The number of options granted effective 3/1/07 is not known at this time. The number is calculated as a function of base pay, a long-term incentive (LTI) percentage and the fair value of the option. The Binomial Lattice option valuation model will be used to estimate the fair

- (1) value of the option. This model requires the input of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for determining the number of options granted is:  $\text{number of options} = (\text{base pay} \times \text{LTI}\%) / \text{option fair value}$ . This Form 4 will be amended to report the number of options granted when that number has been calculated.

- (2) Granted under the issuer's 2004 Equity Incentive Plan, exercisable in four equal annual installments commencing on 3/1/08.

Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, *see* Instruction 6 for procedure.
