### LIQUIDITY AND CAPITAL RESOURCES

At April 30, 2001, we had cash and cash equivalents of \$3.3 million compared to \$3.4 million at October 31, 2000. Cash used for operations totaled \$3.3 million in the first half of fiscal 2001, compared to \$5.7 million provided by operations in the same period of fiscal 2000. This difference is attributable to the significantly lower net income in the fiscal 2001 periods, capital investments of approximately \$1.0 million in the first half of fiscal 2001 consisting principally of expenditures for software development projects and purchases of equipment, and the \$1.7 million we spent to repurchase 391,101 shares of our common stock during the first six months of fiscal 2001. We funded these expenditures with borrowings under our bank credit facility. We anticipate additional borrowings will be needed to fund operations during the second half of fiscal 2001.

Net working capital, excluding short-term debt, was \$32.6 million at April 30, 2001, compared to \$28.1 million at October 31, 2000. The increase in working capital is attributable to an increase in accounts receivable of \$3.0 million and an increase in inventory of \$5.8 million, partially offset by a related increase in accounts payable of \$3.0 million, along with an increase in accrued expenses of \$1.0 million. The increase in inventory relates primarily to increased units of finished product available for sale, because shipments during the period to customers in the U.S. and Southeast Asia markets were below planned levels. We have adjusted our production schedules which will begin to take effect in the fourth fiscal quarter of 2001. We do not expect a significant reduction in operating working capital until the first half of fiscal 2002.

Total debt at April 30, 2001 was \$9.9 million representing 21% of total capitalization, compared to \$3.7 million or 9% of total capitalization at October 31, 2000.

We were in compliance with all of our loan covenants at April 30, 2001. Our bank credit facility matures May 31, 2002. We believe that we will be able to obtain replacement credit facilities under acceptable terms. We believe that available borrowings under current and replacement credit facilities will be sufficient to meet our anticipated cash requirements in the foreseeable future.
