IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

INDEPENDENT AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

To
The Board of Directors and Shareholders of
Banco Bradesco S.A.
Osasco – SP

Opinion

We have audited the consolidated financial statements of Banco Bradesco S.A. ("Bradesco"), which comprise the consolidated statement of financial position as of December 31, 2016 and the respective consolidated statements of income, consolidated statements of comprehensive income, changes in shareholders' equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of Bradesco as of December 31, 2016, the consolidated performance of its operations and its consolidated cash flows, for the year then ended, in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

Basis for opinion

We conducted our audit in accordance with Brazilian and International Standards on Auditing (ISAs). Our responsibilities under those standards, are further described in the "*The Auditor's responsibilities for the audit of the consolidated financial statements*" section of our report. We are independent of Bradesco and its subsidiaries, in accordance with the ethical requirements established in the Accountant's Professional Ethics Code and the professional standards issued by the Federal Accounting Council, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and, we do not express a separate opinion on these matters.

· Impairment of loans and advances of loans

As mentioned in notes 2f, 3.1, 4 and 25, Bradesco periodically reviews its portfolio of loans and advances, evaluating the estimated impairment loss, which totals the amount of 24,780,839 thousand as of December 31, 2016. The determination of the impairment of loans and advances was documented in internal policies and requires, by its nature, the use of judgments and assumptions by the Company, which include analysis of both external factors such as general economic conditions, and internal factors such as the debtor's payment history and collateral considerations. Bradesco divides its impairment analysis between individualized analysis, for clients with exposures considered "individually significant" and collective analysis, for the other clients. Due to the relevance of

loans and advances and the level of uncertainty for the determination of related impairment, we considered this issue a significant issue for the audit.

How our audit addressed this matter

We evaluated the design, implementation and operational effectiveness of internal controls related to the approval and registration of loans and advances, the evaluation of the methodologies, indexes and assumptions used by Bradesco in the calculation of collective impairment and assessments of impairment for loans and advances analyzed individually. Based on a sample, we evaluated the impairment of loans and advances considered individually significant, we inspect the documentation and assumptions that support Bradesco's decision on the recoverable value of the operations, including the sufficiency analysis of the guarantees. We have also tested the adequacy of the models, assumptions and data used by Bradesco to measure impairment losses on loan portfolios and on a collective valuation basis, including the assumptions and data used to determine the losses incurred but not identified. We also analyzed whether the disclosures made in the financial statements, described in notes 2f, 3.1, 4 and 25, are in accordance with the applicable rules.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

Based on the evidence obtained through the procedures described above, we consider adequate the level of provisioning and disclosures in the context of the consolidated financial statements taken as a whole.

§ Fair value of financial instruments

As disclosed in the Notes 2f, 3.4, 20a, 20c and 21, derivative financial instruments amount to R\$ 16,755.442 thousand (assets) and R\$ (13,435,678) thousand (liabilities), available-for-sale securities amount to R\$ 113,118,554 thousand and trading securities amount to R\$ 196.384.404 thousand. These instruments, measured at fair value, are relevant to the consolidated financial statements of Bradesco. For the financial instruments that are actively traded and those which market prices and parameters are available, there is a higher objectivity level in the determination of fair values (Level 1 in the fair value hierarchy). However, when the market prices or parameters are not observable (Levels 2 and 3 in the fair value hierarchy), the determination of the fair values is subject to a higher uncertainty level, to the extent Bradesco makes significant judgments to estimate such amounts. Therefore, we considered the fair value measurement of these financial instruments as a significant matter in our audit.

How our audit addressed this matter

As part of our procedures, we evaluated the design, implementation, and operating effectiveness of the internal controls implemented by Bradesco to mitigate the risk of material misstatement in the consolidated financial statements arising from uncertainties in the fair value measurement of financial instruments (Levels 2 and 3 in the fair value hierarchy). For a sample of financial instruments for which fair value measurement parameters are not observable, classified in levels 2 and 3, with the technical support of our professionals with knowledge of financial instruments, we evaluated the models developed by Bradesco for determining fair values and the reasonableness of data, the parameters and information included in the pricing models used, and we recalculated the amount of operations. Our procedures also included the evaluation of the disclosures made by Bradesco in the consolidated financial statements in Notes 2f, 3.4, 20a, 20c and 21.

Based on the evidence obtained from the procedures described above, we consider the fair value measurement of financial instruments and disclosures to be adequate in the context of the consolidated financial statements taken as a whole.

· Provisions and contingent liabilities - tax, civil and labor

As described in Notes 2m and 37, Bradesco is defendant in lawsuits of tax, civil and labor nature, related to the normal course of its activities, which total provision recognized in the consolidated financial statements amounts to R\$ 8,187,237 thousand, R\$ 5,003,440 thousand, and R\$ 5,101,732 thousand, respectively. Some laws and regulations in Brazil have high complexity levels, and, therefore, the measurement, recognition and disclosure of Provisions and Contingent Liabilities, related to lawsuits, and/or, in certain cases, adherence to laws and regulations, require Bradesco's professional judgment. Due to the relevance, complexity and judgment involved in the evaluation, measurement, definition of recognition and disclosures related to Provisions and Contingent Liabilities, we considered this as a significant matter in our audit.

How our audit addressed this matter

Our audit procedures included the evaluation of the design, implementation and operating effectiveness of the internal controls related to the identification, evaluation, measurement and disclosure of Provisions and Contingent Liabilities, as well as those related to the compliance with laws and regulations. Additionally, on a test basis, we evaluated the sufficiency of the recognized provisions and disclosed contingency amounts, by evaluating the criteria and assumptions adopted in the measurement methodology, also considering the assessment of the internal and external legal advisors of Bradesco, as well as historical data and information. This work included the involvement of our legal experts in the evaluation of the likelihood of unfavorable outcome and of the documentation and information related to the main tax, civil and labor matters involving Bradesco. We also evaluated whether the disclosures made in the consolidated financial statements are in accordance with the applicable accounting practices and provide information on the

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

nature, exposure and amounts of provisions or disclosures related to the main tax, civil and labor matters in which Bradesco is involved.

Based on the evidence obtained from the procedures described above, we consider the level of provisioning and disclosures to be adequate in the context of the consolidated financial statements taken as a whole.

§ Impairment of assets

The consolidated financial statements include deferred tax assets in the amount of R\$ 46,621,723 thousand (Note 17c) and goodwill in the amount of R\$ 4,945,313 thousand (Note 29a). The realization of these assets depends on future profitability based on business plans and budgets prepared by Bradesco and which are supported by several economic and business assumptions, among others. As they require the exercise of judgment, such estimates are prepared and reviewed internally according to Bradesco's governance framework. As described in Notes 2k and 4, considering the frequent changes that occur in the economic or regulatory environment of the markets where it operates, Bradesco continuously evaluates the assumptions and estimates of taxable profit, profitability of the cash generating units (CGU) to which goodwill and intangible assets are allocated, growth rates, discount rates, and cash flow projections. In view of the relevance of the future profitability estimates made and the impact that changes in the assumptions of such estimates would have on the consolidated financial statements, we considered this area relevant to our audit.

How our audit addressed this matter

On a sampling basis, we tested the design, implementation and operating effectiveness of the relevant internal controls related to the preparation and review of the business plan, budget, technical studies and analysis of the recoverable value of the assets prepared by Bradesco. Additionally, we evaluated, with the technical support of our corporate finance specialists, the reasonableness and consistency of the data and assumptions used for preparing such documents, such as growth rates, discount rates, cash flow projections and taxable income estimates to which the deferred tax assets refer. We also performed an analysis of the reasonableness of the mathematical calculations included in such documents. Our procedures also included the evaluation of the disclosures made by Bradesco in the consolidated financial statements.

Based on the evidence obtained from the procedures described above, we consider the measurement of the recoverable amounts of assets and related disclosures to be adequate in the context of the consolidated financial statements taken as a whole.

§ Acquisition of control of HSBC Brasil

As described in Note 2a, in August 2015, Bradesco entered into a Purchase and Sale of Shares Agreement with HSBC Latin America Holdings Limited to acquire 100% of the capital of HSBC Bank Brasil S.A. and HSBC Serviços e Participações Ltda. (collectively, "HSBC Brasil"). The transaction was completed on July 1, 2016, after the approval from the regulatory bodies, fulfillment of the legal formalities, and the effective payment in the amount of R\$ 17,288,470 thousand. With the acquisition, Bradesco took over HSBC Brasil operations, including retail, wholesale, insurance and asset management. Accounting practices require the measurement of the fair value of acquired assets and assumed liabilities for purposes of determining goodwill as well as the identifiable acquired intangible assets. Such measurement involves Bradesco's judgment and includes the projection of future cash flows, discount rate, and definition of the useful lives of the identified assets. Later on, on October 7, 2016, Bradesco carried out the migration of the entire service network and operations of HSBC Brasil to the operational structures of Bradesco. In view of the relevance and the high judgment level involved in the accounting record process of the acquisition, as well as the complexity of the HSBC Brasil operations migration process, we considered this matter significant in our audit.

How our audit addressed this matter

Edgar Filing: BANK BRADESCO - Form 6-K

Our audit procedures included the evaluation of the design, implementation and operating effectiveness of the internal controls related to the process of measurement, recognition and disclosures of transactions of such nature according to the applicable accounting practices. We also analyzed, with the technical support of our corporate finance specialists, the reasonableness and consistency of the methodology used for measuring the fair value assigned to the acquired assets and assumed liabilities, identified intangible assets

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

as well as the assumptions used for making the projection of cash flows, discount rates and useful life estimates. We also conducted tests of the controls related to the HSBC Brasil acquisition. Additionally, we evaluated the controls related to the migration of the operations to Bradesco systems and considered the analysis of general controls related to migration governance, inspection of the migration plan, and the migration rules on data and obtaining evidences of the conducted data migration tests. We involved our Information Technology ("IT") specialists in order to analyze the migration interfaces, and we carried out the inspection/re-execution on test basis of the accounting and operating reconciliations of the migrated balances and data. It was also part of our procedures the evaluation of the disclosures made by Bradesco in the consolidated financial statements in Note 2a.

Based on the evidence obtained from the procedures described above, we consider the recognition, measurement and disclosure of assets and liabilities related to HSBC acquisition to be adequate in the context of the consolidated financial statements taken as a whole.

§ Technical Provisions – Insurance and Pension Plans

As mentioned in Notes 2o and 35, Bradesco has liabilities related to insurance and pension plans contracts denominated Technical Provisions, in the amount of R\$ 215,840,000 thousand. In view of the uncertainties and subjectivity inherent in insurance and pension plans contracts, the liability adequacy test and the process of determination and measurement of technical reserves involve a high judgment level. Bradesco continuously evaluates methodologies and assumptions, which include, among others, expectations of loss ratio, mortality, longevity, persistency, and interest rates. In view of the involved relevance and uncertainty, and the impact that any change in assumptions would have on the amount of Technical Provisions, we considered this matter relevant to our audit.

How our audit addressed this matter

On sampling basis, we tested the design, implementation and operating effectiveness of the significant internal controls related to the Technical Provisions. With the technical support of our actuarial specialists, we made the evaluation of the methodologies used for measuring technical reserves and the liability adequacy test. We also evaluated the consistency of data and reasonableness of assumptions, such as loss ratio, interest rates, longevity, mortality, and persistency. Additionally, we performed the recalculation of technical provisions considering the methodology, assumptions and data. Our audit procedures also included the evaluation of the disclosures made in the consolidated financial statements Note n° 35.

Based on evidence obtained from the procedures described above, we consider the level of provisioning and disclosures to be adequate in the context of the consolidated financial statements taken as a whole.

§ Application controls and information technology general controls

Bradesco has a technology structure for conducting its businesses, as well as continuous investment plans aimed at the improvement and maintenance of access management and changes in the relevant systems and applications, development of new programs, and automated controls and/or controls with automated components in relevant processes. In order to maintain its operations, Bradesco provides its employees with access to systems and applications, taking into account the duties performed by them and within its organizational structure. The controls to authorize, monitor, restrict, and/or revoke the respective accesses to this environment are important to ensure that the accesses and information updates are appropriately performed and by the appropriate professionals, to mitigate the potential risk of fraud or error arising from inappropriate access or change in a system or information, and to guarantee the integrity of the financial information and accounting records. In view of the high investment level and heavy dependence of Bradesco on its technology systems, the high daily volume of processed transactions, as well as the importance of access controls and the management of changes in its systems and applications, we considered that this area is relevant to our audit.

How our audit addressed this matter

Edgar Filing: BANK BRADESCO - Form 6-K

The design, implementation, and operating effectiveness of access controls, such as authorization of new users, timely revocation of terminated users, and periodic monitoring of active users were tested during our audit with the assistance of our information technology specialists, whenever we planned to rely on specific information extracted from a certain system considered relevant for the purpose of preparing the financial

 IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

statements. In areas where our judgment is highly dependent on information technology, our tests included assessing password policies, security settings, and control over developments and changes in systems and applications. In addition, when we identified key internal controls for the financial reporting process and other relevant fully automated processes or with some component dependent on systems and applications, we tested, with the assistance of our information technology specialists, the design, implementation and operating effectiveness of these controls.

The evidence from the control tests described above allowed us to consider information from certain systems to plan the nature, time and extension of our substantive tests in the context of the consolidated financial statements taken as a whole.

Responsibilities of management and those in charge with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), and for such internal controls as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing Bradesco's ability to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate Bradesco and its subsidiaries or to cease operations, or there has no realistic alternative but to do so.

Those charged with governance are those responsible for overseeing Bradesco's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Brazilian and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Brazilian and International Standards on Auditing, we exercise professional judgment, and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtained audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting material misstatement resulting from fraud is higher than for the one resulting from error, as fraud may involve collusion, forgery, intentional omission or misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Bradesco and its subsidiaries internal control.
- Evaluate the appropriateness of the accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Edgar Filing: BANK BRADESCO - Form 6-K

· Conclude on the appropriateness of management's use of the going concern basis of accounting, and, based on the audit evidence obtained, whether material uncertainty exists related to events or conditions that may cast significant doubt on Bradesco's ability to continue as going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

disclosures in the consolidated financial statements, or if such disclosures are inadequate to modify our opinion. Our conclusions are based on the audit evidences obtained up to the date of our auditor's report. However, future events or conditions may cause Bradesco and its subsidiaries to cease to continue as a going concern.

· Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

· Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provided those charged with governance with a statement that we have complied with the relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determined those matters that were of most significance in the audit of the consolidated financial statements of the current period, and are therefore the key audit matters. We describe these matters in our auditor's report, unless law or regulation precludes public disclosure about the matters, or when, in extremely rare circumstances, we determine a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefit of such communication.

Audit Committee's Report

Bradesco Financial Conglomerate Audit Committee's Report on financial statements prepared in accordance with International Financial Reporting Standards (IFRS)

In addition to the Audit Committee's Report related to the consolidated financial statements of Banco Bradesco S.A. for the year ended December 31, 2016, issued on February 2, 2017, we have also analyzed the financial statements prepared in accordance with International Financial Reporting Standards.

As mentioned in the report referred to above, our analysis has taken into consideration the work carried out by independent auditors and the internal controls systems maintained by the various financial areas of Bradesco financial conglomerate, mainly Internal Audit, Risk Management and Compliance areas.

Management has the responsibility of defining and implementing accounting and management information systems that produce the consolidated financial statements of Bradesco and its subsidiaries, in compliance with Brazilian and international accounting standards.

Management is also responsible for processes, policies and procedures for internal controls that ensure the safeguarding of assets, timely recognition of liabilities and risk management for Bradesco Organization transactions.

Independent Auditors are responsible for auditing the financial statements and for issuing an auditing report on their compliance with applicable accounting principles.

The responsibility of internal auditors is to assess the quality of Bradesco Organization's internal control systems and the regularity of policies and procedures determined by Management, including those used to prepare accounting and financial reports.

The Audit Committee is responsible for evaluating the quality and effectiveness of the internal and independent auditors' work, the effectiveness and adequacy of the internal control systems, and also for analyzing financial statements in order to issue, when applicable, pertinent recommendations.

Based on the review and discussions mentioned above, the Audit Committee recommends that the Board of Directors approves the audited financial statements for the year ended December 31, 2016, prepared in accordance with International Financial Reporting Standards.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

1) General information

Banco Bradesco S.A. and subsidiaries (“Bradesco”, the “Bank”, the “Company” or the “Organization”) is a publicly-traded company established according to the laws of the Federative Republic of Brazil with headquarters in the city of Osasco, state of São Paulo, Brazil.

Bradesco is a bank that provides multiple services within two segments: banking and insurance. The Bank complies with Brazilian banking regulations and operates throughout all of Brazil. The banking segment includes a range of banking activities, serving individual and corporate customers in the following operations: investment banking, national and international banking operations, asset management operations and consortium administration. The insurance segment covers auto, health, life, accident and property insurance and pension plans as well as capitalization bonds.

The retail banking products include demand deposits, savings deposits, time deposits, mutual funds, foreign exchange services and a range of credit operations, including overdrafts, credit cards and loans with repayments in installments. The services provided to corporate entities include fund management and treasury services, foreign exchange operations, corporate finance and investment banking services, hedge and finance operations including working capital financing, leasing and loans with repayments in installments. These services are provided, mainly, in domestic markets, but also include international services on a smaller scale.

The Organization was originally listed on the São Paulo Stock Exchange (“BM&FBovespa”) and then subsequently on the New York Stock Exchange (“NYSE”).

The consolidated financial statements, in accordance with the IFRS, were approved by the Board of Directors on February 23, 2017.

2) Significant accounting practices

These consolidated financial statements of the Organization were prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The consolidated financial statements include the consolidated statements of financial position, consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows as well as the notes to the consolidated financial statements.

The consolidated financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position: financial assets available for sale which are measured at fair value; assets and liabilities held for trading which are measured at fair value; financial instruments at fair value through profit or loss which are measured at fair value and the liability for defined benefit obligations which is recognized as the present value of the defined benefit obligation less the net total of the plan assets, plus unrecognized actuarial gains, less unrecognized past service cost and unrecognized actuarial losses and assets and liabilities acquired through a business combination.

The Organization has classified its expenses according to their nature.

The consolidated statement of cash flows shows the changes in cash and cash equivalents during the year arising from operating, investing and financing activities. Cash and cash equivalents include highly liquid investments. Note 19 details the accounts of the consolidated statement of financial position that comprise cash and cash equivalents. The consolidated statement of cash flows is prepared using the indirect method. Accordingly, the income before taxes was adjusted by non-cash items such as provisions, depreciation, amortization and losses due to impairment of loans and advances. The interest and dividend received and paid are classified as operating, financing or investment cash flows

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

according to the nature of the corresponding assets and liabilities.

The preparation of the consolidated financial statements requires the use of estimates and assumptions which affect the reported amounts of assets and liabilities, as well as the disclosure of contingent assets and liabilities at the date of the financial statements, and the profit and loss amounts for the year. The consolidated financial statements also reflect various estimates and assumptions, including, but not limited to: adjustments to the provision for impairment losses of loans and advances; estimates of the fair value of financial instruments; depreciation and amortization; impairment losses in assets; the useful life of intangible assets; evaluation of the realization of tax assets; assumptions for the calculation of technical provisions for insurance; supplemental pension plans and capitalization bonds; provisions for contingencies and provisions for potential losses arising from fiscal and tax uncertainties. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

The accounting policies listed below were used in all the periods presented and by all the companies of the Organization.

a) Recent Acquisitions

In August, 2015, Bradesco firmed the Purchase and Sale of Shares Agreement with HSBC Latin America Holdings Limited to the acquisition of 100% of the equity of HSBC Bank Brasil S.A. (“HSBC Bank”) and HSBC Serviços e Participações Ltda. (“HSBC Serviços”). In June 2016, the final approval of regulatory agencies was given in compliance with legal formalities. With the conclusion of the acquisition, on July 1, 2016, Bradesco assumed all operations of the HSBC in Brazil, including retail, insurance and asset management, as well as all the branches and clients, reinforcing its presence and competitiveness throughout the national territory.

In July 2016, there was a total division of the equity of HSBC Serviços, where portions of this equity were transferred to HSBC Bank and Credival Participações, Administração e Assessoria Ltda. (Credival), that is a wholly owned subsidiary of HSBC Bank.

In October 2016, approval was granted in an Extraordinary General Meeting for the partial spin-off of HSBC Brasil, through the absorption of portions of its equity by companies of the Organization, enabling progress with the integration of operational and technological platforms, resulting in the replacement of the HSBC brand in its service network, becoming Bradesco. Thus, Bradesco began to operate with a unified platform (branches, ATMs, and systems), to which all clients have access to. From now on, Bradesco will add to the products and services already offered to HSBC Brasil clients, a nationwide service network, a state-of-the-art technology platform, and an even more extensive portfolio of products and services.

Financial assets available for sale	23,745,717	-	23,745,717
Investments held to maturity	13,450	22,411	35,861
Property and equipment, net of accumulated depreciation	1,175,554	622,246	1,797,800
Intangible assets	558,015	3,993,743	4,551,758
Other assets	25,808,692	848,699	26,657,391
Deposits from banks	(7,808,801)	-	(7,808,801)
Deposits from customers	(56,766,587)	-	(56,766,587)
Financial liabilities held for trading	(3,790,048)	-	(3,790,048)
Funds from securities issued	(40,187,105)	(64,701)	(40,251,806)
Subordinated debt	(1,401,348)	-	(1,401,348)
Provisions	(3,429,291)	-	(3,429,291)
Other liabilities	(42,242,831)	-	(42,242,831)
Sub-total	9,294,301		13,066,683
Goodwill	-	4,221,787	4,221,787
Total amount of shareholders' equity acquired	9,294,301		17,288,470

(1) Based on an assessment made on July 01, 2016, were identifiable the fair values of the assets acquired and liabilities assumed in the acquisition.

The fair value of the consideration transferred was composed as follows:

	R\$ thousand
Payment to HSBC Latin America Holding Limited, net of adjustment after closure ⁽¹⁾	15,665,367
Adjustment to the cost acquisition related to the fair value of the firm commitment ⁽²⁾	1,623,103

Fair value of the consideration transferred

17,288,470

(1) Considers the IOF collection, and withholding Income Tax; and

(2) Considers the results from changes to the fair value of the firm commitment attributable to the hedged risk that was recognized in the statement in the financial position hired with the objective of protecting the effects of exchange rate variation of the firm commitment, though the use of a hedging instrument derivative.

In December 2016, Bradesco, based on a study report on purchase price allocation ("PPA"), prepared by a contracted specialized and independent company, made the initial allocation of the fair value of assets acquired and liabilities assumed by HSBC Brasil, as follows:

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The value of the investment recorded by Bradesco includes goodwill in the acquisition of shares in the amount of R\$ 4,221,787 thousand, as follows:

	R\$ thousand
Shareholders' equity acquired	9,294,301
Fair value of assets acquired and liabilities assumed	(221,361)
Intangible assets acquired	3,993,743
Goodwill in the acquisition of the "HSBC Bank" and "HSBC Serviços" investments	4,221,787
Fair value of the consideration transferred	17,288,470

These acquisitions were recorded on the business combination method and the companies were consolidated from the date that the majority control was acquired.

The goodwill on acquisition, in the amount of R\$ 4,221,787 thousand, recorded by Bradesco, is not amortized and is subject to annual impairment test. Goodwill is attributed to the expected future profitability of the respective businesses acquired and to the strengthening of Bradesco's strategy to strengthen its presence throughout the national territory, giving a greater degree of competition in a highly competitive market, so as to take advantage of the synergies generated by the products and base of HSBC Brasil customers, which are complementary.

Save to the extent that specific allowance, provision or reserve is made in Closing Statement, the HSBC shall indemnify and keep indemnify the Bradesco for all Losses, including legal costs, filing or any other fees and any liability to Tax incurred by the Bradesco, and from the acquisition of HSBC Brasil.

b) Consolidation

The consolidated financial statements include the financial statements of Bradesco and those of its direct and indirect subsidiaries, including exclusive mutual funds and special purpose entities.

The main subsidiaries included in the consolidated financial statements are as follows:

	Activity	Country	Shareholding interest (%)	
			December 31

⁽²⁾ Companies originating from the acquisition, in July 2016, of HSBC Brasil; and

⁽¹⁾ Increased participation through the subscription of shares in June 2016;

⁽³⁾ New denomination of the HSBC Brasil.

None of the investments in subsidiary, associates and joint ventures presented significant restrictions on transferring resources in the form of cash dividends or repayment of obligations, during the periods reported.

i. Subsidiaries

b) Consolidation

Subsidiaries are all of the companies over which the Organization, has control. The Organization has control over an investee if it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The subsidiaries are fully consolidated from the date at which the Organization obtains control until the date when control ceases.

For acquisitions meeting the definition of a business combination, the acquisition method of accounting is used. The cost of an acquisition is measured as the fair value of the consideration, including assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the consideration given over the fair value of the Organization's share of the identifiable net assets and non-controlling interest acquired is recorded as goodwill. Any goodwill arising from business combinations is tested for impairment at least once a year and whenever events or changes in circumstances may indicate the need for an impairment write-down. If the cost of acquisition is less than the fair value of the Organization's share of the net assets acquired, the difference is recognized directly in the consolidated statement of income.

For acquisitions not meeting the definition of a business combination, the Organization allocates the cost between the individual identifiable assets and liabilities. The cost of acquired assets and liabilities is determined by (a) recognizing financial assets and liabilities at their fair value at the acquisition date; and (b) allocating the remaining balance of the cost of purchasing assets and assuming liabilities to individual assets and liabilities, other than financial instruments, based on their relative fair values at the acquisition date.

i. **Associates**

Companies are classified as associates if the Organization has significant influence, but not control, over the operating and financial management policy decisions. Normally significant influence is presumed when the Organization holds in excess of 20%, but no more than 50%, of the voting rights. Even if less than 20% of the voting rights are held, the Organization could

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

still have significant influence through its participation in the management of the investee or representations on its Board of Directors, providing it has executive power; i.e. voting power.

Investments in associates are recorded in the Organization's consolidated financial statements using the equity method and are initially recognized at cost. The investments in associates include goodwill (net of any impairment losses) identified at the time of acquisition.

ii. Joint ventures

The Organization has contractual agreements in which two or more parties undertake activities subject to joint control. Joint control is the contractual sharing of control over an activity and it exists only if strategic, financial and operating decisions are made on a unanimous basis by the parties. A joint venture is an arrangement in which the Organization has joint control, whereby the Organization has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. Investments in joint ventures are recorded in the consolidated financial statements of the Organization using the equity method.

iii. Structured entities

A structured entity is an entity that has been designed such that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

Structured entities normally have some or all of the following features or characteristics:

- restricted activities;
- b) Consolidation

- a narrow and well-defined objective, such as, to effect a specific structure like a tax efficient lease, to perform research and development activities, or to provide a source of capital or funding to an entity or to provide investment opportunities for investors by passing risks and rewards associated with the assets of the structured entity to investors;
- thin capitalisation, that is, the proportion of 'real' equity is too small to support the structured entity's overall activities without subordinated financial support; and
- financing in the form of multiple contractually linked instruments to investors that create concentrations of credit risk or other risks (tranches).

iv. Transactions with and interests of non-controlling shareholders

The Organization applies a policy of treating transactions with non-controlling interests as transactions with equity owners of the Bank. For purchases of equity from non-controlling interests, the difference between any consideration paid and the share of the carrying value of net assets of the subsidiary acquired is recorded in equity. Gains or losses on sales to non-controlling shareholders are also recorded in equity.

Profits or losses attributable to non-controlling interests are presented in the consolidated statements of income under this title.

v. Balances and transactions eliminated in the consolidation

Intra-group transactions and balances (except for foreign currency transaction gains and

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

losses) are eliminated in the consolidation process, including any unrealized profits or losses resulting from operations between the companies except when unrealized losses indicate an impairment of the asset transferred which should be recognized in the consolidated financial statements. Consistent accounting policies as well as similar valuation methods for similar transactions, events and circumstances are used throughout the Organization for the purposes of consolidation.

c) Foreign currency translation

i. Functional and presentation currency

Items included in the financial statements of each of the Organization's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in Brazilian Reais (R\$), which is the Organization's presentation currency. The domestic and foreign subsidiaries use the Real as their functional currency, with the exception of the subsidiary in Mexico, which uses the Mexican Peso as its functional currency.

ii. Transactions and balances

Foreign currency transactions, which are denominated or settled in a foreign currency, are translated into the functional currency using the exchange rates prevailing on the dates of the transactions.

Monetary items denominated in foreign currency are translated at the closing exchange rate as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated at the exchange rate on the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates on the date when the fair value was determined.

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at each period exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of income as "Net gains/(losses) of foreign currency transactions".

In the case of changes in the fair value of monetary assets denominated in foreign currency classified as available for sale, a distinction is made between translation differences resulting from changes in amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortized cost are recognized in the consolidated statement of income, and other changes in the carrying amount, except impairment, are recognized in equity.

iii. Foreign operations

The results and financial position of all foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each consolidated statement of financial position presented are translated at the closing rate at the reporting date;
- Income and expenses for each consolidated statement of income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

effect of the rate prevailing on the transaction dates, in which case income and expenses are translated at the rates in effect on the dates of the transactions); and

- All resulting exchange differences are recognized in other comprehensive income.

Exchange differences arising from the above process are reported in equity as “Foreign currency translation adjustment”.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to ‘Other comprehensive income’. If the operation is a non-wholly owned subsidiary, then the relevant proportion of the transaction difference is allocated to the non-controlling interest. When a foreign operation is partially sold or disposed, such exchange differences, which were recognized in equity, are recognized in the consolidated statement of income as part of the gain or loss on sale.

d) Cash and cash equivalents

Cash and cash equivalents include: cash, bank deposits, unrestricted balances held with the Central Bank of Brazil and other highly liquid short-term investments, with original maturities of three months or less and which are subject to insignificant risk of changes in fair value, used by the Organization to manage its short-term commitments. See Note 19(b) – “Cash and cash equivalents”.

e) Sale and repurchase agreements

Securities sold subject to repurchase agreements are presented in the consolidated financial statements in “Financial assets pledged as collateral”. The counterparty liability is included in “Deposits from Banks”. Securities purchased under agreements to resell are recorded in “Loans and advances to banks” or “Loans and advances to customers”, as appropriate. The difference between sale and repurchase price is treated as interest in the consolidated statement of income and recognized over the life of the agreements using the effective interest rate method.

f) Financial assets and liabilities

i. **Financial assets**

The Organization classifies financial assets in the following four categories: measured at fair value through profit or loss; available for sale; held to maturity and loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets upon initial recognition.

• **Measured at fair value through profit or loss**

Financial assets are initially recorded at fair value with subsequent changes to the fair value recognized immediately in profit or loss. These assets can be subdivided into two distinct classifications at the time of initial recognition: financial assets designated at fair value through profit or loss and financial assets held for trading.

- ***Financial assets designated at fair value through profit or loss***

The Organization does not have any financial assets designated at fair value through profit or loss.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- Financial assets held for trading (non Derivatives)

A financial asset is classified as held for trading if it is acquired by Management for the purpose of selling it in the short term or if it is part of a portfolio of identified financial instruments that are managed together for short-term profit or position taking. Derivative financial instruments are also categorized as held for trading.

Financial assets held for trading are initially recognized in the consolidated statement of financial position at fair value and the transaction costs are recorded directly in the consolidated statement of income.

Realized and unrealized gains and losses arising from changes in fair value of non Derivatives assets are recognized directly in the consolidated statement of income under "Net gains and losses from financial instruments held for trading." Interest income on financial assets held for trading are included in "Net interest income". For the treatment of Derivatives assets see Note 2(f)(iii) below.

• Financial assets available for sale

Financial assets available-for-sale are non-derivative financial assets that are intended to be held for an undefined period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates, equity prices or that are not classified as loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss.

Financial assets available-for-sale are initially recognized at fair value, which is the cash consideration including any transaction costs and, subsequently, are measured at fair value with gains and losses being recognized in the consolidated statement of comprehensive income, except for impairment losses and foreign exchange gains and losses, until the financial asset is derecognized. If a financial asset available-for-sale is determined to be impaired, the cumulative gain or loss previously recognized in other

comprehensive income is recognized in the consolidated statement of income.

Interest is recognized in the consolidated statement of income using the effective interest method. Dividends on available-for-sale equity instruments are recognized in the consolidated statement of income in 'Dividend income' when the Organization's right to receive payment is established. Exchange gains and losses on investments in debt securities classified as available for sale are recognized in the consolidated statement of income. See Note 2(f)(viii)(b) for details of the treatment of impairment losses.

- **Investments held to maturity**

Investments held to maturity are non-derivative financial assets with fixed or determinable payments and fixed term maturities, which the Organization has the positive intention and ability to hold to maturity, and are not designated as at fair value through profit or loss or available for sale and do not meet the definition of loans and receivables.

Investments held to maturity are recognized initially at fair value including direct and incremental costs, and are subsequently recorded at amortized cost, using the effective interest rate method.

Interest on investments held-to-maturity is included in the consolidated statement of income

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

and reported as 'Interest and similar income'. In the case of impairment, the impairment loss is reported as a deduction from the carrying value of the investment and is recognized in the consolidated statement of income.

- **Loans and receivables**

Loans and receivables are non-derivative financial assets having fixed or determinable payments that are not quoted in an active market, that have not been designated as "available for sale" or "at fair value through profit or loss" and that the Organization has no intention of selling, either immediately or in the near term.

Loans and receivables are initially measured at their fair value plus direct transaction costs and are subsequently valued at amortized cost using the effective interest rate method.

Loans and receivables are reported in the consolidated statement of financial position as loans and advances to banks or customers. Interest on loans is included in the consolidated statement of income and is reported as "Interest and similar income". In the case of impairment, the impairment loss is reported as a deduction in carrying amount of loans and advances, and is recognized in the consolidated statement of income as "Impairment of loans and advances".

- ii. **Financial liabilities**

The Organization classifies its financial liabilities under the following categories: measured at fair value through profit and loss and amortized cost.

- **Measured at fair value through profit and loss**

- f) Financial assets and liabilities

These financial liabilities are recorded and measured at fair value and the respective changes in fair value are immediately recognized in the income statement. These liabilities can be subdivided into two different classifications upon initial recognition: financial liabilities designated at fair value through profit and loss and financial liabilities held for trading.

- ***Financial liabilities designated at fair value through profit and loss***

The Organization does not have any financial liability classified at fair value through profit and loss in income.

- ***Financial liabilities held for trading***

Financial liabilities held for trading recognized by the Organization are derivative financial instruments. For the treatment of Derivatives liabilities see Note 2(f)(iii) below.

• **Financial liabilities at amortized cost**

These are financial liabilities that are not classified as at fair value through profit or loss. Initially they are recognized at fair value and, subsequently, are measured at amortized cost. They include deposits from banks and customers, securities issued and subordinated debt securities, among others.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

iii. Derivative financial instruments and hedge transactions

Derivatives are initially recognized at fair value on the date the derivative contract is signed and are, subsequently, re-measured at their fair values with the changes recognized in the income statement under "Net gains and losses from financial instruments for trading."

Fair values are obtained from quoted market prices in active markets (for example, for exchange-traded options), including recent market transactions, and valuation techniques (for example for swaps and foreign currency transactions), such as discounted cash-flow models and options-pricing models, as appropriate. The calculation of fair value, the counterparty's and the entity's own credit risk are considered.

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not recorded at fair value through profit or loss. These embedded derivatives are separately accounted for at fair value, with changes in fair value recognized in the consolidated statement of income.

iv. Recognition

Initially, the Organization recognizes loans and advances, deposits, securities issued and subordinated debts and other financial assets and liabilities on the trade date, in accordance with the contractual provisions of the instrument.

v. Derecognition

Financial assets are derecognized when the contractual rights to receive the cash flows from these assets have ceased to exist or the assets have been transferred and, substantially, all the risks and rewards of

f) Financial assets and liabilities

ownership of the assets are also transferred. Financial liabilities are derecognized when they have been discharged, paid, redeemed, cancelled or expired. If a renegotiation or modification of terms of an existing financial asset is such that the cash flows of the modified asset are substantially different from those of the original unmodified asset, then the original financial asset is derecognised and the modified financial asset is recognised as a new financial asset and initially measured at fair value.

vi. **Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when, the Organization has the intention and the legal enforceable right to offset the recognized amounts on a net basis or realize the asset and settle the liability simultaneously.

vii. **Determination of fair value**

The determination of the fair values for the majority of financial assets and liabilities is based on the market price or quotes of security dealers for financial instruments traded in an active market. The fair value for other instruments is determined using valuation techniques. The valuation techniques which include use of recent market transactions, discounted cash flow method, comparison with other instruments similar to those for which there are observable market prices and valuation models.

For more common other instruments the Organization uses widely accepted valuation

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

models that consider observable market data in order to determine the fair value of financial instruments.

For more complex instruments, the Organization uses own models that are usually developed from standard valuation models. Some of the information included in the models may not be observable in the market and is derived from market prices or rates or may be estimated on the basis of assumptions.

The value produced by a model or by a valuation technique is adjusted to reflect various factors, since the valuation techniques do not necessarily reflect all of the factors that market participants take into account during a transaction.

The valuations are adjusted to consider the risks of the models, differences between the buy and sell price, credit and liquidity risks, as well as other factors. Management believes that such valuation adjustments are necessary and appropriate for the correct evaluation of the fair value of the financial instruments recorded in the consolidated statement of financial position.

viii. Impairment of financial assets

(a) Financial assets recognized at amortized cost

On each reporting date, the Organization assesses whether there is objective evidence that financial assets are impaired. The financial assets are impaired and impairment losses are recognized only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Organization uses to determine that there is objective evidence of an impairment include:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the granting to the borrower of a concession that the lender would not otherwise consider for economic or legal reasons relating to the borrower's financial difficulty;
- when it becomes probable that the borrower will enter bankruptcy or other financial reorganization;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the loss event cannot yet be identified at the level of the individual financial assets in the portfolio, including:
 - (i) adverse changes in the payment status of group assessed borrowers; and
 - (ii) national or local economic conditions that correlate with defaults in the assets.

The Organization takes into consideration evidence of impairment loss for both individually significant assets and groups of assets. All significant financial assets are evaluated to detect specific losses.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

All significant assets for which the assessment indicates that there is no specific impairment are valued as a group to detect any impairment loss that may have occurred, although not yet identified. The financial assets which are not individually significant are valued as a group to detect any collective impairment loss (recorded at the amortized cost) based on similar risk features. Assets that are individually assessed for impairment and for which an impairment loss is recognized are not included in a collective assessment of impairment.

The amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through provisions and the amount of the loss is recognized in the consolidated statement of income.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit-risk characteristics (that is, on the basis of the Organization's rating process that considers product type, market segment, geographical location, collateral type, past-due status and other related factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit-risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

The methodology and assumptions used for estimating future cash flows are reviewed regularly to mitigate any differences between loss estimates and actual loss experience.

Following impairment, interest income is recognized using the effective rate of interest which was used to discount the future cash flows for the purpose of measuring the impairment loss.

When a loan is uncollectible, it is written off against the related allowance for loan impairment. Such loans are written off after all the relevant collection procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the consolidated statement of income.

(b) Financial assets classified as available for sale

The Organization assesses, at each reporting date, whether there is objective evidence that a financial asset or group of financial assets is impaired. For debt securities the Organization adopts the assessment described in item (a) above, in order to identify an impairment event.

In the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered objective evidence of impairment resulting in the recognition of an impairment loss.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss – is removed from equity and recognized in the income statement.

If, in a subsequent period, the fair value increases, for debt instrument classified as available for sale, and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the consolidated statement of income. Impairment losses recognized in the consolidated statement of income on equity instruments are not reversed through the consolidated statement of income. Increases in the fair value of equity instruments after impairment are directly recognized in equity – other comprehensive income.

g) Non-current assets held for sale

Under certain circumstances, property is repossessed following foreclosure of loans that are in default. Repossessed properties are measured at the lower of their carrying amount and fair value less the costs to sell and are included within "Non-current assets held for sale."

h) Property and equipment

i. Recognition and valuation

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses (see Note 2(k) below), if any.

The cost includes expenses directly attributable to the acquisition of an asset.

The cost of assets internally produced includes the cost of materials and direct labor, as well as any other costs that can be directly allocated and that are necessary for them to function. Software acquired for the operation of the related equipment is recorded as part of the equipment.

When different parts of an item have different useful lives, and separate control is practical, they are recorded as separate items (main components) comprising the property and equipment.

Useful lives and residual values are reassessed at each reporting date and adjusted, if appropriate.

Gains and losses from the sale of property and equipment are determined by comparing proceeds received with the carrying amount of the asset and are recorded in the consolidated income statement under the heading "Other operating income/(expenses)."

ii. Subsequent costs

Expenditure on maintenance and repairs of property and equipment items is recognized as an asset when it is probable that future economic benefits associated with the items will flow to the Organization for more than one year and the cost can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance costs are charged to the consolidated statement of income during the reporting period in which they are incurred.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

iii. Depreciation

Depreciation is recognized in the consolidated statement of income using the straight-line basis and taking into consideration the estimated useful economic life of the assets. The depreciable amount is the gross-carrying amount, less the estimated residual value at the end of the useful economic life. Land is not depreciated. Useful lives and residual values are reassessed at each reporting date and adjusted, if appropriate.

i) Intangible assets

Intangible assets comprise separately identifiable non-monetary items, without physical substance due to business combinations, such as goodwill and other purchase intangible assets, computer software and other such intangible assets. Intangible assets are recognized at cost. The cost of an intangible asset, acquired in a business combination, is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortized over their estimated useful economic life. Intangible assets with an indefinite useful life are not amortized.

Generally, the identified intangible assets of the Organization have a definite useful life. At each reporting date, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits – see Note 2(k) below.

i. Goodwill

Goodwill (or bargain purchase gain) arises on the acquisition of subsidiaries, associates and joint ventures.

Goodwill reflects the excess of the cost of acquisition in relation to the Organization's share of the fair value of net identifiable assets or liabilities of an acquired subsidiary, associate or joint venture on the date of acquisition. Goodwill originated from the acquisition of subsidiaries is recognized as "Intangible Assets", and the goodwill from acquisition of associates and joint ventures is included in the carrying amount of the investment, (see Note 2(b)(ii)). When the difference between the cost of acquisition and the Organization's share of the fair value of net identifiable assets or liabilities is negative (bargain purchase gain), it is immediately recognized in the consolidated statement of income as a gain on the acquisition date.

Goodwill is tested annually, as well as whenever a trigger event has been observed, for impairment (see Note 2(k) below). Gains and losses realized in the sale of an entity include consideration of the carrying amount of goodwill relating to the entity sold.

ii. Software

Software acquired by the Organization is recorded at cost, less accumulated amortization and accumulated impairment losses, if any.

Internal software-development expenses are recognized as assets when the Organization can demonstrate its intention and ability to complete the development, and use the software in order to generate future economic benefits. The capitalized costs of internally developed software include all costs directly attributable to development and are amortized over their useful lives. Internally developed software is recorded at its capitalized cost less amortization and impairment losses (see Note 2(k) below).

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Subsequent software expenses are capitalized only when they increase the future economic benefits incorporated in the specific asset to which it relates. All other expenses are recorded as expenses as incurred.

Amortization is recognized in the consolidated statement of income using the straight-line method over the estimated useful life of the software, beginning on the date that it becomes available for use. The estimated useful life of software is from two to five years. Useful lives and residual values are reviewed at each reporting date and adjusted, if appropriate.

iii. Other intangible assets

Other intangible assets refer basically to the customer portfolio and acquisition of banking service rights. They are recorded at cost less amortization and impairment losses, if any, and are amortized over the period during which the asset is expected to contribute, directly or indirectly, to the future cash flows.

These intangible assets are reviewed annually, or whenever events or changes in circumstances occur which could indicate that the carrying amount of the assets cannot be recovered. If necessary, the write-off or impairment (see Note 2(k) below) is immediately recognized in the consolidated statement of income.

j) Leasing

The Organization has both operating and finance leases and operates as a lessee and a lessor.

Leases in which a significant part of the risks and benefits of the asset is borne by the lessor are classified as operating leases. For leases in which a significant part of the risks and benefits of the asset is borne by the lessee, the leases are classified as financial leasing.

Leases under the terms of which the Organization assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

As a lessee, the Organization classifies its leasing operations mainly as operating leases, and the monthly payments are recognized in the financial statements using the straight-line method over the term of the lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

When an operating lease is terminated before the contract expires, any payment that may be made to the lessor in the form of a penalty is recognized as an expense for the period.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

As a lessor, the Organization has substantial finance lease contracts, both in value or total

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

number of contracts.

i. Finance Leases

Finance leasing assets in the consolidated statement of financial position are initially recognized in the "loans and advances" account at an amount equal to the net investment in the lease.

The initial direct costs generally incurred by the Organization are included in the initial measurement of the leasing receivable and recognized as part of the effective interest rate of the contract, decreasing the amount of income recognized over the lease term. These initial costs include amounts for commissions, legal fees and internal costs. The costs incurred in relation to the negotiation, structuring and sales of leases are excluded from the definition of initial direct costs and therefore are recognized as expenses at the beginning of the lease term.

Recognition of financial revenue reflects a constant rate of return on the net investment made by the Organization.

The estimated non-guaranteed residual values used in the calculation of the gross investment of the lessor in the lease are reviewed at least annually. If there is a decrease in the estimated non-guaranteed residual value, the income allocated over the period of the lease is also reviewed periodically and any decrease in relation to the accumulated values is immediately recognized in the consolidated statement of income.

ii. Operating leases

The assets leased under operating leases, where the Organization acts as lessor, are recognized in the consolidated statement of financial position as property and equipment according to the nature of the item

j) Leasing

leased.

The initial direct costs incurred by the Organization are added to the carrying amount of the leased asset and are recognized as expenses over the period of the lease and on the same basis as the income recognition.

Revenue from leasing is recognized using the straight-line method over the term of the lease, even if the payments are not made on the same basis. Costs, including depreciation and maintenance, incurred in the generation of income are recognized as expenses.

The depreciation policy for leased assets is the same as the depreciation policy used by the Organization for similar assets.

k) Impairment of non-financial assets (except for deferred tax assets)

Assets that have an indefinite useful life such as goodwill are not subject to amortization and are tested annually at the same date to verify the existence of impairment.

Assets, which are subject to amortization or depreciation, are reviewed to verify impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized based on the excess the carrying amount of the asset or the cash generating unit (CGU) over its estimated recoverable amount. The recoverable amount of an asset or CGU is the greater of its fair value, less costs to sell, and its value in use.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

For the purpose of impairment testing, the assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Subject to a ceiling of the operating segments, for the purpose of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to groups of CGU's that are expected to benefit from the synergies of the combination.

The recoverable amount is the higher of an asset/CGU's fair value less costs to sell and its value in use. When assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects the current market conditions of the time value of money and the specific risks of the asset or CGU.

The Organization's corporate assets do not generate separate cash inflows and are utilized by more than one CGU. Corporate assets are allocated to CGU's on a reasonable and consistent basis and tested for impairment as part of the testing of the CGU to which the corporate asset is allocated.

Impairment losses are recognized in the consolidated Statement of Income. Impairment losses recognized in respect of CGU's are allocated first to reduce the carrying amount of any goodwill allocated to the CGU (group of CGU's) and then to reduce the carrying amount of the other assets in the CGU (group of CGU's) on a pro rata basis.

An impairment of goodwill cannot be reversed. With regard to other assets, an impairment loss recognized in previous periods is reassessed at each reporting date for any indications that the impairment has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is only reversed to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment had been recognized.

I) Deposits, debt securities issued and subordinated liabilities

Deposits, debt securities issued and subordinated liabilities are the main sources of funding used by the Organization to finance its operations.

They are initially recorded at fair value plus transaction costs and are subsequently measured at amortized cost using the effective interest method.

m) Provisions, contingent liabilities and contingent assets

A provision is recognized when, as a result of a past event, the Organization has a present legal or constructive obligation that can be reliably estimated and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions were established by Management whenever it considers that there is a probable loss taking into account the opinion of their legal advisors; the nature of the actions; the similarity to previous suits; the complexity and the positioning of the Courts.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Contingent liabilities are:

(a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or

(b) a present obligation that arises from past events but is not recognized because:

(i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

(ii) the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets are recorded only when there are real guarantees or favorable and non-appealable court decisions, and when the gain is considered to be virtually certain. Contingent assets for which the expectation is the outcome will be favorable are only disclosed in the financial statements, when material.

n) Classification of insurance contracts and investments

An insurance contract is a contract in which the Organization accepts a significant insurance risk from the policy holder by agreeing to compensate the policyholder if a specific, uncertain, future event adversely affects the policy holder. Reinsurance contracts are also treated as insurance contracts because they transfer significant insurance risk. Contracts in the Insurance segment classified as investment contracts are related to our capitalization bonds, which do not transfer significant insurance risk and are accounted for as financial instruments in accordance with IAS 39.

o) Insurance and pension plan technical provisions

i. Property damage

The Provision for Unearned Premiums (PPNG) is calculated on a daily pro-rata basis using premiums net of coinsurance premiums, including amounts ceded through reinsurance operations, and the value registered in the consolidated statement of financial position corresponds to the unexpired risk period of the insurance contracts less initial contracting costs. The portion of these reserves corresponding to the estimate for risks in effect on contracts that have been issued but are not yet fully binding is designated 'PPNG-RVNE'.

The reserve for 'incurred but not reported' (IBNR) claims is calculated based on incurred but not paid' (IBNP) claims less the balance of the reserve for 'unsettled' claims (PSL) on the calculation date. A final estimate of IBNP is calculated using semi-annual run-off triangles. The run-off triangles consider the historical development of claims paid in the prior last 10 half-year periods to determine a future projection per occurrence period, reflecting the changing expectation of the amount provisioned along the regulatory process.

The reserve for unsettled claims (PSL) is determined based on the indemnity payment estimates, considering all administrative and judicial claims existing at the reporting date, restated monetarily, net of salvage and payments expected to be received.

The Complementary Reserve for Coverage (PCC) shall be established when there is insufficiency of the technical provisions required under the legislation, as determined in the

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Liability Adequacy Test (see Note 2(o)(vi) below). At the reporting date management did not identify the need for PCC on property damage contracts.

The reserve for related expenses (PDR) is recorded on a monthly basis to cover expenses related to estimated claims and benefits. It covers both costs that can be individually allocated to each claim as well as claims costs not discriminated, meaning those incurred at the portfolio level.

Other provisions correspond to the Provision for Administrative Expenses (PDA) arising on the Mandatory Insurance For Personal Injury Caused by Motor Vehicles (DPVAT) insurance operations.

ii. Life insurance, excluding life insurance with survival coverage (VGBL product)

The Provision for Unearned Premiums (PPNG) is calculated on a daily pro-rata basis using premiums net of coinsurance premiums, but including amounts ceded through reinsurance operations, and the value registered in the consolidated statement of financial position corresponds to the unexpired risk period of the insurance contracts and includes an estimate for risks in effect on contracts that have been issued but are not yet fully binding is designated 'PPNG-RVNE'.

The Mathematical Provision for Benefits to be Granted (PMBaC) is calculated by the difference between the present value of the future benefits and the present value of the future contributions to be received for these benefits.

The Provision for Redemptions and other Amounts to be Settled (PVR) comprises amounts related to redemptions to settle, premium refunds owed and portability (transfer-outs) requested but not yet transferred to the recipient insurer.

The reserve for 'incurred but not reported' (IBNR) claims is calculated based on incurred but not paid (IBNP) claims less the reserve for unsettled claims (PSL) on the calculation date. A final estimate of IBNP claims is calculated using semi-annual run-off triangles. The run-off triangles consider the historical development of claims paid in the prior 16 half-year periods to determine a future projection per occurrence period.

With respect to the insurance portfolios acquired, the reserve for 'incurred but not reported' (IBNR) claims is constituted to cover the expected values to be settled based on incurred but not reported claims until the base date of calculation. It is calculated by the Bornhuetter-Ferguson method, using as a mathematical model run-off triangles of claims incurred from 2001;

The reserve for unsettled claims (PSL) considers all claim notifications received up to the end of the reporting period. The reserve is adjusted for inflation and includes all claims in litigation.

With respect to the insurance portfolios acquired, the reserve for unsettled claims (PSL) is made based on estimates of indemnities, for events incurred and appropriately reported by the insured and/or beneficiaries until the balance sheet date. It includes lawsuits related to claims, which are constituted based on the analysis of legal advisers for the assessment of risks related to the sum insured. It also includes an estimate of adjustments of incurred but not sufficiently reported (IBNER) for the aggregate development of claims reported but not yet paid, whose values may be changed throughout the process until their final settlement.

The Complementary Reserve for Coverage (PCC) refers to the amount necessary to

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

complement technical reserves, as calculated through the Liability Adequacy Test. LAT is calculated using statistical and actuarial methods based on realistic considerations, taking into account the biometric table BR-EMS of both genders and improvement using a risk free forward interest rate structures which was approved by SUSEP to discount the future cash flows. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy.

The Technical Surplus Provision (PET) corresponds to the difference between the value of the expected cost and the actual cost of claims that occurred during the period for contracts of individual life insurance with rights to participate in technical surplus.

The Provision of Related Expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partially regimes, the reserve covers claims incurred. For products structured under a capitalization regime, the reserve covers the expected expenses related to incurred claims and also claims expected to be incurred in the future.

iii. Health and Dental Insurance

The reserve for claims incurred but not reported (IBNR) is calculated from the final estimate of claims already incurred and still not reported, based on monthly run-off triangles that consider the historical development of claims reported in the last 12 months to establish a future projection per period of occurrence

The provision for unsettled claims (PSL) is based on claims received up to the reporting date, including judicial claims and related costs adjusted for inflation.

The mathematical reserve for unvested benefits (PMBAC) relates to the individual health care plan portfolio and accounts for the risk related to the cover of the holder's dependents for five years following the death of the holder. It is calculated using: a 5.1% annual discount rate (5.2% in 2015); the period over which holders

are expected to remain in the plan up to their death; and the projected costs of the five-year-period cover in which no premiums will be received.

The mathematical reserve of benefits granted (PMBC) is constituted by the obligations arising from the contractual clauses of remission of installments in cash, regarding the coverage of health assistance and by the premiums through payment of insured persons participating in the Bradesco Saúde insurance - "GBS Plan", and considering a discount rate of 5.1% per annum (5.2% in 2015).

The unearned premium or contribution reserve (PPCNG) is calculated on the currently effective contracts on a daily pro-rata basis based on the portion of health insurance premiums corresponding to the remaining period of coverage.

The other provisions for the individual health portfolio are constituted to cover differences between the expected present value of claims and related future costs and the expected present value of future premiums, considering a discount rate of 5.1% per year (5.2% in 2015).

Provisions for IBNR, PMBAC, PMBC and Other Provisions, listed above, are calculated using methodologies and assumptions established in the actuarial technical notes approved by the National Health Agency - ANS.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

iv. Operations with DPVAT Insurance

Revenue from DPVAT premiums and the related technical reserves are recorded gross, based on reports received from Seguradora Lider S.A. which acts as the “lead insurer” of the Consortium of Insurance DPVAT S.A. in proportion to the percentage of Bradesco’s stake in the consortium. It is the function of the lead insurer to collect the premiums, coordinate policy issuance, settle claims and manage the administrative costs within the consortium, in accordance with the CNSP Normative Resolution nº 332/15. As defined in the regulations of the consortium, 50% of the monthly net income is distributed to the consortium’s members in the following month. The remaining 50% of the monthly income is retained by the lead insurer over the year and transferred to the members of the consortium at the start of the following year.

v. Open pension plans and life insurance with survival coverage (VGBL product)

The unearned premium reserve (PPNG) is calculated on a daily pro-rata basis, using net premiums and is comprised of the portion corresponding to the remaining period of coverage and includes an estimate for risks covered but not yet issued (RVNE).

The mathematical reserve for unvested benefits (PMBaC) is recorded for participants who have not yet received any benefit. In defined benefit pension plans, the reserve represents the difference between the present value of future benefits and the present value of future contributions, corresponding to obligations assumed in the form of retirement, disability, pension and annuity plans. The reserve is calculated using methodologies and assumptions set forth in the actuarial technical notes.

The mathematical reserve for unvested benefits (PMBaC) related to life insurance and unrestricted benefit pension plans (VGBL and PGBL), and defined contribution plans, includes the contributions, received from participants, net of costs and other contractual charges, plus the financial return generated through the investment of these amounts in units of specially constituted investment funds (FIE).

The Provision for Redemptions and other Amounts to be Settled (PVR) comprises amounts related to redemptions to settle, premium refunds owed and portability (transfer-outs) requested but not yet transferred to the recipient insurer.

The mathematical reserve for vested benefits (PMBC) is recognized for participants already receiving benefits and corresponds to the present value of future obligations related to the payment of those on-going benefits.

The Complementary Reserve for Coverage (PCC) refers to the amount necessary to complement technical reserves, as calculated through the Liability Adequacy Test (see Note 2(o)(vi)). LAT is prepared using statistical and actuarial methods based on realistic assumptions, taking into account the biometric table BR-EMS of both genders, improvement and forward interest rate curves (ETTJ) free from risk as authorized by SUSEP. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy.

The Provision of Related Expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partially regimes, the reserve covers claims incurred. For plans structured under a capitalization regime, the reserve is made to cover the expected expenses related to incurred claims and also claims expected to be incurred in the future.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The Provision for Financial Surplus (PEF) corresponds to the portion of income from investment of reserves that exceeds the minimum returns due to policyholders of pension plans that have a profit share clause.

The Provision for Events Incurred but Not Reported (IBNR) is established based on losses that occurred but were not reported, based on run-off triangles, which considers the historical development of losses over the past 96 months to establish a future projection per period of occurrence.

With respect to the insurance portfolios acquired, the provision of incurred but not reported claims (IBNR) is made to cover the expected values to settle for incurred but not reported claims until the base date of calculation. It is calculated in accordance with the criteria defined in SUSEP Circular n^o 517/15 (amended by SUSEP Circular n^o 521/15).

The reserve for unsettled claims (PSL) considers all claim notifications received up to the end of the reporting period. The reserve is adjusted for inflation.

With respect to the insurance portfolios acquired, the reserve for unsettled claims (PSL) is made based on estimates of indemnities, for the events incurred and appropriately reported by the Insured and/or beneficiaries until the balance sheet date. It includes lawsuits related to claims, which are constituted based on the analysis of legal advisers for the assessment of risks related to the sum insured. It also comprises values relating to accrued unpaid rent contained in the PMBC, which are written off and included in the PSL.

Financial charges on technical provisions, as well as the constitution and/or reversal of the provision of financial excess, are classified as financial expenses and are shown in the line "Net interest income".

vi. Liability Adequacy Test (LAT)

- o) Insurance and pension plan technical provisions

The Organization conducted the liability adequacy test for all the contracts that meet the definition of an insurance contract according to IFRS 4 and which are in force on the date of execution of the test. This test is conducted every six months and the liability of insurance contracts, gross of reinsurance, is calculated as the sum of the carrying amount, deducting the deferred acquisition costs and the related intangibles. This is compared to the expected cash flows arising from the obligations under commercialized contracts and certificates.

The test considers projections of claims and benefits that have occurred and are to occur, administrative expenses, allocable expenses related to the claims, intrinsic options and financial surpluses, salvage and recoveries and other income and expense directly related to the insurance contracts.

To calculate the present value of projected cash flows, the Organization used the risk free forward (ETTJ) rate which was approved by SUSEP.

According to SUSEP Circular nº 517/2015, the test was segmented between life insurance and pension products and property coverage, and liabilities related to DPVAT insurance were not included in the adequacy test.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- **Life and pension products**

For private pension products and Life Insurance with Coverage for Survival, the contracts are grouped based on similar risks or when the insurance risk is managed jointly by the Administration,

The cash flows related to future premiums not recorded in the PPNG were only included in the projections when the result of the LAT without these values was negative.

The result of the liability adequacy test for pension products and life insurance, was fully recognized in profit or loss at the reporting date as provided in SUSEP Circular nº 517/2015.

In the LAT realized in December 2016, there were changes in the Cancellation and Improvement Rate assumptions, considering the biometric tables BR-EMS, both genders, adjusted by longevity development criteria compatible with the latest published versions, according to current legislation.

- **Property Coverage**

The expected present value of cash flows relating to claims incurred - primarily claims costs and salvage recoveries - was compared to the technical provisions for claims incurred - PSL and IBNR.

The expected present value of cash flows relating to claims to be incurred on the policies in force, plus any administrative expenses and other expenses relating to products in run-off, was compared to the sum of the related technical provisions - PPNG and PPNG-RVNE.

The result of the liability adequacy test, for property coverage, did not present insufficiency and, consequently, no additional PCC provisions were recorded.

p) Reinsurance contracts

Reinsurance contracts are used in the normal course of operations with the purpose of limiting potential losses, by spreading risks. Liabilities relating to contracts that have been reinsured are presented gross of their respective recoveries, which are booked as assets since the existence of the reinsurance contract does not nullify the Organization's obligations with the insured parties.

As required by the regulators, reinsurance companies with headquarters abroad must have a minimum rating from a risk classification agency to reinsure risks all other reinsurance operations must be with national reinsurers If there are indications that the amounts recorded will not be realized by its carrying amount, these assets will be adjusted for impairment.

q) Deferred acquisition costs

These comprise deferred acquisition costs including commissions and brokers' fees related to the sale of insurance policies. Deferred commissions are recognized in the consolidated statement of income over the life of the respective policies and pension plan contracts or over an average period of twelve months. Expenses relating to insurance agency operations relating to the sale of health plans are appropriated over a twenty-four month period.

It also includes the deferred acquisition costs relating to exclusivity contracts with retailers for marketing insurance extended guarantees, for the initial period of 12 years, for an initial period of 12 years, with the length of over four years of contracts totaling 16 years.

r) Financial guarantees

Financial guarantees are contracts that require the Organization to make specific payments under

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

the guarantee for a loss incurred when a specific debtor fails to make a payment when due in accordance with the terms of the debt instrument.

Financial guarantees are initially recognized in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Organization's obligations under such guarantees are measured as the higher of the initial amount, less the accumulated amortization, and the best estimate of the amount required to settle the guarantee if management deems such expenditure to be probable. These estimates are determined based on experience of similar transactions and history of past losses, supplemented by the judgment of Management. The fee income earned is recognized on a straight-line basis over the life of the guarantee. Any increase in the liability relating to guarantees is reported in the consolidated statement of income within "Other operating income/ (expenses)".

s) Employee benefits

i. Defined contribution plan

Bradesco and its subsidiaries sponsor pension plans for their employees and Management of the “Free Benefit Generator Plan (PGBL)” type. The PGBL is a pension plan with defined contributions which allows financial resources to be accumulated throughout the professional career of the participants based on contributions paid by them and the sponsoring company, the funds of which are invested in an Exclusive Mutual Fund (FIE). The actuarial obligations of PGBL are fully covered by the corresponding FIE. The PGBL is managed by the subsidiaries Bradesco Vida e Previdência S.A..

The PGBL Supplementary Pension Plan was reformulated in October 2014, with contributions from employees and directors of Bradesco and its subsidiaries equal to at least 4% of their salaries. Contributions from Bradesco and its subsidiaries increased from 4% to 5% of salary, plus the percentage destined for death and disability coverages. The contributions concerning participants who in 2001 chose to migrate from the benefit plan defined for PGBL were maintained at the same levels of the previous benefit plan.

Contribution obligations for defined contribution pension plans are recognized as expenses in profit or loss as incurred. Once the contributions are paid, Bradesco, in the capacity of employer, has no obligation to make any additional payment.

In addition to the PGBL described above, the participants who migrated from the defined benefit plan are assured a proportional deferred benefit. For retired and pensioned employees, regardless of whether they are participants in the migrated defined benefit plan or not, the present value of the actuarial obligations of the plan is invested in FIEs.

ii. Defined benefit plans

The Organization’s net obligation, in relation to the defined benefit plans, refers exclusively to institutions acquired and the plans are calculated separately for each plan, estimating the future benefit that the employees have earned in return for their service during the current and prior periods. The benefit is discounted to determine its present value and any unrecognized past service costs and fair value of any plan assets are deducted. The discount rate is the yield at the reporting date on “AA” credit rated bonds, which have maturity dates approximating the terms of the Organization’s obligations. The calculation is made by an actuary, using the projected unit credit method.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

When the benefits of a plan are improved, the portion of increased benefit related to past service by employee is recognized in the consolidated income statement using the straight-line method over the average period until the benefits become vest. To the extent that the benefits have already vested, the expense is recognized in the consolidated statement of income.

iii. Termination benefits

Severance benefits are required to be paid when the employment relationship is terminated by the Organization before the employee's normal date of retirement or whenever the employee accepts voluntary redundancy in return for such benefits.

Benefits which are payable twelve months or more after the reporting date are discounted to their present value.

iv. Short-term benefits

Benefits such as wages, salaries, social security contributions, paid annual leave and paid sick leave, profit sharing and bonuses (if payable within twelve months of the reporting date) and non-monetary benefits such as health care, etc. are recorded as expenses in the consolidated statement of income, without any discount to present value, if the Organization has a present legal or constructive obligation to pay the amount as a result of past service provided by the employee and the obligation can be reliably estimated.

t) Capitalization bonds

The liability for capitalization bonds is registered in the line 'Other liabilities'. Financial liabilities and revenues from capitalization bonds are accrued at the time bonds are issued.

Bonds are issued according to the types of payments, monthly or single payment. Each bond bears a nominal value and the deposit portion of each payment is remunerated at the referential rate (TR) plus 0.5% per month, which is used to determine the liability.

Capitalization bond beneficiaries are eligible for a prize draw. At the end of a certain period that is determined at the time the capitalization bond is issued, a beneficiary may redeem the nominal value paid plus the referential rate (TR), even if they have not won in the draw. These products are regulated by the insurance regulator in Brazil; however, they do not meet the definition of an insurance contract in accordance with IFRS 4 and, therefore, are classified as financial liabilities in accordance with IAS 39.

Unclaimed amounts from "capitalization plans" are derecognized when the obligation legally expires, in accordance with IAS 39 as it relates to the derecognition of a financial liability.

Expenses for placement of "capitalization plans", are recognized as they are incurred.

u) Interest

Interest income and expenses are recognized on an accrual basis in the consolidated statement of income using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments and receipts throughout the expected life of the financial asset or liability (or, when appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective rate, the Organization estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The calculation of the effective interest rate includes all commissions, transaction costs, discounts or bonuses which are an integral part of such rate. Transaction costs are incremental costs directly attributable to the acquisition, issuance or disposal of a financial asset or liability.

v) Fees and commissions

Fees and commission income and expense which are part of and are directly allocable to the effective interest rate on a financial asset or liability are included in the calculation of the effective interest rate.

Other fee and commission income, including account service fees, asset management fees, credit card annual charges, and collection and consortium fees are recognized as the related services are rendered. When a loan commitment is not expected to result in the drawdown of a loan, the related commitment fees are recognized on a straight-line basis over the commitment period. Other fees and commissions expense relate mainly to transaction as the services are received.

w) Net insurance income

Income and expense are recognized on an accrual basis.

Insurance and coinsurance premiums, net of premiums transferred through coinsurance and reinsurance and related commissions, are recognized as income upon issuance of the respective policies / certificates / endorsements and invoices, or at the beginning of the risk period for cases in which the cover begins before issue date, and accounted for on a straight-line basis, over the duration of the policies, through the upfront recognition and subsequent reversal of the provision for unearned premiums and the deferred acquisition costs.

Income from premiums and the acquisition costs related to risks already assumed whose respective policies have not yet been issued are recognized in the consolidated statement of income at the start of the risk coverage period on an estimated basis.

The health insurance premiums are recorded in the premium account issued (result) or unearned premium or contribution reserve (PPCNG), according to the coverage period of the contracts in effect at the balance sheet date.

Revenues and expenses related to DPVAT insurance operations are recorded on the basis of information received from the Seguradora Líder dos Consórcios do Seguro DPVAT S.A.

Accepted co-insurance contracts and retrocession operations are recorded on the basis of information received from the lead co-insurer and IRB - Brasil Resseguros S.A., respectively.

Reinsurance transactions are recorded based on the premium and claims information provided to the reinsures which is subject to their review. Assigned reinsurance premiums are deferred in a manner consistent with the related insurance premium and/or reinsurance agreement.

Acquisition costs relating to the insurance commission are deferred and recognized in proportion to the recognition of earned premium.

The receipts from insurance agency operations are deferred and recognized in income linearly, for a period of 24 months in health insurance operations and for the contractual term (average of 12 to 60 months) in the other operations.

Contributions to pension plans and life insurance premiums with survivor coverage are recognized

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

in income upon their effective receipt.

Income from management fees are recognized as income on an accrual basis at contractually determined rates.

x) Income tax and social contribution expenses

Income tax and social contribution deferred tax assets, calculated on income tax losses, social contribution losses and temporary differences, are recorded in "Other Receivables - Sundry" and the deferred tax liabilities on tax differences in leasing depreciation (applicable only for income tax), mark-to-market adjustments on securities, restatement of judicial deposits, among others, are recorded in "Other Liabilities - Tax and Social Security".

Deferred tax assets on temporary differences are realized when the difference between the accounting treatment and the income tax treatment reverses. Deferred tax assets on income tax and social contribution losses are realizable when taxable income is generated, up to the 30% limit of the taxable profit for the period. Deferred tax assets are recorded based on current expectations of realization considering technical studies and analyses carried out by Management.

The provision for income tax is calculated at 15% of taxable income plus a 10% surcharge. For financial companies, financial company equivalent and of the insurance industry, the social contribution on the profit was calculated until August 2015, considering the rate of 15%. For the period between September 2015 and December 2018, the rate was changed to 20%, according to Law no 13,169/15, returning to the rate of 15% as from January 2019. For the other companies, the social contribution is calculated considering the rate of 9%.

By virtue of the amendment of the rate, the Organização Bradesco constituted, in September 2015, a supplement to the deferred tax asset of social contribution, considering the annual expectations of realization and the respective rates in force in each period, according to the technical study conducted.

Tax expense comprises current and deferred tax. Current and deferred tax are recorded in the consolidated statement of income except when the result of a transaction is recognized directly in equity, in which case the related tax effect is also recorded in equity or in other comprehensive income.

Current tax expenses are the expected amounts payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Current tax payable also includes any tax liability arising from the declaration of dividends.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and amount used for taxation purposes. Deferred tax is not recognized for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries, associates and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

In determining the amount of current and deferred tax the Organization takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The organization believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of various factors, including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve judgments about future events. New information may become available that causes the Organization to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact the tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Additional taxes that arise from the distribution of dividends by the Bank are recognized at the same time as the liability to pay the related dividend is recognized.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

y) Segment reporting

Information for operating segments is consistent with the internal reports provided to the Executive Officers (being the Chief Operating Decision Makers), which are comprised by the Chief Executive Officer, Executive Vice-Presidents, Managing Directors and Deputy Directors. The Organization operates mainly in the banking and insurance segments. The banking operations include operations in retail, middle market and corporate activities, leasing, international bank operations, investment banking and private banking. The Organization's banking activities are performed through its own branches located throughout the country, in branches abroad and through subsidiaries, as well as by means of our shareholding interest in other companies. The insurance segment consists of insurance operations, supplementary pension plans and capitalization plans which are undertaken through a subsidiary, Bradesco Seguros S.A., and its subsidiaries.

z) Equity

Preferred shares have no voting rights, but have priority over common shares in reimbursement of capital, in the event of liquidation, up to the amount of the capital represented by such preferred shares, and the right to receive a minimum dividend per share that is ten percent (10%) higher than the dividend distributed per share to the holders of common shares.

i. Share issue costs

Incremental costs directly attributable to the issuance of shares are shown net of taxes in equity, thus reducing the initial share value.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

ii. Earnings per share

The Organization presents basic and diluted earnings per share data. Basic earnings per share is calculated by dividing the net income attributable to shareholders of the Organization by the weighted average number of shares outstanding during the year, excluding the average number of shares purchased by the Organization and held as treasury shares. Diluted earnings per share are the same as basic earnings per share, as there are no potentially dilutive instruments.

iii. Dividends payable

Dividends on shares are paid and provisioned during the year. In the Meeting of Shareholders are destined at least the equivalent of 30% of the annual net income, in accordance with the the Company's Bylaws. Dividends approved and declared after the reporting date of the financial statements, are disclosed in the notes as subsequent events.

iv. Capital transactions

Capital transactions are transactions between partners qualified as investment owners. These transactions modify the equity held by the controlling shareholder in a subsidiary. Since there is no loss of control, the difference between the amount paid and the fair value of the transaction is recognized directly in equity.

3) Risk Management

Risk-management structure

The risk and capital management structure is made up of committees, which assist the Board of Directors, the CEO and the Board of Executive Officers in their strategic decision-making process.

The Organization has a committee known as the Integrated Risk and Capital Allocation Management Committee, whose duty is to advise the Board of Directors in performing its duties in risk management, capital and control. This committee is assisted by the Capital Management Executive Committee, and Risk Management Executive Committees in managing a) Credit risk, b) Market and Liquidity risk, c) Operational and Social and Environmental risk and d) Bradesco's Insurance Group and BSP Empreendimentos Imobiliários. In addition, it also has the support of the Products and Services Executive Committee and the Executive Committees in business areas, which, among other duties, suggest exposure thresholds to their respective risks and prepare mitigation plans to be submitted to the Integrated Risk and Capital Allocation Management Committee and the Board of Directors.

It is worth highlighting the Integrated Risk Control Department (DCIR), responsible for implementing risk control and capital allocation through practices and certification of existence, execution and effectiveness of controls which assure acceptable risk levels in the Organization's processes, independently, consistently, on a transparent and integrated manner. This Department is also responsible for complying with the Brazilian Central Bank rules for risk management activities.

3.1. Credit risk

Credit risk refers to the possibility of losses associated with the borrower's or counterparty's failure to comply with their financial obligations under the terms agreed, as well as the fall in value of loan agreements resulting from deterioration in the borrower's risk rating, the reduction in gains or remunerations, benefits granted to borrowers in renegotiations, recovery costs and other costs

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

related to the counterparty's noncompliance with the financial obligations.

Credit risk management in the Organization is a continuous and evolving process of mapping, development, assessment and diagnosis through the use of models, instruments and procedures that require a high degree of discipline and control during the analysis of operations in order to preserve the integrity and autonomy of the processes.

The Organization controls the exposure to credit risk which comprises mainly credit operations, securities and derivatives. There is also the credit risk in financial obligations relating to commitments on loan or financial guarantees.

With the objective of not compromising the quality of the portfolio, all aspects inherent to credit concession, concentration, guarantee requirements and terms, among others, are observed.

The Organization continuously maps all the activities that could possibly generate exposure to credit risk, classifying them by their probability and magnitude, identifying their managers, as well as their measurement and mitigation plans.

Counterparty's Credit Risk

The counterparty credit risk to which the Organization is exposed includes the possibility of losses due to the non-compliance by counterparties with their obligations relating to the settlement of financial asset trades, including the settlement of derivative financial instruments. Counterparty credit risk also includes the risk related to a downgrade in the counterparty's credit standing.

The Organization exercises complete control over its net position (the difference between purchase and sale agreements) and potential future exposures from operations where there is counterparty risk. Each counterparty's exposure to risk is treated in the same way and is part of general credit limits granted by the Organization's to its customers. Usually, guarantees associated with this type of operation include margin deposits, which are made by the counterparty with the Organization or with other trustees, whose counterparty's risks are also appropriately evaluated.

Credit Concession

Under the responsibility of the Credit Department, lending procedures are based on the Organization's credit policy emphasizing the security, quality and liquidity of the lending. The process is guided by the risk-management governance and complies with the rules of the Central Bank of Brazil.

The methodologies adopted value business agility and profitability, with targeted and appropriate procedures oriented to the granting of credit transactions and establishment of operating limits.

In the evaluation and classification of customers or economic groups, the quantitative (economic and financial indicators) and qualitative (personal data and behaviors) aspects associated with the customers capacity to honor their obligations are considered.

All business proposals are subject to operational limits, which are included in the Loan Guidelines and Procedures. At branches, the delegation of power to grant a loan depends on its size, the total exposure to the Organization, the guarantees offered, the level of restriction and their credit risk score/rating. Business proposals with risks beyond these limits are subject to technical analysis and approval of by the Credit Department.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In its turn, the Executive Credit Committee was created to decide, within its authority, on queries about the granting of limits or loans proposed by business areas, previously analyzed and with opinion from the Credit Department. According to the size of the operations/limits proposed, this Committee, may then submit the proposal for approval by the Board of Directors, depending on the amounts involved.

Loan proposals pass through an automated system with parameters set to provide important information for the analysis, granting and subsequent monitoring of loans, minimizing the risks inherent in the operations.

There are exclusive Credit and Behavior Scoring systems for the assignment of high volume, low principal loans in the Retail segment, meant to provide speed and reliability, while standardizing the procedures for loan analysis and approval.

Business is diversified wide-spread and aimed at individuals and companies with a proven payment capacity and solvency, seeking to support them with guarantees that are adequate to the risk assumed, considering the amounts, objectives and the maturities of loan granted.

Credit Risk Rating

The credit risk assessment methodology, in addition to providing data to establish the minimum parameters for lending and risk management, also enables the definition of special Credit Rules and Procedures according to customer characteristics and size. Thus, the methodology provides the basis not only for the correct pricing of operations, but also for defining the appropriate guarantees.

The methodology used also follows the requirements established by National Monetary Council (CMN) Resolution 4,327/14 and includes analysis of social and environmental risk in projects, aimed at evaluating customers' compliance with related laws and the Equator Principles, a set of rules that establish the minimum social and environmental criteria which must be met for lending.

In accordance with its commitment to the continuous improvement of methodologies, the credit risk rating of the Organization's economic groups/customers uses a seventeen-level scale, in which thirteen levels represent performing loan operations, ensuring greater compliance with the requirements of the Basel Capital Accord.

Risk ratings for economic groups (legal entities) are based on standardized statistical and judgmental procedures, and on quantitative and qualitative information. Classifications are made corporately and are monitored periodically in order to preserve the quality of the credit portfolio.

For individuals, in general, credit ratings are based on personal data variables, such as income, assets, restrictions and indebtedness, in addition to the history of their relationship with the Organization, and statistical credit evaluation models.

15	F	
16	G	
17	H	High risk

Credit-Risk Management Process

The credit risk management process is conducted in a corporation-wide manner. This process involves several areas with specific duties, ensuring an efficient structure. Credit risk measurement and control are conducted in a centralized and independent manner.

The credit risk monitoring area actively participates in improving the customer risk rating models, following up large risks by periodically monitoring major delinquencies and the provisioning levels for expected and unexpected losses.

This area continuously reviews the internal processes, including the roles and responsibilities and its training and requirements, as well as conducts periodical reviews of risk evaluation processes to incorporate new practices and methodologies.

Control and Monitoring

The Organization's credit risk is controlled and monitored by the credit risk area of the Integrated Risk Control Department.

The department advises the Executive Credit Risk Management Committee, in which methodologies for credit risk measurement are discussed and formalized. Significant issues discussed in this committee are reported to the Integrated Risk Management and Capital Allocation Committee, which is subordinate to the Board of Directors.

In addition to the committee meetings, the area holds monthly meetings with all product and segment executives and officers, with a view to inform them about the evolution of the loan portfolio, delinquency, adequacy of allowance for loan losses, loan recoveries, gross and net losses, portfolio limits and concentrations among others. This information is also reported to the Audit Committee on a monthly basis.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The area also monitors any internal or external event that may cause a significant impact on the Organization's credit risk, such as spin-offs, bankruptcies and crop failures, in addition to monitoring economic activity in the sectors to which the company has significant risk exposures.

Both the governance process and existing limits are sanctioned by the Integrated Risk Management and Capital Allocation Committee, which are submitted for the approval of the Board of Directors, and are revised at least once a year.

Internal Report

Credit risk is monitored on a daily basis in order to maintain the risk levels within the limits established by the Organization. Managerial reports on risk control are provided to all levels of business, from branches to Senior Management.

With the objective of highlighting the risk situations that could result in the customers' inability to honor its obligations as contracted, the credit risk monitoring area provides daily reports, to the branches, business segments, as well as the lending and loan recovery areas. This system provides timely information about the loan portfolios and credit bureau information of customers, in addition to enabling comparison of past and current information, highlighting points requiring a more in-depth analysis by managers.

The Organization also has an electronic corporate system of credit risk indicators to provide the lending and loan recovery areas, business areas, regional managers and branches with information on assets by segment, product, region, risk classification, delinquency and expected and unexpected losses, among others. This electronic system provides both a macro-level and detailed view of the information, and also enables a specific loan operation to be viewed.

The information is viewed and delivered via dashboards, allowing queries at several levels such as business segment, divisions, managers, regions, products, employees and customers, and under several aspects (asset, delinquency, provision, write-off, restriction levels, guarantees, portfolio quality by rating, among others).

Credit Risk Exposure

We present below the maximum credit risk exposure of the financial instruments.

	R\$ thousand	
	December 31	
	2016	2015
Cash and balances with banks	72,554,651	72,091,764
Derivative financial instruments	16,755,442	18,870,917
Loans and advances to banks	94,845,534	35,671,727
Loans and advances to customers	392,083,873	370,323,668
Other financial assets	497,974,002	432,983,945
Total items recorded in the balance sheet ⁽¹⁾	1,074,213,502	929,942,021
Total items not recorded in the balance sheet (Note 41)	316,298,033	264,320,142
Total risk exposure	1,390,511,535	1,194,262,163

(1) Collaterals are mainly represented by: securities, properties, financial investments, sureties and guarantees.

The Organization's maximum credit risk exposure was R\$ 1,390,511,535 thousand in 2016, which

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

was an increase of 16.4% from December 2015.

Of this exposure, R\$ 72,554,651 thousand, or 5.2% is related to cash and bank deposits composed mainly of funds deposited with the Central Bank of Brazil that are assessed to have low credit risk.

The “Other financial assets” item totaling R\$ 497,974,002 thousand (35.8% of the total exposure), have a low credit risks as it primarily consists of Brazilian government bonds which, are recorded at their market value, represented by “Financial assets held for trading” R\$ 213,139,846 thousand (2015 – R\$ 159,623,449 thousand), “Financial assets available for sale” R\$ 113,118,554 thousand (2015 – R\$ 117,695,450 thousand) and “Investments held to maturity” recognized as amortized cost in the amount of R\$ 43,002,459 thousand (2015 – R\$ 40,003,560 thousand).

In 2016, items not recorded in the consolidated statement of financial position (recorded in off-balance sheet accounts) amounted to R\$ 316,298,033 thousand (2015 - R\$ 264,320,142 thousand), reaching a level of 22.6% (2015 – 22.1%) of total exposure.

The following provides a detailed analysis of other exposures subject to credit risk totaling R\$ 503,684,849 thousand, representing 36,5% of the total exposure, including derivatives of R\$ 16,755,442 thousand, loans and advances to banks of R\$ 94,845,534 thousand and loans and advances to clients of R\$ 392,083,873 thousand.

Derivative Financial Instruments

	R\$ thousand	
	December 31	
	2016	2015
Traded in the stock exchange	1,068,418	5,561,772
OTC contract	15,687,024	13,309,145

Total	16,755,442	18,870,917
--------------	-------------------	-------------------

In relation to derivatives, 93.6% of the total, refers basically to over-the-counter contracts. Of the total of the Derivative financial instruments, 92.4% is assessed to have "low credit risk" by the Organization's internal procedures.

Loans and advances to banks

We present below the portfolio of loans and advances to banks as rated internally by the Organization:

	R\$ thousand	
	December 31	
	2016	2015
Low risk	94,845,534	35,627,580
Medium risk	-	-
High risk	-	44,147
Total	94,845,534	35,671,727

Ratings as assigned by the Organization: Low risk: Ratings AA1 – C3; Medium risk: Rating D; and High risk: Ratings E – H.

None of the loans and advances to banks are classified as pas-due or impaired. In addition, the portfolio has no debt-restructuring history.

Notes to the Consolidated Financial Statements

Loans and advances to customers

The loans and advances to customers are classified as:

- Neither past due nor impaired.
- Past due but not impaired.
- Impaired, including loans and advances classified as impaired and loans and advances that are analyzed individually for loss classified as impaired.

The Organization's loans and advances to customers are classified as "impaired" when they fall in at least one of the following situations: (a) are delinquent more than 90 days, except for housing loan operations secured by residential property (overdue more than 180 days) and/or; (b) have incurred a loss and/or; (c) have been renegotiated and/or; (d) have been reclassified as a higher risk level; and/or (e) have been subject to bankruptcy events. The internal models used by the Organization are based on client or product.

	R\$ thousand	
	December 31,	
	2016	2015
Neither past due nor impaired (i)	337,337,152	326,363,904
Past due but not impaired (ii)	12,612,906	11,656,848
Impaired (iii)	42,133,815	32,302,916
Total loans and advances to customers	392,083,873	370,323,668
Impairment of loans and advances	(24,780,839)	(25,455,204)
Net amount	367,303,034	344,868,464

The portfolio of loans and advances to customers grew by 5.9% from 2016 to December 2015.

(i) Loans and advances to customers neither past due nor impaired

	R\$ thousand	
	December 31,	
	2016	2015
Low risk	325,170,838	318,889,943
Medium risk	10,269,218	6,338,308
High risk	1,897,096	1,135,653
Total	337,337,152	326,363,904

Ratings as assigned by the Organization: Low risk: Ratings AA1 – C3; Medium risk: Rating D; and High risk: Ratings E – H.

The loans and advances to customers assessed to be neither past due nor impaired totaled R\$ 337,337,152 thousand in 2016.

Of the total transactions, 96.4% were classified as low risk.

(ii) Loans and advances to customers past due but not impaired

We present below the analysis by number of days past due of the contracts for loans and advances which were not classified as being impaired in the collective analysis and those which are not impaired based on the individual analysis.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

For the purpose of this analysis, an asset is considered past due and included in the following table when payment is late or is not received strictly in accordance with the contractual terms. The amount included in this category comprises the total financial asset, i.e. not only the overdue installment amount but the full contractual amount plus accrued interest.

The loans and advances to customers which are not individually material, which have not been classified as impaired are presented in this category.

The individually material loans and advances may be presented in this category when, based on the individual analysis, it is not necessary to record an individual impairment loss and, accordingly, the asset is then subject to a collective loss analysis.

	R\$ thousand	
	December 31,	
	2016	2015
Past due up to 60 days	9,737,697	9,286,212
Past due between 61 and 90 days	2,608,305	2,241,006
Past due for more than 90 days	266,904	129,630
Total	12,612,906	11,656,848

The above table shows loans and advances, which despite being past due, do not provide indications of possible impairment. This amount represented 3.2% of the portfolio in 2016 (2015 – 3.1%).

(iii) Loans and advances to customers impaired

	R\$ thousand	
	December 31,	
	2016	2015
Portfolio not yet due	17,567,703	14,185,533
Past due up to 60 days	4,067,322	2,199,703
Past due between 61 and 90 days	1,284,035	1,097,900
Past due for more than 90 days	19,214,755	14,819,780
Total	42,133,815	32,302,916

Loans and advances to customers impaired reached R\$ 42,133,815 thousand and accounted for 10.7 % of the total portfolio in 2016 (2015 - 8.7%).

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

By type of loan category

The following table presents the loans and advances impaired by category:

	R\$ thousand	
	December 31,	
	2016	2015
Working capital	5,940,498	6,846,091
Credit card	5,962,131	5,128,607
Personal credit	4,951,949	3,617,781
Vehicles – CDC (Direct consumer credit)	1,651,852	1,631,255
Housing loans	2,553,802	1,081,833
Financing and export	2,456,658	1,043,922
Rural loans	946,282	805,392
Onlending BNDES/Finame	1,052,671	771,581
Overdraft for individuals	882,992	651,011
Overdraft for corporates	406,296	281,176
Acquisition of assets	459,574	38,288
Others	14,869,110	10,406,039
Total	42,133,815	32,302,916

Renegotiated loans and advances

The total balance of “Loans and advances to customers impaired” includes renegotiated loans and advances to customers. Such loans contemplate extension of loan payment terms, grace periods, reductions in interest rates, and/or, in some cases, the forgiveness (write-off) of part of the loan principal amount.

Renegotiations may occur after debts are past due or when the Company has information about a significant deterioration in the client’s creditworthiness. The purpose of such renegotiations is to adapt the loan to reflect the client’s actual payment capacity.

The following table shows changes made and our analysis of our portfolio of renegotiated loans and advances to customers:

	R\$ thousand	
	December 31	
	2016	2015
Renegotiated loans and advances at the beginning of the year	12,728,723	10,775,621
Additional renegotiated amounts, including interest	18,777,814	13,128,228
Payments received	(8,997,802)	(7,256,464)
Write-offs	(5,007,312)	(3,918,662)
Renegotiated loans and advances at the end of the year	17,501,423	12,728,723
Impairment of loans and advances	(10,346,397)	(7,547,690)
Total renegotiated loans and advances to customers, net of impairment at the end of the year	7,155,026	5,181,033
Impairment on renegotiated loans and advances as a percentage of the renegotiated portfolio	59.1%	59.3%
Total renegotiated loans and advances as a percentage of the total loan portfolio	4.5%	3.4%
Total renegotiated loans and advances as a percentage of the total loan portfolio, net of impairment	1.9%	1.5%

At the time a loan is modified, Management considers the new loan's conditions and renegotiated maturity and it is no longer considered past due. From the date of modification,

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

renegotiated interest begins to accrue, using the effective interest rate method, taking into consideration the customer's capacity to pay the loan based on the analysis made by Management. If the customer fails to maintain the new negotiated terms, management considers ceasing accrual from that point.

Additionally, any balances related to renegotiated loans and advances to customers that have already been written off and recorded in off-balance sheet accounts, as well as any gains from renegotiations, are recognized only when received.

Concentration of credit risk in loans and advances

	R\$ thousand	
	December 31	
	2015	2014
Largest borrower	2.3%	2.8%
Ten largest borrowers	8.5%	9.2%
Twenty largest borrowers	12.6%	13.3%
Fifty largest borrowers	18.5%	19.5%
Hundred largest borrowers	23.0%	23.8%

All ranges presented increase in concentration in 2016 compared to 2015.

By Economic Activity Sector

The credit-risk concentration analysis presented below is based on the economic activity sector in which the counterpart operates.

	December 31			
	2016		2015	
	R\$ thousand	%	R\$ thousand	%
Public sector	8,813,581	2.2	10,250,375	2.8
Federal	8,813,581	2.2	10,241,594	2.8
State	-	-	8,781	-
Private sector	383,270,292	97.8	360,073,293	97.2
Individuals	170,925,871	43.6	147,859,789	39.9
Industry	68,192,198	17.4	65,158,837	17.6
Commerce	42,791,601	10.9	41,267,638	11.1
Services	97,136,221	24.8	102,629,056	27.7
Agribusiness	4,224,401	1.1	3,157,973	0.9
Total portfolio	392,083,873	100.0	370,323,668	100.0
Impairment of loans and advances	(24,780,839)	-	(25,455,204)	-
Total of net loans and advances to customers	367,303,034	-	344,868,464	-

Measurement of Credit Risk

Periodically, the Organization evaluates the existence of objective evidence of loss in the loans and advances portfolio, taking into account its historical experience of impairment losses and employing other methodologies to consider the customer' quality as well as the nature of the transaction including its guarantees for estimating the expected cash flows, which are reviewed regularly in order to constantly improve the models and to ensure that the provision is sufficient.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Initially, clients are classified as individually significant and individually non-significant. Following that initial classification, clients are evaluated on the basis of the existence of evidence of one or more objective loss events. As sometimes it may not be possible to identify a specific event that has caused a loss in the recoverable amount, the combined effects of several events are evaluated. In addition, loss events may be specific, that is, refer to only a particular client, such as payment defaults, renegotiation or bankruptcy event, or be collective and affect a group of assets as a result, for example, interest or exchange rate variations or a reduction in the activity level of one or more economic sectors.

For individually significant clients with specific objective evidences of impairment, the impairment loss is estimated by individual analysis, taking into account the future cash flows expected from each client, including the realization of guarantees associated with operations.

For individually non-significant clients with specific objective evidence of impairment, the, impairment loss is estimated using proprietary historic loss experience models which are based on observable information on the calculation date.

Clients showing no specific objective evidence of impairment losses, both individually significant and individually non-significant clients, are evaluated collectively using the Organization's internal models based on collective parameters of loss identified and macroeconomic parameters of economic activity and default.

For collective evaluation, Probability of Default and Loss Given Default models, as well as the Loss Identification Period factor, are used.

Probability of Default (PD): determines the probability of default perceived by the Organization with respect to the customer, according to its internal evaluation model. This risk parameter is determined differently for each segment: retail models are quantitative, while wholesale models are both quantitative and qualitative (subjective).

Loss Given Default (LGD): refers to the percentage effectively lost after recovery efforts given the default of the contract, which is expressed as a percentage of exposure.

Loss Identification Period (LIP): interim period between the occurrence of the loss event in groups of collectively evaluated financial assets, significant and non significant, and its identification by the institution as being impaired.

Write-offs

Credits are written off in the consolidated statement of financial position against impairment of loans and advances when they are considered uncollectible or a permanent loss. Credit operations are normally written off when they are overdue for 180 to 360 days. Credit operations with remaining maturities of at least 36 months are normally written off when they are overdue for 360 to 540 days.

Credit Risk Mitigation

Potential credit losses are mitigated by the use of a variety of types of collateral formally stipulated through legal instruments, such as conditional sales, liens and mortgages, by guarantees such as third-party sureties or guarantees, and also by financial instruments

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

such as credit derivatives. The efficiency of these instruments is evaluated considering the time to recover and realize an asset given as collateral, its market value, the guarantors' counterparty risk and the legal safety of the agreements. The main types of collaterals include: term deposits; financial investments and securities; residential and commercial properties; movable properties such as vehicles, aircraft, machinery and equipment. Additionally, collateral may include commercial bonds such as invoices, checks and credit card bills. Sureties and guarantees may also include bank guarantees and letters of credit.

Credit derivatives are bilateral agreements where one of the counterparties buys hedge against credit risk of a specific financial instrument and its risk is transferred to the selling counterparty. Usually, the latter receives a linear remuneration during the transaction's effectiveness.

In the event of default, the counterparty who purchased the hedge will be paid, the purpose of which is to compensate for the impairment losses on the underlying financial instrument. In this case, the selling counterparty receives the underlying asset in exchange for the referred payment.

On December 31, 2016, Bradesco had credit default swaps (CDS) with the following characteristics: the risk received in credit swaps whose underlying assets are "debt securities issued by companies" in the amount of R\$ 114,069 thousand (R\$ 136,668 thousand in 2015) and "bonds of the Brazilian public debt" in the amount of R\$ 668,115 thousand and the risk transferred in credit swaps whose underlying assets are "derivatives of the Brazilian public debt" is R\$ (16,296) thousand, amounting to a total net credit risk value of negative R\$ 765,888 thousand (R\$ 136,668 thousand in 2015), with an effect on the calculation of required shareholders' equity of negative R\$ 11,977 thousand (R\$ 15,033 thousand in 2015). The contracts related to credit derivatives transactions described above are due in 2021. The mark-to-market of the protection rates that remunerates the counterparty that received the risk totaled R\$ (1,067) thousand (R\$ 42 thousand in 2015). There were no credit events, as defined in the agreements, during the period.

Offsetting of financial assets and liabilities

According to IFRS 7, the Bradesco must also present the amounts related to financial instruments subject to master netting agreements or similar agreements, which do not meet some or all of offsetting criteria

from IAS 32. Similar agreements include the Global Derivative Agreements (CGD/ISDA) and the Global Master Repurchase Agreements (GMRA).

Part of the derivative financial instruments transacted by the Bradesco in environments that are not stock exchange, are executed through contracts CGD and ISDA (International Swaps and Derivatives agreement), in Brazil and abroad.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The table below shows the offsetting of financial assets and liabilities:

	R\$ thousand		
	2016		
	Gross amount of financial assets presented in the statement of financial position	Related amounts not offset in the statement of financial position	Net amount
Securities purchased under agreements to resell	84,728,590	6,450	84,722,140
Derivatives	16,755,442	1,598,281	15,157,161

	R\$ thousand		
	2016

Derivatives	19,345,729	301,725	19,044,004

3.2. Market risk

Market risk is represented by the possibility of financial loss due to fluctuating prices and interest rates of the Organization's financial instruments, such as its asset and liability transactions that may have mismatched maturities, currencies and indexes.

Market risk is identified, measured, mitigated, controlled and reported. The Organization's exposure to market risk profile is in line with the guidelines established by the governance process, with limits independently monitored.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

All transactions that expose the Organization to market risk are mapped, measured and classified according to probability and magnitude, and the whole process is approved by the governance structure.

The risk management process relies on the participation of all levels of the Organization, from the business areas to the Board of Directors.

In compliance with the best Corporate Governance practices, to preserve and strengthen the management of market risk in the Organization, as well as to meet the requirements of Resolution n^o 3.464/07, of the National Monetary Council (CMN), the Board of Directors approved the Market and Liquidity Risk Management Policy, which is reviewed at least annually by the relevant Committees and by the Board of Directors itself, and provides the main guidelines for acceptance, control and management of market and liquidity risks.

In addition to the policy, the Organization has specific rules to regulate the market risk management process, as follows:

- Classification of Operations;
- Reclassification of Operations;
- Trading of Public or Private Securities;
- Use of Derivatives; and
- Hedging.

Market Risk Management Process

The market risk management process is a corporation wide process, comprising from business areas to the Board of Directors; it involves various areas, each with specific duties in the process, thereby ensuring an efficient structure. The measurement and control of market risk is conducted in a centralized and independent manner. This process permits that the Organization uses its internal market risk models to calculate regulatory capital requirements since January 2013. This process, approved by the Board of Directors, is also revised at least once a year by the Committees and the Board itself.

Determination of Limits

Proposed market-risk limits are validated by specific Committees and submitted for approval by the Integrated Risk Management and Capital Allocation Committee, and then for approval by the Board of Directors. Based on the business' characteristics, they are segregated into the following Portfolios:

Trading Portfolio: it comprises all operations involving financial instruments, held-for-trading, including derivatives, or used to hedge other instruments in the Trading Portfolio, which have no trading restrictions. Held-for-trading operations are those destined for resale, to obtain benefits from actual or expected price variations, or for arbitrage.

The Trading Portfolio is monitored with the following limits:

- Value at Risk (VaR);
- Stress;
- Income; and
- Financial Exposure / Concentration.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Banking Portfolio: it comprises operations not classified in the Trading Portfolio, arising from Organization's other businesses and their respective hedges.

The Banking Portfolio is monitored with the following limits:

- Interest rate risk limit.

Market-Risk Measurement Models

Market risk is measured and controlled using Stress, Value at Risk (VaR), Economic Value Equity (EVE) and Sensitivity Analysis methodologies, as well as limits for the Management of Results and Financial Exposure. Using several methodologies to measure and evaluate risks is of great importance, because they can complement each other and their combination allows for analysis of different scenarios and situations.

Trading and Regulatory Portfolio

Trading Portfolio risks are controlled by the Stress and VaR methodologies. The Stress methodology quantifies the negative impact of economic shocks and events that are financially unfavorable to the Organization's positions. The analysis uses stress scenarios prepared by the Market Risk area and the Organization's economists based on historical and prospective data for the risk factors in the Organization portfolio.

The methodology adopted to calculate VaR is the Delta-Normal, with a confidence level of 99% and considering the number of days necessary to unwind the existing exposures. The methodology is applied to the Trading and Regulatory Portfolio (Trading Portfolio positions plus Banking Portfolio foreign currency

and commodities exposures). The Delta-Normal VaR has as main limitation the adoption of the premise that financial returns are normally distributed. To mitigate the above limitations, the organization also adopts the historical VaR approach to the portfolio, adopting the most conservative model. A minimum 252-business-day period is adopted to calculate volatilities, correlations and historical returns.

For regulatory purposes, the capital requirements relating to shares held in the Banking Portfolio are determined on a credit risk basis, as per Central Bank of Brazil resolution, ie, are not included in the market risk calculation.

Risk of Interest Rate in the Banking Portfolio

The measurement and control of the interest-rate risk in the Banking Portfolio area is based on the EVE methodology, which measures the economic impact on the positions, according to scenarios prepared by the Organization's economists. These scenarios determine the positive and negative movements of interest rate curves that may affect Organization's investments and capital-raising.

The EVE methodology consists of repricing the portfolio exposed to interest rate risk, taking into account the scenarios of increases or decreases of rates, by calculating the impact on present value and total term of assets and liabilities. The economic value of the portfolio is estimated on the basis of market interest rates on the analysis date and of scenarios projected. The difference between the values obtained for the portfolio will be EVE, that is, the interest-rate risk applicable to the Banking Portfolio.

To measure the Banking Portfolio interest rate risk, the premise of prepayment of loan is not used. For demand and savings deposits with undetermined maturity, their historical behaviors and the possibility of maintaining them are studied. Thus, after all the deductions from

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

demand and savings deposits, for example, the requirements reserve held at Brazilian Central Bank, the remaining balance (free funds) is considered in accordance with the maturity flows of fixed-rate lending operations.

Financial Instrument Pricing

To adopt the best market prices related to the assessment of financial instruments' market value, the Market and Liquidity Risk Management Executive Committee (CEGRIMEL) established the Mark-to-Market Commission (CMM), which is responsible for approving or submitting mark-to-market models to GEGRIMEL. CMM is composed of business, back-office and risk representatives. The risk area is responsible for the coordination of the Commission and for the submission the matters to the CEGRIMEL for reporting or approval, whichever is the case.

Whenever possible, the Bank uses prices and quotes from by the Securities, Commodities and Futures Exchange and the Secondary Markets. Failing to find such market references, prices made available by other sources (such as Bloomberg, Reuters and Brokerage Firms) are used. As a last resort, proprietary models are used to price the instruments, which also follow the same CMM approval procedure and are submitted to the Organization's validation and assessment processes.

Mark-to-market criteria are periodically reviewed, according to the governance process, and may vary due to changes in market conditions, creation of new classes of instruments, establishment of new sources of data or development of models considered more appropriate.

The financial instruments to be included in the Trading Portfolio must be approved by the Treasury Executive Committee or the Product and Service Executive Committee and their pricing criteria must be defined by the CMM.

The following principles for the mark-to-market process are adopted by the Organization:

3.2. Market risk

- **Commitment:** the Organization is committed to ensuring that the prices used reflect the market value of the operations. Should information not be found, Bradesco uses its best efforts to estimate the market value of the financial instruments;
- **Frequency:** the formalized mark-to-market criteria are applied on a daily basis;
- **Formality:** the CMM is responsible for ensuring the methodological quality and the formalization of the mark-to-market criteria;
- **Consistency:** the process to gather and apply prices should be carried out consistently, to guarantee equal prices for the same instrument within the Organization; and
- **Transparency:** the methodology must be accessible by the Internal and External Audit, Independent Model Validation areas and by Regulatory Agencies.

In December 2014, the Brazilian National Monetary Council (CMN) published Resolution 4,389/14, which amended Resolution 4,277/13. These resolutions set forth the basic procedures that entities must follow in pricing financial instruments to market value and the guidelines to apply prudential adjustments to these instruments. In accordance with the above mentioned procedures, the Organization is already aligned with these resolutions' guidelines, including applying due prudential adjustments required by the regulation.

Independent Risk Model Validation

The Organization uses models to manage and measure risks and capital, which are developed based on specialist knowledge or on statistical, economic, financial or mathematical theories, which support and facilitate the structuring of critical issues and enable standardization and fast decision-

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

making. To identify, mitigate and control the risks of the models, represented by potential adverse consequences arising from decisions based on wrong or obsolete models, with the process of independent validation, whose main purpose is to verify if the models work in accordance with their established goals, as well as to verify if their results are suitable for the uses for which they are intended. This validation covers the aspects concerning the adequacy of processes, governance, construction of models and their assumptions, with the results being reported to the managers, the Internal Audit, the Committees of Internal Controls and Compliance and Integrated Risk Management and Capital Allocation.

Therefore, the activities carried out enable the continuous improvement of the scope of validations, which are specific to each model type and classified into five dimensions combining the qualitative and quantitative aspects.

Qualitative

- Scope of the model: scope of application of the model, which includes its goal, the type of risk addressed, companies exposed to this type of risk, portfolios, products, segments, channels, among others;
- Application of the Model: includes the definition, reasonability in the use of the model's factors, the flow and the timeliness of the information for the decision-making process;
- Technological Environment and Data Consistency: structure of systems and controls involved in the calculations performed by the model and the process in which the model is inserted. It also includes data consistency, taking into consideration the functionalities of version and access controls, backup, traceability, changes in parameters, data quality, system contingency and automated controls.

Quantitative

- Measurement System: challenge to the risk measurement procedures, both base and stress, including the definition, implementation and internal validation of the method, which consists of

methodology, assumptions, parameters, calculation routine, input data and results;

- Backtesting: statistic procedure used to assess the model by comparing the amounts estimated by the model and the amounts observed within a previously defined period. It includes methodological, formalization and utilization aspects for model improvement.

The responsibility for executing the independent validation process, that includes the analysis and the assessment of models, belongs to the Independent Model Validation Area (AVIM), which uses structures that are already implemented and settled in the Organization to avoid overlapping tasks.

Control and Follow-Up

Market risk is controlled and monitored by an independent area, the Integrated Risk Control Department, which, on a daily basis, measures the risk of outstanding positions, consolidates results and prepares reports required by the existing governance process.

In addition to daily reports, Trading Portfolio positions are discussed once a week by the Treasury Executive Committee, while Banking Portfolio positions and liquidity reports are examined every fifteen days by the Asset and Liability Management Treasury Executive Committee. At both meetings, results and risks are assessed and strategies are discussed. Both the governance

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

process and the existing thresholds are ratified by the Integrated Risk and Capital Allocation Management Committee and submitted to approval of the Board of Directors, and they are revised at least once a year.

Should any threshold controlled by the DCIR be exceeded, the head of the business area responsible for the position is informed that threshold was reached, and the Integrated Risk and Capital Allocation Management Committee is called in timely fashion to make a decision. If the Committee decides to raise the threshold and/or maintain the positions, the Board of Directors is called to approve the new threshold or revise the position strategy.

Internal Communication

The market risk department provides daily managerial control reports on the positions to the business areas and Senior Management, in addition to weekly reports and periodic presentations to the Board of Directors.

Reporting is conducted through an alert system, which determines the addressees of risk reports as previously determined risk threshold percentage is reached; therefore, the higher the risk threshold consumption, more Senior Management members receive the reports.

Hedging and Use of Derivatives

In order to standardize the use of financial instruments as hedges of operations and the use of derivatives by the Treasury Department, the Organization created specific rules that were approved by the competent Committees.

The hedge operations executed by Bradesco's Treasury Department must necessarily cancel or mitigate risks related to unmatched quantities, terms, currencies or indexes of the positions in the Treasury books, and must use assets and derivatives authorized to be traded in each of their books to:

- control and classify the operations, respecting the exposure and risk limits in effect;
- alter, modify or revert positions due to changes in the market and to operational strategies; and
- reduce or mitigate exposures to operations in inactive markets, in conditions of stress or of low liquidity.

Fair value Hedge accounting

On December 31, 2015, Bradesco constituted a hedge to protect from the market risk, using futures contracts, which generated R\$ 1,406,154 thousand, for protection against the effects of the exchange rate variation of the firm commitment concerning the purchase and sale of shares agreement (Note 2 (a)), which produced an adjustment to the market value of (R\$ 1,761,964 thousand). The effect of these operations, recorded in the caption derivative financial instruments, was an expense of R\$ 355,810 thousand. In July 01, 2016, the hedge was settled.

Standardized and "Continuous Use" Derivatives

Organization's Treasury Department may use standardized (traded on an exchange) and "continuous use" (traded over-the-counter) derivatives for the purpose of obtaining income or as hedges. The derivatives classified as "continuous use" are those habitually traded over-the-counter, such as vanilla swaps (interest rates, currencies, CDS – Credit Default Swap, among

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

others), forward operations (currencies, for example) and vanilla options (currency, Bovespa Index), among others. Non-standardized derivatives that are not classified as “continuous use” or structured operations cannot be traded without the authorization of the applicable Committee.

Evolution of Exposures

In this section we present the evolution of financial exposure, the VaR calculated using the internal model and its backtesting and the Stress Analysis.

Financial Exposure – Trading Portfolio (Fair value)

Risk Factors	December 31			
	2016		2015	
	Assets	Liabilities	Assets	Liabilities
Fixed rate	33,026,609	13,806,553	48,582,147	3,260,337
IGP-M (General Index of market pricing) / IPCA (Consumer price index)	330,819	404,612	3,385,148	3,225,568
Forex Coupon	997,507	878,284	1,577,228	1,429,773
Foreign Currency	1,005,349	1,024,526	12,304,611	12,257,907
Sovereign / Eurobonds and Treasuries	2,301,628	906,361	10,907,639	6,095,598
Other	218,421	-	320,877	3,264
Total	37,880,333	17,020,336	77,077,650	26,272,447

VaR Internal Model –Trading Portfolio

The 1-day VaR of Trading Portfolio net of tax effects in end of 2016 was R\$ 22,748 thousand, with the prefixed risk as the largest participation of the portfolio.

Risk Factors	R\$ thousand	
	December 31	
	2016	2015
Fixed rate	20,704	16,514
IGP-M (General Index of market pricing) / IPCA (Consumer price index)	416	524
Forex Coupon	64	1,117
Foreign Currency	224	937
Sovereign/Eurobonds and Treasuries	3,230	6,468
Others	2	30
Correlation / Diversification Effect	(1,892)	(7,574)
VaR at the end of the year	22,748	18,016
Average VaR in the year	19,910	21,450
Minimum VaR in the year	9,408	4,878
Maximum VaR in the year	36,726	64,538

Note: 1-day VaR and net of tax effects.

VaR Internal Model – Regulatory Portfolio

The capital is calculated based on the Regulatory Portfolio, which comprises the Trading Portfolio and the Foreign Exchange Exposure and the Commodities Exposure of the Banking Portfolio, through the use of the normal delta VaR model. In addition, the historical simulation and the Delta–Gama–Vega models are applied to measure all risk factors to an options portfolio, whichever is the

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

most conservative. In this model, risk value is extrapolated to the regulatory horizon⁽¹⁾ (at least ten days) by the 'square root of time' method. VaR and Stressed VaR shown below refer to a ten-day horizon and are net of tax effects.

Risk Factors	R\$ mil			
	December 31			
	2016		2015	
	VaR	Stressed	VaR	Stressed
Interest rate	70,231	149,043	55,695	110,807
Exchange rate	12,966	27,713	48,914	70,643
Commodity price (Commodities)	12	29	3,099	7,209
Correlation / Diversification Effect	(1,872)	(8,296)	(17,398)	(10,732)
VaR at the end of the year	81,337	168,489	90,310	177,927
Average VaR in the year	70,249	179,169	100,250	179,591
Minimum VaR in the year	38,810	83,230	26,434	72,814
Maximum VaR in the year	131,105	247,814	312,386	378,198

Note: Ten-day horizon VaR net of tax effects.

To calculate regulatory capital requirement according to the internal model, it is necessary to take into consideration the rules described by Brazilian Central Bank Circular Letters nºs 3,646/13 and 3,674/13, such as the use of VaR and Stressed VaR net of tax effects, the average in the last 60 days and the multiplier.

VaR Internal Model – Backtesting

The risk methodology applied is continuously assessed using backtesting techniques, which compare the one-day period VaR with the hypothetical P&L, obtained from the same positions used in the VaR calculation, and with the effective P&L, also considering the intraday operations for which VaR was estimated.

The main purpose of backtesting is to monitor, validate and assess the adherence of the VaR model, and the number of exceptions that occurred must be compatible with the number of exception accepted by the statistical tests conducted and the confidence level established. Another objective is to improve the models used by the Organization, through analyses carried out with different observation periods and confidence levels, both for Total VaR and for each risk factor.

Daily hypothetical and effective P&L over the last 250 business days surpassed their respective VaR three and two times, with a confidence level of 99%.

According to the document published by the Basel Committee on Banking Supervision⁽²⁾, exceptions are classified as being due to “either bad luck or the markets did not behave as expected by the model”, i.e. volatility was significantly higher than expected and, in certain situations, the correlations differed from those forecast by the model.

(1) The maximum amount between the book’s holding period and ten days, which is the minimum regulatory horizon required by Brazilian Central Bank, is adopted.

(2) *Supervisory Framework for the use “Backtesting” in Conjunction with the Internal Models Approach to Market Risk Capital Requirements* (January 1996).

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Stress Analysis – Trading Portfolio

The Organization also assesses on a daily basis, the possible impacts on positions in stress scenarios for the next 20 business days, with limits established in the governance process. Thus, considering the effect of diversification between the risk factors and the tax effects, the average of the possible loss estimates in a stress situation would be R\$ 198,274 thousand in 2016 (2015 – R\$ 190,301 thousand), and the maximum estimated loss in the year of 2016 would be R\$ 371,395 thousand (2015 – R\$ 397,795 thousand).

	R\$ thousand	
	December 31	
	2016	2015
At the end of the year	338,004	184,312
Average in the year	198,274	190,301
Minimum in the year	87,152	54,060
Maximum in the year	371,395	397,795

Note: Values net of tax effects.

Sensitivity Analysis

The Trading Portfolio is also monitored daily by sensitivity analyses that measure the effect of movements of market and price curves on our positions. Furthermore, a sensitivity analysis of the Organization's financial exposures (Trading and Banking Portfolio) is performed on a quarterly basis, in compliance with CVM Rule nº 475/08.

The sensitivity analyses were carried out based on the scenarios prepared for the respective dates, always taking into consideration market inputs available at the time and scenarios that would adversely impact our positions, in accordance with the scenarios below:

Scenario 1: Based on market information (BM&FBOVESPA, Anbima, etc.), stresses were applied for 1 basis point on the interest rate and 1% variation on prices. For example: for a Real/US dollar exchange rate of R\$ 3.25 a scenario of R\$ 3.28 was used, while for a 1-year fixed interest rate of 11.54 %, a 11.55 % scenario was applied;

Scenario 2: 25% stresses were determined based on market information. For example: for a Real/US dollar exchange rate of R\$ 3.25 a scenario of R\$ 4.06 was used, while for a 1-year fixed interest rate of 11.54%, a 14.42% scenario was applied. The scenarios for other risk factors also accounted for 25% stresses in the respective curves or prices; and

Scenario 3: 50% stresses were determined based on market information. For example: for a Real/US dollar quote of R\$ 3.25 a scenario of R\$ 4.87 was used, while for a 1-year fixed interest rate of 11.54%, a 17.30% scenario was applied; The scenarios for other risk factors also account for 50% stresses in the respective curves or prices.

The results show the impact for each scenario on a static portfolio position. The dynamism of the market and portfolios means that these positions change continuously and do not necessarily reflect the position demonstrated here. In addition, the Organization has a continuous market risk management process, which is always searching for ways to mitigate the associated risks, according to the strategy determined by Top Management. Therefore, in cases of deterioration indicators in a certain position, proactive measures are taken to minimize any potential negative impact, aimed at maximizing the risk/return ratio for the Organization.

Notes to the Consolidated Financial Statements

3.3. Liquidity risk

The Liquidity Risk is represented by the possibility of the institution not being able to efficiently meet its obligations, without affecting its daily operations and incurring significant losses, as well as the possibility of the institution not being able to trade a position at market price due to its high amount when compared to the usually traded volume or due to some market discontinuation.

The understanding and monitoring of this risk are crucial to enable the Organization to settle operations in a timely manner.

Management Process for Liquidity Risk

The management of liquidity risk is a group-wide process. This process involves several areas with specific responsibilities. The measurement and control of liquidity risk are conducted in a centralized and independent manner, including the daily monitoring of available funds, the compliance with the minimum liquidity level and the contingency plan for stress situations.

One of the objectives of the Organization's Policy on Market and Liquidity Risk Management, approved by the Board of Directors, is to set out the rules, criteria and procedures that guarantee the establishment of the Minimum Liquidity Reserve (RML) for the Organization, as well as the strategy and action plans for liquidity crisis situations. The policy and controls established fully comply with National Monetary Council Resolution 4,090/12.

As part of the criteria and procedures approved, the Organization establishes the minimum daily liquidity reserve and the types of assets eligible to be included in the available resources. It also establishes the instruments for managing liquidity in a normal scenario and in a crisis scenario and the strategies to be implemented in each case.

Control and Monitoring

The liquidity risk management process is conducted by Bradesco's Treasury Department based on the positions provided by the back-office area, which is responsible for providing the necessary information to the management and for monitoring the compliance with the limits established. The Integrated Risk Control Department is responsible for the methodology for measuring the minimum liquidity reserve, controlling the limits established according to currency and type of company (including non-financial firms), reviewing the policies, rules, criteria and procedures, and conducting studies for new recommendations.

Liquidity risk is monitored daily by the business and control areas and at the meetings of the Treasury Asset and Liability Management Executive Committee, which manages liquidity reserves, with term and currency mismatches. Monitoring is also handled by the Integrated Risk and Capital Allocation Management Committee and the Board of Directors.

In addition to the controlling and monitoring internal methodology, in October 2015 the Organization began to measure and report to BCB the Short-Term Liquidity indicator (LCR), as provided by National Monetary Council Resolution 4,401/15 of BCB Circular Letter 3,749/15.

LCR - Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) is designed to ensure that the Organization maintains a sufficient level of liquid assets to cover liquidity needs in an eventual stress scenario. The LCR is the ratio between the stock of High Quality Liquid Assets (HQLA) and total net cash outflow,

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

calculated based on a generic stress scenario. The formula below shows the main components of the indicator:

In accordance with the LCR implantation schedule, the level of the ratio between high quality liquid assets and total net cash outflows must comply with the following schedule:

Year	2016	2017	2018	As of 2019
% Required	70%	80%	90%	100%

The stress scenarios parameterization was conducted by the Regulator to capture idiosyncratic and market shocks, considering the period of thirty days. The items below show some of the shocks included in the methodology:

- the partial loss of retail and uncollateralized wholesale funding, as well as short-term funding capacity;
- the additional outflow of funds, contractually foreseen, due to the downgrading of the institution’s credit rating by up to three levels, including eventual additional collateral requirements;
- an increase in the volatility of factors that impact collateral quality or the potential future exposure of derivative positions, resulting in the application of larger collateral discounts or a call for additional collateral or in other liquidity requirements;
- withdrawals of higher than expected amounts from credit/liquidity lines granted; and

- the potential need to repurchase debt or honor non-contractual obligations in order to mitigate reputational risk.

High Quality Liquid Assets (HQLA)

HQLA are assets that maintain their market liquidity in periods of stress and that meet the minimum requirements established by the Brazilian Central Bank, such as, among others, being free of any legal impediment or restriction; suffering little or no loss in market value when converted into cash; having a low credit risk; easy and accurate pricing; and being traded in an active and important market, with little difference between the purchase and sale price, high traded volume and a large number of participants. These assets are subject to weighting factors which may reduce their value, for example in accordance with the risk rating of their issuer or the historic variation in their market price, among other requirements.

Cash Outflows and Inflows

Cash outflows are the result of a reduction in deposits and funding; the maturity of securities issued; scheduled contractual obligations for the next 30 days; margin adjustments and calls in derivative operations; the utilization/withdrawal of credit and liquidity lines granted by the Bank; and contingent cash outflows.

Cash inflows for the next thirty days correspond to the expected receipt of loans and financings; deposits; securities; and margin adjustments and easing in derivative operations.

20	Total cash inflows	248,219,178	42,376,396

		Total Adjusted Amount ⁴
21	Total HQLA	146,652,484
22	Total net cash outflow	80,647,652
23	LCR (%)⁵	181.8%

- 1) For regulatory compliance purposes, the Prudential Conglomerate includes financial and similar companies;
- 2) Total balance of cash inflow/outflow item;
- 3) Total balance of cash inflow/outflow item after application of weighting factors;
- 4) Total balance of cash inflow/outflow item after application of weighting factors and limits; and
- 5) Calculated based on the simple average of the fourth quarter 2016 (3 observations).

The amount of net assets (HQLA) consists, in addition to the compulsory returns and reserves at the Brazilian Central Bank, mainly by federal government securities. These net assets resulted in R\$ 146,652,484 thousand, the average of the year of 2016.

Related to the cash outflows, based on the regulatory stress scenario (item 16), about 54.0% are redemptions and non-renewals retail and wholesale funding without collateral (unsecured), as shown in item 2 and 5 of the table

Another relevant group refers to the item "Other contractual obligations" (item 14), which mainly includes the output streams of onlending operations, credit cards and trade finance.

Regarding cash inflows, corresponding to R\$ 42,376,396 thousand in the middle of the year, the

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

proceeds of loans (partial renewal) stand out, the inflows of Trade Finance operations, cash and redemptions of securities in addition to the inflow of transfer and credit card operations.

Internal Communication

In the process of liquidity risk management, reports are distributed daily to the areas involved in management and control, as well as to Management. This process includes the use of several analysis instruments to monitor liquidity, such as:

- Daily distribution of liquidity control instruments;
- Automatic intra-day update of the liquidity reports for appropriate management by the Treasury Department;
- Preparation of reports with past behavior and future simulations based on scenarios;
- Daily verification of compliance with minimum liquidity levels; and
- Weekly reports to the Board of Executive Officers, showing the behavior and expectations related to the liquidity situation.

The liquidity risk management process also has an alert system that selects the appropriate reporting level according to the percentage of the established limit utilized. Thus, the lower the volume available resources concerning the minimum reserve of liquidity for stressful situations, the higher the number and echelon of Senior Management members who receive the reports.

Undiscounted cash flows of financial liabilities

The table below presents the cash flows payable for non-derivative financial liabilities, covering the remaining contractual period to maturity as from the date of the consolidated statement of financial position. The values disclosed in this table represent the undiscounted contractual cash flows.

(1) Include, mainly, credit card transactions, foreign exchange transactions, negotiation and intermediation of securities, finance leasing and capitalization bonds.

The assets available to meet all the obligations and cover the outstanding commitments include cash and cash equivalents, financial assets, loans and advances. Management may also cover unexpected cash outflows by selling securities and by having access to sources of additional funds, such as asset-backed-markets.

The previous table shows the undiscounted contractual cash flows of the to financial liabilities of the Organization. The cash flows that the Organization estimates for these instruments may vary significantly from those presented. For example, it is expected that demand deposits of customers will maintain a stable or increasing balance, and it is not expected that these deposits will be withdrawn immediately.

The gross cash outflows presented in the previous table refer to the undiscounted contractual cash flow related to the financial liability.

In the Organization, liquidity-risk management involves a series of controls, mainly related to the establishment of technical limits, with the ongoing evaluation of the positions assumed and the financial instruments used.

Undiscounted cash flows for derivatives

All the derivatives of the Organization are settled at net value, and include:

- Foreign currency derivatives – over-the-counter currency options, currency futures, and currency options traded on an exchange; and
- Interest rate derivatives – interest rate swaps, forward rate contracts, interest rate options, other interest rate contracts, interest rate futures traded on an exchange and interest rate options traded on an exchange.

The table below analyzes the derivative financial liabilities that will be settled at net value, grouped based on the period remaining from the reporting date to the respective maturity date. The values disclosed in the table are undiscounted cash flows.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

3.4. Fair value of financial assets and liabilities

The Organization applies IFRS 13 for financial instruments measured in the consolidated statement of financial position at fair value, which requires disclosure of fair-value measurements according to the following fair-value hierarchy of fair value measurement:

- Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active market, as well as Brazilian government securities that are highly liquid and are actively traded in over-the-counter markets.

- Level 2

Valuation uses observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data, including but not limited to yield curves, interest rates, volatilities, equity or debt prices and foreign exchange rates.

- Level 3

Valuation uses unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities normally include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant Management judgment or estimation. This category generally includes certain corporate and bank debt securities and certain derivative contracts.

To fair value securities which have no consistent, regulatory updated, public price source, Bradesco uses models defined by the mark-to-market Commission and documented in the mark-to-mark manual for each security type. Through the use of methods and both mathematical and financial models which capture the effects and variations in the prices of marked-to-market assets, or similar instruments, Bradesco is able to ascertain in a clear and consistent manner the determination of fair value of its level 3 assets and liabilities.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Derivative Assets and Liabilities

The Organization's derivative positions are determined using quantitative models that require the use of multiple inputs including interest rates, prices and indices to generate continuous yield or pricing curves and volatility factors. The majority of market inputs are observable and can be obtained, from BM&FBovespa (principal source) and the secondary market. Exchange traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange; those that are not are classified as Level 2 or Level 3.

The yield curves are used to determine the fair value by the method of discounted cash flow, for currency swaps and swaps based on other risk factors. The fair value of futures and forward contracts is also determined based on quoted markets prices on the exchanges for exchanges-traded derivatives or using similar methodologies to those described for swaps. The fair value of options is determined using external quoted prices or mathematical models, such as Black-Scholes, using yield curves, implied volatilities and the fair value of the underlying asset. Current market prices are used to determine the implied volatilities. The majority of these models do not contain a high level of subjectivity as the methodologies used in the models do not require significant judgment and inputs to the model are readily observable from active quoted markets. Such instruments are generally classified within Level 2 of the valuation hierarchy. The fair values of derivative assets and liabilities also include adjustments for market liquidity, counterparty credit quality and other specific factors, where appropriate.

Derivatives that are valued based on mainly unobservable market parameters and that are not actively traded are classified within Level 3 of the valuation hierarchy. Level 3 derivatives include credit default swaps which have corporate debt securities as underlyings.

The table below presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the years 2016 and 2015:

	R\$ thousand			
	Financial assets held for trading	Financial assets available for sale	Derivatives	Total
Balance on December 31, 2014	8,075,941	40,903,977	-	48,979,918
Included in the statement of income and other comprehensive income	451,287	2,494,337	-	2,945,624
Acquisitions	1,101,585	7,469,980	(20,382)	8,551,183
Sale	(2,387,864)	(5,340,777)	-	(7,728,641)
Transfer levels	(7,031,739)	(27,023,324)	-	(34,055,063)
Transfer to investments held to maturity	-	(12,419,003)	-	(12,419,003)
Balance on December 31, 2015	209,210	6,085,190	(20,382)	6,274,018
Included in the statement of income and other comprehensive income	13,155	(1,174,225)	-	(1,161,070)
Acquisitions	3,833	2,178,445	11,793	2,194,071
Sale	(7,633)	(445,173)	(28)	(452,834)
Transfer with categories	274,001	(274,001)	-	-
Transfer levels	(205,341)	(1,356,884)	-	(1,562,225)
Balance on December 31, 2016	287,224	5,013,353	(8,617)	5,291,960

In 2016, there was a transfer of securities from Level 3 to other levels of classification, mainly for level 2 in the amount R\$ 1,562,225 thousand (2015 - R\$ 34,055,063 thousand). The transfer refers, basically, to Corporate debt securities, which were based on the fair value obtained from internal pricing models, mainly customer internal rating, began to be calculated based on observable

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

market data (Anbima's credit curve). In 2015, R\$12,419,003 thousand were reclassified Certificates of real estate receivables from category "Financial assets available for sale" to the category "Investments held to maturity", due to the change of intention of the Management.

The tables below show the gains/(losses) due to changes in fair value, including the realized and unrealized gains and losses, recorded in the consolidated statement of income for Level 3 assets and liabilities during the years 2016, 2015 and 2014:

The sensitivity analyses were carried out based on the scenarios prepared for the dates shown, always taking into consideration market inputs available at the time and scenarios that would adversely impact our positions, in accordance with the scenarios below:

Scenario 1: Based on market information (BM&FBOVESPA, Anbima, etc.), stresses were applied for 1 basis point on the interest rate and 1% variation on prices. For example: for a Real/US dollar exchange rate of R\$ 3.25 a scenario of R\$ 3.28 was used, while for a 1-year fixed interest rate of 11.54%, a 11.55% scenario was applied;

Scenario 2: 25% stresses were determined based on market information. For example: for a Real/US dollar exchange rate of R\$ 3.25 a scenario of R\$ 4.06 was used, while for a 1-year fixed interest rate of 11.54%, a 14.42% scenario was applied. The scenarios for other risk factors also had 25% stresses in the respective curves or prices; and

Scenario 3: 50% stresses were determined based on market information. For example: for a Real/US dollar quote of R\$ 3.25 a scenario of R\$ 4.87 was used, while for a 1-year

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

fixed interest rate of 11.54%, a 17.30% scenario was applied; The scenarios for other risk factors also had 50% stresses in the respective curves or prices.

Financial instruments not measured at fair value

The table below summarizes the carrying amounts and the fair values of the financial assets and liabilities that were not presented in the consolidated statements of financial position at their fair value, classified using the hierarchical levels:

R\$ thousand

	December 31, 2016			Total	Carrying amount
	Level 1	Level 2	Level 3		
Financial assets					
Financial assets pledged as collateral					
1. Securities purchased under agreements to resell	-	84,728,590	-	84,728,590	84,728,590
Held to maturity	32,875,426	11,379,323	-	44,254,749	43,002,028
Loans and receivables					
2. Banks ⁽¹⁾	-	94,838,136	-	94,838,136	94,838,136

(1) Amounts of loans and receivables are presented net of the provision for impairment losses.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Below we list the methodologies used to determine the fair values presented above:

Loans and receivables

Fair values were estimated for groups of similar loans based upon type of loan, credit quality and maturity. Fair value for fixed-rate transactions was determined by discounted cash flow estimates using interest rates approximately equivalent to our rates for new transactions based on similar contracts. Where credit deterioration has occurred, estimated cash flows for fixed and floating-rate loans have been reduced to reflect estimated losses.

The fair values for performing loans are calculated by discounting scheduled principal and interest cash flows through maturity using market discount rates and yield curves that reflect the credit and interest rate risk inherent to the loan type at each reporting date. The fair values for impaired loans are based on discounting cash flows or the value of underlying collateral.

The non-performing loans were allocated into each loan category for purposes of calculating the fair-value disclosure. Assumptions regarding cash flows and discount rates are based on available market information and specific borrower information.

Held to maturity

Investments held to maturity are carried at amortized cost. Fair values are estimated according to the assumptions described on Note 2(f). See Note 22 for further details regarding the amortized cost and fair values of held-to-maturity securities.

Deposits from banks and customers

R\$ thousand

The fair value of fixed-rate deposits with stated maturities was calculated using the contractual cash flows discounted with current market rates for instruments with similar maturities and terms. For floating-rate deposits, the carrying amount was considered to approximate fair value.

Funds from securities issued

The carrying values of funds from securities issued approximate the fair values of these instruments.

Subordinated debt

Fair values for subordinated debts were estimated using a discounted cash flow calculation that applies interest rates available in the market for similar maturities and terms.

3.5. Capital management

Capital Management Corporate Process

The Capital Management provides the conditions required to meet the Organization's strategic goals and face the risks inherent to its activities. It includes the preparation of the capital plan, identifying the contingency actions to be considered in stress scenarios.

In line with the strategic guidelines, the Organization manages capital, involving the control and business areas, in accordance with the guidelines of the Board of Executive Officers and Board of Directors.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The governance structure for the capital management and the Internal Capital Adequacy Assessment Process (ICAAP) is composed by Committees and its highest level body is the Board of Directors. The most important is the Planning, Budget and Control Department, whose mission is to provide the efficient and effective management of the business through strategic management and planning, supporting the Top Management by providing analyses and projections of capital requirements and availability, identifying threats and opportunities that help plan the sufficiency and optimization of capital levels. The Department is responsible for complying with the provisions of Brazilian Central Bank regarding capital management activities.

Capital Adequacy

This process is followed up daily to ensure that the Organization maintains a solid capital base to support its operations and to cover the risks incurred, either in normal situations or in extreme market conditions, besides complying with regulatory requirements.

According to the Central Bank, financial institutions are required to permanently maintain capital and additional Common Equity Tier I compatible with the risks from their activities, represented by Risk-Weighted Asset (RWA), which is calculated based on, at least, the sum of Credit, market and operational risk installments.

Additionally, the Organization must maintain enough capital to meet the interest rate risk from operations not included in the trading portfolio (Banking Portfolio's interest rate risk), calculated using the EVE (Economic Value Equity) method.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Analysis of Reference Equity (PR)

Following is the detailed information on the Organization's Capital, in compliance with the Prudential Conglomerate ⁽¹⁾:

Calculation basis – Capital Adequacy Ratio ⁽¹⁾	R\$ thousand	
	Basel III	
	December 31 2016	2015
	Prudential	
Tier I capital	78,762,886	77,506,951
Common Equity tier I	73,747,016	77,506,951
Shareholders' equity	100,442,413	88,906,644
Minority / Other	60,615	-
Prudential adjustments ⁽¹⁾⁽²⁾	26,756,012	(11,399,693)
Additional Capital ⁽³⁾	5,015,870	-
Tier II capital	22,363,950	25,318,399
Subordinated debt	22,363,950	25,318,399
Capital (a)	101,126,836	102,825,350
- Credit risk	589,977,243	556,440,558
- Market risk	15,767,767	18,670,132
- Operational risk	50,443,507	37,106,557
Risk-weighted assets – RWA (b)	656,188,517	612,217,247
Banking Book's Interest Rate Risk Margin (Capital Buffer) ⁽⁴⁾	4,142,339	3,701,899
	28,084,702	35,481,453
Capital adequacy ratio (a / b)	15.4%	16.8%
Tier I capital	12.0%	12.7%
- Common equity	11.2%	12.7%
- Additional Capital	0.8%	-
Tier II capital	3.4%	4.1%

(1) As per January 2016, the factor applied to prudential adjustments went from 40% to 60%, according to the timeline for application of deductions of prudential adjustments, defined in Article 11 of National Monetary Council Resolution n^o 4,192/13;

- (2) In 2016, it includes the effects of goodwill generated in the acquisition of HSBC Brasil;
- (3) In November 2016, Brazilian Central Bank authorized the use of Subordinated Letters of Credit to compose the Additional Capital – Tier I; and
- (4) Real Margin = Lower (PR - PRE - Rban; PR Level I - PRE Level I - Rban; PR Main - PRE Main - Rban) - Conservation Capital.

Total Risk Weighted Assets	656,188,517	612,217,247
Total Capital Requirement	64,798,616	67,343,897
Banking Portfolio's Interest Rate Risk	4,142,339	3,701,899

(1) To calculate the portion concerning Market Risk, capital requirements will be the greater between of the amount determined using the internal model and 80% of the standard model, according to Brazilian Central Bank Circular Letter 3.646/13.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Capital Sufficiency

The management of capital is aligned with the strategic planning and is forward looking, anticipating any changes in the economic and commercial environment conditions in which we operate.

The Organization's capital management aims to ensure, in a permanently way, a capital solid composition to support the development in its activities and ensure appropriate coverage of all risks involved. The Organization maintains a managerial capital margin (buffer), which is added to the minimum regulatory requirements.

The management buffer is defined according to the leading practices and regulatory requirements, observing aspects such as additional impacts generated by stress scenarios, qualitative risks and risks not captured by the regulatory model.

The Organization considers it comfortable to maintain a Tier I Capital margin of at least 25% in relation to the minimum capital requirements in the medium and long term, pursuant to the schedule established by the Brazilian Central Bank for the full adoption of Basel III guidelines.

The Organization's regulatory capital sufficiency can be seen by calculating the capital adequacy ratio which in this period was 15.4%, of which 12.0% and 11.2% was Tier I and Common Equity Tier I respectively. In terms of margin, the amount totaled R\$ 28,084,702 thousand, which would allow for an increase of up to R\$ 356,631,140 thousand in loan operations (Retail).

Since January 2015, according to the National Monetary Council's Resolution nº 4,192/13 which deals with the methodology for calculating the ratios of Common Equity Tier 1, Tier 1 and Total Capital, the regulatory scope became the Prudential Conglomerate. From January 2016 the Prudential adjustments rose from

40% to 60% and the use of subordinated debt eligible for capital issued under the previous rules of the Basel III fell from 70% to 60% of the stock of these debts.

Capital Forecast

The capital management area (ICAAP) is responsible for making simulations and projections of the Organization's capital, in accordance with the strategic guidelines, the impacts arising from variations and trends of the economic and business environment as well as regulatory changes. The results from the projections are submitted to the Top Management, pursuant to the governance established.

The projections present adequate levels of Principal and Level I Capital indices, considering the incorporation of net profits and the increase in prudential adjustments due to the increase of the factors established in Article 11 of National Monetary Council Resolution 4,192/13 for subsequent periods.

Simulation - Basel III

Based on Basel III rules published by Brazilian Central Bank in March and October 2013, which include the definition of capital and the expansion of risk scope and are being gradually implemented up to 2019, below is the simulation based in strategic assumptions for the Prudential Conglomerate, taking into consideration the full compliance with the rules on the reference date of December 2016, i.e., anticipating all the impacts expected throughout the implementation schedule, according to National Monetary Council Resolution nº 4,192/13.

— IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

(1) Published (Schedule 60%);

(2) Effect of the full impact. Including the reserve of Goodwill / Intangible paid for the purchase of HSBC Brasil, net of amortization and the reallocation of resources, through the payment of dividends by the Insurance Group (Grupo Segurador);

(3) Considers the anticipation of the multiplier of installments of market and operational risks, from 9.875% to 8%, in 2019; and the change of the rule for the consolidation of proportional companies, according to Resolution No. 4517/16 of CMN;

(4) Refers to the minimum required, according to BCB's Circulars No. 3,768 / 15 and 3,769 / 15. It should be noted that the BCB set at 0% the installment of the requirements of countercyclical capital, which may reach up to 2.5% in 2019, and includes 1% about a portion of systemic importance in 2019; and

(5) Considers the possibility of the Management issuing an additional capital by 2018, with market conditions.

3.6. Insurance risk/subscription risk

Insurance risk is the risk related to a possible loss event that may occur in the future and for which there is uncertainty over the amount of damages that result from it. A component of insurance risk is underwriting risk, which arises from an adverse economic situation not matching the Organization's expectations at the time of drafting its underwriting policy and calculating insurance premiums. In short, it refers to the risk of the frequency or severity of loss events or benefits exceeding the Organization's estimates.

Underwriting risk is managed by our technical areas. Underwriting and risk acceptance policies are periodically evaluated by working groups. In addition, one of the main tasks of our technical areas is the calculation of regulatory capital for these businesses and certifies studies on the pricing of new products.

The management process seeks to diversify insurance operations, aiming to excel at balancing the portfolio, and is based on the grouping of risks with similar characteristics in order to reduce the impact of individual risks.

Uncertainties over estimated future claim payments

The organization must indemnify all covered events that occurred during the policy period, even if a loss is discovered after coverage ends. As a result, claims are reported over a period and a significant portion of these claims are accounted for in the provisions for incurred and but not reported claims (IBNR). The estimated cost of claims includes direct expenses to be incurred when settling them.

Giving the uncertainties inherent to the process for estimating claims provisions, the final settlement may be different than the original provision.

Asset and liability management (ALM)

The organization periodically analyzes future cash flows on assets and liabilities held in portfolio

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

(ALM - Asset Liability Management). The method used for ALM analysis is to observe the sufficiency or insufficiency of the present value of the stream of assets in relation to the present value of the stream of liabilities, and the duration of assets in relation to that of liabilities. The aim is to verify that the situation of the portfolio of assets and liabilities is balanced in order to honor the Organization's future commitments to its participants and insured persons.

Risk management by product

Monitoring the insurance contract portfolio enables us to track and adjust premiums practiced, as well as assess the need for alterations. Other monitoring tools in use include: (i) sensitivity analysis, and (ii) algorithmic checks and corporate system notifications (underwriting, issuance and claims).

The main risks associated with property insurance

- Oscillations in the incidence, frequency and severity of the claims and the indemnifications of claims in relation to the expectations;
- Unpredictable claims arising from an isolated risk;
- Inaccurate pricing or inadequate underwriting of risks;
- Inadequate reinsurance policies or risk transfer techniques; and
- Insufficient or excessive technical provisions.

Generally the property insurance underwritten is of short duration.

The underwriting strategies and goals are adjusted by management and informed through internal guidelines and practice and procedure manuals.

The risks inherent to the main property insurance business lines are summarized as follows:

- Auto insurance includes, among other things, physical damage to the vehicle, loss of the insured vehicle and third-party liability insurance for vehicles; and
- Business, home and miscellaneous insurance includes, among other things, fire risks (fire, explosion and business interruption), natural hazards (earthquakes, storms and floods), engineering lines (explosion of boilers, breakdown of machinery and construction) and marine (cargo and hull) as well as liability insurance.

Property insurance risk management

The Organization monitors and evaluates risk exposure and undertakes the development, implementation and revision of guidelines related to underwriting, treatment of claims, reinsurance and constitution of technical provisions. The implementation of these guidelines and the management of these risks are supported by the technical departments of each risk area.

The Technical Department has developed mechanisms, e.g. risk grouping by CPF, CNPJ and risky addresses, that identify, quantify and manage accumulated exposures in order to keep them within the limits defined in the internal guidelines.

The main risks associated with life-insurance and private-pension plans

Life-insurance and private-pension plans are long-term in nature and, accordingly, various actuarial assumptions are used to manage and estimate the risks involved, such as: assumptions about returns on investments, mortality and persistence rates in relation to each business unit. Estimates are based on historical experience and on actuarial expectations.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The risks associated with life insurance and private pension plans include:

- Biometric risks, which includes mortality experience, adverse morbidity, longevity and disability. The mortality risk may refer to policyholders living longer than expected (longevity) or passing away before expected. This is because some products pay a lump sum if the person dies, and others pay regular amounts while the policyholder is alive;
- Policyholder's behavior risks, which includes persistence rate experience. Low persistence rates for certain products may result in less policies/private pension plan agreements remaining contracted to help cover fixed expenses and may reduce future positive cash flows of the underwritten business. A low persistence rate may affect liquidity of products which carry a redemption benefit;
- Group life-insurance risk results from exposure to mortality and morbidity rates and to operational experience worse than expected on factors such as persistence levels and administrative expenses; and
- Some Life and Pension Plan products have pre-defined yield guarantees, and thereby face risk from changes in financial markets, returns on investments and interest rates that are managed as a part of market risk.

Life-insurance and private-pension-plan risk management

- The Organization monitors and assesses risk exposure and is responsible for developing, implementing and reviewing policies relating to underwriting, processing claims, and technical reserves for insurance purposes. Implementation of these policies and management of these risks are supported by our technical areas;
- The technical areas have developed mechanisms, such as statistical reports and performance by type that identify, quantify and manage accumulated exposures to keep them within limits defined by internal policies;
- Longevity risks are carefully monitored in relation to the most recent data and to the trends in the environments in which the Organization and its subsidiaries and associated companies operate.

Management monitors exposure to this risk and the capital implications of it in order to manage the possible impacts, as well as to ensure that business has the capital that it may require. The administration adopts improvement assumptions in its calculation of technical provisions in order to predict and thus be covered for possible impacts generated by the improvement in life expectancy of the insured/assisted population;

- Mortality and morbidity risks are partially mitigated through reinsurance contracts for catastrophes;
- Persistency risk is managed through frequent monitoring of the Organization's experience. Management has also defined rules on the management and monitoring of persistence and the implementation of specific initiatives to improve the renewal of policies that expire; and
- The risk of a high level of expenses is primarily monitored through the evaluation of the profitability of the business units and the frequent monitoring of expense levels.

The main risks associated with health insurance

- Variations in cause, frequency and severity of indemnities of claims compared to expectations;
- Unforeseen claims resulting from isolated risk;
- Incorrect pricing or inadequate subscription of risks; and

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- Insufficient or overvalued technical provisions.

For individual health insurance, for which certain provisions are calculated based on expected future cash flows (difference between expected future claims and expected future premiums), there are a number of risks, in addition to those cited above, such as biometric risk, including mortality and longevity experience and the insured's behavioral risk, which covers persistency experience, as well as interest-rate risk that is managed as a part of market risk.

Management of health-insurance risk

- The Organization monitors and evaluates risk exposure and is responsible for the development, implementation and review of policies that cover subscription, treatment of claims and technical insurance provisions. The implementation of these policies and management of risks are supported by the technical areas;
- The technical areas have developed mechanisms, such as statistical reports and performance by type that identify, quantify and manage accumulated exposure in order to keep it within the limits defined by internal policies;
- Longevity risk is carefully monitored using the most recent data and tendencies of the environment in which the Organization operates. Management monitors exposure to this risk and its capital implications in order to manage possible impacts, as well as the funding that the future business needs;
- Persistency risk is managed through the frequent management of the Organization's experience. Management has also established guidelines for the management of persistency in order to monitor and implement specific initiatives, when necessary, to improve retention of policies; and
- The risk of elevated expenses is primarily monitored through the evaluation of the profitability of business units and the frequent monitoring of expense levels.

Results of sensitivity analysis - Damages, life and health insurance and Life with Survival and Welfare Coverage and Individual Life Insurance

Some test results are shown below. For each sensibility scenario the impact is shown in the income and shareholders' equity after taxes and contributions, in a reasonable and possible change in just a single factor. We emphasize that the insurance operations are not exposed to significant currency risk.

Sensitivity factor	Description of sensitivity factor applied
Interest rate	Effect of lowering the risk free forward yield curve rate
Loss events	Impact on the business of increased loss events and claims
Longevity	Impact of an improved survival estimates on annuity contracts
Conversion to income	Impact on annuity contracts of a higher rate of conversion to income

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The sensibility test for Life Insurance with Survival, Welfare Coverage and Individual Life Insurance was made considering the same bases of the LAT test with variation in the assumptions listed below:

	R\$ thousand		
	December 31, 2016		
	Interest rate	Longevity	Conversion to income
Percentage adjustment to each assumption:	-5%	+0,002%	+ 5%
Tradicional plans (contributing period)	(135,954)	(30,376)	(32,535)
PGBL and VGBL (contributing period)	(10,266)	(1,304)	(15,788)
All plans(retirement benefit period)	(487)	(104)	-
Total	(146,707)	(31,784)	(48,323)

For damages, life and health insurance, except individual life, the table below shows increase in the events/claims were to rise 1 percentage point over the 12 months from the calculation base date.

	R\$ thousand			
	Gross of reinsurance		Net of reinsurance	
	December 31		December 31	
	2016	2015	2016	2015
Auto	(21,205)	(21,917)	(21,205)	(21,917)
RE (Elementary branch)	(10,809)	(8,359)	(9,333)	(6,410)
Life	(28,358)	(21,798)	(28,277)	(21,708)
Health	(89,907)	(80,163)	(89,907)	(80,163)

Limitations of sensitivity analysis

Sensitivity analyses show the effect of a change in an important premise while other premises remain unchanged. In real situations, premises and other factors may be correlated. It should also be noted that these sensitivities are not linear and therefore greater or lesser impacts should not be interpolated or

extrapolated from these results.

Sensitivity analyses do not take account of the fact that assets and liabilities are managed and controlled. Additionally, the Organization's financial position may vary with any movement occurring in the market. For example, the risk management strategy aims to manage exposure to fluctuations in the market. As investment markets move, management initiatives may include sales of investments, altered portfolio allocations, and other protective measures.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Risk concentration

Potential exposures to the concentration of risks are monitored by management reports where the results of the contracts sold by regions and type of insurance. The table below shows risk concentration by type of insurance (except health), based on net premiums, net of reinsurance:

Net premiums written by type of insurance, net of reinsurance	R\$ thousand	
	December 31	
	2016	2015
Auto	3,924,444	3,920,821
RE (Elementary branch)	1,593,662	1,557,301
Tradicional plans	1,499,401	1,498,935
Life insurance	6,354,034	5,280,448
VGBL	28,377,786	24,689,594
PGBL	2,386,631	2,296,243

Credit risk of insurance

Credit risk consists of the possible incurrence of losses associated with non-performance, by the borrower or counterparty, of its financial obligations according to agreed terms, as well as the fall in value of any credit agreement as a result of deterioration in the risk classification of the borrower, and other losses related to any non-performance of financial obligations by the counterparty.

Reinsurance policy

Credit risk is involved in purchasing reinsurance and insurance companies must be conservative and selective when choosing their partners Reinsurers are registered with SUSEP, and classified as local,

admitted or occasional. Reinsurers classified as admitted and occasional, headquartered abroad, must meet specific minimum requirements set forth in current legislation.

The Bradesco Organization's policy for purchasing reinsurance and approval of reinsurers are the responsibility of the executive board, observing to the minimum legal requirements and regulations, some of them aimed at minimizing the credit risk intrinsic to the operation, and considering the shareholders' equity consistent with amounts transferred.

Another important aspect of managing reinsurance operations is the fact that the Organization aims to work within its contractual capacity, thereby avoiding high credit risk.

Practically, the value of premiums transferred in reinsurance is relatively small in relation to total premiums written. However, almost all property damage portfolios, except automotive, are hedged by reinsurance which, in most cases, is a combination of proportional and non-proportional plans by risk and/or by event.

Currently, part of the treaty reinsurance contracts (proportional and non-proportional) are transferred to IRB Brasil Resseguros S.A. Some admitted reinsurers participate with lower individual percentages, but all have minimum capital and rating higher than the minimum established by the Brazilian legislation, which, in management's judgment, reduces the credit risk.

Managing credit risk

Credit-risk management in the Organization is a continuous and evolving process including the mapping, development, evaluation and diagnosis of existing models, instruments and procedures

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

that requires a high level of discipline and control in the analysis of operations to preserve the integrity and independence of processes.

Risk management includes monitoring exposure to credit risk of individual counterparties through their credit ratings determined by risk rating agencies.

As noted above, credit risk is managed at the corporate level using structured, independent internal procedures based on proprietary documentation and reports, duly assessed by the risk management structures of Organization, and based on the gradual deployment of internal models for the determination, measurement and calculation of capital.

Exposure to insurance credit risk

Management believes that maximum exposure to credit risk arising from premiums to be paid by insured parties is low, since, in some cases, coverage of claims may be canceled (under Brazilian regulations), if premiums are not paid by the due date. Exposure to credit risk for premium receivables differs between risks yet to be incurred and risks incurred, since there is higher exposure on incurred-risk lines for which coverage is provided in advance of payment of the insurance premium.

4) Estimates and judgments

The Organization makes estimates and judgments that affect the reported amount of assets and liabilities within the next financial year including the assets and liabilities arising from the acquisition of HSBC Brasil. All estimates and judgments required in conformity with IFRS are best estimates undertaken in accordance with the applicable standard. Such estimates and judgments are continually evaluated and based on the historical experience and a number of other factors including future event expectations, regarded as reasonable, under the current circumstances.

The estimates and judgments that have a significant risk and might have a relevant impact on the amounts of assets and liabilities within the next financial year are disclosed below. The actual results may be different from those established by these estimates and premises.

Fair value of financial instruments

Financial instruments recognized at fair value in our consolidated financial statements consist primarily of financial assets held for trading, including derivatives and financial assets classified as available for sale. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participant at the management date.

These financial instruments are categorized within a hierarchy based on the lowest level of input that is significant to the fair value measurement. For instruments classified as level 3, we have to apply a significant amount of our own judgment in arriving at the fair value measurements. We base our judgment decisions on our knowledge and observations of the markets relevant to the individual assets and liabilities, and those judgments may vary based on market conditions. In applying our judgment, we look at a range of third-party prices and transaction volumes to understand and assess the extent of market benchmarks available and the judgments or modeling required in third-party

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

processes. Based on these factors, we determine whether the fair values are observable in active markets or whether the markets are inactive.

Imprecision in estimating unobservable market inputs can impact the amount of revenue or loss recorded for a particular position. Furthermore, while we believe our valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value on the reporting date. For a detailed discussion of the determination of fair value of financial instruments, see Note 3.4.

Impairment of financial assets available for sale

We determine that financial assets available for sale are impaired when there has been a significant or prolonged decline in the fair value below its cost (see Note 2(f)(viii)(b)). This determination of what is significant or prolonged requires judgment. In making this judgment, the Organization evaluates, among other factors, the volatility in share price, where such variations involve equity securities.

In addition, valuations are obtained through market prices or valuation models that require the use of certain assumptions or judgments to estimate fair value.

Allowance for impairment on loans and advances

Periodically, the Organization reviews its portfolio of loans and advances evaluating the estimated loss for the impairment of its operations.

The determination of the amount of the allowance for impairment, by its nature, requires judgments and uses assumptions regarding the loan portfolio, both on a portfolio basis and on an individual basis. When we review our loan portfolio as a whole, several factors can affect our estimate of the likely range of losses, including which methodology we use in measuring historical delinquency rates and what historical period we consider in making those measurements.

Additional factors that can affect our determination of the allowance for impairment include:

- General economic conditions and conditions in the relevant industry;
- Past experience with the relevant debtor or industry, including recent loss experience;
- Credit quality trends;
- Amounts of loan collateral;
- The volume, composition and growth of our loan portfolio;
- The Brazilian government's monetary policy; and
- Any delays in the receipt of information needed to evaluate loans or to confirm existing credit deterioration.

The Organization uses models to assist analysis of the loan portfolio and in determining what impairment should be made. It applies statistical loss factors and other risk indicators to loan pools with similar risk characteristics to arrive at an estimate of incurred losses in the portfolio. Although the models are frequently revised and improved, they are by nature dependent on judgment in relation to the information and estimates. In addition, the volatility of the Brazilian economy is one of the factors that may lead to greater uncertainty in our models than would be expected in more stable macroeconomic environments. Accordingly, our allowance for impairment may not be indicative of future charge-offs.

For a sensitivity analysis, we assess the impact of an increase in the probability of default (PD) on the

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

allowance. In this assessment an increase in 10% of the PD on December 31, 2016, would have increased the allowance for impairment by R\$ 499,214 thousand. This sensitivity analysis is hypothetical, and is only meant to illustrate the impact that the expectation of defaults have on determining the allowance for loan losses.

The process to determine the level of provision for losses from impairment requires estimates and the use of judgment; it is possible that actual losses presented in subsequent periods will differ from those calculated according to current estimates and assumptions.

Impairment of goodwill

The Organization has to consider at least annually whether the current carrying value of goodwill is impaired. The first step of the process requires the identification of independent Cash-Generating Units and the allocation of goodwill to these units. The carrying amount of the CGU, including the allocated goodwill, is compared to its recoverable amount to determine whether any impairment exists. If the value in use of a cash-generating unit is less than its carrying value, goodwill will be impaired. Detailed calculations may need to be carried out taking into consideration changes in the market in which a business operates (e.g. competitive activity, regulatory change). The value in use is based upon discounting expected pre-tax cash flows at a risk-adjusted interest rate appropriate to the operating unit, the determination of both requires one to exercise one's judgment. While forecasts are compared with actual performance and external economic data, expected cash flows naturally reflect the Organization's view of future performance.

Income tax

The determination of the amount of our income tax liability is complex, and our assessment is related to our analysis of our deferred tax assets and liabilities and income tax payable. In general, our evaluation requires that we estimate future amounts of current and deferred taxes. Our assessment of the possibility that deferred tax assets are realized is subjective and involves assessments and assumptions that are inherently uncertain in nature. The realization of deferred tax assets is subject to changes in future tax rates and developments in our strategies. The underlying support for our assessments and assumptions could

change over time as a result of unforeseen events or circumstances, affecting our determination of the amount of our tax liability.

Significant judgment is required in determining whether it is more likely than not that an income tax position will be sustained upon examination, even after the outcome of any related administrative or judicial proceedings based on technical merits. Further judgment is then required to determine the amount of benefit eligible for recognition in our consolidated financial statements.

In addition, we have monitored the interpretation of tax laws by, and decisions of, the tax authorities and Courts so that we can adjust any prior judgment of accrued income taxes. These adjustments may also result from our own income tax planning or resolution of income tax controversies, and may be material to our operating results for any given period. For additional information about income tax, see Note 17.

Technical insurance provisions

Insurance technical provisions (reserves) are liabilities representing estimates of the amounts that will become due at a future date, to or on behalf of our policyholders – see Note 2(o). Expectations of loss ratio, mortality, longevity, length of stay and interest rate are used. These assumptions are based on our experience and are periodically reviewed against industry standards to ensure actuarial credibility.

Contingent liabilities

The Provisions are regularly reviewed and constituted, where the loss is deemed probable, based on the opinion of the legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing. Contingencies classified as Probable Loss are recorded in the Consolidated Statements of Financial Position under "Other Provisions".

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

5) Operating segments

The Organization operates mainly in the banking and insurance segments. Our banking operations include operations in the retail, middle-market and corporate sectors, leasing, international bank operations, investment bank operations and as a private bank. The Organization also conducts banking segment operations through its branches located throughout the country, in branches abroad and through subsidiaries as well as by means of shareholding interests in other companies. Additionally we are engaged in insurance, supplemental pension plans and capitalization bonds through our subsidiary, Bradesco Seguros S.A. and its subsidiaries.

The following information regarding the segments was prepared based on reports provided to our key management to evaluate performance and make decisions related to the allocation of funds for investments and other purposes. Our key management uses a range of information, including financial information, in accordance with the specific procedures established by Article 3 of the National Monetary Council Resolution n° 2,723/00, and other provisions of the Accounting Plan of Financial Institutions, and non-financial information measured on different bases. Hence, the segment information demonstrated in the table below was prepared in accordance with the specific procedures established by Article 3 of the National Monetary Council Resolution n° 2,723/00, and other provisions of the Accounting Plan of Financial Institutions and the total amounts, which correspond to the consolidated financial statements were demonstrated under IFRS, as issued by IASB.

The main assumptions for the segmentation of income and expenses include (i) surplus cash invested by the entities operating in insurance, supplemental pension and capitalization bonds are included in this segment, resulting in an increase in net interest income; (ii) salaries and benefits and administrative costs included in the insurance, supplemental pension and capitalization bonds segment consist only of cost directly related to these operations, and (iii) costs incurred in the banking operations segment related to the infrastructure of the branch network and other general indirect expenses have not been allocated between segments.

(1) Other operation represents less than 1% of total assets/liabilities and the net income for the year. The main adjustments from the information disclosed in segments columns are related to the difference between the IFRS and the Segment Report Information as impairment for loans and advance and effective interest rate.

Our operations are substantially conducted in Brazil. Additionally, as of December 31, 2016, we have a branch in New York, one branch in Grand Cayman, and one branch in London, mainly to complement our banking services and assist in import and export operations for Brazilian customers. Moreover we also have subsidiaries abroad, namely: Banco Bradesco Argentina S.A. (Buenos Aires), Banco Bradesco Europe S.A. (Luxembourg), Bradesco North America LLC (New York), Bradesco Securities, Inc. (New York), Bram US LLC (New York), Bradesco Securities UK Limited (London), Bradesco Services Co., Ltd. (Tokyo), Cidade Capital Markets Ltd. (Grand Cayman), Bradesco Securities Hong Kong Limited (Hong Kong), Bradesco Trade Services Limited (Hong Kong) and Bradescard Mexico, Sociedad de Responsabilidad Limitada (Mexico).

No income from transactions with a single customer or counterparty abroad represented 10% of the Organization's income in the period of 2016 and 2015.

All transactions between operating segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated in "Other operations, adjustments and eliminations". Income and expenses directly associated with each segment are included in determining business-segment performance.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

18) Earnings per share

1. Basic earnings per share

The calculation of basic earnings per share was calculated based on the weighted average number of common and preferred shares outstanding, as shown in the calculations below:

	Years ended Dec	
	2016	2015 (1)
Net earnings attributable to the Organization's common shareholders (R\$ thousand)	8,542,147	8,652,900
Net earnings attributable to the Organization's preferred shareholders (R\$ thousand)	9,352,102	9,480,000
Weighted average number of common shares outstanding (thousands)	2,772,719	2,772,860
Weighted average number of preferred shares outstanding (thousands)	2,759,659	2,761,740
Basic earnings per share attributable to common shareholders of the Organization (in Reais)	3.08	3.11
Basic earnings per share attributable to preferred shareholders of the Organization (in Reais)	3.39	3.43

(1) All share amounts presented for prior periods have been adjusted to reflect the stock split approved at the Board of Directors' Meeting of March 10, 2016, in the proportion of one new share for every 10 shares held.

2. Diluted earnings per share

Diluted earnings per share are the same as basic earnings per share since there are no potentially dilutive instruments.

19) Cash and balances with banks

a) Cash and balances with banks

	R\$ thousand	
	December 31	
	2016	2015
Cash in local currency	12,432,290	9,215,083
Cash in foreign currency	2,085,650	8,084,654
Restricted deposits with the Brazilian Central Bank ⁽¹⁾	58,036,531	54,791,885
Others	180	142
Total	72,554,651	72,091,764

(1) Compulsory deposits with the Brazilian Central Bank refer to a minimum balance that financial institutions must maintain at the Brazilian Central Bank based on a percentage of deposits received from third parties.

b) Cash and cash equivalents

	R\$ thousand	
	December 31	
	2016	2015
Cash in local currency	12,432,290	9,215,083
Cash in foreign currency	2,085,650	8,084,654

Notes to the Consolidated Financial Statements

c) Derivative financial instruments

The Organization enters into operations involving derivative financial instruments with a number of customers for the purpose of mitigating their overall risk exposure as well as managing risk exposure. The derivative financial instruments most often used are highly-liquid instruments traded on the futures market (BM&FBovespa).

(i) Swap contracts

Foreign currency and interest rate swaps are agreements to exchange one set of cash flows for another and result in an economic exchange of foreign currencies or interest rates (for example fixed or variable) or in combinations thereof (i.e. foreign currency and interest rate swaps). There is no exchange of the principal except in certain foreign currency swaps. The Organization's foreign currency risk reflects the potential cost of replacing swap contracts and whether the counterparties fail to comply with their obligations. This risk is continually monitored in relation to the current fair value, the proportion of the notional value of the contracts and the market liquidity. The Organization, to control the level of credit risk assumed, evaluates the counterparties of the contracts using the same techniques used in its loan operations.

(ii) Foreign exchange options

Foreign exchange options are contracts according to which the seller (option issuer) gives to the buyer (option holder) the right, but not the obligation, to buy (call option) or sell (put option) on a certain date or during a certain period, a specific value in foreign currency. The seller receives from the buyer a premium for assuming the exchange or interest-rate risk. The options can be arranged between the Organization and a customer. The Organization is exposed to credit risk only on purchased options and only for the carrying amount, which is the fair market value.

(iii) Foreign currency and interest rate futures

Foreign currency and interest rate futures are contractual obligations for the payment or receipt of a net amount based on changes in foreign exchange and interest rates or the purchase or sale of a financial instrument on a future date at a specific price, established by an organized financial market. The credit risk is minimal, since the future contracts are guaranteed in cash or securities and changes in the value of the contracts are settled on a daily basis. Contracts with a forward rate are interest-rate futures operations traded individually which require settlement of the difference between the contracted rate and the current market rate over the value of the principal to be paid in cash at a future date.

(iv) Forward operations

A forward operation is a contract of purchase or sale, of a share, at a fixed price, for settlement on a certain date. Because it is a futures market, in which the purchase of the share will only be made on the date of maturity, a margin deposit is necessary to guarantee the contract. This margin can be in cash or in securities. The value of the margin varies during the contract according to the variation of the share involved in the operation, to the changes of volatility and liquidity, besides the possible additional margins that the broker could request.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

(1) Includes, on December 31, 2015, the hedging of the firm commitment concerning the purchase and sale of shares agreement, to the sum of R\$ 20,250,293 thousand.

Swaps are contracts of interest rates, foreign currency and cross currency and interest rates in which payments of interest or the principal or in one or two different currencies are exchanged for a contractual period. The risks of swap contracts refer to the potential inability or unwillingness of the counterparties to comply with the contractual terms and the risk associated with changes in market conditions due to changes in the interest rates and the currency exchange rates.

The interest rate and currency futures and the forward contracts of interest rates call for subsequent delivery of an instrument at a specific price or specific profitability. The reference values constitute a

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

nominal value of the respective instrument whose variations in price are settled daily. The credit risk associated with futures contracts is minimized due to these daily settlements. Futures contracts are also subject to risk of changes in interest rates or in the value of the respective instruments.

The Organization has the following economic hedging operations, however, as mentioned in Note 2(f)(iii), these do not qualify for hedge accounting:

Fair-value hedge of interest-rate risk

The Organization uses interest-rate swaps to protect its exposure to changes in the fair value of its fixed income issuances and certain loans and advances. The interest rate swaps are matched with specific issuances or fixed-income loans.

Cash-flow hedge of debt securities issued in foreign currency

The Organization uses interest-rate swaps in foreign currencies to protect itself against exchange and interest-rate risks arising from the issuance of floating rate debt securities denominated in foreign currencies. The cash flows of foreign-currency interest-rate swaps are compatible with the cash flows of the floating rate debt securities.

Market risk hedge

The gains and losses, realized or not, of the financial instruments classified in this category, are recorded in the Statement of Income.

Hedge of net foreign investments

The Organization uses a combination of forward exchange contracts and foreign currency denominated debt to mitigate the exchange-rate risk of its net investments in subsidiaries abroad.

The fair value of forward contracts used to protect the net investments in foreign subsidiaries is shown in the previous table. Foreign currency denominated debts used to protect net investments of the Organization in subsidiaries abroad act as a natural hedge of the foreign currency risk and are included in funds from securities issuances (Note 33).

Other derivatives designated as hedges

The Organization uses this category of instruments to manage its exposure to currency, interest rate, equity market and credit risks. Instruments used include interest-rate swaps, interest-rate swaps in foreign currency, forward contracts, futures, options, credit swaps and stock swaps. The fair value of these derivatives is shown in the previous table.

Unobservable gains on initial recognition

When the valuation depends on unobservable data any initial gain or loss on financial instruments is deferred over the life of the contract or until the instrument is redeemed, transferred, sold or the fair value becomes observable. All derivatives which are part of the hedge relationships are valued on the basis of observable market data.

The reference and/or contractual values do not reflect the actual risk assumed by the Organization, since the net position of these financial instruments arises from compensation and/or combination thereof. The net position is used by the Organization especially to protect interest rates, the price of the underlying assets or exchange risk. The result of these financial instruments is recognized in "Net gains and losses of financial assets held for trading", in the consolidated statement of income.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

We enter into finance lease agreements as a lessee for data processing equipment, which are recorded as leased equipment in property and equipment. According to this accounting method, both the asset and the obligation are recognized in the consolidated financial statements and the depreciation of the asset is calculated based on the same depreciation policy as for similar assets. See Note 38 for disclosure of the obligation.

(3) Impairment losses were recognized in the consolidated statement of income, within “Other operating income/(expenses)”.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Composition of goodwill by segment

	R\$ thousand	
	December 31	
	2016	2015
Banking	4,651,347	429,560
Insurance, pension and capitalization bonds	293,966	293,966
Total	4,945,313	723,526

The Cash Generation Units allocated to the banking segment and the insurance, pension and capitalization bonds segment are tested annually for impairment of goodwill. We did not incur any goodwill impairment losses in 2016, nor in 2015 nor in 2014. Regarding the recent acquisition of HSBC Brasil, detailed in Note 2(a), there was no impairment test for the period.

The recoverable amount from the Banking Segment has been determined based on a value-in-use calculation. The calculation uses cash-flow predictions based on financial budgets approved by management, with a terminal growth rate of 7.6% p.a. (8.2% p.a. in 2015). The forecast cash flows have been discounted at a rate of 12.9% p.a. (15.4% p.a. in 2015).

The key assumptions described above may change as economic and market conditions change. The Organization estimates that reasonably possible changes in these assumptions within the current economic environment are not expected to cause the recoverable amount of either unit to decline below the carrying amount.

30) Other assets

	R\$ thousand
30) Other assets	295

	December 31	
	2016	2015
Foreign exchange transactions ⁽¹⁾⁽⁴⁾	17,455,821	14,260,780

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Securities issued through securitization

Since 2003, the Organization uses certain arrangements to optimize its activities of funding and liquidity management by means of an Specific Purpose Entity (SPE). This SPE, which is called International Diversified Payment Rights Company, is financed with long-term bonds which are settled with the future cash flow of the corresponding assets, basically comprising current and future flow of payment orders sent by individuals and legal entities abroad to beneficiaries in Brazil for whom Bradesco acts as payor.

The long-term instruments issued by the SPE and sold to investors will be settled with funds from the payment orders flows. The Organization is required to redeem the instruments in specific cases of default or upon closing of the operations of the SPE.

The funds deriving from the sale of current and future payment orders flows, received by the SPE, must be maintained in a specific bank account until they reach a given minimum level.

We show below the amounts of the securities issued by the SPE, which appear in the "Funding from issuance of securities" line item:

h) Claim information

The purpose of the table below is to show the inherent insurance risk, comparing the insurance claims paid with their provisions. Starting from the year in which the claim was reported, the upper part of the table shows the changes in the provision over the years. The provision varies as more precise information concerning the frequency and severity of the claims is obtained. The lower part of the table shows the reconciliation of the amounts with the amounts presented in the financial statements.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

36) Supplemental pension plans

Bradesco and its subsidiaries sponsor a private defined contribution pension for employees and directors, that allows financial resources to be accumulated by participants throughout their careers by means of employee and employer contributions and invested in an Exclusive Investment Fund (FIE). The Supplementary Pension Plan is managed by Bradesco Vida e Previdência S.A. and BRAM – Bradesco Asset Management S.A. DTVM is responsible for the financial management of the FIEs funds.

The Supplementary Pension Plan counts on contributions from employees and administrators of Bradesco and its subsidiaries equivalent to at least 4% of the salary by employees and, 5% of the salary, plus the percentage allocated to covers of risk benefits (invalidity and death) by the company. Actuarial obligations of the defined contribution plan are fully covered by the plan assets of the corresponding FIE. In addition to the plan, in 2001, participants who chose to migrate from the defined benefit plan are guaranteed a proportional deferred benefit, corresponding to their accumulated rights in that plan. For the active participants, retirees and pensioners of the defined benefit plan, now closed to new members, in extinction, the present value of the actuarial obligations of the plan is completely secured by collateral assets.

Banco Alvorada S.A. (successor from the spin-off of Banco Baneb S.A.) maintains defined contribution and defined benefit retirement plans, through Fundação Baneb de Seguridade Social – Bases (related to the former employees of Baneb).

Bradesco's sponsors both defined benefit and defined contribution retirement plans, through Caixa de Assistência e Aposentadoria dos Funcionários do Banco do Estado do Maranhão (Capof), to employees originating from Banco BEM S.A.

Bradesco sponsors a defined benefit plan through Caixa de Previdência Privada Bec – Cabec, for former employees of Banco do Estado do Ceará S.A., having requested the withdrawal of the sponsorship in March 2016, which is still in course.

With the acquisition of HSBC Bank Brasil S.A. (current Kirton Bank Brasil S.A.), the open pension plan, which was offered to employees of that institution, in the modality of defined contribution, has been discontinued. From October 2016, the employees transferred can adhere to the Pension Plan offered to the employees of Bradesco.

Kirton Bank Brasil S.A., Kirton Capitalização S.A., Kirton Corretora de Seguros S.A., Kirton Corretora de Títulos e Valores Mobiliários S.A. and Kirton Seguros S.A. sponsor a defined benefit plan called APABA to employees originating from Banco Bamerindus do Brasil S.A., and Kirton Administração de Serviços para Fundos de Pensão Ltda. sponsors to its employees the Kirton Prev Benefits Plan (*Plano de Benefícios Kirton Prev*), both managed by MultiBRA – Pension Fund.

Banco Losango S.A., Kirton Bank Brasil S.A. and Credival – Participações, Administração e Assessoria Ltda. sponsor three pension plans for its employees, which are Losango I Benefits Plan – Basic Part, Losango I – Supplementary Part and PREVMAIS Losango Plan, all managed by MultiBRA – Settlor – Multiple Fund.

Bradesco took on the obligations of Kirton Bank Brasil S.A. with regard to Life Insurance, Health Insurance Plans, and Retirement Compensation for employees coming from Banco Bamerindus do Brasil S.A.

Expenses related to contributions made in 2016 totaled R\$ 584,438 thousand (2015 - R\$ 606,245 thousand and 2014 - R\$ 622,807 thousand).

In addition to this benefit, Bradesco and its subsidiaries offer other benefits to their employees and administrators, including health insurance, dental care, life and personal accident insurance, and professional training. These expenses, including the aforementioned contributions, totaled R\$ 3,826,715 thousand in 2016 (2015 - R\$ 3,163,517 thousand and 2014 - R\$ 2,949,691 thousand).

IAS 19 establishes that the employer must recognize prospectively the surplus or deficit of its defined benefit plans and post-retirement plans as an asset or an obligation in its consolidated statement of financial position, and must recognize the changes in the financial condition during the year in which the changes occurred, in profit or loss.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In accordance with the requirements of IAS 19 – Employee Benefits, Bradesco and its subsidiaries, as sponsors of these plans, taking into consideration the economic and actuarial study, recalculated their actuarial commitments using the real interest rate that reflected the new real interest rate scenario and recognised their obligations in the financial statements as appropriate.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In 2016, as a result of the plans arising from the acquisition of HSBC Brasil, we recorded a liability of health insurance, life insurance, and savings plans, in the amount of R\$ 498,591 thousand, being: (i) presumed balance in the amount of R\$ 453,768 thousand; (ii) cost of interest and services in the amount of R\$ 23,288 thousand; (iii) actuarial gain in the amount of R\$ 34,674 thousand; and (iv) benefit paid in the amount of R\$ (13,139) thousand.

Benefit obligations and net periodic benefit cost for the years 2016 and 2015 for our subsidiaries, were determined using the following assumptions:

	December 31	
	2016	2015
Discount rate ⁽¹⁾	11.1%	12.7%
Expected long-term rate of return on the assets	11.1%	12.7%
Increase in salary levels	4.8%	5.0%

(1) In 2016, considering an inflation rate of 4.8% p.a. and a real discount rate of 6.0% p.a. (2015 – 5.0% and 7.3% p.a., respectively).

The long-term rate of return on plan assets is based on the following:

- Medium- to long-term expectations of the asset managers; and
- Public and private securities, with short to long-term maturities which represent a significant portion of the investment portfolios of our subsidiaries, the return on which is higher than inflation plus interest.

The assets of pension plans are invested in compliance with the applicable legislation (government securities and private securities, listed company shares and real estate properties) and the

weighted-average allocation of the pension plan's assets by category is as follows:

Asset categories	Assets of the Alvorada Plan		Assets of the Bradesco Plan		Assets of the Kirton Plan	Assets of the Losango Plan
	December 31		December 31	December 31	December 31	December 31
	2016	2015	2016	2015	2016	2016
Equities	-	-	3.9%	8.9%	-	18.8%
Fixed income	93.1%	92.0%	91.3%	83.0%	100.0%	81.2%
Properties	5.3%	6.3%	2.7%	2.4%	-	-
Other	1.6%	1.7%	2.1%	5.7%	-	-
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

Below is the sensitivity analysis of the benefit plan obligations, showing the impact on the actuarial exposure (11.1% p.a.) assuming a 1 b.p. change in the discount rate:

Discount rate	Sensitivity analysis	Effect on actuarial liabilities	Effect on the present value of obligations
12.1%	Increase of 1 b.p.	decrease	(338,533)
10.1%	Decrease of 1 b.p.	increase	385,452

37) Provisions, contingent liabilities and contingent assets

a) Contingent assets

Contingent assets are not recognized in the financial statements. However, there are ongoing proceedings where the chance of success is considered probable, such as: a) Social Integration

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Program (PIS), Bradesco has made a claim to offset PIS against Gross Operating Income, paid under Decree-Laws nº 2,445/88 and nº 2,449/88, regarding the payment that exceeded the amount due under Supplementary Law nº 07/70 (PIS Repique); and b) other taxes, the legality and/or constitutionality of which is being challenged, where the decision may lead to reimbursement of amounts paid.

b) Contingent liabilities and tax and social security obligations

The Organization is a party to a number of labor, civil and tax lawsuits, arising from the normal course of business.

Management recorded provisions based on their opinion and that of their legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing, where the loss is deemed probable.

Management considers that the provision is sufficient to cover losses generated by the respective lawsuits.

Liability related to litigation is held until the conclusion to the lawsuit, represented by judicial decisions, with no further appeals or due to the statute of limitation.

I - Labor claims

These are claims brought by former employees and outsourced employees seeking indemnifications, most significantly for unpaid "overtime", pursuant to Article 224 of the Consolidation of Labor Laws (CLT). In proceedings in which a judicial deposit is used to guarantee the execution of the judgment, the labor provision is made considering the estimated loss of these deposits. For proceedings with similar characteristics and for which there has been no official court decision, the provision is recorded based on

the average calculated value of payments made for labor complaints settled in the past 12 months and for proceedings originating from acquired banks, with unique characteristics, the calculation and assessment of the required balance is conducted periodically, based on the updated recent loss history.

Overtime is monitored by using electronic time cards and paid regularly during the employment contract and, accordingly, the claims filed by former employees do not represent significant amounts.

II - Civil proceedings

These are claims for pain and suffering and property damages, mainly relating to protests, returned checks, the inclusion of information about debtors in the credit restriction registry and the replacement of inflation adjustments excluded as a result of government economic plans. These lawsuits are individually controlled using a computer-based system and provisioned whenever the loss is deemed as probable, considering the opinion of Management and their legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts.

Most of these lawsuits are brought to the Special Civil Court (JEC), in which the claims are limited to 40 times the minimum wage and do not have a significant impact on the Organization's financial position.

There are a significant number of legal claims pleading alleged differences in adjustment for inflation on savings account balances due to the implementation of economic plans that were part of the federal government's economic policy to reduce inflation in the '80s and '90s.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Although Bradesco complied with the law and regulation in force at the time, these lawsuits have been recorded in provisions, taking into consideration the claims where the Bank is the defendant and the perspective of loss, which is considered after the analysis of each demand, based on the current decision of the Superior Court of Justice (STJ).

Note that, regarding disputes relating to economic plans, the Federal Supreme Court (STF) suspended the prosecution of all lawsuits on cognizance stage, until the Court issues a final decision on the right under litigation.

c) Tax and social security obligations

The Organization is disputing the legality and constitutionality of certain taxes and contributions in court, for which provisions have been recorded in full, although there is good chance of a favorable outcome, based on the opinion of Management and their legal counsel. The processing of these legal obligations and the provisions for cases for which the risk of loss is deemed as probable is regularly monitored in the legal court. During or after the conclusion of each case, a favorable outcome may arise for the Organization, resulting in the reversal of the related provisions.

The main cases are:

- PIS and COFINS – R\$ 2,320,261 thousand (R\$ 2,115,466 thousand in 2015): a request for authorization to calculate and pay PIS and COFINS based on effective billing, as set forth in Article 2 of Supplementary Law nº 70/91, removing from the calculation base the unconstitutional inclusion of other revenues other than those billed;
- IRPJ/CSLL on losses of credits – R\$ 1,913,208 thousand (R\$ 1,880,905 thousand in 2015): we are requesting to deduct from income tax and social contributions payable (IRPJ and CSLL, respectively) amounts of actual and definite loan losses related to unconditional discounts granted during collections, regardless of compliance with the terms and conditions provided for in Articles 9 to 14 of Law nº 9,430/96 that only apply to temporary losses;

- Pension Contributions – R\$ 1,385,456 thousand (R\$ 1,080,640 thousand in 2015): official notifications related to the pension contributions on financial contributions in private pension plans, considered by the authorities to be compensatory sums subject to the incidence of pension contributions and to an isolated fine for not withholding IRRF on the financial contributions;

- INSS Autonomous Brokers – R\$ 901,171 thousand (R\$ 1,794,380 thousand in 2015): The Bradesco Organization is questioning the charging of social security contribution on remunerations paid to third-party service providers, established by Supplementary Law No. 84/96 and subsequent regulations/amendments, at 20.0% with an additional 2.5%, on the grounds that services are not provided to insurance companies but to policyholders, thus being outside the scope of such a contribution as provided for in item I, Article 22 of Law nº 8,212/91, as new wording in Law nº 9,876/99;

- INSS – Contribution to SAT – R\$ 374,620 thousand: in an ordinary lawsuit filed by the Brazilian Federation of Banks – Febraban, since April 2007, on behalf of its members, is questioning the classification of banks at the highest level of risk, with respect to Work Accident Risk – RAT, which eventually raised the rate of the respective contribution from 1% to 3%, in accordance with Decree nº 6,042/07; and

- PIS – R\$ 339,767 thousand (R\$325,932 thousand in 2015): The Bradesco Organization is requesting authorization to offset overpaid amounts in 1994 and 1995 as PIS contribution, already compensated, provisioned upon granting of the preliminary injunction, corresponding to the surplus paid over that calculated on the tax base established in the Constitution, i.e., gross operating income, as defined in the income tax legislation set out in Article 44 of Law nº 4,506/64, which excludes interest income.

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In general, the provisions relating to lawsuits are classified as non-current, due to the unpredictability of the duration of the proceedings in the Brazilian justice system. For this reason, the estimate has not been disclosed with relation to the specific year in which these lawsuits will be closed.

d) Changes in other provision

	Labor	Civil	R\$ thousand Tax and Social Security ⁽¹⁾⁽²⁾
Balance on December 31, 2015	3,048,442	4,202,950	8,112,925

Balance on December 31, 2015	3,048,442	4,202,950	8,112,925

(1) Mainly include legal liabilities;

(2) In 2016, there were reversals of a provisions relating to: i) the process of INSS of the self-employed of the Bradesco Saúde subsidiary, in the amount of R\$ 1,081,528 thousand; ii) to the Pis process – EC 17, in the amount of R\$ 242,242 thousand; and iii) offset by the provision for social security contributions on transfers to private pension plans, in the amount of R\$ 215,668 thousand; and

(3) HSBC Brasil.

e) Contingent liabilities classified as possible losses

The Organization maintains a system to monitor all administrative and judicial proceedings in which the institution is plaintiff or defendant and, based on the opinion of legal counsel, classifies the lawsuits according to the expectation of loss. Case law trends are periodically analyzed and, if necessary, the related risk is reclassified. In this respect, contingent lawsuits deemed to have a possible risk of loss are not recorded as a liability in the financial statements. The main proceedings in this category are the following: a) 2006 to 2013 income tax and social contribution, relating to goodwill amortization being disallowed on the acquisition of investments, for the amount of R\$ 5,894,504 thousand (R\$ 5,194,055 thousand in 2015); b) Fines and disallowances of Cofins loan compensations, released after a favorable decision in a judicial proceeding, where the unconstitutionality of the expansion of the intended calculation base was discussed for revenues other than those from billing (Law n^o 9,718/98), in the amount of R\$ 3,999,185 thousand; c) Leasing companies' Tax on Services of any Nature (ISSQN), total lawsuits correspond to R\$ 2,398,185 thousand (R\$ 1,910,629 thousand in 2015) which relates to the municipal tax demands from municipalities other than those in which the company is located and where, under law, tax is collected; d) IRPJ and CSLL deficiency note relating to disallowance of exclusions of revenues from the mark-to-market of securities from 2007 to 2012, differences in depreciation expenses, insufficient depreciation expenses, expenses with depreciation of leased assets, operating expenses and income and disallowance of tax loss compensation, in the amount of R\$ 1,653,942 thousand (R\$ 908,915 thousand in 2015); e) Notifications and disallowances of compensations of PIS and Cofins related to the unconstitutional extension of the basis of calculation intended for other income other than the billing (Law n^o 9,718/98), from acquired companies, amounting to R\$ 1,317,238 thousand; f) IRPJ and CSLL deficiency notice relating to the disallowance of loan loss deductions, for the amount of R\$ 760,436 thousand (R\$ 1,200,403 thousand in 2015); and g) IRPJ and CSLL deficiency note, amounting to R\$ 459,962 thousand (R\$ 421,035 thousand in 2015) relating to profit of subsidiaries based overseas, for the calendar years of 2008 and 2009.

(1) All share amounts presented for prior periods have been adjusted to reflect the stock split approved at the Board of Directors' Meeting of March 10, 2016 in proportion of one new share for every 10 shares held.

In the Extraordinary General Meeting of March 10, 2015, deliberation was made to increase the Capital Stock by R\$ 5,000,000 thousand, increasing it from R\$ 38,100,000 thousand to R\$ 43,100,000 thousand, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law nº 6,404/76, with a bonus of 20% in shares, by issuing 841,454,808 new nominative-book entry shares, with no nominal value, whereby 420,727,426 common and 420,727,382 preferred shares, attributed free-of-charge to the shareholders as bonus, in the ratio of two (2) new shares for every ten (10) shares of the same type that they own, benefiting the shareholders registered on March 26, 2015.

In the Extraordinary General Meeting of March 10, 2016, the approval was proposed by the Board of Directors to increase the capital stock by R\$ 8,000,000 thousand, increasing it from R\$ 43,100,000 thousand to R\$ 51,100,000 thousand, with a bonus in shares, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law nº 6,404/76, by issuing 504,872,885 new nominative-book entry shares, with no nominal value, whereby 252,436,456 are common and 252,436,429 are preferred shares, attributed free-of-charge to the shareholders as bonus, to the ratio of 1 new share for every 10 shares of the same type that they own on the base date.

All of the shareholders are entitled to receive, in total, a mandatory dividend of at least 30% of Bradesco's annual net income, as shown in the statutory accounting records, adjusted by transfers to reserves. The Organization has no obligation that is exchangeable for or convertible into shares of capital. As a result, its diluted earnings per share is the same as the basic earnings per share.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In occurring any operation that changes the number of shares, simultaneously with the transaction in the Brazilian Market, and with the same timeframes, an identical procedure is adopted in the International Market, for the ADRs/GDRs traded in New York, USA, and Madrid, Spain.

Treasury shares are recorded at cost, which is approximately equivalent to the market prices on the date they are acquired. Cancellation of treasury shares is recorded as a reduction of unappropriated retained earnings. Treasury shares are acquired for subsequent sale or cancellation.

b) Reserves

Capital reserve

The capital reserve consists mainly of premiums paid by the shareholders upon subscription of shares. The capital reserve is used for (i) absorption of any losses in excess of accumulated losses and revenue reserves, (ii) redemption, reimbursement of purchase of shares, (iii) redemption of founders' shares, (iv) transfer to share capital, and (v) payment of dividends to preferred shares, when this privilege is granted to them.

Revenue reserves

In accordance with Corporate Legislation, Bradesco and its Brazilian subsidiaries must allocate 5% of their annual statutory net income, after absorption of accumulated losses, to a legal reserve, the distribution of which is subject to certain limitations. The reserve can be used to increase capital or to absorb losses, but cannot be distributed in the form of dividends.

The Statutory Reserve aims to maintain an operating margin that is compatible with the development of the Organization's active operations and may be formed by up to 100% of net income remaining after statutory allocations if proposed by the Board of Executive Officers, approved by the Board of Directors and ratified at the Shareholders' Meeting, with the accumulated value limited to 95% of the Organization's paid-in capital share amount.

c) Dividends (including interest on equity)

Dividends are based on the net income as determined in the financial statements prepared in accordance with Brazilian generally accepted accounting principles (BR GAAP) applicable to financial institutions authorized to operate by the Central Bank of Brazil. The dividends are paid in *Reais* and can be converted into US dollars and remitted to shareholders abroad, provided that the equity participation of the non-resident shareholder is registered with the Central Bank of Brazil, Brazilian companies may pay interest on equity to shareholders based on the net equity and treat these payments as deductible expenses in the Brazilian income tax and social contribution calculations. The interest cost is treated for accounting purposes as a deduction from equity in a manner similar to dividends. Withholding income tax is levied and paid at the time that the interest on equity is paid to the shareholders.

In 2016 the Organization distributed dividends (including interest on equity) of R\$ 6,975,782 thousand, being attributed to the shareholders, the amount per share of R\$ 1.20 for common shares and R\$ 1.32 for preferred shares (2015 - R\$ 6,034,964 thousand, R\$ 1.04 for common shares and R\$ 1.14 for preferred shares).

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

40) Transactions with related parties

Related party transactions are carried out under conditions and at rates consistent with those entered into with third parties, when applicable, and effective on the dates of the operations.

The principal shareholders of Bradesco are Cidade de Deus Companhia Comercial de Participações and Fundação Bradesco. Fundação Bradesco is a not-for-profit entity that for more than 40 years, has been helping to develop the potential of children and youngsters by means of schools in disadvantaged regions.

The main transactions with related parties are presented as follows:

IFRS – International Financial Reporting Standards – 2016

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

a) Remuneration of key management personnel

The following is established each year at the Annual Shareholders' Meeting:

- The annual grand total amount of management compensation, set forth at the Board of Directors Meetings, to be paid to board members and members of the Board of Executive Officers, as determined by the Company's Bylaws; and
- The amount allocated to finance Management pension plans, within the Employee and Management pension plan of the Bradesco Organization.

For 2016, the maximum amount of R\$ 474,500 thousand (2015 - R\$ 349,900 thousand) was set for Management compensation and R\$ 268,100 thousand (2015 - R\$ 353,000 thousand) to finance defined contribution pension plans. The current policy on Management compensation sets forth that 50% of net variable compensation, if any, must be allocated to the acquisition of preferred shares of Bradesco, in the name of Directors, which vest in three equal, annual and successive installments, the first of which is in the year following the payment date. This procedure complies with National Monetary Council Resolution nº 3921/10, which sets forth a management compensation policy for financial institutions.

Short-term benefits for management

The Organization has no long-term benefits for the termination of employment contracts or for remuneration based on shares for its key management personnel.

Other information**a) Under current law, financial institutions are not allowed to grant loans or advances to:**

- (i) Officers and members of the advisory, administrative, fiscal or similar councils, as well as to their respective spouses and family members up to the second degree;
- (ii) Individuals or corporations that own more than 10% of their capital; and
- (iii) Corporations in which the financial institution itself, any officers or administrators of the institution, as well as their spouses and respective family members up to the second degree own more than 10% of equity.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Therefore, no loans or advances are granted by the financial institutions to any subsidiary, members of the Board of Directors or Board of Executive Officers and their relatives.

b) Equity participation

Together directly, members of the Board of Directors and Board of the Executive Officers had the following shareholding in Bradesco:

	December 31	
	2016	2015
Common shares	0.7%	0.6%
Preferred shares	1.1%	1.1%
Total shares ⁽¹⁾	0.9%	0.8%

(1) In 2016, direct and indirect shareholding of the members of Board of Directors and Board of Executive Officers totaled 2.8% of common shares, 1.2% of preferred shares and 2.0% of all shares (2015 – 2.7% of common shares, 1.1% of preferred shares and 1.9% of all shares).

41) Off-balance sheet commitments

The table below summarizes the total risk represented by off-balance sheet commitments:

	R\$ thousand	
	December 31	
	2016	2015
Commitments to extend credit ⁽¹⁾	237,019,535	194,191,498

Financial guarantees ⁽²⁾	78,949,483	69,882,893
Letters of credit for imports	329,015	245,751
Total	316,298,033	264,320,142

(1) Includes available lines of credit, limits for credit cards, personal loans, housing loans and overdrafts; and

(2) Refers to guarantees mostly provided for Corporate customers.

Financial guarantees are conditional commitments for loans issued to ensure the performance of a customer in an obligation to a third party. There is usually the right of recourse against the customer to recover any amount paid under these guarantees. Moreover, we can retain cash or other highly-liquid funds to counter-guarantee these commitments.

The contracts are subject to the same credit evaluations as other credit operations. Standby letters of credit are issued mainly to endorse public and private debt issue agreements including commercial paper, securities financing and similar transactions. The standby letters of credit are subject to customer credit evaluation by the management.

We issue letters of credit in connection with foreign trade transactions to guarantee the performance of a customer with a third party. These instruments are short-term commitments to pay the third-party beneficiary under certain contractual terms for the shipment of products. The contracts are subject to the same credit evaluation as other credit operations.

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

42) New standards and amendments and interpretations of existing standards

Standards, amendments and interpretations of existing standards in future periods

- IFRS 9 Financial Instruments: Recognition and Measurement - IFRS 9 replaces the guidance in IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 is applied for financial instruments and will be adopted retrospectively on the date of entry into force of the standard on January 1, 2018. The new standard includes new classification models, as follows: (i) all of the financial assets are initially classified according to the business model and submitted to the SPPI test; (ii) the standard divides all of the financial assets that are presently within the scope of IAS 39 into two measurement types: amortized cost and fair value; (iii) the categories of available for sale and held to maturity of IAS 39 were eliminated; and (iv) the concept of built-in derivatives of IAS 39 was eliminated by the concepts of the new IFRS. IFRS 9 replaces the 'incurred loss' model in IAS 39 with a forward looking 'expected credit loss' (ECL) model. This will require considerable judgment over how changes in economic factors affects ECLs. The new standard maintains the existing guidance on the recognition and derecognition of financial instruments of IAS 39.

The new standard will require the Organization to review its accounting processes and internal controls related to the classification and measurement of financial instruments. The effective impact of the adoption of IFRS 9 in the financial statements is still being evaluated and will be concluded by the date of entry into force of the standard, however, it is expected an increase in the provision for credit, due to the anticipation of the recognition of the loss.

- IFRS 15 - Revenue from Contracts with Customers - requires that revenue is recognized so as to reflect the transfer of goods or services to the client for an amount that represents the company's expectation of having rights to these goods or services by way of consideration. IFRS 15 replaces IAS 18, IAS 11, and related interpretations (IFRICs 13, 15 and 18), and shall be applicable from January, 2018. Any possible impacts arising from adopting these changes are being assessed and will be completed by the entry into force of the standard.

- (3) IFRS 16 - Leasing. The main changes in relation to IAS 17 for lessees are: (i) there is no longer classification in operating and financial leasing; and (ii) all leasing operations are activated and posted in liabilities, and interest and liabilities must be recognized in depreciation / amortization, using the current financial lease procedure. There are optional exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard, as lessors continue to classify leases as finance or operating leases. IFRS16 replaces IAS17 and will be applicable as of January 1, 2019 and the possible impacts arising from the adoption of this amendment are being evaluated, and will be concluded by the date of entry into force of the standard.

43) Other information

1. In January 2016, Bradesco signed a non-binding Memorandum of Understanding with Banco do Brasil S.A., Banco Santander (Brasil) S.A., Caixa Econômica Federal and Itaú Unibanco S.A., in order to create a holding company of credit intelligence ("GIC"), which will develop a database with the goal of adding, reconciling and handling database and credit-related information, of individuals and legal entities, which expressly authorize their inclusion in the database, as required by the applicable rules.

2. Unconsolidated structured entities are unconsolidated entities that the Organization does not control, but which have a contractual and non-contractual involvement, and provide variability of returns arising from the performance. The organization has an involvement with structured entities through management of investment funds and portfolios making management fees and consortium management.

The main unconsolidated structured entities are, (i) the investment funds managed by Organization, whose nature and involvement, generating management fees and investment in units for funds, the assets of managed funds and non consolidated in 2016 were R\$ 426,390,575 thousand (2015 - R\$ 344,075,899 thousand) and revenues earned in 2016 were R\$ 1,079,653 thousand (2015 - R\$ 1,054,424 thousand and 2014 - R\$ 1,168,787 thousand) and (ii) the consortium which nature and involvement is related to generation management fees of consortium quotas, represented by groups of quotaholders formed to acquire specific goods, whose assets in 2016 were R\$ 71,075,119 thousand (2015 – R\$ 57,440,902 thousand) and the revenues were in 2016 R\$ 1,278,753 thousand (2015 – R\$ 1,040,109 thousand and 2014 – R\$ 880,373 thousand).

3. In May, 2016, Bradesco became aware of the indictment of three members of its Executive Board of Directors by the Federal Police, in the scope of the so-called "Operation Zealots". On July, 2016, the Federal Public Prosecution filed an accusation against all three members of the Board of Executive Officers and a former member of its Board of Directors, which was received by the Judge of the 10th Federal Court of Judicial Section of the Federal District. The Management conducted a thorough internal evaluation of the

records and documents related to the indictment and found no evidence of any illegality committed by its representatives. The executives of Bradesco have already submitted their respective defenses in the criminal proceedings, pointing out the facts and evidence demonstrating their innocence. Bradesco is cooperating with the authorities and appropriate regulatory authorities, providing the information requested, in Brazil and abroad.

Bradesco _____

Consolidated Financial Statements prepared in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

On account of the news published in the media, on the indictment in the "Operation Zealots", a class action was filed in the District Court of New York, on June, 2016. On September, 2016, Bradesco voluntarily attended the proceedings of the Class Action and agreed with the plaintiff a term for the submission of the revocation of the suit until December, 2016. On October, 2016, the Plaintiff Leader presented the addendum of the Initial Petition, appointing as defendants Bradesco and three members of its Board of Executive Officers. According to the demand, investors who purchased preferred American Depository Shares ("ADS") of Bradesco between April, 2012 and July, 2016 would have suffered losses provoked by Bradesco due to a supposed violation regarding the American law of capital markets, according to communication to the Market on May, June and July, 2016. Considering that the demand is in a preliminary stage, it is not possible at present to make a risk rating, and there is not yet evidence to support a risk assessment.

4. The subsidiaries of Bradesco, BEM - Distribuidora de Títulos e Valores Mobiliários Ltda. and BRAM - Bradesco Asset Management S.A. Distribuidora de Títulos e Valores Mobiliários, as well as two of its Managers, were mentioned in the scope of the so-called "Greenfield operation" of the Federal Police, because they were responsible for the administration and management of the Fund in Equity - FIP (Equity Investment Fund), respectively. Besides providing the documents, the Federal Court has ruled, in the course of this Operation, the blocking of these companies' values. As a result of this, a Commitment was signed, approved by the 10th Federal Court of the Federal District, to release the values through the provision of guarantees of up to R\$104 million, without the recognition of any civil or criminal liability on the part of companies or administrators of the Organization. In the scope of this commitment, managers and officers of the Organization committed to provide any clarifications to the authorities responsible for conducting this investigation, regardless of a formal subpoena. Additionally, the internal evaluations indicate that there has been no illegality in conducting these activities according to communication to the Market on September, 2016. So far, there is no indication that the investigations could result in the accountability of these companies.

5. In October 2016, Bradesco Seguros S.A. ("Bradesco Seguros") and Swiss Re Corporate Solutions Ltd. ("Swiss Re Corso") signed a deal whereby: (i) Swiss Re Corporate Solutions Brasil Seguros S/A ("Swiss Re Corporate Solutions Brasil") will assume the insurance operations of P&C (Property and Casualty) and of transport of Bradesco Seguros ("Large Risks Insurance"), to have exclusive access to Bradesco clients to exploit the marketing of Large Risks Insurance; and (ii) Bradesco Seguros will hold an equity stake of 40% in Swiss Re Corporate Solutions Brasil and the other 60% stake will remain with its controller Swiss Re Corso. The transaction is subject to approval by the competent authorities and other contractual terms

commonly used for this type of transaction.

44) Subsequent events

There were no other events after the reporting period that need to be adjusted or disclosed in these consolidated financial statements as at December 31, 2016.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
