CTG REPORTS 2003 FIRST QUARTER FINANCIAL RESULTS

REVENUES CONTINUE TO RISE SEQUENTIALLY; EARNINGS MEET GUIDANCE

BUFFALO— N.Y. — April 14— 2003 — CTG (NYSE: CTG)— an international information technology (IT) solutions staffing company— today announced its financial results for the first quarter of 2003. CTG's revenues for the first quarter of 2003 were \$63.9 million— compared with revenues of \$69.9 million in the first quarter of 2002. CTG's net income for the first quarter of 2003 was \$0.1 million— or \$0.01 per diluted share— compared with net income before cumulative effect of change in accounting principle in the 2002 first quarter of \$0.4 million— or \$0.03 per diluted share.

"CTG's first quarter financial results met our expectations— and our revenues rose sequentially for the second quarter in a row — key indicators that we are faring better than many IT services and consulting firms in the current environment—" said CTG Chairman and Chief Executive Officer James R. Boldt. "Our staffing business— which is the largest contributor to CTG's revenues— continues to rebound with the recent addition of two significant new client relationships in the first quarter. The 2003 first quarter also represents our third consecutive quarter of sequential growth for our strategic staffing offering which supports large North American companies. The growth in strategic staffing headcount has approximated 4% in each of the last three quarters— which is equivalent to an annualized growth rate of over 16%. Another indicator that our business is gaining strength is the 5% sequential increase in our daily revenue run rate in the 2003 first quarter— a quarter with three fewer billing days than the fourth quarter of 2002 and several weather-related office closings."

Mr. Boldt added— "Prospects for our healthcare IT practice remain very good. With the release of software compliant with the Health Insurance Portability and Accountability Act (HIPAA)— we have begun the post-assessment development and integration remedial work related to HIPAA. Our expanded e-security capabilities will support this

higher-value HIPAA solutions work— as well as the rest of our business— as corporate demand for improved information security continues to grow. As to application management outsourcing (AMO)— we have seen delays in client outsourcing decisions in the last two quarters for a variety of reasons— including economic and global uncertainty. In recent weeks we have seen that situation change— however— and have begun to see clients that had elected to delay outsourcing decisions reopen negotiations."

CTG also issued guidance for the second quarter of 2003. Based on current business and market conditions— CTG expects that its revenues and net income per diluted share for the second quarter of 2003 will range from \$65 million to \$67 million and \$0.02 to \$0.04— respectively.

Mr. Boldt concluded— "We are feeling cautiously optimistic that our business is starting to turn the corner. Due to the increased demand we are experiencing for staffing services and the two additional billing days— we expect sequential revenue growth of 2% to 5% in the second quarter. Based on the strength of our staffing business and our strategy of focusing on core competencies and key vertical markets— CTG is well positioned to benefit as the IT services market improves."

Backed by 37 years' experience— CTG provides IT application management— consulting— software development and integration— and staffing solutions to help Global 2000 clients focus on their core businesses and use IT as a competitive advantage to excel in their markets. CTG combines in-depth understanding of our clients' businesses with a full range of integrated services and proprietary ISO 9001-certified service methodologies.
