to these models,
- changes in governmental regulations,
- increased competition,
- changes in the political environment of certain countries in which we operate or underwrite business,
 - fluctuations in interest rates, credit spreads, equity prices and/or currency values,
- the failure to complete our amalgamation with PartnerRe Ltd., and
- the other matters set forth under Item 1A, ‘Risk Factors’ and Item 7, ‘Management’s Discussion and Analysis of Financial Condition and Results of Operations’ included in our Annual Report on Form 10-K for the year ended December 31, 2014.

We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Basis of Presentation

These interim consolidated financial statements include the accounts of AXIS Capital Holdings Limited (“AXIS Capital”) and its subsidiaries (herein referred to as “we,” “us,” “our,” or the “Company”).

The consolidated balance sheet at March 31, 2015 and the consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the periods ended March 31, 2015 and 2014 have not been audited. The balance sheet at December 31, 2014 is derived from our audited financial statements.

These financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (“U.S. GAAP”) for interim financial information and with the Securities and Exchange Commission's (“SEC”) instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of our financial position and results of operations for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All inter-company accounts and transactions have been eliminated.

The following information should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014. Tabular dollar and share amounts are in thousands, except per share amounts. All amounts are reported in U.S. dollars.

Significant Accounting Policies

There were no notable changes in our significant accounting policies subsequent to our Annual Report on Form 10-K for the year ended December 31, 2014.

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

2. SEGMENT INFORMATION

Our underwriting operations are organized around our global underwriting platforms, AXIS Insurance and AXIS Re. Therefore we have determined that we have two reportable segments, insurance and reinsurance. We do not allocate our assets by segment, with the exception of goodwill and intangible assets, as we evaluate the underwriting results of each segment separately from the results of our investment portfolio.

The following tables summarize the underwriting results of our reportable segments, as well as the carrying values of allocated goodwill and intangible assets:

Three months ended and at March 31,	2015			2014			
	Insurance	Reinsurance	Total	Insurance	Reinsurance	Total

(1) Residential mortgage-backed securities (RMBS) originated by U.S. agencies.

(2) Commercial mortgage-backed securities (CMBS).

(3)

Asset-backed securities (ABS) include debt tranching securities collateralized primarily by auto loans, student loans, credit cards, and other asset types. This asset class also includes collateralized loan obligations (CLOs) and collateralized debt obligations (CDOs).

- (4) Municipals include bonds issued by states, municipalities and political subdivisions.

- (5) Represents the non-credit component of the other-than-temporary impairment (OTTI) losses, adjusted for subsequent sales of securities. It does not include the change in fair value subsequent to the impairment measurement date.

In the normal course of investing activities, we actively manage allocations to non-controlling tranches of structured securities (variable interests) issued by VIEs. These structured securities include RMBS, CMBS and ABS and are included in the above table. Additionally, within our other investments portfolio, we also invest in limited partnerships (hedge funds) and CLO equity tranching

securities, which are all variable interests issued by VIEs (see Note 3(b)). For these variable interests, we do not have the power to direct the activities that are most significant to the economic performance of the VIEs and accordingly we are not the primary beneficiary for any of these VIEs. Our maximum exposure to loss on these interests is limited to the amount of our investment. We have not provided financial or other support with respect to these structured securities other than our original investment.

Contractual Maturities

The contractual maturities of fixed maturities are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value	% of Total Fair Value	
At March 31, 2015				
Maturity				
Due in one year or less	\$508,448	\$503,179	4.2	%
Due after one year through five years	4,387,194	4,349,800	36.2	%
Due after five years through ten years	2,042,045	2,016,713	16.8	%
Due after ten years	235,343	237,806	2.0	%

Fixed Maturities

At March 31, 2015, 1,004 fixed maturities (2014: 1,388) were in an unrealized loss position of \$159 million (2014: \$173 million), of which \$17 million (2014: \$36 million) was related to securities below investment grade or not rated.

Table of ContentsAXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

3. INVESTMENTS (CONTINUED)

At March 31, 2015, 180 (2014: 223) securities had been in a continuous unrealized loss position for 12 months or greater and had a fair value of \$840 million (2014: \$1,354 million). Following our credit impairment review, we concluded that these securities as well as the remaining securities in an unrealized loss position in the above table were temporarily impaired at March 31, 2015, and were expected to recover in value as the securities approach maturity. Further, at March 31, 2015, we did not intend to sell these securities in an unrealized loss position and it is more likely than not that we will not be required to sell these securities before the anticipated recovery of their amortized costs.

Equity Securities

At March 31, 2015, 8 securities (2014: 9) were in an unrealized loss position of \$17 million (2014: \$8 million).

At March 31, 2015 and December 31, 2014, there were no securities that had been in a continuous unrealized loss position for 12 months or greater. Based on our impairment review process and our ability and intent to hold these securities for a reasonable period of time sufficient for a full recovery, we concluded that the above equities in an unrealized loss position were temporarily impaired at March 31, 2015.

b) Other Investments

The following table provides a breakdown of our investments in hedge funds, direct lending funds and CLO Equities, together with additional information relating to the liquidity of each category:

	Fair Value		Redemption Frequency (if currently eligible)	Redemption Notice Period
At March 31, 2015				
Long/short equity funds	\$242,096	26	% Quarterly, Semi-annually	30-60 days
Multi-strategy funds	336,342	36	% Quarterly, Semi-annually	60-95 days
Event-driven funds	189,212	20	% Quarterly, Annually	45-60 days
Leveraged bank loan funds	9,616	1	% Quarterly	65 days
Direct lending funds	69,682	7	% n/a	n/a
CLO - Equities	92,058	10	% n/a	n/a
Total other investments	\$939,006	100	%	
At December 31, 2014				
Long/short equity funds	\$298,907	31	% Quarterly, Semi-annually	30-60 days
Multi-strategy funds	324,020	34	% Quarterly, Semi-annually	60-95 days
Event-driven funds	185,899	19	% Quarterly, Annually	45-60 days
Leveraged bank loan funds	9,713	1	% Quarterly	65 days
Direct lending funds	54,438	6	% n/a	n/a
CLO - Equities	92,488	9	% n/a	n/a
Total other investments	\$965,465	100	%	

n/a - not applicable

The investment strategies for the above funds are as follows:

Long/short equity funds: Seek to achieve attractive returns primarily by executing an equity trading strategy involving both long and short investments in publicly-traded equities.

Multi-strategy funds: Seek to achieve above-market returns by pursuing multiple investment strategies to diversify risks and reduce volatility. This category includes funds of hedge funds which invest in a large pool of hedge funds across a diversified range of hedge fund strategies.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

3. INVESTMENTS (CONTINUED)

• **Event-driven funds:** Seek to achieve attractive returns by exploiting situations where announced or anticipated events create opportunities.

• **Leveraged bank loan funds:** Seek to achieve attractive returns by investing primarily in bank loan collateral that has limited interest rate risk exposure.

• **Direct lending funds:** Seek to achieve attractive risk-adjusted returns, including current income generation, by investing in funds which provide financing directly to borrowers.

Two common redemption restrictions which may impact our ability to redeem our hedge funds are gates and lockups. A gate is a suspension of redemptions which may be implemented by the general partner or investment manager of the fund in order to defer, in whole or in part, the redemption request in the event the aggregate amount of redemption requests exceeds a predetermined percentage of the fund's net assets which may otherwise hinder the general partner or investment manager's ability to liquidate holdings in an orderly fashion in order to generate the cash necessary to fund extraordinarily large redemption payouts. A lockup period is the initial amount of time an investor is contractually required to hold the security before having the ability to redeem. During 2015 and 2014, neither of these restrictions impacted our redemption requests. At March 31, 2015, \$95 million (2014: \$87 million), representing 12% (2014: 11%) of our total hedge funds, relate to holdings where we are still within the lockup period. The expiration of these lockup periods range from June 2015 to March 2016.

At March 31, 2015, \$6 million (2014: \$6 million) was invested in hedge funds that are not accepting redemption requests. Of this amount, substantially all relates to a leveraged bank loan fund in a period of planned principal distributions. Based on market conditions and payments made to date, management's current expectation is that the distribution process will be completed in 2015.

At March 31, 2015, we have \$72 million (2014: \$88 million) of unfunded commitments within our other investments portfolio relating to our future investments in direct lending funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until the completion of the fund's investment term. These funds have investment terms ranging from 5-10 years and the General Partners of certain funds have the option to extend the term by up to three years.

During 2013, we made a \$60 million commitment as a limited partner in a multi-strategy hedge fund. Once the full amount of committed capital has been called by the General Partner, the assets will not be fully returned until the completion of the fund's investment term which ends in December, 2018. The General Partner then has the option to extend the term by up to three years. At March 31, 2015, \$29 million of our commitment remains unfunded and the current fair value of the funds called to date are included in the multi-strategy funds line of the table above.

During 2015, we made a \$100 million commitment as a limited partner in a fund which invests in real estate and real estate securities and businesses. The fund is subject to a 3 year commitment period and a total fund life of 8 years during which time we are not eligible to redeem our investment. At March 31, 2015 our commitment remains unfunded.

Intent to sell of securities previously impaired	—	—
Securities sold/redeemed/matured	—	(4)
Balance at end of period	\$1,541	\$1,590

e) Reverse Repurchase Agreements

At March 31, 2015, we held \$123 million (2014: \$110 million) of reverse repurchase agreements. These loans are fully collateralized, are generally outstanding for a short period of time and are presented on a gross basis as part of cash and cash equivalents on our consolidated balance sheet. The required collateral for these loans is either cash or U.S. Treasuries at a minimum rate of 102% of the loan principal. Upon maturity, we receive principal and interest income.

4. FAIR VALUE MEASUREMENTS

Fair Value Hierarchy

Fair value is defined as the price to sell an asset or transfer a liability (i.e. the “exit price”) in an orderly transaction between market participants. We use a fair value hierarchy that gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data. The hierarchy is broken down into three levels as follows:

Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that we have the ability to access.

Level 2 - Valuations based on quoted prices in active markets for similar assets or liabilities, quoted prices for identical assets or liabilities in inactive markets, or for which significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement. The unobservable inputs reflect our own judgments about assumptions that market participants might use.

The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment.

Accordingly, the degree of judgment exercised by management in determining fair value is greatest for instruments categorized in Level 3. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This may lead us to change the selection of our valuation technique (from market to cash flow approach) or may cause us to use multiple valuation techniques to estimate the fair value of a financial instrument. This circumstance could cause an instrument to be reclassified between levels within the fair value hierarchy.

We used the following valuation techniques and assumptions in estimating the fair value of our financial instruments as well as the general classification of such financial instruments pursuant to the above fair value hierarchy.

Fixed Maturities

At each valuation date, we use the market approach valuation technique to estimate the fair value of our fixed maturities portfolio, when possible. This market approach includes, but is not limited to, prices obtained from third party pricing services for identical or comparable securities and the use of “pricing matrix models” using observable market inputs such as yield curves, credit risks and spreads, measures of volatility, and prepayment speeds. Pricing from third party pricing services is sourced from multiple vendors, when available, and we maintain a vendor hierarchy by asset type based on historical pricing experience and vendor expertise. When prices are unavailable from pricing services, we obtain non-binding quotes from broker-dealers who are active in the corresponding markets.

The following describes the significant inputs generally used to determine the fair value of our fixed maturities by asset class.

U.S. government and agency

U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. As the fair values of our U.S. Treasury securities are based on unadjusted market prices in active markets, they are classified within Level 1. The fair values of U.S. government agency securities are priced using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads for these securities are observable market inputs, the fair values of U.S. government agency securities are classified within Level 2.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

Non-U.S. government

Non-U.S. government securities comprise bonds issued by non-U.S. governments and their agencies along with supranational organizations (collectively also known as sovereign debt securities). The fair value of these securities is based on prices obtained from international indices or a valuation model that includes the following inputs: interest rate yield curves, cross-currency basis index spreads, and country credit spreads for structures similar to the sovereign bond in terms of issuer, maturity and seniority. As the significant inputs are observable market inputs, the fair value of non-U.S. government securities are classified within Level 2.

Corporate debt

Corporate debt securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair values of these securities are generally determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As these spreads and the yields for the risk-free yield curve are observable market inputs, the fair values of our corporate debt securities are classified within Level 2. Where pricing is unavailable from pricing services, we obtain non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, securities are classified within Level 3.

MBS

Our portfolio of RMBS and CMBS are originated by both agencies and non-agencies. The fair values of these securities are determined through the use of a pricing model (including Option Adjusted Spread) which uses prepayment speeds and spreads to determine the appropriate average life of the MBS. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the significant inputs used to price MBS are observable market inputs, the fair values of the MBS are classified within Level 2. Where pricing is unavailable from pricing services, we obtain non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. These securities are classified within Level 3.

ABS

ABS include mostly investment-grade bonds backed by pools of loans with a variety of underlying collateral, including automobile loan receivables, student loans, credit card receivables, and CLO Debt originated by a variety of financial institutions. Similarly to MBS, the fair values of ABS are priced through the use of a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price ABS are observable market inputs, the fair values of ABS are classified within Level 2. Where pricing is unavailable from pricing services, we obtain non-binding quotes from broker-dealers. These securities are classified within Level 3.

Municipals

Our municipal portfolio comprises revenue and general obligation bonds issued by U.S. domiciled state and municipal entities. The fair value of these securities is determined using spreads obtained from broker-dealers, trade prices and

the new issue market. As the significant inputs used to price the municipals are observable market inputs, municipals are classified within Level 2.

Equity Securities

Equity securities include exchange-traded funds and non-U.S. bond mutual funds. For exchange-traded funds, we classified these within Level 1 as their fair values are based on unadjusted quoted market prices in active markets. Our investments in non-U.S. bond mutual funds have daily liquidity, with redemption based on the net asset value ("NAV") of the funds. Accordingly, we have classified these investments as Level 2.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

Other Investments

As a practical expedient, we estimate fair values for hedge funds, direct lending funds and the CLO fund using NAVs as advised by external fund managers or third party administrators. For each of these funds, the NAV is based on the manager's or administrator's valuation of the underlying holdings in accordance with the fund's governing documents and in accordance with U.S. GAAP. For any funds for which we have not yet received a NAV concurrent with our period end date, we record an estimate of the change in fair value for the period subsequent to the most recent NAV. Such estimates are based on return estimates for the period between the most recently issued NAV and the period end date; these estimates are obtained from the relevant fund managers. Accordingly, we do not typically have a reporting lag in our fair value measurements for these funds. Historically, our valuation estimates incorporating these return estimates have not significantly diverged from the subsequent NAVs.

Within the hedge fund, direct lending fund and CLO fund industries, there is a general lack of transparency necessary to facilitate a detailed independent assessment of the values placed on the securities underlying the NAV provided by the fund manager or fund administrator. To address this, on a quarterly basis, we perform a number of monitoring procedures designed to assist us in the assessment of the quality of the information provided by managers and administrators. These procedures include, but are not limited to, regular review and discussion of each fund's performance with its manager, regular evaluation of fund performance against applicable benchmarks and the backtesting of our fair value estimates against subsequently received NAVs. Backtesting involves comparing our previously reported values for each individual fund against NAVs per audited financial statements (for year-end values) and final NAVs from fund managers and fund administrators (for interim values).

For our hedge fund investments with liquidity terms allowing us to fully redeem our holdings at the applicable NAV in the near term, we have classified these investments as Level 2. Certain investments in hedge funds, all of our direct lending funds and our CLO fund have redemption restrictions (see Note 3(b) for further details) that prevent us from redeeming in the near term and therefore we have classified these investments as Level 3.

At March 31, 2015, our direct investments in CLO - Equities were classified within Level 3 as we estimated the fair value for these securities using an income approach valuation technique (discounted cash flow model) due to the lack of observable and relevant trades in the secondary markets.

Short-Term Investments

Short-term investments primarily comprise highly liquid securities with maturities greater than three months but less than one year from the date of purchase. These securities are classified within Level 2 because these securities are typically not actively traded due to their approaching maturity and, as such, their amortized cost approximates fair value.

Derivative Instruments

Our foreign currency forward contracts and interest rate swaps are customized to our economic hedging strategies and trade in the over-the-counter derivative market. We use the market approach valuation technique to estimate the fair value for these derivatives based on significant observable market inputs from third party pricing vendors, non-binding broker-dealer quotes and/or recent trading activity. Accordingly, we classified these derivatives within

Level 2.

We also participate in non-exchange traded derivative-based risk management products addressing weather risks. We use observable market inputs and unobservable inputs in combination with industry or internally-developed valuation and forecasting techniques to determine fair value. We classify these instruments within Level 3.

Insurance-linked Securities

Insurance-linked securities comprise investment in a catastrophe bond. We obtain non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. These securities are classified within Level 3.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

Cash Settled Awards

Cash settled awards comprise restricted stock units that form part of our compensation program. Although the fair value of these awards is determined using observable quoted market prices in active markets, the stock units themselves are not actively traded. Accordingly, we have classified these liabilities within Level 2.

4. FAIR VALUE MEASUREMENTS (CONTINUED)

During 2015 and 2014, we had no transfers between Levels 1 and 2.

Level 3 Fair Value Measurements

Except for hedge funds, direct lending funds and our CLO fund priced using NAV as a practical expedient and certain fixed maturities and insurance-linked securities priced using broker-dealer quotes (underlying inputs are not available), the following table quantifies the significant unobservable inputs we have used in estimating fair value at March 31, 2015 for our investments classified as Level 3 in the fair value hierarchy. These significant unobservable inputs have not changed significantly from December 31, 2014.

	Fair Value	Valuation Technique	Unobservable Input	Range	Weighted Average
Other investments - CLO - Equities	\$36,960	Discounted cash flow	Default rates	4.0% - 5.0%	4.3%
			Loss severity rate	53.5%	53.5%
			Collateral spreads	3.0% - 3.5%	3.3%
			Estimated maturity dates	2.9 - 4.1 years	3.6 years
Derivatives - Weather derivatives, net	\$(7,308)	Simulation model	Weather curve	632 - 2161 ⁽¹⁾	n/a ⁽²⁾
			Weather standard deviation	59 - 250 ⁽¹⁾	n/a ⁽²⁾

(1) Measured in Heating Degree Days ("HDD") which is the number of degrees the daily temperature is below a reference temperature. The cumulative HDD for the duration of the derivatives contract is compared to the strike value to determine the necessary settlement.

Due to the diversity of the portfolio, the range of unobservable inputs can be widespread; therefore, presentation of (2) a weighted average is not useful. Weather parameters may include various temperature and/or precipitation measures that will naturally vary by geographic location of each counterparty's operations.

The CLO - Equities market continues to be mostly inactive with only a small number of transactions being observed in the market and fewer still involving transactions in our CLO - Equities. Accordingly, we continue to rely on the use of our internal discounted cash flow model (income approach) to estimate fair value of our direct investments in CLO - Equities. Of the significant inputs into this model, the default and loss severity rates are the most judgmental unobservable market inputs to which the valuation of CLO - Equities is most sensitive. A significant increase (decrease) in either of these significant inputs in isolation would result in lower (higher) fair value estimates for direct investments in our CLO - Equities and, in general, a change in default rate assumptions will be accompanied by a directionally similar change in loss severity rate assumptions. Collateral spreads and estimated maturity dates are less judgmental inputs as they are based on the historical average of actual spreads and the weighted average life of the current underlying portfolios, respectively. A significant increase (decrease) in either of these significant inputs in isolation would result in higher (lower) fair value estimates for direct investments in our CLO - Equities. In general, these inputs have no significant interrelationship with each other or with default and loss severity rates.

On a quarterly basis, our valuation processes for CLO - Equities includes a review of the underlying cash flows and key assumptions used in the discounted cash flow model. We review and update the above significant unobservable inputs based on information obtained from secondary markets, including from the managers of the CLOs we hold. These inputs are the responsibility of management and, in order to ensure fair value measurement is applied consistently and in accordance with U.S. GAAP, we update our assumptions through regular communication with industry participants and ongoing monitoring of the deals in which we participate (e.g. default and loss severity rate trends), we maintain a current understanding of the market conditions, historical results, as well as emerging trends that may impact future cash flows. By maintaining this current understanding, we are able to assess the reasonableness of the inputs we ultimately use in our model.

Weather derivatives relate to non-exchange traded risk management products addressing weather risks. We use observable market inputs and unobservable inputs in combination with industry or internally-developed simulation models to determine fair value; these models may reference market price information for similar instruments. The pricing models are internally reviewed by Risk Management personnel prior to implementation and are reviewed periodically thereafter.

Observable and unobservable inputs to these models vary by contract type and would typically include the following:

Observable inputs: market prices for similar instruments, notional, option strike, term to expiry, contractual limits;
Unobservable inputs: correlation; and

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

Both observable and unobservable inputs: weather curves, weather standard deviation.

In general, weather curves are the most significant contributing input to fair value determination; changes in this variable can result in higher or lower fair value depending on the underlying position. In addition, changes in any or all of the unobservable inputs identified above may contribute positively or negatively to overall portfolio value. The correlation input will quantify the interrelationship, if any, amongst the other variables.

Gains and losses included in earnings on fixed maturities are included in net realized investment gains (losses).

- (1) Gains and (losses) included in earnings on other investments are included in net investment income. Gains (losses) on weather derivatives included in earnings are included in other insurance-related income.
- (2) Gains and losses included in other comprehensive income (“OCI”) on fixed maturities are included in unrealized gains (losses) arising during the period.
- (3) Change in unrealized investment gain (loss) relating to assets held at the reporting date.

Table of ContentsAXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

The transfers into and out of fair value hierarchy levels reflect the fair value of the securities at the end of the reporting period.

Transfers into Level 3 from Level 2

There were no transfers to Level 3 from Level 2 made during the three months ended March 31, 2015. The transfers to Level 3 from Level 2 made during the three months ended March 31, 2014 were primarily due to the lack of observable market inputs and multiple quotes from pricing vendors and broker-dealers for certain fixed maturities.

Transfers out of Level 3 into Level 2

There were no transfers to Level 2 from Level 3 made during the three months ended March 31, 2015 and 2014.

Financial Instruments Not Carried at Fair Value

U.S. GAAP guidance over disclosures about the fair value of financial instruments are also applicable to financial instruments not carried at fair value, except for certain financial instruments, including insurance contracts.

The carrying values of cash equivalents (including restricted amounts), accrued investment income, receivable for investments sold, certain other assets, payable for investments purchased and certain other liabilities approximated their fair values at March 31, 2015, due to their respective short maturities. As these financial instruments are not actively traded, their respective fair values are classified within Level 2.

At March 31, 2015, our senior notes are recorded at amortized cost with a carrying value of \$991 million (2014: \$991 million) and have a fair value of \$1,133 million (2014: \$1,089 million). The fair values of these securities were obtained from a third party pricing service and pricing was based on the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As these spreads and the yields for the risk-free yield curve are observable market inputs, the fair values of our senior notes are classified within Level 2.

5. DERIVATIVE INSTRUMENTS

The following table summarizes the balance sheet classification of derivatives recorded at fair values. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated and is presented in the table to quantify the volume of our derivative activities. Notional amounts are not reflective of credit risk.

	March 31, 2015			December 31, 2014		
	Derivative Notional Amount	Derivative Asset Fair Value ⁽¹⁾	Derivative Liability Fair Value ⁽¹⁾	Derivative Notional Amount	Derivative Asset Fair Value ⁽¹⁾	Derivative Liability Fair Value ⁽¹⁾
Derivatives not designated as hedging instruments

Weather-related contracts	20,995	—	7,308	58,124	111	15,288
Total derivatives		\$4,250	\$17,620		\$7,264	\$18,329

(1) Asset and liability derivatives are classified within other assets and other liabilities in the Consolidated Balance Sheets.

Table of ContentsAXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

5. DERIVATIVE INSTRUMENTS (CONTINUED)

Offsetting Assets and Liabilities

Our derivative instruments are generally traded under International Swaps and Derivatives Association master netting agreements, which establish terms that apply to all transactions. In the event of a bankruptcy or other stipulated event, master netting agreements provide that individual positions be replaced with a new amount, usually referred to as the termination amount, determined by taking into account market prices and converting into a single currency.

Effectively, this contractual close-out netting reduces credit exposure from gross to net exposure. The table below presents a reconciliation of our gross derivative assets and liabilities to the net amounts presented in our Consolidated Balance Sheets, with the difference being attributable to the impact of master netting agreements.

	March 31, 2015			December 31, 2014		
	Gross Amounts	Gross Amounts Offset	Net Amounts ⁽¹⁾	Gross Amounts	Gross Amounts Offset	Net Amounts ⁽¹⁾
Derivative assets	\$11,974	\$(7,724)	\$4,250	\$15,125	\$(7,861)	\$7,264
Derivative liabilities	\$25,344	\$(7,724)	\$17,620	\$26,190	\$(7,861)	\$18,329

⁽¹⁾ Net asset and liability derivatives are classified within other assets and other liabilities in the Consolidated Balance Sheets.

Refer to Note 3 - Investments for information on reverse repurchase agreements.

Derivative Instruments not Designated as Hedging Instruments

a) Relating to Investment Portfolio

Foreign Currency Risk

Within our investment portfolio we are exposed to foreign currency risk. Accordingly, the fair values for our investment portfolio are partially influenced by the change in foreign exchange rates. We may enter into foreign exchange forward contracts to manage the effect of this foreign currency risk. These foreign currency hedging activities are not designated as specific hedges for financial reporting purposes.

The increase in the notional amount of investment-related derivatives since December 31, 2014 was due to an increase in Australian dollar-denominated fixed maturities being hedged.

Interest Rate Risk

Our investment portfolio contains a large percentage of fixed maturities which exposes us to significant interest rate risk. As part of our overall management of this risk, we may use interest rate swaps. During the quarter all interest rate swaps were closed.

b) Relating to Underwriting Portfolio

Foreign Currency Risk

Our (re)insurance subsidiaries and branches operate in various foreign countries. Consequently, some of our business is written in currencies other than the U.S. dollar and, therefore, our underwriting portfolio is exposed to significant foreign currency risk. We manage foreign currency risk by seeking to match our foreign-denominated net liabilities under (re)insurance contracts with cash and investments that are denominated in such currencies. We may also use derivative instruments, specifically forward contracts and currency options, to economically hedge foreign currency exposures.

The increase in the notional amount of underwriting related derivatives since December 31, 2014, was primarily due to new business written during the quarter.

Table of ContentsAXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

5. DERIVATIVE INSTRUMENTS (CONTINUED)

Weather Risk

During 2013, we began to write derivative-based risk management products designed to address weather risks with the objective of generating profits on a portfolio basis. The majority of this business consists of receiving a payment at contract inception in exchange for bearing the risk of variations in a quantifiable weather-related phenomenon, such as temperature. Where a client wishes to minimize the upfront payment, these transactions may be structured as swaps or collars. In general, our portfolio of such derivative contracts is of short duration, with contracts being predominantly seasonal in nature. In order to economically hedge a portion of this portfolio, we may also purchase weather derivatives.

The total unrealized and realized gains (losses) recognized in earnings for derivatives not designated as hedges were as follows:

	Location of Gain (Loss) Recognized in Income on Derivative	Three months ended March 31,	
		2015	2014
Derivatives not designated as hedging instruments			
Relating to investment portfolio:			
Foreign exchange forward contracts	Net realized investment gains (losses)	\$6,537	\$(1,328)
Interest rate swaps	Net realized investment gains (losses)	(4,006)	(4,161)
Relating to underwriting portfolio:			
Foreign exchange forward contracts	Foreign exchange losses (gains)	(15,273)	12,074
Weather-related contracts	Other insurance related income	7,342	3,678
Total		\$(5,400)	\$10,263

Table of ContentsAXIS CAPITAL HOLDINGS LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

6. RESERVE FOR LOSSES AND LOSS EXPENSES

The following table presents a reconciliation of our beginning and ending gross reserve for losses and loss expenses and net reserve for unpaid losses and loss expenses for the periods indicated:

Three months ended March 31,	2015	2014
Gross reserve for losses and loss expenses, beginning of period	\$9,596,797	\$9,582,140
Less reinsurance recoverable on unpaid losses, beginning of period	(1,890,280)	(1,900,112)
Net reserve for unpaid losses and loss expenses, beginning of period	7,706,517	7,682,028
Net incurred losses and loss expenses related to:		
Current year	568,988	587,700
Prior years	(50,051)	(43,493)
	518,937	544,207
Net paid losses and loss expenses related to:		
Current year	(23,527)	(13,249)
Prior years	(485,315)	(444,466)
	(508,842)	(457,715)
Foreign exchange and other	(162,969)	14,501
Net reserve for unpaid losses and loss expenses, end of period	7,553,643	7,783,021
Reinsurance recoverable on unpaid losses, end of period	1,889,579	1,884,820
Gross reserve for losses and loss expenses, end of period	\$9,443,222	\$9,667,841

Prior year reserve development arises from changes to loss and loss expense estimates recognized in the current year but relating to losses incurred in previous calendar years. Such development is summarized by segment in the following table:

	Three months ended March 31,	
	2015	2014
Insurance	\$3,361	\$11,608
Reinsurance	46,690	31,885
Total	\$50,051	\$43,493

The majority of the net favorable prior year reserve development in each period related to short-tail lines of business. Net favorable prior year reserve development for professional and liability reinsurance lines in the three months ended March 31, 2015 and 2014, also contributed. The net favorable prior year development in the liability reinsurance lines in the three months ended March 31, 2015, was offset by net adverse development in the liability insurance lines.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

6. RESERVE FOR LOSSES AND LOSS EXPENSES (CONTINUED)

The underlying exposures in the property, marine and aviation reserving classes within our insurance segment and the property reserving class within our reinsurance segment largely relate to short-tail business. Development from these classes contributed \$28 million and \$29 million of the total net favorable prior year reserve development for the three months ended March 31, 2015 and 2014, respectively. The net favorable development for these classes primarily reflected the recognition of better than expected loss emergence.

Our medium-tail business consists primarily of professional insurance and reinsurance lines, credit and political risk insurance lines and credit and surety reinsurance business. Our professional lines reinsurance business contributed further net favorable prior year reserve development of \$20 million and \$6 million in the three months ended March 31, 2015, and 2014, respectively. This prior year reserve development was driven by increased weight being given to experience based actuarial methods in selecting our ultimate loss estimates for accident years 2010 and prior. As our loss experience has generally been better than expected, this resulted in the recognition of favorable development. In the three months ended March 31, 2015, we recorded adverse prior year reserve development of \$11 million in our insurance credit and political risk lines relating primarily to an increase in loss estimates for one specific claim.

Our liability lines reinsurance business contributed additional favorable development of \$12 million and \$6 million in the three months ended March 31, 2015, and 2014, respectively, primarily reflecting the greater weight management is giving to experience based indications and our experience which has been favorable for the 2005 through 2009 accident years.

In the three months ended March 31, 2015, we recorded adverse prior year reserve development of \$11 million in our insurance liability lines relating primarily to an increase in loss estimates for one specific claim.

The frequency and severity of natural catastrophe and weather activity was high in recent years and our March 31, 2015 net reserve for losses and loss expenses continues to include estimated amounts for numerous events. We caution that the magnitude and/or complexity of losses arising from certain of these events, in particular Storm Sandy, the Japanese earthquake and tsunami and the three New Zealand earthquakes, inherently increases the level of uncertainty and, therefore, the level of management judgment involved in arriving at our estimated net reserves for losses and loss expenses. As a result, our actual losses for these events may ultimately differ materially from our current estimates.

7. SHARE-BASED COMPENSATION

For the three months ended March 31, 2015, we incurred share-based compensation costs of \$19 million (2014: \$17 million) and recorded associated tax benefits of \$4 million (2014: \$3 million).

The fair value of shares vested during the three months ended March 31, 2015 was \$63 million (2014: \$61 million). At March 31, 2015 there were \$148 million of unrecognized share-based compensation costs, which are expected to be recognized over the weighted average period of 2.6 years.

Awards to settle in shares

The following table provides a reconciliation of the beginning and ending balance of nonvested restricted stock (including restricted stock units) for the three months ended March 31, 2015:

	Performance-based Stock Awards		Service-based Stock Awards	
	Number of Restricted Stock	Weighted Average Grant Date Fair Value	Number of Restricted Stock	Weighted Average Grant Date Fair Value
Nonvested restricted stock - beginning of period	347	\$ 37.34	2,768	\$ 38.70
Granted	60	51.31	511	51.31
Vested	—	—	(984) 36.42
Forfeited	—	—	(17) 41.28
Nonvested restricted stock - end of period	407	\$ 39.39	2,278	\$ 42.49

Cash-settled awards

During 2015 we also granted 486,508 restricted stock units that will settle in cash rather than shares when the awards ultimately vest; of which 18,659 restricted stock units are performance based and 467,849 restricted stock units are service based. At March 31, 2015, the corresponding liability for cash-settled units, included in other liabilities on the Consolidated Balance Sheet, was \$13 million (2014: \$5 million).

Average price per share ⁽¹⁾	\$50.95	\$44.27

(1) Calculated using whole figures.

10. NONCONTROLLING INTERESTS

During November 2013, the Company formed AXIS Ventures Reinsurance Limited ("Ventures Re"), a Bermuda domiciled insurer. Ventures Re was formed to write reinsurance on a fully collateralized basis.

During the first quarter of 2015, Ventures Re repurchased \$40 million of Class A non-voting redeemable preferred shares. Additionally, during the first quarter of 2015, third party investors purchased \$57 million of Class C non-voting redeemable preferred share capital issued by Ventures Re. The Ventures Re Class C preferred shares are redeemable at the sole discretion of Ventures Re's Board of Directors.

Ventures Re is considered to be a variable interest entity. The Company has concluded that it is the primary beneficiary of Ventures Re as it has the power to direct, and has more than an insignificant economic interest in, the activities of this entity. Following this determination, Ventures Re was consolidated by the Company. Shareholders' equity attributable to Ventures Re's third party investors is recorded in the Consolidated Financial Statements as noncontrolling interests.

At March 31, 2015, total assets of Ventures Re were \$120 million (2014: \$97 million), consisting primarily of cash and cash equivalents and insurance receivables. Total liabilities were \$50 million (2014: \$38 million) consisting primarily of loss reserves and unearned premium. The assets of Ventures Re can only be used to settle its own liabilities, and there is no recourse to the Company for any liabilities incurred by this entity.

The reconciliation of the beginning and ending balances of the noncontrolling interests in Ventures Re for the periods indicated below was as follows:

Three months ended March 31,	2015	2014
Balance at beginning of period	\$58,819	\$50,000
Increase from issuance of preferred equity to noncontrolling interests	56,991	—
Decrease from return of capital to noncontrolling interests	(40,000) —
Amounts attributable to (from) noncontrolling interests	(4,873) 1,222
Foreign currency translation adjustment attributable to (from) noncontrolling interests	(1,865) —
Balance at end of period	\$69,072	\$51,222

11. DEBT AND FINANCING ARRANGEMENTS

On March 31, 2015, the Company entered into an amendment to reduce the maximum aggregate utilization capacity of our secured letter of credit facility with Citibank Europe plc (the "LOC Facility") from \$750 million to \$500 million. All other material terms and conditions remained unchanged. At March 31, 2015, letters of credit outstanding under the LOC Facility totaled \$354 million.

12. COMMITMENTS AND CONTINGENCIES

Reinsurance Agreements

We purchase reinsurance coverage for various lines of our business. The minimum reinsurance premiums are contractually due in advance on a quarterly basis. Accordingly at March 31, 2015, we have outstanding reinsurance purchase commitments of \$72 million, of which \$64 million is due in 2015 while the remaining \$8 million is due in 2016. Actual payments under the reinsurance contracts will depend on the underlying subject premium and may exceed the minimum premium.

Amalgamation Agreement

On January 25, 2015, the Company entered into an Agreement and Plan of Amalgamation (the "Amalgamation Agreement") with PartnerRe Ltd. , a Bermuda exempted company ("PartnerRe"), which agreement was thereafter amended on February 17, 2015, March 10, 2015, and March 31, 2015, and pursuant to which the Company would amalgamate with PartnerRe (the "Amalgamation"), and the two companies would continue as a single Bermuda exempted company. On May 3, 2015, the Company and PartnerRe further amended the Amalgamation Agreement (the "Amendment to the Amalgamation Agreement") to allow PartnerRe to pay a one-time special dividend of \$11.50 per share to PartnerRe's common shareholders in connection with the closing of the Amalgamation.

In accordance with the terms of the Amalgamation Agreement and the Amendment to the Amalgamation Agreement, the Company would be obligated to pay PartnerRe a no approval fee of \$55 million if the Company's shareholders do not approve the transaction. If the Amalgamation Agreement is terminated for certain other reasons described in the Amalgamation Agreement or if in certain circumstances the Company enters into a similar transaction with a third party in the 12 months following termination of the Amalgamation Agreement, the Company would be obligated to pay PartnerRe an aggregate termination fee of \$280 million (less any no approval fee already paid). In all such cases, the Company would be obligated to reimburse PartnerRe for costs and expenses incurred in connection with the Amalgamation Agreement and the transactions contemplated thereby in an amount not to exceed \$35 million. In relation to the proposed Amalgamation, the Company has entered into an agreement with a financial advisor that will require the Company to make a payment of \$20 million in the event that the amalgamation transaction with PartnerRe is successfully consummated.

Employment Agreements

Following the signing of the Amalgamation Agreement, the Company has entered into additional agreements with certain employees. These agreements provide for the payment of a special cash retention award, which is payable in addition to normal annual

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

12. COMMITMENTS AND CONTINGENCIES (CONTINUED)

compensation amounts, with the award payment being dependent on the employee maintaining an active employee status through a pre-determined future date and fulfilling certain conduct and performance-related conditions. The additional award payments are only payable in relation to, and are dependent on, the successful closing of the current amalgamation with PartnerRe.

Investments

At March 31, 2015 we have a \$50 million commitment to purchase Commercial Mortgage Loans.

Refer 'Note 3 - Investments' for information on commitments related to our other investments.

	OTTI losses	(17,568)) (786)
	Total before tax	(45,098)) 16,069
	Income tax expense	(6)) (6,456)
	Net of tax	\$(45,104)) \$9,613

(1) Amounts in parentheses are debits to net income available to common shareholders.

14. SUBSEQUENT EVENTS

Acquisition of Ternian

On April 1, 2015, the Company announced that it completed the acquisition of Ternian Insurance Group LLC, a leading provider of voluntary, limited benefit, affordable health plans and other employee benefits coverage for hourly and part-time workers and their families. The Company recognized intangible assets of \$13 million associated with

this acquisition.

Amendments to the Amalgamation Agreement

On April 14, 2015, PartnerRe announced the receipt of an unsolicited proposal from a third party to acquire all of its outstanding common shares for \$130.00 per share in cash.

On May 3, 2015, the Company and PartnerRe amended the Amalgamation Agreement to allow PartnerRe to pay a one-time special dividend of \$11.50 per share to PartnerRe's common shareholders in connection with the closing of the Amalgamation and to increase the termination fee from \$250 million to \$280 million.

EXECUTIVE SUMMARY

Business Overview

We are a Bermuda-based global provider of specialty lines insurance and treaty reinsurance products with operations in Bermuda, the United States, Europe, Singapore, Canada, Australia and Latin America. Our underwriting operations are organized around our two global underwriting platforms, AXIS Insurance and AXIS Re.

Our mission is to provide our clients and distribution partners with a broad range of risk transfer products and services and meaningful capacity, backed by significant financial strength. We manage our portfolio holistically, aiming to construct the optimum consolidated portfolio of funded and unfunded risks, consistent with our risk appetite and development of our franchise. We nurture an ethical, entrepreneurial and disciplined culture that promotes outstanding client service, intelligent risk taking and the achievement of superior risk-adjusted returns for our shareholders. We believe that the achievement of our objectives will position us as a leading global, diversified specialty insurance and reinsurance company, as measured by quality, sustainability and profitability. Our execution on this strategy in the first three months of 2015 included:

- continued rebalancing of our portfolio towards less-volatile lines of business that carry attractive rates;

- increased use of available reinsurance and retrocessional protection to optimize the risk-adjusted returns on our portfolio;

- continued expansion of our third-party capital capabilities through AXIS Ventures Reinsurance Limited which was launched to manage capital for investors interested in deploying funds directly into the property-catastrophe and related short-tail business;

- growth of our Weather and Commodity Markets business unit which offers parametric risk management solutions to clients whose profit margins are exposed to adverse weather and commodity price risks;

- growth of our new syndicate at Lloyd's which provides us with access to Lloyd's worldwide licenses and an extensive distribution network; and

- continued growth of our accident and health line, which launched in 2010 and is focused on specialty accident and health products.

On January 25, 2015, the Company entered into an Agreement and Plan of Amalgamation (the "Amalgamation Agreement") with PartnerRe Ltd., a Bermuda exempted company ("PartnerRe"), pursuant to which the Company would amalgamate with PartnerRe (the "Amalgamation"), and the two companies would continue as a single Bermuda exempted company (the "Amalgamated Company"). PartnerRe, through its principal operating subsidiaries, provides reinsurance and certain specialty insurance lines on a worldwide basis. The transaction, which is structured as a merger of equals, has been unanimously approved by the Boards of Directors of both companies. Under the terms of the Amalgamation Agreement, the Company's shareholders would receive 1 share of the Amalgamated Company's common shares for each share of the Company's common shares they own and PartnerRe's shareholders would receive 2.18 shares of the Amalgamated Company's common shares for each share of PartnerRe's common shares they own.

Upon completion of the transaction, shareholders of the Company and shareholders of PartnerRe would own approximately 48.5% and 51.5% of the Amalgamated Company, respectively. The transaction is expected to close in the second half of 2015, subject to approval by the shareholders of both companies, regulatory clearance and customary closing conditions. On March 25, 2015, the Company and PartnerRe jointly announced that they have received early termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 with respect to the Amalgamation Agreement. The expiration of the waiting period satisfies one of the conditions to complete the transaction. For full details of the Amalgamation Agreement refer to the Form S-4 filed with the Securities and Exchange Commission on March 16, 2015.

On May 3, 2015, the Company and PartnerRe amended the Amalgamation Agreement to allow PartnerRe to pay a one-time special dividend of \$11.50 per share to PartnerRe's common shareholders in connection with the closing of the Amalgamation and to increase the termination fee. Refer to Item 1, Note 12 and Note 14 to the Consolidated Financial Statements for additional information relating to the Amalgamation.

Table of Contents

On April 1, 2015, the Company announced that it completed the acquisition of Ternian Insurance Group LLC, a leading provider of voluntary, limited benefit, affordable health plans and other employee benefits coverage for hourly and part-time workers and their families.

Underwriting Results

Total underwriting income in the three months ended March 31, 2015 was \$96 million, a decrease of \$13 million compared to \$109 million in the three months ended March 31, 2014. The decrease in underwriting income was primarily driven by an increase in the current accident year loss ratio, general and administrative expenses and the acquisition cost ratio, partially offset by increases in net favorable prior year reserve development and other insurance related income. The current accident year loss ratio increased due to changes in our business mix and an increase in mid-size losses in our insurance segment which was partially offset by improvements in our insurance professional lines. The increase in our general and administrative expenses was driven by expenses associated with the amalgamation with PartnerRe and costs associated with our operational excellence initiatives. The operational excellence initiatives are aimed at improving the effectiveness and efficiency of our operations and are expected to result in a reduction of expenses in future periods. The increase in acquisition cost ratio was related to increased costs in our reinsurance segment discussed below. Partially offsetting these decreases was a \$7 million increase in net favorable prior year reserve development and an increase in other insurance related income in our reinsurance segment.

The insurance segment underwriting income decreased by \$7 million in the three months ended March 31, 2015, compared to the three months ended March 31, 2014. The reduction was primarily due to an \$8 million decrease in net favorable prior year reserve development.

The reinsurance segment underwriting income decreased by \$6 million in the three months ended March 31, 2015, compared to the three months ended March 31, 2014. The decrease in underwriting income was primarily driven by

an increase in the current accident year loss ratio, acquisition costs and general and administrative expenses, partially offset by increases in net favorable prior year reserve development and other insurance related income. The current accident year loss ratio increased due to changes in our business mix. The increase in acquisition costs was related to adjustments for loss-sensitive features in our reinsurance contracts, primarily due to prior year loss reserve releases, higher costs paid in certain lines of business and changes in the business mix. The increase in our general and administrative expenses was driven by an adjustment for prior year performance incentive compensation. Partially offsetting these decreases was a \$15 million increase in net favorable prior year reserve development and an increase in other insurance related income primarily reflecting the net results of our weather and commodity business.

Table of Contents

Net Investment Income

Net investment income was \$92 million for the three months ended March 31, 2015, an increase of \$9 million from \$83 million for the three months ended March 31, 2014. The increase was primarily due to higher net investment income from our other investments as a result of an increase in income from hedge funds. Income from hedge funds is impacted by the performance of the global equity markets, with hedge fund managers benefiting from the volatility in the global equity markets during the first quarter of 2015.

Net Realized Investment Gains (Losses)

Our realized investment losses in the three months ended March 31, 2015, were \$43 million compared to realized investment gains of \$11 million during the same period of 2014. We realized \$27 million of investment losses on sales related to fixed maturity reallocations during the three months ended March 31, 2015, compared to insignificant investment gains during the three months ended March 31, 2014. The net losses during the current quarter primarily reflect foreign currency losses on non-U.S. denominated securities as a result of the strengthening of the U.S. dollar. In addition, during the three months ended March 31, 2015, we realized insignificant losses on sales of equity securities, compared to net realized gains of \$17 million during the first quarter of 2014, which reflected gains taken as a result of the strong performance of the global equity markets during the second half of 2013.

Other-than-temporary impairment (“OTTI”) charges were \$18 million during the three months ended March 31, 2015, compared to \$1 million for the first quarter of 2014. The increase in OTTI during 2015 was driven by impairments of high yield corporate debt securities which were downgraded and impairments recorded on non-U.S. denominated securities as a result of the decline in foreign exchange rates against the U.S. dollar, and related to securities that are due to mature in the near future.

Other Revenues (Expenses), Net

Significant depreciation of the euro and Sterling against the U.S. dollar resulted in foreign exchange gains of \$63 million in the three months ended March 31, 2015, and primarily reflected the remeasurement of our foreign-denominated net insurance-related liabilities. Conversely, appreciation of the Australian dollar and Sterling against the U.S. dollar were the primary driver of the foreign exchange loss of \$4 million in the three months ended March 31, 2014. Excluding these foreign exchange-related amounts, net other expenses were \$48 million and \$49 million in the three months ended March 31, 2015, and 2014, respectively.

Corporate expenses increased from \$29 million in the three months ended March 31, 2014, to \$36 million in the three months ended March 31, 2015. The \$7 million increase was driven by expenses associated with the amalgamation with PartnerRe and operational excellence initiative costs, partially offset by increased allocations to segment underwriting-related general and administrative expenses reflecting adjustments for prior year performance incentive compensation. The financial performance in the three months ended March 31, 2015, resulted in a tax benefit of \$1 million compared to a tax expense of \$4 million in the three months ended March 31, 2014, due primarily to the geographic distribution of net income between different tax jurisdictions.

A \$4 million decrease in interest expense and financing costs primarily reflects the repayment of the \$500 million 5.75% senior unsecured notes which were due on December 1, 2014.

Amounts Attributable (to) from Noncontrolling Interests

Amounts attributable (to) from noncontrolling interests related to amounts for the three months ended March 31, 2015, and 2014, attributable (to) from the third party investors in Ventures Re. Refer Item 1, Note 10 to our Consolidated Financial Statements for additional information.

Outlook

Insurance markets have seen a general leveling off in pricing improvements noted in recent periods, with price declines observed in certain property and specialty lines driven by increased competition. Despite this, there remain good fundamentals and attractive opportunities for profitable growth in many insurance lines of business. Casualty lines in the United States continue to be well-priced with opportunities for growth also noted in certain professional, property and marine lines. Our business production emphasizes our continued focus in targeting those areas that provide the most attractive risk-adjusted returns.

In the reinsurance markets, the trading environment remains very competitive, with pressures impacting all lines of business. Excess capacity including continued capital in-flows from alternative capital investors, strong balance sheets of established market participants, and a consolidation of buying continue to pressure reinsurance pricing across most territories and lines of business, with

Table of Contents

softening in terms and conditions also observed. Non-standard market solutions such as multi-year commitments continue to be in demand, broadly impacting all lines of business. We have noted an increase in customer preference for dealing with reduced reinsurance panels that have the breadth and depth to provide meaningful, multi-faceted relationships backed by financial strength. We believe that this trend benefits AXIS given our strong capital position, broad multi-line product offerings, and global presence.

Financial Measures

We believe the following financial indicators are important in evaluating our performance and measuring the overall growth in value generated for our common shareholders:

	Three months ended and at			
	March 31,		2014	
	2015		2014	
ROACE (annualized) ⁽¹⁾	11.8	%	10.6	%
Operating ROACE (annualized) ⁽²⁾	10.3	%	10.6	%
DBV per common share ⁽³⁾	\$51.97		\$47.13	
Cash dividends declared per common share	\$0.29		\$0.27	
Increase in diluted book value per common share adjusted for dividends	\$1.63		\$1.60	

Return on average common equity (“ROACE”) is calculated by dividing annualized net income available to common (1)shareholders for the period by the average shareholders’ equity determined by using the common shareholders’ equity balances at the beginning and end of the period.

Operating ROACE is calculated by dividing annualized operating income for the period by the average common shareholders’ equity determined by using the common shareholders’ equity balances at the beginning and end of the (2)period. Annualized operating ROACE is a non-GAAP financial measure as defined in SEC Regulation G. Refer ‘Non-GAAP Financial Measures’ for additional information and reconciliation to the nearest GAAP financial measure (ROACE).

Diluted book value (“DBV”) per common share represents total common shareholders’ equity divided by the number (3)of common shares and diluted common share equivalents outstanding, determined using the treasury stock method.

Cash settled awards are excluded from the denominator.

Return on Equity

The increase in ROACE in the three months ended March 31, 2015, compared to the three months ended March 31, 2014, was primarily driven by the foreign exchange gains for the three months ended March 31, 2015, compared to foreign exchange losses for the three months ended March 31, 2014, and an increase in net investment income. These increases were partially offset by net realized losses for the three months ended March 31, 2015, compared to gains for the three months ended March 31, 2014, as well as a decrease in underwriting income. Operating ROACE excludes the impact of net realized investment gains (losses) and foreign exchange gains (losses). Operating ROACE in the three months ended March 31, 2015, was comparable to the three months ended March 31, 2014.

Diluted Book Value per Common Share

Our DBV per common share increase of 10% from \$47.13 at March 31, 2014, to \$51.97 at March 31, 2015, primarily reflected the generation of \$789 million in net income available to common shareholders over the past twelve months. This increase was partially offset by the decrease over the last twelve months in unrealized gains on investments which are included in accumulated other comprehensive income, primarily reflecting the impact of the strengthening of the U.S. dollar and widening of credit spreads, and common dividends declared.

Diluted Book Value per Common Share Adjusted for Dividends

Taken together, we believe that growth in diluted book value per common share and common share dividends declared represent the total value created for our common shareholders. As companies in the insurance industry have differing dividend payout policies, we believe that the investors use the DBV per common share adjusted for dividends metric to measure comparable performance across the industry.

During the three months ended March 31, 2015, and 2014, the total value created consisted primarily of our diluted net income per share of \$1.54 and \$1.24, respectively, increases in the unrealized gains on investments and dividends declared. During the three months ended March 31, 2015, these increases were partially offset by foreign exchange losses included in the cumulative foreign currency translation adjustments.

Table of Contents

UNDERWRITING RESULTS – GROUP

The following table provides our group underwriting results for the periods indicated. Underwriting income is a pre-tax measure of underwriting profitability that takes into account net premiums earned and other insurance related income as revenues and net losses and loss expenses, acquisition costs and underwriting-related general and administrative costs as expenses.

	Three months ended March 31,		
	2015	% Change	2014
Revenues:			
Gross premiums written	\$ 1,678,932	(8%)	\$ 1,821,399
Net premiums written	1,463,552	(12%)	1,664,584
Net premiums earned	906,222	(4%)	945,949
Other insurance related income	7,676	149%	3,082
Expenses:			
Current year net losses and loss expenses	(568,988)		(587,700)
Prior year reserve development	50,051		43,493
Acquisition costs	(171,702)		(172,036)
Underwriting-related general and administrative expenses ⁽¹⁾	(127,345)		(124,022)
Underwriting income ⁽²⁾⁽³⁾	\$ 95,914	(12%)	\$ 108,766
General and administrative expenses ⁽¹⁾	\$ 163,517		\$ 152,729
Income before income taxes ⁽²⁾	\$ 160,262		\$ 152,596

Underwriting-related general and administrative expenses is a non-GAAP measure as defined in SEC Regulation G. Our total general and administrative expenses also included corporate expenses of \$36,172 and \$28,707 for the (1)three months ended March 31, 2015 and 2014, respectively; refer to 'Other Expenses (Revenues), Net' for additional information related to these corporate expenses. Also, refer to 'Non-GAAP Financial Measures' for further information.

Group (or consolidated) underwriting income is a non-GAAP financial measure as defined in SEC Regulation G. Refer to Item 1, Note 2 to the Consolidated Financial Statements for a reconciliation of consolidated underwriting (2)income to the nearest GAAP financial measure (income before income taxes) for the periods indicated above.

Refer to 'Non-GAAP Financial Measures' for additional information related to the presentation of consolidated underwriting income.

(3)AXIS Capital cedes certain of its reinsurance business to AXIS Ventures Reinsurance Limited ("Ventures Re"), the Company's third-party capital vehicle, on a fully collateralized basis. The collateral has been provided by third party investors. Ventures Re is a variable interest entity and AXIS Capital has been determined to be its primary

beneficiary. Following this determination Ventures Re is consolidated in the Consolidated Financial Statements of AXIS Capital and the net impact of the cessions has been included in amounts attributable to (from) noncontrolling interests. For the three months ended March 31, 2015 and 2014 amounts attributable to (from) noncontrolling interests were \$(4,873) and \$1,222 respectively. Refer to Item 1, Note 10 to the Consolidated Financial Statements for more information.

UNDERWRITING REVENUES

Premiums Written:

Gross and net premiums written, by segment, were as follows:

Gross Premiums Written
Three months ended March 31,
2015 % Change 2014

Insurance	\$602,724	—%	\$601,721
Reinsurance	1,076,208	(12%)	1,219,678
Total	\$1,678,932	(8%)	\$1,821,399

% ceded

Insurance	28%	4 pts	24%
Reinsurance	5%	4 pts	1%
Total	13%	4 pts	9%

Net Premiums Written
Three months ended March 31,
2015 % Change 2014

Insurance	\$436,740	(4%)	\$456,692
Reinsurance	1,026,812	(15%)	1,207,892
Total	\$1,463,552	(12%)	\$1,664,584

Gross premiums written in the three months ended March 31, 2015, decreased by \$142 million or 8% compared to the three months ended March 31, 2014, with the decrease significantly impacted by foreign exchange movements. After adjusting for the foreign exchange impact of \$71 million, the decrease in gross premiums written on a constant currency basis was 4%, and was impacted by a decrease in our reinsurance segment.

The decrease in our reinsurance segment in the three months ended March 31, 2015, compared to the same period of 2014 was primarily driven by the impact of treaties written on a multi-year basis and the foreign exchange movements. Treaties written on a multi-year basis increased prior year premiums written and reduced premiums available for renewal during the current quarter, most notably in the property and catastrophe lines. During the first quarter of 2015, the reinsurance segment reported a decrease in the level of multi-year contracts written, with the premium related to future underwriting years primarily benefiting our motor lines of business. In addition to the impact of multi-year treaties, the strength of the U.S. dollar drove comparative premium decreases in the treaties denominated in foreign currencies. This primarily impacted our motor, credit and surety, property and catastrophe lines.

The insurance segment was comparable period over period with offsetting variances across a number of lines of business. Increases in our liability, aviation and marine lines were offset by decreases in our property and credit and political risk lines.

In the three months ended March 31, 2015, the ceded gross written premium ratio has increased by 4% compared to the quarter ended March 31, 2014, with increases reported in both segments. The increase in the insurance segment related to increased reinsurance protection purchased primarily in our property and professional lines of business and changes in the business mix. The increase in the reinsurance segment related to several new retrocessional treaties covering primarily catastrophe business.

Table of Contents

Net Premiums Earned:

Net premiums earned by segment were as follows:

	Three months ended March 31,					
	2015		2014		% Change	
Insurance	\$447,467	49 %	\$449,214	47 %	—%	
Reinsurance	458,755	51 %	496,735	53 %	(8%)	
Total	\$906,222	100 %	\$945,949	100 %	(4%)	

Changes in net premiums earned reflect period to period changes in net premiums written and business mix, together with normal variability in premium earning patterns.

Net premiums earned decreased by 4% (3% on a constant currency basis), in the three months ended March 31, 2015, compared to the same period in 2014. A combination of reductions in written premiums in the reinsurance segment during recent periods along with an increase in premiums ceded across the group drove this decrease.

Reductions in the business written in the professional, catastrophe and agriculture lines in recent periods, partially offset by increases in our motor lines, as well as retrocessional covers purchased primarily in the catastrophe lines, drove the decrease in the reinsurance segment .

The net premiums earned in the insurance segment were comparable period over period with increases in our ceded reinsurance programs and decreases in business written in our property and professional lines in recent periods offset by growth in premiums written in recent periods in our marine and liability lines of business.

UNDERWRITING EXPENSES

The following table provides a breakdown of our combined ratio:

	Three months ended March 31,				
	2015	% Point Change		2014	
Current accident year loss ratio	62.8	%	0.7	62.1	%
Prior year reserve development	(5.5	%)	(0.9)	(4.6	%)
Acquisition cost ratio	18.9	%	0.7	18.2	%
General and administrative expense ratio ⁽¹⁾	18.1	%	1.9	16.2	%
Combined ratio	94.3	%	2.4	91.9	%

The general and administrative expense ratio includes corporate expenses not allocated to reportable segments of (1)4.0% and 3.0% for the three months ended March 31, 2015 and 2014, respectively. These costs are further discussed in the 'Other Expenses, Net' section.

Current Accident Year Loss Ratio

The current accident year loss ratio increased to 62.8% in the three months ended March 31, 2015, from 62.1% in the three months ended March 31, 2014. Both periods experienced low levels of natural catastrophe and weather-related pre-tax net losses. During the three months ended March 31, 2015, we incurred \$8 million in natural catastrophe and weather-related losses compared to \$14 million incurred in the three months ended March 31, 2014. After adjusting for the impact of the natural catastrophe and weather-related losses, our current accident year loss ratio in the three months ended March 31, 2015, was 61.9% compared to 60.6% in the same period of 2014. The increase was primarily due to changes in business mix in our reinsurance segment and an increase in mid-size loss experience in our insurance segment which was partially offset by improvements in our insurance professional lines.

Table of Contents

Prior Year Reserve Development

Our favorable prior year reserve development was the net result of several underlying reserve developments on prior accident years, identified during our quarterly reserve review process. The following table provides a breakdown of prior year reserve development by segment:

	Three months ended March 31,	
	2015	2014
Insurance	\$3,361	\$11,608
Reinsurance	46,690	31,885
Total	\$50,051	\$43,493

Overview

The majority of the net favorable prior year reserve development in each period related to short-tail lines of business. Net favorable prior year reserve development for professional and liability reinsurance lines in the three months ended March 31, 2015 and 2014, also contributed. The net favorable prior year development in the liability reinsurance lines in the three months ended March 31, 2015, was offset by net adverse development in the liability insurance lines.

The underlying exposures in the property, marine and aviation reserving classes within our insurance segment and the property reserving class within our reinsurance segment largely relate to short-tail business. Development from these classes contributed \$28 million and \$29 million of the total net favorable prior year reserve development in the three months ended March 31, 2015 and 2014, respectively. The net favorable development for these classes primarily reflected the recognition of better than expected loss emergence.

Our medium-tail business consists primarily of professional insurance and reinsurance lines, credit and political risk insurance lines and credit and surety reinsurance business. Our professional lines reinsurance business contributed further net favorable prior year reserve development of \$20 million and \$6 million in the three months ended March 31, 2015, and 2014, respectively. This prior year reserve development was driven by increased weight being given to experience based actuarial methods in selecting our ultimate loss estimates for accident years 2010 and prior. As our loss experience has generally been better than expected, this resulted in the recognition of favorable development. In the three months ended March 31, 2015, we recorded adverse prior year reserve development of \$11 million in our insurance credit and political risk lines relating primarily to an increase in loss estimates for one specific claim.

Our liability lines reinsurance business contributed additional favorable development of \$12 million and \$6 million in the three months ended March 31, 2015, and 2014, respectively, primarily reflecting the greater weight management is giving to experience based indications and our experience which has been favorable for the 2005 through 2009 accident years.

In the three months ended March 31, 2015, we recorded adverse prior year reserve development of \$11 million in our insurance liability lines relating primarily to an increase in loss estimates for one specific claim.

We caution that conditions and trends that impacted the development of our liabilities in the past may not necessarily occur in the future.

Estimates of Natural Catastrophe and Weather Related-Losses

The frequency and severity of natural catastrophe and weather activity was high in recent years and our March 31, 2015 net reserve for losses and loss expenses continues to include estimated amounts for numerous events. We caution that the magnitude and/or complexity of losses arising from certain of these events, in particular Storm Sandy, the Japanese earthquake and tsunami and the three New Zealand earthquakes, inherently increases the level of uncertainty and, therefore, the level of management judgment involved in arriving at our estimated net reserves for losses and loss expenses. As a result, our actual losses for these events may ultimately differ materially from our current estimates.

Table of Contents

Our estimated net losses for natural catastrophe and weather events are derived from ground-up assessments of our in-force contracts and treaties providing coverage in the affected regions. These assessments take into account the latest information available from clients, brokers and loss adjusters. In addition, we consider industry insured loss estimates, market share analyses and catastrophe modeling analyses, when appropriate. Our estimates remain subject to change, as additional loss data becomes available.

The following sections provide further details on prior year reserve development by segment, reserving class and accident year.

Insurance Segment:

	Three months ended March 31,	
	2015	2014
Property and other	\$16,523	\$1,460
Marine	8,810	2,701
Aviation	242	3,084
Credit and political risk	(11,100) 3,999
Professional lines	(80) (343
Liability	(11,034) 707
Total	\$3,361	\$11,608

In the three months ended March 31, 2015, we recognized \$3 million of net favorable prior year reserve development, the principal components of which were:

\$17 million of net favorable prior year reserve development on property and other business, primarily related to the 2013 accident year and driven by better than expected loss emergence.

- \$9 million of net favorable prior year reserve development on marine business, largely related to better than expected loss emergence in our energy offshore business on accident years 2011 through 2014.

\$11 million of net adverse prior year reserve development on credit and political risk business, related to updated information on one specific claim impacting accident year 2014.

\$11 million of net adverse prior year reserve development on liability business, related to strengthening one specific claim impacting accident year 2009.

In the three months ended March 31, 2014, we recognized \$12 million of net favorable prior year reserve development, the principal components of which were:

\$4 million of net favorable prior year reserve development on credit and political risk business, primarily related to better than expected experience on the 2012 accident year.

\$3 million of net favorable prior year reserve development on aviation business, primarily related to better than expected experience on 2007 and prior accident years.

•

\$3 million of net favorable prior year reserve development on marine business, driven by better than expected loss emergence on 2012 and prior accident years and partially offset by adverse development on the 2013 accident year due to updated information on one particular claim.

Table of Contents

Reinsurance Segment:

	Three months ended March 31,	
	2015	2014
Property and other	\$2,362	\$21,420
Credit and surety	4,956	(790)
Professional lines	20,419	5,679
Motor	7,021	(444)
Liability	11,932	6,020
Total	\$46,690	\$31,885

In the three months ended March 31, 2015, we recognized \$47 million of net favorable prior year reserve development, the principal components of which were:

\$20 million of net favorable prior year reserve development on professional lines business, primarily related to the 2004 through 2010 accident years, for reasons discussed in the overview.

\$12 million of net favorable prior year reserve development on liability business, primarily related to the 2005 through 2009 accident years, for reasons discussed in the overview.

\$7 million of net favorable prior year reserve development on motor business, largely related to proportional business in accident years 2012 through 2013, driven by better than expected loss emergence.

\$2 million of net favorable prior year reserve development on property and other business, spanning a number of accident years and driven by better than expected loss emergence. Included in this net development is \$22 million of adverse development on agriculture reserves relating to loss developments on the 2014 accident year driven by lower than expected crop yields reported for two specific treaties.

In the three months ended March 31, 2014, we recognized \$32 million of net favorable prior year reserve development, the principal components of which were:

\$21 million of net favorable prior year reserve development on property and other business, spanning a number of accident years and driven by better than expected loss emergence. Included in this net development is \$12 million of adverse development on agriculture reserves relating to loss developments on events occurring late in the 2013 accident year.

\$6 million of net favorable prior year reserve development on liability business for the reasons discussed in the overview.

\$6 million of net net favorable prior year reserve development on professional lines reinsurance business, primarily related to the 2005 through 2008 accident years, for reasons discussed in the overview.

Acquisition Cost Ratio: The acquisition cost ratio for the three months ended March 31, 2015, increased to 18.9% compared to 18.2% in the three months ended March 31, 2014 and was driven by the reinsurance segment. Variances in the accruals for loss-sensitive features, primarily due to prior year loss reserve releases, higher acquisition costs paid in certain lines of business and changes in the business mix drove the increase in the reinsurance segments'

acquisition cost ratio.

General and Administrative Expense Ratio: The general and administrative expense ratio for the three months ended March 31, 2015, increased to 18.1% from 16.2% in the three months ended March 31, 2014. The increase quarter over quarter was primarily driven by a decrease in net earned premiums, expenses relating to the amalgamation with PartnerRe of \$7 million and operational excellence initiatives costs. The operational excellence initiatives are aimed at improving the effectiveness and efficiency of our operations and are expected to result in a reduction of expenses in future periods.

Total	\$602,724	100 %	\$601,721	100 %	—%

Table of Contents

Gross premiums written in the three months ended March 31, 2015, were comparable to the same period in 2014 with offsetting variances across a number of lines of business. Liability lines increased reflecting continued growth in the U.S. primary and excess casualty markets. In our aviation lines, an increase in premium was driven primarily by the timing of certain renewals, while our marine lines benefited from new business. Offsetting these increases were premium reductions in property and credit and political risk lines. Property lines were impacted by non-renewals and rate decreases reflecting continuing competitive market conditions. The decrease in the credit and political risk lines was driven by a reduction in new business.

Premiums Ceded: In the three months ended March 31, 2015, premiums ceded were \$166 million, or 28% of gross premiums written, compared to \$145 million, or 24% of gross premiums written, in the same period of 2014. The increase in premium ceded between the two periods related to increased reinsurance protection purchased primarily in our marine, property and professional lines of business and changes in the business mix.

Net Premiums Earned:

The following table provides net premiums earned by line of business:

	Three months ended March 31,			2014		% Change
	2015					
Property	\$102,488	24 %	\$115,385	25 %	(11%)	
Marine	58,646	13 %	44,993	10 %	30%	
Terrorism	9,059	2 %	8,790	2 %	3%	
Aviation	10,540	2 %	9,908	2 %	6%	
Credit and Political Risk	15,654	3 %	15,935	4 %	(2%)	
Professional lines	151,134	34 %	155,979	35 %	(3%)	
Liability	41,320	9 %	35,056	8 %	18%	
Accident and Health	58,626	13 %	63,168	14 %	(7%)	
Total	\$447,467	100 %	\$449,214	100 %	—%	

Net premiums earned in the three months ended March 31, 2015, were comparable to the same period in 2014. Net premiums earned were impacted by the increases in our ceded reinsurance programs as well as decreases in our property and professional lines, primarily our D&O business written in the United States, in recent periods. These decreases were offset by growth in premiums written in recent periods, primarily in our marine and liability lines of business.

Loss Ratio:

The table below shows the components of our loss ratio:

	Three months ended March 31,			2014	
	2015	% Point Change			
Current accident year	64.6	% (0.2)	64.8	%	
Prior year reserve development	(0.7	%) 1.9	(2.6	%)	
Loss ratio	63.9	% 1.7	62.2	%	

Table of Contents

Current Accident Year Loss Ratio:

The current accident year loss ratio decreased modestly to 64.6% in the three months ended March 31, 2015, from 64.8% in the three months ended March 31, 2014. Both periods experienced low levels of natural catastrophe and weather-related losses. During the three months ended March 31, 2015, we incurred \$5 million in natural catastrophe and weather-related losses compared to \$6 million incurred in the three months ended March 31, 2014. After adjusting for the impact of the natural catastrophe and weather-related losses, our current accident year loss ratio in the three months ended March 31, 2015, was 63.5% compared to 63.4% in the same period of 2014. The slight increase in the current accident year loss ratio was impacted by an increase in mid-size loss experience in our marine lines which were offset by improvements in our professional lines.

Refer to the 'Prior Year Reserve Development' section for further details.

Acquisition Cost Ratio: The insurance segment's acquisition cost ratio in the three months ended March 31, 2015, was comparable to the same period in 2014.

General and Administrative Expense Ratio: The insurance segment's general and administrative expense ratio in the three months ended March 31, 2015, was comparable to the same period in 2014.

Motor	297,690	28 %	274,019	22 %	9%	
Liability	89,772	8 %	102,644	8 %	(13%)	
Agriculture	69,729	6 %	103,165	8 %	(32%)	
Engineering	38,059	4 %	36,510	3 %	4%	
Other	11,349	1 %	15,773	1 %	(28%)	
Total	\$1,076,208	100 %	\$1,219,678	100 %	(12%)	

Gross premiums written decreased by \$143 million in the three months ended March 31, 2015, compared to the same period in 2014. The decrease in the gross premiums written in the three months ended March 31, 2015, was primarily driven by two factors. The first quarter of 2014 included a number of treaties written on a multi-year basis which increased prior year premiums written and reduced premiums available for renewal during the current quarter, most notably in the property and catastrophe lines. During the first quarter of 2015, the segment reported a decrease in the level of multi-year contracts written, with the premium related to future underwriting years primarily benefiting our motor lines of business. On a comparative basis the impact of the multi-year premiums was a decrease in gross premiums written of \$67 million. In addition, the decrease in written premiums was significantly impacted by foreign exchange movements, where the strength of the U.S. dollar drove comparative premium decreases in the treaties denominated in foreign currencies, with a comparative decrease of \$60 million in gross premiums written primarily impacting our motor, credit and surety, property and catastrophe lines. After adjusting for the impact of the multi-year contracts and foreign exchange movements, our gross premiums written decreased by \$16 million, or 1%, with decreases in the agriculture, catastrophe and liability lines partially offset by growth in motor. The agriculture lines decreased due to non-renewals and timing differences. The catastrophe lines decreased due to treaty restructurings and non-renewals reflecting difficult market conditions. Liability lines decrease was driven by treaty restructurings and non-renewals. These decreases were partially offset by growth in the motor lines due to new business and favorable premium adjustments.

Premiums Ceded: In the three months ended March 31, 2015, premiums ceded were \$49 million, or 5% of gross premiums written, compared to \$12 million, or 1% of gross premiums written, in the same period of 2014. The increase in premium ceded between the two comparative periods related to several new retrocessional treaties covering primarily our catastrophe business.

Table of Contents

Net Premiums Earned:

The following table provides net premiums earned by line of business:

	Three months ended March 31,					
	2015		2014		% Change	
Catastrophe	\$62,649	14 %	\$84,717	17 %	(26%)	
Property	76,008	17 %	82,541	17 %	(8%)	
Professional lines	70,310	15 %	84,777	17 %	(17%)	
Credit and Surety	59,834	13 %	59,363	12 %	1%	
Motor	83,439	18 %	70,562	14 %	18%	
Liability	71,052	15 %	66,046	13 %	8%	
Agriculture	19,798	4 %	30,639	6 %	(35%)	
Engineering	11,900	3 %	13,351	3 %	(11%)	
Other	3,765	1 %	4,739	1 %	(21%)	
Total	\$458,755	100 %	\$496,735	100 %	(8%)	

Net premiums earned decreased by \$38 million or 8% in the three months ended March 31, 2015, compared to the same period in 2014. After adjusting for the impact of foreign exchange the decrease was \$31 million, or 6%, and was primarily driven by the reduction in the business written in the professional, agriculture and catastrophe lines in recent periods as well as an increase in the premiums ceded, reflecting retrocessional covers purchased primarily in the catastrophe lines. These decreases were partially offset by increases in the business written in our motor lines.

Other Insurance Related Income:

The increase in other insurance related income of \$5 million in the three months ended March 31, 2015, compared to the same period in 2014, primarily reflected an increase in the net results of our weather and commodity business.

Loss Ratio:

The table below shows the components of our loss ratio:

	Three months ended March 31,				
	2015	% Point Change		2014	
Current accident year	61.0	%	1.3	59.7	%
Prior year reserve development	(10.2	%)	(3.8)	(6.4	%)
Loss ratio	50.8	%	(2.5)	53.3	%

Current Accident Year Loss Ratio:

The current accident year loss ratio increased to 61.0% in the three months ended March 31, 2015, from 59.7% in the three months ended March 31, 2014. Both periods experienced low levels of natural catastrophe and weather-related losses. During the three months ended March 31, 2015, we incurred \$3 million in natural catastrophe and

weather-related losses compared to \$8 million incurred in the three months ended March 31, 2014. After adjusting for the impact of the natural catastrophe and weather-related losses, our current accident year loss ratio in the three months ended March 31, 2015, was 60.2% compared to 58.1% in the same period of 2014. The increase in the current accident year loss ratio was primarily due to changes in the business mix.

Refer 'Prior Year Reserve Development' for further details.

Table of Contents

Acquisition Cost Ratio: The reinsurance segment's acquisition cost ratio increased to 23.4% in the three months ended March 31, 2015, from 21.5% in the three months ended March 31, 2014, and was impacted by variances in the accruals for loss-sensitive features, primarily due to prior year loss reserve releases, higher acquisition costs paid in certain lines of business and changes in the business mix.

General and Administrative Expense Ratio: The reinsurance segment's general and administrative expense ratio increased to 8.6% in the three months ended March 31, 2015, from 7.3% in the three months ended March 31, 2014. The increase in the general and administrative expense ratio reflects an adjustment for prior-year performance incentive compensation and the impact of decreased net earned premiums.

OTHER EXPENSES (REVENUES), NET

The following table provides a breakdown of our other expenses (revenues), net:

	Three months ended March 31,	
	2015	% Change 2014
Corporate expenses	\$36,172	26%
Foreign exchange losses (gains)	(63,220)	nm
Interest expense and financing costs	12,257	(26%)
Income tax expense (benefit)	(690)	nm
Total	\$(15,481)	nm

nm – not meaningful

Corporate Expenses: Our corporate expenses include holding company costs necessary to support our worldwide insurance and reinsurance operations and costs associated with operating as a publicly-traded company. As a percentage of net premiums earned, corporate expenses were 4.0% and 3.0% for the three months ended March 31, 2015, and 2014, respectively. The increase in corporate expenses was primarily due to expenses relating to the amalgamation with PartnerRe Ltd. of \$7 million and costs related to our operational excellence initiatives which are aimed at improving the effectiveness and efficiency of our operations and are expected to result in a reduction of expenses in future periods. These increases were partially offset by increased allocations to segment underwriting-related general and administrative expenses reflecting adjustments for prior year performance incentive compensation.

Foreign Exchange Losses (Gains): Some of our business is written in currencies other than the U.S. dollar. The foreign exchange gains and losses for the periods presented were largely driven by the re-measurement of our net insurance related liabilities. The foreign exchange gains for the three months ended March 31, 2015, were primarily driven by depreciation of the euro and Sterling against the U.S. Dollar. Comparatively, for the three months ended March 31, 2014, appreciation of the Australian dollar and Sterling against the U.S. dollar was the primary driver of the quarterly loss.

Interest Expense and Financing Costs: Interest expense and financing costs primarily related to interest due on our senior notes and decreased compared to the same period of 2014, as a result of the repayment of the \$500 million of our 5.75% senior unsecured notes which became due on December 1, 2014.

Income Tax Expense (Benefit): Income tax expense (benefit) primarily results from income (loss) generated by our foreign operations in the United States and Europe. Our effective tax rate, which is calculated as income tax expense (benefit) divided by income before tax, was (0.4%) in the three months ended March 31, 2015, compared to 2.7% in the three months ended March 31, 2014. This effective rate can vary between periods depending on the distribution of net income amongst tax jurisdictions, as well as other factors. We generated consolidated pre-tax net income in the three months ended March 31, 2015; however, underwriting losses borne by our operations in the United States drove the recognition of an income tax benefit in the three months ended March 31, 2015.

Table of Contents

NET INVESTMENT INCOME AND NET REALIZED INVESTMENT GAINS (LOSSES)

Net Investment Income

The following table provides a breakdown of income earned from our cash and investment portfolio by major asset class:

	Three months ended March 31,			
	2015	% Change	2014	
Fixed maturities	\$66,101	(9%)	\$72,957	
Other investments	30,935	85%	16,760	
Equity securities	1,676	(27%)	2,286	
Cash and cash equivalents	1,102	28%	863	
Short-term investments	69	(68%)	214	
Gross investment income	99,883	7%	93,080	
Investment expense	(7,773)	(25%)	(10,336)	
Net investment income	\$92,110	11%	\$82,744	
Pre-tax yield: ⁽¹⁾				
Fixed maturities	2.2	%	2.5	%

⁽¹⁾ Pre-tax yield is annualized and calculated as net investment income divided by the average month-end amortized cost balances for the periods indicated.

Fixed Maturities

The decrease in year-to-date investment income from fixed maturities was primarily due to negative inflation adjustments on treasury inflation-protected securities and a decrease in pre-tax yields.

Other Investments

The following table provides a breakdown of total net investment income from other investments:

	Three months ended March 31,			
	2015		2014	
Hedge and direct lending funds	\$24,848		\$10,610	
CLO - Equities	6,087		6,150	
Total net investment income from other investments	\$30,935		\$16,760	
Pre-tax return on other investments ⁽¹⁾	3.3	%	1.7	%

⁽¹⁾ The pre-tax return on other investments is non-annualized and calculated by dividing total net investment income from other investments by the average month-end fair value balances held for the periods indicated.

The increase in the total net investment income from other investments compared to the same period of 2014 was primarily due to an increase in income from hedge funds. Income from hedge funds is impacted by the performance of the global equity markets, with hedge fund managers benefiting from the volatility in the global equity markets during the first quarter of 2015. This translated into higher valuations on our hedge funds.

Table of Contents

Net Realized Investment Gains (Losses)

The following table provides a breakdown of net realized investment gains (losses):

	Three months ended March 31,	
	2015	2014
On sale of investments:		
Fixed maturities and short-term investments	\$(27,430) \$66
Equity securities	(86) 16,829
	(27,516) 16,895
OTTI charges recognized in earnings	(17,568) (786
Change in fair value of investment derivatives	2,531	(5,489
Net realized investment gains (losses)	\$(42,553) \$10,620

On sale of investments

Generally, sales of individual securities occur when there are changes in the relative value, credit quality or duration of a particular issue. We may also sell to rebalance our investment portfolio in order to change exposure to particular asset classes or sectors. Net losses during the current quarter are primarily due to foreign exchange losses on non-U.S. denominated securities, as a result of the strengthening of the U.S. dollar.

OTTI charges

For the three months ended March 31, 2015, OTTI charges were driven by impairments on high yield corporate debt securities as a result of credit rating downgrades and losses recorded on non-U.S. denominated securities as a result of the decline in foreign exchange rates against the U.S. dollar, and related to securities that are due to mature in the near future.

Change in fair value of investment derivatives

From time to time, we may economically hedge the foreign exchange exposure of non-U.S. denominated securities by entering into foreign exchange forward contracts. During the current quarter, our foreign exchange hedges resulted in \$7 million of net gains which related primarily to securities denominated in the Australian dollar and Euro.

During 2013, we introduced the use of interest rate swaps to reduce duration risk of our fixed income portfolio. During the current quarter, we recorded \$4 million of net losses relating to our interest rate swaps.

Table of Contents

Total Return

The following table provides a breakdown of the total return on cash and investments for the period indicated:

	Three months ended March 31,			
	2015	2014		
Net investment income	\$92,110	\$82,744		
Net realized investments gains (losses)	(42,553) 10,620		
Change in net unrealized gains/losses	50,161	64,490		
Total	\$99,718	\$157,854		
Average cash and investments ⁽¹⁾	\$14,952,713	\$14,998,856		
Total return on average cash and investments, pre-tax:				
Inclusive of investment related foreign exchange movements	0.7	% 1.1		%
Exclusive of investment related foreign exchange movements	1.2	% 1.1		%

(1) The average cash and investments balance is calculated by taking the average of the month-end fair value balances held for the periods indicated.

CASH AND INVESTMENTS

The table below provides a breakdown of our cash and investments:

	March 31, 2015		December 31, 2014	
	Amortized Cost or Cost	Fair Value	Amortized Cost or Cost	Fair Value
Fixed maturities	\$12,012,633	\$12,012,894	\$12,185,973	\$12,129,273
Equities	572,317	601,329	531,648	567,707
Other investments	690,141	939,006	736,599	965,465
Short-term investments	38,373	38,373	107,534	107,534
Total investments	\$13,313,464	\$13,591,602	\$13,561,754	\$13,769,979
Cash and cash equivalents ⁽¹⁾	\$1,270,092	\$1,270,092	\$1,209,695	\$1,209,695

(1) Includes restricted cash and cash equivalents of \$273 million and \$288 million in 2015 and 2014, respectively.

The amortized cost/cost of our total investments decreased by \$248 million from December 31, 2014, due to the funding of financing and operating activities, an increased allocation to cash and cash equivalents and the impact of the strengthening of the US dollar on foreign currency denominated holdings. The \$178 million decrease in the fair value of our total investments was driven by the factors outlined above and was partially offset by an increase in the net unrealized gains (losses) during the year.

Table of Contents

The following provides a further analysis on our investment portfolio by asset classes:

Fixed Maturities

The following provides a breakdown of our investment in fixed maturities:

	March 31, 2015		December 31, 2014		
	Fair Value	% of Total	Fair Value	% of Total	
Fixed maturities:					
U.S. government and agency	\$ 1,494,157	12	% \$ 1,620,077	12	%
Non-U.S. government	873,097	7	% 1,033,543	9	%
Corporate debt	4,534,278	38	% 4,361,124	36	%
Agency RMBS	2,200,243	18	% 2,278,108	19	%
CMBS	1,131,323	9	% 1,096,888	9	%
Non-Agency RMBS	78,001	1	% 73,086	1	%
ABS	1,495,829	12	% 1,461,586	12	%
Municipals ⁽¹⁾	205,966	3	% 204,861	2	%
Total	\$ 12,012,894	100	% \$ 12,129,273	100	%
Credit ratings:					
U.S. government and agency	\$ 1,494,157	12	% \$ 1,620,077	12	%
AAA ⁽²⁾	4,429,669	37	% 4,720,852	39	%
AA	1,271,096	11	% 1,034,047	9	%
A	2,222,110	18	% 2,204,984	18	%
BBB	1,517,543	13	% 1,516,815	13	%
Below BBB ⁽³⁾	1,078,319	9	% 1,032,498	9	%
Total	\$ 12,012,894	100	% \$ 12,129,273	100	%

(1)Includes bonds issued by states, municipalities, and political subdivisions.

(2)Includes U.S. government-sponsored agency RMBS.

(3)Non-investment grade securities.

At March 31, 2015, our fixed maturities had a weighted average credit rating of AA- (2014: AA-) and an average duration of 3.0 years (2014: 3.0 years). The interest rate swap positions introduced in 2013, which reduced duration to 2.9 years at December 31, 2014, were closed during the current quarter. When incorporating short-term investments and cash and cash equivalents into the calculation (bringing the total to \$13.3 billion), the average credit rating would be AA- (2014: AA-) and duration (including interest rate swaps) would be 2.8 years (2014: 2.7 years).

During the quarter, net unrealized gains (losses) on fixed maturities moved from a net unrealized loss of \$57 million at December 31, 2014 to a net unrealized gain of less than \$1 million at March 31, 2015.

Equities

During the quarter, net unrealized gains on equities decreased from \$36 million at December 31, 2014 to \$29 million at March 31, 2015. The decline was due to the strengthening of the US dollar against our euro denominated equity holdings.

Table of Contents

Other Investments

The composition of our other investments portfolio is summarized as follows:

	March 31, 2015		December 31, 2014			
Hedge funds						
Long/short equity funds	\$242,096	26	%	\$298,907	31	%
Multi-strategy funds	336,342	36	%	324,020	34	%
Event-driven funds	189,212	20	%	185,899	19	%
Leveraged bank loan funds	9,616	1	%	9,713	1	%
Total hedge funds	777,266	83	%	818,539	85	%
Direct lending funds	69,682	7	%	54,438	6	%
Total hedge and direct lending funds	846,948	90	%	872,977	91	%
CLO - Equities	92,058	10	%	92,488	9	%
Total other investments	\$939,006	100	%	\$965,465	100	%

The \$41 million decrease in the fair value of our total hedge funds in 2015 was driven by \$65 million of net redemptions offset by \$24 million of price appreciation as our hedge funds benefited from the performance of the global equity and credit markets during the first quarter of 2015.

We have made total commitments of \$140 million to managers of direct lending funds. To date, \$68 million of our total commitment has been called. During 2013, we made a \$60 million commitment as a limited partner in a multi-strategy hedge fund, of which \$31 million has been called to date.

During 2015, we made a \$100 million commitment to a real estate fund, to date there has been no call on this commitment.

LIQUIDITY AND CAPITAL RESOURCES

Refer to the 'Liquidity and Capital Resources' section included under Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014 for a general discussion of our liquidity and capital resources. During the three months ended March 31, 2015, we:

- reduced the maximum aggregate utilization capacity of our letter of credit facility with Citibank Europe plc from \$750 million to \$500 million;
- following the Company's announcement of the signing of the definitive amalgamation agreement with PartnerRe Ltd. on January 25, 2015, we suspended our open market share repurchase program until the closing date of the amalgamation transaction.

Table of Contents

The following table summarizes our consolidated capital for the periods indicated:

	March 31, 2015	December 31, 2014		
Senior notes	\$991,045	\$990,790		
Preferred shares	627,843	627,843		
Common equity	5,349,320	5,193,278		
Shareholders' equity attributable to AXIS Capital	5,977,163	5,821,121		
Total capital	\$6,968,208	\$6,811,911		
Ratio of debt to total capital	14.2	% 14.5		%
Ratio of debt and preferred equity to total capital	23.2	% 23.8		%

We finance our operations with a combination of debt and equity capital. Our debt to total capital and debt and preferred equity to total capital ratios provide an indication of our capital structure, along with some insight into our financial strength. A company with higher ratios in comparison to industry average may show weak financial strength because the cost of its debts may adversely affect results of operations and/or increase its default risk. We believe that our financial flexibility remains strong.

Secured Letter of Credit Facility

On March 31, 2015, the Company entered into an amendment to reduce the maximum aggregate utilization capacity of our secured letter of credit facility with Citibank Europe plc ("LOC Facility") from \$750 million to \$500 million. All other material terms and conditions remained unchanged.

Common Equity

During the three months ended March 31, 2015, our common equity increased by \$156 million. The following table reconciles our opening and closing common equity positions:

Three months ended March 31,	2015
Common equity - opening	\$5,193,278
Net income attributable to AXIS Capital	165,825
Shares repurchased for treasury	(14,772)
Change in unrealized appreciation on available for sale investments, net of tax	39,917
Common share dividends	(29,068)
Preferred share dividends	(10,022)
Share-based compensation expense recognized in equity	12,712
Foreign currency translation adjustment	(11,413)
Shares issued and stock options exercised	2,863
Common equity - closing	\$5,349,320

Following the Company's announcement of the signing of the definitive amalgamation agreement with PartnerRe Ltd. on January 25, 2015, we have suspended our open market share repurchase program until the closing date of the

amalgamation transaction. At May 4, 2015, the remaining authorization under the common share repurchase program approved by our Board of Directors was \$749 million (refer to Part II, Item 2 'Unregistered Sales of Equity Securities and Use of Proceeds' for additional information).

We continue to expect that cash flows generated from our operations, combined with the liquidity provided by our investment portfolio, will be sufficient to cover our required cash outflows and other contractual commitments through the foreseeable future.

Table of Contents

CRITICAL ACCOUNTING ESTIMATES

Our Consolidated Financial Statements include certain amounts that are inherently uncertain and judgmental in nature. As a result, we are required to make assumptions and best estimates in order to determine the reported values. We consider an accounting estimate to be critical if: (1) it requires that significant assumptions be made in order to deal with uncertainties and (2) changes in the estimate could have a material impact on our results of operations, financial condition or liquidity.

As disclosed in our 2014 Annual Report on Form 10-K, we believe that the material items requiring such subjective and complex estimates are our:

- reserves for losses and loss expenses;
- reinsurance recoverable balances;
- premiums;
- fair value measurements for our financial assets and liabilities; and
- assessments of other-than-temporary impairments.

We believe that the critical accounting estimates discussion in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014 continues to describe the significant estimates and judgments included in the preparation of our Consolidated Financial Statements.

NEW ACCOUNTING STANDARDS

Refer to our Annual Report on Form 10-K for the year ended December 31, 2014, for a discussion of recently issued accounting pronouncements that we have not yet adopted.

OFF-BALANCE SHEET AND SPECIAL PURPOSE ENTITY ARRANGEMENTS

At March 31, 2015, we have not entered into any off-balance sheet arrangements, as defined by Item 303(a)(4) of Regulation S-K.

NON-GAAP FINANCIAL MEASURES

In this report, we present operating income, consolidated underwriting income and underwriting-related general and

administrative expenses, which are “non-GAAP financial measures” as defined in Regulation G.

Operating income represents after-tax operational results without consideration of after-tax net realized investment gains (losses) and foreign exchange losses (gains). We also present diluted operating income per common share and operating return on average common equity (“operating ROACE”), which are derived from the non-GAAP operating income measure.

Table of Contents

Consolidated underwriting income is a pre-tax measure of underwriting profitability that takes into account net premiums earned and other insurance related income as revenues and net losses and loss expenses, acquisition costs and underwriting-related general and administrative costs as expenses. Underwriting-related general and administrative expenses include those general and administrative expenses that are incremental and/or directly attributable to our individual underwriting operations. While these measures are presented in Item 1, Note 2 to our Consolidated Financial Statements, they are considered non-GAAP financial measures when presented elsewhere on a consolidated basis.

Operating income, diluted operating income per common share and operating ROACE can be reconciled to the nearest GAAP financial measures as follows:

	Three months ended March 31,		
	2015	2014	
Net income available to common shareholders	\$ 155,803	\$ 137,227	
Net realized investment (gains) losses, net of tax ⁽¹⁾	41,994	(4,299)	
Foreign exchange losses (gains), net of tax ⁽²⁾	(61,726)	4,141	
Operating income	\$ 136,071	\$ 137,069	
Earnings per common share - diluted	\$ 1.54	\$ 1.24	
Net realized investment (gains) losses, net of tax	0.42	(0.04)	
Foreign exchange losses (gains), net of tax	(0.61)	0.04	
Operating income per common share - diluted	\$ 1.35	\$ 1.24	
Weighted average common shares and common share equivalents - diluted ⁽³⁾	101,139	110,391	
Average common shareholders' equity	\$5,271,299	\$ 5,194,663	
ROACE (annualized)	11.8	% 10.6	%
Operating ROACE (annualized)	10.3	% 10.6	%

Tax cost (benefit) of (\$559) and \$6,321 for the three months ended March 31, 2015 and 2014, respectively. Tax (1) impact is estimated by applying the statutory rates of applicable jurisdictions, after consideration of other relevant factors including the ability to utilize capital losses.

Tax cost (benefit) of \$1,494 and (\$92) for the three months ended March 31, 2015 and 2014, respectively. Tax (2) impact is estimated by applying the statutory rates of applicable jurisdictions, after consideration of other relevant factors including the tax status of specific foreign exchange transactions.

(3) Refer to Item 1, Note 8 to our Consolidated Financial Statements for further details on the dilution calculation. A reconciliation of consolidated underwriting income to income before income taxes (the nearest GAAP financial measure) can be found in Item 1, Note 2 to the Consolidated Financial Statements. Underwriting-related general and administrative expenses are reconciled to general and administrative expenses (the nearest GAAP financial measure) within 'Underwriting Results - Group'.

We present our results of operations in the way we believe will be most meaningful and useful to investors, analysts, rating agencies and others who use our financial information to evaluate our performance. This includes the presentation of "operating income", (in total and on a per share basis), "annualized operating ROACE" (which is based on

the "operating income" measure) and "consolidated underwriting income", which incorporates "underwriting-related general and administrative expenses".

Operating Income

Although the investment of premiums to generate income and realized investment gains (or losses) is an integral part of our operations, the determination to realize investment gains (or losses) is independent of the underwriting process and is heavily influenced by the availability of market opportunities. Furthermore, many users believe that the timing of the realization of investment gains (or losses) is somewhat opportunistic for many companies.

Foreign exchange gains (or losses) in our Consolidated Statements of Operations are primarily driven by the impact of foreign exchange rate movements on net insurance related-liabilities. However, this movement is only one element of the overall impact of

Table of Contents

foreign exchange rate fluctuations on our financial position. In addition, we recognize unrealized foreign exchange gains (or losses) on our available-for-sale investments in other comprehensive income and foreign exchange gains (or losses) realized upon the sale of these investments in net realized investments gains (or losses). These unrealized and realized foreign exchange rate movements generally offset a large portion of the foreign exchange gains (or losses) reported separately in earnings, thereby minimizing the impact of foreign exchange rate movements on total shareholders' equity. As such, the Statement of Operations foreign exchange gains (or losses) in isolation are not a fair representation of the performance of our business.

In this regard, certain users of our financial statements evaluate earnings excluding after-tax net realized investment gains (or losses) and foreign exchange gains (or losses) to understand the profitability of recurring sources of income.

We believe that showing net income available to common shareholders exclusive of net realized gains (or losses) and foreign exchange gains (or losses) reflects the underlying fundamentals of our business. In addition, we believe that this presentation enables investors and other users of our financial information to analyze performance in a manner similar to how our management analyzes the underlying business performance. We also believe this measure follows industry practice and, therefore, facilitates comparison of our performance with our peer group. We believe that equity analysts and certain rating agencies that follow us, and the insurance industry as a whole, generally exclude these items from their analyses for the same reasons.

Consolidated Underwriting Income/Underwriting-Related General and Administrative Expenses

Corporate expenses include holding company costs necessary to support our worldwide insurance and reinsurance operations and costs associated with operating as a publicly-traded company. As these costs are not incremental and/or directly attributable to our individual underwriting operations, we exclude them from underwriting-related general and administrative expenses and, therefore, consolidated underwriting income. Interest expense and financing costs primarily relate to interest payable on our senior notes and are excluded from consolidated underwriting income for the same reason.

We evaluate our underwriting results separately from the performance of our investment portfolio. As such, we believe it appropriate to exclude net investment income and net realized investment gains (or losses) from our underwriting profitability measure.

As noted above, foreign exchange gains (or losses) in our Consolidated Statement of Operations primarily relate to our net insurance-related liabilities. However, we manage our investment portfolio in such a way that unrealized and realized foreign exchange rate gains (or losses) on our investment portfolio generally offset a large portion of the foreign exchange gains (or losses) arising from our underwriting portfolio. As a result, we believe that foreign exchange gains (or losses) are not a meaningful contributor to our underwriting performance and, therefore, exclude them from consolidated underwriting income.

We believe that presentation of underwriting-related general and administrative expenses and consolidated underwriting income provides investors with an enhanced understanding of our results of operations, by highlighting the underlying pre-tax profitability of our underwriting activities.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Refer to Item 7A included in our 2014 Form 10-K. With the exception of the changes in exposure to foreign currency risk presented below, there have been no material changes to this item since December 31, 2014.

Foreign Currency Risk

The table below provides a sensitivity analysis of our total net foreign currency exposures.

	AUD	NZD	CAD	EUR	GBP	JPY	Other	Total
At March 31, 2015								
Net managed assets (liabilities), excluding derivatives	\$4,498	\$(140,923)	\$70,413	\$35,255	\$(43,253)	\$16,532	\$9,742	\$(47,736)
Foreign currency derivatives, net	(68,556)	142,014	(72,961)	67,053	150,638	(14,173)	(34,545)	169,470
Net managed foreign currency exposure	(64,058)	1,091	(2,548)	102,308	107,385	2,359	(24,803)	121,734
Other net foreign currency exposure	975	—	—	50,898	100	—	166,477	218,450
Total net foreign currency exposure	\$(63,083)	\$1,091	\$(2,548)	\$153,206	\$107,485	\$2,359	\$141,674	\$340,184
Net foreign currency exposure as a percentage of total shareholders' equity	(1.1 %)	— %	— %	2.6 %	1.8 %	— %	2.4 %	5.7 %
Pre-tax impact of net foreign currency exposure on	\$(6,308)	\$109	\$(255)	\$15,321	\$10,749	\$236	\$14,167	\$34,019

shareholders'

movement⁽¹⁾

(1) Assumes 10% change in underlying currencies relative to the U.S. dollar.

Total Net Foreign Currency Exposure

At March 31, 2015, our total net foreign currency exposure was \$340 million net long, driven by increases in our exposures to the euro and the Sterling, primarily due to new business written during the first quarter of 2015 as part of the January 2015 renewal season.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) as of March 31, 2015. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2015, our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and is accumulated and communicated to management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and the Company's Chief Financial Officer, of changes in the Company's internal control over financial reporting that occurred during the three months ended March 31, 2015. Based upon that evaluation, there were no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are subject to routine legal proceedings, including arbitrations, arising in the ordinary course of business. These legal proceedings generally relate to claims asserted by or against us in the ordinary course of insurance or reinsurance operations; estimated amounts payable under such proceedings are included in the reserve for losses and loss expenses in our Consolidated Balance Sheets.

We are not a party to any material legal proceedings arising outside the ordinary course of business.

ITEM 1A. RISK FACTORS

There were no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information regarding the number of shares we repurchased during the three months ended March 31, 2015:

ISSUER PURCHASES OF EQUITY SECURITIES

Common Shares

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Announced Plans or Programs ⁽²⁾	
January 1-31, 2015	27,140	\$50.04	16,414	\$749.2	million
February 1-28, 2015	218,391	\$50.89	—	\$749.2	million
March 1-31, 2015	44,385	\$51.81	—	\$749.2	million
Total	289,916		16,414	\$749.2	million

From time to time, we purchase shares in connection with the vesting of restricted stock awards granted to our (1) employees under our 2007 Long-Term Equity Compensation Plan. The purchase of these shares is separately authorized and is not part of our Board-authorized share repurchase program, described below.

On December 5, 2014, our Board of Directors authorized a share repurchase plan to repurchase up to \$750 million of our common shares through to December 31, 2016. The share repurchase authorization became effective on (2) January 1, 2015, replaced the previous plan which had \$225.8 million available until the end of 2014. Share repurchases may be effected from time to time in open market or privately negotiated transactions, depending on market conditions.
