Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

NOTE 1 Summary of Significant Accounting Policies

Basis of Presentation and Management Representation

The consolidated financial statements include accounts, after elimination of intercompany accounts and transactions, of Meadowbrook Insurance Group, Inc. (the Company), its wholly owned subsidiary Star Insurance Company (Star), and Star's wholly owned subsidiaries, Savers Property and Casualty Insurance Company, Williamsburg National Insurance Company, and Ameritrust Insurance Corporation (which are collectively referred to as the Insurance Company Subsidiaries), and Preferred Insurance Company, Ltd. The consolidated financial statements also include Meadowbrook, Inc., Crest Financial Corporation, and their subsidiaries.

Pursuant to Financial Accounting Standards Board Interpretation Number (FIN) 46(R), the Company does not consolidate its subsidiaries, Meadowbrook Capital Trust I and II (the Trusts), as they are not variable interest entities and the Company is not the primary beneficiary of the Trusts. The consolidated financial statements, however, include the equity earnings of the Trusts. In addition and in accordance with FIN 46(R), the Company does not consolidate its subsidiary American Indemnity Insurance Company, Ltd. (American Indemnity). While the Company and its subsidiary Star are the common shareholders, they are not the primary beneficiaries of American Indemnity. The consolidated financial statements, however, include the equity earnings of American Indemnity.

In the opinion of management, the consolidated financial statements reflect all normal recurring adjustments necessary to present a fair statement of the results for the interim period. Preparation of financial statements under generally accepted accounting principles requires management to make estimates. Actual results could differ from those estimates. The results of operations for the three months ended March 31, 2007 are not necessarily indicative of the results expected for the full year.

These financial statements and the notes thereto should be read in conjunction with the Company's audited financial statements and accompanying notes included in its annual report on Form 10-K, as filed with the United States Securities and Exchange Commission, for the year ended December 31, 2006.

Revenue Recognition

Premiums written, which include direct, assumed, and ceded are recognized as earned on a pro rata basis over the life of the policy term. Unearned premiums represent the portion of premiums written that are applicable to the unexpired terms of policies in force. Provisions for unearned premiums on reinsurance assumed from others are made on the basis of ceding reports when received and actuarial estimates.

For the three months ending March 31, 2007, total assumed written premiums were \$23.4 million, of which \$21.7 million relates to assumed business the Company manages directly, and therefore, no estimation is involved. The remaining \$1.7 million of assumed written premiums includes \$1.1 million related to residual markets.

Assumed premium estimates are specifically related to the mandatory assumed pool business from the National Council on Compensation Insurance (NCCI), or residual market business. The pool cedes workers' compensation business to participating companies based upon the individual company's market share by state. The activity is reported from the NCCI to participating companies on a two quarter lag. To accommodate this lag, the Company estimates premium and loss activity based on historical and market based results. Historically, the Company has not experienced any material difficulties or disputes in collecting balances from NCCI; and therefore, no provision for

doubtful accounts is recorded related to the assumed premium estimate.

In addition, certain premiums are subject to retrospective premium adjustments. Premium is recognized over the term of the insurance contract.

Fee income, which includes risk management consulting, loss control, and claims services, is recognized during the period the services are provided. Depending on the terms of the contract, claims processing fees are recognized as revenue over the estimated life of the claims, or the estimated life of the contract. For those contracts

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

that provide services beyond the expiration or termination of the contract, fees are deferred in an amount equal to management's estimate of the Company's obligation to continue to provide services.

Commission income, which includes reinsurance placement, is recorded on the later of the effective date or the billing date of the policies on which they were earned. Commission income is reported net of any sub-producer commission expense. Any commission adjustments that occur subsequent to the earnings process are recognized upon notification from the insurance companies. Profit sharing commissions from insurance companies are recognized when determinable, which is when such commissions are received.

The Company reviews, on an ongoing basis, the collectibility of its receivables and establishes an allowance for estimated uncollectible accounts.

Realized gains or losses on sale of investments are determined on the basis of specific costs of the investments. Dividend income is recognized when declared and interest income is recognized when earned. Discount or premium on debt securities purchased at other than par value is amortized using the effective yield method. Investments with other than temporary declines in fair value are written down to their estimated net fair value and the related realized losses are recognized in income.

Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding during the period, while diluted earnings per share includes the weighted average number of common shares and potential dilution from shares issuable pursuant to stock options using the treasury stock method.

Outstanding options of 99,937 and 135,301 for the periods ended March 31, 2007 and 2006, respectively, have been excluded from the diluted earnings per share, as they were anti-dilutive. Shares issuable pursuant to stock options included in diluted earnings per share were 112,249 and 271,750 for the three months ended March 31, 2007 and 2006, respectively. Shares related to the Company's Long Term Incentive Plan (LTIP) included in diluted earnings per share were 9,266 and 423,340 for the three months ended March 31, 2007 and 2006, respectively.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*, which becomes effective for fiscal years beginning after November 15, 2007. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. The Company will evaluate the impact of SFAS No. 157, but believes the adoption of SFAS No. 157 will not have a material impact on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. SFAS No. 159 will permit entities the option to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis as of specified election dates. This election is irrevocable. The objective of SFAS No. 159 is to improve financial reporting and reduce the volatility in reported earnings caused by measuring related assets and liabilities differently. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company will evaluate the potential impact SFAS No. 159 will have on its consolidated financial statements.

NOTE 2 Stock Options, Long Term Incentive Plan, and Deferred Compensation Plan

Stock Options

Effective January 1, 2006, the Company adopted SFAS No. 123(R), *Share-Based Payment*, using the modified prospective application transition method. The Company previously adopted the requirements of recording stock options consistent with SFAS 123 and accounting for the change in accounting principle using

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

the prospective method in accordance with SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure* an amendment of FASB Statement No. 123. Under the prospective method, stock-based compensation expense was recognized for awards granted after the beginning of the fiscal year in which the change is made, or January 1, 2003. Upon implementation of SFAS No. 148 in 2003, the Company recognized stock-based compensation expense for awards granted after January 1, 2003.

Prior to the adoption of SFAS No. 148, the Company applied the intrinsic value-based provisions set forth in APB Opinion No. 25. Under the intrinsic value method, compensation expense is determined on the measurement date, which is the first date when both the number of shares the employee is entitled to receive, and the exercise price are known. Compensation expense, if any, resulting from stock options granted by the Company was determined based upon the difference between the exercise price and the fair market value of the underlying common stock at the date of grant. The Company's Stock Option Plan requires the exercise price of the grants to be at the current fair market value of the underlying common stock.

Upon adoption of SFAS No. 123(R), the Company was required to recognize as an expense in the financial statements all share-based payments to employees based on their fair values. SFAS No. 123(R) requires forfeitures to be estimated in calculating the expense relating to the share-based payments, as opposed to recognizing any forfeitures and the corresponding reduction in expense as they occur. In addition, SFAS No. 123(R) requires any tax savings resulting from tax deductions in excess of compensation expense be reflected in the financial statements as a cash inflow from financing activities, rather than as an operating cash flow as in prior periods. The pro forma disclosures previously permitted under SFAS 123, are no longer an alternative to financial statement recognition. As indicated, the Company adopted the requirements of SFAS 123(R) using the modified prospective application transition method. The prospective method requires compensation expense to be recorded for all unvested stock options and restricted stock, based upon the previously disclosed SFAS 123 methodology and amounts.

The Company, through its 1995 and 2002 Amended and Restated Stock Option Plans (the Plans), may grant options to key executives and other members of management of the Company and its subsidiaries in amounts not to exceed 2,000,000 shares of the Company's common stock allocated for each plan. The Plans are administered by the Compensation Committee (the Committee) of the Board of Directors. Option shares may be exercised subject to the terms of the Plans and the terms prescribed by the Committee at the time of grant. Currently, the Plans' options have either five or ten-year terms and are exercisable and vest in equal increments over the option term. The Company has not issued any new stock options to employees since 2003.

The following is a summary of the Company's stock option activity and related information for the three months ended March 31, 2007:

	Options	Weighted-Average Exercise Price
Outstanding as of December 31, 2006	391,678	\$ 7.38
Exercised	(49,071)	\$ 2.94
Forfeited	(13,922)	\$ 21.44

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-Q

Outstanding as of March 31, 2007	328,685	\$	7.44
Exercisable as of March 31, 2007	302,815	\$	7.26

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

The following table summarizes information about stock options outstanding at March 31, 2007:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Options	Weighted- Average Remaining Life (Years)	Weighted- Average Exercise Price	Options	Weighted- Average Exercise Price
\$2.173 to \$3.507	227,248	0.6	\$ 2.52	227,248	\$ 2.52
\$6.48	1,500	2.7	\$ 6.48	1,000	\$ 3.24
\$10.91 to \$24.6875	99,937	1.2	\$ 18.66	74,567	\$ 23.49
	328,685	0.8	\$ 7.44	302,815	\$ 7.26

Compensation expense of \$2,000 and \$98,000 has been recorded in the three months ended March 31, 2007 and 2006 under SFAS 123(R), respectively. As of March 31, 2007, the Company has fully expensed all of its current outstanding stock options.

Long Term Incentive Plan

In 2004, the Company adopted a Long Term Incentive Plan (the "LTIP"). The LTIP provides participants with the opportunity to earn cash and stock awards based upon the achievement of specified financial goals over a three-year performance period with the first performance period commencing January 1, 2004. At the end of a three-year performance period, and if the performance targets for that period are achieved, the Compensation Committee of the Board of Directors shall determine the amount of LTIP awards that are payable to participants in the LTIP for the current performance period. One-half of any LTIP award will be payable in cash and one-half of the award will be payable in the form of a stock award. If the Company achieves the performance targets for the three-year performance period, payment of the cash portion of the award would be made in three annual installments, with the first payment being paid as of the end of the that performance period and the remaining two payments to be paid in the subsequent two years. Any unpaid portion of a cash award is subject to forfeiture if the participant voluntarily leaves the Company or is discharged for cause. The portion of the award to be paid in the form of stock will be issued as of the end of that performance period. The number of shares of Company's common stock subject to the stock award shall equal the dollar amount of one-half of the LTIP award divided by the fair market value of Company's common stock on the first date of the beginning of the performance period. The stock awards shall be made subject to the terms and conditions of the LTIP and Plans. The Company accrues awards based upon the criteria set-forth and approved by the Compensation Committee of the Board of Directors, as included in the LTIP.

In 2006, the Company achieved its specified financial goals for the 2004-2006 plan years. On February 8, 2007, the Company's Board of Directors and the Compensation Committee of the Board of Directors approved the distribution of the LTIP award for the 2004-2006 plan years, which included both a cash and stock award. The total cash distribution was \$2.5 million, of which \$823,000 was paid out in 2007 with the remainder to be paid out in 2008 and 2009. The stock portion of the LTIP award was valued at \$2.5 million, which resulted in the issuance of

579,496 shares of the Company's common stock. Of the 579,496 shares issued, 191,570 shares were retired for payment of the participant's associated withholding taxes related to the compensation recognized by the participant. The stock portion of the award was fully expensed as of December 31, 2006. The cash portion of the award is being expensed over a five-year period. In addition, the Company's Board of Directors and the Compensation Committee of the Board of Directors approved the new performance targets for the 2007-2009 plan years. The Company commenced accruing for the LTIP payout for the 2007-2009 plan years as of March 31, 2007.

At March 31, 2007, the Company had \$847,000 and \$65,000 accrued for the cash and stock award, respectively, for a total accrual of \$912,000 under the LTIP. Of the \$912,000 accrued for the LTIP, \$782,000 relates to the cash portion accrued for the 2004-2006 plan years under the LTIP. As previously indicated, the stock portion for the 2004-2006 plan years was fully expensed as of December 31, 2006. At December 31, 2006, the Company had \$1.4 million and \$2.5 million accrued for the cash and stock award, respectively, for a total accrual of

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

\$2.5 million under the LTIP. Accordingly, the Company included 9,266 and 423,340 in diluted earnings per share for the three months ended March 31, 2007 and 2006, respectively.

Deferred Compensation Plan

In 2006, the Company adopted an Executive Nonqualified Excess Plan (the Excess Plan). The Excess Plan is intended to be a nonqualified deferred compensation plan that will comply with the provisions of Section 409A of the Internal Revenue Code. The Company adopted the Excess Plan to provide a means by which certain key management employees may elect to defer receipt of current compensation from the Company in order to provide retirement and other benefits, as provided for in the Excess Plan. In accordance with the Excess Plan, the assets of the Excess Plan are held in a rabbi trust. The Excess Plan is intended to be an unfunded plan maintained primarily for the purpose of providing deferred compensation benefits for eligible employees. At March 31, 2007, the Company had \$440,000 accrued for deferred compensation.

NOTE 3 Reinsurance

The Insurance Company Subsidiaries cede insurance to reinsurers under pro-rata and excess-of-loss contracts. These reinsurance arrangements diversify the Company's business and minimize its exposure to large losses or from hazards of an unusual nature. The ceding of insurance does not discharge the original insurer from its primary liability to its policyholder. In the event that all or any of the reinsuring companies are unable to meet their obligations, the Insurance Company Subsidiaries would be liable for such defaulted amounts. Therefore, the Company is subject to credit risk with respect to the obligations of its reinsurers. In order to minimize its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors the economic characteristics of the reinsurers on an ongoing basis. The Company also assumes insurance from other domestic insurers and reinsurers. Based upon management's evaluation, they have concluded the reinsurance agreements entered into by the Company transfer both significant timing and underwriting risk to the reinsurer and, accordingly, are accounted for as reinsurance under the provisions of SFAS No. 113 *Accounting and Reporting for Reinsurance for Short-Duration and Long-Duration Contracts*.

Intercompany pooling agreements are commonly entered into between affiliated insurance companies, so as to allow the companies to utilize the capital and surplus of all of the companies, rather than each individual company. Under pooling arrangements, companies share in the insurance business that is underwritten and allocate the combined premium, losses and related expenses between the companies within the pooling arrangement. The Insurance Company Subsidiaries utilize an Inter-Company Reinsurance Agreement (the Pooling Agreement). This Pooling Agreement includes Star, Ameritrust Insurance Corporation (Ameritrust), Savers Property and Casualty Insurance Company (Savers) and Williamsburg National Insurance Company (Williamsburg). Pursuant to the Pooling Agreement, Savers, Ameritrust and Williamsburg have agreed to cede to Star and Star has agreed to reinsure 100% of the liabilities and expenses of Savers, Ameritrust and Williamsburg, relating to all insurance and reinsurance policies issued by them. In return, Star agrees to cede and Savers, Ameritrust and Williamsburg have agreed to reinsure Star for their respective percentages of the liabilities and expenses of Star. Annually, the Company examines the Pooling Agreement for any changes to the ceded percentage for the liabilities and expenses. Any changes to the Pooling Agreement must be submitted to the applicable regulatory authorities for approval.

At March 31, 2007 and December 31, 2006, the Company had reinsurance recoverables for paid and unpaid losses of \$206.4 million and \$202.7 million, respectively. The Company manages its credit risk on reinsurance recoverables by reviewing the financial stability, A.M. Best rating, capitalization, and credit worthiness of prospective and existing

risk-sharing partners. The Company customarily collateralizes reinsurance balances due from non-admitted reinsurers through funds withheld trusts or stand-by letters of credit issued by highly rated banks. The largest unsecured reinsurance recoverable is due from an admitted reinsurer with an A A.M. Best rating and accounts for 43.8% of the total recoverable for paid and unpaid losses.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Company has historically maintained an allowance for the potential exposure to uncollectibility of certain reinsurance balances. At the end of each quarter, an analysis of these exposures is conducted to determine the potential exposure to uncollectibility. The following table sets forth the Company's exposure to uncollectible reinsurance and related allowances for the three months ending March 31, 2007 and the year ended December 31, 2006 (in thousands):

	March 31, 2007	December 31, 2006
Gross exposure	\$ 14,335	\$ 14,815
Collateral or other security	(3,347)	(3,623)
Allowance	(9,674)	(9,731)
Net exposure	\$ 1,314	\$ 1,461

While management believes the above allowances to be adequate, no assurance can be given, however, regarding the future ability of any of the Company's risk-sharing partners to meet their obligations.

The Company maintains an excess-of-loss reinsurance treaty designed to protect against large or unusual loss and loss adjustment expense activity. The Company determines the appropriate amount of reinsurance primarily based on the Company's evaluation of the risks accepted, but also considers analysis prepared by consultants and reinsurers and on market conditions including the availability and pricing of reinsurance. To date, there have been no material disputes with the Company's excess-of-loss reinsurers. No assurance can be given, however, regarding the future ability of any of the Company's excess-of-loss reinsurers to meet their obligations.

Under the workers' compensation reinsurance treaty, reinsurers are responsible for 100% of each loss in excess of \$350,000, up to \$5.0 million for each claimant, on losses occurring prior to April 1, 2005. The Company increased its retention from \$350,000 to \$750,000, for losses occurring on or after April 1, 2005 and to \$1.0 million for losses occurring on or after April 1, 2006. In addition, there is coverage for loss events involving more than one claimant up to \$50.0 million per occurrence in excess of retentions of \$1.0 million. In a loss event involving more than one claimant, the per claimant coverage is \$10.0 million in excess of retentions of \$1.0 million.

Under the core liability reinsurance treaty, the reinsurers are responsible for 100% of each loss in excess of \$350,000, up to \$2.0 million per occurrence on policies effective prior to June 1, 2005. The Company increased its retention from \$350,000 to \$500,000, for losses occurring on policies effective on or after June 1, 2005. The Company also purchased an additional \$3.0 million of reinsurance clash coverage in excess of the \$2.0 million to cover amounts that may be in excess of the \$2.0 million policy limit, such as expenses associated with the settlement of claims or awards in excess of policy limits. Reinsurance clash coverage reinsures a loss when two or more policies are involved in a common occurrence. Effective June 1, 2006, the Company purchased a \$5.0 million excess cover to support its umbrella business. This business had previously been reinsured through various semi-automatic agreements and will now be protected by one common treaty. The Company has no retention when the umbrella limit is in excess of the primary limit, but does warrant it will maintain a minimum liability of \$1.0 million if the primary limit does not respond or is exhausted.

The Company has a separate treaty to cover liability specifically related to commercial trucking, where reinsurers are responsible for 100% of each loss in excess of \$350,000, up to \$1.0 million for losses occurring prior to December 1, 2005. The Company increased its retention from \$350,000 to \$500,000 for losses occurring on or after December 1, 2005. In addition, the Company purchased an additional \$1.0 million of reinsurance clash coverage. The Company established a separate treaty to cover liability related to chemical distributors and repackagers, where reinsurers are responsible for 100% of each loss in excess of \$500,000, up to \$1.0 million, applied separately to general liability and auto liability. This treaty was terminated on a run-off basis on August 1, 2006. The exposures are covered under the core casualty treaty for policies effective August 1, 2006 and after. Additionally, the Company has a separate treaty structure to cover liability related to agricultural business. The reinsurer is responsible for 100% of each loss in excess of \$500,000, up to \$1.0 million for casualty losses and up to

Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

\$5.0 million, for property losses occurring on or after May 1, 2006. This treaty also provides an additional \$1.0 million of reinsurance clash coverage for the casualty lines.

Under the property reinsurance treaty, reinsurers are responsible for 100% of the amount of each loss in excess of \$500,000, up to \$5.0 million per location. In addition, there is coverage for loss events involving multiple locations up to \$20.0 million after the Company has incurred \$750,000 in loss.

On February 1, 2006, the Company renewed its existing reinsurance agreement that provides reinsurance coverage for policies written in the Company's public entity excess liability program. The agreement provides reinsurance coverage of \$4.0 million in excess of \$1.0 million for each occurrence in excess of the policyholder's self-insured retention.

In addition, the Company purchased \$10.0 million in excess of \$5.0 million for each occurrence, which is above the underlying \$5.0 million of coverage for the Company's public entity excess liability program. Under this agreement, reinsurers are responsible for 100% of each loss in excess of \$5.0 million for all lines, except workers' compensation, which is covered by the Company's core catastrophic workers' compensation treaty structure up to \$50.0 million per occurrence.

Additionally, certain small programs have separate reinsurance treaties in place, which limit the Company's exposure to \$350,000 or less.

Facultative reinsurance is purchased for property values in excess of \$5.0 million, casualty limits in excess of \$2.0 million, or for coverage not covered by a treaty.

NOTE 4 Debt

Lines of Credit

In November 2004, the Company entered into a revolving line of credit for up to \$25.0 million, which expires in November 2007. The Company uses the revolving line of credit to meet short-term working capital needs. Under the revolving line of credit, the Company and certain of its non-regulated subsidiaries pledged security interests in certain property and assets of the Company and named subsidiaries.

At March 31, 2007 and December 31, 2006, the Company had an outstanding balance of \$10.4 million and \$7.0 million on the revolving line of credit, respectively.

The revolving line of credit provides for interest at a variable rate based, at the Company's option, upon either a prime based rate or LIBOR-based rate. In addition, the revolving line of credit also provides for an unused facility fee. On prime based borrowings, the applicable margin ranges from 75 to 25 basis points below prime. On LIBOR-based borrowings, the applicable margin ranges from 125 to 175 basis points above LIBOR. The margin for all loans is dependent on the sum of non-regulated earnings before interest, taxes, depreciation, amortization, and non-cash impairment charges related to intangible assets for the preceding four quarters, plus dividends paid or payable to the Company from subsidiaries during such period (Adjusted EBITDA). At March 31, 2007, the weighted average interest rate for LIBOR-based borrowings outstanding was 6.6%.

Debt covenants consist of: (1) maintenance of the ratio of Adjusted EBITDA to interest expense of 2.0 to 1.0, (2) minimum net worth of \$130.0 million and increasing annually commencing June 30, 2005, by fifty percent of the

prior year's positive net income, (3) minimum A.M. Best rating of B, and (4) minimum Risk Based Capital Ratio for Star of 1.75 to 1.00. As of March 31, 2007, the Company was in compliance with these covenants.

Senior Debentures

In April 2004, the Company issued senior debentures in the amount of \$13.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.0%, which is non-deferrable. At March 31, 2007, the interest rate was 9.36%. The senior debentures are callable by the Company at par after five

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

years from the date of issuance. Associated with this transaction, the Company incurred \$390,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which are being amortized over seven years as a component of interest expense.

In May 2004, the Company issued senior debentures in the amount of \$12.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.2%, which is non-deferrable. At March 31, 2007, the interest rate was 9.56%. The senior debentures are callable by the Company at par after five years from the date of issuance. Associated with this transaction, the Company incurred \$360,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which are being amortized over seven years as a component of interest expense.

The Company contributed \$9.9 million of the proceeds to its Insurance Company Subsidiaries and the remaining proceeds were used for general corporate purposes.

Junior Subordinated Debentures

In September 2005, Meadowbrook Capital Trust II (the Trust II), an unconsolidated subsidiary trust of the Company, issued \$20.0 million of mandatorily redeemable trust preferred securities (TPS) to a trust formed by an institutional investor. Contemporaneously, the Company issued \$20.6 million in junior subordinated debentures, which includes the Company's investment in the trust of \$620,000. These debentures have financial terms similar to those of the TPS, which includes the deferral of interest payments at any time, or from time-to-time, for a period not exceeding five years, provided there is no event of default. These debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 3.58%. At March 31, 2007, the interest rate was 8.93%. These debentures are callable by the Company at par beginning in October 2010.

The Company received \$19.4 million in net proceeds, after the deduction of approximately \$600,000 of commissions paid to the placement agents in the transaction. These issuance costs have been capitalized and are included in other assets on the balance sheet, which will be amortized over seven years as a component of interest expense.

The Company contributed \$10.0 million of the proceeds from the issuance of these debentures to its Insurance Company Subsidiaries and the remaining proceeds were used for general corporate purposes.

In September 2003, Meadowbrook Capital Trust (the Trust), an unconsolidated subsidiary trust of the Company, issued \$10.0 million of mandatorily redeemable TPS to a trust formed by an institutional investor. Contemporaneously, the Company issued \$10.3 million in junior subordinated debentures, which includes the Company's investment in the trust of \$310,000. These debentures have financial terms similar to those of the TPS, which includes the deferral of interest payments at any time, or from time-to-time, for a period not exceeding five years, provided there is no event of default. These debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.05%. At March 31, 2007, the interest rate was 9.41%. These debentures are callable by the Company at par beginning in October 2008.

The Company received \$9.7 million in net proceeds, after the deduction of approximately \$300,000 of commissions paid to the placement agents in the transaction. These issuance costs have been capitalized and are included in other assets on the balance sheet, which are being amortized over seven years as a component of interest expense.

The Company contributed \$6.3 million of the proceeds from the issuance of these debentures to its Insurance Company Subsidiaries and the remaining proceeds were used for general corporate purposes.

The junior subordinated debentures are unsecured obligations of the Company and are junior to the right of payment to all senior indebtedness of the Company. The Company has guaranteed that the payments made to both Trusts will be distributed by the Trusts to the holders of the TPS.

Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

The Company estimates that the fair value of the above mentioned junior subordinated debentures and senior debentures issued approximate the gross proceeds of cash received at the time of issuance.

The seven year amortization period in regard to the issuance costs represents management's best estimate of the estimated useful life of the bonds related to both the senior debentures and junior subordinated debentures described above.

NOTE 5 Derivative Instruments

In October 2005, the Company entered into two interest rate swap transactions to mitigate its interest rate risk on \$5.0 million and \$20.0 million of the Company's senior debentures and trust preferred securities, respectively. The Company accrues for these transactions in accordance with SFAS No. 133 *Accounting for Derivative Instruments and Hedging Activities*, as subsequently amended. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges under SFAS No. 133. In accordance with SFAS No. 133, these interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is being accrued and is recognized as an adjustment to interest expense.

The first interest rate swap transaction, which relates to \$5.0 million of the Company's \$12.0 million issuance of senior debentures, has an effective date of October 6, 2005 and ending date of May 24, 2009. The Company is required to make certain quarterly fixed rate payments calculated on a notional amount of \$5.0 million, non-amortizing, based on a fixed annual interest rate of 8.925%. The counterparty is obligated to make quarterly floating rate payments to the Company, referencing the same notional amount, based on the three-month LIBOR, plus 4.20%.

The second interest rate swap transaction, which relates to \$20.0 million of the Company's \$20.0 million issuance of trust preferred securities, has an effective date of October 6, 2005 and ending date of September 16, 2010. The Company is required to make quarterly fixed rate payments calculated on a notional amount of \$20.0 million, non-amortizing, based on a fixed annual interest rate of 8.34%. The counterparty is obligated to make quarterly floating rate payments to the Company, referencing the same notional amount, based on the three-month LIBOR, plus 3.58%.

In relation to the above interest rate swaps, the net interest income received for the three months ended March 31, 2007, was approximately \$38,000. The net interest expense incurred for the three months ended March 31, 2006, was approximately \$18,000. The total fair value of the interest rate swaps as of March 31, 2007 and December 31, 2006, was approximately \$83,000 and \$200,000, respectively. Accumulated other comprehensive income at March 31, 2007 and December 31, 2006, included the accumulated income on the cash flow hedge, net of taxes, of \$54,000 and \$130,000, respectively.

In July 2005, the Company made a \$2.5 million loan, at an effective interest rate equal to the three-month LIBOR, plus 5.2%, to an unaffiliated insurance agency. In December 2005, the Company loaned an additional \$3.5 million to the same agency. The original \$2.5 million demand note was replaced with a \$6.0 million convertible note. The effective interest rate of the convertible note is equal to the three-month LIBOR, plus 5.2% and is due December 20, 2010. This agency has been a producer for the Company for over ten years. As security for the loan, the borrower granted the Company a security interest in its accounts, cash, general intangibles, and other intangible property. Also, the shareholder then pledged 100% of the common shares of three insurance agencies, the common shares owned by

the shareholder in another agency, and has executed a personal guaranty. This note is convertible at the option of the Company based upon a pre-determined formula, beginning in 2007. The conversion feature of this note is considered an embedded derivative pursuant to SFAS No. 133, and therefore is accounted for separately from the note. At March 31, 2007, the estimated fair value of the derivative was not material to the financial statements.

Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

NOTE 6 Shareholders Equity

At March 31, 2007, shareholders' equity was \$207.4 million, or a book value of \$7.02 per common share, compared to \$201.7 million, or a book value of \$6.93 per common share, at December 31, 2006.

In October 2005, the Company's Board of Directors authorized management to purchase up to 1,000,000 shares of its common stock in market transactions for a period not to exceed twenty-four months. For the three months ended March 31, 2007 and for the year ended December 31, 2006, the Company did not repurchase any common stock. As of March 31, 2007, the cumulative amount the Company repurchased and retired under the current share repurchase plan was 63,000 shares of common stock for a total cost of approximately \$372,000. As of March 31, 2007, the Company has available up to 937,000 shares remaining to be purchased.

On February 8, 2007, the Company's Board of Directors and the Compensation Committee of the Board of Directors approved the distribution of the Company's LTIP award for the 2004-2006 plan years, which included both a cash and stock award. The stock portion of the LTIP award was valued at \$2.5 million, which resulted in the issuance of 579,496 shares of the Company's common stock. Of the 579,496 shares issued, 191,570 shares were retired for payment of the participant's associated withholding taxes related to the compensation recognized by the participant. Refer to Note 2 *Stock Options, Long Term Incentive Plan, and Deferred Compensation Plan* for further detail. The retirement of the shares for the associated withholding taxes reduced the Company's paid in capital by \$1.8 million.

NOTE 7 Regulatory Matters and Rating Agencies

A significant portion of the Company's consolidated assets represent assets of its Insurance Company Subsidiaries. The State of Michigan Office of Financial and Insurance Services (OFIS) restricts the amount of funds that may be transferred to the Company in the form of dividends, loans or advances. These restrictions in general, are as follows: the maximum discretionary dividend that may be declared, based on data from the preceding calendar year, is the greater of each insurance company's net income (excluding realized capital gains) or ten percent of the insurance company's surplus (excluding unrealized gains). These dividends are further limited by a clause in the Michigan law that prohibits an insurer from declaring dividends except out of surplus earnings of the company. Earned surplus balances are calculated on a quarterly basis. Since Star is the parent insurance company, its maximum dividend calculation represents the combined Insurance Company Subsidiaries' surplus. At March 31, 2007, Star's earned surplus position was positive \$22.7 million. At December 31, 2006, Star had positive earned surplus of \$13.2 million. Based upon the March 31, 2007, statutory financial statements, Star may pay a dividend of up to \$22.7 million without the prior approval of OFIS. No statutory dividends were paid during 2006 or during the three months ended March 31, 2007.

Insurance operations are subject to various leverage tests (e.g. premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. The Company's targets for gross and net written premium to statutory surplus are 2.8 to 1.0 and 2.25 to 1.0, respectively. As of March 31, 2007, on a statutory combined basis, the gross and net premium leverage ratios were 2.0 to 1.0 and 1.6 to 1.0, respectively.

The National Association of Insurance Commissioners (NAIC) has adopted a risk-based capital (RBC) formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus

for the purpose of initiating regulatory action. In general, an insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

At December 31, 2006, all of the Insurance Company Subsidiaries were in compliance with RBC requirements. Star reported statutory surplus of \$165.1 million at December 31, 2006, compared to the threshold requiring the minimum regulatory involvement of \$63.1 million in 2006. At March 31, 2007, Star's statutory surplus was \$168.5 million.

NOTE 8 Segment Information

The Company defines its operations as specialty risk management operations and agency operations based upon differences in products and services. The separate financial information of these segments is consistent with the way results are regularly evaluated by management in deciding how to allocate resources and in assessing performance. Intersegment revenue is eliminated upon consolidation. It would be impracticable for the Company to determine the allocation of assets between the two segments.

Specialty Risk Management Operations

The specialty risk management operations segment focuses on specialty or niche insurance business in which it provides various services and coverages tailored to meet specific requirements of defined client groups and their members. These services include risk management consulting, claims administration and handling, loss control and prevention, and reinsurance placement, along with various types of property and casualty insurance coverage, including workers' compensation, commercial multiple peril, general liability, commercial auto liability, and inland marine. Insurance coverage is provided primarily to associations or similar groups of members and to specified classes of business of the Company's agent-partners. The Company recognizes revenue related to the services and coverages the specialty risk management operations provides within seven categories: net earned premiums, management fees, claims fees, loss control fees, reinsurance placement, investment income, and net realized gains (losses).

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)*****Agency Operations***

The Company earns commissions through the operation of its retail property and casualty insurance agencies located in Michigan, California, and Florida. The agency operations produce commercial, personal lines, life, and accident and health insurance, for more than fifty unaffiliated insurance carriers. The agency produces an immaterial amount of business for its affiliated Insurance Company Subsidiaries.

The following table sets forth the segment results (in thousands):

	For the Three Months Ended March 31,	
	2007	2006
Revenues		
Net earned premiums	\$ 65,204	\$ 63,124
Management fees	4,875	4,531
Claims fees	2,204	2,100
Loss control fees	599	538
Reinsurance placement	333	418
Investment income	5,930	5,030
Net realized losses	(6)	(7)
Specialty risk management	79,139	75,734
Agency operations	3,885	4,261
Miscellaneous income(2)	226	209
Intersegment revenue	(345)	(559)
Consolidated revenue	\$ 82,905	\$ 79,645
Pre-tax income:		
Specialty risk management	\$ 11,253	\$ 9,298
Agency operations(1)	1,294	1,651
Non-allocated expenses	(2,488)	(2,486)
Consolidated pre-tax income	\$ 10,059	\$ 8,463

- (1) The Company's agency operations include an allocation of corporate overhead, which includes expenses associated with accounting, information services, legal, and other corporate services. The corporate overhead allocation excludes those expenses specific to the holding company. For the three months ended March 31, 2007 and 2006, the allocation of corporate overhead to the agency operations segment was \$719,000 and \$825,000, respectively.

- (2) The miscellaneous income included in the revenue relates to miscellaneous interest income within the holding company.

The following table sets forth the non-allocated expenses included in pre-tax income (in thousands):

	For the Three Months Ended March 31,	
	2007	2006
Holding company expenses	\$ (856)	\$ (933)
Amortization	(144)	(165)
Interest expense	(1,488)	(1,388)
	\$ (2,488)	\$ (2,486)

NOTE 9 Income Taxes

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting and reporting for uncertain tax positions. This interpretation prescribes a recognition threshold and measurement attribute for the

Table of Contents

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)**

financial statement recognition, measurement, and presentation of uncertain tax positions taken or expected to be taken in an income tax return. The Company adopted the provisions of FIN 48 as of January 1, 2007.

As a result of the adoption of FIN 48, the Company identified, evaluated and measured the amount of income tax benefits to be recognized for all income tax positions. The net tax assets recognized under FIN 48 did not differ from the net tax assets recognized prior to adoption, and, therefore, the Company did not record an adjustment.

Interest costs and penalties related to income taxes are classified as interest expense and other administrative expenses, respectively. As of March 31, 2007 and December 31, 2006, the Company had no amounts of accrued interest or penalties related to uncertain tax positions.

The Company and its subsidiaries are subject to U.S. federal income tax as well as to income tax of multiple state jurisdictions. Tax returns for all years after 2002 are subject to future examination by tax authorities.

NOTE 10 Commitments and Contingencies

The Company, and its subsidiaries, are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by errors and omissions insurance or other appropriate insurance. In terms of deductibles associated with such insurance, the Company has established provisions against these items, which are believed to be adequate in light of current information and legal advice. In accordance with SFAS No. 5, *Accounting for Contingencies*, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is estimable; an accrual for the costs to resolve these claims is recorded by the Company in its consolidated balance sheets. Period expenses related to the defense of such claims are included in other operating expenses in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not expect the outcome of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate, will have a material adverse effect on the Company's financial condition. However, it is possible that future results of operations or cash flows for any particular quarter or annual period could be materially affected by an unfavorable resolution of any such matters.

NOTE 11 Subsequent Events

On April 3, 2007, the Company announced an upgrade of its financial strength rating by A.M. Best Company to A- (Excellent), from B++ (Very Good) for its Insurance Company Subsidiaries.

On April 10, 2007, the Company executed an amendment to its current revolving credit agreement with its bank. The amendments included an extension of the term to September 30, 2010, an increase to the available borrowings up to \$35.0 million, and a reduction of the variable interest rate basis to a range between 75 to 175 basis points above LIBOR.

On April 16, 2007, the Company entered into an Asset Purchase Agreement (Agreement) to acquire U.S. Specialty Underwriters, Inc. (USSU) for a purchase price of \$23.0 million. The Company simultaneously closed on the acquisition on the same date. The purchase price was comprised of \$13.0 million in cash and \$10.0 million in the Company s common stock. The total shares issued for the \$10.0 million portion of the purchase price was 907,935 shares. Under the terms of the Agreement, the Company acquired the excess workers compensation business and other related assets. USSU is based in Cleveland, Ohio, and is a specialty program manager that produces fee based income by underwriting excess workers compensation coverage for a select group of insurance companies.

ITEM 2
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the Quarters ended March 31, 2007 and 2006

Forward-Looking Statements

This quarterly report may provide information including certain statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These include statements regarding the intent, belief, or current expectations of management, including, but not limited to, those statements that use the words believes, expects, anticipates, estimates, or similar expressions. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, and results could differ materially from those indicated by such forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: the frequency and severity of claims; uncertainties inherent in reserve estimates; catastrophic events; a change in the demand for, pricing of, availability or collectibility of reinsurance; increased rate pressure on premiums; obtainment of certain rate increases in current market conditions; investment rate of return; changes in and adherence to insurance regulation; actions taken by regulators, rating agencies or lenders; obtainment of certain processing efficiencies; changing rates of inflation; general economic conditions and other risks identified in our reports and registration statements filed with the Securities and Exchange Commission. We are not under any obligation to (and expressly disclaim any such obligation to) update or alter our forward-looking statements whether as a result of new information, future events or otherwise.

Description of Business

We are a publicly traded specialty risk management company, with an emphasis on alternative market insurance and risk management solutions for agents, professional and trade associations, and small to medium-sized insureds. The alternative market includes a wide range of approaches to financing and managing risk exposures, such as captives, rent-a-captives, risk retention and risk purchasing groups, governmental pools and trusts, and self-insurance plans. The alternative market developed as a result of the historical volatility in the cost and availability of traditional commercial insurance coverages, and usually involves some form of self-insurance or risk-sharing on the part of the client. We develop and manage alternative risk management programs for defined client groups and their members. We also operate as an insurance agency representing unaffiliated insurance companies in placing insurance coverages for policyholders. We define our business segments as specialty risk management operations and agency operations.

Critical Accounting Estimates

In certain circumstances, we are required to make estimates and assumptions that affect amounts reported in our consolidated financial statements and related footnotes. We evaluate these estimates and assumptions on an on-going basis based on a variety of factors. There can be no assurance, however, that actual results will not be materially different than our estimates and assumptions, and that reported results of operation will not be affected by accounting adjustments needed to reflect changes in these estimates and assumptions. The accounting estimates and related risks described in our annual report on Form 10-K as filed with the United States Securities and Exchange Commission on March 13, 2007, are those that we consider to be our critical accounting estimates. As of the three months ended March 31, 2007, there have been no material changes in regard to any of our critical accounting estimates.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2007 AND 2006

Executive Overview

For the first quarter of 2007, we again experienced an improvement in our overall results in comparison to prior year. This improvement continues to reflect our selective growth, as well as our adherence to strict corporate

Table of Contents

underwriting guidelines and price adequacy. We continue to be committed to strong underwriting discipline and growth within our profitable programs. Our generally accepted accounting principles (GAAP) combined ratio for the first quarter of 2007, remained relatively consistent in comparison to 2006 at 96.3%. We continue to experience solid growth in our fee-based operations. Our earnings before interest, depreciation, and amortization within our non-regulated subsidiaries increased \$538,000 in the first quarter of 2007, in comparison to the same period in 2006.

Gross written premium was relatively flat for the first quarter of 2007 in comparison to 2006. Our existing underwritten business was up \$4.5 million growth, or 5.4%. This growth included business from new programs implemented in 2006. The growth in existing business was slightly offset by a reduction in residual market premiums that are assigned to us as a result of a decrease in the estimate of the overall size of the residual market. We continue to follow pricing guidelines mandated by our corporate underwriting guidelines. Overall, our first quarter rate change was relatively flat. We anticipate rates to remain relatively stable in 2007. We continue to be selective on new program implementation by focusing only on those programs that meet our underwriting guidelines and have a proven history of profitability.

In April 2007, we announced the upgrade of our financial strength rating by A.M. Best Company to A- (Excellent), from B++ (Very Good) for our insurance company subsidiaries. We have worked diligently towards achieving this upgrade and are very pleased with the decision. This rating upgrade validates our commitment to create value through excellent underwriting and consistent operating performance. We are well positioned to attract additional solid underwriting prospects from new and existing insurance programs and should realize significant cost savings in the future.

Results of Operations

Net income for the three months ended March 31, 2007, was \$6.9 million, or \$0.23 per dilutive share, compared to net income of \$5.6 million, or \$0.19 per dilutive share, for the comparable period of 2006. This improvement primarily reflects prior accident reserve redundancies, as well as our selective growth consistent with our corporate underwriting guidelines and our controls over price adequacy. This improvement was also attributable to an increase in net investment income in comparison to 2006 as a result of favorable prior year cash flows. These improvements were partially offset by an increase in our expense ratio, primarily associated with a decrease in ceding commissions.

Revenues for the three months ended March 31, 2007, increased \$3.3 million, or 4.1%, to \$82.9 million, from \$79.6 million for the comparable period in 2006. This increase reflects a \$2.1 million, or 3.3%, increase in net earned premiums. The increase in net earned premiums is the result of selective growth consistent with our corporate underwriting guidelines and our controls over price adequacy, partially offset by a reduction in residual market premiums that are assigned to us as a result of a decrease in the estimate of the overall size of the residual market. We experienced slight revenue growth within our fee-for-service programs and agency operations, which increased \$262,000, or 2.3%, in comparison to the first quarter of 2006. In addition, the increase in revenue reflects a \$917,000 increase in investment income, primarily the result of an increase in average invested assets due to positive cash flow and a slight increase in yield.

Table of Contents**Specialty Risk Management Operations**

The following table sets forth the revenues and results from operations for specialty risk management operations (in thousands):

	For the Three Months Ended March 31,	
	2007	2006
Revenue:		
Net earned premiums	\$ 65,204	\$ 63,124
Management fees	4,875	4,531
Claims fees	2,204	2,100
Loss control fees	599	538
Reinsurance placement	333	418
Investment income	5,930	5,030
Net realized losses	(6)	(7)
Total revenue	\$ 79,139	\$ 75,734
Pre-tax income		
Specialty risk management operations	\$ 11,253	\$ 9,298

Revenues from specialty risk management operations increased \$3.4 million, or 4.5%, to \$79.1 million for the three months ended March 31, 2007 from \$75.7 million for the comparable period in 2006.

Net earned premiums increased \$2.1 million, or 3.3%, to \$65.2 million for the three months ended March 31, 2007, from \$63.1 million in the comparable period in 2006. As previously indicated, this increase is the result of selective growth consistent with our corporate underwriting guidelines and our controls over price adequacy, partially offset by the previously mention reduction in residual market premiums.

Management fees increased \$344,000, or 7.6%, to \$4.9 million for the three months ended March 31, 2007, from \$4.5 million for the comparable period in 2006. This increase is primarily the result of the recognition of \$250,000 in profit sharing revenue received related to a specific managed program.

Claim fees increased \$104,000, or 5.0%, to \$2.2 million, from \$2.1 million for the comparable period in 2006. This increase is primarily the result of our 2006 entry into the self-insured workers compensation market in Nevada.

Net investment income increased \$900,000, or 17.9%, to \$5.9 million in 2007, from \$5.0 million in 2006. Average invested assets increased \$76.3 million, or 16.4%, to \$540.3 million in 2007, from \$464.0 million in 2006. The increase in average invested assets reflects cash flows from continued favorable underwriting results and an increase in the duration of our reserves. The increase in the duration of our reserves reflects the impact of growth in our excess liability business, which was implemented at the end of 2003. This type of business has a longer duration than the average reserves on our other programs and is now a larger proportion of reserves. The average investment yield for March 31, 2007, was 4.56%, compared to 4.52% for the comparable period in 2006. The current pre-tax book yield was 4.36%. The current after-tax book yield was 3.34%, compared to 3.15% in 2006. This increase is primarily the result of the shift in our investment portfolio to tax-exempt investments. The duration of the investment portfolio is

4.0 years.

Specialty risk management operations generated pre-tax income of \$11.3 million for the three months ended March 31, 2007, compared to pre-tax income of \$9.3 million for the comparable period in 2006. This increase in pre-tax income demonstrates a continued improvement in underwriting results as a result of prior accident reserve redundancies, our selective growth in premium, adherence to our strict underwriting guidelines, and our continued focus on process improvements through technology and training. In addition, this improvement was also attributable to an increase in net investment income. These improvements were partially offset by an increase in our expense ratio. The GAAP combined ratio was 96.3% for the three months ended March 31, 2007, compared to 96.2% for the same period in 2006.

Table of Contents

Net loss and loss adjustment expenses (LAE) decreased \$397,000, to \$36.6 million for the three months ended March 31, 2007, from \$37.0 million for the same period in 2006. Our loss and LAE ratio improved 2.4 percentage points to 61.3% for the three months ended March 31, 2007, from 63.7% for the same period in 2006. This ratio is the unconsolidated net loss and LAE in relation to net earned premiums. The accident year loss ratio for the three months ended March 31, 2007 was 64.7%, compared to 63.9% for the same period in 2006. The increase in accident year loss and LAE ratio primarily reflects the anticipated impact of a slightly more competitive insurance market. The calendar year loss and LAE ratio of 61.3% includes favorable development of \$2.2 million, or 3.4 percentage points. This favorable development primarily reflects favorable claim settlements in the professional liability and workers compensation lines of business. Offsetting these improvements was unfavorable development within the general liability and auto liability lines of business. The unfavorable development within the general liability line of business reflects greater than expected claim activity within an excess liability program. The unfavorable development within the auto liability line of business was primarily the result of unexpected case reserve increases within our California-based energy program. Additional discussion of our reserve activity is described below within the *Other Items Reserves* section.

Our expense ratio increased 2.5 percentage points to 35.0% for the three months ended March 31, 2007, from 32.5% for the same period in 2006. This ratio is the unconsolidated policy acquisition and other underwriting expenses in relation to net earned premiums. This increase within our expense ratio is primarily the result of a decrease in ceding commissions. The decrease in ceding commissions is the result of a decrease in premiums and the consequent decrease in net fees received from one specific program in which we assume limited risk. For financial reporting purposes, these fees are included in a ceding commission and are treated as a reduction in underwriting expenses. In addition, the expense ratio for the first quarter of 2006 had reflected a reduction in certain insurance related assessments.

Agency Operations

The following table sets forth the revenues and results from operations from our agency operations (in thousands):

	For the Three Months Ended March 31,	
	2007	2006
Net commission	\$ 3,885	\$ 4,261
Pre-tax income(1)	\$ 1,294	\$ 1,651

- (1) Our agency operations include an allocation of corporate overhead, which includes expenses associated with accounting, information services, legal, and other corporate services. The corporate overhead allocation excludes those expenses specific to the holding company. For the three months ended March 31, 2007 and 2006, the allocation of corporate overhead to the agency operations segment was \$719,000 and \$825,000, respectively.

Revenue from agency operations, which consists primarily of agency commission revenue, decreased \$376,000, or 8.8%, to \$3.9 million for the three months ended March 31, 2007, from \$4.3 million for the comparable period in 2006. This decrease is primarily the result of a reduction in premium on client renewals due to a more competitive pricing environment primarily on our larger Michigan accounts.

Agency operations generated pre-tax income, after the allocation of corporate overhead, of \$1.3 million for the three months ended March 31, 2007, compared to \$1.7 million for the comparable period in 2006. The decrease in the pre-tax income is primarily attributable to the decrease in agency commission revenue mentioned above.

Table of Contents**Other Items*****Reserves***

At March 31, 2007, our best estimate for the ultimate liability for loss and LAE reserves, net of reinsurance recoverables, was \$313.0 million. We established a reasonable range of reserves of approximately \$291.0 million to \$333.0 million. This range was established primarily by considering the various indications derived from standard actuarial techniques and other appropriate reserve considerations. The following table sets forth this range by line of business (in thousands):

Line of Business	Minimum Reserve Range	Maximum Reserve Range	Selected Reserves
Workers Compensation(1)	\$ 154,090	\$ 170,364	\$ 163,590
Commercial Multiple Peril/General Liability	62,837	76,526	69,032
Commercial Automobile	56,122	63,564	59,983
Other	17,992	22,506	20,349
Total Net Reserves	\$ 291,041	\$ 332,960	\$ 312,954

(1) Includes Residual Markets

Reserves are reviewed by internal and independent actuaries for adequacy on a quarterly basis. When reviewing reserves, we analyze historical data and estimate the impact of numerous factors such as (1) per claim information; (2) industry and our historical loss experience; (3) legislative enactments, judicial decisions, legal developments in the imposition of damages, and changes in political attitudes; and (4) trends in general economic conditions, including the effects of inflation. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves, because the eventual deficiency or redundancy is affected by multiple factors.

The key assumptions used in our selection of ultimate reserves included the underlying actuarial methodologies, a review of current pricing and underwriting initiatives, an evaluation of reinsurance costs and retention levels, and a detailed claims analysis with an emphasis on how aggressive claims handling may be impacting the paid and incurred loss data trends embedded in the traditional actuarial methods. With respect to the ultimate estimates for losses and LAE, the key assumptions remained consistent for the three months ended March 31, 2007 and the year ended December 31, 2006.

Table of Contents

For the three months ended March 31, 2007, we reported a decrease in net ultimate loss estimates for accident years 2006 and prior of \$2.2 million, or 0.7% of \$302.7 million of net loss and LAE reserves at December 31, 2006. The decrease in net ultimate loss estimates reflected revisions in the estimated reserves as a result of actual claims activity in calendar year 2007 that differed from the projected activity. There were no significant changes in the key assumptions utilized in the analysis and calculations of our reserves during 2006 and for the three months ended March 31, 2007. The major components of this change in ultimate loss estimates are as follows (in thousands):

Line of Business	Reserves at December 31,	Incurred Losses			Paid Losses			Reserves at March 31,
	2006	Current Year	Prior Years	Total Incurred	Current Year	Prior Years	Total Paid	2007
Workers Compensation	\$ 137,113	\$ 14,200	\$ (2,759)	\$ 11,441	\$ (655)	\$ 11,162	\$ 10,507	\$ 138,047
Residual Markets	26,098	2,693	(1,515)	1,178	1,479	254	1,733	25,543
Commercial Multiple Peril/General Liability	63,056	6,662	3,103	9,765	(217)	4,006	3,789	69,032
Commercial Automobile	54,642	11,312	954	12,266	722	6,203	6,925	59,983
Other	21,746	4,009	(2,013)	1,996	243	3,150	3,393	20,349
Net Reserves	302,655	\$ 38,876	\$ (2,230)	\$ 36,646	\$ 1,572	\$ 24,775	\$ 26,347	312,954
Reinsurance Recoverable	198,422							201,879
Consolidated	\$ 501,077							\$ 514,833

Line of Business	Reserves at December 31, 2006	Re-Estimated Reserves at March 31, 2007 on Prior Years	Development as a Percentage of Prior Year Reserves
Workers Compensation	\$ 137,113	\$ 134,354	(2.0)%
Commercial Multiple Peril/General Liability	63,056	66,159	4.9%
Commercial Automobile	54,642	55,596	1.7%
Other	21,746	19,733	(9.3)%
Sub-total	276,557	275,842	(0.3)%
Residual Markets	26,098	24,583	(5.8)%
Total Net Reserves	\$ 302,655	\$ 300,425	(0.7)%

Workers Compensation Excluding Residual Markets

The projected net ultimate loss estimate for the workers compensation line of business excluding residual markets decreased \$2.8 million, or 2.0% of net workers compensation reserves. This net overall decrease reflects decreases of \$1.0 million and \$691,000 in accident years 2005 and 2004, respectively. These decreases reflect better than expected experience for many of our workers compensation programs, including a Nevada, Florida, Tennessee, and Alabama program. Average severity on reported claims did not increase as much as anticipated in the prior actuarial projections and, therefore, ultimate loss estimates were reduced. The change in ultimate loss estimates for all other accident years was insignificant.

Commercial Multiple Peril and General Liability

The commercial multiple peril line and general liability line of business had an increase in net ultimate loss estimates of \$3.1 million, or 4.9% of net commercial multiple peril and general liability reserves. The net increase reflects increases of \$355,000, \$2.4 million, and \$229,000 in the ultimate loss estimates for accident years 2005, 2004 and 2000, which were primarily due to larger than expected claim emergence in a Florida-based program. This emergence reflects greater than expected claim activity within the excess liability program. The change in ultimate loss estimates for all other accident years was insignificant.

Table of Contents

Commercial Automobile

The projected net ultimate loss estimate for the commercial automobile line of business increased \$954,000, or 1.7% of net commercial automobile reserves. This net overall increase reflects increases of \$602,000 and \$1.4 million in accident years 2005 and 2004, respectively. These increases primarily reflect higher than expected emergence of claim activity in four California-based programs. These increases were offset by decreases of \$662,000 and \$231,000 in accident years 2006 and 2003, respectively. Three of the four California programs mentioned above contributed to these decreases. The change in ultimate loss estimates for all other accident years was insignificant.

Other

The projected net ultimate loss estimate for the other lines of business decreased \$2.0 million, or 9.3% of net reserves. This net decrease reflects decreases of \$334,000, \$957,000, and \$425,000, in the net ultimate loss estimate for accident years 2006, 2005, and 2004, respectively. These decreases were due to better than expected case reserve development during the calendar year in a medical malpractice program. The change in ultimate loss estimates for all other accident years was insignificant.

Residual Markets

The workers' compensation residual market line of business had a decrease in net ultimate loss estimates of \$1.5 million, or 5.8% of net reserves. This decrease reflects reductions of \$1.4 million and \$946,000 in accident years 2005 and 2004, respectively. Offsetting these decreases was an increase of \$803,000 in accident year 2006. We record loss reserves as reported by the National Council on Compensation Insurance (NCCI), plus a provision for the reserves incurred but not yet analyzed and reported to us due to a two quarter lag in reporting. These changes reflect a difference between our estimate of the lag incurred but not reported and the amounts reported by the NCCI in the quarter. The change in ultimate loss estimates for all other accident years was insignificant.

Salary and Employee Benefits and Other Administrative Expenses

Salary and employee benefits for the three months ended March 31, 2007, increased \$164,000, or 1.2%, to \$13.5 million, from \$13.4 million for the comparable period in 2006. This increase primarily reflects a slight increase in staffing levels in comparison to 2006, partially offset by a decrease in variable compensation. The decrease in variable compensation reflects the increase in our targeted return on equity.

Other administrative expenses decreased \$422,000, or 5.3%, to \$7.5 million, from \$7.9 million for the comparable period in 2006. This decrease in other administrative expenses is primarily related to a decrease in policyholder dividends. In addition, there were various decreases in other general operating expenses in comparison to 2006.

Salary and employee benefits and other administrative expenses include both corporate overhead and the holding company expenses included in the non-allocated expenses of our segment information.

Interest Expense

Interest expense remained relatively consistent in comparison to 2006. Interest expense for the three months ended March 31, 2007, increased \$100,000, or 7.2%, to \$1.5 million, from \$1.4 million for the comparable period in 2006. Interest expense is primarily attributable to our debentures, which are described within the *Liquidity and Capital Resources* section of Management's Discussion and Analysis, as well as our line of credit. The average outstanding balance on our line of credit during the three months ending March 31, 2007, was \$9.6 million, compared to

\$8.3 million for the same period in 2006. The average interest rate, excluding the debentures, was approximately 6.7% in 2007, compared to 6.2% in 2006.

Table of Contents**Income Taxes**

Income tax expense, which includes both federal and state taxes, for the three months ended March 31, 2007, was \$3.1 million, or 31.3% of income before taxes. For the same period last year, we reflected an income tax expense of \$2.8 million, or 33.6% of income before taxes. The decrease in our tax rate from 2006 to 2007 primarily reflects a higher level of tax exempt securities in our investment portfolio, slightly offset by a higher level of income within our fee-based operations, which are taxed at a 35% rate. Our tax exempt securities as a percentage of total invested assets were 45.3% and 36.8% at March 31, 2007 and 2006, respectively.

Other Than Temporary Impairments

Our policy for the valuation of temporarily impaired securities is to determine impairment based on analysis of the following factors: (1) rating downgrade or other credit event (e.g., failure to pay interest when due); (2) financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology or discontinuance of a business segment; (3) prospects for the issuer's industry segment; and (4) our intent and ability to retain the investment for a period of time sufficient to allow for anticipated recovery in market value. We evaluate our investments in securities to determine other than temporary impairment, no less than quarterly. Investments that are deemed other than temporarily impaired are written down to their estimated net fair value and the related losses recognized in operations.

At March 31, 2007, we had 289 securities that were in an unrealized loss position. These investments all had unrealized losses of less than ten percent. At March 31, 2007, 194 of those investments, with an aggregate \$192.3 million and \$3.8 million fair value and unrealized loss, respectively, have been in an unrealized loss position for more than eighteen months. Positive evidence considered in reaching our conclusion that the investments in an unrealized loss position are not other than temporarily impaired consisted of: 1) there were no specific events which caused concerns; 2) there were no past due interest payments; 3) there has been a rise in market prices; 4) our ability and intent to retain the investment for a sufficient amount of time to allow an anticipated recovery in value; and 5) changes in market value were considered normal in relation to overall fluctuations in interest rates.

The fair value and amount of unrealized losses segregated by the time period the investment has been in an unrealized loss position is as follows (in thousands):

	March 31, 2007					
	Less than 12 months		Greater than 12 months		Total	
	Fair Value	Gross	Fair Value	Gross	Fair Value	Gross
	of	Unrealized	of	Unrealized	of	Unrealized
	Investments	Losses	Investments	Losses	Investments	Losses
	with	Losses	with	Losses	with	Losses
	Unrealized	Losses	Unrealized	Losses	Unrealized	Losses
	Losses	Losses	Losses	Losses	Losses	Losses

As of March 31, 2007, gross unrealized gains and (losses) on securities were \$3.5 million and (\$4.4 million), respectively. As of December 31, 2006, gross unrealized gains and (losses) on securities were \$3.6 million and (\$5.1 million), respectively.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

Our principal sources of funds, which include both regulated and non-regulated cash flows, are insurance premiums, investment income, proceeds from the maturity and sale of invested assets, risk management fees, and agency commissions. Funds are primarily used for the payment of claims, commissions, salaries and employee benefits, other operating expenses, shareholders' dividends, share repurchases, and debt service. Our regulated sources of funds are insurance premiums, investment income, and proceeds from the maturity and sale of invested assets. These regulated funds are used for the payment of claims, policy acquisition and other underwriting expenses, and taxes relating to the regulated portion of net income. Our non-regulated sources of funds are in the form of commission revenue, outside management fees, and intercompany management fees. Our capital resources include both non-regulated cash flow and excess capital in our Insurance Company Subsidiaries, which is defined as the dividend Star may issue without prior approval from our regulators. We review the excess capital in aggregate to determine the use of such capital. The general uses are as follows, contributions to our Insurance Company Subsidiaries to support premium growth, make select acquisitions, service debt, pay shareholders' dividends, repurchase shares, investments in technology, or other expenses of the holding company. The following table illustrates net income, excluding interest, depreciation, and amortization, between our regulated and non-regulated subsidiaries, which reconciles to our consolidated statement of income and statement of cash flows (in thousands):

	For the Three Months Ended March 31,	
	2007	2006
Net income	\$ 6,923	\$ 5,625
Regulated Subsidiaries:		
Net income, excluding interest, depreciation, and amortization	\$ 5,616	\$ 4,583
Adjustments to reconcile net income to net cash provided by operating activities	441	334
Changes in operating assets and liabilities	11,283	7,956
Total adjustments	11,724	8,290
Net cash provided by operating activities	\$ 17,340	\$ 12,873

Consolidated cash flow provided by operations for the three months ended March 31, 2007, was \$17.2 million, compared to consolidated cash flow provided by operations of \$13.1 million for the comparable period in 2006.

Table of Contents

Regulated subsidiaries cash flow provided by operations for the three months ended March 31, 2007, was \$17.3 million, compared to \$12.9 million for the comparable period in 2006. This increase is primarily the result of growth in our underwritten business, a reduction in paid losses as a result of improved claim activity, and an increase in investment income as a result of growth in our investment portfolio. Partially offsetting these improvements was an increase in payments related to policy acquisition costs.

Non-regulated subsidiaries cash flow used in operations for the three months ended March 31, 2007, was \$188,000, compared to cash flow provided by operations of \$199,000 for the comparable period in 2006. The decrease in cash flow from operations is primarily the result of variable compensation payments related to our long-term incentive plan, which were made in the first quarter of 2007 and related to 2006 performance and profitability. This decrease was partially offset by a slight increase in fee-based revenues.

We continue to anticipate a temporary increase in cash outflows related to our investments in technology as we enhance our operating systems and controls. We believe these temporary increases will not affect our liquidity, debt covenants, or other key financial measures.

Other Items***Long-term Debt***

The following table summarizes the principal amounts and variables associated with our long-term debt (in thousands):

Year of Issuance	Description	Year Callable	Year Due	Interest Rate Terms	Interest	
					Rate at 03/31/07	Principal Amount
2003	Junior subordinated debentures	2008	2033	Three-month LIBOR, plus 4.05%	9.41%	\$ 10,310
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.00%	9.36%	13,000
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.20%	9.56%	12,000
2005	Junior subordinated debentures	2010	2035	Three-month LIBOR, plus 3.58%	8.93%	20,620
					Total	\$ 55,930

We received a total of \$53.3 million in net proceeds from the issuances of the above long-term debt, of which \$26.2 was contributed to the surplus of our Insurance Company Subsidiaries and the remaining balance was used for general corporate purposes. Associated with the issuance of the above long-term debt we incurred approximately \$1.7 million in issuance costs for commissions paid to the placement agents in the transactions. These issuance costs have been capitalized and are included in other assets on the balance sheet, which are being amortized over seven years as a component of interest expense. The seven year amortization period represents our best estimate of the estimated useful life of the bonds related to both the senior debentures and junior subordinated debentures.

The junior subordinated debentures issued in 2003 and 2005, were issued in conjunction with the issuance of \$10.0 million and \$20.0 million in mandatory redeemable trust preferred securities to a trust formed by an institutional investor from our unconsolidated subsidiary trusts, respectively.

With the five year period approaching in 2008 for the junior subordinated debentures issued in 2003, we will be reviewing the capital strategy associated with refinancing at lower costs through debentures or equity.

Interest Rate Swaps

In October 2005, we entered into two interest rate swap transactions to mitigate our interest rate risk on \$5.0 million and \$20.0 million of our senior debentures and trust preferred securities, respectively. In accordance with Statement of Financial Accounting Standards (SFAS) No. 133 *Accounting for Derivative Instruments and Hedging Activities*, these interest rate swap transactions were recorded at fair value on the balance sheet and any changes in their fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and is recognized as an adjustment to interest expense.

Table of Contents

The first interest rate swap transaction, which relates to \$5.0 million of our \$12.0 million issuance of senior debentures, has an effective date of October 6, 2005 and ending date of May 24, 2009. We are required to make certain quarterly fixed rate payments calculated on a notional amount of \$5.0 million, non-amortizing, based on a fixed annual interest rate of 8.925%. The counterparty is obligated to make quarterly floating rate payments to us referencing the same notional amount, based on the three-month LIBOR, plus 4.20%.

The second interest rate swap transaction, which relates to \$20.0 million of our \$20.0 million issuance of trust preferred securities, has an effective date of October 6, 2005 and ending date of September 16, 2010. We are required to make quarterly fixed rate payments calculated on a notional amount of \$20.0 million, non-amortizing, based on a fixed annual interest rate of 8.34%. The counterparty is obligated to make quarterly floating rate payments to us referencing the same notional amount, based on the three-month LIBOR, plus 3.58%.

In relation to the above interest rate swaps, the net interest income received for the three months ended March 31, 2007, was approximately \$38,000. The net interest expense incurred for the three months ended March 31, 2006, was approximately \$18,000. The total fair value of the interest rate swaps as of March 31, 2007 and December 31, 2006, was approximately \$83,000 and \$200,000, respectively. Accumulated other comprehensive income at March 31, 2007 and December 31, 2006, included the accumulated income on the cash flow hedge, net of taxes, of \$54,000 and \$130,000, respectively.

Revolving Line of Credit

In November 2004, we entered into a revolving line of credit for up to \$25.0 million, which expires in November 2007. We use the revolving line of credit to meet short-term working capital needs. Under the revolving line of credit, we and certain of our non-regulated subsidiaries pledged security interests in certain property and assets of named subsidiaries.

At March 31, 2007 and December 31, 2006, we had an outstanding balance of \$10.4 million and \$7.0 million on the new revolving line of credit, respectively.

The revolving line of credit provides for interest at a variable rate based, at our option, upon either a prime based rate or LIBOR-based rate. In addition, the revolving line of credit also provides for an unused facility fee. On prime based borrowings, the applicable margin ranges from 75 to 25 basis points below prime. On LIBOR-based borrowings, the applicable margin ranges from 125 to 175 basis points above LIBOR. The margin for all loans is dependent on the sum of non-regulated earnings before interest, taxes, depreciation, amortization, and non-cash impairment charges related to intangible assets for the preceding four quarters, plus dividends paid or payable to us from subsidiaries during such period (Adjusted EBITDA). As of March 31, 2007, the weighted average interest rate for LIBOR-based borrowings was 6.6%.

Debt covenants consist of: (1) maintenance of the ratio of Adjusted EBITDA to interest expense of 2.0 to 1.0, (2) minimum net worth of \$130.0 million and increasing annually, commencing June 30, 2005, by fifty percent of the prior year's positive net income, (3) minimum A.M. Best rating of B, and (4) on an annual basis, a minimum Risk Based Capital Ratio for Star of 1.75 to 1.00. As of March 31, 2007, we were in compliance with these covenants.

Shareholders' Equity

At March 31, 2007, shareholders' equity was \$207.4 million, or \$7.02 per common share, compared to \$201.7 million, or \$6.93 per common share, at December 31, 2006.

On October 28, 2005, our Board of Directors authorized management to purchase up to 1,000,000 shares of our common stock in market transactions for a period not to exceed twenty-four months. For the three months ended March 31, 2007 and the year ended December 31, 2006, we did not repurchase any common stock. As of March 31, 2007, the cumulative amount we repurchased and retired under our current share repurchase plan was 63,000 shares of common stock for a total cost of approximately \$372,000. As of March 31, 2007, we have available up to 937,000 shares remaining to be purchased.

Table of Contents

On February 8, 2007, our Board of Directors and the Compensation Committee of the Board of Directors approved the distribution of our LTIP award for the 2004-2006 plan years, which included both a cash and stock award. The stock portion of the LTIP award was valued at \$2.5 million, which resulted in the issuance of 579,496 shares of our common stock. Of the 579,496 shares issued, 191,570 shares were retired for payment of the participant's associated withholding taxes related to the compensation recognized by the participant. Refer to Note 2 *Stock Options, Long Term Incentive Plan, and Deferred Compensation Plan* for further detail. The retirement of the shares for the associated withholding taxes reduced our paid in capital by \$1.8 million.

Regulatory

A significant portion of our consolidated assets represent assets of our Insurance Company Subsidiaries. The State of Michigan Office of Financial and Insurance Services (OFIS) restricts the amount of funds that may be transferred to us in the form of dividends, loans or advances. These restrictions in general, are as follows: the maximum discretionary dividend that may be declared, based on data from the preceding calendar year, is the greater of each insurance company's net income (excluding realized capital gains) or ten percent of the insurance company's surplus (excluding unrealized gains). These dividends are further limited by a clause in the Michigan law that prohibits an insurer from declaring dividends except out of surplus earnings of the company. Earned surplus balances are calculated on a quarterly basis. Since Star is the parent insurance company, its maximum dividend calculation represents the combined Insurance Company Subsidiaries' surplus. At March 31, 2007, Star's earned surplus position was positive \$22.7 million. At December 31, 2006, Star had positive earned surplus of \$13.2 million. Based upon the March 31, 2007, statutory financial statements, Star may pay a dividend of up to \$22.7 million without the prior approval of OFIS. No statutory dividends were paid during 2006 or during the three months ended March 31, 2007.

Contractual Obligations and Commitments

There were no material changes outside the ordinary course of our business in relation to our contractual obligations and commitments for the three months ended March 31, 2007.

Regulatory and Rating Issues

The National Association of Insurance Commissioners (NAIC) has adopted a risk-based capital (RBC) formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus for the purpose of initiating regulatory action. In general, an insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

At December 31, 2006, all of our Insurance Company Subsidiaries were in compliance with RBC requirements. Star reported statutory surplus of \$165.1 million at December 31, 2006, compared to the threshold requiring the minimum regulatory involvement of \$63.1 million in 2006. At March 31, 2007, Star's statutory surplus increased \$3.4 million to \$168.5 million.

Insurance operations are subject to various leverage tests (e.g. premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. Our targets for gross and net written premium to statutory surplus are 2.8 to 1.0 and 2.25 to 1.0, respectively. As of March 31, 2007, on a statutory combined basis, the gross and net premium leverage ratios were 2.0 to 1.0 and 1.6 to 1.0, respectively.

Table of Contents

Reinsurance

Intercompany pooling agreements are commonly entered into between affiliated insurance companies, so as to allow the companies to utilize the capital and surplus of all of the companies, rather than each individual company. Under pooling arrangements, companies share in the insurance business that is underwritten and allocate the combined premium, losses and related expenses between the companies within the pooling arrangement. The Insurance Company Subsidiaries entered into an Inter-Company Reinsurance Agreement (the Pooling Agreement). This Pooling Agreement includes Star, Ameritrust Insurance Corporation (Ameritrust), Savers Property and Casualty Insurance Company (Savers) and Williamsburg National Insurance Company (Williamsburg). Pursuant to the Pooling Agreement, Savers, Ameritrust and Williamsburg have agreed to cede to Star and Star has agreed to reinsure 100% of the liabilities and expenses of Savers, Ameritrust and Williamsburg, relating to all insurance and reinsurance policies issued by them. In return, Star agrees to cede and Savers, Ameritrust and Williamsburg have agreed to reinsure Star for their respective percentages of the liabilities and expenses of Star. Annually, we examine the Pooling Agreement for any changes to the ceded percentage for the liabilities and expenses. Any changes to the Pooling Agreement must be submitted to the applicable regulatory authorities for approval.

Convertible Note

In July 2005, we made a \$2.5 million loan, at an effective interest rate equal to the three-month LIBOR, plus 5.2%, to an unaffiliated insurance agency. In December 2005, we loaned an additional \$3.5 million to the same agency. The original \$2.5 million demand note was replaced with a \$6.0 million convertible note. The effective interest rate of the convertible note is equal to the three-month LIBOR, plus 5.2% and is due December 20, 2010. This agency has been a producer for us for over ten years. As security for the loan, the borrower granted us a security interest in its accounts, cash, general intangibles, and other intangible property. Also, the shareholder then pledged 100% of the common shares of three insurance agencies, the common shares owned by the shareholder in another agency, and has executed a personal guaranty. This note is convertible upon our option based upon a pre-determined formula, beginning in 2008. The conversion feature of this note is considered an embedded derivative pursuant to SFAS No. 133, and therefore is accounted for separately from the note. At March 31, 2007, the estimated fair value of the derivative was not material to the financial statements.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*, which becomes effective for fiscal years beginning after November 15, 2007. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. We will evaluate the impact of SFAS No. 157, but believe the adoption of SFAS No. 157 will not have a material impact on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. SFAS No. 159 will permit entities the option to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis as of specified election dates. This election is irrevocable. The objective of SFAS No. 159 is to improve financial reporting and reduce the volatility in reported earnings caused by measuring related assets and liabilities differently. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We will evaluate the potential impact SFAS No. 159 will have on our consolidated financial statements.

Subsequent Events

As previously indicated, in April 2007, we announced an upgrade of the financial strength rating by A.M. Best Company to A- (Excellent), from B++ (Very Good) for our Insurance Company Subsidiaries.

On April 10, 2007, we executed an amendment to our current revolving credit agreement with our bank. The amendments included an extension of the term to September 30, 2010, an increase to the available borrowings up to

Table of Contents

\$35.0 million, and a reduction of the variable interest rate basis to a range between 75 to 175 basis points above LIBOR.

On April 16, 2007, we entered into an Asset Purchase Agreement (Agreement) to acquire U.S. Specialty Underwriters, Inc. (USSU) for a purchase price of \$23.0 million. We simultaneously closed on the acquisition on the same date. The purchase price was comprised of \$13.0 million in cash and \$10.0 million in our common stock. The total shares issued for the \$10.0 million portion of the purchase price was 907,935 shares. Under the terms of the Agreement, we acquired the excess workers compensation business and other related assets. USSU is based in Cleveland, Ohio, and is a specialty program manager that produces fee based income by underwriting excess workers compensation coverage for a select group of insurance companies.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates as well as other relevant market rate or price changes. The volatility and liquidity in the markets in which the underlying assets are traded directly influence market risk. The following is a discussion of our primary risk exposures and how those exposures are currently managed as of March 31, 2007. Our market risk sensitive instruments are primarily related to fixed income securities, which are available for sale and not held for trading purposes.

Interest rate risk is managed within the context of asset and liability management strategy where the target duration for the fixed income portfolio is based on the estimate of the liability duration and takes into consideration our surplus. The investment policy guidelines provide for a fixed income portfolio duration of between three and a half and five and a half years. At March 31, 2007, our fixed income portfolio had a modified duration of 3.88, compared to 3.93 at December 31, 2006.

At March 31, 2007, the fair value of our investment portfolio was \$511.5 million. Our market risk to the investment portfolio is interest rate risk associated with debt securities. Our exposure to equity price risk is not significant. Our investment philosophy is one of maximizing after-tax earnings and has historically included significant investments in tax-exempt bonds. We continue to increase our holdings of tax-exempt securities based on our return to profitability and our desire to maximize after-tax investment income. For our investment portfolio, there were no significant changes in our primary market risk exposures or in how those exposures are managed compared to the year ended December 31, 2006. We do not anticipate significant changes in our primary market risk exposures or in how those exposures are managed in future reporting periods based upon what is known or expected to be in effect.

A sensitivity analysis is defined as the measurement of potential loss in future earnings, fair values, or cash flows of market sensitive instruments resulting from one or more selected hypothetical changes in interest rates and other market rates or prices over a selected period. In our sensitivity analysis model, a hypothetical change in market rates is selected that is expected to reflect reasonable possible near-term changes in those rates. Near term means a period of up to one year from the date of the consolidated financial statements. In our sensitivity model, we use fair values to measure our potential loss in fair value of debt securities assuming an upward parallel shift in interest rates to measure the hypothetical change in fair values. The table below presents our model's estimate of changes in fair values given a change in interest rates. Dollar values are rounded and in thousands.

	Rates Down 100bps	Rates Unchanged	Rates Up 100bps
Market Value	\$ 532,449	\$ 511,501	\$ 490,170
Yield to Maturity or Call	3.49%	4.49%	5.49%

Effective Duration	3.99	4.09	4.23
--------------------	------	------	------

The other financial instruments, which include cash and cash equivalents, equity securities, premium receivables, reinsurance recoverables, line of credit and other assets and liabilities, when included in the sensitivity model, do not produce a material loss in fair values.

Table of Contents

Our debentures are subject to variable interest rates. Thus, our interest expense on these debentures is directly correlated to market interest rates. At March 31, 2007 and December 31, 2006, we had debentures of \$55.9 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by \$559,000.

In October 2005, we entered into two interest rate swap transactions to mitigate our interest rate risk on \$5.0 million and \$20.0 million of our senior debentures and trust preferred securities, respectively. We recognized these transactions in accordance with SFAS No. 133 *Accounting for Derivative Instruments and Hedging Activities*, as subsequently amended. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges under SFAS No. 133. In accordance with SFAS No. 133, these interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of any changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is being accrued and is being recognized as an adjustment to interest expense.

In addition, our revolving line of credit under which we can borrow up to \$25.0 million is subject to variable interest rates. Thus, our interest expense on the revolving line of credit is directly correlated to market interest rates. At March 31, 2007, we had \$10.4 million outstanding on this revolving line of credit. At this level, a 100 basis point (1%) change in market rates would have changed interest expense by \$104,000. At December 31, 2006, we had \$7.0 million outstanding. At this level, a 100 basis point (1%) change in market rates would have changed interest expense by \$70,000.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures.

Our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, the Exchange Act), which we refer to as disclosure controls, are controls and procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any control system. A control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are met. No evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

As of March 31, 2007, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls were effective in recording, processing, summarizing, and reporting, on a timely basis, material information required to be disclosed in the reports we file under the Exchange Act and is accumulated and communicated, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no significant changes in our internal control over financial reporting during the three month period ended March 31, 2007, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

The information required by this item is included under Note 10 *Commitments and Contingencies* of the Notes to the Consolidated Financial Statements of the Company's Form 10-Q for the three months ended March 31, 2007, which is hereby incorporated by reference.

Table of Contents

Item 1A. Risk Factors

There have been no material changes to the Risk Factors previously disclosed in Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In October 2005, the Company's Board of Directors authorized management to repurchase up to 1,000,000 shares, or approximately 3%, of its common stock in market transactions for a period not to exceed twenty-four months.

For the three months ended March 31, 2007, the Company did not purchase and retire any shares of common stock. The maximum number of shares that may yet be repurchased under the Company's current share repurchase plan is 937,000 shares, as reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.
