KOPIN CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements include the accounts of Kopin Corporation, its wholly-owned subsidiaries, Kowon Technology Co., Ltd. (Kowon), a majority owned (93%) subsidiary located in Korea, Intoware Ltd. (Intoware), a majority owned (58%) subsidiary located in the United Kingdom (formerly known as Ikanos Consulting Limited), and eMDT America Inc. (eMDT), a majority owned (80%) subsidiary located in California (collectively, the Company). Ownership interests of Kowon, Intoware and eMDT not attributable to the Company are referred to as noncontrolling interests. All intercompany transactions and balances have been eliminated. The condensed consolidated financial statements for the three and nine months ended September 27, 2014 and September 28, 2013 are unaudited and include all adjustments which, in the opinion of management, are necessary to present fairly the results of operations for the periods then ended. These condensed consolidated financial statements should be read in conjunction with the Company's financial statements and notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 28, 2013.

The Company has a plan to close Kowon's facility, however as of September 27, 2014 and December 28, 2013, the sale of the facility does not meet the criteria for assets held for sale based on the anticipated time to sell the facility. During the second quarter of 2014, the Company paid approximately \$0.3 million to acquire an additional 29% ownership in its eMDT subsidiary.

The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contract with Customers (Topic 606). The reporting standard requires the Company to identify the performance obligations in a contract, determine the transaction price, allocate the transaction price to each of the obligations and then recognizes the transaction price as the obligations are fulfilled. The standard also requires certain new disclosures. The standard is effective for annual and interim reporting periods beginning after December 15, 2016. The Company is currently assessing the potential impact of the adoption of ASU 2014-09 on its consolidated financial statements.

During the nine months ended September 27, 2014, the change in the Company's accumulated other comprehensive income was the net of \$(0.4) million foreign currency translation adjustment and \$0.4 million unrealized holding gains on marketable securities.

Table of Contents

2. Discontinued Operations

On January 16, 2013 (the Closing Date), the Company sold its III-V product line, including all of the outstanding equity interest in KTC Wireless, LLC (KTC), a wholly owned subsidiary of the Company, to IQE KC, LLC and IQE plc pursuant to a Purchase Agreement (the Purchase Agreement) entered into on January 10, 2013, for a net purchase price of \$70.2 million and the gain on the sale, net of tax, was \$20.4 million. Under the terms of the Purchase Agreement, \$55 million was paid to the Company in January 2013, \$0.2 million was paid in April 2013 and the remaining \$15.0 million will be paid to the Company on the third anniversary of the Closing Date. The Company has recorded the \$15.0 million receivable at the discounted value of \$14.8 million, at the date of disposition. The Company is accreting this balance over the three year period.

The operating results of the III-V product line prior to the sale are reported within income from discontinued operations, net of tax, in the consolidated statement of operations.

The following table summarizes the results from discontinued operations (in millions) for the nine months ended September 28, 2013:

	September 28, 2013	
Net product and research and development revenues	\$2.3	
Loss from discontinued operations before income taxes	(0.2)
Provision for income taxes on discontinued operations	—	
Discontinued operations, net of tax	\$(0.2)
Gain on sale, net of \$13.1 million of tax	20.4	
Income from discontinued operations, net of tax	\$20.2	

Table of Contents**3. CASH AND EQUIVALENTS AND MARKETABLE SECURITIES**

The Company considers all highly liquid, short-term debt instruments with original maturities of three months or less to be cash equivalents.

Marketable debt securities consist primarily of certificates of deposit, medium-term corporate debt, and United States government and agency backed securities. The Company classifies these marketable debt securities as available-for-sale in "Marketable Debt Securities". The Company records the amortization of premium and accretion of discount on marketable debt securities in the results of operations.

The Company uses the specific identification method as a basis for determining cost and calculating realized gains and losses with respect to marketable debt securities. The gross gains and losses realized related to sales and maturities of marketable debt securities were not material during the nine months ended September 27, 2014 and the year ended December 28, 2013.

Investments in available-for-sale marketable debt securities are as follows at September 27, 2014 and December 28, 2013:

	Amortized Cost		Unrealized Gains		Unrealized Losses		Fair Value	
	2014	2013	2014	2013	2014	2013	2014	2013
U.S. government and agency backed securities	\$59,328,107	\$68,970,505	\$—	\$—	\$(275,304)	\$(686,113)	\$59,052,803	\$68,284,392
Corporate debt and certificates of deposit	17,925,335	27,767,513	—	—	(22,228)	(79,370)	17,903,107	27,688,143
Total	\$77,253,442	\$96,738,018	\$—	\$—	\$(297,532)	\$(765,483)	\$76,955,910	\$95,972,535

The contractual maturity of the Company's marketable debt securities is as follows at September 27, 2014:

	Less than One year	One to Five years	Greater than Five years	Total
U.S. government and agency backed securities	\$11,983,923	\$38,898,806	\$8,170,074	\$59,052,803
Corporate debt and certificates of deposit	14,325,572	2,598,785	978,750	17,903,107
Total	\$26,309,495	\$41,497,591	\$9,148,824	\$76,955,910

The Company conducts a review of its marketable debt securities on a quarterly basis for the presence of other-than-temporary impairment (OTTI). The Company assesses whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the balance sheet date. Under these circumstances OTTI is considered to have occurred (1) if the Company intends to sell the security before recovery of its amortized cost basis; (2) if it is "more likely than not" the Company will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis.

The Company further estimates the amount of OTTI resulting from a decline in the credit worthiness of the issuer (credit-related OTTI) and the amount of non credit-related OTTI. Noncredit-related OTTI can be caused by such factors as market illiquidity. Credit-related OTTI is recognized in earnings while noncredit-related OTTI on securities not expected to be sold is recognized in other comprehensive income (loss). The Company did not record an OTTI for the three and nine months ended September 27, 2014 and September 28, 2013.

Table of Contents**4. FAIR VALUE MEASUREMENTS**

Financial instruments are categorized as Level 1, Level 2 or Level 3 based upon the method by which their fair value is computed. An investment is categorized as Level 1 when its fair value is based on unadjusted quoted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An investment is categorized as Level 2 if its fair market value is based on quoted market prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, based on observable inputs such as interest rates, yield curves, or derived from or corroborated by observable market data by correlation or other means. An investment is categorized as Level 3 if its fair value is based on assumptions developed by the Company about what a market participant would use in pricing the assets.

The following table details the fair value measurements of the Company's financial assets:

		Fair Value Measurement September 27, 2014		
		Using:		
		Level 1	Level 2	Level 3
Cash and Equivalents	\$ 17,049,083	\$ 17,049,083	\$—	\$—
U.S. Government Securities	59,052,803	19,118,477	39,934,326	—
Corporate Debt	7,535,888	—	7,535,888	—
Certificates of Deposit	10,367,219	—	10,367,219	—
Vuzix Corporation	1,222,118	1,222,118	—	—
GCS Holdings	181,879	181,879	—	—
	\$95,408,990	\$37,571,557	\$57,837,433	\$—

		Fair Value Measurement December 28, 2013		
		Using:		
		Level 1	Level 2	Level 3
Cash and Equivalents	\$ 16,756,666	\$ 16,756,666	\$—	\$—
U.S. Government Securities	68,284,392	16,542,003	51,742,389	—
Corporate Debt	12,984,331	—	12,984,331	—
Certificates of Deposit	14,703,812	—	14,703,812	—
Vuzix Corporation	1,433,102	1,433,102	—	—
	\$ 114,162,303	\$ 34,731,771	\$ 79,430,532	\$—

The corporate debt consists of floating rate notes with a maturity that is over multiple years but has interest rates which are reset every three months based on the then current three month London Interbank Offering Rate (three month Libor). The Company validates the fair market values of the financial instruments above by using discounted cash flow models, obtaining independent pricing of the securities or through the use of a model which incorporates the three month Libor, the credit default swap rate of the issuer and the bid and ask price spread of the same or similar investments which are traded on several markets.

The carrying amounts of cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair value because of their short-term nature. If accrued liabilities were carried at fair value, these would be classified as Level 2 in the fair value hierarchy.

5. INVENTORY

Inventory is stated at the lower of cost (determined on the first-in, first-out) or market and consists of the following at September 27, 2014 and December 28, 2013:

	September 27, 2014	December 28, 2013
Raw materials	\$2,171,547	\$1,441,569
Work-in-process	1,331,138	1,003,540
Finished goods	419,710	632,946
	\$3,922,395	\$3,078,055

Table of Contents**6. NET (LOSS) INCOME PER SHARE**

Basic net (loss) income per share is computed using the weighted average number of shares of common stock outstanding during the period less any non-vested restricted shares. Diluted earnings per common share, if applicable, is calculated using weighted average shares outstanding and contingently issuable shares, less weighted average shares reacquired during the period. The net outstanding shares are adjusted for the dilutive effect of shares issuable upon the assumed conversion of the Company's common stock equivalents, which consist of outstanding stock options and unvested restricted stock units.

Weighted average common shares outstanding used to calculate earnings per share are as follows:

	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Weighted average common shares outstanding-basic	62,646,757	63,542,348	62,606,822	62,620,814
Stock options and non-vested restricted common stock	—	—	—	1,089,019
Weighted average common shares outstanding-diluted	62,646,757	63,542,348	62,606,822	63,709,833

The following were not included in weighted average common shares outstanding-diluted because they are anti-dilutive or performance or market conditions had not been met at the end of the period.

	September 27, 2014	September 28, 2013
Non-vested restricted common stock	3,359,148	1,445,000
Stock options	391,100	708,334
Total	3,750,248	2,153,334

Not included in weighted average common shares outstanding-diluted are the warrants to purchase 200,000 shares of the Company's common stock for \$3.49 per share.

7. STOCK-BASED COMPENSATION

The fair value of non-vested restricted common stock awards is generally the market value of the Company's common stock on the date of grant. The non-vested common stock awards require the employee to fulfill certain obligations, including remaining employed by the Company for one, two or four years (the vesting period) and in certain cases also require meeting either performance criteria or the Company's stock achieving a certain price. For non-vested restricted common stock awards which solely require the recipient to remain employed with the Company, the stock compensation expense is amortized over the anticipated service period. For non-vested restricted common stock awards which require the achievement of performance criteria, the Company reviews the probability of achieving the performance goals on a periodic basis. If the Company determines that it is probable that the performance criteria will be achieved, the amount of compensation cost derived for the performance goal is amortized over the anticipated service period. If the performance criteria are not met, no compensation cost is recognized and any previously recognized compensation cost is reversed. The Company recognizes compensation costs on a straight-line basis over the requisite service period for time-vested awards.

During the nine months ended September 27, 2014, the Company's 2010 Equity Plan was amended to increase the number of authorized shares by 1.9 million.

A summary of stock option award activity under the Equity Award plans as of September 27, 2014 and changes during the nine month period then ended is as follows (all options were vested as of September 27, 2014):

	Nine Months Ended September 27, 2014	
	Shares	Weighted Average Exercise Price
Balance, December 28, 2013	558,850	\$5.09

Edgar Filing: KOPIN CORP - Form 10-Q

Options forfeited/canceled	(131,000) 4.97
Options exercised	(36,750) 3.75
Balance, all exercisable, September 27, 2014	391,100	\$5.26

The following table summarizes information about stock options outstanding and exercisable at September 27, 2014:

12

Table of Contents

Range of Exercise Prices	Options Outstanding and Exercisable	
	Number Outstanding and Exercisable	Weighted Average Exercise Price
\$ 3.15—\$ 3.50	127,500	\$3.49
\$ 3.75—\$ 3.87	163,600	3.75
\$10.00	100,000	10.00
	391,100	5.26
Aggregate intrinsic value on September 27, 2014	\$1,700	

The weighted average remaining contractual life of the outstanding options is less than one year. The Company has issued warrants to purchase 200,000 shares of the Company's common stock for \$3.49 per share.

Non-Vested Restricted Common Stock

A summary of the activity for non-vested restricted common stock awards as of September 27, 2014 and changes during the nine month period then ended is presented below:

	Shares	Weighted Average Grant Fair Value
Balance, December 28, 2013	2,974,148	\$4.25
Granted	573,000	3.97
Forfeited	(50,000)) 4.44
Vested	(138,000)) 3.28
Balance, September 27, 2014	3,359,148	\$4.25

Included within the non-vested restricted common stock table above is 50,000 awards granted for which the performance conditions have yet to be determined and therefore a grant date has not yet been established for the award. No stock based compensation expense has been recorded relating to this award during the three and nine month period ended September 27, 2014.

Stock-Based Compensation

The following table summarizes stock-based compensation expense within each of the categories below as it relates to non-vested restricted common stock awards for the nine months ended September 27, 2014 and September 28, 2013 (no tax benefits were recognized):

	Nine Months Ended	
	September 27, 2014	September 28, 2013
Cost of component revenues	\$590,467	\$254,642
Research and development	773,106	258,187
Selling, general and administrative	2,191,881	3,136,075
Total	\$3,555,454	\$3,648,904

Unrecognized compensation expense for non-vested restricted common stock as of September 27, 2014 totaled \$4.7 million and is expected to be recognized over a weighted average period of two years.

8. OTHER ASSETS AND NOTE RECEIVABLE

During the nine month period ended September 27, 2014, the Company wrote-off its \$1.3 million investment in Kobrite and recorded approximately \$0.1 million of losses in Equity Loss in Unconsolidated Affiliate in the Statement of Operations. Prior to the write-off, the Company accounted for its 12% ownership interest using the equity method. One of the Company's directors is a member of the Board of Directors of Bright LED, principal investor of KoBrite.

Table of Contents

The Company has recorded a \$14.9 million note receivable resulting from the sale of its III-V product line and its investment in KTC which is due January 16, 2016. The receivable is collateralized by certain assets of the buyer of the III-V product line. The buyer has outstanding debt and the repayment of the receivable is subject to the buyer remaining within its debt compliance obligations at the time of repayment.

9. ACCRUED WARRANTY

The Company typically warrants its products against defect for 12 months. A provision for estimated future costs and estimated returns for credit relating to warranty is recorded in the period when product is shipped and revenue recognized, and is updated as additional information becomes available. The Company's estimate of future costs to satisfy warranty obligations is based primarily on historical warranty expense experienced and a provision for potential future product failures. Changes in the accrued warranty for the nine months ended September 27, 2014 are as follows:

Balance, December 28, 2013	\$716,000	
Additions	332,000	
Claim and reversals	(332,000)
Balance, September 27, 2014	\$716,000	

10. INCOME TAXES

The Company's tax provision of approximately \$44,000 and tax benefit of approximately \$62,000 for the three and nine month periods ended September 27, 2014 represent the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary.

For the three and nine month periods ended September 28, 2013, discontinued operations reflects the gain on the sale of the III-V product line, including all of the outstanding equity interest in KTC Wireless, LLC. The Company applied current period losses to offset the gain on the sale of the III-V product line. The federal tax benefit from the utilization of the net operating losses is shown in the Company's tax provision in the condensed consolidated statement of operations.

In accordance with U.S. GAAP, intraperiod tax allocation provisions require allocation of a tax expense to the gain on discontinued operations based upon the Company's statutory tax rate. The Company has net operating loss (NOL) carryforwards available to offset the tax expense. The benefit of these NOLs is reflected in the tax benefit from continuing operations. Accordingly, the Company recorded a tax expense in discontinued operations and a benefit in continuing operations of approximately \$13.1 million in 2013.

As of September 27, 2014, the Company has available for tax purposes U.S. federal NOLs of approximately \$65.6 million expiring through 2033. The Company has recognized a full valuation allowance on its domestic and certain foreign net deferred tax assets due to the uncertainty of realization of such assets. The Company has not historically recorded, nor does it intend to record the tax benefits from stock awards until realized. Unrecorded benefits from stock awards approximate \$10.1 million.

The Company's income tax returns have not been examined by the Internal Revenue Service and are subject to examination for all years since 2002. State income tax returns are generally subject to examination for a period of 3 to 5 years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

Table of Contents

11. SEGMENTS AND GEOGRAPHICAL INFORMATION

The Company's chief operating decision maker is its Chief Executive Officer. The Company has determined it has two reportable segments, FDD, the manufacturer of its reflective display products for test and simulation products, and Kopin, which is comprised of Kopin Corporation, Kowon, Intoware and eMDT. The following table presents the Company's reportable segment results (in thousands):

	Three Months Ended			September 28, 2013		
	September 27, 2014			Kopin	FDD	Total
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$8,541	\$991	\$9,532	\$4,131	\$819	\$4,950
Net (loss) income attributable to the controlling interest	(4,500)	(469)	(4,969)	9,071	(300)	8,771
Total assets	125,172	1,552	126,725	155,967	3,359	159,326
Long-lived assets	4,856	302	5,158	5,609	582	6,191

The total assets of Kopin is the net of \$4.5 million and \$3.7 million in intercompany loans to FDD as of September 27, 2014 and September 28, 2013, respectively.

	Nine Months Ended			September 28, 2013		
	September 27, 2014			Kopin	FDD	Total
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$18,451	\$2,720	\$21,170	\$14,792	\$2,556	\$17,348
Net (loss) income attributable to the controlling interest	(21,603)	(1,307)	(22,910)	6,234	(1,284)	4,950

During the three and nine month periods ended September 27, 2014 and September 28, 2013, the Company derived its sales from the following geographies (as a percentage of net revenues):

	Three Months Ended		September 28, 2013		Nine Months Ended		September 28, 2013	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
United States	68	% 36	% 56	% 60	%	%	%	%
Others	3	% 4	% 1	% 1	%	%	%	%
Americas	71	% 40	% 57	% 61	%	%	%	%
Asia-Pacific	21	% 47	% 31	% 30	%	%	%	%
Europe	8	% 13	% 12	% 9	%	%	%	%
Total Revenues	100	% 100	% 100	% 100	%	%	%	%

12. LITIGATION

The Company may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Table of Contents

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, including, without limitation, statements made relating to our expectation that we will continue to pursue other U.S. government development contracts for applications that relate to our commercial product applications; our expectation that we will prosecute and defend our proprietary technology aggressively; our belief that it is important to retain personnel with experience and expertise relevant to our business; our belief that our products are targeted towards markets that are still developing and our competitive strength is creating new technologies; our belief that it is important to invest in research and development to achieve profitability even during periods when we are not profitable; our belief that we are a leading developer and manufacturer of advanced miniature displays; our belief that our products enable our customers to develop and market an improved generation of products; our belief that the technical nature of our products and markets demands a commitment to close relationships with our customers; our belief that our Golden-i industrial reference design will provide for increased worker productivity, safety and improved manufacturing quality; our belief that our ability to develop and expand our wearable technologies and to market and license our wearable technologies will be important for our revenue growth and ability to achieve profitability and positive cash flow; the impact of the timing of development of the market segment for our wearable computing products on our ability to grow revenues; our expectation that we will incur significant development and marketing costs in fiscal year 2014 to commercialize our wearable technologies; our statement that we may make equity investments in companies; our expectation that the cash and marketable debt securities held by Kowon will eventually be remitted back to the U.S.; our expectation that sales of our display products to the U.S government for use in thermal weapon sights will continue through the first six months of 2015; our expectation that revenue will be between \$24 million and \$28 million for fiscal year 2014; our ability to forecast our revenues and operating results; our expectation that we will have a consolidated net loss in the range of \$29 million to \$33 million in fiscal year 2014; our expectation that excluding the effects of working capital and other investing and financing activities our cash usage will be between \$23 million and \$26 million to fund operations for fiscal year 2014; our expectation that the U.S. government will significantly reduce funding for programs through which we sell high margin military products; our inability to predict the amount of funding for research and development by the U.S. government; our belief that a strengthening of the U.S. dollar could increase the price of our products in foreign markets; the impact of new regulations relating to conflict minerals on customer demands and increased costs related to compliance with such regulations; our belief that our future success will depend primarily upon the technical expertise, creative skills and management abilities of our officers and key employees rather than on patent ownership; our belief that our extensive portfolio of patents, trade secrets and non-patented know-how provides us with a competitive advantage in the wearable technologies market; our belief that our ability to develop innovative products enhances our opportunity to grow within our targeted markets; our belief that continued introduction of new products in our target markets is essential to our growth; our expectation that our display products will benefit from further general technological advances in the design and production of integrated circuits and active matrix LCDs, resulting in further improvements in resolution and miniaturization; our belief that our manufacturing process offers greater miniaturization, reduced cost, higher pixel density, full color capability and lower power consumption compared to conventional active matrix LCD manufacturing approaches; our expectation not to pay cash dividends for the foreseeable future and to retain earnings for the development of our businesses; our expectation that we will expend between \$2 million and \$3 million on capital expenditures over the next twelve months; our expectation that competition will increase; our belief that small form factor displays will be a critical component in the development of advanced wireless communications systems; our belief that wireless handset makers are looking to create products that complement or eventually replace wireless handsets; our belief that general technological advances in the design and fabrication of integrated circuits, LCD technology and LCD manufacturing processes will allow us to continue to enhance our display product manufacturing process; our belief that continued introduction of new products in our target markets is essential to our growth; our belief that our available cash resources will support our operations and capital needs for at least the next twelve months; our expectation that we may be subject to alternative minimum taxes, foreign taxes and state income taxes in 2014; our expectation that the adoption of certain accounting standards

will not have a material impact on our financial position or results of operations; our belief that our business is not disproportionately affected by climate change regulations; our belief that our operations have not been materially affected by inflation; and our belief that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate, management's beliefs, and assumptions made by management. In addition, other written or oral statements, which constitute forward-looking statements, may be made by or on behalf of us. Words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “could”, “seeks”, “estimates” and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that could cause or contribute to such differences in outcomes and results include, but are not limited to, those discussed below in Item 1A and those set forth in our other periodic filings filed

Table of Contents

with the Securities and Exchange Commission. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future.

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We continually evaluate our estimates used in the preparation of our financial statements, including those related to revenue recognition under the percentage of completion method, bad debts, inventories, warranty reserves, investment valuations, valuation of stock compensation awards and recoverability of deferred tax assets. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not apparent from other sources. Actual results will most likely differ from these estimates. Further detail regarding our critical accounting policies can be found in "Item 7. Management Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 28, 2013.

Business Matters

On January 16, 2013 (the Closing Date), we completed the sale of our III-V product line, including all of the outstanding equity interest in KTC Wireless, LLC, a wholly-owned subsidiary that held our investment in Kopin Taiwan Corporation (KTC), to IQE KC, LLC and IQE plc (collectively the "Buyer"). The aggregate purchase price was approximately \$70 million of which \$15 million is scheduled to be paid to us on the third anniversary of the Closing Date. We discounted the \$15 million and recorded the amount due at \$14.8 million on the Closing Date. The Buyer has outstanding debt and the repayment of the receivable is subject to the Buyer remaining within its debt compliance obligations at the time of repayment.

Our Kowon facility is for sale and when it is sold we anticipate that a final determination of the value of the shares held by the minority shareholders will be made and we will purchase these shares. The sale of the facility does not meet the criteria for assets held for sale based on the anticipated time to sell the facility.

Ikanos Consulting Limited (Ikanos) changed its name as of September 30, 2014 and is now known as Intoware Limited (Intoware).

We were incorporated in Delaware in 1984 and offer Kopin Wearable technology, a collection of component technologies and software which can be integrated to create headset reference designs which use voice as the user interface and through the use of wireless technologies can contact other users or information from the cloud. Our customers can license the reference design or purchase our components individually.

The headset reference designs range from a headset which resembles typical eyeglasses but includes audio capabilities allowing the user to communicate with other users to our industrial headset reference design, called Golden-i, which includes an optical pod with one of our display products, a microprocessor, memory and various commercially available software packages that we license, such as Microsoft Windows CE or Android, Nuance Dragon NaturallySpeaking, and Hillcrest Labs motion control. Our headset reference designs typically utilize operating system software we developed and include our proprietary noise cancellation technologies. Certain reference designs include an optical pod which allows the user to view information such as WEB data, technical diagrams, streaming video or face to face communication. When viewing schematics or similar documents the user is capable of zooming-in to see finer details or zooming out to see an entire system perspective. Some headset reference designs have a camera feature which enables the user to stream live video to a remote subject matter expert so that both the user and expert can analyze the issue at the same time.

We believe Kopin's Wearable technology will provide for increased worker productivity, safety and improved manufacturing quality through more efficient issue resolution and improved communication. Kopin Wearable reference designs are targeted for markets where the user needs a much greater range of functionality than is typically provided by wireless devices such as handsets, smart phones, tablets or Bluetooth headsets and either due to the requirements of their usage patterns, occupation, or for improved productivity the user is better served with voice

recognition as the primary interface as opposed to a touch screen or keyboard.

The components we offer include micro displays, backlights, optic, and noise cancellation technologies. Our principal display products are miniature high density color or monochrome active matrix LCDs with resolutions which range from approximately 320 x 240 resolution to 2048 x 2048 resolution sold in either a transmissive or reflective format. We sell our displays individually, in an Electronic Viewfinder (EVF) which includes a single display, backlight and optics in a plastic housing or in a Higher-Level Assembly (HLA) which contain a display, light emitting diode based illumination, optics, and electronics in a sealed housing. EVFs are sold to commercial and industrial customers and HLA's are specifically configured and sold to military customers.

Table of Contents

Our transmissive display products, which we refer to as CyberDisplay™ products, utilize high quality, single crystal silicon-the same high quality silicon used in conventional integrated circuits. This single crystal silicon is not grown on glass; rather, it is first formed on a silicon wafer and patterned into an integrated circuit (including the active matrix, driver circuitry and other logic circuits) in an integrated circuit foundry. The silicon wafer is then sent to our facility and the integrated circuit is lifted off as a thin film and transferred to glass using our proprietary Wafer™ Engineering technology, so that the transferred layer is a fully functional active matrix integrated circuit which now resides on a transparent substrate.

We have three sources of revenues: component revenues, which are our primary source of revenues, research and development (R&D) revenues primarily from contracts issued by branches of the U.S. military and license revenues from our reference designs. To date our license revenues have been de minimis. For the three and nine months ended September 27, 2014, R&D revenues were \$0.5 million and \$3.0 million, or 0.5% and 14% of total revenues, respectively. This contrasted with \$0.1 million and \$1.3 million or 1% and 7% of total revenues, respectively, for the corresponding period in 2013.

Results of Operations

The three and nine month periods ended September 27, 2014 and September 28, 2013 are referred to as 2014 and 2013, respectively. The year ended period December 28, 2013 is referred to as fiscal year 2013.

Revenues. For the three and nine month periods ended September 27, 2014 and September 28, 2013, our revenues, which include component sales and amounts earned from research and development contracts, were as follows (in millions):

Display Revenues by Category	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Military Applications	\$5.7	\$1.5	\$8.3	\$7.5
Consumer Applications	0.6	1.7	2.3	4.0
Industrial Applications	1.0	0.5	2.8	1.8
Wearable Applications	1.7	1.2	4.8	2.8
Research & Development	0.5	0.1	3.0	1.3
Total	\$9.5	\$5.0	\$21.2	\$17.4

Sales of our products for Military Applications increased in 2014 as compared to 2013 because of an increase in demand from the U.S. government for our products that are used in thermal weapon sights. We expect orders to continue for this program through the first six months of 2015. Consumer Applications primarily represents customers who purchase our products for digital still camera (DSC) applications. We believe the overall market for DSCs has been declining due to the increase in use of cameras in smartphones. Industrial Applications represents customers who purchase display products for use in equipment such as 3D metrology. The increase in Wearable Applications revenues in 2014 as compared to 2013 is as a result of both increased sales to existing customers and obtaining new customers. Wearable Applications represents sales of our components for products that are worn on the body for other than military applications.

We have developed headworn, voice and gesture controlled, hands-free cloud computing reference designs that have an optical pod which includes our microdisplay, a backlight and an optical lens. We refer to the headset reference designs and other technologies we have developed as Kopin Wearable technologies. We offer to license the headset reference designs and sell our components. To date licensing revenues have been de minimis and sales of our components are shown in the table above under Wearable Applications. We believe our ability to develop and expand the Kopin Wearable technologies and to market and license the Kopin Wearable technologies will be important for us to achieve revenue growth, positive cash flow and to achieve profitability. This is the first product that we have developed that has a significant software component. The markets the Kopin Wearable technologies can be used in already have a number of existing product offerings such as ruggedized lap-top computers and tablets. The companies that offer these products are significantly larger than we are. We expect to incur significant development and marketing costs in fiscal year 2014 to commercialize the Kopin Wearable technologies. We currently expect to have revenues of between \$24 million and \$28 million for fiscal year 2014, however our ability to forecast revenues

derived from Kopin Wearable technologies, which may significantly impact our results of operations, is very limited. We currently expect to have a consolidated net loss in the range of \$29 million to \$33 million in fiscal year 2014 and, excluding the impact of the effects of working capital and other investing and financing activities, we expect cash usage between \$23 million and \$26 million to fund operations for fiscal 2014.

We have provided estimated fiscal year 2014 revenue and net loss ranges in order for the investor to understand the impact of expected changes in our business in fiscal year 2014 as compared to 2013. However, we believe we have an opportunity to position ourselves in the growing wearable cloud computing market and therefore our primary focus in fiscal

Table of Contents

year 2014 is on developing technology and products and establishing relationships, and not necessarily achieving revenue, net loss or any other particular financial metric. Accordingly, our fiscal year 2014 net losses may exceed our current estimates.

International sales represented 43% and 39% of product revenues for the nine months ended September 27, 2014 and September 28, 2013, respectively. Our international sales are primarily denominated in U.S. currency. Consequently, a strengthening of the U.S. dollar could increase the price in local currencies of our products in foreign markets and make our products relatively more expensive than competitors' products that are denominated in local currencies, leading to a reduction in sales or profitability in those foreign markets. In addition, our Korean subsidiary, Kowon, holds U.S. dollars. As a result, our financial position and results of operations are subject to exchange rate fluctuation in transactional and functional currency. We have not taken any protective measures against exchange rate fluctuations, such as purchasing hedging instruments with respect to such fluctuations, because of the historically stable exchange rate between the Japanese yen, Korean won and the U.S. dollar.

Cost of Component Revenues.

	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Cost of component revenues (in millions):	\$5.2	\$4.6	\$13.6	\$16.8
Cost of component revenues as a % of net component revenues	57.4	% 94.5	% 74.6	% 104.5

Cost of component revenues, which is comprised of materials, labor and manufacturing overhead related to the production of our products decreased as a percentage of revenues in 2014 as compared to 2013 due an increase in sales of higher margin products in 2014 and the usage of certain raw materials used in military programs that were previously written-off as excess but were used in the 2014 production. In 2013, we compared forecasted demand for our military programs against inventory on-hand and provided reserves for estimated excess inventory. In the second quarter of 2014, we received additional orders for military products and we have been using the inventory reserved as excess in the fulfillment of the orders.

Research and Development. Research and development (R&D) expenses are incurred in support of internal development programs or programs funded by agencies or prime contractors of the U.S. government and commercial partners. In fiscal year 2014, our R&D expenditures will be related to our display products and wearable technologies. R&D revenues associated with funded programs are presented separately in revenue in the statement of operations. Research and development costs include staffing, purchases of materials and laboratory supplies, circuit design costs, fabrication and packaging of display products, and overhead. For the nine months ended September 27, 2014 and September 28, 2013, R&D expense was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Funded	\$1.0	\$0.2	\$3.3	\$1.0
Internal	3.8	5.4	11.8	12.5
Total research and development expense	\$4.8	\$5.6	\$15.1	\$13.5

R&D expense increased in the nine months ended September 27, 2014 as compared to the prior year primarily because of an increase in costs to support customer funded R&D programs.

Selling, General and Administrative. Selling, general and administrative (S,G&A) expenses consist of the expenses incurred by our sales and marketing personnel and related expenses, and administrative and general corporate expenses.

	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
	\$5.0	\$5.0	\$14.9	\$15.7

Selling, general and administration expense (in millions):

Selling, general and administration expense as a % of revenues	52.6	%	102.0	%	70.5	%	90.2	%
--	------	---	-------	---	------	---	------	---

S,G&A expenses are comparable in the third quarter of 2014 to the same quarter in 2013 which reflects an increase in stock compensation expenses being offset by a reduction in patent and certain other expenses.

Other Income and Expense

19

Table of Contents

	Three Months Ended		Nine Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Other income and expense (in millions):	\$0.5	\$1.5	\$(0.6) \$0.2

Other income and expense, net, is primarily composed of interest income, foreign currency transaction and remeasurement gains and losses incurred by our Korean and UK-based subsidiaries and gains and losses resulting from the impairment or sale of investments. During the three months ended September 27, 2014 and September 28, 2013, we recorded \$0.2 million of foreign currency gains and \$0.8 million of foreign currency losses, respectively. For the nine months ended September 27, 2014 and September 28, 2013, we recorded \$0.2 million of foreign currency losses.

During the nine months ended September 27, 2014, we recorded an impairment of \$1.3 million related to the write-off of our equity investment in KoBrite. During the nine months ended September 28, 2013, we recorded an impairment of \$2.5 million related to the write-off of a cost based investment. During the three and nine month periods ended September 28, 2013 we recorded a \$1.9 million gain on the sale of our investments in Advanced Semiconductor Company and WIN Semiconductor Corp.

Equity Losses in Unconsolidated Affiliates. For the three and nine months ended September 27, 2014 and September 28, 2013, the equity loss in unconsolidated affiliate consists of our approximate 12% share of the losses of KoBrite, incurred prior to our writing the investment off. During the nine months ended September 27, 2014, we funded the operations of one of our investments. The impact for the three and nine month periods ended September 27, 2014 was approximately \$35,000 and \$157,000 respectively.

Tax Benefit. For the three and nine months ended September 27, 2014, we recorded tax provision of \$44,000 and a tax benefit of \$62,000, respectively, compared to a tax benefit of \$33,000 and \$12.9 million, respectively, for the three and nine months ended September 28, 2013. The tax benefit recorded for the nine month period ended September 28, 2013 was a result of the gain on sale of our discontinued operations. In accordance with U.S. GAAP, intraperiod tax allocation provisions require allocation of a tax expense to the gain on discontinued operations based upon our statutory tax rate. We have net operating loss carryforwards available to offset the tax expense. The benefit of these net operating loss carryforwards is reflected in the tax benefit from continuing operations. Accordingly, we have recorded a tax expense in discontinued operations and a benefit in continuing operations of \$13.1 million.

Net Income Attributable to Noncontrolling Interest. We own approximately 93% of the equity of Kowon, approximately 58% of the equity of Intoware, and 80% of the equity of eMDT. Net loss attributable to noncontrolling interest on our consolidated statement of operations represents the portion of the results of operations of our majority owned subsidiaries which is allocated to the shareholders of the equity interests not owned by us. The change in net income attributable to noncontrolling interest is the result of the change in the results of operations of Kowon, Intoware and eMDT for the three and nine month periods ended September 27, 2014.

Liquidity and Capital Resources

As of September 27, 2014, we had cash and equivalents and marketable securities of \$94.0 million and working capital of \$91.8 million compared to \$112.7 million and \$108.4 million, respectively, as of December 28, 2013. The change in cash and equivalents and marketable securities was primarily due to cash provided by investing activities of \$17.9 million and the exercise of stock options of \$0.1 million, partially offset by net outflow of cash used in operating activities of \$17.4 million and the repurchase of our common stock of \$0.3 million.

Cash and marketable debt securities held in U.S. dollars:

Domestic	\$80,913,424
Foreign	10,557,302
Subtotal cash and marketable debt securities	91,470,726
Cash and marketable debt securities held in other currencies and converted to U.S. dollars	2,534,267
Total cash and marketable debt securities	\$94,004,993

We have no plans to repatriate the cash and marketable debt securities held in our foreign subsidiaries FDD and Intoware and, as such, we have not recorded any deferred tax liability with respect to such cash. The operations at our

Korean facility, Kowon, have ceased. Kowon has approximately \$13.0 million of cash and marketable debt securities which we anticipate will

Table of Contents

eventually be remitted to the U.S. and, accordingly, we have recorded deferred tax liabilities associated with its unremitted earnings.

We lease facilities located in Westborough, Massachusetts, Santa Clara, California and Scotts Valley, California under non-cancelable operating leases. The Westborough, Santa Clara and the Scotts Valley leases expire in 2023, 2016 and 2015, respectively.

We lease a facility in Dalgety Bay, Scotland which expires in 2016, and also lease two facilities in Nottingham, United Kingdom, which expire in 2016 and 2017.

We expect to expend between \$2 million and \$3 million on capital expenditures over the next twelve months.

As of September 27, 2014, we had U.S. federal and state tax loss carry-forwards, which may be used to offset U.S. future federal and state taxable income. We also had tax loss carry-forwards generated in our foreign subsidiaries which may be used to offset future foreign taxable income. We may be subject to alternative minimum taxes, foreign taxes and state income taxes depending on our taxable income and sources of taxable income.

Historically, we have financed our operations primarily through public and private placements of our equity securities and cash generated from operations. We believe our available cash resources will support our operations and capital needs for at least the next twelve months.

Seasonality

There has been no seasonal pattern to our sales in fiscal years 2014 and 2013.

Contractual Obligations

The following is a summary of our contractual payment obligations for operating leases as of September 27, 2014:

Contractual Obligations	Total	Less than 1 year	1-3 Years	3-5 years	More than 5 years
Operating Lease Obligations	\$6,540,528	\$ 1,248,984	—\$2,363,627	\$1,914,833	\$ 1,013,084

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We invest our excess cash in high-quality U.S. government, government-backed (Fannie Mae, FDIC guaranteed bonds and certificates of deposit) and corporate debt instruments, which bear lower levels of relative risk. We believe that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material to our cash flows or income. It is possible that interest rate movements would increase our unrealized gain or loss on interest rate securities. We are exposed to changes in foreign currency exchange rates primarily through our translation of our foreign subsidiaries' financial position, results of operations, and transaction gains and losses as a result of non U.S. dollar denominated cash flows related to business activities in Asia and Europe, and remeasurement of U.S. dollars to the functional currency of our U.K. and Kowon subsidiaries. We are also exposed to the effects of exchange rates in the purchase of certain raw materials which are in U.S. dollars but the price on future purchases is subject to change based on the relationship of the Japanese Yen to the U.S. dollar. We do not currently hedge our foreign currency exchange rate risk. We estimate that any market risk associated with our international operations is unlikely to have a material adverse effect on our business, financial condition or results of operation. Our portfolio of marketable debt securities is subject to interest rate risk although our intent is to hold securities until maturity. The credit rating of our investments may be affected by the underlying financial health of the guarantors of our investments. We use silicon wafers but do not enter into forward or futures hedging contracts.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective as of September 27, 2014 to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely

decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that was conducted during the quarter ended September 27, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

We may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for our fiscal year ended December 28, 2013. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sale of Unregistered Securities

In the past three years we have not sold any securities which were not registered under the Securities Act.

Use of Proceeds

The information required by this item regarding use of proceeds by the Company is reported herein in Part 1, Item 2 under "Liquidity and Capital Resources".
