ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL  
CONDITION AND RESULTS OF OPERATIONS

Overview

ADDvantage Technologies, through its subsidiaries TULSAT Corporation and Lee Enterprise, specializes in the refurbishment of previously owned cable television ("CATV") equipment and the distribution of new and surplus equipment to CATV operators and other broadband communication companies.

Results of Operations

Comparison of Results of Operations for the Three Months Ended December 31, 2000 and December 31, 1999

Gross profits increased \$56,717 or 2.3% in the first quarter of the fiscal year 2001, as compared to 2000. This increase was primarily due to an increase in repair services offset by a reduction in sales of products with higher profit margins.

Net Sales. Net Sales increased \$280,511 or 6.2%, to \$4,816,682 in the first quarter of fiscal 2001 from \$4,536,171 for the same period in fiscal 2000. The increase was primarily due to repair services, which rose more than 71.5% for the quarter and new products, which increased 46.9%. Sales were affected by severe weather and an overall cable industry slowdown that occurred during the quarter.

Cost of Sales. Cost of goods sold increased to \$2,324,799 for the first three months of fiscal 2001 from \$2,101,005 for the first three months of fiscal 2000. The increase was primarily due to sales in new products, such as fiber optic cable, which usually have lower margins than the refurbished gear.

Operating Expenses. Operating expenses increased to \$1,286,001 in the first three months of 2001 from \$1,127,458 in the first three months of 2000. The increase in operating expenses was primarily due to the higher costs resulting from the acquisition of LEE CATV.

Income from Operations. Income from operations decreased 7.8% to \$1,205,882 for the first three months of 2001 from \$1,307,708 for the first three months of 2000. This decrease was primarily due to a sales product mix with lower profit margins combined with higher operating expenses as discussed in the previous paragraph.

Liquidity and Capital Resources

On November 4, 2000, the Bank of Oklahoma increased the Company's line of credit under which it is authorized to borrow up to \$12,000,000 and reduced the borrowing rate to 1 1/4% below prime (8.25% at December 31, 2000). This line of credit will provide the lesser of \$6,000,000 or the sum of 80% of qualified accounts receivable and 40% of qualified inventory in a revolving Line of Credit for working capital purposes, \$4,000,000 for future acquisitions meeting Bank of Oklahoma credit guidelines and \$2,000,000 to be used at the Company's discretion based on assets purchased. The line of

## Edgar Filing: ADVANTAGE TECHNOLOGIES GROUP INC - Form 10QSB

credit is collateralized by inventory, accounts receivable, equipment and fixtures, and general intangibles.

The Company finances its operations primarily through internally generated funds and a bank line of credit totaling \$6,000,000 reserved for working capital purposes. At December 31, 2000, the revolving line of credit consisted of a \$2,140,604 balance outstanding due June 30, 2001, with interest payable monthly at Chase Manhattan Prime less 1.25% (8.25% at December 31, 2000). The company also owes \$135,594 balance remaining on a note resulting from the Diamond purchase, payable quarterly at 8% to the former owners.

Stockholder loans include a \$1,250,000 note bearing interest the same rate as the Company's bank line of credit, and is subordinate to the bank notes payable.

The Company has authorized the repurchase of up to \$1,000,000 of its outstanding common stock from time to time in the open market at prevailing market prices or in privately negotiated transactions. The repurchased shares will be held in treasury and used for general corporate purposes including possible use in the company's employees stock plans or for acquisitions.
