QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-6233

(Exact name of registrant as specified in its charter)

INDIANA

35-1068133

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

100 North Michigan Street

South Bend, IN

46601

(Address of principal executive offices) (Zip Code)

(574) 235-2000

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Number of shares of common stock outstanding as of October 12, 2018 — 25,965,746 shares

1ST SOURCE CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Accounting Policies

1st Source Corporation is a bank holding company headquartered in South Bend, Indiana that provides, through its subsidiaries (collectively referred to as “1st Source” or “the Company”), a broad array of financial products and services.

Basis of Presentation – The accompanying unaudited consolidated financial statements reflect all adjustments (all of which are normal and recurring in nature) which are, in the opinion of management, necessary for a fair presentation of the consolidated financial position, the results of operations, changes in comprehensive income, changes in shareholders’ equity, and cash flows for the periods presented. These unaudited consolidated financial statements have been prepared according to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been omitted.

The Notes to the Consolidated Financial Statements appearing in 1st Source Corporation’s Annual Report on Form 10-K (2017 Annual Report), which include descriptions of significant accounting policies, should be read in conjunction with these interim financial statements. The Consolidated Statement of Financial Condition at December 31, 2017 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. Certain amounts in the prior period consolidated financial statements have been reclassified to conform to the current period presentation.

Use of Estimates in the Preparation of Financial Statements – Financial statements prepared in accordance with GAAP require the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

Loans and Leases – Loans are stated at the principal amount outstanding, net of unamortized deferred loan origination fees and costs and net of unearned income. Interest income is accrued as earned based on unpaid principal balances. Origination fees and direct loan and lease origination costs are deferred, and the net amount amortized to interest income over the estimated life of the related loan or lease. Loan commitment fees are deferred and amortized into other income over the commitment period.

Direct financing leases are carried at the aggregate of lease payments plus estimated residual value of the leased property, net of unamortized deferred lease origination fees and costs and unearned income. Interest income on direct financing leases is recognized over the term of the lease to achieve a constant periodic rate of return on the outstanding investment.

The accrual of interest on loans and leases is discontinued when a loan or lease becomes contractually delinquent for 90 days, or when an individual analysis of a borrower’s credit worthiness indicates a credit should be placed on nonperforming status, except for residential mortgage loans and consumer loans that are well secured and in the process of collection. Residential mortgage loans are placed on nonaccrual at the time the loan is placed in foreclosure. When interest accruals are discontinued, interest credited to income in the current year is reversed and interest accrued in the prior year is charged to the reserve for loan and lease losses. However, in some cases, the Company may elect to continue the accrual of interest when the net realizable value of collateral is sufficient to cover the principal and accrued interest. When a loan or lease is classified as nonaccrual and the future collectability of the recorded loan or lease balance is doubtful, collections on interest and principal are applied as a reduction to principal outstanding. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured, which is typically evidenced by a sustained repayment performance of at least six months.

A loan or lease is considered impaired, based on current information and events, if it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. Interest on impaired loans and leases, which are not classified as nonaccrual, is recognized on the accrual basis. The Company evaluates loans and leases exceeding \$100,000 for impairment and establishes a specific reserve as a component of the reserve for loan and lease losses when it is probable all amounts

due will not be collected pursuant to the contractual terms of the loan or lease and the recorded investment in the loan or lease exceeds its fair value.

Loans and leases that have been modified and economic concessions have been granted to borrowers who have experienced financial difficulties are considered a troubled debt restructuring (TDR) and, by definition, are deemed an impaired loan. These concessions typically result from the Company's loss mitigation activities and may include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Certain TDRs are classified as nonperforming at the time of restructuring and typically are returned to performing status after considering the borrower's sustained repayment performance for a reasonable period of at least six months.

7

Table of Contents

When the Company modifies loans and leases in a TDR, it evaluates any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan or lease agreement, or uses the current fair value of the collateral, less selling costs for collateral dependent loans. If the Company determines that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through a reserve for loan and lease losses estimate or a charge-off to the reserve for loan and lease losses. In periods subsequent to modification, the Company evaluates all TDRs, including those that have payment defaults, for possible impairment and recognizes impairment through the reserve for loan and lease losses.

Revenue Recognition

The Company recognizes revenues as they are earned based on contractual terms, as transactions occur, or as services are provided and collectability is reasonably assured. The Company's principal source of revenue is interest income from loans and leases and investment securities. The Company also earns noninterest income from various banking and financial services offered primarily through 1st Source Bank (Bank) and its subsidiaries.

Interest Income – The largest source of revenue for the Company is interest income which is primarily recognized on an accrual basis according to nondiscretionary formulas in written contracts, such as loan and lease agreements or investment securities contracts.

Noninterest Income – The Company earns noninterest income through a variety of financial and transaction services provided to corporate and consumer clients such as trust and wealth advisory, deposit account, debit card, mortgage banking, insurance, and equipment rental services. Revenue is recorded for noninterest income based on the contractual terms for the service or transaction performed. In certain circumstances, noninterest income is reported net of associated expenses.

Note 2 — Recent Accounting Pronouncements

Intangibles - Internal-Use Software: In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-15 “Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract.” These amendments align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The accounting for the service element of a hosting arrangement that is a service contract is not affected by these amendments. The guidance is effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2019. Early adoption is permitted. The Company is assessing ASU 2018-15 and the impact on its accounting and disclosures.

Disclosure Requirements for Fair Value Measurement: In August 2018, the FASB issued ASU No. 2018-13 “Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement.” These amendments modify the disclosure requirements in Topic 820 as follows:

Removals: the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy; the policy for timing of transfers between levels; and the valuation processes for Level 3 fair value measurements.

Modifications: for investments in certain entities that calculate net asset value, an entity is required to disclose the timing of liquidation of an investee’s assets and the date when restrictions from redemption might lapse only if the investee has communicated the timing to the entity or announced the timing publicly; and the amendments clarify that the measurement uncertainty disclosure is to communicate information about the uncertainty in measurement as of the reporting date.

Additions: the changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period; and the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements.

The guidance is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The amendments on changes in unrealized gains and losses, the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, and the narrative description of measurement uncertainty should all be applied prospectively for only the most recent interim or annual period

presented in the initial year of adoption. All other amendments should be applied retrospectively to all periods presented upon their effective date. Early adoption is permitted. An entity is permitted to early adopt any removed or modified disclosures upon issuance of ASU No. 2018-13 and delay adoption of the additional disclosures until their effective date. The Company is assessing ASU 2018-13 and the impact on its disclosures.

Table of Contents

Share Based Payment Accounting: In June 2018, the FASB issued ASU No. 2018-07 “Compensation - Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting.” These amendments expand the scope of Topic 718, Compensation - Stock Compensation (which currently only includes share-based payments to employees) to include share-based payments issued to nonemployees for goods or services. Consequently, the accounting for share-based payments to nonemployees and employees will be substantially aligned. The ASU supersedes Subtopic 505-50, Equity - Equity-Based Payments to Non-Employees. The guidance is effective for public companies for fiscal years, and interim fiscal periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted, but no earlier than a company’s adoption date of Topic 606, Revenue from Contracts with Customers. The Company is assessing ASU 2018-07 and does not expect it to have a material impact on its accounting and disclosures.

Income Taxes: In March 2018, the FASB issued ASU 2018-05 “Income Taxes (Topic 740): Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin (SAB) No. 118.” These amendments add SEC guidance to the FASB Accounting Standards Codification regarding the Tax Cuts and Jobs Act pursuant to the issuance of SAB 118. The amendments are effective upon addition to the FASB Codification. Disclosures related to the effect of the Tax Cuts and Jobs Act and the Company’s utilization of SAB 118 appear in Note 12 - Income Taxes.

Accumulated Other Comprehensive Income (Loss): In February 2018, the FASB issued ASU No. 2018-02 “Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income.” These amendments provide financial statement preparers with an option to reclassify stranded tax effects within AOCI to retained earnings in each period in which the effect of the change in the U.S. federal corporate income tax rate in the Tax Cuts and Jobs Act (or portion thereof) is recorded. The guidance is effective for all organizations for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted, including adoption in any interim period. The amendments should be applied either in the period adopted or retrospectively to each period (or periods) in which the effect of the change in the U.S. federal corporate income tax rate in the Tax Cuts and Jobs Act is recognized. The Company early adopted ASU 2018-02 on January 1, 2018 through a \$0.72 million cumulative-effect adjustment from AOCI to increase retained earnings related to unrealized gains and losses on available-for-sale securities. No other income tax effects related to the application of the Tax Cuts and Jobs Act were reclassified from AOCI to retained earnings.

Premium Amortization: In March 2017, the FASB issued ASU No. 2017-08 “Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities.” These amendments shorten the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. The guidance is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted, including adoption in an interim period. If an entity early adopts in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The Company estimates that it will recognize a cumulative-effect adjustment to retained earnings of \$0.30 million upon the adoption of ASU 2017-08 on January 1, 2019. This estimate could change due to changes in the security portfolio prior to the adoption date.

Simplifying the Test for Goodwill Impairment: In January 2017, the FASB issued ASU No. 2017-04 “Intangibles - Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment.” These amendments eliminate Step 2 from the goodwill impairment test. The amendments also eliminate the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The guidance is effective for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. ASU 2017-04 should be adopted on a prospective basis. The Company has assessed ASU 2017-04 and does not expect it to have a material impact on its accounting and disclosures.

Measurement of Credit Losses on Financial Instruments: In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments-Credit Losses (Topic 326) - Measurement of Credit Losses on Financial Instruments.” The provisions of ASU 2016-13 were issued to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments that are not accounted for at fair value through net income, including loans held for investment, held-to-maturity debt securities, trade and other receivables, net investment in leases and other commitments to extend credit held by a reporting entity at each reporting date. ASU 2016-13 requires that financial assets measured at amortized cost be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The amendments in ASU 2016-13 eliminate the probable incurred loss recognition in current GAAP and reflect an entity’s current estimate of all expected credit losses. The measurement of expected credit losses is based upon historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the financial assets.

Table of Contents

For purchased financial assets with a more-than-insignificant amount of credit deterioration since origination (“PCD assets”) that are measured at amortized cost, the initial allowance for credit losses is added to the purchase price rather than being reported as a credit loss expense. Subsequent changes in the allowance for credit losses on PCD assets are recognized through the statement of income as a credit loss expense.

Credit losses relating to available-for-sale debt securities will be recorded through an allowance for credit losses rather than as a direct write-down to the security.

ASU 2016-13 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company has an implementation team working through the provisions of ASU 2016-13 including assessing the impact on its accounting and disclosures.

Leases: In February 2016, the FASB issued ASU No. 2016-02 “Leases (Topic 842).” ASU 2016-02 establishes a right of use model that requires a lessee to record a right of use asset and a lease liability for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. A lease will be treated as sale if it transfers all of the risks and rewards, as well as control of the underlying asset, to the lessee. If risks and rewards are conveyed without the transfer of control, the lease is treated as a financing. If the lessor doesn’t convey risks and rewards or control, an operating lease results. The amendments are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early adoption is permitted.

In July 2018, the FASB issued amendments (ASU No. 2018-11) which provide entities with an additional (and optional) transition method to adopt the new lease standard. Under this new transition method, an entity initially applies the new lease standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Consequently, an entity’s reporting for the comparative periods presented in the financial statements in which it adopts the new leases standard will continue to be in accordance with current GAAP (Topic 840, Leases). The amendments in ASU 2018-11 also provide lessors with a practical expedient, by class of underlying asset, to not separate nonlease components from the associated lease component and, instead, to account for those components as a single component if the nonlease components otherwise would be accounted for under the new revenue guidance (Topic 606) and certain criteria are met. For entities that have not adopted Topic 842 before the issuance of ASU No. 2018-11, the effective date and transition requirements for the amendments related to separating components of a contract are the same as the effective date and transition requirements in ASU No. 2016-02.

The Company has an implementation team working through the provisions of ASU 2016-02 and ASU 2018-11 to assess the impact on its accounting, disclosures, processes, internal control over financial reporting, regulatory capital, risk-weighted assets, and the election of certain practical expedients. The Company is substantially complete with the evaluation of its lease population. It is expected that the Company will recognize discounted right of use assets and lease liabilities (estimated between \$10 and \$20 million) upon adoption on January 1, 2019. The estimates will change due to changes in the lease portfolio prior to the adoption date. The Company does not expect a material change to the timing of its expense recognition. Given the limited changes to lessor accounting, the Company does expect material changes to recognition or measurement. The Company has selected a third party software solution to assist with the accounting under the new standard.

Recognition and Measurement of Financial Instruments: In January 2016, the FASB issued ASU No. 2016-01 “Financial Instruments - Overall (Subtopic 825-10) - Recognition and Measurement of Financial Assets and Financial Liabilities.” ASU 2016-01 is intended to improve the recognition and measurement of financial instruments by requiring equity investments to be measured at fair value with changes in fair value recognized in net income; requiring public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; requiring separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements; eliminating the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured and amortized at cost on the

balance sheet; and requiring a reporting organization to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the organization has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. ASU 2016-01 is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2017. The amendments should be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption. In February 2018, the FASB issued ASU No. 2018-03 which includes technical corrections and improvements to clarify the guidance in ASU No. 2016-01. The Company adopted ASU 2016-01 on January 1, 2018 and it did not have a material effect on its accounting for equity investments, fair value disclosures and other disclosure requirements.

Table of Contents

Revenue from Contracts with Customers: In May 2014, the FASB issued ASU No. 2014-09 “Revenue from Contracts with Customers (Topic 606).” The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. On July 9, 2015, the FASB approved amendments deferring the effective date by one year. ASU 2014-09 is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is permitted but not before the original public entity effective date, i.e., annual periods beginning after December 15, 2016. In March 2016, the FASB issued final amendments (ASU No. 2016-08 and ASU No. 2016-10) to clarify the implementation guidance for principal versus agent considerations, identifying performance obligations and the accounting for licenses of intellectual property. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this Update recognized at the date of initial application. In May 2016, the FASB issued final amendments (ASU No. 2016-12 and ASU 2016-11) to address narrow-scope improvements to the guidance on collectibility, non-cash consideration, completed contracts at transition and to provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. Additionally, the amendments included a rescission of SEC guidance because of ASU 2014-09 related to revenue and expense recognition for freight services in process, accounting for shipping and handling fees and costs, and accounting for consideration given by a vendor to a customer. In December 2016, the FASB issued final guidance (ASU 2016-20) that allows entities not to make quantitative disclosures about performance obligations in certain cases and requires entities that use any of the new or previously existing optional exemptions to expand their qualitative disclosures. It also makes 12 additional technical corrections and improvements to the new revenue standard. These amendments are effective upon the adoption of ASU 2014-09. The Company’s revenue is comprised of net interest income, which is explicitly excluded from the scope of ASU 2014-09, and noninterest income. ASU 2014-09 required the Company to evaluate how it recognizes certain recurring revenue streams related to noninterest income. The Company adopted ASU 2014-09 on January 1, 2018 and did not identify any significant changes in the timing of revenue recognition when considering the amended accounting guidance. Additional disclosures related to revenue recognition appears in “Note 1. Accounting Policies.”

Note 3. Investment Securities Available-For-Sale

The following table shows investment securities available-for-sale.

(Dollars in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2018				
U.S. Treasury and Federal agencies securities	\$ 542,814	\$ —	\$ (10,674)) \$ 532,140
U.S. States and political subdivisions securities	90,762	119	(1,408)) 89,473

Total debt securities available-for-sale	\$ 909,368	\$ 2,176	\$ (7,511)) \$ 904,033

At September 30, 2018 and December 31, 2017, the residential mortgage-backed securities held by the Company consisted primarily of GNMA, FNMA and FHLMC pass-through certificates which are guaranteed by those respective agencies of the United States government (Government Sponsored Enterprise, GSEs).

Table of Contents

The following table shows the contractual maturities of investments in debt securities available-for-sale at September 30, 2018. Expected maturities will differ from contractual maturities, because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	\$ 53,874	\$ 53,787
Due after one year through five years	608,962	596,960
Due after five years through ten years	17,303	16,827
Due after ten years	—	—
Mortgage-backed securities	312,680	304,598
Total debt securities available-for-sale	\$ 992,819	\$ 972,172

The following table summarizes gross unrealized losses and fair value by investment category and age.

(Dollars in thousands)	Less than 12 Months		12 months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
September 30, 2018

December 31, 2017

U.S. Treasury and Federal agencies securities	\$ 311,865	\$ (1,161)	\$ 89,617	\$ (2,285)	\$ 401,482	\$ (3,446)
U.S. States and political subdivisions securities	34,971	(287)	24,909	(621)	59,880	(908)
Mortgage-backed securities - Federal agencies	137,169	(1,336)	60,162	(1,537)	197,331	(2,873)
Corporate debt securities	13,747	(57)	10,048	(227)	23,795	(284)
Foreign government and other securities	—	—	—	—	—	—
Total debt securities available-for-sale	\$ 497,752	\$ (2,841)	\$ 184,736	\$ (4,670)	\$ 682,488	\$ (7,511)

The initial indication of potential other-than-temporary-impairment (OTTI) for debt securities is a decline in fair value below amortized cost. Quarterly, the impaired securities are analyzed on a qualitative and quantitative basis in determining OTTI. Declines in the fair value of debt securities available-for-sale below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income. In estimating OTTI losses, the Company considers among other things, (i) the length of time and the extent to which fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) whether it is more likely than not that the Company will not have to sell any such securities before a recovery of cost.

At September 30, 2018, the Company does not have the intent to sell any of the debt securities available-for-sale in the table above and believes that it is more likely than not, that it will not have to sell any such securities before an anticipated recovery of cost. Primarily the unrealized losses on debt securities are due to increases in market rates over the yields available at the time the underlying securities were purchased. The fair value is expected to recover on all debt securities as they approach their maturity date or re-pricing date or if market yields for such investments decline. The Company does not believe any of the securities are impaired due to reasons of credit quality.

The following table shows the gross realized gains and losses from the securities available-for-sale portfolio, including marketable equity securities. Realized gains and losses of all securities are computed using the specific identification cost basis.

Three Months Ended	Nine Months Ended
	September 30,

	September		
	30,		
(Dollars in thousands)	2018	2017	2016
Gross realized gains	\$—	\$2	\$2,947
Gross realized losses	—	(347)	—
OTTI losses	—	—	(190)
Net realized gains (losses)	\$—	\$(345)	\$2,757

12

Table of Contents

At September 30, 2018 and December 31, 2017, investment securities available-for-sale with carrying values of \$267.16 million and \$289.05 million, respectively, were pledged as collateral for security repurchase agreements and for other purposes.

Note 4. Loan and Lease Financings

The Company evaluates loans and leases for credit quality at least annually but more frequently if certain circumstances occur (such as material new information which becomes available and indicates a potential change in credit risk). The Company uses two methods to assess credit risk: loan or lease credit quality grades and credit risk classifications. The purpose of the loan or lease credit quality grade is to document the degree of risk associated with individual credits as well as inform management of the degree of risk in the portfolio taken as a whole. Credit risk classifications are used to categorize loans by degree of risk and to designate individual or committee approval authorities for higher risk credits at the time of origination. Credit risk classifications include categories for: Acceptable, Marginal, Special Attention, Special Risk, Restricted by Policy, Regulated and Prohibited by Law. All loans and leases, except residential real estate and home equity loans and consumer loans, are assigned credit quality grades on a scale from 1 to 12 with grade 1 representing superior credit quality. The criteria used to assign grades to extensions of credit that exhibit potential problems or well-defined weaknesses are primarily based upon the degree of risk and the likelihood of orderly repayment, and their effect on the Company's safety and soundness. Loans or leases graded 7 or weaker are considered "special attention" credits and, as such, relationships in excess of \$100,000 are reviewed quarterly as part of management's evaluation of the appropriateness of the reserve for loan and lease losses. Grade 7 credits are defined as "watch" and contain greater than average credit risk and are monitored to limit the exposure to increased risk; grade 8 credits are "special mention" and, following regulatory guidelines, are defined as having potential weaknesses that deserve management's close attention. Credits that exhibit well-defined weaknesses and a distinct possibility of loss are considered "classified" and are graded 9 through 12 corresponding to the regulatory definitions of "substandard" (grades 9 and 10) and the more severe "doubtful" (grade 11) and "loss" (grade 12). The following table shows the credit quality grades of the recorded investment in loans and leases, segregated by class.

(Dollars in thousands)	Credit Quality Grades		
	1-6	7-12	Total
September 30, 2018			
Commercial and agricultural	\$1,032,233	\$30,674	\$1,062,907
Auto and light truck	531,769	30,777	562,546
Medium and heavy duty truck	269,660	1,941	271,601

Total	\$3,776,621	\$96,789	\$3,873,410

Table of Contents

For residential real estate and home equity and consumer loans, credit quality is based on the aging status of the loan and by payment activity. The following table shows the recorded investment in residential real estate and home equity and consumer loans by performing or nonperforming status. Nonperforming loans are those loans which are on nonaccrual status or are 90 days or more past due.

(Dollars in thousands)	Performing	Nonperforming	Total
September 30, 2018			
Residential real estate and home equity	\$ 521,693	\$ 1,698	\$523,391
Consumer	132,718	234	132,952
Total	\$ 654,411	\$ 1,932	\$656,343

December 31, 2017

There were no loan and lease modifications classified as a troubled debt restructuring (TDR) during the three and nine months ended September 30, 2018. There were no loan and lease modifications classified as a TDR during the three months ended September 30, 2017 and one nonperforming modification classified as a TDR during the nine months ended September 30, 2017. The classification between nonperforming and performing is determined at the time of modification. Modification programs focus on extending maturity dates or modifying payment patterns with most TDRs experiencing a combination of concessions. Modifications do not result in the contractual forgiveness of principal or interest. There were no modifications during 2018 and one modification during 2017 that resulted in an interest rate reduction below market rate. Consequently, the financial impact of the modification was immaterial. There were no TDRs which had payment defaults within the twelve months following modification during the three and nine months ended September 30, 2018. There were no TDRs which had a payment default within the twelve months following modification during the three months ended September 30, 2017 and one nonperforming TDR which had a payment default within the twelve months following modification during the nine months ended September 30, 2017. Default occurs when a loan or lease is 90 days or more past due under the modified terms or transferred to nonaccrual.

The following table shows the recorded investment of loans and leases classified as troubled debt restructurings as of September 30, 2018 and December 31, 2017.

(Dollars in thousands)	September 30, 2018	December 31, 2017
Performing TDRs	\$ 346	\$ 352
Nonperforming TDRs	33	537
Total TDRs	\$ 379	\$ 889

Note 5. Reserve for Loan and Lease Losses

The reserve for loan and lease loss methodology has been consistently applied for several years, with enhancements instituted periodically. Reserve ratios are reviewed quarterly and revised periodically to reflect recent loss history and to incorporate current risks and trends which may not be recognized in historical data. As the historical charge-off analysis is updated, the Company reviews the look-back periods for each business loan portfolio. Furthermore, a thorough analysis of charge-offs, non-performing asset levels, special attention outstandings and delinquency is performed in order to review portfolio trends and other factors, including specific industry risks and economic conditions, which may have an impact on the reserves and reserve ratios applied to various portfolios. The Company adjusts the calculated historical based ratio as a result of the analysis of environmental factors, principally economic

risk and concentration risk. Key economic factors affecting the portfolios are growth in gross domestic product, unemployment rates, housing market trends, commodity prices, inflation and global economic and political issues. Concentration risk is impacted primarily by geographic concentration in Northern Indiana and Southwestern Lower Michigan in the business banking and commercial real estate portfolios and by collateral concentration in the specialty finance portfolios and exposure to foreign markets by geographic risk.

Table of Contents

The reserve for loan and lease losses is maintained at a level believed to be appropriate by the Company to absorb probable losses inherent in the loan and lease portfolio. The determination of the reserve requires significant judgment reflecting the Company's best estimate of probable loan and lease losses related to specifically identified impaired loans and leases as well as probable losses in the remainder of the various loan and lease portfolios. For purposes of determining the reserve, the Company has segmented loans and leases into classes based on the associated risk within these segments. The Company has determined that eight classes exist within the loan and lease portfolio. The methodology for assessing the appropriateness of the reserve consists of several key elements, which include: specific reserves for impaired loans, formula reserves for each business lending division portfolio including percentage allocations for special attention loans and leases not deemed impaired, and reserves for pooled homogeneous loans and leases. The Company's evaluation is based upon a continuing review of these portfolios, estimates of customer performance, collateral values and dispositions, and assessments of economic and geopolitical events, all of which are subject to judgment and will change.

The following table shows the changes in the reserve for loan and lease losses, segregated by class, for the three months ended September 30, 2018 and 2017.

------------------------------------	-----------	-----------	-----------	-----------	-----------	-----------	-----------	-----------	-------------

Note 6. Mortgage Servicing Rights

The Company recognizes the rights to service residential mortgage loans for others as separate assets, whether the servicing rights are acquired through a separate purchase or through the sale of originated loans with servicing rights retained. The Company allocates a portion of the total proceeds of a mortgage loan to servicing rights based on the relative fair value. The unpaid principal balance of residential mortgage loans serviced for third parties was \$734.07 million and \$752.99 million at September 30, 2018 and December 31, 2017, respectively.

Mortgage servicing rights (MSRs) are evaluated for impairment at each reporting date. For purposes of impairment measurement, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. If temporary impairment exists within a tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced through a recovery of income.

Table of Contents

The following table shows changes in the carrying value of MSR's and the associated valuation allowance.

(Dollars in thousands)	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2018	2017	2018	2017
Mortgage servicing rights:				
Balance at beginning of period	\$4,323	\$4,239	\$4,349	\$4,297
Additions	213	391	658	884
Amortization	(260)	(270)	(731)	(821)
Sales	—	—	—	—
Carrying value before valuation allowance at end of period	4,276	4,360	4,276	4,360
Valuation allowance:				
Balance at beginning of period	—	—	—	—
Impairment recoveries	—	—	—	—
Balance at end of period	\$—	\$—	\$—	\$—
Net carrying value of mortgage servicing rights at end of period	\$4,276	\$4,360	\$4,276	\$4,360
Fair value of mortgage servicing rights at end of period	\$7,243	\$7,097	\$7,243	\$7,097

At September 30, 2018 and 2017, the fair value of MSR's exceeded the carrying value reported in the Consolidated Statements of Financial Condition by \$2.97 million and \$2.74 million, respectively. This difference represents increases in the fair value of certain MSR's that could not be recorded above cost basis.

Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$0.65 million and \$0.67 million for the three months ended September 30, 2018 and 2017, respectively. Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$1.95 million and \$2.04 million for the nine months ended September 30, 2018 and 2017, respectively. Mortgage loan contractual servicing fees are included in Mortgage Banking on the Consolidated Statements of Income.

Note 7. Commitments and Financial Instruments with Off-Balance-Sheet Risk

Commitments — 1st Source Bank (Bank), a subsidiary of 1st Source Corporation, has made investments directly in various tax-advantaged and other operating partnerships formed by third parties. The Bank's investments are primarily related to investments promoting affordable housing, community development and renewable energy sources. As a limited partner in these operating partnerships, we are allocated credits and deductions associated with the underlying properties. The Bank has determined that it is not the primary beneficiary of these investments because the general partners have the power to direct the activities that most significantly influence the economic performance of their respective partnerships. At September 30, 2018 and December 31, 2017, investment balances, including all legally binding commitments to fund future investments totaled \$15.58 million and \$23.76 million, respectively. In addition, the Bank had a liability for all legally binding unfunded commitments of \$5.75 million and \$15.71 million at September 30, 2018 and December 31, 2017, respectively.

Financial Instruments with Off-Balance-Sheet Risk — 1st Source and its subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Statements of Financial Condition. The following table shows financial instruments whose contract amounts represent credit risk.

(Dollars in thousands)	September 30, December 31,	
	2018	2017
Amounts of commitments:		
Loan commitments to extend credit	\$ 1,025,433	\$ 1,030,334
Standby letters of credit	\$ 32,465	\$ 29,961
Commercial and similar letters of credit	\$ 2,903	\$ 1,837

The exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and standby letters of credit is represented by the dollar amount of those instruments. The Company uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Table of Contents

The Bank grants mortgage loan commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan commitments is managed by entering into contracts for future deliveries of loans. Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Standby letters of credit are conditional commitments that guarantee the performance of a client to a third party. The credit risk involved in and collateral obtained when issuing standby letters of credit is essentially the same as that involved in extending loan commitments to clients. Standby letters of credit generally have terms ranging from six months to one year.

Commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party.

Commercial letters of credit generally have terms ranging from three months to six months.

Note 8. Derivative Financial Instruments

Commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments. See Note 7 for further information.

The Company has certain interest rate derivative positions that are not designated as hedging instruments. Derivative assets and liabilities are recorded at fair value on the Consolidated Statements of Financial Condition and do not take into account the effects of master netting agreements. Master netting agreements allow the Company to settle all derivative contracts held with a single counterparty on a net basis, and to offset net derivative positions with related collateral, where applicable. These derivative positions relate to transactions in which the Company enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each transaction, the Company agrees to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Company agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate. Because the terms of the swaps with the customers and the other financial institutions offset each other, with the only difference being counterparty credit risk, changes in the fair value of the underlying derivative contracts are not materially different and do not significantly impact the Company's results of operations.

The following table shows the amounts of non-hedging derivative financial instruments.

(Dollars in thousands)	Notional or contractual amount	Asset derivatives		Liability derivatives	
		Statement of Financial Condition classification	Fair value	Statement of Financial Condition classification	Fair value
September 30, 2018					
Interest rate swap contracts	\$ 796,661	Other assets	\$8,288	Other liabilities	\$8,435
Loan commitments	7,696	Mortgages held for sale	118	N/A	—

Total	\$ 155,124	\$ 27	\$ 155,097	\$ 149,835	\$ 2,705	\$ 2,557

If a default in performance of any obligation of a repurchase agreement occurs, each party will set-off property held in respect of transactions against obligations owing in respect of any other transactions. At September 30, 2018 and December 31, 2017, repurchase agreements had a remaining contractual maturity of \$123.04 million and \$148.22 million in overnight, \$1.29 million and \$1.32 million in up to 30 days, \$0.30 million and \$0.00 million in 30 to 90

days, and \$0.00 million and \$0.30 million in greater than 90 days, respectively and were collateralized by U.S. Treasury and Federal agencies securities.

Note 9. Earnings Per Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested restricted stock awards. Non-vested restricted stock awards are considered participating securities to the extent the holders of these securities receive non-forfeitable dividends at the same rate as holders of common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method.

Table of Contents

Stock options, where the exercise price was greater than the average market price of the common shares, were excluded from the computation of diluted earnings per common share because the result would have been antidilutive. There were no stock options outstanding as of September 30, 2018 and 2017.

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share.

	Three Months		Nine Months	
	Ended		Ended	
(Dollars in thousands - except per share amounts)	September 30,		September 30,	
	2018	2017	2018	2017
Distributed earnings allocated to common stock	\$6,491	\$ 4,928	\$18,420	\$ 14,514
Undistributed earnings allocated to common stock	13,272	12,122	42,141	35,162
Net earnings allocated to common stock	19,763	17,050	60,561	49,676
Net earnings allocated to participating securities	125	132	407	381
Net income allocated to common stock and participating securities	\$19,888	\$ 17,182	\$60,968	\$ 50,057
Weighted average shares outstanding for basic earnings per common share	25,965,692	25,935,867	25,958,125	25,922,218
Dilutive effect of stock compensation	—	—	—	—
Weighted average shares outstanding for diluted earnings per common share	25,965,692	25,935,867	25,958,125	25,922,218
Basic earnings per common share	\$0.76	\$ 0.66	\$2.33	\$ 1.92
Diluted earnings per common share	\$0.76	\$ 0.66	\$2.33	\$ 1.92

Note 10. Stock Based Compensation

As of September 30, 2018, the Company had four active stock-based employee compensation plans, which are more fully described in Note 16 of the Consolidated Financial Statements in 1st Source's Annual Report on Form 10-K for the year ended December 31, 2017. These plans include three executive stock award plans, the Executive Incentive Plan, the Restricted Stock Award Plan, the Strategic Deployment Incentive Plan; and the Employee Stock Purchase Plan. The 2011 Stock Option Plan was approved by the shareholders on April 21, 2011 but the Company had not made any grants through September 30, 2018.

Stock-based compensation expense for all stock-based compensation awards granted is based on the grant-date fair value. For all awards except stock option awards, the grant date fair value is either the fair market value per share or book value per share (corresponding to the type of stock awarded) as of the grant date. For stock option awards, the grant date fair value is estimated using the Black-Scholes option pricing model. For all awards the Company recognizes these compensation costs on a straight-line basis over the requisite service period of the award, for which the Company uses the related vesting term.

Total fair value of options vested and expensed was zero for the nine months ended September 30, 2018 and 2017. As of September 30, 2018 and 2017 there were no outstanding stock options. There were no stock options exercised during the nine months ended September 30, 2018 and 2017. All shares issued in connection with stock option exercises are issued from available treasury stock.

As of September 30, 2018, there was \$5.98 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 3.11 years.

Note 11. Accumulated Other Comprehensive Income (Loss)

The following table presents reclassifications out of accumulated other comprehensive income (loss) related to unrealized gains and losses on available-for-sale securities.

Three	Nine Months	
Months	Ended	Affected Line Item in the Statements of
Ended	September 30,	Income

Table of Contents

Note 12. Income Taxes

The total amount of unrecognized tax benefits that would affect the effective tax rate if recognized was zero at September 30, 2018 and \$0.72 million at December 31, 2017. Interest and penalties are recognized through the income tax provision. For the nine months ended September 30, 2018 and 2017, the Company recognized \$(0.09) million and \$0.05 million in interest or penalties, respectively. There was no accrued interest and penalties at September 30, 2018 and \$0.09 million at December 31, 2017.

Tax years that remain open and subject to audit include the federal 2015-2017 years and the Indiana 2014-2017 years. Additionally, the Company reached a state tax settlement for the 2015-2017 years and as a result, recorded a reduction of unrecognized tax benefits in the amount of \$1.05 million. The Company does not anticipate a significant change in the amount of uncertain tax positions within the next 12 months.

The Tax Cuts and Jobs Act was enacted on December 22, 2017. The Act reduces the U.S. federal corporate tax rate from 35% to 21%, effective January 1, 2018. During the third quarter of 2018, the Company completed its accounting for the provisional amounts recognized at December 31, 2017 and recorded a \$0.88 million benefit as provided by the U.S. Securities and Exchange Commission's SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act.

Note 13. Fair Value Measurements

The Company records certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are also utilized to determine the initial value of certain assets and liabilities, to perform impairment assessments, and for disclosure purposes. The Company uses quoted market prices and observable inputs to the maximum extent possible when measuring fair value. In the absence of quoted market prices, various valuation techniques are utilized to measure fair value. When possible, observable market data for identical or similar financial instruments is used in the valuation. When market data is not available, fair value is determined using valuation models that incorporate management's estimates of the assumptions a market participant would use in pricing the asset or liability.

Fair value measurements are classified within one of three levels based on the observability of the inputs used to determine fair value, as follows:

Level 1 — The valuation is based on quoted prices in active markets for identical instruments.

Level 2 — The valuation is based on observable inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 — The valuation is based on unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the instrument. Level 3 valuations are typically performed using pricing models, discounted cash flow methodologies, or similar techniques that incorporate management's own estimates of assumptions that market participants would use in pricing the instrument, or valuations that require significant management judgment or estimation.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The Company elected fair value accounting for mortgages held for sale. The Company believes the election for mortgages held for sale (which are economically hedged with free-standing derivatives) will reduce certain timing differences and better match changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets. At September 30, 2018 and December 31, 2017, all mortgages held for sale were carried at fair value.

Table of Contents

The following table shows the differences between the fair value carrying amount of mortgages held for sale measured at fair value and the aggregate unpaid principal amount the Company is contractually entitled to receive at maturity.

(Dollars in thousands)	Fair value carrying amount	Aggregate unpaid principal	Excess of fair value carrying amount over (under) unpaid principal	
September 30, 2018				
Mortgages held for sale reported at fair value	\$ 11,149	\$ 10,915	\$ 234	(1)
December 31, 2017				
Mortgages held for sale reported at fair value	\$ 13,123	\$ 12,967	\$ 156	(1)

The excess of fair value carrying amount over (under) unpaid principal is included in mortgage banking income (1) and includes changes in fair value at and subsequent to funding and gains and losses on the related loan commitment prior to funding.

Financial Instruments on Recurring Basis:

The following is a description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis:

Investment securities available-for-sale are valued primarily by a third party pricing agent. Prices supplied by the independent pricing agent, as well as their pricing methodologies and assumptions, are reviewed by the Company for reasonableness and to ensure such prices are aligned with market levels. In general, the Company's investment securities do not possess a complex structure that could introduce greater valuation risk. The portfolio mainly consists of traditional investments including U.S. Treasury and Federal agencies securities, Federal agency mortgage pass-through securities, and general obligation and revenue municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. On a quarterly basis, prices supplied by the pricing agent are validated by comparison to prices obtained from other third party sources for a material portion of the portfolio.

The valuation policy and procedures for Level 3 fair value measurements of available-for-sale debt securities are decided through collaboration between management of the Corporate Accounting and Funds Management departments. The changes in fair value measurement for Level 3 securities are analyzed on a periodic basis under a collaborative framework with the aforementioned departments. The methodology and variables used for input are derived from the combination of observable and unobservable inputs. The unobservable inputs are determined through internal assumptions that may vary from period to period due to external factors, such as market movement and credit rating adjustments.

Both the market and income valuation approaches are implemented using the following types of inputs:

U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Government-sponsored agency debt securities and corporate bonds are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.

Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs, are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.

State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Since some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities. Local direct placement municipal securities, with very little market activity, are priced using an appropriate market yield curve, which includes a credit spread assumption.

Mortgages held for sale and the related loan commitments and forward contracts (hedges) are valued using a market value approach and utilizing an appropriate current market yield and a loan commitment closing rate based on historical analysis.

Table of Contents

Interest rate swap positions, both assets and liabilities, are valued by a third-party pricing agent using an income approach and utilizing models that use as their basis readily observable market parameters. This valuation process considers various factors including interest rate yield curves, time value and volatility factors. Validation of third party agent valuations is accomplished by comparing those values to the Company's swap counterparty valuations. Management believes an adjustment is required to "mid-market" valuations for derivatives tied to its performing loan portfolio to recognize the imprecision and related exposure inherent in the process of estimating expected credit losses as well as velocity of deterioration evident with systemic risks embedded in these portfolios. Any change in the mid-market derivative valuation adjustment will be recognized immediately through the Consolidated Statements of Income.

The following table shows the balance of assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
September 30, 2018				
Assets:

Table of Contents

The following table shows changes in Level 3 assets measured at fair value on a recurring basis for the quarter ended September 30, 2018 and 2017.

(Dollars in thousands)	U.S. States and political subdivisions securities	Foreign government and other securities	Investment securities available-for-sale
Beginning balance July 1, 2018	\$ 1,641	\$ 707	\$ 2,348
Total gains or losses (realized/unrealized):			
Included in earnings	—	—	—
Included in other comprehensive income	(2) (1) (3
Purchases	—	200	200
Issuances	—	—	—
Sales	—	—	—
Settlements	—	—	—
Maturities	(80) (200) (280
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Ending balance September 30, 2018	\$ 1,559	\$ 706	\$ 2,265
Beginning balance July 1, 2017	\$ 1,801	\$ 302	\$ 2,103
Total gains or losses (realized/unrealized):			
Included in earnings	—	—	—
Included in other comprehensive income	17	—	17
Purchases	1,150	—	1,150
Issuances	—	—	—
Sales	—	—	—
Settlements	—	—	—
Maturities	—	(100) (100
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Ending balance September 30, 2017	\$ 2,968	\$ 202	\$ 3,170

There were no gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held at September 30, 2018 or 2017. No transfers between levels occurred during the three months ended September 30, 2018 or 2017.

The following table shows the valuation methodology and unobservable inputs for Level 3 assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Fair Value	Valuation Methodology	Unobservable Inputs	Range of Inputs
September 30, 2018				
Debt securities available-for sale				
Direct placement municipal securities	\$ 1,559	Discounted cash flows	Credit spread assumption	2.48% - 3.17%
Foreign government	\$ 706	Discounted cash flows	Market yield assumption	0.97% - 3.47%
December 31, 2017				
Debt securities available-for sale				
Direct placement municipal securities	\$ 2,155	Discounted cash flows	Credit spread assumption	2.21% - 2.93%

Foreign government	\$ 710	Discounted cash flows	Market yield assumption	0.35% - 1.23%
--------------------	--------	-----------------------	-------------------------	---------------

The sensitivity to changes in the unobservable inputs and their impact on the fair value measurement can be significant. The significant unobservable input for direct placement municipal securities are the credit spread assumptions used to determine the fair value measure. An increase (decrease) in the estimated spread assumption of the market will decrease (increase) the fair value measure of the securities. The significant unobservable input for foreign government securities are the market yield assumptions. The market yield assumption is negatively correlated to the fair value measure. An increase (decrease) in the determined market yield assumption will decrease (increase) the fair value measurement.

Table of Contents

Financial Instruments on Non-recurring Basis:

The Company may be required, from time to time, to measure certain other financial assets at fair value on a non-recurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or impairment charges of individual assets.

The Credit Policy Committee (CPC), a management committee, is responsible for overseeing the valuation processes and procedures for Level 3 measurements of impaired loans, other real estate and repossessions. The CPC reviews these assets on a quarterly basis to determine the accuracy of the observable inputs, generally third party appraisals, auction values, values derived from trade publications and data submitted by the borrower, and the appropriateness of the unobservable inputs, generally discounts due to current market conditions and collection issues. The CPC establishes discounts based on asset type and valuation source; deviations from the standard are documented. The discounts are reviewed periodically, annually at a minimum, to determine they remain appropriate. Consideration is given to current trends in market values for the asset categories and gains and losses on sales of similar assets. The Loan and Funds Management Committee of the Board of Directors is responsible for overseeing the CPC.

Discounts vary depending on the nature of the assets and the source of value. Aircraft are generally valued using quarterly trade publications adjusted for engine time, condition, maintenance programs, discounted by 10%. Likewise, autos are valued using current auction values, discounted by 10%; medium and heavy duty trucks are valued using trade publications and auction values, discounted by 15%. Construction equipment is generally valued using trade publications and auction values, discounted by 20%. Real estate is valued based on appraisals or evaluations, discounted by 20% with higher discounts for property in poor condition or property with characteristics which may make it more difficult to market. Commercial loans subject to borrowing base certificates are generally discounted by 20% for receivables and 40% - 75% for inventory with higher discounts when monthly borrowing base certificates are not required or received.

Impaired loans and related write-downs are based on the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are reviewed quarterly and estimated using customized discounting criteria, appraisals and dealer and trade magazine quotes which are used in a market valuation approach. In accordance with fair value measurements, only impaired loans for which a reserve for loan loss has been established based on the fair value of collateral require classification in the fair value hierarchy. As a result, only a portion of the Company's impaired loans are classified in the fair value hierarchy.

Partnership investments and the adjustments to fair value primarily result from application of lower of cost or fair value accounting. The partnership investments are priced using financial statements provided by the partnerships. Quantitative unobservable inputs are not reasonably available for reporting purposes.

The Company has established MSR valuation policies and procedures based on industry standards and to ensure valuation methodologies are consistent and verifiable. MSRs and related adjustments to fair value result from application of lower of cost or fair value accounting. For purposes of impairment, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. The fair value of each tranche of the servicing portfolio is estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. Prepayment rates and discount rates are derived through a third party pricing agent. Changes in the most significant inputs, including prepayment rates and discount rates, are compared to the changes in the fair value measurements and appropriate resolution is made. A fair value analysis is also obtained from an independent third party agent and compared to the internal valuation for reasonableness. MSRs do not trade in an active, open market with readily observable prices and though sales of MSRs do occur, precise terms and conditions typically are not readily available and the characteristics of the Company's servicing portfolio may differ from those of any servicing portfolios that do trade.

Other real estate is based on the fair value of the underlying collateral less expected selling costs. Collateral values are estimated primarily using appraisals and reflect a market value approach. Fair values are reviewed quarterly, and new appraisals are obtained annually. Repossessions are similarly valued.

For assets measured at fair value on a nonrecurring basis the following represents impairment charges (recoveries) recognized on these assets during the quarter ended September 30, 2018: impaired loans - \$10.41 million; partnership

investments - \$0.00 million; mortgage servicing rights - \$0.00 million; repossessions - \$0.98 million; and other real estate - \$0.00 million.

Table of Contents

The following table shows the carrying value of assets measured at fair value on a non-recurring basis.

(Dollars in thousands)	Level 1	Level 2	Level 3	Total

The methodologies for estimating fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The estimated fair value approximates carrying value for cash and due from banks, federal funds sold and interest bearing deposits with other banks and other investments. The methodologies for other financial assets and financial liabilities are discussed below:

Loans and Leases — For September 30, 2018, fair values of loans and leases are estimated on an exit price basis incorporating discounts for credit, liquidity and marketability factors. This is not comparable with the fair values disclosed for December 31, 2017, which were based on an entrance price basis. For that date, fair values of variable rate loans and leases that reprice frequently and with no significant change in credit risk were based on carrying values. The fair values of other loans and leases as of that date were estimated using discounted cash flow analyses which used interest rates then being offered for loans and leases with similar terms to borrowers of similar credit quality.

Deposits — The fair values for all deposits other than time deposits are equal to the amounts payable on demand (the carrying value). Fair values of variable rate time deposits are equal to their carrying values. Fair values for fixed rate time deposits are estimated using discounted cash flow analyses using interest rates currently being offered for deposits with similar remaining maturities.

Table of Contents

Short-Term Borrowings — The carrying values of Federal funds purchased, securities sold under repurchase agreements, and other short-term borrowings, including the liability related to mortgage loans available for repurchase under GNMA optional repurchase programs, approximate their fair values.

Long-Term Debt and Mandatorily Redeemable Securities — The fair values of long-term debt are estimated using discounted cash flow analyses, based on the current estimated incremental borrowing rates for similar types of borrowing arrangements. The carrying values of mandatorily redeemable securities are based on the current estimated cost of redeeming these securities which approximate their fair values.

Subordinated Notes — Fair values are estimated based on calculated market prices of comparable securities.

Off-Balance-Sheet Instruments — Contract and fair values for certain off-balance-sheet financial instruments (guarantees) are estimated based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Limitations — Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other such factors.

These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. These estimates are subjective in nature and require considerable judgment to interpret market data. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange, nor are they intended to represent the fair value of the Company as a whole. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of the respective balance sheet date. Although the Company is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Other significant assets, such as premises and equipment, other assets, and liabilities not defined as financial instruments, are not included in the above disclosures. Also, the fair value estimates for deposits do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

ITEM 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis is presented to provide information concerning 1st Source Corporation and its subsidiaries' (collectively referred to as "the Company", "we", and "our") financial condition as of September 30, 2018, as compared to December 31, 2017, and the results of operations for the three and nine months ended September 30, 2018 and 2017. This discussion and analysis should be read in conjunction with our consolidated financial statements and the financial and statistical data appearing elsewhere in this report and our 2017 Annual Report.

Except for historical information contained herein, the matters discussed in this document express "forward-looking statements." Generally, the words "believe," "contemplate," "seek," "plan," "possible," "assume," "expect," "intend," "targeted," "remain," "estimate," "anticipate," "project," "will," "should," "indicate," "would," "may" and other similar expressions are used to identify forward-looking statements but are not the exclusive means of identifying such statements. Those statements, including statements, projections, estimates or assumptions concerning future events or performance, and other statements that are other than statements of historical fact, are subject to material risks and uncertainties. We caution readers not to place undue reliance on any forward-looking statements, which speak only as of the date made. We may make other written or oral forward-looking statements from time to time. Readers are advised that various important factors could cause our actual results or circumstances for future periods to differ materially from those anticipated or projected in such forward-looking statements. Such factors include, but are not limited to, changes in law, regulations or GAAP; our competitive position within the markets we serve; increasing consolidation within the banking industry;

unforeseen changes in interest rates; unforeseen changes in loan prepayment assumptions; unforeseen downturns in or major events affecting the local, regional or national economies or the industries in which we have credit concentrations; and other matters discussed in our filings with the SEC, including our Annual Report on Form 10-K for 2017, which filings are available from the SEC. We undertake no obligation to publicly update or revise any forward-looking statements.

Table of Contents**FINANCIAL CONDITION**

Our total assets at September 30, 2018 were \$6.29 billion, an increase of \$405.89 million or 6.89% from December 31, 2017. Total investment securities, available-for-sale were \$972.17 million, an increase of \$68.14 million or 7.54% from December 31, 2017. Federal funds sold and interest bearing deposits with other banks were \$45.51 million, an increase of \$41.12 million or 934.88% from December 31, 2017.

Total loans and leases were \$4.83 billion, an increase of \$297.88 million, or 6.58% from December 31, 2017. Our foreign loan and lease outstandings, all denominated in U.S. dollars were \$230.41 million and \$233.37 million as of September 30, 2018 and December 31, 2017, respectively. Foreign loans and leases are in aircraft financing. Loan and lease outstandings to borrowers in Brazil and Mexico were \$87.61 million and \$126.81 million as of September 30, 2018, respectively, compared to \$101.35 million and \$121.02 million as of December 31, 2017, respectively. As of September 30, 2018 and December 31, 2017 there was not a significant concentration in any other country. Solar loan and lease outstandings were \$78.44 million as of September 30, 2018, an increase of \$1.96 million or 2.56% from the \$76.48 million at December 31, 2017. Solar loan and lease outstandings are included in commercial and agricultural loans. Equipment owned under operating leases was \$137.49 million, a decrease of \$2.09 million, or 1.50% compared to December 31, 2017.

Total deposits were \$5.06 billion, an increase of \$309.25 million or 6.51% from the end of 2017. Short-term borrowings were \$290.71 million, an increase of \$76.11 million, or 35.47% from December 31, 2017. Long-term debt and mandatorily redeemable securities were \$70.92 million, an increase of \$0.86 million or 1.23% from December 31, 2017.

The following table shows accrued income and other assets.

(Dollars in thousands)	September 30, 2018	December 31, 2017
Accrued income and other assets:		
Bank owned life insurance cash surrender value	\$ 67,207	\$ 65,816
Accrued interest receivable	20,459	17,133
Mortgage servicing rights	4,276	4,349
Other real estate	432	1,312
Repossessions	13,041	10,114
All other assets	60,077	56,688
Total accrued income and other assets	\$ 165,492	\$ 155,412

CAPITAL

As of September 30, 2018, total shareholders' equity was \$750.44 million, up \$31.90 million, or 4.44% from the \$718.54 million at December 31, 2017. In addition to net income of \$60.97 million, other significant changes in shareholders' equity during the first nine months of 2018 included \$18.46 million of dividends paid. The accumulated other comprehensive loss component of shareholders' equity totaled \$15.68 million at September 30, 2018, compared to \$3.33 million at December 31, 2017. Our equity-to-assets ratio was 11.92% as of September 30, 2018, compared to 12.20% at December 31, 2017. Book value per common share rose to \$28.90 at September 30, 2018, from \$27.70 at December 31, 2017.

We declared and paid cash dividends per common share of \$0.25 during the third quarter of 2018. The trailing four quarters dividend payout ratio, representing cash dividends per common share divided by diluted earnings per common share, was 30.13%. The dividend payout is continually reviewed by management and the Board of Directors subject to the Company's capital and dividend policy.

The banking regulators have established guidelines for leverage capital requirements, expressed in terms of Tier 1 or core capital as a percentage of average assets, to measure the soundness of a financial institution. In addition, banking regulators have established risk-based capital guidelines for U.S. banking organizations.

Table of Contents

The actual capital amounts and ratios of 1st Source Corporation and 1st Source Bank as of September 30, 2018, are presented in the table below.

(Dollars in thousands)	Actual		Minimum Capital Adequacy		Minimum Capital Adequacy with Capital Buffer ⁽¹⁾		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to Risk-Weighted Assets):								
1st Source Corporation	\$813,015	14.66%	\$443,556	8.00%	\$547,514	9.875%	\$554,445	10.00%
1st Source Bank	731,009	13.17	444,020	8.00	548,087	9.875	555,025	10.00
Tier 1 Capital (to Risk-Weighted Assets):								
1st Source Corporation	743,317	13.41	332,667	6.00	436,625	7.875	443,556	8.00
1st Source Bank	661,240	11.91	333,015	6.00	437,082	7.875	444,020	8.00
Common Equity Tier 1 Capital (to Risk-Weighted Assets):								
1st Source Corporation	686,317	12.38	249,500	4.50	353,459	6.375	360,389	6.50
1st Source Bank	661,240	11.91	249,761	4.50	353,829	6.375	360,766	6.50
Tier 1 Capital (to Average Assets):								
1st Source Corporation	743,317	12.03	247,135	4.00	N/A	N/A	308,919	5.00
1st Source Bank	661,240	10.71	247,012	4.00	N/A	N/A	308,764	5.00

(1) The capital conservation buffer requirement will be phased in over three years beginning in 2016. The capital buffer requirement effectively raises the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5%, and the total capital ratio to 10.5% on a fully phased-in basis on January 1, 2019.

LIQUIDITY AND INTEREST RATE SENSITIVITY

Effective liquidity management ensures that the cash flow requirements of depositors and borrowers, as well as our operating cash needs are met. Funds are available from a number of sources, including the securities portfolio, the core deposit base, access to the national brokered certificates of deposit market, national listing service certificates of deposit, Federal Home Loan Bank (FHLB) borrowings, Federal Reserve Bank (FRB) borrowings, and the capability to package loans for sale.

We have borrowing sources available to supplement deposits and meet our funding needs. 1st Source Bank has established relationships with several banks to provide short term borrowings in the form of federal funds purchased. At September 30, 2018, we had no borrowings in the federal funds market. We could borrow \$265.00 million in additional funds for a short time from these banks on a collective basis. As of September 30, 2018, we had \$206.61 million outstanding in FHLB advances and could borrow an additional \$320.58 million. We also had no outstandings with the FRB and could borrow \$595.62 million as of September 30, 2018.

Our loan to asset ratio was 76.68% at September 30, 2018 compared to 76.91% at December 31, 2017 and 76.41% at September 30, 2017. Cash and cash equivalents totaled \$113.88 million at September 30, 2018 compared to \$78.03 million at December 31, 2017 and \$99.42 million at September 30, 2017. At September 30, 2018, the Statement of Financial Condition was rate sensitive by \$294.62 million more assets than liabilities scheduled to reprice within one year, or approximately 1.11%. Management believes that the present funding sources provide adequate liquidity to meet our cash flow needs.

Under Indiana law governing the collateralization of public fund deposits, the Indiana Board of Depositories determines which financial institutions are required to pledge collateral based on the strength of their financial ratings. We have been informed that no collateral is required for our public fund deposits. However, the Board of Depositories could alter this requirement in the future and adversely impact our liquidity. Our potential liquidity exposure if we must pledge collateral is approximately \$750 million.

RESULTS OF OPERATIONS

Net income for the three and nine month periods ended September 30, 2018 was \$19.89 million and \$60.97 million, compared to \$17.18 million and \$50.06 million for the same periods in 2017. Diluted net income per common share was \$0.76 and \$2.33 for the three and nine month periods ended September 30, 2018, compared to \$0.66 and \$1.92 for the same periods in 2017. Return on average common shareholders' equity was 11.04% for the nine months ended September 30, 2018, compared to 9.60% in 2017. The return on total average assets was 1.33% for the nine months ended September 30, 2018, compared to 1.20% in 2017.

Net income increased for the nine months ended September 30, 2018 compared to the first nine months of 2017. Net interest income increased and income tax expense decreased which was offset by an increase in provision for loan and lease losses and noninterest expense. Details of the changes in the various components of net income are discussed further below.

Table of Contents

NET INTEREST INCOME

The following tables provide an analysis of net interest income and illustrates the interest income earned and interest expense charged for each major component of interest earning assets and interest bearing liabilities. Yields/rates are computed on a tax-equivalent basis, using a 21% rate (35% for periods prior to 2018). Nonaccrual loans and leases are included in the average loan and lease balance outstanding.

(1) See "Reconciliation of Non-GAAP Financial Measures" at the end of this section for additional information on this performance measure/ratio.

Quarter Ended September 30, 2018 compared to the Quarter Ended September 30, 2017

The taxable-equivalent net interest income for the three months ended September 30, 2018 was \$54.56 million, an increase of 14.45% over the same period in 2017. The net interest margin on a fully taxable-equivalent basis was 3.71% for the three months ended September 30, 2018, compared to 3.57% for the three months ended September 30, 2017.

During the three month period ended September 30, 2018, average earning assets increased \$538.75 million or 10.16% over the comparable period in 2017. Average interest-bearing liabilities increased \$386.31 million or 9.81%. The yield on average earning assets increased 37 basis points to 4.48% from 4.11% primarily due to higher rates on loans and leases and taxable investment securities available-for-sale. Total cost of average interest-bearing liabilities increased 31 basis points to 1.04% from 0.73% as a result of the rising interest rate environment. The result to the net interest margin, or the ratio of net interest income to average earning assets, was an increase of 14 basis points.

Table of Contents

The largest contributor to the improved yield on average earning assets for the three months ended September 30, 2018, compared to the three months ended September 30, 2017, was an increase in yields on net loans and leases of 37 basis points primarily due to market conditions as a result of recent Federal interest rate increases. The improved yield on net loans and leases was also impacted by 5 basis points due to net interest reversals of \$0.31 million in the third quarter of 2018 vs. net interest recoveries of \$0.28 million in the third quarter of 2017. Average net loans and leases increased \$434.68 million or 9.91% with the largest increases occurring within the commercial and agricultural and construction equipment portfolios as a result of market demand. Total average investment securities increased \$105.71 million or 12.31%. Average mortgages held for sale decreased \$3.82 million or 29.74%. Average other investments, which include federal funds sold, time deposits with other banks, Federal Reserve Bank excess balances, Federal Reserve Bank and Federal Home Loan Bank (FHLB) stock and commercial paper increased \$2.17 million or 5.22% from the third quarter of 2017.

Average interest-bearing deposits increased \$443.54 million or 12.52% for the third quarter of 2018 over the same period in 2017 primarily due to organic customer growth and to support increased loan and lease demand. The effective rate paid on average interest-bearing deposits grew 36 basis points to 0.94% from 0.58%. The increase in the average cost of interest-bearing deposits was primarily the result of higher rates, competitive pressure on rates, and a shift in the deposit mix from the third quarter of 2017.

Average short-term borrowings decreased \$57.79 million or 21.81% for the third quarter of 2018 compared to the same period in 2017. Interest paid on short-term borrowings increased 40 basis points due to recent Federal interest rate increases. Interest paid on subordinated notes decreased 70 basis points during the third quarter of 2018 from the same period a year ago due to a conversion to a variable rate associated with one tranche that took effect September 15, 2017. Average long-term debt and mandatorily redeemable securities balances were relatively flat. Interest paid on long-term debt and mandatorily redeemable securities decreased 61 basis points during the third quarter of 2018 from the same period in 2017 primarily due to lower rates on mandatorily redeemable securities.

Table of Contents

Nine Months Ended September 30, 2018 compared to the Nine Months Ended September 30, 2017

The taxable-equivalent net interest income for the nine months ended September 30, 2018 was \$158.68 million, an increase of 14.83% over the comparable period in 2017. The net interest margin on a fully taxable-equivalent basis was 3.71% compared to a net interest margin of 3.56% for the same period in 2017.

During the nine month period ended September 30, 2018, average earning assets increased \$529.37 million or 10.19% over the comparable period in 2017. Average interest-bearing liabilities increased \$426.78 million or 11.07%. The yield on average earning assets increased 36 basis points to 4.42% from 4.06% primarily due to higher rates on loans and leases and investment securities available- for-sale. The total cost of average interest-bearing liabilities increased 29 basis points to 0.96% from 0.67%. The result to the net interest margin, or the ratio of net interest income to average earning assets, was an increase of 15 basis points.

The largest contributor to the improved yield on average earning assets for the nine months ended September 30, 2018, compared to the nine months ended September 30, 2017, was an increase in yields on net loans and leases of 40 basis points primarily due to market conditions as a result of recent Federal interest rate increases as well as the recognition of an unaccreted purchased loan discount and a prepayment penalty on two separate early loan payoffs of \$1.03 million which had a positive 3 basis point effect. The improved yield on net loans and leases was also impacted by 2 basis points due to net interest recoveries of \$0.17 million in 2018 vs. \$0.89 million in 2017. Average net loans and leases increased \$432.89 million or 10.08% primarily in the commercial and agricultural and construction equipment portfolios as a result of market demand. Total average investment securities increased \$98.38 million or 11.64%. Average mortgages held for sale decreased \$2.88 million or 26.67%. Average other investments, which include federal funds sold, time deposits with other banks, Federal Reserve Bank excess balances, Federal Reserve Bank and FHLB stock and commercial paper, increased \$0.97 million or 2.22%.

Average interest-bearing deposits increased \$416.27 million or 12.01% for the first nine months of 2018 over the same period in 2017 largely due to organic customer growth and to support increased loan and lease demand. The effective rate paid on average interest-bearing deposits grew 32 basis points to 0.84% compared to 0.52%. The increase in the average cost of interest-bearing deposits was primarily the result of higher rates, competitive pressure on rates, and a shift in the deposit mix.

Average short-term borrowings increased \$16.31 million or 6.36% for the first nine months of 2018 compared to the same period in 2017. Interest paid on short-term borrowings increased 57 basis points. The growth in short-term borrowings was primarily the result of higher borrowings with the FHLB. Interest paid on subordinated notes decreased 97 basis points due to a conversion to a variable rate associated with one tranche that took effect September 15, 2017. Average long-term debt and mandatorily redeemable securities decreased \$5.80 million or 7.57%. Interest paid on long-term debt and mandatorily redeemable securities decreased 30 basis points due to lower rates on mandatorily redeemable securities.

Reconciliation of Non-GAAP Financial Measures

The accounting and reporting policies of 1st Source conform to generally accepted accounting principles (“GAAP”) in the United States and prevailing practices in the banking industry. However, certain non-GAAP performance measures are used by management to evaluate and measure the Company’s performance. These include taxable-equivalent net interest income (including its individual components) and net interest margin (including its individual components). Management believes that these measures provide users of the Company’s financial information a more meaningful view of the performance of the interest-earning assets and interest-bearing liabilities.

Table of Contents

Management reviews yields on certain asset categories and the net interest margin of the Company and its banking subsidiaries on a fully taxable-equivalent (“FTE”) basis. In this non-GAAP presentation, net interest income is adjusted to reflect tax-exempt interest income on an equivalent before-tax basis. This measure ensures comparability of net interest income arising from both taxable and tax-exempt sources.

(Dollars in thousands)	Three Months Ended		Nine Months Ended

PROVISION AND RESERVE FOR LOAN AND LEASE LOSSES

The provision for loan and lease losses for the three and nine month periods ended September 30, 2018 was \$6.16 million and \$14.76 million compared to a provision for loan and lease losses in the three and nine month periods ended September 30, 2017 of \$1.62 million and \$5.36 million, respectively. Net charge-offs of \$10.86 million were recorded for the third quarter 2018, compared to net charge-offs of \$0.16 million for the same quarter a year ago. Year-to-date net charge-offs of \$11.34 million have been recorded in 2018, compared to net charge-offs of \$0.53 million through September 30, 2017.

The increase in the amount of the provision for the three and nine month periods ended September 30, 2018 was principally driven by strong loan growth and net charge-offs. Loan growth during the nine month period ended September 30, 2018 was \$297.88 million compared to \$248.65 million for the same period last year. In addition, we realized consecutive increases in our special attention credits for each quarter in 2018. A large dollar foreign aircraft account (outside of Latin America) was placed in nonaccrual status during the second quarter and a significant charge-off was recognized during the third quarter. A large dollar account in our auto and light truck portfolio was placed in nonaccrual status during the third quarter.

We continue to evaluate risks which may impact our loan portfolios. We believe geopolitical events have the potential to negatively impact the U.S. economy. Current concerns include the tariff disputes, particularly between China and the U.S., and the potential for an escalating trade war. Political uncertainty continues in Latin America, with ongoing corruption scandals. The recent election in Mexico and forthcoming election in Brazil raise the possibility that new leadership could reverse recent structural reform. The renegotiating of NAFTA should reduce trade related uncertainties for both Canada and Mexico if the agreement is ratified by Congress. Concerns continue to be heightened globally due to actual and potential terrorist attacks.

Another area of concern continues to be our aircraft portfolio where we have a collateral concentration and \$230 million in foreign exposure. The aircraft industry was among the sectors affected most by the sluggish economy. Values for some aircraft have not fully recovered. We remain concerned about the prolonged low prices for several models. The majority of our foreign exposure is in Mexico and Brazil. Brazil is beginning to show some positive economic signs as it emerges from its worst recession in twenty-five years. However, the country continues to be plagued by corruption scandals and violence. Mexico’s economy is stronger and will benefit from the renegotiated

NAFTA however violence and drug related crimes remain concerning. We continue to monitor individual customer performance and assess risks in the portfolio as a whole.

On September 30, 2018, 30 day and over loan and lease delinquencies as a percentage of loan and lease outstandings were 0.42% compared to 0.27% on September 30, 2017. The increase in delinquencies is largely attributable to the auto and light truck and construction equipment portfolios. The reserve for loan and lease losses as a percentage of loans and leases outstanding at the end of the period was 2.04% compared to 2.10% one year ago. The decrease in the reserve as a percent of loans and leases outstanding was primarily due to charging off a significant exposure. A summary of loan and lease loss experience during the three and nine months ended September 30, 2018 and 2017 is located in Note 5 of the Consolidated Financial Statements.

Table of Contents

A loan or lease is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. We evaluate loans and leases exceeding \$100,000 for impairment and establish a specific reserve as a component of the reserve for loan and lease losses when it is probable all amounts due will not be collected pursuant to the contractual terms of the loan or lease and the recorded investment in the loan or lease exceeds its fair value. A summary of impaired loans as of September 30, 2018 and December 31, 2017 is reflected in Note 4 of the Consolidated Financial Statements.

NONPERFORMING ASSETS

The following table shows nonperforming assets.

(Dollars in thousands)	September 30, 2018	December 31, 2017	September 30, 2017
Loans and leases past due 90 days or more	\$ 125	\$ 459	\$ 208
Nonaccrual loans and leases	36,028	19,405	15,066
Other real estate	432	1,312	1,341
Repossessions	13,041	10,114	12,913
Equipment owned under operating leases	48	9	14
Total nonperforming assets	\$ 49,674	\$ 31,299	\$ 29,542

Nonperforming assets as a percentage of loans and leases were 1.00% at September 30, 2018, 0.67% at December 31, 2017, and 0.64% at September 30, 2017. Nonperforming assets totaled \$49.67 million at September 30, 2018, an increase of 58.71% from the \$31.30 million reported at December 31, 2017, and a 68.15% increase from the \$29.54 million reported at September 30, 2017. The increase in nonperforming assets during the first nine months of 2018 was related to higher nonaccrual loans and leases mainly from a few larger relationships in the aircraft and auto and light truck portfolios, and repossessions offset by a reduction in other real estate. The increase in nonperforming assets at September 30, 2018 from September 30, 2017 occurred primarily in nonaccrual loans and leases mainly related to a few larger relationships in the aircraft and auto and light truck portfolios offset by a reduction in other real estate. The increase in nonaccrual loans and leases at September 30, 2018 from December 31, 2017 occurred primarily in the aircraft, auto and light truck, and construction equipment portfolios offset by a decrease in the commercial real estate portfolio. The increase in nonaccrual loans and leases at September 30, 2018 from September 30, 2017 occurred primarily in the auto and light truck, aircraft, and construction equipment portfolios offset by decreases in the commercial and agricultural, commercial real estate and medium and heavy duty truck portfolios. A summary of nonaccrual loans and leases and past due aging for the period ended September 30, 2018 and December 31, 2017 is located in Note 4 of the Consolidated Financial Statements.

Other real estate is the result of foreclosing on real estate in the local market for which we have a current appraisal and are well secured. Other real estate decreased over the past year due to sales of existing properties outpacing current foreclosures.

Repossessions consisted mainly of aircraft financing. At the time of repossession, the recorded amount of the loan or lease is written down to the fair value of the equipment or vehicle by a charge to the reserve for loan and lease losses or other income, if a positive adjustment, unless the equipment is in the process of immediate sale. Any subsequent fair value write-downs or write-ups, to the extent of previous write-downs, are included in noninterest expense.

The following table shows a summary of other real estate and repossessions.

(Dollars in thousands)	September 30, 2018	December 31, 2017	September 30, 2017
Commercial and agricultural	\$ 21	\$ —	\$ —
Auto and light truck	309	165	387
Medium and heavy duty truck	—	—	—
Aircraft	12,598	9,335	12,012
Construction equipment	80	582	482
Commercial real estate	26	481	456

Edgar Filing: 1ST SOURCE CORP - Form 10-Q

Residential real estate and home equity	357	831	885
Consumer	82	32	32
Total	\$ 13,473	\$ 11,426	\$ 14,254

For financial statement purposes, nonaccrual loans and leases are included in loan and lease outstandings, whereas repossessions and other real estate are included in other assets.

NM = Not Meaningful

Trust and wealth advisory fees (which include investment management fees, estate administration fees, mutual fund fees, annuity fees, and fiduciary fees) increased during the three and nine months ended September 30, 2018 compared with the same periods a year ago. Trust and wealth advisory fees are largely based on the number and size of client relationships and the market value of assets under management. The market value of trust assets under management at September 30, 2018 and December 31, 2017 was \$4.68 billion and \$4.63 billion, respectively.

Service charges on deposit accounts declined for the three and nine months ended September 30, 2018 over the comparable periods in 2017. The decrease in service charges on deposit accounts primarily reflects a lower volume of nonsufficient fund transactions and a decrease in business account fees.

Debit card income improved in the three and nine months ended September 30, 2018 over the same periods a year ago. The majority of the improvement in debit card income was the result of an increased volume of debit card transactions in 2018.

Mortgage banking income decreased in the three and nine months ended September 30, 2018 as compared to the same periods a year ago. The decrease was primarily caused by lower volume of loans originated for the secondary market in 2018.

Insurance commissions were higher during the three and nine months ended September 30, 2018 over the same periods a year ago. The increase in insurance commissions was primarily due to an increased book of business and higher contingent commissions received.

Equipment rental income grew for the three and nine months ended September 30, 2018 over the comparable periods in 2017. The increase was the result of the average equipment rental portfolio growing 9% over the same periods a year ago due to improving market conditions for equipment finance mainly in specialty vehicles and solar financing. The growth in equipment rental income was offset by a similar increase in depreciation on equipment owned under operating leases.

Losses on investment securities available-for-sale during the nine months ended September 30, 2018 compared with gains on investment securities available-for-sale in the same period in 2017 resulted primarily from repositioning the portfolio during the first quarter of 2018 in response to recent tax reform.

Other income decreased for the three months ended September 30, 2018 and increased for the nine months ended September 30, 2018 over the comparable periods in 2017. The decrease during the third quarter of 2018 compared to the same period in 2017 was primarily a result of lower customer swap fees and reduced net gains on partnership investments offset by increased loan servicing fees, higher claim proceeds from bank owned life insurance and a rise in brokerage fees and commissions. The increase in other income for the first nine months of 2018 compared to the same period a year ago was primarily a result of increased net partnership investment gains, higher loan servicing fees,

a rise in brokerage fees and commissions and higher claim proceeds from bank owned life insurance offset by lower customer swap fees and reduced fees on standby letters of credit.

NONINTEREST EXPENSE

The following table shows the details of noninterest expense.

(Dollars in thousands)	Three Months Ended September 30,				Nine Months Ended September 30,				
	2018	2017	\$ Change	% Change	2018	2017	\$ Change	% Change	
Noninterest expense:									
Salaries and employee benefits	\$23,164	\$22,016	1,148	5.21 %	\$69,391	\$64,073	5,318	8.30 %	
Net occupancy	2,523	2,806	(283)	(10.09)%	7,504	7,768	(264)	(3.40)%	
Furniture and equipment	5,769	5,363	406	7.57 %	16,942	15,264	1,678	10.99 %	
Depreciation – leased equipment	6,580	6,565	15	0.23 %	19,692	18,541	1,151	6.21 %	
Professional fees	1,883	1,765	118	6.69 %	5,628	4,514	1,114	24.68 %	
Supplies and communication	1,635	1,316	319	24.24 %	4,687	3,911	776	19.84 %	
FDIC and other insurance	855	693	162	23.38 %	2,267	1,889	378	20.01 %	
Business development and marketing	1,663	1,199	464	38.70 %	4,921	4,352	569	13.07 %	
Loan and lease collection and repossession	1,563	1,093	470	43.00 %	3,079	2,058	1,021	49.61 %	
Other	1,707	1,644	63	3.83 %	4,665	4,314	351	8.14 %	
Total noninterest expense	\$47,342	\$44,460	2,882	6.48 %	\$138,776	\$126,684	12,092	9.55 %	

Salaries and employee benefits increased during the three and nine months ended September 30, 2018 compared to the same periods in 2017. The increase during the three months ended September 30, 2018 was mainly the result of higher base salaries as a result of normal merit increases and more full time equivalent summer employees offset by a reduction in group insurance claims. The increase during the nine months ended September 30, 2018 was mainly the result of higher base salaries as a result of normal merit increases and more full time equivalent summer employees, a rise in incentive compensation, and higher group insurance claims.

Net occupancy expense decreased during the three and nine months ended September 30, 2018 compared to the same periods a year ago. The decrease for 2018 was primarily attributable to lower building depreciation and reduced repair and maintenance costs compared to 2017.

Furniture and equipment expense, including depreciation, increased during the three and nine months ended September 30, 2018 compared to the same periods in 2017. Furniture and equipment expense was higher in 2018 mainly due to software maintenance costs related to a customer relationship management project and computer processing charges.

Depreciation on leased equipment was flat for the three months ended September 30, 2018 and increased during the first nine months of 2018 compared to the same periods in 2017. During the first nine months of 2018, depreciation on leased equipment grew in conjunction with the growth in equipment rental income as compared to one year ago.

Professional fees increased during the third quarter and first nine months of 2018 compared to the same periods a year ago. The increase was mainly due to increased utilization of consulting services related to a customer relationship management project, information technology projects as well as a regulatory compliance project.

Supplies and communication grew during the third quarter and first nine months of 2018 compared to the same periods a year ago. The increase resulted primarily from higher data communication line charges as bandwidth is improved and a one-time reduction in postage costs in 2017.

FDIC and other insurance rose during the three and nine months ended September 30, 2018 compared to the same periods in 2017. The increase in 2018 was mainly due to higher assessments for FDIC premiums in conjunction with overall asset growth and a rise in other insurance costs.

Business development and marketing expense increased during the third quarter and first nine months of 2018 compared to the same periods a year ago. The expense increase during 2018 was mainly the result of additional marketing promotions offset by lower charitable contributions.

Loan and lease collection and repossession expense increased during the three and nine months ended September 30, 2018 compared to the same periods in 2017. The higher expense was mainly due to increased valuation adjustments

on repossessed assets offset by reduced losses on the sale of repossessed assets.

39

Table of Contents

Other expenses were higher during the three and nine months ended September 30, 2018 compared to the same periods in 2017. The increase was primarily related to one-time trust losses and reduced gains on the sale of leased equipment offset by a decrease in provision for unfunded loan commitments, lower intangible asset amortization as items fully amortize and impairment writedowns on branches in 2017 not present in 2018.

INCOME TAXES

The provision for income taxes for the three and nine month periods ended September 30, 2018 was \$5.04 million and \$16.45 million, compared to \$9.56 million and \$27.75 million for the same periods in 2017. The effective tax rate was 20.20% and 35.75% for the third quarter ended September 30, 2018 and 2017, respectively and 21.25% and 35.67% for the first nine months ended September 30, 2018 and 2017, respectively. The change in effective tax rate was due primarily to the decrease in the federal tax rate from 35% in 2017 to 21% in 2018. Additionally, a \$0.80 million benefit from a state tax settlement was recorded during the second quarter of 2018 and a \$0.88 million benefit from finalization of the provisional amounts recorded at December 31, 2017 related to the impact of the federal tax rate change was recognized in the third quarter of 2018. The impact of those items resulted in an effective tax rate decrease of 3.53% and 2.17% for the three and nine months ended September 30, 2018, respectively. See Note 12 for further information regarding the Tax Cuts and Jobs Act.

ITEM 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risks faced by 1st Source since December 31, 2017. For information regarding our market risk, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2017.

ITEM 4.

CONTROLS AND PROCEDURES

As of the end of the period covered by this report an evaluation was carried out, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, at September 30, 2018, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by 1st Source in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are designed to ensure that information required to be disclosed in those reports is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

In addition, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the third fiscal quarter of 2018 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

1st Source and its subsidiaries are involved in various legal proceedings incidental to the conduct of our businesses. Management does not expect that the outcome of any such proceedings will have a material adverse effect on our consolidated financial position or results of operations.

ITEM 1A. Risk Factors.

There have been no material changes in risks faced by 1st Source since December 31, 2017. For information regarding our risk factors, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2017.
