**Item 2.02 Results of Operations and Financial Condition.**

On July 25, 2007, Acxiom Corporation (the Company) issued a press release announcing the results of its financial performance for the first quarter of fiscal year 2008. The press release is furnished herewith as Exhibit 99.1 and incorporated by reference herein.

The Company's press release and other communications from time to time include certain non-GAAP financial measures. A non-GAAP financial measure is defined as a numerical measure of a company's financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in the Company's financial statements.

The attached press release utilizes a non-GAAP measure of free cash flow available to equity. Free cash flow available to equity is defined as operating cash flow less cash used by investing activities (excluding the impact of cash paid in acquisitions), less required payments of debt (total debt payments excluding payments on the line of credit). The Company's management believes that this measure of free cash flow available to equity is superior to the previously reported free cash flow, since it represents the amount of money available for the Company's discretionary spending after funding all required obligations including scheduled debt payments, and it therefore provides a useful measure of liquidity for assessing the amount of cash available for general corporate and strategic purposes.

The non-GAAP financial measure used by the Company in the attached press release may not be comparable to similarly titled measures used by other companies and should not be considered in isolation or as a substitute for measures of performance or liquidity prepared in accordance with GAAP.
