UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended June 30, 2017
OR
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____
Commission File Number: 001-37429

EXPEDIA, INC.
(Exact name of registrant as specified in its charter)
Delaware 20-2705720
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)
333 108th Avenue NE
Bellevue, WA 98004
(Address of principal executive office) (Zip Code)
(425) 679-7200
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. o

Edgar Filing: Expedia, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each of the registrant's classes of common stock as of July 14, 2017 was:

Common stock, \$0.0001 par value per share	138,836,588 shares
Class B common stock, \$0.0001 par value per share	12,799,999 shares

Notes to Consolidated Financial Statements

June 30, 2017

(Unaudited)

Note 1 – Basis of Presentation

Description of Business

Expedia, Inc. and its subsidiaries provide travel products and services to leisure and corporate travelers in the United States and abroad as well as various media and advertising offerings to travel and non-travel advertisers. These travel products and services are offered through a diversified portfolio of brands including: Expedia.com®, Hotels.com®, Hotwire.com™, Travelocity®, Expedia® Affiliate Network, Classic Vacations®, Expedia Local Expert®, Expedia® CruiseShipCenters®, CarRentals.com™, Wotif Group, Orbitz®, CheapTickets®, ebookers®, SilverRail Technologies, Inc., Egencia®, trivago®, and HomeAway®. In addition, many of these brands have related international points of sale, including those as part of AirAsia-Expedia. We refer to Expedia, Inc. and its subsidiaries collectively as “Expedia,” the “Company,” “us,” “we” and “our” in these consolidated financial statements.

Basis of Presentation

These accompanying financial statements present our results of operations, financial position and cash flows on a consolidated basis. The unaudited consolidated financial statements include Expedia, Inc., our wholly-owned subsidiaries, and entities we control, or in which we have a variable interest and are the primary beneficiary of expected cash profits or losses. We have eliminated significant intercompany transactions and accounts.

We have prepared the accompanying unaudited consolidated financial statements in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial reporting. We have included all adjustments necessary for a fair presentation of the results of the interim period. These adjustments consist of normal recurring items. Our interim unaudited consolidated financial statements are not necessarily indicative of results that may be expected for any other interim period or for the full year. These interim unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2016, previously filed with the Securities and Exchange Commission. Upon closing of its initial public offering on December 16, 2016, trivago became a separately listed company on the Nasdaq Global Select Market and, therefore is subject to its own reporting and filing requirements, which could result in possible differences that are not expected to be material to Expedia, Inc.

Accounting Estimates

We use estimates and assumptions in the preparation of our interim unaudited consolidated financial statements in accordance with GAAP. Our estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of our interim unaudited consolidated financial statements. These estimates and assumptions also affect the reported amount of net income or loss during any period. Our actual financial results could differ significantly from these estimates. The significant estimates underlying our interim unaudited consolidated financial statements include revenue recognition; recoverability of current and long-lived assets, intangible assets and goodwill; income and transactional taxes, such as potential settlements related to occupancy and excise taxes; loss contingencies; loyalty program liabilities; acquisition purchase price allocations; stock-based compensation and accounting for derivative instruments.

Reclassifications

We have reclassified certain amounts related to our prior period results to conform to our current period presentation.

Seasonality

We generally experience seasonal fluctuations in the demand for our travel products and services. For example, traditional leisure travel bookings are generally the highest in the first three quarters as travelers plan and book their spring, summer and winter holiday travel. The number of bookings typically decreases in the fourth quarter. Because revenue for most of our travel products, including merchant and agency hotel, is recognized when the travel takes place rather than when it is booked, revenue typically lags bookings by several weeks or longer. The seasonal revenue impact is exacerbated with respect to income by the nature of our variable cost of revenue and direct sales and marketing costs, which we typically realize in closer alignment to booking volumes, and the more stable nature of our fixed costs. Furthermore, operating profits for our primary advertising business, trivago, have typically been

experienced in the second half of the year, particularly the fourth quarter, as selling and marketing costs offset revenue in the first half of the year as we aggressively market during the busy booking period

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

for spring, summer and winter holiday travel. As a result on a consolidated basis, revenue and income are typically the lowest in the first quarter and highest in the third quarter. The continued growth of our international operations, advertising business or a change in our product mix, including the assimilation and growth of HomeAway, may influence the typical trend of the seasonality in the future. We expect that as HomeAway continues its shift to more of a transaction-based business model for vacation rental listings its seasonal trends may be somewhat more pronounced than our other traditional leisure businesses.

Note 2 – Summary of Significant Accounting Policies

Recent Accounting Policies Not Yet Adopted

In May 2014, the Financial Accounting Standard's Board ("FASB") issued an Accounting Standards Update ("ASU") amending revenue recognition guidance and requiring more detailed disclosures to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. In August 2015, the FASB issued an ASU deferring the effective date of the revenue standard so it would be effective for annual and interim reporting periods beginning after December 15, 2017, with early adoption prohibited before December 15, 2016. In addition, the FASB has also issued several amendments to the standard which clarify certain aspects of the guidance, including principal versus agent considerations and identifying performance obligations.

The guidance permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective). We currently anticipate adopting the new guidance effective January 1, 2018 using the modified retrospective method, however, this decision is not final and is subject to the completion of our analysis of the guidance.

While we are evaluating the full impact of the new standard on our consolidated financial statements, we have determined the new guidance will not change our previous conclusions on net presentation. We have also determined that the standard will impact our loyalty program accounting as we will no longer be allowed to use the incremental cost method when recording the financial impact of rewards earned in conjunction with our traveler loyalty programs. Instead, we will be required to re-value our liability using a relative fair value approach, which is anticipated to result in a cumulative-effect adjustment to opening retained earnings, with an insignificant change to revenue on a go-forward basis. In addition to the changes in our loyalty program accounting, the new guidance will likely result in insignificant changes in the timing and classification of certain other revenue streams.

Through the date of adoption, we will continue to update our assessment of the effect that the new revenue guidance will have on our consolidated financial statements, and will disclose further material effects, if any, when known. In January 2016, the FASB issued new guidance related to accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. In addition, the FASB clarified guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The new standard is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. We do not expect the adoption of this new guidance to have a material impact on our consolidated financial statements.

In February 2016, the FASB issued new guidance related to accounting and reporting guidelines for leasing arrangements. The new guidance requires entities that lease assets to recognize assets and liabilities on the balance sheet related to the rights and obligations created by those leases regardless of whether they are classified as finance or operating leases. Consistent with current guidance, the recognition, measurement, and presentation of expenses and cash flows arising from a lease primarily will depend on its classification as a finance or operating lease. The guidance also requires new disclosures to help financial statement users better understand the amount, timing and uncertainty of cash flows arising from leases. This guidance is effective for annual and interim reporting periods beginning after December 15, 2018. Early adoption is permitted and should be applied using a modified retrospective approach. We are in the process of evaluating the impact of adopting this new guidance on our consolidated financial statements.

In June 2016, the FASB issued new guidance on the measurement of credit losses for financial assets measured at amortized cost, which includes accounts receivable, and available-for-sale debt securities. The new guidance replaces the existing incurred loss impairment model with an expected loss methodology, which will result in more timely recognition of credit losses. This update is effective for annual periods beginning after December 15, 2019, including interim periods within those annual periods. Early adoption is permitted for annual periods beginning after December 15, 2018, including interim periods within those annual periods. We are in the process of evaluating the impact of adopting this new guidance on our consolidated financial statements.

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

In August and November 2016, the FASB issued new guidance related to the statement of cash flows which clarifies how companies present and classify certain cash receipts and cash payments as well as amends current guidance to address the classification and presentation of changes in restricted cash in the statement of cash flows. The new guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017 with early adoption permitted. We are in the process of evaluating the impact of adopting this new guidance on our consolidated financial statements.

In October 2016, the FASB issued new guidance amending the accounting for income taxes associated with intra-entity transfers of assets other than inventory. This accounting update, which is part of the FASB's simplification initiative, is intended to reduce diversity in practice and the complexity of tax accounting, particularly for those transfers involving intellectual property. This new guidance requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The new standard is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017 with early adoption permitted. We are in the process of evaluating the impact of adopting this new guidance on our consolidated financial statements.

In January 2017, the FASB issued new guidance clarifying the definition of a business for determining whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The new standard is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017 with early adoption permitted for transactions that occurred before the issuance date or effective date of the standard if the transactions were not reported in financial statements that have been issued or made available for issuance. The standard must be applied prospectively. Upon adoption, the standard will impact how we assess acquisitions (or disposals) of assets or businesses.

In January 2017, the FASB issued new guidance simplifying subsequent goodwill measurement by eliminating Step 2 from the goodwill impairment test. Under this update, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The new standard is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2019 with early adoption permitted for annual goodwill impairment tests performed after January 1, 2017. The standard must be applied prospectively. Upon adoption, the standard will impact how we assess goodwill for impairment. We are currently considering our timing of adoption.

Note 3 – Acquisitions and Other Investments

On June 23, 2017, we completed our acquisition of a majority stake in a leading rail technology distributor for total consideration of \$148 million, which included cash paid of \$138 million. The acquisition enables us to play a more active role in bringing rail supply online, while working closely with rail carriers. As a result of the acquisition, we acquired net assets of \$15 million, including redeemable non-controlling interest of \$8 million, as well as recorded \$100 million of goodwill, \$47 million of intangible assets with definite lives with a weighted average amortization of 5.7 years and a deferred tax liability of \$14 million. The redeemable non-controlling interest was recorded in other long-term liabilities in our consolidated balance sheet. The goodwill recorded is not expected to be deductible for tax purposes. The purchase price allocation was based on a preliminary valuation of the assets acquired and liabilities assumed and is subject to revision. The results of operations were immaterial from the transaction close date through June 30, 2017. Pro forma results have not been presented as such pro forma financial information would not be materially different from historical results.

Subsequent Event

On July 27, 2017, we announced that Expedia and Traveloka Holding Limited ("Traveloka"), a Southeast Asian online travel company, have expanded our partnership to include deeper cooperation on hotel supply and that we made a \$350 million cost investment in Traveloka.

Derivatives:

Foreign currency forward contracts \$2,532 \$— \$2,532

Financial assets measured at fair value on a recurring basis as of December 31, 2016 are classified using the fair value hierarchy in the table below:

	Total	Level 1	Level 2
	(In thousands)		
Assets			
Cash equivalents:			
Money market funds	\$ 113,955	\$ 113,955	\$—
Time deposits	299,585	—	299,585
Investments:			
Time deposits	24,576	—	24,576
Corporate debt securities	64,227	—	64,227
Total assets	\$502,343	\$ 113,955	\$388,388

Liabilities

Derivatives:

Foreign currency forward contracts \$4,402 \$— \$4,402

We classify our cash equivalents and investments within Level 1 and Level 2 as we value our cash equivalents and investments using quoted market prices or alternative pricing sources and models utilizing market observable inputs. Valuation of the foreign currency forward contracts is based on foreign currency exchange rates in active markets, a Level 2 input.

As of June 30, 2017 and December 31, 2016, our cash and cash equivalents consisted primarily of prime institutional money market funds with maturities of three months or less, time deposits as well as bank account balances.

We invest in investment grade corporate debt securities, all of which are classified as available for sale. As of June 30, 2017, we had \$49 million of short-term and \$7 million of long-term available for sale investments and the amortized cost basis of the investments approximated their fair value with gross unrealized gains and gross unrealized losses both of less than \$1 million. As of December 31, 2016, we had \$48 million of short-term and \$16 million of long-term available for sale investments and the amortized cost basis of the investments approximated their fair value with both

gross unrealized gains and gross unrealized losses of less than \$1 million.

We also hold time deposit investments with financial institutions. Time deposits with original maturities of less than three months are classified as cash equivalents and those with remaining maturities of less than one year are classified within short-term investments. Additionally, we have time deposits classified as restricted cash for certain traveler deposits.

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

Derivative instruments are carried at fair value on our consolidated balance sheets. We use foreign currency forward contracts to economically hedge certain merchant revenue exposures, foreign denominated liabilities related to certain of our loyalty programs and our other foreign currency-denominated operating liabilities. Our goal in managing our foreign exchange risk is to reduce, to the extent practicable, our potential exposure to the changes that exchange rates might have on our earnings, cash flows and financial position. Our foreign currency forward contracts are typically short-term and, as they do not qualify for hedge accounting treatment, we classify the changes in their fair value in other, net. As of June 30, 2017, we were party to outstanding forward contracts hedging our liability and revenue exposures with a total net notional value of \$2.4 billion. We had a net forward liability of \$3 million and \$4 million recorded in accrued expenses and other current liabilities as of June 30, 2017 and December 31, 2016. We recorded \$14 million and \$(20) million in net gains (losses) from foreign currency forward contracts during the three months ended June 30, 2017 and 2016 as well as \$9 million and \$(48) million in net gains (losses) during the six months ended June 30, 2017 and 2016.

Assets Measured at Fair Value on a Non-recurring Basis

Our non-financial assets, such as goodwill, intangible assets and property and equipment, as well as equity and cost method investments, are adjusted to fair value only when an impairment charge is recognized. Such fair value measurements are based predominately on Level 3 inputs.

Cost Method Investments. As of both June 30, 2017 and December 31, 2016, the carrying values of our investments accounted for under the cost method totaled \$323 million. We periodically evaluate the recoverability of each investment and record a write-down to fair value if a decline in value is determined to be other-than-temporary. During the three and six months ended June 30, 2017, we recorded a \$5 million and \$6 million other-than-temporary impairment related to cost method investments. The remaining fair value of the impaired investments was approximately \$10 million as of June 30, 2017. During the six months ended June 30, 2016, we recorded a \$7 million other-than-temporary impairment related to a cost method investment.

Note 5 – Debt

The following table sets forth our outstanding debt:

	June 30, 2017	December 31, 2016
	(In thousands)	
7.456% senior notes due 2018	\$500,000	\$ 500,000
5.95% senior notes due 2020	747,424	747,020
2.5% (€650 million) senior notes due 2022	737,880	677,503
4.5% senior notes due 2024	494,814	494,472
5.0% senior notes due 2026	740,828	740,341
Long-term debt ⁽¹⁾	\$3,220,946	\$ 3,159,336

(1) Net of applicable discounts and debt issuance costs.

Long-term Debt

Our \$500 million in registered senior unsecured notes outstanding at June 30, 2017 are due in August 2018 and bear interest at 7.456% (the “7.456% Notes”). Interest is payable semi-annually in February and August of each year. At any time Expedia may redeem the 7.456% Notes at a redemption price of 100% of the principal plus accrued interest, plus a “make-whole” premium, in whole or in part.

Our \$750 million in registered senior unsecured notes outstanding at June 30, 2017 are due in August 2020 and bear interest at 5.95% (the “5.95% Notes”). The 5.95% Notes were issued at 99.893% of par resulting in a discount, which is being amortized over their life. Interest is payable semi-annually in February and August of each year. We may redeem the 5.95% Notes at a redemption price of 100% of the principal plus accrued interest, plus a “make-whole” premium, in whole or in part.

Our Euro 650 million in registered senior unsecured notes outstanding at June 30, 2017 are due in June 2022 and bear interest at 2.5% (the “2.5% Notes”). The 2.5% Notes were issued at 99.525% of par resulting in a discount, which is being amortized over their life. Interest is payable annually in arrears in June of each year. We may redeem the 2.5% Notes at our option, at whole or in part, at any time or from time to time. If we elect to redeem the 2.5% Notes prior to March 3, 2022, we may redeem them at a specified “make-whole” premium. If we elect to redeem the 2.5% Notes on or after March 3, 2022, we

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

may redeem them at a redemption price of 100% of the principal plus accrued and unpaid interest. Subject to certain limited exceptions, all payments of interest and principal for the 2.5% Notes will be made in Euros.

The aggregate principal value of the 2.5% Notes is designated as a hedge of our net investment in certain Euro functional currency subsidiaries. The notes are measured at Euro to U.S. Dollar exchange rates at each balance sheet date and transaction gains or losses due to changes in rates are recorded in accumulated other comprehensive income (loss) (“OCI”). The Euro-denominated net assets of these subsidiaries are translated into U.S. Dollars at each balance sheet date, with effects of foreign currency changes also reported in accumulated OCI. Since the notional amount of the recorded Euro-denominated debt is less than the notional amount of our net investment, we do not expect to incur any ineffectiveness on this hedge.

Our \$500 million in registered senior unsecured notes outstanding at June 30, 2017 are due in August 2024 and bear interest at 4.5% (the “4.5% Notes”). The 4.5% Notes were issued at 99.444% of par resulting in a discount, which is being amortized over their life. Interest is payable semi-annually in February and August of each year. We may redeem the 4.5% Notes at our option at any time in whole or from time to time in part. If we elect to redeem the 4.5% Notes prior to May 15, 2024, we may redeem them at a redemption price of 100% of the principal plus accrued interest, plus a “make-whole” premium. If we elect to redeem the 4.5% Notes on or after May 15, 2024, we may redeem them at a redemption price of 100% of the principal plus accrued interest.

Our \$750 million in registered senior unsecured notes outstanding at June 30, 2017 are due in February 2026 and bear interest at 5.0% (the “5.0% Notes”). The 5.0% Notes were issued at 99.535% of par resulting in a discount, which is being amortized over their life. Interest is payable semi-annually in arrears in February and August of each year. We may redeem the 5.0% Notes at our option at any time in whole or from time to time in part. If we elect to redeem the 5.0% Notes prior to November 12, 2025, we may redeem them at a redemption price of 100% of the principal plus accrued interest, plus a “make-whole” premium. If we elect to redeem the 5.0% Notes on or after November 12, 2025, we may redeem them at a redemption price of 100% of the principal plus accrued interest.

The 7.456%, 5.95%, 4.5%, 2.5% and 5.0% Notes (collectively the “Notes”) are senior unsecured obligations issued by Expedia and guaranteed by certain domestic Expedia subsidiaries. The Notes rank equally in right of payment with all of our existing and future unsecured and unsubordinated obligations of Expedia and the guarantor subsidiaries. For further information, see Note 12 – Guarantor and Non-Guarantor Supplemental Financial Information. In addition, the Notes include covenants that limit our ability to (i) create certain liens, (ii) enter into sale/leaseback transactions and (iii) merge or consolidate with or into another entity or transfer substantially all of our assets. Accrued interest related to the Notes was \$55 million and \$63 million as of June 30, 2017 and December 31, 2016. The 5.95%, 4.5%, 2.5% and 5.0% Notes are redeemable in whole or in part, at the option of the holders thereof, upon the occurrence of certain change of control triggering events at a purchase price in cash equal to 101% of the principal plus accrued and unpaid interest.

The following table sets forth the approximate fair value of our outstanding debt, which is based on quoted market prices in less active markets (Level 2 inputs):

	June 30, 2017	December 31, 2016
	(In thousands)	
7.456% senior notes due 2018	\$530,000	\$ 541,000
5.95% senior notes due 2020	823,000	823,000
2.5% (€650 million) senior notes due 2022 ⁽¹⁾	788,000	718,000
4.5% senior notes due 2024	527,000	511,000
5.0% senior notes due 2026	821,000	782,000

(1) Approximately 689 million Euro as of June 30, 2017 and 682 million Euro as of December 31, 2016.

Credit Facility

Expedia, Inc. maintains a \$1.5 billion unsecured revolving credit facility with a group of lenders, which is unconditionally guaranteed by certain domestic Expedia subsidiaries that are the same as under the Notes and expires in February 2021. As of June 30, 2017 and December 31, 2016, we had no revolving credit facility borrowings outstanding. The facility bears interest based on the Company's credit ratings, with drawn amounts bearing interest at LIBOR plus 137.5 basis points and the commitment fee on undrawn amounts at 17.5 basis points as of June 30, 2017. The facility contains covenants including maximum leverage and minimum interest coverage ratios. The amount of stand-by letters of credit ("LOC") issued under the facility reduces the credit amount available. As June 30, 2017 and December 31, 2016, there were \$15 million and \$19 million of outstanding stand-by LOCs issued under the facility.

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

In addition, one of our international subsidiaries maintains a Euro 50 million uncommitted credit facility, which is guaranteed by Expedia, Inc., that may be terminated at any time by the lender. As of June 30, 2017 and December 31, 2016, there were no borrowings outstanding.

Note 6 – Stockholders' Equity

Dividends on our Common Stock

The Executive Committee, acting on behalf of the Board of Directors, declared the following dividends during the periods presented:

Declaration Date	Dividend Per Share	Record Date	Total Amount (in thousands)	Payment Date
Six Months Ended June 30, 2017				
February 7, 2017	\$ 0.28	March 9, 2017	\$ 42,247	March 30, 2017
April 26, 2017	0.28	May 25, 2017	42,438	June 15, 2017
Six Months Ended June 30, 2016				
February 8, 2016	0.24	March 10, 2016	36,174	March 30, 2016
April 26, 2016	0.24	May 26, 2016	35,773	June 16, 2016

In addition, in July 2017, the Executive Committee, acting on behalf of the Board of Directors, declared a quarterly cash dividend of \$0.30 per share of outstanding common stock payable on September 14, 2017 to stockholders of record as of the close of business on August 24, 2017. Future declarations of dividends are subject to final determination by our Board of Directors.

Share Repurchases

In February 2015, the Executive Committee, acting on behalf of the Board of Directors, authorized a repurchase of up to 10 million shares of our common stock. There is no fixed termination date for the repurchases. During the six months ended June 30, 2017, we repurchased, through open market transactions, 0.8 million shares under this authorization for the total cost of \$102 million, excluding transaction costs, representing an average repurchase price of \$130.95 per share. As of June 30, 2017, 6.5 million shares remain authorized for repurchase under the 2015 authorization. Subsequent to June 30, 2017, we repurchased an additional 0.2 million shares for a total cost of \$33 million, excluding transaction costs, representing an average price of \$150.37 per share.

Accumulated Other Comprehensive Income (Loss)

The balance for each class of accumulated other comprehensive loss as of June 30, 2017 and December 31, 2016 is as follows:

	June 30, 2017	December 31, 2016
	(In thousands)	
Foreign currency translation adjustments, net of tax ⁽¹⁾	\$(188,364)	\$(280,426)
Net unrealized gain (loss) on available for sale securities, net of tax	24	27
Accumulated other comprehensive loss	\$(188,340)	\$(280,399)

Foreign currency translation adjustments, net of tax, include foreign currency transaction losses at June 30, 2017 of \$(22) million (\$35) million before tax) and gains at December 31, 2016 of \$16 million (\$25 million before tax) associated with our 2.5% Notes. The 2.5% Notes are Euro-denominated debt designated as hedges of certain of our Euro-denominated net assets. See Note 5 – Debt for more information. The remaining balance in currency translation adjustments excludes income taxes as a result of our current intention to indefinitely reinvest the earnings of our international subsidiaries outside of the United States.

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

Note 7 – Earnings Per Share

The following table presents our basic and diluted earnings per share:

	Three months ended June 30,		Six months ended June 30,	
	2017	2016	2017	2016
(In thousands, except per share data)				
Net income (loss) attributable to Expedia, Inc.	\$56,689	\$31,649	\$(29,433)	\$(76,940)
Earnings (loss) per share attributable to Expedia, Inc. available to common stockholders:				
Basic	\$0.37	\$0.21	\$(0.19)	\$(0.51)
Diluted	0.36	0.21	(0.19)	(0.51)
Weighted average number of shares outstanding:				
Basic	151,582	149,552	151,060	150,332
Dilutive effect of:				
Options to purchase common stock	4,845	3,753	—	—
Other dilutive securities	606	227	—	—
Diluted	157,033	153,532	151,060	150,332

Basic earnings per share is calculated using our weighted-average outstanding common shares. The earnings per share amounts are the same for common stock and Class B common stock because the holders of each class are legally entitled to equal per share distributions whether through dividends or in liquidation.

Diluted earnings per share is calculated using our weighted-average outstanding common shares including the dilutive effect of stock awards as determined under the treasury stock method. In periods when we recognize a net loss, we exclude the impact of outstanding stock awards from the diluted loss per share calculation as their inclusion would have an antidilutive effect. For the three and six months ended June 30, 2017, approximately 4 million and 21 million of outstanding stock awards were excluded from the calculations of diluted earnings per share attributable to common stockholders because their effect would have been antidilutive. For the three and six months ended June 30, 2016, approximately 12 million and 22 million of outstanding stock awards have been excluded from the calculations of diluted earnings (loss) per share attributable to common stockholders because their effect would have been antidilutive.

Note 8 – Restructuring and Related Reorganization Charges

In connection with activities to centralize and optimize certain operations as well as migrate technology platforms in the prior year, primarily related to previously disclosed acquisitions, we recognized \$12 million and \$40 million in restructuring and related reorganization charges during the six months ended June 30, 2017 and 2016. Based on current plans, which are subject to change, we expect to incur approximately \$10 million during the remainder of 2017 related to these integrations and estimates do not include any possible future acquisition integrations. Accrued restructure liabilities were \$17 million and \$18 million as of June 30, 2017 and December 31, 2016.

Note 9 – Income Taxes

We determine our provision for income taxes for interim periods using an estimate of our annual effective tax rate. We record any changes affecting the estimated annual tax rate in the interim period in which the change occurs, including discrete tax items.

For the three months ended June 30, 2017, we recorded a 5.3% tax rate expense on pre-tax income, which was driven by discrete income tax items specifically the recognition of excess tax benefits related to share-based payments. The effective tax rate for the three months ended June 30, 2016 was a 149.3% tax rate benefit measured against a pre-tax loss, and was driven by discrete income tax items including the recognition of excess tax benefits related to share-based payments resulting from the adoption of new accounting guidance for share-based payments as of January

1, 2016.

For the six months ended June 30, 2017, we recorded a 58.6% tax rate benefit on pre-tax loss, which was driven by discrete income tax items specifically the recognition of excess tax benefits related to share-based payments. The effective tax rate for the six months ended June 30, 2016 was a 42.4% tax rate benefit measured against a pre-tax loss, and was due to discrete income tax items including release of a valuation allowance for net operating losses in the first quarter of 2016, as well

13

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

as recognition of excess tax benefits related to share-based payments resulting from the adoption of new accounting guidance for share-based payments as of January 1, 2016.

We are subject to taxation in the United States and various other state and foreign jurisdictions. We are under examination by the Internal Revenue Service ("IRS") for our 2009 through 2013 tax years. Our 2014 and subsequent years remain open to examination by the IRS. We do not anticipate a significant impact to our gross unrecognized tax benefits within the next 12 months related to these years. During first quarter of 2017, the IRS issued proposed adjustments relating to transfer pricing with our foreign subsidiaries for our 2009 to 2010 audit cycle. The proposed adjustments would increase our U.S. taxable income by \$105 million, which would result in federal tax expense of approximately \$37 million, subject to interest. We do not agree with the position of the IRS and will formally protest the IRS position.

Note 10 – Commitments and Contingencies

Legal Proceedings

In the ordinary course of business, we are a party to various lawsuits. Management does not expect these lawsuits to have a material impact on the liquidity, results of operations, or financial condition of Expedia. We also evaluate other potential contingent matters, including value-added tax, excise tax, sales tax, transient occupancy or accommodation tax and similar matters. We do not believe that the aggregate amount of liability that could be reasonably possible with respect to these matters would have a material adverse effect on our financial results; however, litigation is inherently uncertain and the actual losses incurred in the event that our legal proceedings were to result in unfavorable outcomes could have a material adverse effect on our business and financial performance.

Litigation Relating to Occupancy Taxes. Ninety-five lawsuits have been filed by or against cities, counties and states involving hotel occupancy and other taxes. Seventeen are currently active. These lawsuits are in various stages and we continue to defend against the claims made in them vigorously. With respect to the principal claims in these matters, we believe that the statutes or ordinances at issue do not apply to the services we provide and, therefore, that we do not owe the taxes that are claimed to be owed. We believe that the statutes or ordinances at issue generally impose occupancy and other taxes on entities that own, operate or control hotels (or similar businesses) or furnish or provide hotel rooms or similar accommodations. To date, forty-one of these lawsuits have been dismissed. Some of these dismissals have been without prejudice and, generally, allow the governmental entity or entities to seek administrative remedies prior to pursuing further litigation. Twenty-seven dismissals were based on a finding that we and the other defendants were not subject to the local hotel occupancy tax ordinance or that the local government lacked standing to pursue their claims. As a result of this litigation and other attempts by certain jurisdictions to levy such taxes, we have established a reserve for the potential settlement of issues related to hotel occupancy taxes, consistent with applicable accounting principles and in light of all current facts and circumstances, in the amount of \$57 million and \$71 million as of June 30, 2017 and December 31, 2016. Our settlement reserve is based on our best estimate of probable losses and the ultimate resolution of these contingencies may be greater or less than the liabilities recorded. An estimate for a reasonably possible loss or range of loss in excess of the amount reserved cannot be made. Changes to the settlement reserve are included within legal reserves, occupancy tax and other in the consolidated statements of operations.

In addition, we have been audited by the state of Colorado. The state has issued assessments for claimed tax, interest and penalty in the approximate amount of \$23 million for the periods December 1, 1999 through December 31, 2011. We do not agree with these assessments and have filed protests.

Pay-to-Play. Certain jurisdictions may assert that we are required to pay any assessed taxes prior to being allowed to contest or litigate the applicability of the ordinances. This prepayment of contested taxes is referred to as "pay-to-play." Payment of these amounts is not an admission that we believe we are subject to such taxes and, even when such payments are made, we continue to defend our position vigorously. If we prevail in the litigation, for which a pay-to-play payment was made, the jurisdiction collecting the payment will be required to repay such amounts and also may be required to pay interest.

Hawaii (General Excise Tax). During 2013, the Expedia companies were required to “pay-to-play” and paid a total of \$171 million in advance of litigation relating to general excise taxes for merchant model hotel reservations in the State of Hawaii. In September 2015, following a ruling by the Hawaii Supreme Court, the State of Hawaii refunded the Expedia companies \$132 million of the original “pay-to-play” amount. Orbitz also received a similar refund of \$22 million from the State of Hawaii in September 2015. The amount paid, net of refunds, by the Expedia companies and Orbitz to the State of Hawaii in satisfaction of past general excise taxes on their services for merchant model hotel reservations was \$44 million. The parties reached a settlement relating to Orbitz merchant model hotel tax liabilities, and on October 5, 2016, the Expedia companies paid the State of Hawaii for the tax years 2012 through 2015. The Expedia companies and Orbitz have now resolved all assessments by the State of Hawaii for merchant model hotel taxes through 2015.

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

The Department of Taxation also issued final assessments for general excise taxes against the Expedia companies, including Orbitz, dated December 23, 2015 for the time period 2000 to 2014 for hotel and car rental revenue for “agency model” transactions. Those assessments are currently under review in the Hawaii tax courts.

Final assessments by the Hawaii Department of Taxation for general exercise taxes against the Expedia companies, including Orbitz, relating to merchant car rental transactions during the years 2000 to 2014 are also under review in the Hawaii tax courts. With respect to merchant model car rental transactions at issue for the tax years 2000 through 2013, the Hawaii tax court held on August 5, 2016 that general excise tax is due on the online travel companies’ services to facilitate car rentals. The court further ruled that for merchant model car rentals in Hawaii, the online travel companies are required to pay general excise tax on the total amount paid by consumers, with no credit for tax amounts already remitted by car rental companies to the State of Hawaii for tax years 2000 through 2013, thus resulting in a double tax on the amount paid by consumers to car rental companies for the rental of the vehicle. The court, however, ruled that when car rentals are paid for as part of a vacation package, tax is only due once on the amount paid by consumers to the car rental company for the rental of the vehicle. In addition, the court ruled that the online travel companies are required to pay interest and certain penalties on the amounts due. On April 25, 2017, the court entered a final judgment. On May 15, 2017, the Expedia companies paid under protest the full amount claimed due, or approximately \$16.7 million, as a condition of appeal. The parties have filed notices of cross-appeal. The Hawaii tax court’s decision did not resolve “merchant model” car rental transactions for the tax year 2014, which also remain under review.

San Francisco (Occupancy Tax). During 2009, Expedia companies were required to “pay-to-play” and paid \$48 million in advance of litigation relating to occupancy tax proceedings with the city of San Francisco and, in May 2014, the Expedia companies paid an additional \$25.5 million under protest in order to contest additional assessments for later time periods. In addition, Orbitz in total has paid \$4.6 million to the city of San Francisco to contest similar assessments issued against it by the city. On August 6, 2014, the California Court of Appeals stayed this case pending review and decision by the California Supreme Court of the City of San Diego, California Litigation. The California Court of Appeals has lifted the stay for this case and the appeal will proceed in light of the California Supreme Court’s decision in the San Diego litigation.

Other Jurisdictions. We are also in various stages of inquiry or audit with domestic and foreign tax authorities, some of which, including in the United Kingdom regarding the application of value added tax (“VAT”) to our European Union related transactions as discussed below, impose a pay-to-play requirement to challenge an adverse inquiry or audit result in court.

The ultimate resolution of these contingencies may be greater or less than the pay-to-play payments made and our estimates of additional assessments mentioned above.

Matters Relating to International VAT. We are in various stages of inquiry or audit in multiple European Union jurisdictions, including in the United Kingdom, regarding the application of VAT to our European Union related transactions. While we believe we comply with applicable VAT laws, rules and regulations in the relevant jurisdictions, the tax authorities may determine that we owe additional taxes. In certain jurisdictions, including the United Kingdom, we may be required to “pay-to-play” any VAT assessment prior to contesting its validity. While we believe that we will be successful based on the merits of our positions with regard to the United Kingdom and other VAT audits in pay-to-play jurisdictions, it is nevertheless reasonably possible that we could be required to pay any assessed amounts in order to contest or litigate the applicability of any assessments and an estimate for a reasonably possible amount of any such payments cannot be made.

Matters Relating to Competition Reviews and Legislation Relating to Parity Clauses. Over the last several years, the online travel industry has become the subject of investigations by various national competition authorities (“NCAs”), particularly in Europe. Expedia is or has been involved in investigations predominately related to whether certain parity clauses in contracts between Expedia entities and accommodation providers, sometimes also referred to as “most favored nation” or “MFN” provisions, are anti-competitive.

In Europe, investigations or inquiries into contractual parity provisions between hotels and online travel companies, including Expedia, were initiated in 2012, 2013 and 2014 by NCAs in Austria, Belgium, Czech Republic, Denmark, France, Germany, Greece, Hungary, Ireland, Italy, Poland, Sweden and Switzerland. While the ultimate outcome of some of these investigations or inquiries remains uncertain, and Expedia's circumstances are distinguishable from other online travel companies subject to similar investigations and inquiries, we note in this context that on April 21, 2015, the French, Italian and Swedish NCAs, working in close cooperation with the European Commission, announced that they had accepted formal commitments offered by Booking.com to resolve and close the investigations against Booking.com in France, Italy and Sweden by Booking.com removing and/or modifying certain rate, conditions and availability parity provisions in its contracts with accommodation providers in France, Italy and Sweden as of July 1, 2015, among other commitments. Booking.com voluntarily extended the geographic scope of these commitments to accommodation providers throughout Europe as of the same date.

With effect from August 1, 2015, Expedia waived certain rate, conditions and availability parity clauses in its agreements with its European hotel partners for a period of five years. While Expedia maintains that its parity clauses have always been

Table of Contents

Notes to Consolidated Financial Statements – (Continued)

lawful and in compliance with competition law, these waivers were nevertheless implemented as a positive step towards facilitating the closure of the open investigations into such clauses on a harmonized pan-European basis. Following the implementation of Expedia's waivers, nearly all NCAs in Europe have announced either the closure of their investigation or inquiries involving Expedia or a decision not to open an investigation or inquiry involving Expedia. Below are descriptions of additional rate parity-related matters of note in Europe.

The German Federal Cartel Office ("FCO") has required another online travel company, Hotel Reservation Service ("HRS"), to remove certain clauses from its contracts with hotels. HRS' appeal of this decision was rejected by the Higher Regional Court Düsseldorf on January 9, 2015. On December 23, 2015, the FCO announced that it had also required Booking.com by way of an infringement decision to remove certain clauses from its contracts with German hotels. Booking.com has appealed the decision and the appeal was heard by the Higher Regional Court Düsseldorf on February 8, 2017.

The Italian competition authority's case closure decision against Booking.com and Expedia has subsequently been appealed by two Italian hotel trade associations, i.e. Federalberghi and AICA. These appeals remain at an early stage and no hearing date has been fixed.

On November 6, 2015, the Swiss competition authority announced that it had issued a final decision finding certain parity terms existing in previous versions of agreements between Swiss hotels and each of Expedia, Booking.com and HRS to be prohibited under Swiss law. The decision explicitly notes that Expedia's current contract terms with Swiss hotels are not subject to this prohibition. The Swiss competition authority imposed no fines or other sanctions against Expedia and did not find an abuse of a dominant market position by Expedia. The FCO's case against Expedia's contractual parity provisions with accommodation providers in Germany remains open but is still at a preliminary stage with no formal allegations of wrong-doing having been communicated to Expedia to date.

The Directorate General for Competition, Consumer Affairs and Repression of Fraud (the "DGCCRF"), a directorate of the French Ministry of Economy and Finance with authority over unfair trading practices, brought a lawsuit in France against Expedia entities objecting to certain parity clauses in contracts between Expedia entities and French hotels. In May 2015, the French court ruled that certain of the parity provisions in certain contracts that were the subject of the lawsuit were not in compliance with French commercial law, but imposed no fine and no injunction. The DGCCRF appealed the decision and, on June 21, 2017, the Paris Court of Appeal published a judgment overturning the decision. The court annulled parity clauses contained in the agreements at issue, ordered Expedia to amend its contracts, and imposed a fine. Expedia intends to appeal the decision, however, the appeal will not stay the payment of the fine.

Hotelverband Deutschland ("IHA") e.V. (a German hotel association) brought proceedings before the Cologne regional court against Expedia, Inc., Expedia.com GmbH and Expedia Lodging Partner Services Sàrl. IHA applied for a 'cease and desist' order against these companies in relation to the enforcement of certain rate and availability parity clauses contained in contracts with hotels in Germany. On or around February 16, 2017, the court dismissed IHA's action and declared the claimant liable for the Expedia defendants' statutory costs. IHA has appealed the decision.

A working group of 10 European NCAs (Belgium, Czech Republic, Denmark, France, Hungary, Ireland, Italy, Netherlands, Sweden and the United Kingdom) and the European Commission has been established by the European Competition Network ("ECN") at the end of 2015 to monitor the functioning of the online hotel booking sector, following amendments made by a number of online travel companies (including Booking.com and Expedia) in relation to certain parity provisions in their contracts with hotels. The working group issued questionnaires to online travel agencies including Expedia, metasearch sites and hotels in 2016. The underlying results of the ECN monitoring exercise were published on April 6, 2017.

Legislative bodies in certain countries have also adopted, or are proposing to adopt, new domestic anti-parity clause legislation. On July 9, 2015, the French National Assembly adopted Article 133 of the Loi Macron ("Article 133") that seeks to define the nature of the relationship between online reservation platforms and French hotels. Article 133 became effective on August 8, 2015. Expedia considers that Article 133 was drafted ambiguously and can be interpreted in a way that violates both EU and French legal principles. Therefore Expedia has submitted a complaint to

the European Commission relating to Article 133. However, following the effective date, Expedia has been in contact with its hotel partners in France regarding the impact of Article 133. Legislation banning certain parity provisions in contracts between online travel companies and Austrian accommodation providers became effective on December 31, 2016. Expedia believes this legislation violates both EU and Austrian legal principles and therefore, Expedia has submitted a complaint to the European Commission relating to this legislation.

A legislative proposal to prohibit narrow price parity clauses in hotel-OTA agreements in Italy is still pending in the Italian parliament and a motion requesting the Swiss government to take action on narrow price parity is currently under discussion in the Swiss parliament. The Company is unable to predict whether these proposals in their current form or in another form will ultimately be adopted and, if so, when this might be the case. It is not yet clear how any adopted domestic anti-parity clause legislations and/or any possible future legislation in this area may affect Expedia's business.

Notes to Consolidated Financial Statements – (Continued)

Outside of Europe, a number of NCAs have also opened investigations or inquired about contractual parity provisions in contracts between hotels and online travel companies in their respective territories, including Expedia. A Brazilian hotel sector association -- Forum de Operadores Hoteleiros do Brasil -- filed a complaint with the Brazilian Administrative Council for Economic Defence (“CADE”) against a number of online travel companies, including Booking.com, Decolar.com and Expedia, on July 27, 2016 with respect to parity provisions in contracts between hotels and online travel companies. On September 13, 2016, Expedia submitted its response to the complaint to CADE. Expedia recently resolved the concerns of the Australia and New Zealand NCAs based on implementation of the waivers substantially similar to those provided to accommodation providers in Europe on September 1, 2016 in Australia and on October 28, 2016 in New Zealand. The Australian NCA, however, recently indicated that it is reopening its investigation. Expedia is in ongoing discussions with a limited number of NCAs in other countries in relation to its contracts with hotels. Expedia is currently unable to predict the impact the implementation of the waivers both in Europe and elsewhere will have on Expedia's business, on investigations or inquiries by NCAs in other countries, or on industry practice more generally.

The Company is unable to predict how any pending appeals of administrative decisions and the remaining open investigations and inquiries by NCAs will ultimately be resolved, or whether further action in Europe will be taken as a result of the ECN's working group's assessment and findings. Possible outcomes include requiring Expedia to amend or remove certain parity clauses from its contracts with accommodation providers in those jurisdictions and/or the imposition of fines.

It is not yet clear how any adopted domestic anti-parity clause legislations and/or any possible future legislation in this area may affect Expedia's business. Competition-related investigations, legislation or issues could also give rise to private litigation. For example, Expedia is involved in private litigation in Germany related to its current contractual parity provisions (see above). We are unable to predict how such litigation will be resolved, or whether it will impact Expedia's business in Germany.

Note 11 – Segment Information

We have four reportable segments: Core Online Travel Agencies (“Core OTA”), trivago, Egencia and HomeAway. Our Core OTA segment, which consists of the aggregation of operating segments, provides a full range of travel and advertising services to our worldwide customers through a variety of brands including: Expedia.com and Hotels.com in the United States and localized Expedia and Hotels.com websites throughout the world, Orbitz, CheapTickets, ebookers, Expedia Affiliate Network, Hotwire.com, Travelocity, Wotif Group, CarRentals.com, Classic Vacations and SilverRail Technologies, Inc. Our trivago segment generates advertising revenue primarily from sending referrals to online travel companies and travel service providers from its hotel metasearch websites. Our Egencia segment provides managed travel services to corporate customers worldwide. Our HomeAway segment operates an online marketplace for the vacation rental industry.

We determined our operating segments based on how our chief operating decision makers manage our business, make operating decisions and evaluate operating performance. Our primary operating metric is adjusted EBITDA. Adjusted EBITDA for our Core OTA and Egencia segments includes allocations of certain expenses, primarily cost of revenue and facilities, and our Core OTA segment includes the total costs of our global supply organizations as well as the realized foreign currency gains or losses related to the forward contracts hedging a component of our net merchant hotel revenue. We base the allocations primarily on transaction volumes and other usage metrics. We do not allocate certain shared expenses such as accounting, human resources, information technology and legal to our reportable segments. We include these expenses in Corporate and Eliminations. Our allocation methodology is periodically evaluated and may change.

Our segment disclosure includes intersegment revenues, which primarily consist of advertising and media services provided by our trivago segment to our Core OTA segment. These intersegment transactions are recorded by each segment at amounts that approximate fair value as if the transactions were between third parties, and therefore, impact segment performance. However, the revenue and corresponding expense are eliminated in consolidation. The

elimination of such intersegment transactions is included within Corporate and Eliminations in the table below. In addition, when HomeAway properties are booked through our Core OTA websites and vice versa, the segments split the third-party revenue for management and segment reporting purposes with the majority of the third-party revenue residing with the website marketing the property or room.

Corporate and Eliminations also includes unallocated corporate functions and expenses. In addition, we record amortization of intangible assets and any related impairment, as well as stock-based compensation expense, restructuring and related reorganization charges, legal reserves, occupancy tax and other, and other items excluded from segment operating performance in Corporate and Eliminations. Such amounts are detailed in our segment reconciliation below.

The following tables present our segment information for the three and six months ended June 30, 2017 and June 30, 2016. As a significant portion of our property and equipment is not allocated to our operating segments and depreciation is not included in our segment measure, we do not report the assets by segment as it would not be meaningful. We do not regularly provide such information to our chief operating decision makers.

Note 12 – Guarantor and Non-Guarantor Supplemental Financial Information

Condensed consolidating financial information of Expedia, Inc. (the “Parent”), our subsidiaries that are guarantors of our debt facility and instruments (the “Guarantor Subsidiaries”), and our subsidiaries that are not guarantors of our debt facility and instruments (the “Non-Guarantor Subsidiaries”) is shown below. The debt facility and instruments are guaranteed by certain of our wholly-owned domestic subsidiaries and rank equally in right of payment with all of our existing and future unsecured and unsubordinated obligations. The guarantees are full, unconditional, and joint and several with the exception of certain customary automatic subsidiary release provisions. In this financial information, the Parent and Guarantor Subsidiaries account for investments in their wholly-owned subsidiaries using the equity method.

Part I. Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect the views of our management regarding current expectations and projections about future events and are based on currently available information. Actual results could differ materially from those contained in these forward-looking statements for a variety of reasons, including, but not limited to, those discussed in our Annual Report on Form 10-K for the year ended December 31, 2016, Part I, Item 1A, “Risk Factors,” as well as those discussed elsewhere in this report. Other unknown or unpredictable factors also could have a material adverse effect on our business, financial condition and results of operations. Accordingly, readers should not place undue reliance on these forward-looking statements. The use of words such as “anticipates,” “estimates,” “expects,” “intends,” “plans” and “believes,” among others, generally identify forward-looking statements; however, these words are not the exclusive means of identifying such statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. These forward-looking statements are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict. We are not under any obligation to, and do not intend to, publicly update or review any of these forward-looking statements, whether as a result of new information, future events or otherwise, even if experience or future events make it clear that any expected results expressed or implied by those forward-looking statements will not be realized. Please carefully review and consider the various disclosures made in this report and in our other reports filed with the Securities and Exchange Commission (“SEC”) that attempt to advise interested parties of the risks and factors that may affect our business, prospects and results of operations.

The information included in this management’s discussion and analysis of financial condition and results of operations should be read in conjunction with our consolidated financial statements and the notes included in this Quarterly Report, and the audited consolidated financial statements and notes and Management’s Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2016.

Overview

Expedia, Inc. is an online travel company, empowering business and leisure travelers with the tools and information they need to efficiently research, plan, book and experience travel. We have created a global travel marketplace used by a broad range of leisure and corporate travelers, offline retail travel agents and travel service providers. We make available, on a stand-alone and package basis, travel products and services provided by numerous airlines, lodging properties, car rental companies, destination service providers, cruise lines, vacation rental property owners and managers, and other travel product and service companies. We also offer travel and non-travel advertisers access to a potential source of incremental traffic and transactions through our various media and advertising offerings on our transaction-based websites.

Our portfolio of brands includes Expedia.com®, Hotels.com®, Expedia® Affiliate Network (“EAN”), trivago®, HomeAway, Egencia®, Orbitz®, Travelocity®, Hotwire.com™, Wotif Group, CheapTickets®, ebookers®, Classic Vacations®, CarRentals.com™, SilverRail Technologies, Inc., Expedia Local Expert™ and Expedia® CruiseShipCenters®. In addition, many of these brands have related international points of sale, including those as part of AirAsia Expedia™. For additional information about our portfolio of brands, see “Portfolio of Brands” in Part I, Item 1, “Business,” in our Annual Report on Form 10-K for the year ended December 31, 2016.

All percentages within this section are calculated on actual, unrounded numbers.

Trends

The travel industry, including offline agencies, online agencies and other suppliers of travel products and services, has historically been characterized by intense competition, as well as rapid and significant change. Generally, 2015 and 2016 represented years of continuing improvement for the travel industry. However, political instability, geopolitical conflicts, acts of terrorism, significant fluctuations in currency values, sovereign debt issues and macroeconomic concerns are examples of events that contribute to a somewhat uncertain environment, which could have a negative impact on the travel industry in the future.

Online Travel

Increased usage and familiarity with the internet have driven rapid growth in online penetration of travel expenditures. According to Phocuswright, an independent travel, tourism and hospitality research firm, in 2016, over 50% of U.S. and European leisure, unmanaged and corporate travel expenditures occurred online. Online penetration rates in the emerging markets, such as Asia Pacific and Latin American regions, are lagging behind that of the United States and Europe, and are

28

Table of Contents

estimated to be in the range of 30% to 40%. These penetration rates have increased over the past few years, and are expected to continue growing, which has attracted many competitors to online travel. This competition intensified in recent years, and the industry is expected to remain highly competitive for the foreseeable future. In addition to the growth of online travel agencies, airlines and lodging companies have aggressively pursued direct online distribution of their products and services. Competitive entrants such as “metasearch” companies, including Kayak.com (owned by The Priceline Group), trivago (in which Expedia owns a majority interest) as well as TripAdvisor, introduced differentiated features, pricing and content compared with the legacy online travel agency companies, as well as various forms of direct or assisted booking tools, the impact of which is currently uncertain. In addition, the increasing popularity of the “sharing economy,” accelerated by online penetration, has had a direct impact on the travel and lodging industry. Players such as Airbnb and HomeAway (which Expedia acquired in December 2015) have emerged as the leaders, bringing incremental alternative accommodation and vacation rental inventory to the market. Many other competitors, including vacation rental metasearch players, continue to emerge in this space, which is estimated to account for approximately \$100 billion of annual travel spend and expected to continue to grow as a percentage of the global accommodation market. Furthermore, we have seen increased interest in the online travel industry from search engine companies as evidenced by recent innovations including direct booking functionality, as well as licensing deals and proposed and actual acquisitions by companies such as Google. Finally, traditional consumer e-commerce and group buying websites have been expanding their local offerings into the travel market by adding hotel offers to their sites.

The online travel industry has also seen the development of alternative business models and variations in the timing of payment by travelers and to suppliers, which in some cases place pressure on historical business models. In particular, the agency hotel model saw rapid adoption in Europe. Expedia has both merchant (Expedia Collect) and agency (Hotel Collect) hotel offerings for our hotel supply partners through both agency only contracts as well as our hybrid Expedia Traveler Preference (“ETP”) program, which offers travelers the choice of whether to pay Expedia at the time of booking or pay the hotel at the time of stay.

Intense competition also historically led to aggressive marketing efforts by the travel suppliers and intermediaries, and a meaningful unfavorable impact on our overall marketing efficiencies and operating margins. We manage our selling and marketing spending on a brand basis at the local or regional level, making decisions in each market that we think are appropriate based on the relative growth opportunity, the expected returns and the competitive environment. In certain cases, particularly in emerging markets, we are pursuing and expect to continue to pursue long-term growth opportunities for which our marketing efficiency is less favorable than that for our consolidated business, but for which we still believe the opportunity to be attractive. The crowded online travel environment is now driving certain secondary and tertiary online travel companies to establish marketing agreements with global players in order to leverage distribution and technology capabilities while focusing resources on capturing consumer mind share. In May 2015, Expedia sold its 62.4% equity stake in eLong for approximately \$671 million to several purchasers including Ctrip.com International, Ltd (“Ctrip”). Expedia and Ctrip also reached agreement on cooperation for certain travel products in specified geographic markets. The transaction closed on May 22, 2015. Unless otherwise noted, all discussion in the “Trends” and “Growth Strategy” sections refers to results for Expedia, Inc. excluding eLong.

Lodging

Lodging includes hotel accommodations as well as alternative accommodations primarily made available through HomeAway. As a percentage of our total worldwide revenue in the first half of 2017, lodging accounted for 66%. Our room night growth has been healthy, with room nights excluding eLong growing 36% in 2015, 32% in 2016, and 17% for the first half of 2017. ADRs for rooms booked on Expedia and HomeAway sites excluding eLong declined 5% in 2015, increased 11% in 2016 due to the acquisition of HomeAway, and increased 2% for the first half of 2017.

Hotel. We generate the majority of our revenue through the facilitation of hotel reservations (stand-alone and package bookings). Although our relationships with our hotel supply partners have remained broadly stable in the past few years, as part of the global rollout of ETP, we reduced negotiated economics in certain instances to compensate for hotel supply partners absorbing expenses such as credit card fees and customer service costs, which has negatively impacted the margin of revenue we earn per booking. In addition, as we continue to expand the breadth and depth of our global hotel offering, in some cases we have reduced and expect to continue to reduce our economics in various

geographies based on local market conditions. These impacts are due to specific initiatives intended to drive greater global size and scale through faster overall room night growth. Additionally, increased promotional activities such as growing loyalty programs contribute to declines in revenue per room night. Lastly, currency exchange rate fluctuations have had a negative effect on unit economics due to unfavorable book-to-stay as well as translation impacts.

Since our hotel supplier agreements are generally negotiated on a percentage basis, any increase or decrease in ADRs has an impact on the revenue we earn per room night. Over the course of the last several years, occupancies and ADRs in the lodging industry have generally increased on a currency-neutral basis in a gradually improving overall travel environment.

Table of Contents

However, U.S. dollar-denominated ADRs declined in 2015, 2016, and the first half of 2017 due to the currency translation impact. Current occupancy rates for hotels in the United States remain at record highs; however, U.S. hotel supply growth has been accelerating, which may put additional pressure on ADRs. In international markets, hotel supply is being added at a faster rate as hotel owners and operators try to take advantage of opportunities in faster growing regions such as China and India, among others. Companies like Airbnb and HomeAway have also added incremental global supply in the alternative accommodations space. In addition, while the global lodging industry remains very fragmented, there has been consolidation in the hotel space among chains as well as ownership groups. In the meantime, certain hotel chains have been focusing on driving direct bookings on their own websites and mobile applications by advertising lower rates than those available on third-party websites as well as incentives such as loyalty points, increased or exclusive product availability and complimentary Wi-Fi. We have had success adding supply to our marketplace with over 435,000 properties on our global websites as of June 30, 2017, including over 60,000 HomeAway vacation rental properties now available on Expedia.com.

Alternative Accommodations. With our acquisition of HomeAway and all of its brands in December 2015, we have expanded into the fast growing \$100 billion alternative accommodations market. HomeAway is a leader in this market and represents an attractive growth opportunity for Expedia. HomeAway has been undergoing a transition from a listings-based classified advertising model to an online transactional model that optimizes for both travelers and homeowner and property manager partners, with a goal of increasing monetization and driving growth through investments in marketing as well as in product and technology. In addition, HomeAway rolled out a traveler service fee in the United States and Europe during the first half of 2016, consistent with market practice. The fee is expected to continue to contribute to HomeAway's revenue growth and help fund marketing investment, programs to better protect travelers and future growth initiatives. Furthermore, HomeAway moved to a single subscription option globally in July 2016. In the first quarter of 2017, HomeAway began integrating Expedia vacation rental properties onto its sites. Combined with HomeAway's existing inventory, there are now nearly 1.5 million online bookable listings available on HomeAway.

Air

Significant airline sector consolidation in the United States in recent years has generally resulted in lower overall capacity and higher fares, which combined with the significant declines in fuel prices led to record levels of profitability for the U.S. air carriers, further strengthening their position. However, in 2015 and 2016 and for the first half of 2017, there has been evidence of discounting by the U.S. carriers while currency headwinds and weaker macroeconomic trends put pressure on international results. Ticket prices on Expedia sites excluding eLong declined 11% in 2015, 6% in 2016, and 1% in the first half of 2017 as short-haul traffic and low cost carriers grew alongside increasingly competitive airline pricing. We continue to encounter pressure on air remuneration as air carriers combine and as certain supply agreements renew.

Air ticket volumes excluding eLong increased 35% in 2015 and 32% in 2016, primarily due to the acquisition of Orbitz, and 5% in the first half of 2017. As a percentage of our total worldwide revenue in the first half of 2017, air accounted for 9%.

Advertising & Media

Our advertising and media business is principally driven by revenue generated by trivago, a leading hotel metasearch site, in addition to Expedia Media Solutions, which is responsible for generating advertising revenue on our global online travel brands. In the first half of 2017, we generated a total of \$559 million of advertising and media revenue representing 12% of our total worldwide revenue, up from \$377 million in the first half of 2016.

Growth Strategy

Product Innovation. Each of our leading brands was a pioneer in online travel and has been responsible for driving key innovations in the space for more than two decades. Each Expedia technology platform is operated by a dedicated technology team, which drives innovations that make researching and shopping for travel increasingly easier and helps customers find and book the best possible travel options. In the past several years, we made key investments in technology, including significant development of our technical platforms that makes it possible for us to deliver innovations at a faster pace. For example, we launched new global platforms for Hotels.com and Brand Expedia, enabling us to significantly increase the innovation cycle, thereby improving conversion and driving faster growth

rates for those brands. In 2013, Expedia signed an agreement to power the technology, supply and customer service platforms for Travelocity-branded sites in the United States and Canada, enabling Expedia to leverage its investments in each of these key areas. The shift of Travelocity-branded sites to the Expedia technology platform was successfully completed over the course of 2014. In November 2014, Expedia completed the acquisition of Wotif Group and subsequently converted the Wotif.com site to the Expedia platform. In January 2015, we acquired the Travelocity brand and other associated assets from Sabre. The strategic marketing and other related agreements previously entered into were terminated. In September 2015, Expedia completed the acquisition of Orbitz Worldwide, including all of its brands. The migration of the Orbitz, CheapTickets and ebookers sites to the Expedia technology platform was completed in the first half of 2016, and Orbitz for Business customers were migrated to the Egencia technology platform as of July 2016. In December 2015,

Table of Contents

Expedia completed the acquisition of HomeAway, Inc., including all of its brands. Additionally, in June 2017, Expedia acquired a majority stake in a leading rail technology distributor. We intend to continue leveraging these investments when launching additional points of sale in new countries, introducing new website features, adding supplier products and services including new business model offerings, as well as proprietary and user-generated content for travelers. In addition, while we aim to drive the top-line growth in our global brands, we are managing our regional brands, such as Travelocity, Orbitz, Wotif, ebookers and CheapTickets, with a greater focus on profitability. Global Expansion. Our Expedia, Hotels.com, Egencia, and EAN brands operate both domestically and through international points of sale, including in Europe, Asia Pacific, Canada and Latin America. In addition, ebookers offers multi-product online travel reservations in Europe and Wotif Group has a leading portfolio of travel brands, including Wotif.com, Wotif.co.nz, lastminute.com.au, lastminute.com.nz and travel.com.au, focused principally on the Australia and New Zealand markets. Egencia, our corporate travel business, operates in over 65 countries around the world and continues to expand. The HomeAway portfolio has over 50 vacation rental sites all around the world. We own a majority share of trivago, a leading hotel metasearch company. Officially launched in 2005, trivago is one of the best known travel brands in Europe and North America. trivago continues to operate independently and rapidly grow revenue through global expansion, including aggressive expansion in new countries. In December 2016, trivago successfully completed its initial public offering and trades on the Nasdaq Global Select Market under the symbol "TRVG." In addition, we have commercial agreements in place with Ctrip and eLong in China, as well as Decolar.com, Inc. in Latin America, among many others. In the first half of 2017, approximately 36% of our worldwide gross bookings and 43% of worldwide revenue were through international points of sale compared to just 21% for both worldwide gross bookings and revenue in 2005. We have a goal of generating more than two-thirds of our revenue through businesses and points of sale outside of the United States.

In expanding our global reach, we leverage significant investments in technology, operations, brand building, supplier relationships and other initiatives that we have made since the launch of Expedia.com in 1996. Our scale of operations enhances the value of technology innovations we introduce on behalf of our travelers and suppliers. We believe that our size and scale afford the company the ability to negotiate competitive rates with our supply partners, provide breadth of choice and travel deals to our traveling customers through an expanding supply portfolio and create opportunities for new value added offers for our customers such as our loyalty programs. The size of Expedia's worldwide traveler base makes our sites an increasingly appealing channel for travel suppliers to reach customers. In addition, the sheer size of our user base and search query volume allows us to test new technologies very quickly in order to determine which innovations are most likely to improve the travel research and booking process, and then roll those features out to our worldwide audience in order to drive improvements in conversion.

New Channel Penetration. Technological innovations and developments continue to create new opportunities for travel bookings made through mobile devices, in addition to more traditional methods like desktop and laptop computers. In the past few years, each of our brands made significant progress creating new mobile websites and mobile applications that are receiving strong reviews and solid download trends, and some of our brands now see more traffic via mobile devices than via traditional PCs. Mobile bookings via smartphones continue to present an opportunity for incremental growth as they are often completed within one or two days of the travel or stay, which is a much shorter booking window than we had historically experienced via more traditional online booking methods. In addition, we are seeing increasing cross-device usage among our customers, who connect to our websites and apps across multiple devices and platforms throughout their travel planning process. We also believe mobile represents an efficient marketing channel given the opportunity for direct traffic acquisition, increase in share of wallet and in repeat customers, particularly through mobile applications. During the first half of 2017, approximately one in three Expedia, Inc. transactions were booked globally on a mobile device.

Seasonality

We generally experience seasonal fluctuations in the demand for our travel products and services. For example, traditional leisure travel bookings are generally the highest in the first three quarters as travelers plan and book their spring, summer and winter holiday travel. The number of bookings typically decreases in the fourth quarter. Because revenue for most of our travel products, including merchant and agency hotel, is recognized when the travel takes place rather than when it is booked, revenue typically lags bookings by several weeks or longer. The seasonal revenue

impact is exacerbated with respect to income by the nature of our variable cost of revenue and direct sales and marketing costs, which we typically realize in closer alignment to booking volumes, and the more stable nature of our fixed costs. Furthermore, operating profits for our primary advertising business, trivago, have typically been experienced in the second half of the year, particularly the fourth quarter, as selling and marketing costs offset revenue in the first half of the year as we aggressively market during the busy booking period for spring, summer and winter holiday travel. As a result on a consolidated basis, revenue and income are typically the lowest in the first quarter and highest in the third quarter. The continued growth of our international operations, advertising business or a change in our product mix, including the assimilation and growth of HomeAway, may influence the typical trend of the

Table of Contents

seasonality in the future. We expect that as HomeAway continues its shift to more of a transaction-based business model for vacation rental listings its seasonal trends may be somewhat more pronounced than our other traditional leisure businesses.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are important in the preparation of our consolidated financial statements because they require that we use judgment and estimates in applying those policies. We prepare our consolidated financial statements and accompanying notes in accordance with generally accepted accounting principles in the United States (“GAAP”). Preparation of the consolidated financial statements and accompanying notes requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements as well as revenue and expenses during the periods reported. We base our estimates on historical experience, where applicable, and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions.

There are certain critical estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider an accounting estimate to be critical if:

- It requires us to make an assumption because information was not available at the time or it included matters that were highly uncertain at the time we were making the estimate; and

- Changes in the estimate or different estimates that we could have selected may have had a material impact on our financial condition or results of operations.

For additional information about our critical accounting policies and estimates, see the disclosure included in our Annual Report on Form 10-K for the year ended December 31, 2016.

Occupancy and Other Taxes

Legal Proceedings. We are currently involved in seventeen lawsuits brought by or against states, cities and counties over issues involving the payment of hotel occupancy and other taxes. We continue to defend these lawsuits vigorously. With respect to the principal claims in these matters, we believe that the statutes and ordinances at issue do not apply to the services we provide, namely the facilitation of hotel reservations, and, therefore, that we do not owe the taxes that are claimed to be owed. We believe that the statutes and ordinances at issue generally impose occupancy and other taxes on entities that own, operate or control hotels (or similar businesses) or furnish or provide hotel rooms or similar accommodations.

Recent developments include:

- **City of Chicago Litigation.** On April 25, 2017, the parties reached a settlement, thereby ending the case.

- **Nassau County, New York Litigation.** Nassau County and the Intervenor-Plaintiffs have appealed the trial court’s dismissal of their claims.

For additional information on these and other legal proceedings, see Part II, Item 1, Legal Proceedings.

We have established a reserve for the potential settlement of issues related to hotel occupancy tax litigation, consistent with applicable accounting principles and in light of all current facts and circumstances, in the amount of \$57 million as of June 30, 2017, and \$71 million as of December 31, 2016.

Pay-to-Play. Certain jurisdictions may assert that we are required to pay any assessed taxes prior to being allowed to contest or litigate the applicability of the ordinances. This prepayment of contested taxes is referred to as “pay-to-play.” Payment of these amounts is not an admission that we believe we are subject to such taxes and, even when such payments are made, we continue to defend our position vigorously. If we prevail in the litigation, for which a pay-to-play payment was made, the jurisdiction collecting the payment will be required to repay such amounts and also may be required to pay interest.

If we prevail in the litigation for which a pay-to-play payment was made, the jurisdiction collecting the payment will be required to repay such amounts and also may be required to pay interest. However, any significant pay-to-play payment or litigation loss could negatively impact our liquidity. For additional information, including significant pay-to-play payments made by Expedia companies, see Note 10 – Commitments and Contingencies - Legal Proceedings - Pay-to-Play in the notes to the consolidated financial statements.

Legislation. Certain jurisdictions, including the states of New York, North Carolina, Minnesota, Oregon, Rhode Island, and Maryland, the city of New York, and the District of Columbia, have enacted legislation seeking to tax online travel company services as part of sales taxes for hotel occupancy. We are currently remitting taxes to a number of jurisdictions, including to the states of New York, South Carolina, North Carolina, Minnesota, Georgia, Wyoming, Oregon, Rhode Island,

Table of Contents

Montana, Maryland, Kentucky and Maine, the District of Columbia and the city of New York, as well as certain other county and local jurisdictions.

Segments

We have four reportable segments: Core Online Travel Agencies (“Core OTA”), trivago, Egencia and HomeAway. Our Core OTA segment provides a full range of travel and advertising services to our worldwide customers through a variety of brands including: Expedia.com and Hotels.com in the United States and localized Expedia and Hotels.com websites throughout the world, Orbitz, CheapTickets, ebookers, EAN, Hotwire.com, Travelocity, Wotif Group, CarRentals.com, Classic Vacations and SilverRail Technologies, Inc. Our trivago segment generates advertising revenue primarily from sending referrals to online travel companies and travel service providers from its hotel metasearch websites. Our Egencia segment provides managed travel services to corporate customers worldwide. Our HomeAway segment operates an online marketplace for the vacation rental industry.

Operating Metrics

Our operating results are affected by certain metrics, such as gross bookings and revenue margin, which we believe are necessary for understanding and evaluating us. Gross bookings generally represent the total retail value of transactions booked for agency, merchant and HomeAway transactions, recorded at the time of booking reflecting the total price due for travel by travelers, including taxes, fees and other charges, and are reduced for cancellations and refunds. As travelers have increased their use of the internet to book travel arrangements, we have generally seen our gross bookings increase, reflecting the growth in the online travel industry, our organic market share gains and our business acquisitions. Revenue margin is defined as revenue as a percentage of gross bookings.

When HomeAway properties are booked through our Core OTA websites and vice versa, the segments split the third-party revenue for management and segment reporting purposes with the majority of the third-party revenue residing with the website marketing the property or room. The operating metrics, including gross bookings and room nights, are not split but instead reside entirely with the website marketing the property or room.

Gross Bookings and Revenue Margin

	Three Months Ended June 30,				Six months ended June 30,			
	2017	2016	% Change		2017	2016	% Change	
	(\$ in millions)				(\$ in millions)			
Gross Bookings								
Core OTA	\$18,954	\$17,182	10	%	\$38,062	\$34,407	11	%
trivago ⁽¹⁾	—	—	N/A		—	—	N/A	
HomeAway ⁽²⁾	2,123	1,460	45	%	4,820	3,278	47	%
Egencia	1,761	1,679	5	%	3,566	3,335	7	%
Total gross bookings	\$22,838	\$20,321	12	%	\$46,448	\$41,020	13	%
Revenue Margin								
Core OTA	10.6	% 10.3	%		9.7	% 9.6	%	
trivago ⁽¹⁾	N/A	N/A			N/A	N/A		
HomeAway ⁽²⁾	10.6	% 11.8	%		8.5	% 9.6	%	
Egencia	7.6	% 7.4	%		7.2	% 7.0	%	
Total revenue margin	11.3	% 10.8	%		10.3	% 10.0	%	

trivago, which is comprised of a hotel metasearch business that differs from our transaction-based websites, does (1) not have associated gross bookings or revenue margin. However, third-party revenue from trivago is included in revenue used to calculate total revenue margin.

(2) In the first quarter of 2017, we began reporting HomeAway gross bookings along with the historical comparable information. HomeAway gross bookings include on-platform transactions from all HomeAway brands, with the exception of BedandBreakfast.com and TopRural (which, if included would collectively add less than an estimated

2%

33

Table of Contents

to gross bookings). On-platform gross bookings for Stayz, Bookabach and Travelmob (which collectively represent less than 10% of total on-platform transactions) represent our best estimates.

The increase in worldwide gross bookings for the three and six months ended June 30, 2017, as compared to the same periods in 2016, was primarily driven by growth in the Core OTA segment, including growth at Brand Expedia, Hotels.com and EAN, as well as HomeAway.

The increase in revenue margin for the three and six months ended June 30, 2017, as compared to the same periods in 2016, was primarily due to a mix shift to higher margin products, including the growth in advertising and media revenue, partially offset by lower HomeAway revenue margins.

Results of Operations**Revenue**

	Three Months Ended June 30, 2017 2016 % Change (\$ in millions)				Six months ended June 30, 2017 2016 % Change (\$ in millions)			
Revenue by Segment								
Core OTA	\$2,009	\$1,765	14	%	\$3,710	\$3,305	12	%
trivago (Third-party revenue)	218	134	62	%	399	247	62	%
HomeAway	224	172	31	%	409	314	30	%
Egencia	135	125	8	%	257	234	10	%
Total revenue	\$2,586	\$2,196	18	%	\$4,775	\$4,100	16	%

Revenue increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily driven by growth in the Core OTA segment, including growth at Brand Expedia, EAN and Hotels.com, as well as growth at trivago and HomeAway.

Lodging revenue, which includes hotel and HomeAway revenue, increased 16% and 14% for the three and six months ended June 30, 2017, compared to the same periods in 2016. The increase was primarily due to a 21% and 17% increase in room nights stayed driven by growth at Brand Expedia, Hotels.com, EAN and HomeAway, partially offset by a 4% and 2% decrease in revenue per room night.

Worldwide air revenue increased 6% and 5% for the three and six months ended June 30, 2017, compared to the same periods in 2016, due to a 2% and 5% increase in air tickets sold as well as a 4% increase in revenue per ticket in the three month period.

The remaining worldwide revenue, other than lodging and air discussed above, which includes advertising and media, car rental, destination services and fee revenue related to our corporate travel business, increased by 28% for both three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to strong growth in advertising and media revenue as well as growth in our travel insurance and car rental products.

In addition to the above segment and product revenue discussion, our revenue by business model is as follows:

	Three Months Ended June 30, 2017 2016 % Change (\$ in millions)				Six months ended June 30, 2017 2016 % Change (\$ in millions)			
Revenue by Business Model								
Merchant	\$1,376	\$1,210	14	%	\$2,552	\$2,275	12	%
Agency	684	612	12	%	1,255	1,134	11	%
Advertising and media ⁽¹⁾	302	202	49	%	559	377	48	%
HomeAway	224	172	31	%	409	314	30	%
Total revenue	\$2,586	\$2,196	18	%	\$4,775	\$4,100	16	%

(1) Includes third-party revenue from trivago as well as our transaction-based websites.

Table of Contents

Merchant revenue increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to the increase in merchant hotel revenue driven by an increase in room nights stayed.

Agency revenue increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to the growth in agency hotel and agency air.

Advertising and media revenue increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to continued growth in revenue at trivago and Expedia Media Solutions.

HomeAway revenue increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to growth in transactional revenue of approximately 130% and 145% driven by a benefit from the traveler service fee, partially offset by subscription revenue decreasing approximately 35% and 30%.

Cost of Revenue

	Three Months Ended June 30,			Six months ended June 30,		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Customer operations	\$191	\$190	1 %	\$376	\$370	2 %
Credit card processing	133	127	4 %	260	261	(1) %
Data center, cloud and other	115	89	29 %	225	178	26 %
Total cost of revenue	\$439	\$406	8 %	\$861	\$809	6 %
% of revenue	17.0 %	18.5 %		18.0 %	19.7 %	

Cost of revenue primarily consists of (1) customer operations, including our customer support and telesales as well as fees to air ticket fulfillment vendors, (2) credit card processing, including merchant fees, fraud and chargebacks, and (3) other costs, primarily including data center and cloud costs to support our websites, supplier operations, destination supply and stock-based compensation.

During the three and six months ended June 30, 2017, the increase in cost of revenue expense, compared to the same periods in 2016, was driven by \$26 million and \$47 million of higher data center, cloud and other costs, including \$7 million and \$16 million related to an increase in data center related depreciation expense. Cloud expense during the three and six months ended June 30, 2017 was \$12 million and \$21 million, compared to \$1 million for the same periods of 2016.

Selling and Marketing

	Three Months Ended June 30,			Six months ended June 30,		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Direct costs	\$1,207	\$928	30 %	\$2,261	\$1,769	28 %
Indirect costs	236	227	4 %	452	425	6 %
Total selling and marketing	\$1,443	\$1,155	25 %	\$2,713	\$2,194	24 %
% of revenue	55.8 %	52.6 %		56.8 %	53.5 %	

Selling and marketing expense primarily relates to direct costs, including traffic generation costs from search engines and internet portals, television, radio and print spending, private label and affiliate program commissions, public relations and other costs. The remainder of the expense relates to indirect costs, including personnel and related overhead in our various brands and global supply organization, as well as stock-based compensation costs.

Selling and marketing expenses increased \$288 million and \$519 million during the three and six months ended June 30, 2017, compared to the same periods in 2016, driven by increases of \$279 million and \$492 million of direct costs, including online and offline marketing expenses. trivago and Brand Expedia accounted for the majority of the total direct cost increases. In addition, higher indirect costs of \$9 million and \$27 million also contributed to the increase and were driven by growth in personnel, partially offset by lower stock-based compensation when compared to prior year periods expense, which included incremental charges from certain trivago awards pursuant to liability treatment.

Table of Contents

Technology and Content

	Three Months Ended June 30,			Six months ended June 30,		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Personnel and overhead	\$165	\$150	10 %	\$322	\$305	5 %
Depreciation and amortization of technology assets	109	88	24 %	212	168	26 %
Other	69	80	(14) %	131	136	(3) %
Total technology and content	\$343	\$318	8 %	\$665	\$609	9 %
% of revenue	13.2 %	14.5 %		13.9 %	14.9 %	

Technology and content expense includes product development and content expense, as well as information technology costs to support our infrastructure, back-office applications and overall monitoring and security of our networks, and is principally comprised of personnel and overhead, depreciation and amortization of technology assets including hardware, and purchased and internally developed software, and other costs including cloud expense, licensing and maintenance expense and stock-based compensation.

Technology and content expense increased \$25 million and \$56 million during the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to increased depreciation and amortization of technology assets of \$21 million and \$44 million. In addition, personnel and overhead increased for both periods on higher headcount, which was largely offset by a decrease in stock-based compensation related to prior year periods expense for trivago. Cloud expense during the second quarter of 2017 was \$9 million, compared to \$8 million in the second quarter of 2016, and \$16 million during the six months ended June 30, 2017 compared to \$13 million in 2016.

General and Administrative

	Three Months Ended June 30,			Six months ended June 30,		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Personnel and overhead	\$110	\$106	4 %	\$211	\$203	4 %
Professional fees and other	69	87	(21) %	126	136	(7) %
Total general and administrative	\$179	\$193	(7) %	\$337	\$339	— %
% of revenue	6.9 %	8.8 %		7.1 %	8.3 %	

General and administrative expense consists primarily of personnel-related costs, including our executive leadership, finance, legal and human resource functions as well as fees for external professional services including legal, tax and accounting, and other costs including stock-based compensation.

General and administrative expense decreased \$14 million during the three months ended June 30, 2017, compared to the same period in 2016, primarily due to the impact of the prior year stock-based compensation expense at trivago. For the six month ended June 30, 2017, the decrease in stock-based compensation expense at trivago was largely offset by higher professional fees and personnel and overhead costs.

Amortization of Intangible Assets

	Three Months Ended June 30,			Six months ended June 30,		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Amortization of intangible assets	\$66	\$84	(21) %	133	174	(24) %
% of revenue	2.6 %	3.8 %		2.8 %	4.2 %	

Amortization of intangible assets decreased \$18 million and \$41 million during the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to the prior period completion of amortization of certain intangible assets.

Table of Contents

Legal Reserves, Occupancy Tax and Other

	Three Months Ended June 30, 2017			Six months ended June 30, 2017		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Legal reserves, occupancy tax and other	\$3	\$4	(22)%	24	6	287 %
% of revenue	0.1%	0.2%		0.5 %	0.2 %	

Legal reserves, occupancy tax and other consists of changes in our reserves for court decisions and the potential and final settlement of issues related to hotel occupancy taxes, expenses recognized related to monies paid in advance of occupancy and other tax proceedings (“pay-to-play”) as well as certain other legal reserves.

Restructuring and Related Reorganization Charges

	Three Months Ended June 30, 2017			Six months ended June 30, 2017		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Restructuring and related reorganization charges	\$10	\$10	(1)%	12	40	(71)%
% of revenue	0.4 %	0.4 %		0.2 %	1.0 %	

In connection with activities to centralize and optimize certain operations as well as migrate technology platforms in the prior year, primarily related to previously disclosed acquisitions, we recognized \$10 million and \$12 million in restructuring and related reorganization charges during the three and six months ended June 30, 2017 compared to \$10 million and \$40 million during the same periods in 2016. Based on current plans, which are subject to change, we expect to incur approximately \$10 million during the remainder of 2017 related to these integrations and estimates do not include any possible future acquisition integrations.

Operating Income (Loss)

	Three Months Ended June 30, 2017			Six months ended June 30, 2017		
	2017	2016	% Change	2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Operating income (loss)	\$103	\$26	300 %	30	(72)	N/A
% of revenue	4.0 %	1.2 %		0.6 %	(1.7)%	

Operating income increased for the three months ended June 30, 2017, compared to the same period in 2016, and changed from an operating loss of \$72 million for the six months ended June 30, 2016 to operating income of \$30 million for the same period in 2017 primarily due to growth in revenue and a decrease in most major expense categories as a percentage of revenue, partially offset by growth in sales and marketing as a percentage of revenue in the current year periods.

Adjusted EBITDA by Segment

	Three Months Ended June 30, 2017			Six months ended June 30, 2017		
	2017	2016	% Change	2017	2016	% Change

Table of Contents

(1) Adjusted EBITDA is a non-GAAP measure. See "Definition and Reconciliation of Adjusted EBITDA" below for more information.

Adjusted EBITDA is our primary segment operating metric. See Note 11 – Segment Information in the notes to the consolidated financial statements for additional information on intersegment transactions, unallocated overhead costs and for a reconciliation of Adjusted EBITDA by segment to net income (loss) attributable to Expedia, Inc. for the periods presented above.

Core OTA Adjusted EBITDA increased \$60 million and \$75 million during the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to an increase of \$244 million and \$405 million in revenue, partially offset by an increase in online and offline marketing expense mostly at Brand Expedia, EAN and Hotels.com, and including an increase in online spend on trivago as mentioned below.

trivago Adjusted EBITDA decreased \$5 million during the three months ended June 30, 2017, compared to the same period in 2016, due to higher online and offline marketing expense as trivago also continued to invest to drive global growth, partially offset by an increase of \$128 million in revenue with growth across all major regions, and including an increase of \$44 million in intersegment revenue from Core OTA. trivago Adjusted EBITDA increased \$7 million during the six months ended June 30, 2017, compared to the same period in 2016, due to an increase of \$237 million in revenue with growth across all major regions, and including an increase of \$85 million in intersegment revenue from Core OTA. Revenue growth was partially offset by higher online and offline marketing expense.

HomeAway Adjusted EBITDA increased \$1 million during the three months ended June 30, 2017, compared to the same period in 2016, due to an increase of \$52 million in revenue, partially offset by higher selling and marketing and technology and content expense. HomeAway Adjusted EBITDA decreased \$11 million during the six months ended June 30, 2017, compared to the same period in 2016 primarily due to higher selling and marketing and technology expense, partially offset by an increase of \$95 million in revenue. During the current year, HomeAway has continued to invest in offline and online brand marketing to bring more demand to its growing supply base and in growing its product and technology teams.

Egencia Adjusted EBITDA increased \$2 million and \$13 million during the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to an increase in revenue of \$10 million and \$23 million as a result of adding new corporate clients, partially offset by a growth in sales personnel and product and technology investments.

Unallocated overhead costs decreased slightly primarily due to lower technology and content expense as we lap over an accelerated pace of technology hiring in the prior year.

Interest Income and Expense

	Three Months Ended June 30, 2017				Six months ended June 30, 2017			
	2017	2016	% Change		2017	2016	% Change	
	(\$ in millions)				(\$ in millions)			
Interest income	\$ 9	\$ 5	87	%	16	9	82	%
Interest expense	(43)	(43)	(1)	%	(86)	(87)	(1)	%

Interest income increased for the three and six months ended June 30, 2017, compared to the same periods in 2016, primarily due to higher average cash balances and to a lesser extent higher rates of return. Interest expense was consistent period over period.

Provision for Income Taxes

	Three Months Ended June 30, 2017	2016	% Change	Six months ended June 30, 2017	2016	% Change
	(\$ in millions)			(\$ in millions)		
Provision for income taxes	\$3	\$(18)	N/A	\$(44)	\$(76)	(42)%
Effective tax rate	5.3%	149.3%		58.6 %	42.4 %	

We determine our provision for income taxes for interim periods using an estimate of our annual effective tax rate. We record any changes affecting the estimated annual tax rate in the interim period in which the change occurs, including discrete tax items.

For the three months ended June 30, 2017, we recorded a 5.3% tax rate expense on pre-tax income, which was driven by discrete income tax items specifically the recognition of excess tax benefits related to share-based payments. The effective tax rate for the three months ended June 30, 2016 was a 149.3% tax rate benefit measured against a pre-tax loss, and was driven by discrete income tax items including the recognition of excess tax benefits related to share-based payments resulting from the adoption of new accounting guidance for share-based payments as of January 1, 2016.

For the six months ended June 30, 2017, we recorded a 58.6% tax rate benefit on pre-tax loss, which was driven by discrete income tax items specifically the recognition of excess tax benefits related to share-based payments. The effective tax rate for the six months ended June 30, 2016 was a 42.4% tax rate benefit measured against a pre-tax loss, and was due to discrete income tax items including release of a valuation allowance for net operating losses in the first quarter of 2016, as well as recognition of excess tax benefits related to share-based payments resulting from the adoption of new accounting guidance for share-based payments as of January 1, 2016.

We are subject to taxation in the United States and various other state and foreign jurisdictions. We are under examination by the Internal Revenue Service ("IRS") for our 2009 through 2013 tax years. Our 2014 and subsequent years remain open to examination by the IRS. We do not anticipate a significant impact to our gross unrecognized tax benefits within the next 12 months related to these years. During first quarter of 2017, the IRS issued proposed adjustments relating to transfer pricing with our foreign subsidiaries for our 2009 to 2010 audit cycle. The proposed adjustments would increase our U.S. taxable income by \$105 million, which would result in federal tax expense of approximately \$37 million, subject to interest. We do not agree with the position of the IRS and will formally protest the IRS position.

Definition and Reconciliation of Adjusted EBITDA

We report Adjusted EBITDA as a supplemental measure to U.S. generally accepted accounting principles ("GAAP"). Adjusted EBITDA is among the primary metrics by which management evaluates the performance of the business and on which internal budgets are based. Management believes that investors should have access to the same set of tools

that management uses to analyze our results. This non-GAAP measure should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP. Adjusted EBITDA has certain limitations in that it does not take into account the impact of certain expenses to our consolidated statements of operations. We endeavor to compensate for the limitation of the non-GAAP measure presented by also providing the most directly comparable GAAP measure and a description of the reconciling items and adjustments to derive the non-GAAP measure. Adjusted EBITDA also excludes certain items related to transactional tax matters, which may ultimately be settled in cash, and we urge investors to review the detailed disclosure regarding these matters included above, in the Legal Proceedings section, as well as the notes to the financial statements.

Table of Contents

The non-GAAP financial measure used by the Company may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies.

Adjusted EBITDA is defined as net income (loss) attributable to Expedia adjusted for (1) net income (loss) attributable to non-controlling interests; (2) provision for income taxes; (3) total other expenses, net; (4) stock-based compensation expense, including compensation expense related to certain subsidiary equity plans; (5) acquisition-related impacts, including (i) amortization of intangible assets and goodwill and intangible asset impairment, (ii) gains (losses) recognized on changes in the value of contingent consideration arrangements, if any, and (iii) upfront consideration paid to settle employee compensation plans of the acquiree, if any; (6) certain other items, including restructuring; (7) items included in legal reserves, occupancy tax and other; (8) that portion of gains (losses) on revenue hedging activities that are included in other, net that relate to revenue recognized in the period; and (9) depreciation.

The above items are excluded from our Adjusted EBITDA measure because these items are noncash in nature, or because the amount and timing of these items is unpredictable, not driven by core operating results and renders comparisons with prior periods and competitors less meaningful. We believe Adjusted EBITDA is a useful measure for analysts and investors to evaluate our future on-going performance as this measure allows a more meaningful comparison of our performance and projected cash earnings with our historical results from prior periods and to the results of our competitors. Moreover, our management uses this measure internally to evaluate the performance of our business as a whole and our individual business segments. In addition, we believe that by excluding certain items, such as stock-based compensation and acquisition-related impacts, Adjusted EBITDA corresponds more closely to the cash operating income generated from our business and allows investors to gain an understanding of the factors and trends affecting the ongoing cash earnings capabilities of our business, from which capital investments are made and debt is serviced.

The reconciliation of net income (loss) attributable to Expedia, Inc. to Adjusted EBITDA is as follows:

	Three months ended June 30,		Six months ended June 30,	
	2017	2016	2017	2016
	(In thousands)			
Net income (loss) attributable to Expedia, Inc.	\$56,689	\$31,649	\$(29,433)	\$(76,940)
Net loss attributable to non-controlling interests	(3,019)	(25,642)	(1,436)	(25,585)
Provision for income taxes	3,012	(18,202)	(43,704)	(75,556)
Total other expense, net	46,086	37,857	104,508	106,445
Operating income (loss)	102,768	25,662	29,935	(71,636)
Gain (loss) on revenue hedges related to revenue recognized	9,227	(9,107)	11,905	(23)
Restructuring and related reorganization charges, excluding stock-based compensation	9,708	9,363	11,607	27,993
Legal reserves, occupancy tax and other	3,401	4,344	24,455	6,318
Stock-based compensation	50,102	100,431	97,313	149,339
Amortization of intangible assets	66,279	84,181	132,955	174,180
Depreciation	151,052	116,023	292,600	221,278
Adjusted EBITDA	\$392,537	\$330,897	\$600,770	\$507,449

Financial Position, Liquidity and Capital Resources

Our principal sources of liquidity are cash flows generated from operations; our cash and cash equivalents and short-term investment balances, which were \$3.8 billion and \$1.9 billion at June 30, 2017 and December 31, 2016, including \$1.4 billion and \$1.1 billion of cash and short-term investment balances held in wholly-owned foreign subsidiaries, (which includes \$1.0 billion and \$737 million related to earnings indefinitely invested outside the United States) as well as \$366 million and \$313 million held in majority-owned subsidiaries, which is also indefinitely invested outside the United States; and our \$1.5 billion revolving credit facility, which is essentially untapped and expires in February 2021. The revolving credit facility bears interest based on the Company's credit ratings with the applicable interest rate on drawn amounts at LIBOR plus 137.5 basis points and the commitment fee on undrawn

amounts at 17.5 basis points as of June 30, 2017.

Our credit ratings are periodically reviewed by rating agencies. As of June 30, 2017, Moody's rating was Ba1 with an outlook of "stable," S&P's rating was BBB- with an outlook of "stable" and Fitch's rating was BBB- with an outlook of "stable." Changes in our operating results, cash flows, financial position, capital structure, financial policy or capital allocations to share repurchase, dividends, investments and acquisitions could impact the ratings assigned by the various rating agencies.

Table of Contents

Should our credit ratings be adjusted downward, we may incur higher costs to borrow and/or limited access to capital markets, which could have a material impact on our financial condition and results of operations.

As of June 30, 2017, we were in compliance with the covenants and conditions in our revolving credit facility and outstanding debt, which was comprised of \$500 million in registered senior unsecured notes due in August 2018 that bear interest at 7.456%, \$750 million in registered senior unsecured notes due in August 2020 that bear interest at 5.95%, \$500 million in registered senior unsecured notes due in August 2024 that bear interest at 4.5%, Euro 650 million of registered senior unsecured notes due in June 2022 that bear interest at 2.5% and \$750 million of senior unsecured notes due in February 2026 that bear interest at 5.0%.

Under the merchant model, we receive cash from travelers at the time of booking and we record these amounts on our consolidated balance sheets as deferred merchant bookings. We pay our airline suppliers related to these merchant model bookings generally within a few weeks after completing the transaction, but we are liable for the full value of such transactions until the flights are completed. For most other merchant bookings, which is primarily our merchant hotel business, we generally pay after the travelers' use and, in some cases, subsequent billing from the hotel suppliers. Therefore, generally we receive cash from the traveler prior to paying our supplier, and this operating cycle represents a working capital source of cash to us. As long as the merchant hotel business grows, we expect that changes in working capital related to merchant hotel transactions will positively impact operating cash flows. However, we are using both the merchant model and the agency model in many of our markets. If the merchant hotel model declines relative to our other business models that generally consume working capital such as agency hotel, managed corporate travel, advertising or certain Expedia Affiliate Network relationships, or if there are changes to the merchant model, supplier payment terms, or booking patterns that compress the time period between our receipt of cash from travelers and our payment to suppliers, such as with mobile bookings via smartphones, our overall working capital benefits could be reduced, eliminated or even reversed. Our future working capital benefits could also be impacted by HomeAway's continued shift to more of a transactional model from a subscription model.

As our ETP program continues to expand, and depending on relative traveler and supplier adoption rates and customer payment preferences, among other things, the scaling up of ETP has and will continue to negatively impact near term working capital cash balances, cash flow, relative liquidity during the transition, and hotel revenue margins.

Seasonal fluctuations in our merchant hotel bookings affect the timing of our annual cash flows. During the first half of the year, hotel bookings have traditionally exceeded stays, resulting in much higher cash flow related to working capital. During the second half of the year, this pattern reverses and cash flows are typically negative. While we expect the impact of seasonal fluctuations to continue, merchant hotel growth rates, changes to the model or booking patterns, changes in the relative mix of merchant hotel transactions compared with transactions in our working capital consuming businesses, including ETP, as well as the transformation of the HomeAway vacation rental listing business, may counteract or intensify the anticipated seasonal fluctuations.

As of June 30, 2017, we had a deficit in our working capital of \$2.7 billion, which is consistent with the deficit of \$2.7 billion as of December 31, 2016.

We continue to invest in the development and expansion of our operations. Ongoing investments include but are not limited to improvements in infrastructure, which include our servers, networking equipment and software, release improvements to our software code, platform migrations and consolidation and search engine marketing and optimization efforts. In addition, in 2016, we began our expansion into the cloud computing environment. While we expect our cloud computing expenses to increase significantly over the next few years they are expected to result in lower overall capital expenditures related to our data centers over time. Our future capital requirements may include capital needs for acquisitions (including purchases of non-controlling interest), share repurchases, dividend payments or expenditures in support of our business strategy; thus reducing our cash balance and/or increasing our debt. Excluding capital expenditures associated with the build out of our new corporate headquarters, we expect total capital expenditures for full year 2017 to decline slightly over 2016 spending levels. Our current estimates for the new headquarters total approximately \$700 to \$900 million, with final estimates contingent on completion of design plans and final determination of completed office space required in the initial build out. Of the total approximately \$30 million was spent in 2016 and less than \$100 million will be spent in 2017. The majority of the remaining expenditures for the new headquarters are planned for 2018 and 2019.

Table of Contents

Our cash flows are as follows:

	Six months ended June 30,		
	2017	2016	\$ Change
	(In millions)		
Cash provided by (used in):			
Operating activities	\$2,366	\$1,726	\$ 640
Investing activities	(1,304)	(395)	(909)
Financing activities	(81)	(748)	667
Effect of foreign exchange rate changes on cash and cash equivalents	97	37	60

For the six months ended June 30, 2017, net cash provided by operating activities increased by \$640 million primarily due to an increased benefits from working capital changes driven mostly from a change in deferred merchant bookings.

For the six months ended June 30, 2017, cash used in investing activities increased by \$909 million primarily due to higher year-over-year net purchases of investments of \$818 million as well as an increase of cash used for acquisitions of \$138 million.

For the six months ended June 30, 2017, cash used in financing activities primarily included cash paid to acquire shares of \$114 million, including the repurchased shares under the authorizations discussed below, and a \$85 million cash dividend payment, partially offset by \$137 million of proceeds from the exercise of options and employee stock purchase plans. For the six months ended June 30, 2016, cash used in financing activities primarily included the repayment of \$400 million of HomeAway Convertible Notes, cash paid to acquire shares of \$328 million and a \$72 million cash dividend payment, partially offset by \$70 million of proceeds from the exercise of options and employee stock purchase plans.

In February 2015, the Executive Committee, acting on behalf of the Board of Directors, authorized a repurchase of up to 10 million shares of our common stock. During the six months ended June 30, 2017 and 2016, we repurchased, through open market transactions, 0.8 million and 2.9 million shares under these authorization for a total cost of \$102 million and \$312 million, excluding transaction costs. As of June 30, 2017, 6.5 million shares remain authorized for repurchase under this authorization with no fixed termination date for the repurchases. Subsequent to June 30, 2017, we repurchased an additional 0.2 million shares for a total cost of \$33 million, excluding transaction costs, representing an average price of \$150.37 per share.

During the first six months of 2017 and 2016, the Executive Committee, acting on behalf of the Board of Directors, declared and we paid the following dividends:

Declaration Date	Dividend Per Share	Record Date	Total Amount (in thousands)	Payment Date
Six Months Ended June 30, 2017				
February 7, 2017	\$ 0.28	March 9, 2017	\$ 42,247	March 30, 2017
April 26, 2017	0.28	May 25, 2017	42,438	June 15, 2017
Six Months Ended June 30, 2016				
February 8, 2016	\$ 0.24	March 10, 2016	\$ 36,174	March 30, 2016
April 26, 2016	0.24	May 26, 2016	35,773	June 16, 2016

In addition, in July 2017, the Executive Committee, acting on behalf of the Board of Directors, declared a quarterly cash dividend of \$0.30 per share of outstanding common stock payable on September 14, 2017 to stockholders of record as of the close of business on August 24, 2017. Future declarations of dividends are subject to final determination by our Board of Directors.

The effect of foreign exchange on our cash balances denominated in foreign currency for the six months ended June 30, 2017, compared to the same period in 2016, showed a net change of \$60 million reflecting higher appreciations in foreign currencies in the current year period compared to the prior year period.

In our opinion, available cash, funds from operations and available borrowings will provide sufficient capital resources to meet our foreseeable liquidity needs. There can be no assurance, however, that the cost or availability of

future borrowings, including refinancings, if any, will be available on terms acceptable to us.

Table of Contents

Contractual Obligations, Commercial Commitments and Off-balance Sheet Arrangements

There have been no material changes outside the normal course of business to our contractual obligations and commercial commitments since December 31, 2016. Other than our contractual obligations and commercial commitments, we did not have any off-balance sheet arrangements as of June 30, 2017 or December 31, 2016.

Table of Contents

Part I. Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk Management

There has been no material changes in our market risk during the three months ended June 30, 2017. For additional information, see Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in Part II of our Annual Report on Form 10-K for the year ended December 31, 2016.

Table of Contents

Part I. Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures.

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), our management, including our Chairman and Senior Executive, Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, our Chairman and Senior Executive, Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Changes in internal control over financial reporting.

There were no changes to our internal control over financial reporting that occurred during the quarter ended June 30, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Part II. Item 1. Legal Proceedings

In the ordinary course of business, Expedia and its subsidiaries are parties to legal proceedings and claims involving property, personal injury, contract, alleged infringement of third party intellectual property rights and other claims. A discussion of certain legal proceedings can be found in the section titled “Legal Proceedings,” of our Annual Report on Form 10-K for the year ended December 31, 2016 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2017. The following are developments regarding such legal proceedings:

Litigation Relating to Occupancy and Other Taxes

Actions Filed by Individual States, Cities and Counties

City of Chicago Litigation. On April 25, 2017, the parties reached a settlement, thereby ending the case.

City of San Antonio, Texas Litigation. The plaintiffs have asked the district court to reconsider its decision staying further proceedings on their fee petition pending resolution of the parties’ appeal to the Fifth Circuit Court of Appeals. Oral argument on the parties’ cross appeals is scheduled for August 28, 2017.

Nassau County, New York Litigation. Nassau County and the Intervenor-Plaintiffs have appealed the trial court’s dismissal of their claims.

State of New Hampshire Litigation. The case went to trial from May 1 to May 12, 2017. The court subsequently set a schedule for post-trial briefing.

Palm Beach, Florida HomeAway Litigation. The court has set a trial date of October 16, 2017.

Portland, Oregon HomeAway Litigation. On May 11, 2017, the court ruled that the city’s audit provision could not be used to obtain information protected by the Stored Communications Act.

State of Louisiana/City of New Orleans Litigation. On July 24, 2017, the Louisiana Court of Appeals denied the defendant online travel companies’ application for supervisory writ to challenge the trial court’s denial of their motion for judgment on the pleadings with respect to plaintiffs’ non-tax claims.

Non-Tax Litigation and Other Legal Proceedings

Putative Class Action Litigation

Buckeye Tree Lodge and 2020 O Street Corporation Lawsuits. On May 5, 2017, Plaintiffs filed a Consolidated Class Action Complaint, which the Expedia defendants answered on May 25, 2017.

Israeli Putative Class Action Lawsuit. On June 22, 2017, the court rejected Hotels.com’s application challenging service of process. Hotels.com has appealed that decision.

Cases Against HomeAway.com, Inc. On June 22, 2017, the court heard argument on HomeAway’s motions to dismiss the complaints in the Arnold and Brickman cases. On May 1, 2017, HomeAway and Expedia moved to compel arbitration and for dismissal of the complaint in the May case. The court heard argument on the motion on July 6, 2017 and, on July 10, 2017, entered an order directing the parties to advise it when the Fifth Circuit Court of Appeals issues decisions in the Arnold and Seim appeals.

Other Legal Proceedings

HRC of San Francisco, California HomeAway Litigation. On June 26, 2017, the California Court of Appeals affirmed the trial court’s dismissal of the case.

San Francisco, California HomeAway Litigation. The parties reached a settlement on May 1, 2017 and, on June 16, 2017, the case was dismissed on the parties’ stipulation.

Chicago, Illinois HomeAway Litigation. On May 22, 2017, HomeAway filed a lawsuit against the City of Chicago requesting a declaration that certain sections of the City’s ordinance violate the Communications Decency Act of 1996, the Storage Communications Act, and the First, Fourth, and Fourteenth Amendments of the U.S. Constitution.

HomeAway.com, Inc. v. City of Chicago, Case No. 1:17-cv-03784 (U.S. District Court, Northern District of Illinois).

Part II. Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A, “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2016, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Table of Contents

Part II. Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Share Repurchases

During 2015, the Executive Committee, acting on behalf of the Board of Directors, authorized a repurchase of up to 10 million shares of our common stock. A summary of the repurchase activity for the second quarter of 2017 is as follows:

Period	Total Number of Shares Purchased	Price Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under Plans or Programs
(In thousands, except per share data)				
April 1-30, 2017	113	\$ 127.90	113	6,812
May 1-31, 2017	—	—	—	6,812
June 1-30, 2017	327	146.86	327	6,485
Total	440		440
