The regulatory framework also aims at efficiently improving quality of living and economic sustainability, allowing for the adoption of gradual and progressive solutions consistent with users' payment ability.

(i) Water and sewage services

The Company provides supply services of water and collection of sewage to the State Government and other Companies related to it, under terms and conditions considered by Management as normal in the market, except as to the form of settlement of the credits, that may be realized under the conditions mentioned in items (iii), (iv) and (v).

(ii) Reimbursement of additional retirement and pension benefits paid

It refers to amounts of supplemental benefits of retirement and pension plan provided by State of Sao Paulo s Law nr. 4819/58 (Benefits) paid by the Company to former employees or retirees.

Under the terms of the Agreement referred to in (iii), Gesp acknowledges to be responsible for the charges resulting from the Benefits, provided that the payment criteria set forth by the State Personnel Expense Department - DDPE, founded on the legal direction provided by the Legal Advisory of the Treasury Secretary and State's General Attorney's Office - PGE are obeyed.

As explained on item (vi), during the validation by Gesp of the amounts due to the Company on account of the Benefits, divergences have arisen as to the calculation criteria and eligibility of the Benefits applied by the Company. The Company's Management, however, maintains its understanding, that these divergences do not justify any provision, under the terms detailed on item (vi).

On March 31, 2009 and December 31, 2008, 2,585 and 2,604 retirees, respectively, received supplemental pension payment, being that in the quarters ended on March 31, 2009 and December 31, 2008, the Company paid R\$25,220 and R\$35,052, respectively. There were 134 active employees on March 31, 2009 that will justify these benefits on occasion of their retirement, as compared to the 143 employees in December 31, 2008.

In January, 2004, the supplemental pension and retirement pension payments were transferred to the Secretary of Treasury, and they would be made in accordance to calculation criteria defined by the PGE. Due to a judicial decision, the responsibility for the payments returned to Sabesp, under the original form.

(iii) Gesp Agreement

On December 11, 2001 the Company, Gesp (by means of the State Secretary of Treasury Affairs, currently the Secretary of Treasury) and the Departamento of Água e Energia Eletrica - DAEE, with the intermediation of the Secretary of Hydro Resources, Sanitation and Works, currently the Secretary of Sanitation and Energy, entered into the Term of Acknowledgement and Consolidation of Obligations, Payment Commitment and Other Covenants (the Gesp Agreement) with the purpose to resolve the outstanding issues existing between the Gesp and the Company related to the services of water and sewage as to the Benefits.

The total agreement was R\$678,830, at cost value, being (i) R\$320,623 referring to the Benefits paid by the Company and not reimbursed by the State during the period from March, 1986 to November, 2001, and (ii) R\$358,207 arising from the provision of water supply and sewage collection services, invoiced and past due from 1985 to December 01, 2001, but not paid by the Gesp.

Having in view the strategic importance of the reservoirs of Taiacupeba, Jundiá, Biritiba, Paraitinga and Ponte Nova (Reservoirs), to guarantee the maintenance of the water volume of Alto Tiete, the Company agreed to received them as part of the reimbursement referring to the Benefits. The Reservoirs would be transferred to it by the DAEE, which, on its turn, would subrogate itself in credit of the same amount before the Gesp.

However, the State of Sao Paulo's Attorney's Office questioned the legal validity of this agreement, by means of public civil action, which main argument is the lack of specific legislative authorization for the alienation of the DAEE's estate. The Company's legal counsels assess the risk of loss of this proceeding as probable, in case the mentioned legislative authorization is not obtained, which would prevent the transfer of the respective reservoirs as partial amortization of the balance receivable.

The balances of services of water supply and sewage collection were included into the First and Second Amendments as described on items (iv) and (v). The balances referring to the reimbursement of the supplement of retirement and pension plan were included into the Term of Commitment between the State of Sao Paulo and Sabesp, as described on items (vi) and (vii).

(iv) First Amendment to the Gesp Agreement

On March 22, 2004, the Company and the State Government amended the terms of the original GESP Agreement, thereby (1) consolidating and acknowledging amounts due from the State Government for water and sewage services, monetarily adjusted through February 2004; (2) formally providing for the offset of amounts due from the State Government against interest on shareholder's equity declared by the Company and any other debt owed to the State Government at December 31, 2003, which were monetarily adjusted through February 2004; and (3) defining the payment terms of the remaining obligations of the State Government for water and sewage services.

Pursuant to the Amendment, the State Government recognized the amounts due to the Company for water supply and sewage collection services provided until February 2004 in the amount of R\$581,779, including monetary adjustment based on the TR at the end of each year until February 2004. The Company recognized amounts payable to the State Government related to interest on capital in the amount of R\$518,732, including (1) amounts declared and paid related to years previous to 2003 (R\$126,967), (2) monetary adjustment of these amounts based on the annual variation of the Consumer Price Index (IPC/Fipe) until February 2004 (R\$31,098); and (3) amounts declared and due related to 2003 (R\$360,667).

The remaining obligation will be payable in monthly installments from May 2005 through April 2009, which will be subject to monthly monetary adjustment at the Expanded Consumer Price Index (IPCA/IBGE), plus 0.5% .

The Amendment to the GESP Agreement does not provide for amounts owed by the State Government for supplementary retirement and pension plan benefits, paid by the Company on behalf of the State Government. Such amounts continue to be subject to the terms of the original GESP Agreement.

Management believes that the amounts owed by the State Government shall be received and it is not estimated that losses will be incurred with such accounts receivable.

(v) Second Amendment to the Gesp Agreement

On December 28, 2007, the Company and the State of São Paulo, by means of the Secretary of Treasury signed the second amendment to the terms of the original Gesp agreement, (1) agreeing with the payment in installments of the remaining balance of the First Amendment, in the amount of R\$133,709 (amount in November 30, 2007) to be paid in 60 equal, monthly and consecutive installments, the first one maturing on January 02, 2008. The amount of the installments is monetarily adjusted according to the variation of the IPCA-IBGE, added by simple interests of 0.5% per month. In the balance of this agreement, which installments have been paid monthly, there is an amount of R\$46,244 that the State does not recognize as due. Sabesp has an understanding different from the State regarding this amount, not admitting the review of these previously agreed upon values, without the demonstration, in a grounded and unmistakable way, of the lack of correspondence between the amounts presented by Sabesp and the services effectively provided. For this reason the Company understands not necessary any provision for losses regarding these values (pursuant item VII of the Recitals of the Second Amendment to the Term of Acknowledgement, Payment Commitment and Other Covenants between the State of Sao Paulo and Sabesp), (2) with regards to the past due and unpaid accounts in the period from March, 2004 to October, 2007, resulting from the provision of water and collection of sewage services in the total of R\$256,608, R\$236,320 have been received and R\$8,784 were transferred to other debtor and R\$11,504 are pending confirmation and collection, These amounts are being jointly evaluated by Sabesp and the representatives of several Secretaries of State. Divergences have been identified, up to the moment, as to the debtor, but not as to the amount of the debt

itself. In case of reclassification of the responsible for payment of the account, Sabesp transferred the collection to the corresponding Entity. The Company has not booked a provision for losses in this amount once it understands that the divergences are substantially related to the identification of the debtor, (3) the interests on shareholders' equity due by Sabesp to the State, referring to the period from March, 2004 to December, 2006, in the amount of R\$400,823, restated from June, 2007 to November, 2007 by the Selic rate, were paid in the period from January to March, 2008, (4) the State and Sabesp agreed upon resuming the fulfillment of their reciprocal obligations, timely, under the new premises: (a) implementation of the accounts electronic management system to facilitate and speed up the follow-up of the payment processes and the processes of budgeting management; (b) structuring of the Programa de Uso Racional de Agua - PURA, to rationalize the consumption of water and the amount of the water and sewage bills of the responsibility of the State; (c) the establishment, by the State, of criteria in the budgeting of a way to avoid the displacement of amounts in the specific line of water and sewage bills as of 2008; (d) possibility of registration of state entities and bodies in a default system or master file; (e) possibility of interruption of the supply of water to the state entities in case of default in the payment of water and sewage bills.

Out of the invoicing of the months of November, 2007 to March, 2009, approximately 79% of the accounts have already been paid by the State Government.

(vi) Third Amendment to Gesp Agreement

Gesp, Sabesp and DAEE, on November 17, 2008, entered into the Third Amendment to the Term of Agreement of Payment Commitment, and Other Agreements, where the State confesses to owe Sabesp the amount of R\$915,251, monetarily adjusted until September, 2008 by the IPCA-IBGE, corresponding to the Uncontroversial Amount, calculated by FIPECAFI. Sabesp accepts temporarily the Reservoirs as part of the payment of the Uncontroversial Amount and offers to the State a temporary settlement, constituting a financial credit of R\$696,283, corresponding to the value of the Reservoirs. The definitive settlement will only occur with the effective transfer of property in the relevant real estate notary. The remaining balance of R\$218,967 is being paid in 114 monthly and consecutive installments, in the amount of R\$1,920 each, restated annually by the IPCA/FIPE, added by interests of 0.5% p.m., the first installment became due on November 25, 2008.

Sabesp and the State are working together to obtain legislative authorization in order to make viable the transfer of the Reservoirs to Sabesp, thus overcoming the juridical uncertainty caused by the Public Civil Action, mentioned on item (iii). After the publication of the legislative authorization, the transfer of the Reservoirs to Sabesp will occur.

The Third Amendment also provides for the regularization of the monthly flow of benefits. While Sabesp is responsible for the monthly payments, by judicial decision, the State reimburses the Company based on criteria identical to those applied to the Uncontroversial Amount. In the absence of impeditive judicial decision, the State will directly assume the flow of monthly payment of the portion considered uncontroversial.

The difference between the Uncontroversial Amount and the amount effectively paid by the Company constitutes the Controversial Amount. On March 04, 2009 the Sabesp forwarded to the State Public Attorney's Office - PGE a grounded request in order to obtain the reanalysis of the divergences that gave rise to the Controversial Amount. Indeed, the State Attorney General already confirmed, formally, the will to reanalyze the matter.

Sabesp will not waive the receivables from the State to which the Company considers itself to be legally entitled. Accordingly, it will take all possible actions to resolve the issue at all technical and court levels. Should this dispute persist, the Company will take all the necessary actions to protect the Company's interests.

(vii) Reasons that directed the Company's Management not to make a provision for the uncontroversial amount of the Benefits.

As demonstrated in (vi), the Third Amendment to Gesp Agreement splits the amount of the Benefits into uncontroversial amount and controversial amount.

The uncontroversial amount has been plainly resolved, including with regards to the uncontroversial amount of the future monthly flow of payment of the Benefits. The inventory of the uncontroversial amount, already exposed, will be paid by means of the Reservoirs and the remaining balance in 114 installments. With regards to the uncontroversial amount of the monthly flow, while Gesp arranges for the internal operating structure necessary for the calculation and processing of the reimbursements, the Company will maintain Fipecafi contracted so that it performs monthly the calculation of the reimbursement, applying criteria identical to those used in the calculation of the Uncontroversial Amount. Gesp has undertaken to make the reimbursements in up to 10 (ten) business days counted from the date of the submission of the monthly reimbursement calculation report issued by Fipecafi. This has been agreed upon in the third clause of this Amendment. The installments of the agreement and the monthly flow are being normally paid by the State Government.

No provision has been recorded for the controversial amount of the Benefits - whether with regards to eventual loss of amounts already recorded or even with regards to the controversial amounts of the Benefits that will be paid in the future - in view of the high expectation of success in receiving these pending amounts and the solution of the divergences favorable to the Company.

This expectation has ground in several reasons.

No new fact that justifies a change in the interpretation on the chances of receiving the pending amounts as Benefits. The controversy on the portion of Benefits is not a new data. In the information related to the fiscal year of 2007, it has been indicated inclusively the estimate of the uncontroversial and controversial amounts, without that has been generated any provision with regards to the controversial amount.

Conversely, it is needed to highlight that during 2008, there was great progress with regards to the perspective of receiving the pending amounts on account of Benefits. The uncontroversial amount of the Benefits has been plainly resolved already pointed out on item (vi) and in this item.

With regards to the controversial amount, there has also been an improvement in the receiving perspective. As informed in (vi), the State's General Attorney has formally undertaken to reassess the divergences that gave rise to the controversial amount.

The Company hired the opinion of a reputable accountant to evaluate the decision of the Management of not recording a provision for the amount considered controversial, which conclusion was that it is a theme with characteristics of uncertainty, not existing technical obstacles in light of the norms that regulate the works and reports of the independent auditors so that this situation is treated as an emphasis paragraph, instead of a qualification for lack of recording a provision for losses with doubtful accounts.

From the legal point of view, the Company hired two jurists of notorious expertise in order to obtain external evaluation in its right to reimbursement. The first one, in opinion dated March, 2008, concluded that the responsibility of the State is irrefutable having Sabesp the legal and moral conditions to recover what it had paid. The second one, in February, 2009 in an exhaustive work, performed an analysis of the general conditions under which occurred the payments of the Benefits as well as more than 1,000 judicial proceedings related to the disputes between the Company and the beneficiaries of Law nr. 4819/58 and their dependants. The conclusion of the second report was also, in general, favorable to Sabesp.

Additionally, the Advisory Staff to the Company's Presidency prepared a technical note (not audited) on the matter, with detailed evaluation of the historical circumstances where the concession criteria and calculation of the Benefits were adopted, concluding favorable to the right to reimbursement to Sabesp. This technical note was forwarded on March 04, 2009 to the PGE and it represents, in essence, the main reasons that ground the Company's right to reimbursement. Since this moment, the divergences between Sabesp and the State are formally in phase of reanalysis by the PGE.

The Company maintains its understanding that the best estimate for the controversial amount of the Benefits is to the sense that it will be received by the Company in the future, whether by means of the re-appreciation provided by the State's General Attorney or even for judicial decision.

(b) Cash and cash equivalents

The Company's balance of banks and short-term investments accounts with financial institutions controlled by the State Government was R\$ 735,495 and R\$ 579,750 on March 31, 2009 and December 31, 2008, respectively. The financial income from such investments was R\$ 25,157 and R\$ 9,739 in the first quarter of 2009 and 2008, respectively. The Company, due to State Decree, must invest its excess resources with financial institutions controlled by the State Government.

(c) Agreement for the use of reservoirs

In its operations, the Company uses the Guarapiranga and Billings reservoirs; should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. The Company does not pay any fee for the use of these reservoirs but it is responsible for their maintenance and operating costs.

(d) Agreements with lower tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA).

The Company has contracts signed with public entities linked to the State Government and to the municipalities served involving approximately 867 properties, which are benefited with a 25% reduction in the tariffs of the services of water supply and sewage collection, when not in default. The contracts provide for the implementation of the rational use of water program, which considers a reduction in the consumption of water.

(e) Guarantees

The State Government grants guarantees for some loans and financings of the Company and does not charge any fee related thereto.

Management is making efforts to maintain the State's payments with respect to transactions with related parties in non-default on a permanent basis.

(f) Sesamm

On August 15, 2008, the Company, as part of its growing process, together with the companies OHL Médio Ambiente, Inima S.A.U. - Unipersonal (Inima), Técnicas y Gestion Medioambiental S.A.U. (TGM) and Estudos Tecnicos e Projetos ETEP Ltda. (ETEP) organized the company Sesamm - Serviços de Saneamento de Mogi Mirim S/A (Sesamm or Subsidiary) which corporate object is the provision of services of supplementation of the implementation of the system of separation of sewage and implementation and operation of the sewage treatment system of the Municipality of Mogi Mirim, including the disposal of solid waste generated, as per note 7.

(g) Contract of personnel assignment among entities related to GESP

The Company has contracts of personnel assignments with entities related to the São Paulo's State Government, where the expenditures are fully passed on the monetarily reimbursed.

In the first quarter of 2009, the expenditures with employees assigned by Sabesp to other state entities amounted to R\$ 1,359.

In the same period, the expenditures with the employees of other entities at Sabesp's disposal totaled R\$287.

(h) Services contracted from entities related to GESP

On March 31, 2009 Sabesp had outstanding the balance of R\$9,584 payable referring to services provided to entities related to São Paulo's State Government, among which we highlight the services of electric energy supply by Companhia Energetica de Sao Paulo - CESP, totaling 83% of the balance payable.

(i) Non-operating Assets

The Company had, on March 31, 2009 the amount of R\$ 26,479 mainly related to lands granted in free lease (comodato) to Associations, Assistance Entities, Non-Governmental Organizations and to the DAEE - Departamento de Águas e Energia Eletrica, among others. The lands granted to the DAEE total R\$2,289.

(j) Sabesprev

The Company sponsors the defined contribution plan managed by Fundação Sabesp de Seguridade Social - Sabesprev. The net actuarial obligation, recorded up to March 31, 2009, is R\$434,553.

6. INDEMNIFICATIONS RECEIVABLE

Indemnities receivable are a non-current asset that represents amounts receivable from the Municipalities of Diadema and Mauá as an indemnity for their unilateral termination of the concessions for water supply and sewage collection services of the Company in 1995. As of March 31, 2009 and December 31, 2008, this asset amounted to R\$ 146.213 and R\$148,794, respectively (nominal amounts).

Due to these concession agreements, the Company invested in the construction of water and sewage systems in those municipalities in order to meet its concession service commitments. For the unilateral termination of the Diadema and Mauá concessions, the municipalities assumed the responsibility of supplying water and sewage services in those regions. At that time, the Company reclassified the balances of property, plant and equipment related to the assets used in those municipalities to non-current assets (indemnities receivable).

The net book value of the items of property, plant and equipment related to the Municipality of Diadema, reclassified in December, 1996, was R\$75,231, and the balance of the indemnifications receivable from the Municipality was R\$60,295.

The net book value of the items of property, plant and equipment related to the Municipality of Maua, reclassified in December, 1999, was R\$103,763, and the balance of the indemnifications receivable from the Municipality was R\$85,918.

The Company's rights to the recovery of these amounts are being judicially discussed by the municipalities.

Sabesp filed lawsuits to collect the amounts due by the municipalities. With respect to Diadema, the decision of the lower court judge was unfavorable to Sabesp, which filed an appeal in November 2000. On December 2005, Sabesp's appeal to have the agreement entered into with the municipality of Diadema declared valid was partially accepted. On October, 2006, the city hall filed common and special appeals where were denied by the President of the Court of Justice on March, 2007. Against such decision, the city hall filed new appeals. The interlocutory appeal filed in the Federal Supreme Court (STF) was accepted but only for the purposes of determining the sentence for the extraordinary appeal that had been rejected. On December 2007, the decision that accepted the execution of the Companhia de Saneamento the Diadema - Saned was rendered, ordering this company to be summoned to pay the full amount of the debt within 15 days under the penalty of fine. Saned filed an interlocutory appeal against this decision, but the appeal was rejected by the Court of Justice on June 2008. In order to pursue the execution, the judge authorized the realization of the online pledge of funds in bank account and financial investments of the Saned (online pledge) in up to 10% of the restated amount of the debt, not authorizing, however, the pledge of a percentage of the Company's revenues. Saned appealed the first decision and Sabesp appealed the second. Both appealed were denied by the Court of Justice only remaining, however, the on-line pledge up to 10% of the restated amount of the debt. The decisions are subject to appeal. R\$2,919 were blocked and withdrawn on March 3, 2009. Later, the Court of Justice determined in preliminary injunction that the pledge be made upon weekly deposits by Saned in the amount corresponding to 20% of all it receives in its accounts and financial investments.

On December 29, 2008, Saned and the municipality of Diadema entered into, with the State of Sao Paulo and Sabesp, a Memorandum of Intent with the purpose to prepare studies and conduct negotiations to instruct decisions of Diadema and Sabesp, aiming at the exclusive provision of water and sewage services in the municipality of Diadema, in period of up to three years.

The parties agreed that the search for a negotiated solution for the currently existing conflicts among the companies is fundamental so that the public service of water supply, sewage collection and treatment have their proper development in Diadema.

On January, 2009 the parties presented joint petition requesting the suspension of new pledges for the period of three months in order to try to make an agreement viable. The suspension was granted by the Judge of Public Treasury and, on April, 2009, the suspension period being elapse, a new joint petition was filed with the request for extension of the suspension for three more months.

With regards to Mauá, a first level decision was given determining that the Municipality pays the amount of R\$153.2 million as compensation for the damages caused and for loss of profits. The Maua s City Hall appealed against this decision on April, 2005. On July 2006, the decision was converted in diligence consisting of an expert clarification on the amount of the indemnity for loss of profits. The clarification was provided on December 2007 and the expert confirmed the amount of the loss of profits determined by the lower court. In August, 2008, the appeal was judged, having fully maintained the conviction imposed in the first level. This decision can still be appealed against.

Based on the opinion of the legal counsels, Management continues to affirm that the Company has legal right to receive the amounts corresponding the indemnification and it continues to monitor the situation of the lawsuits.

The operating fixed assets represent the assets involved in the services providing of water supply and sewage collection in 366 municipalities. Under the assets originated from contracts negotiated based on financial and economic appraisals, Sabesp holds the possession and management.

Up to March, 2009 73 concession contracts were expired, all in phase of negotiation with the municipalities, without prejudice to the continuation of the service provision. The net book value of the property, plant and equipment used in these municipalities totals R\$1,679,332. The depreciation charges in the first quarter of 2009 of these municipalities were R\$14,711.

The concession contracts provide that the assets will be reversed to the conceding power at the end of the period, upon indemnification by the net market value as set forth in each contract. In the program contracts, the indemnification will correspond to the net present value of the cash flow in the remaining period at the date of resume of the services, monetarily restated and added by interests until the date of effective payment.

(a) Depreciation

Structure - 4%, connections - 5%, hydrometers - 10%, networks - 2%, wells - 5%, equipment - 10%, transportation equipment - 20%, information technology equipment - 20%, furniture and fixture - 10%.

As a determination introduced by CPC-13 - Initial Adoption of Law 11638/07, in items 53 and 54, the Company will perform a review of the useful life of items of its fixed assets for the year 2009.

(b) Write-off of Property, Plant and Equipment

(i) The Company wrote-off, in the first quarter of 2009, items of fixed assets in the amount of R\$1,780 (in the first quarter of 2008- R\$3,236), related to the operating assets group.

(d) Work in Progress

The provision for disbursements from the second quarter of 2009 until 2014, referring to investments already contracted, is approximately R\$2,103 million (not audited).

(e) Expropriations

The forecast for disbursements to be made after the second quarter, 2009, is approximately R\$ 490 million (not audited), which shall be covered by own resources. The assets object of these lawsuits shall be recorded in the fixed assets when the operation is carried out. In the first quarter of 2009, the amount referring to the expropriations was R\$ 2,098 (in the first quarter of 2008 - R\$ 1,452).

Had the income tax and social contribution on the revaluation reserve been accounted for, the unrealized amount at March 31, 2009 would be R\$ 363,741 (R\$ 393,251 up to March 31, 2008). The Company operates with several financial instruments with emphasis in cash and cash equivalents, including financial investments and loans and financings, described as follows.

The Company did not perform transactions with derivatives in 2009 and 2008.

(i) Cash & cash equivalents, accounts receivable, other current assets and accounts payable

	Book value	Projected Cash Flow	Adjustment to Present Value	Differences

	6,674,505	8,399,852	7,896,798	503,054

In order to obtain the market values of Financial Instruments, the following criteria have been adopted:

(i) Debentures are financings considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates, disclosed by Andima in the secondary market, having as basis March 31, 2009 and the Company's security traded in the domestic market.

Financings - BNDES, those are instruments considered by the nominal amount restated up to the maturity date, that have as characteristics the indexation to the TJLP, which is a specific modality, not being compared to no other

Therefore, the Company's choice was to publish as market value the amount accounted as of March 31, 2009

(ii) Other financings in national currency are considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates. The forward rates used were obtained at the BM&F website.

(iii) Foreign currency financings are controlled in the original currency, converted at the foreign exchange rate at the date of the balance sheet, discounted to present value using the forward market rate obtained in the Bloomberg, based on the Company

Additionally, the Company has an instrument indexed to the YEN (JBIC, as mentioned in Note 10), which, in addition of the premises above, was considered in the conversion to present value the parity of the original currency of the instrument related to the dollar.

(b) Market risks

(i) Foreign exchange rate risk

This risk results from the possibility of the Company in incur in losses on account of fluctuations in the foreign exchange rates that impact the balances of loans and financings in foreign currency funded in the market and, consequently, the financial expenses. The Company does not maintain hedge or swap operations, however, the company performs an active management of the debt, seeking to reduce the exposure in foreign currency, taking advantage of the windows of opportunity, to exchange expensive debts to cheaper debts, reducing the cost by means of anticipation of the maturity dates.

A significant portion of the Company's financial debt was linked to the US dollar and to the Yen, in the total amount of R\$2,332,161 (Note 10). The table below summarizes the Company's exposure to exchange rates at March 31, 2009.

	In thousands	
	US\$	Japanese Yen
Loans and financing	789,321	20,394,042

(ii) Interest rate risk

This risk arises from the possibility that the Company may incur losses due to interest rate fluctuations and indices that increase their interest expenses on loans and financing. The Company has not entered into any derivative contract to hedge against this risk; however, it continually monitors market interest rates, in order to evaluate the possible need to replace its debt. As of March 31, 2009, the Company had R\$860,965 in loans and financing which were obtained at variable interest rates (CDI and TJLP).

Another risk faced by the Company is the lack of correlation between the monetary adjustment indices of its debt and those of its receivables. Water supply and sewage treatment tariffs do not necessarily follow the increases in the interest rates affecting the Company's debt.

(iii) Credit risk

Credit risk is mitigated by selling to a geographically dispersed customer base.

The net effect of the expenses with monetary variations in the 1Q09 was lower in R\$66.6 million when compared with the 1Q08. This variation is due to:

- Although the 0.93% depreciation of the dollar in the 1Q09 has been lower when compared to the depreciation of the dollar occurred in the 1Q08, of 1.25%, it is associated to the variation of the currency basket that in the 1Q09 presented a depreciation of 3.6% and an appreciation in the 1Q08 corresponding to 6.0%, leading to a net total impact of R\$44.4 million in foreign exchange variations. The balance of the dollar denominated debt in the 1Q08 was R\$1.2 billion (US\$679.7 million) and in the 1Q09 it was R\$ 1.8 billion (US\$ 789. 3 million);
- Decrease of R\$26.3 million in the monetary variations on debentures, resulting from the variation of the IGPM, 0.92% in the 1Q09, against 2.38% in the previous period; and
- Other monetary variations on indemnifications of judicial proceedings with increase of R\$4.1 million.

7.2. Income with monetary variations

Income with monetary variations presented a decrease of R\$8.1 million due mainly to retentions of disbursements of JICA (former JICB) occurred in December, 2008 and January, 2009 that were affected by the depreciation of the Yen when released in February, 2009.

21.01 - REPORT ON THE LIMITED REVIEW - UNQUALIFIED

Report of the independent auditors review

To the Managers and Shareholders
Companhia de Saneamento Basico do
Estado de Sao Paulo - SABESP

1. We reviewed the financial information contained in the Quarterly Information - ITR (individual and consolidated) of Companhia de Saneamento Basico do Estado de Sao Paulo - SABESP (the Company) referring to the quarter ended on March 31, 2009, comprising the balance sheets, the statements of income, the statement of changes to shareholders equity, the statement of cash flows and the statement of value-added, the explanatory notes and the performance report, prepared under the responsibility of its Management.
2. Our review was performed according to the specific standards set forth by the IBRACON - Instituto dos Auditores Independentes do Brasil, together with Conselho Federal de Contabilidade - CFC, and it consisted, manly in: (a) questioning and discussing with the managers responsible for the accounting, finance and operating areas of the Company, as to the main criteria adopted in the preparation of the quarterly information, and (b) review of the relevant information and the subsequent events that have, or may have, relevant effects on the financial position and operations of the Company and its subsidiary.
3. As mentioned in Note 5, Companhia de Saneamento Basico do Estado de Sao Paulo - SABESP has recorded in the non-current assets amounts related to supplementary pension and retirement plans, paid by the Company in the period from 1986 to 2009. After a period of negotiation, the parties (the Company and the Government of the State of Sao Paulo) signed, on November 17, 2008, the Third Amendment to the Term of Acknowledgment, Payment Commitment and Other Covenants, that demonstrate installments considered controversial and uncontroversial, originated from calculations made by a specialized company with regards to the payments made. As a result of the referred Term, the Company booked monetary adjustment of the uncontroversial portion, then kept in historical values, however it has not booked a provision for the controversial portion, in the amount of R\$315,571 thousand, net of tax effects, in view of the high expectation of success in the collection of the outstanding amounts and the expected solution of the divergences with the State and/or the discussions in technical-legal level. The accounting standards adopted in Brazil require provision for losses for reduction to recoverable value that corresponds, in this context, to the amounts past due for long time and determined as controversial. Consequently, non -current assets and shareholders equity are over evaluated in the amount of R\$315,571 thousand and the net income for the quarter ended on March 31, 2009 is presented in excess in the amount of R\$12,798 thousand, net of tax effects.
4. Based on our limited review, except for the effects of the matter mentioned in the previous paragraph 3, we are not aware of any relevant change that must be made to the quarterly information referred above, so that they are in agreement with the statements issued by the Brazilian Security and Exchange Commission - CVM, applicable to the preparation of quarterly information, including the Instruction CVM nr. 469/08.
5. As mentioned in Note 5, the Company and the Government of the State of Sao Paulo entered into an instrument to settle the amount denominated uncontroversial referring to the reimbursement of supplementary retirement and pension, paid by the Company, in name and on account of the Government of the State of Sao Paulo. The realization of this asset may eventually be influenced by: (a) the resolution of legal uncertainties caused by public action and legislative authorization related to the transfer of the Company s reservoirs, in the amount of R\$696,283 thousand and (b) by the financial collection of the other values, in the amount of R\$213,744 thousand.

6. As mentioned in Note 21, some agreements were signed between the City Hall of the Municipality of Sao Paulo and the Company, seeking the resolution of the debts existing in context that involves simultaneously the stability in the service provision and the establishment of sanitation actions. Due to current stage of the negotiations between the Company and the Municipality of Sao Paulo, Management has the expectation that no adjustment will be needed to the corresponding amounts included in the financial statements. Therefore, no adjustment was consigned in the financial statements.

7. As mentioned in Note 2, the accounting standards adopted in Brazil were changed during 2008 and the effects of their initial adoption were booked by the Company and its subsidiary during the fourth quarter of 2008 and disclosed in the financial statements of December 31, 2008. The statement of income, the statement of changes to shareholders equity, the statement of cash flows and the statement of value-added referring to the quarter ended on March 31, 2008, presented together with information of current quarter, were not adjusted for comparison purposes, as allowed by the Official Letter-Circular CVM nr. 02/2009.

8. The limited review of the Quarterly Information - ITR related to the quarter ended on March 31, 2008 were conducted under the responsibility of other independent auditors, which issued, dated on May 14, 2008 the respective unqualified report with emphasis paragraph in their report related to the reimbursement of the amounts of supplementary payments of retirement and pension made by the Company and to the agreement signed between the City Hall of the Municipality of Sao Paulo and the Company.
