Non-GAAP Information

In addition to disclosing results determined in accordance with GAAP, Solectron also discloses non-GAAP results of operations that exclude certain items. By disclosing this non-GAAP information, management intends to provide investors with additional information to further analyze the company s performance, core results and underlying trends. Management utilizes a measure of net income and earnings per share on a non-GAAP basis that excludes certain charges to better assess operating performance.

Consistent with industry practice, management has historically applied these non-GAAP measures when discussing earnings or earnings guidance and intends to continue doing so.

Non-GAAP information is not determined using GAAP. Therefore, the information is not necessarily comparable to other companies and should not be used to compare the company s performance over different periods. Non-GAAP information should not be viewed as a substitute for, or superior to, net income or other data prepared in accordance with GAAP as measures of our profitability or liquidity. Users of this financial information should consider the types of events and transactions for which adjustments have been made. In addition, Solectron s GAAP financial results often reflect

one-time events and adjustments, and therefore a comparison of GAAP results over different periods can be difficult.
