-DILUTED EPS INCREASES 56% FOR THE YEAR

Edgar Filing: PAR TECHNOLOGY CORP - Form 8-K

NEW HARTFORD, NY, PAR TECHNOLOGY CORPORATION (NYSE:PTC)

(New Hartford, NY- February 14, 2006) PAR Technology Corporation (NYSE: PTC), a leader in providing integrated hardware, software and service solutions to the hospitality industry, and provider of Government I/T solutions and services, today reported financial results for the fourth quarter and year ended December 31, 2005.

For the fourth quarter ended December 31, 2005, PAR Technology Corporation reported net revenues of \$53.5 million compared to \$51.4 million in the fourth quarter 2004, an increase of 4%. Net income rose 74% to \$3.2 million versus the \$1.9 million earned in the fourth quarter one year ago. The Company reported diluted net income per share of \$0.22 for this past quarter, compared to the \$0.13 reported for the same period a year earlier, growing 69%.

For the year ended December 31, 2005, PAR Technology Corporation reported net revenues of \$205.6 million, an 18% increase from the \$174.9 million reported one year ago. The Company also reported net income of \$9.4 million in 2005 versus \$5.6 million last year, an increase of 67%. Diluted net income per share in 2005 was reported at \$0.64, an increase of 56% compared to diluted net income per share of \$0.41 reported for the year 2004.

"We are very pleased by our fourth quarter and full-year results in 2005, which include record revenues for the fourth quarter and the entire year. Our continued success is attributed to significant customer retention, contract and margin expansions and core growth across all business lines," commented John W. Sammon, Chairman and CEO. "Our hospitality technology business continued its positive momentum for the fourth quarter and the year, posting revenue and earnings growth and adding new accounts like Papa Murphy's Pizza chain and the Sanibel Harbour Resort.

"The quarter's results were driven by the continued healthy performance across all segments of the hospitality technology market and by the improved margins we have been realizing due to the increase in software revenues. We closed on our acquisition of PixelPoint Technologies this past October and strongly feel this is a natural progression for our business as we now can market specific software products to the table service restaurant segment of hospitality. Internationally, we will continue to facilitate our customer's new store growth, specifically in the Asia/Pacific region. The international segment experienced strong growth both for the quarter and the year."

Sammon continued "Our government I/T services business also had strong results in 2005. During the quarter we signed agreements to operate a Navy communication facility in Lago Patria, Italy, which marked an expansion of our current relationship in the European theatre. In 2005 we also extended our existing program outside the military specifically with contract awards from the General Services Administration and the International Broadcasting Bureau."

"As PAR Technology enters its next phase of growth and business opportunities, it is extremely gratifying to look back on what our employees have achieved during the past two years," said Sammon in closing. "Our team has created a leading competitive position in hospitality technology that combines our superior design and customer service skills, including our intimate knowledge of hospitality markets with an intense focus on meeting our customers' needs. As a result, we are now in a position to grow our leadership position in the various hospitality markets we have identified."

This release contains forward-looking statements concerning the Company's strategic plans, market opportunities, cash flows, liquidity, and future growth. These forward looking statements are neither promises nor guarantees but are

subject to risks and uncertainties that could cause actual results to differ materially from those set forth in the forward looking statements, including without limitation, risks in technology development and commercialization, risks in product development and market acceptance of and demand for the Company's products, risks of downturns in economic conditions generally, and in the quick service sector of the restaurant market and the hospitality technology marketplace specifically, risks of intellectual property rights and litigation, risks associated with foreign sales and high customer concentration and other risks detailed in the Company's filings with the Securities and Exchange Commission. The Company cautions investors not to place undue reliance on these statements, which are current only as of the date of this release. The Company disclaims any obligation to update or supplement these statements as a result of changing circumstances or otherwise.

PAR Technology Corporation is a leading provider of professional services and enterprise business intelligence software and hardware to the hospitality industry. PAR develops, markets and supports hardware and software products that improve the ability of hospitality business professionals to make timely, fact-based business decisions. The Company is a premier provider of I/T management solutions to hotel and restaurant companies, with over 40,000 installations worldwide in 100 countries. PAR is a leader in providing computer-based system design and engineering services to the Department of Defense and Federal Government Agencies. PAR Technology Corporation's stock is traded on the New York Stock Exchange under the symbol PTC. For more information visit the Company's website at www.partech.com.
