NEWS RELEASE

Enbridge announces signing of definitive agreements to provide pipeline transportation services for the Surmont oil sands project

CALGARY, Alberta, November 2, 2005 Enbridge Inc. (TSX/NYSE: ENB) today announced that it has entered into definitive agreements with ConocoPhillips Surmont Partnership and Total E&P Canada Ltd. (the Surmont Shippers) to provide lateral facilities and pipeline transportation services on its Athabasca Pipeline for the Surmont oil sands project.

Under the terms of the agreements, Enbridge will construct pipeline and tank facilities required by the Surmont Project, including a diluent lateral, a crude lateral, and tank facilities at the Cheecham terminal on the Athabasca Pipeline. The estimated cost of these facilities is \$42 million with a planned availability for service date in mid-2006. Enbridge's 540-km Athabasca Pipeline will also require capacity expansion from the Cheecham-area terminal to its mainline terminal at Hardisty, Alberta.

The agreements provide for an initial contract volume of up to 50,000 barrels per day of crude oil. The agreement covering the dedicated Surmont lateral facilities and the agreement for transportation service on the Athabasca Pipeline are both for an initial term of 25 years, with extension provisions. The Athabasca Pipeline agreement also provides flexibility for the Surmont Shippers to transfer their production to the proposed Waupisoo Pipeline following its planned start-up in mid 2008.

Enbridge's Athabasca Pipeline, with ultimate capacity of 570,000 barrels per day, links its Athabasca Terminal, just south of the Suncor plant near Fort McMurray, to the company's Hardisty Terminal in Central Alberta. The pipeline serves Suncor and, via lateral pipelines, Petro-Canada, EnCana, and the Long Lake project operated by Nexen and OPTI Canada. The Athabasca Terminal has 1.5 million barrels of crude oil storage capacity. The Hardisty Terminal has storage capacity of 1.6 million barrels, with an additional 4 million barrels of storage capacity at the adjacent Hardisty Cavern storage facility, jointly owned by Enbridge and CCS Inc.

The Surmont Oil Sands Project is equally owned by ConocoPhillips, the operator, and Total. The project is located in the Athabasca oil sands area, approximately 60 kilometres southeast of Fort McMurray, Alberta.

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 4,400 people, primarily

in Canada, the U.S. and South America. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at www.enbridge.com.

NEWS RELEASE

Enbridge files Preliminary Information Package for Gateway Project

CALGARY, Alberta, November 2, 2005 Gateway Pipeline Inc., a wholly owned subsidiary of Enbridge Inc., has filed a Preliminary Information Package (PIP) with the National Energy Board, the Canadian Environmental Assessment Agency and other federal departments.

The PIP provides detailed information on the major elements of the Gateway Project as of October 2005. It is intended to inform potentially interested parties, and to permit federal regulators to define the regulatory review process to satisfy the requirements of the National Energy Board and the Canadian Environmental Assessment Agency.

A PIP filing does not constitute an application for regulatory approval. Such an application is planned for 2006, subject to the achievement of commercial feasibility, including satisfactory shipper commitments, as well as successful completion of engineering, environmental planning, and public and Aboriginal consultation. This timing would permit construction to commence in 2008 and the pipelines to begin service in 2010.

The Gateway Project is estimated to cost approximately \$4 billion and will consist of a petroleum export pipeline and a condensate import pipeline along the same right-of-way, and a marine terminal.

The Gateway Petroleum Export Pipeline project will involve a new 1150-km (715-mile) 30-inch diameter pipeline with an initial capacity of approximately 400,000 barrels per day to transport petroleum from Edmonton to Kitimat. The Gateway Condensate Import Pipeline will be a 20-inch diameter pipeline capable of initially transporting approximately 150,000 barrels per day from Kitimat to Edmonton.

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 4,400 people, primarily in Canada, the U.S. and South America. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at www.enbridge.com.

BACKGROUND INFORMATION ON THE ENBRIDGE GATEWAY PROJECT

- Ø The Gateway Project, estimated to cost approximately \$4 billion, involves the proposed development of two new pipelines, a new marine terminal, tankage, pumping stations and related facilities.
 - Ø The Gateway Project will run from Strathcona County near Edmonton to Kitimat, British Columbia.
 - Ø Key factors in the decision to select Kitimat as the end-site location for the pipeline were the deep-water port and abundant industrial land.
 - Ø The pipeline will be 1150 kilometres in length.
 - Ø The petroleum export pipeline will be 30-inches in diameter and designed to move an average of 400,000 barrels per day.
 - Ø The condensate import pipeline will be 20-inches in diameter and designed to move an average of 150,000 barrels per day.
 - Ø Condensate is a by-product of natural gas production and is used as feedstock to oil refineries but its primary use in Western Canada is to dilute heavy oil for easier transport by pipeline.
 - Ø Certified marine tankers will be used to either import condensate or export petroleum. The marine terminal will include tankage, emergency response equipment, tanker births and other related facilities.
 - Ø Enbridge anticipates filing the National Energy Board application for the Gateway Project in the second quarter of 2006, beginning construction in 2008 and having the pipeline operational in 2010.
 - Ø The socio-economic benefits during construction of the project are estimated at \$1.52 billion in BC and \$1.26 billion in Alberta.
 - Ø During the operation of the Gateway Project, the socio-economic benefits are estimated at \$107 million per year in BC and \$60 million per year in Alberta.
 - Ø The Gateway Project is an important part of Canada's energy future and will help ensure there is enough capacity to transport new oil expected from Canada's oil sands in the years to come.

NEWS RELEASE

Enbridge and Value Creation Inc. form Strategic Alliance

CALGARY, Alberta, November 16, 2005 Enbridge Inc. and Value Creation Inc. (VCI) today announced a strategic alliance to pursue oil sands energy infrastructure development. As part of the alliance, Enbridge will invest \$25 million for a minority equity interest in the Company.

The Value Creation Group of Companies, established in 1999, has focused on creating unusual values in the value-enhancement chain of oil sands development, leveraging on innovative technologies and synergies. Members of the Group separately spearhead integrated resource development (by Value Creation Inc.), crude oil upgrading (by BA Energy Inc.) and specialized refining (by Technoeconomics Inc.). VCI, which oversees the growth strategy for the Group, owns proprietary upgrading technologies that it believes provide significant cost advantages over alternative upgrading technologies. VCI is the major shareholder of BA Energy, which is building a state-of-the-art bitumen upgrader in the Industrial Heartland area near Fort Saskatchewan, Alberta. VCI also holds oil sands leases and permits on 71,800 hectares of land with estimated resources of 25 to 30 billion barrels of bitumen-in-place.

Enbridge and VCI intend to work together to maximize the value of VCI's technology and bitumen resource base. Enbridge will support VCI with assessment and development of downstream markets for upgraded bitumen products as well as with the provision of cost-effective logistical solutions for accessing such markets. In September 2005, Enbridge and BA Energy entered into a separate agreement with respect to the provision of pipeline and terminaling facilities for the Heartland Upgrader, scheduled to be in service in late 2007.

We are very pleased to join VCI in this strategic alliance, said Patrick D. Daniel, Enbridge President and Chief Executive Officer. Our investment in VCI, and the creation of a strategic relationship with them, demonstrate Enbridge's commitment to developing value-added solutions for the Alberta energy industry. We believe that the development of additional upgrading capacity in Alberta is an important part of an overall resource and market development plan that will create maximum value for oil sands producers and for the province. This will in turn provide the best opportunity for us to expand our pipeline and terminaling services business both within the oil sands region and further downstream. Our VCI investment is also right in line with our strategy to support development of technologies that are complementary to our core businesses.

For a new player to excel among giants, we need creative strategies to leverage on our breakthrough technologies, top calibre talents, large resource base and synergistic alliances, said Dr. Columba Yeung, founder and Chairman of Value Creation Group. This strategic alliance between VCI and Enbridge is pivotal to our strategy to achieve excellence in every link of the value chain. We are honoured by Enbridge's endorsement.

NEWS RELEASE

Enbridge to develop 200 megawatts of wind power in Ontario

CALGARY, Alberta, November 21, 2005 Enbridge Inc. today announced that it will be developing 200 megawatts of wind power on the eastern shore of Lake Huron in Bruce County, Ontario.

The Ontario Ministry of Energy awarded two projects to Enbridge and Leader Capital Corp., under its Renewable Energy Supply Request for Proposals. Enbridge has subsequently acquired Leader Capital's subsidiary, Leader Wind Corp., and now owns a 100% working interest in the two wind power projects.

Enbridge has executed a 20-year electricity purchase agreement with the Ontario Power Authority for all of the power produced by the two adjacent projects.

Enbridge will assume overall responsibility for project construction, which is expected to start in mid-2006. Enbridge has been operating the SunBridge wind power project in Saskatchewan for more than three years and will operate the two Ontario projects when commercial operations begin in early 2007.

Total capital expenditures for the projects will be approximately \$400 million. The projects are expected to be accretive to earnings per share in the first year of operation.

The Ontario wind power projects reflect our ongoing commitment to sustainable development and an emerging power generation platform, said Patrick D. Daniel, Enbridge President & Chief Executive Officer. We have been pleased with our three existing wind power projects in Alberta and Saskatchewan, which have a combined capacity of over 70 megawatts. The long-term offtake contract with the Ontario Power Authority, at predetermined power prices, makes this investment consistent with maintaining a low risk profile and stable cash flows. We are also very excited about expanding our involvement in Ontario, where we already have major energy infrastructure investments, and helping to address the need for new sources of power in the Province.

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses.
